## THE IMPERIAL GAZETTEER.

From Captain W. H. Smyth, R.N., K.S.F., D.C.L., F.R.S., \&c., President of the Royal Geographical Society of London.
I have carefully looked over the First Division of the "Imperial Gazettecr," just published by you, and I am satisfied that it will prove an eminently useful aid to Geography, being compiled with accuracy and attention. It is also well printed, and beautifully illustrated.

I shall mention this opinion to some of the Members of the Royal Geographical Society, at their meeting this evening.

From G. A. Walker Arnott, LL.D., F.L.S., F.R.S.E., \&ec., Professor of Botany in the University of Glasgow.
I have looked over, with great care, the First Division of your "Imperial Gazetteer," and have no hesitation in approving highly of the plan on which it is to be conducted, and pronouncing it to be a more valuable contribution to our geographical works of the present day than any other of the same kind with which I am acquainted. The addition of the ancient name, when the place was known to the Romans, renders it, at the same time, a classical work; while the mention of the name by which a place on the Continent is known to its own inhabitants, if different from the English one for it, removes an objection to which most Gazetteers are subject. I need not say that the value of the Work is much enhanced by the beauty of the woodcuts.

From Captain Chas. Drinkwater Bethune, R.N., C.B., F.R.G.S., of the Harbour Department, Admiralty.

So far as a cursory examination of the First Division of your "Imperial Gazetteer" enables me to speak, it appears to be carefully and correctly compiled.

I am aware of the difficulties attending the preparation of such a Work, and to give an opinion on it, of any value, would require more attentive examination than I can afford leisure for. I hope that it may meet with a large and increasing sale, of which there is little doubt, if it be continued as it has been begun.
Cnotpainthume

From C. Piazzi Smyti, F.R.S.E., F.R.A.S., AstronomerRoyal for Scotland, and Professor of Practical Astronomy in the University of Edinburgh.
The First Part of your "Imperial Gazetteer" appears so excellent in every way, that I feel bound to give you some expression of my opinion thereon.
Accuracy is doubtless the first requisite in a book of this description, and seems to have been attained in a very high degree; not only in the well-written descriptions of the older countries, but in the collecting together of the latest information regarding the new ; and I thus saw with much pleasure, that the discoveries of Sir James Ross's Antarctic Expedition had been turned to full acconnt; that there was afcurate and abundant information of our colonies in Australia, and even New Zealand; and that the recent developments of the geography of the interior of N. and S. Africa, but a few months old, have been effectively described.

The literary composition of the various articles, as well as their length, has added a readable and interesting character to a work, which is too generally, by reason of the uninviting look of its terse symbolical descriptions, a mere book of occasional reference. This pleasing complexion, as well as the use and value of the "Imperial Gazetteer," is likewise further enhanced, by the numerous illustrations in the shape of maps and views. Such pictorial additions often tell more than pages of letter-press alone, and tell it in a more peculiarly convincing and instructive manner; and while you most properly adhere to the true scientific rule of giving the authority for every woodcut, they are all of a degree of excellence in fine art-as well in the style of the original drawing, as in the execution of the engraving-which it is as rare, as it is pleasing, to meet with in any scientific publication. I look forward, therefore, with much interest to the completion of such a Work.

From Lieut. H. Raper, R.N., F.R.G.S., F.R.A.S., Author of " The Practice of Navigation and Astronomy."
I thank you for the example of your "Gazetteer" which you were so good as to send me, and beg you will put my name down as a Subscriber, as the Work appears to me well qualified to supply the want that has long been generally felt, of a Work adapted to the modern state of geographical information.

From Rev. W. L. Pownall, M. A. of St. John's Colleqe, Cambridge, late Fellow of the Cambridge Philosophical Society, and Master of the Grammar School, Derby.
After a careful inspection of the Numbers of the "Imperial Gazetteer" already published, I have no hesitation in adding my testimony to the ability with which the Work has been executed. The publication of this Work supplies a want which has long been experienced by both the student and general reader, as well as the teacher of youth, to whom it will prove a most invaluable book of reference. Those engaged in scholastic pursuits would do well to possess themselves of a copy of the "Gazetteer," which the mode of publication adopted by Messrs. Blackie and Son enables all to do, at a comparatively small expense. For my own part, so convinced am I of its usefulness, that I only regret the remaining Numbers are not yet completed.

From Leonard Schmity, LL.D., Ph.D., F.R.S.E., Rector
of High School, Edinburgh.
I have read a great many articles in the First Division of the "Imperial Gazetteer," on places and countries with which I am personally acquainted, and was glad to find that the accounts given in your Work are not only quite correct, bnt are much fuller and more complete than in any other similar work with which I am acquainted. The fact that, in addition to the geographical and statistical acconnts of places and countries, you always add a brief sketch of their history, seems to me to give an additional intercst to the book, and must be most welcome to all who seek for complete information on any town or country which, in reading newspapers, works of travels, or history, may come before them. As far as I have examined your Work, and compared it with others of similar pretensions, I have no hesitation in saying that I consider it incomparably superior to all others that I am acquainted with. The maps and plans of towns are of great interest and usefulness.

## From John Tulloch, LL.D., Professor of Mathematics, King's College, Aberdeen.

I have carefully read the more important articles in the First Division of your "Imperial Gazetteer," and I have much pleasure in stating that I consider it, in all respects, a most suitable companion to your "Imperial Dictionary." The plans of towns and harbours, and the representation of remarkable buildings and other interesting objects given in it, distinguish it from every other publication of the same kind, and in my opinion, very much enhance its value.

Taking into account the care and accuracy with which the articles are written, and the numerous Pictorial Illustrations which it contains, I consider it superior to any other work of the same kind which has hitherto appeared.
9. Julloch

From James Laurie, Esq., conjoint Town-Clerk of Edinburgh, Editor of the "Compendium of Malte Brun's and Balbi's Geography."
Having carefully gone through the First Division of the "Imperial Gazetteer," and even read most of the principal articles verbatim, I feel myself warranted in saying that it cannot be exceeded by any of its rivals in general accuracy, completeness, and newness of information. In the latter respect, indeed, it is, in some points, fairly before them all; and, as an instance, I may refer to the Sca of Aral, where the article, in the new edition (1851) of a Gazetteer of high pretensions, would have been condemned as antiquated, even when I wrote my own Compendium of Malte Brun's and Balbi's Gcography, ten years ago. This may be called rather a far-fetched case; but it seems to me that accuracy, in such outlandish articles, which are not so likely to be read as those relating to more familiar places, and about which people in general lave little or no knowledge, is the best test of the care that has been bestowed upon the whole Work.

From James Bryce, Jun., A.M., F.G.S., Teacher of Mathematics and Geography, High School, Glasgov.
The plan of the "Imperial Gazetteer," as set forth in the Prospectus, is extremely judicious, and, as far as can be judged from Division I. (pp. 320), recently published, is cxecuted in such a way as to reflect very great credit on the Editor and Publishers. The leading merit of the Work is, that the information given under the various articles is drawn from the most recent and best sources, and may be depended upon as the latest and most accurate that could be obtained. Thus, it is satisfactory to find such works as Humboldt's Cosmos and Aspects, Ross's Antarctic Voyage, Lyell's First and Second Journeys, Parrot's Ararat, Ruppell's and Wagern's Reisen, Stokes's. Australia, the Journal of the Geographical Society, and many other recent works of high character, quoted as the authorities for the facts stated. In selecting and condensing the observations of these and other authors, great judgment has been displayed.
The Work is written in a correct, clear, and animated style. The illustrative engravings printed with the text on almost every page, contribute much to the interest and intelligibility of the descriptions. They are a new feature in such a work.
As a general Dictionary of Geography, physical and descriptive, this Work forms a most useful and acceptable companion to the "Imperial Dictionary" of the same spirited Publishers.

## From the Rer. John Milese, LL.D., Principal of Inuddersfield College.

I have examined the first two Parts of the "Imperial Gazetteer" with care, and I consider that not only is the information brought up with care to the present time, but that it is, at the same time, very happily and judiciously condensed, and quite as large an amount as can be expected in a work cmbracing the wide range of a general Gazetteer.

The information especially supplied respecting British towns and localities, appear to be particularly full and well selected; while the woodcuts, views, \&c., throughout, are carefully chosen, and very beautifully executed. The well-known character of the Publishers is, in fact, a guarantee for the general accuracy and completeness of the entire Work. The comparatively moderate price at which it is issued, is likely, in connection with its other claims, to render it the popular Gazetteer.

CERIGOTTO, or Kerigotto [anc. Egilia], the most S. of the Ionian Islands, about 18 m . S.E. Cerigo, and the same distance N.W. Cape Buso, at the N.W. extremity of the island of Candia or Crete. Length, about 6 m. ; breadth, varying from 1 to 2 m . Its general aspect is mountainous. Irineipal produce, oil of olives. It has been for a long while a favourite resort of Greek piratcs. Pop. about 300.

CERINA, or Tzerina, [anc. Cerinia], a tn. and port, isl. Cyprus, N. coast, $11 \mathrm{~m} . \mathrm{N}$. Nicosia ; lat. $35^{\circ} 18^{\prime} \mathrm{N}$. ; lon. $33^{\circ} 30^{\prime}$ E.; situate amidst plantations of oranges, lemons, olives, dates, and other fruit trees. All the uneultivated parts of the plains around, are covered with bay, myrtle, and lentiscus. On the W. side of the town are extensive quarries, among which are some catacombs-the only remains of the nncient Cerinia or Ceryneia. The harbour is small and very indifferent.

CERISY-la-Salle, a tn. and com. France, dep. Manche, 7 m . E. Coutances. Muslin, ealico, lace, and other fabrics nre manufactured here; and the vicinity is remarkable for its numerous Druidical remains. Annual fair in November. Pop. 2327.

CERMIGNANO, a vil. and com. Naples, prov. Abruzzo Ultra I., dist. of, and 12 m . N.N.W. Penne. It occupies the summit of a hill; contains two churehes and a convent, and lias an annual fair. Pop. 2140.

CERNAY, or SENNHEm, a tn. France, dap. Haut-Rhin, 17 m. N.E. Belfort, agrecably situate, I. bank, 'Thur. Manu-factures:-printed goods, calicoes, cotton yarn, paper, spindles, carding machines. There are also some bleaching grounds, and a furnace. Pop. 3610.

CERNE-Abbas, a tn. and par. England, Dorset. The town, $5 \frac{1}{2} \mathrm{~m}$. N.N.W. Dorchester, stands in a heath-covered valley; has three principal, and four back streets; some of the houses antique-looking, and built of square blocks of chalk, and plastered over; the greater part, however, are of brick, and well-built; water abundant, forming a stream at the edge of the foot-paths. It has a church, and an Independent and a Methodist chapel, several schools, including an infant and a ragged selool. The inlabitants prepare skins for parchment, and make leathern articles, including gloves; and excellent malt in great quantity. There are here the ruins of an ancient abbey. Area of par. 3010 ac. Pop. 1342.-(Local Correspondent.)

CERNE- Netier, par. Eng. Dorset; 1330 ac. Pop. 71.
CERNEY, two pars. Eng. Gloucester:-I,(North),4000ac. Pop. 668.-2, (South), 3100 ac. Pop. 1077.

CERNILOW, a vil. Bohemia, circle, Königgrätz, near Sinirzitz. It contains a Roman Catholic parish chureh, two Protestant chapels, and a Roman Catholic school. P. 1314.

CERNIN, a tn. and several vils. France:-1, Cernin (St.), a tn . dep. Cantal, $8 \mathrm{~m} . \mathrm{N}$. by W. Aurillac, in a hilly district. The parish church is a venerable and magnificent edifice, of high antiquity; and in the neighbourhood are several fine feudal residences, and the old castle of Marzeres. Husbandry and cattle-feeding chiefly occupy a pop. of 3046.-2, Cernin (St.), a vil. dep. Lot, 14 m . from Cahors. Pop. 1043.-3, Cernin de l'Arehe (St.), a vil. dep. Correze, 8 m . from Brives. Pop. 590.-4, Cernin de l'ILerme (St.), a vil. dep. Dordogne, 20 m . from Sarlat. Pop. 731.-5, Cernin de Reillac, a vil. dep. Dor logne, 17 m. from Sarlat. Pop. 427.

CERNisl [ane. Motya], an isl. Mediterranean, W. coast Sicily ; lat. $37^{\circ} 52^{\prime} \mathrm{N}$. ; lon. $12^{\circ} 25^{\prime} \mathrm{E}$. It is about 3 m . long, and averages about 1 m . in breadth.

CERNOWITZ, a tn. Bohemia, circle of, and 14 m . E.S.E. Tabor, chief place, a lordship of same name. It contains a parish church, castle, and townhonse: and has a manufactory of potash, and five mills. Pop. 1683.—The lordsimp is situate among mountains in the S.E. portion of the circle, and has a population of 6542 .

CERNUSCO-Asinario, a to. and com. Austrian Italy, prov. of, and 7 m . N.E. Milan. It stands on both sides of the canal of Martesana, across which there is a handsome bridge; and contains a parish aud auxiliary church, and numerous good houses, surrounded by beautiful gardens. Pop. 3684.

CERRO-De-Andevalo, a tn. Spain, Andalusia, prov. of, and 24 m. N. by W. Huclva, 26 m. S.S.W. Aracena, on the erest of a hill. Its strects are generally paved, but steep; and it has two squares, the principal containing the parish chureh, Vol. 1.
of Doric architeeture, and townhall. The other public buildings are several chapels, a prison, cemetery, and two primary schools. The inhabitants are principally occupied in weaving, oil-making, and liusbandry. Some trade is carried on in wool and in timber; with the latter of which the adjacent mountains aro profusely covered. Pop. 2728.

CERRO-de-Pasco, a tn. Peru, dep. Junin, 138 m. N.E. Lima; $14,280 \mathrm{ft}$. above sea level. In the neighbourhood are several rich mines. Pop. 12,000 to 16,000 .

CERROS, an isl. N. Pacific, W. coast of Old California, at the S. entrance of the bay of Sebastian Viscaino; lat (S. point) $28^{\circ} 3^{\prime} \mathrm{N}$. ; lon. $115^{\circ} 11^{\prime} \mathrm{W}$. It is 30 m . long, and 75 in circumference. Its coasts present several indentations, and in the S. part is a lofty mountain, which terminates at the S.W. extremity of the island in a bold promontory. The island appears destitute of vegetation.

CERRETO [anc. Cernetum], a tn. Naples, prov. Terra-di-Lavoro, 11 m . E.S.E. Piedinnonte, on the slope of Mount Matese, near r. bank, Casano. It is one of the best built, and most agrecable towns in the provinee, and has a handsome cathedral, containing some good paintings; a collegiate chureh, three convents, a seminary, two monts-de-piété, and several manufactories of coarse cloth. In conjunction with Telese, it forms an Episcopal see. Good wine is grown in the neighbourhood. In 1656, the plague carried off half the inhabitants; and in 1688, an earthquake destroyed the town. Pop. 5564.

CERRETO-GuDi, a tn . and com. Tuscany, prov. of, and 20 m . W. Florence, near r. bank, Arno. It is situate on a rising ground, overlooked by a castle surrounded by walls, and possesses a handsome church, adorned with paintings, bas-reliefs, and frescoes. Silk and coarse earthenware are manufactured here. Pop. 2605.

CERRIG CEINWEN, par. Wales, Anglesey; 1296 ac. Pop. 550.

CERRIG-Y-DRUIDION, par. Wales, Denbigh. P. 1039.
CERTA, a tn. and par. Portugal, prov. Beira-Baixa, near a small stream of same name, an affluent of the Zezere, 32 m . S.E. Coimbra. It contains an ancient fort, built by Sertorius, a church, convent, hospital, and infirmary. Pop. 2336.

CERTALDO, a tn . Tuscany, prov. of, and $15 \mathrm{~m} . \mathrm{S}$. W. Florence, r. bank Elsa. The more ancient part of the town, like all the older walled towns of Tuscany, occupies the isolated summit of a cone-shaped hill, and consists of but one street. At the bottom of this hill is the new town, formed along the course of a modern road, which runs beneath the ancient town. Certaldo is, in itself, sufficiently insignificant and obscure, but is famous as the home and last resting-place of Boceaccio, who was born here in 1313. The house of the poct stands in the main street, and within 100 yds. of the church. It is exceedingly small, though dignified with a tower. In one of the rooms are collected all the ancient articles of furniture of the poet's day, which remained in the house-a little cabinet, containing rare and early editions of all his works; some manuseript relating to his history; a specimen of his autograph; and a large fresco painting of him by Benvenuti of Florence. Pop. 2113.

CERTES CAI'E, or Ras DJrd, a headland, Persian Gulf, coast of Laristan; lat. $26^{\circ} 36^{\prime}$ N.; 14 m . N.W. by W. from Cape Bostana and the Bay of Mogoo.

CERVARO, a tn. Naples, prov. Terra-di Lavoro, 22 m . S.E. Sora, agreeably situate on a hill. It has four churches, and an hospital. Pop. 3778.

CERVASCA, a tu. and com. Sardinian States, Piedmont, prov. of, and 5 m . S.W. Coni, near 1. bank, Stura. It contains two parish churches. Pop. 3000.

CERVATOS de-la-Cueza, a tn . Spain, Leon, prov. of, and 23 m. N.N.W. Palencia, in a somewhat rugged plain, near 1. bank, Cueza. It consists of several streets, of which only some are paved, and a square, in which is a handsome porch, forming the entrance to the consistorial buildings. It contains two parish churches, both of them handsome buildings, a boys and girls' sehool, and several charitable endowments. Pop. 744.

CERVERSA, a city, Spain, Catalonia, prov. of, and 38 m . E. by N. Lerida, on the highroad thence to Barcelona, r. bank, Cervera. It is surrounded by ancient walls, now much dilapidated, though strengthened at intervals by turrets, and entered by nine gates; a castle, also ruinous, commands the 81
W. approach. The houses are, generally, well built, forming regular and tolerably well-paved streets, and four squares. Its magnificent university, founded by Philip V. in 1717, and

PRINCIPAL COURT OF THE UNIVERSITY, CERVERA. From Piferer, Recuerdos y Bellezas de Espana.
authorized by a Bull of Benedict XIII. in 1735, is not now used as a seat of learning, its classes having, 1837-1841, been transferred to Barcelona. Therc are here several colleges or seminaries, and primary schools. Amongst the noteworthy public edifices are the townhall, a spacious and highly ornamented structure of hewn stone; and the two churches, the principal of which is a Gothic building, and has been renovated since 1820. The city possesses, besides, numerous convents and chapels, three hospitals, a jail, public storehouse, and cemetery. Manufactures:-linen, woollen, hempen, and cotton fabrics, wine, oil, \&c. Trade :-grain, fruits, and cattle. The prosperity of the town has much declined since the withdrawal of the university. Pop. 4090. --Cervera is also, with various affixes, the name of numerous other small places in Spain.

CERVERA-del-Rio-Alhama, a tn. Spain, Old Castile, prov. of, and 40 m . S.E. Logroño, r. bank, Alhama, crossed here by two stone bridges. Its streets are tolerably well paved, and its houses substantially built. It has two squares, two churches, some chapels, town and session-houses, a prison, convent, cemetery, and several primary schools. Linen, woollen, and cotton fabrics, soap, sailcloth, and oil are manufactured. Trade in grain, fruit, \&c. Pop. 3576.

CERVERA-del-Maestre, a tn. Spain, Valencia, prov. of, and 41 m . N.N.E. Castellon-de-la-Plana, l. bank, Cervera. The streets are poorly built; and the town possesses a church, townhouse, prison, school, \&c. Inhabitants engaged in husbandry, and distilling brandy. Pop. 1496.

CERVETERE [anc. Care or Agylla], a tn. Papal States, 20 m . W. by N. Rome; lat. $41^{\circ} 57^{\prime} \mathrm{N}$.; lon. $12^{\circ} 7^{\prime} \mathrm{E}$. It was one of the most important cities of ancient Etruria, and is mentioned by Pliny as having possessed a collection of paintings long before the foundation of Rome. Many valuable Etruscan remains have been discovered here; and the place, though now a poor village, still bears traces of its former greatness. Pop. 750.

CERVIA, a tn. Papal States, 11 m . S.E. Ravenna, near the Adriatic, where it has a port, with which it communicates by a canal. It is regularly built, and contains several churches, convents, and a cathedral, and is the seat of a bishopric. W.
of the town is a vast marsh, called the Valle di Cervia, containing the most productive saltworks in the state. About 50,000 tons are produced annually. Pop. 4000.

CERVICALES, or Cipricaglie, a group of small isls. Mediterranean,S.E. coast of the island of Corsica; lat. $41^{\circ} 33^{\prime} \mathrm{N}$.

CERVIN (Mont), [German, Matterhorn; Italian, Monte Silvio], a mountain, Switzerland, Pennine Alps, on the S. frontiers of can. Valais, about 6 m. W.S.W. Zermatt or Praborgne, from which a road leads to the Col St . Theodule, a pass over the mountain into Piedmont. It is one of the most magnificent objects in nature, an inaccessible obelisk of rock starting up from an immense glacier, to a height scarcely 1000 ft . lower than that of Mont Blanc. The glacier, which differs from the lower glaciers, in not bcing included, like them, between bold walls, but occupying a vast and desolate table land, is nearly $10,000 \mathrm{ft}$. above sea level. The height of the peak is $14,837 \mathrm{ft}$. It is composed of felspar slate or gneiss. On the summit of the pass, $11,096 \mathrm{ft}$., are the remains of a rude fortification, supposed to have been erected two or three centurics ago, to prevent incursions from the Valais. It is, probably, the most elcvated spot of the globe on which fortification has been attempted.

CERVINARA, a tu. Naples, prov. Principato Ultra, 12 m. N.W. Avellino. It contains six churches, and a convent. Pop. 6224.

CESANA, a vil. and par. Austrian Italy, gov. Venice, 11 m. S.W. Belluno, near the Piave. It contains a parish and an auxiliary church. Pop. 2000.

CESANO MADERNO, a vil. and com. Austrian Italy, prov. of, and $10 \mathrm{~m} . \mathrm{N}$. by W. Milan, on the Seveso. Here are the remains of a castle with its walls and moat, and a palace called Cesano Borromeo. Pop. 3340.

CESAREA See Cesarea.
CESARIO (SAN), a tn. and com. Naples, prov. Otranto, dist. of, and 4 m . E. Lecce. It contains a magnificent palace, and raises fine tobacco. Pop. 3448.

CESARO, a tn. and com. Sicily, prov. Messina, dist. of, and 20 m . E.S.E. Mistretta, on a hill. Pop. 2000.

CESENA [anc. Casena], a tn. Papal States, 11 m. S.E. Forli, r. bank, Savio, at the foot of a mountain. It is the seat of a bishopric, is well built, has a handsome townhouse, a cathedral, 14 monasteries, seven nunneries, a seminary, an agricultural society, and some silk-mills. Its trade is principally in the wine and hemp produced in the neighbourhood, and large fairs are held twice a year. There are sulphur mines in the vicinity. Popes Pius VI. and VII. were natives of this town. Pop. 14,000.

CESENATICO, a tn. Papal States, 17 m . S.W. Ravenna, near the Adriatic, where it has a port, with which there is a communication by a canal. Four fairs are held here annually. The town was bombarded by the British in 1800. Pop. 3500.

CESSENON, a vil. France, dep. Herault, 15 m. E. St. Pons, beautifully situate 1 . bank, Orbe. Two annual fairs. Pop. 1228.

Cestona (Santa Cruz de), a tn. Spain, Biscay, prov. Guipuzcoa, 11 m. N.W. Tolosa, 30 m . E. Bilboa; on an eminence 400 ft . above the sea, r. bank, Urola, crossed in the vicinity by a bridge of two arches. It has a parish church, townhall, two schools, and a prison. The neighbouring mountains are well wooded, and in them iron and other minerals, including jasper, crystal, marble, \&c., are wrought. Cestona is principally noted for its medicinal baths. The waters have a temperature of $69^{\circ}$ to $70^{\circ} \mathrm{Fah}$., are clear, inodorous, and of saline flavour, contain chiefly chloride of sodium and sulphate of calcium, and deposit a red colouring matter composed of . hydro-carbonate of iron, and carbonic acid. Pop. 1500.(Madoz.)

CESTOS, a settlement, Liberia, W. coast Africa, for enfranchised slaves, at the entrance of the river of the same name, on a promontory called St. George Point; lat. $5^{\circ} 28^{\prime}$ N.; lon. $9^{\circ} 36^{\prime}$ W. A terrific surf rolls over the bar at the mouth of the stream. There has bcen a British factory here for a number of years.

CETON, a tn. France, dep. Orne, 22 m. S.S.E. Mor-tagne-sur-Huine. Three annual fairs. Pop. 1010.

CETONA (Alta and Bassa), the name of two vils. and coms. Tuscany, prov. Arezzo, in the Val di Chiana, dist. of, and 6 m . S.W. Chiuse, near a mountain of same name. The
modern buildings occupy the side and foot of a hill called Astrone. Cetona Alta stands 1200 ft . above the level of the sea, and contains a courthouse, and a collegiate church. Pop. 1277.-Cetona Bassa, on a terrace below, contains a church of modern construction. Pop. 1310.

CETRARO, a tn. Naples, prov. Calabria Citra, 12 m . N.W. Paola, on the Mediterranean. There is a small port here, and anchovies are caught in great abundance along the shore. Pop. 5768.

CETTE [anc. Setium promontorium], a fortified seaport tn. France, dep. Herault, 15 m. S.W. Montpellier, on the narrow tongue of land that separates the salt lagoon of Thau from the Mediterrancan; lat. (Fort Louis) $43^{\circ} 23^{\prime} 48^{\prime \prime}$ N.; lon. $3^{\circ} 42^{\prime} 15^{\prime \prime} \mathrm{E}$. (r.) It is well built, and has a church and a public library; but its chief importance is derived from its port, which forms the entrance, on the Mediterrancan side, to the Canal du-Midi or Languedoc. The harbour is formed by two moles. That on the left of the entrance extends E.N.E. into the Mediterranean about 1900 ft ., then runs N.N.E. upwards of 470 ft ., so as to form a breakwater across the entrance. It is terminated by a fort and lighthouse, with a fixed light 87 ft . above the sea, visible 7 m . off. This fort, one on the opposite mole, and the citadel, on the escarpment near the other extremity of the mole, defend the entrance to the port. The harbour can accommodate 400 vessels, of different sizes. It has from 16 to 21 ft . water, and is quite safe in all weathers. The canal is bordered with quays, on which are numerous warehouses. A second canal, which meets the Canal-du-Midi at right angles, communicates with the Canal-des-Etangs and the Rhone. Both the foreign and coasting trade of Cette are considerable. Its imports consist of wool and cotton, in bales; grain, rice, oil, vermicelli, colonial produce, hides, cork, Roussillon brandy and wine, to be manufactured. The exports consist of wine, brandy, liqueurs, salt, verdigris, and dye-stuffs. There is an extensive manufacture here of the wines of all countries-port, sherry, claret, champagne-for the English and other markets, by the mixture of various kinds of French and Spanish wine and brandy. Large quantities of Benicarlo wine are imported from Spain for this purpose. Sugar, coffee, hemp, fish-oil, tar, tallow, Baltic timber, iron, copper, cod, and sardincs, are also imported. Cette is connected with Montpellier by a railway, opened in 1839. In 1789, salt works were established in the neighbourhood. They are now the most extensive in the country, and furnish a very pure, white salt, free from bitterness, and well adapted for the preservation of provisions. The manufactured articles are soap, syrups, grape sugar, spirits, perfumes, corks, liqueurs, and large quantities of excellent casks. There are also glass works, and shipbuilding yards. Sardines caught on the coast are salted here. About 36,000 casks of wine, and 4000 casks of brandy, are annually exported. The foreign trade extends to all quarters of the world, this being the great outlet for the productions of the S. of France. Cette is a fortified place of the fourth class, and has a tribunal of commerce, a school of navigation, a council of prud'hommes, and a communal college. It wasfounded in 1666 by Louis XIV., and the works of the harbour, piers, \&c., were executed by Riquet, the engineer of the Canal-du-Midi. Steamers ply hence to Marseille-passage in 10 or 12 hours; and a steamer crosses the Etang-de-Thau to the mouth of the Canal-du-Midi, which communicates with the Garonne and Bay of Biscay. Pop. (1846), 16,613.

CETTTIGNE, a tn. Europcan Turkey, eap. Montenegro, 20 m. E. by N. Cattaro, and 37 m. N.N.W. Scutari. It consists of a fortified convent on the slope of a hill, and surrounded by a few scattered houses. The convent, which resembles a castle of the 17 th century, is surmounted by a round antiquelooking watch-tower, with a number of poles, on which, formerly, the trunkless heads of Turks used to be exposed. In it there is a school, where, in addition to the humbler branches, geography and history are taught. On a plain below the town is a large new Government-house, partly occupied by the Vladika as his archiepiscopal palace. An inn, recently built, is furnished above in European style, while the lower part is occupied by the country people as a klian. The only manufacture deserving of notice is gunpowder.

CETTINA, a river, Austria, Dalmatia, rises on the S. slopes of Mount Dinara, near Sorgenti di Cettina, about lat. $43^{\circ} 58^{\prime} \mathrm{N}$., from which it flows in a tolerably direct course
S.S.E., between two ranges of mountains, till it reaches Duare, about lat. $43^{\circ} 26^{\prime}$ N., when it suddenly bends round to the W . by N., and falls inte the Adriatic at Almissa, opposite the island of Brazza, after completing a course of about 50 m .

CEUTA [anc. Septum], a seaport tn. and dist. Morocco, belonging to Spain. The town is situate on a peninsula, stretching about $2 . \frac{1}{2} \mathrm{~m}$. E. into the Mediterranean, opposite to, and about $14 \mathrm{~m} . \mathrm{S}$. Gibraltar ; lat. $35^{\circ} 54^{\prime} \mathrm{N}$.; lon. $5^{\circ} 18^{\prime}$ W. (R.) It is strongly fortified, being defended, landward, by a citadel, which occupies the isthmns and seaward, by forts erected on the adjoining heights of Mount Hacho, the ancient Abyla or S. pillar of Hercules. It has a fine appearance from the sea, where it is seen rising gradually from the shore in the form of an amphitheatre, crowned by seven hills, but the interior is by no means prepossessing. It has three tolerable squares, and the principal streets are straight and level, but the others are steep and narrow. All of them are paved with large sea gravel of different colours, and kept very clean. The houses are, in general, of a very mean appearance, and there is nothing to indicate an industrious and prosperous community. Indeed great part of the town is used as a penal settlement, and is occupied by convicts or state prisoners from Spain, and the military who guard them. The principal buildings are the cathedral (Centa being a bishop's see), the townhouse, and the house of mercy, founded in 1498, in imitation of an endowment of the same name at Lisbon. The harbour is both incommodious and unsafe, and neither trade nor manufactures can be said to have any existence. Ceuta or Septum was a town of Mauritania under the Romans. The Portuguese took it from the Moors in 1415. On the conquest of Portugal, in 1580, it passed to the Spaniards, and has ever since remained with them. Pop. exclusive of the garrison, 4341 , of whom 2131 are convicts.
CEVA, a tn. Sardinian States, prov. Mondovi, 44 m . W. Genoa, on the Tanaro. So long as the ancient divisions subsisted, it was the capital of the marquisate of Ceva, but it is now much decayed. Its chief feature is a rock towering above the town, on which are the remains of the citadel, formerly used as a state prison. It has a church, three convents, silk spinning-mills, and some forges, and its cheese, for which it is still noted, is praised by Pliny. Coal is found in the neighbourhood, and the environs abound with truffles. The Romans called this town Ceba, It was formerly surrounded by walls, which were destroyed, in 1584, by an inundation of the Tanaro. It was taken by the French in 1796, and again in 1800. Pop. 3500.

CEVENNES [Latin, Cebennae], a mountain chain in the S.E. of France, belonging to the W. group of the system of the Alps, and extending from the Col de Narouze, W. of Castelnaudry (the highest level of the Canal du Midi of Languedoc), where it links with the chain of the Pyrenees, to the Canal du Centre (department Saône-et-Loire), where it is met by the Cote d'Or, a ramification of the Vosges. Tbe whole length of the chain is about 333 m ., and its general direction, proceeding from the S., is N.E. as far as Mont Pilate, in the S.E. of department Loire, and thence N. to the N. frontiers of department Saône-et-Loire. During its whole length, it forms the watershed between the Bay of Biscay and the Mediterranean, separating the basins of the Garonne and Loire belonging to the former from those of the Rhone and Saône belonging to the latter. The E. side of the chain is more abrupt than the W. side, whose slopes are usually gentle and prolonged to a great distance. The average height of the S . ranges does not exceed 3000 ft ., though Mount Lozere between the sources of the Lot and Tarn, rises to 4580 ft . In the N . ranges the summits are more remarkable. The culminating points are Mount Mezenc (near the source of the Loire), 5120 ft . ; Plomb de Cantal, 6094 ft ; and highest of all Puy de Sancy, in Mount Dore (department Puy de Dôme), 6222 ft . The S . Cevennes are generally composed of calcareous rocks, which form plateaux intersected by valleys. At some peints extinct volcanoes, surrounded by masses of basalt, appear. The N. Cevennes are generally calcareous along the banks of the Rhonc, but their W. slopes often consist of granite, covered to a great extent with volcanic matter. The effects of ancient eruptions everywhere appear. In the class of summits to which the common name of Dore and Dôme is given, 50 ancient craters, and among the Puys, 70
mountains of volcanio origin, have been counted. The $\mathrm{Ce}-$ venues are rich in minerals, containing mines of copper, iron, lead, and coal, and quarries of granite, porphyry, marble, and plaster.

CEVENNES, a country, France, which formed the N. part of the gov. Languedoc, and comprehended the Vivarais, Velay, and Gevaudan. During the wars against the Albigenses, its mountains aud valleys, like those of Piedmont, were the asylum of numerous bands of Reformers, who had renounced the corruptions of the Romish church; for threc centuries it continued to furnish numerous victims to the Papal persecntors. It now forms part of deps. Haute-Loire, Loire, Ardèche, Gard, and Aveyron.

CEVICO-de-La-Torre, a tn. Spain, Leon, prov. of, and 12 m. S.S.E. Palencia. The houses are in general substantially built, and form streets, clean, regular, and well paved. It has three spacious squares, a parish church, three chapels, two schools, a cemetery, and palace of the Count of Oñate. The inhabitants manufacture potteryware, and trade in grain, fruits, honey, and cattle. Pop. 2002.

CEYLON [native, Singhala; anc. Taprobana], an isl. Indian Ocean, belonging to Great Britain, 50 to 60 m . S.E. the S. extremity of Hindoostan, from which it is separated by the Gulf of Manaar and Palk's Strait. It lies between lat. $5^{\circ} 56^{\prime}$ and $9^{\circ} 50^{\prime}$ N., and between lon. $80^{\circ}$ and $82^{\prime}$ E., having the shape of a pear, with the broad end S. Length, about 270 m . N . to S. ; average breadth, 100 m . ; circumference, about 660 m ., exclusive of indentations ; area, $24,600 \mathrm{~m}$. The N. and N.W. coasts are flat and monotonous, those on the S. and E. bold and rocky, presenting a highly picturesque appearance, which is further leightened by its exuberant vegetation, its noble palm forests, luxuriant corn-fields, and the verdant slopes of its mountains enamelled with bright flowers, herbs, and creeping plants, whose delicious perfume spreads far and wide. Many parts of the coast, both at its S. and N. extremities, are studded with small, rocky, and verdant islands, some of them overgrown with palms, and presenting a singularly beautiful appearance.

The two principal harbours are those of Trincomalee on the N.E. coast, and that of Point de Galle on the S. coast; the former is one of the finest harbours in the world, and is capable of accommodating any number of the largest ships. Secure auchorage is also to be had, at certain seasons, in the roads of Colombo. Besides these, there are three harbours on the S. and E. coasts, and five on the N.W. ; but most of the latter can reccive small vesscls only, being full of shifting sands and shallows. Between the island of Manaar on the N.W. coast of Ceylon (lat. $9^{\circ}$ ), and the island of Ramiseram on the opposite coast of India, is a ridge of sandbanks called Adam's Bridge, which nearly connects Ceylon with the continent, there being only three narrow, and shallow passages through the ridge, the remainder being covered with only 2 or 3 ft . water at full tide. One of the threc openings or passages is near the island of Manaar, another 8 m . further W., and the third between the island of Ramiseram and the continent, called the Paumben passage. As all of these channels, however, are impracticable, except for boats or very small vessels, slips, of even moderate size, sailing from any point $N$. of the bridge to any point S . of it, or vice versa, must make the circuit of the island.

Mountains, $d c$.-The mountainous regions of Ceylon are confined to the centre of the S. and broader part of the island. They gradually diminish to hills of moderate elevation as they recede from the central mass, and are succeeded on the W. side by a flat tract extending to the coast. Their average elevation is somewhere about 2000 ft ., but there are several summits of upwards of 7000 and 3000 ft .; amongst these are Pedrotallagalla, 8280 ft . ; Kirrigal Potta, 7810 ft . ; Totapella, 7720 ft . ; and Adam's Peak, 7420 ft . Of all these mountains, Adam's Peak, though not the highest, is the most remarkable from its conical form, the distance from which it is visible from the sea, and from the sacred associations with which it is connected; the summit being the point from which Buddha, according to his followers, ascended to heaven, a gigantic footprint bearing testimony to the fact. The forms of the mountains of Ceylon are singularly varied. They most frequently occur connected in chains, and terminate in round or peaked summits. Their sides are always stecp, and occasionally precipitous and rocky. Solitary insulated mountains are of
rare occurence. In some districts, the mountain chains run in a parallel direction; in others, even adjoining mountains do not correspond with any regularity in their direction. It is still more remarkable, that there is no proportional correspondence between the heights of the mountains, and the depths of the adjoining valleys. In general, the width of the latter bears but a small proportion to their length; often they are extremely narrow. The deepest are in the heart of the mountains. Some are between 3000 and 4000 ft . deep, and not over lialf a mile wide.

Rivers and Lakes.-The rivers of Ceylon, though numerous especially on the S. and S.W. sides, are small, being merely mountain streams, navigable only by canoes, and that but for a short distance from their mouths. The principal are the Mahawelli Ganga, which rises about 30 m . S. of Kandy, and falls into the sea about 8 to 10 m . S. Trincomalee; the Kalani Ganga, the Kalu Ganga, and the Walawe Ganga, all of them rising in the central mountain mass. During the freshes, the first named river is rendered useful in floating down rafts of timber to the bay of Trincomalee. This timber consists chiefly of halmalille, ebony, and satin wood, which grow on its banke, and in the vicinity. There are a few pretty extensive lagoons in the island, but no lakes worth noticing, the largest being only 4 m . broad. This want of lakes gives a certain monotony to the scenery which would be tiresome and uninteresting in a country clothed with less sublimity than Ceylon; and though there are rills and streamlets rushing along in every direction amongst the mountains, they are so overhang witl superabundant vegetation as to be frequently invisible. On the level spaces between the hills and the sandy hillocks near the sea, on the S.E. coast, are the salt water lakes or marshes, called Kaloopons, from which large quantities of salt are made for exportation. Being connected by channels, they also afford some means of internal communication.

Geology and Minerals.-Generally speaking, Ceylon con consists of primitive rock ; the most common being granite or gneiss. It is remarkable for its richness in gems, and equally so for its poverty in the useful metals. Its mineral productions may be classed under two heads, those attached to granite rock, which constitute the greater part, and those pertaining to dolomite. The only metallic ores that can be said to have been found hitherto in any quantity deserving of notice, are of iron and manganese. Iron, in different forms, is pretty generally diffused, and somewhat abundant; plumbago is also obtained in such quantities as to constitute an article of export, and is increasing. Most of the gems for whieh the island is celebrated, occur in granite rock; though also found washed down in alluvial soil in the beds of rivers. Ceylon affords all the varieties of quartz, as rock-crystal, amethyst, rose-quartz, cat's-eye, and prase. Rock-crystal occurs in abundance, both massive and crystallized, of varions colours, of good quality, and in large masses. Amethysts, of the most beautiful kind, are also plentiful, and the finest cat's-eyes known are those of this island. Garnets, cinna mon stone, zircons, and rubies are also among the gems of Ceylon. Of inflammable minerals two kinds occur, graphite and sulphur ; but neither mineral nor medicinal water abound, and the saline productions are few.

Roads, \&c.-British enterprise and industry are effecting extraordinary changes in this noble island, by opening upmeans of internal communication through which, as through so many arteries, the blessings of civilization will circulate. In recent times, several lines of public carriage roads have been formed, the principal of which are those from Colombo, the seat of Government, to Kandy; from Colombo to Galle, from Colombo to Negombo, and from Kandy to Ramboddc. In the early part of this century, there was not a single road in the country, merely a few pathways, the greater part of the island being then covered with impenetrable forests. The formation of these roads is said to have impressed the native tribes with a much higher opinion of British intelligence and power, than any manifestations of its military superiority.

Climate.-The climate of Ceylon, like that of most other countrics, varies with the different localities, being more salubrious in some places than in others, according to the conditions of the surface, from which almost all atmospheric influence is derived. Where the jungle has been cleared away, and the land drained and cultivated, the country is perfectly healthy; where low wooded tracts, and flat marshy
lands abound, covered with a rank, luxuriant vegetation, the climate is eminently insalubrious, showing, what is now pretty well understood, that mere heat has little to do with the unhealthiness of tropical climates. So far as military experience goes in regard to the health of troops, Galle on the S. coast, and Nieura Elia in the mountainous regions in the interior, provinee of Kauly, are the most healthful stations on the island. The heat is not so great as on the neighbouring coast of ludia, the sea breezes moderating the temperature. At Colombo, on the W. side of the island, near the 7th parallel of N. lat., the mean daily variation of the temperature does not exceed $3^{\circ}$, and the annual range of the thermometer is from $76^{\circ}$ to $86^{\circ} 30^{\prime}$ Fah. At Galle, the mean daily variation is $4^{\circ}$, and the annual range from $70^{\circ}$ to $87^{\circ}$. At Jaffinapatam, it is from $70^{\circ}$ to $90^{\circ}$. At Trincomalee, from $74^{\circ} 30^{\prime}$ to $91^{\circ} 30^{\prime}$. At Kandy, 1457 ft . above the sea, the mean daily variation is $6^{\circ}$, and the annual range $66^{\circ}$ to $86^{\circ}$. At Nieura Elia, the annual range is $35^{\circ} 30^{\prime}$ to $80^{\circ} 30^{\prime}$. The E. part of the island, being exposed to the N.E. monsoon, has a hot and dry climate, resembling that of the coast of Coromandel; while the W. division, being open to the S.W. monsoon, has a temperate and humid climate like that of the Malabar coast. The interruption which the course of the monsoons meet with from the mountain ranges of the island, causes deluges of rain to fall on one side, while the other is parched with drought; the inhabitants on the former making every effort to protect themselves from inundation, white those on the latter are carefully doling out the scanty remnants of former superabundance. The quantity of rain that falls annually in Ceylon is estimated at three times the quantity that falls in England, the rains being less frequent, but mueh leavier. At Kandy, in the interior, the average annual fall of rain is $85 \cdot 3$ inehes. At Colombo, on the sea coast, 75 to 80 inches. The prevalent diseases are those of the liver and intestines, often accompanied by fever. Elephantiasis, and other cutaneous complaints, are common. The disease called beri-beri (IIydrops asthmaticus) occasionally occurs, being almost peculiar to the island.

Animals.-Most of the animals found on the opposite continent are native to this island, exeepting the royal tiger, which does not exist here. Elephants are numerous, espeeially in the N. and E. provinees, where they sometimes do kreat injury to the growing crops. Under the kings of Kandy, they were trained to perform the office of public executioners. In the performance of this duty, they first thrust their tusks through the eriminal's body, and afterwards tore him to pieees, limb by limb, with their trunk. The elephants of Ceylon are esteemed for their superior strength and docility. But the eagerness with which they are hunted has greatly diminshed their numbers. Bears, leopards, hyænas, jackals, monkeys, and tiger-cats are numerous. There are several speeies of deer, of which the elk and fallowdeer are most abundant. There is also a kind of moose-deer, which is caught by the natives, and exposed for sale in the markets. Wild hogs are numerous on the plains to the E. A large and fierce baboon is met with near Jaffua. Porcupines, racoons, armadilloes, squirrels, and mungooses are also to be fonud. Flying foxes and rats are numerous, and annoying. Pheasants, snipes, red-legged partridges, pigeons, peacoeks, and a great variety of birds, of the most splendid plumage, are plentiful. Alligators, serpents, and reptiles of all sorts abound. Of the snake tribe, consisting of about 26 different speeies, six only are venomous.

Tegetable Products.-In the luxuriance of its vegetable productions, Ceylon rivals the islands of the Indian Archipelago, and in some respects bears a strong resemblance to them; its most valuable are coffee, cinnamon, and the cocoanut. The quantity produced of the first named artiele is rapidly increasing, the export to the United Kingdom having risen in the space of 10 years (from 1835 to 1845 ), from $1,870,143$ lbs. to $16,657,239$ lbs., while in 1849 it rose to $35,640,000$ lbs. The quantity of land adapted to the growth of this valuable commodity is unlimited. Cimmamon, ealled by the Singlalese corundoo, grows in the S.W. part of the island, to which it is almost exclusively confined, requiring a sandy soil, with a moist atmosphere. The trade in this spice was reserved as a Govermment monopoly by the Duteh when they had possession of the island; all that was collected beyond the quantity which it was thought
could be sold at a monopoly price being burnt. This absurd system was followed by the English for some years after their conquest of Ceylon, but was abandoned in Oetober 1832, when the trade in cinnamon was deelared free, subject to a duty on exportation. The cocoa-nut trees grow along the coast in countless numbers, each tree producing from 50 to 100 nuts in the year. Every part of this invaluable tree, and of its product, is capable of being turned to profitable account. It yields its fruit at every period of the year, the bud, flower, and nut in all its different stages, from immaturity to ripeness, appearing on the tree at the same moment. The flower-bud yields a liquor called toddy, which, when fermented and distilled, furnishes arrack of the best quality. From this juice vinegar also is made, and a description of sugar called jaggery. The fibrous husk in which the nut is enveloped, called coir, is convertible into cordage and carpeting, and is applicable to various other purposes. The kernel constitutes wholesome and nutritions food, and also yields a valuable oll, used in the island, when fresh, for culinary purposes, and exported in large quantities for conversion into candles and soap. The refuse oilcake, called poonak, furnishes good food for poultry and pigs; and makes a valuable manure much used in coffee plantations. The shells are formed into goblets, ladles, and other domestic utensils. The leaves are woven into mats, and are employed for the roofing of houses, being lighter than straw, and equally strong and lasting. The Palmyra palm, which grows principally in the N. part of the island, is of hardly less importance than the cocoa-nut, being productive in seasons of drought, when the crops fail. The leaves are used in the construction of native huts, also as a substitute for paper, and various other purposes. Toddy is extracted from it, as from the cocoa-nut tree; the timber is exported in large quantities; and from the fruit a jelly is made, on which the poorer classes subsist in seasons of dearth. The S. parts of the island produce the kittul tree, the sap of which yields a coarse sugar; and its fruit, dried and pulverized, serves as a substitute for rice flour. The talipnt palm also abounds, as do also the jack and bread-fruit trees, the fruit of which is used by the natives for food, both raw and cooked; the timber, also, of the jack-tree, not being subject to be attacked by the white ant, is much used by the natives for making furniture, and in house building. The Ceylon areca-nut, celebrated for its superior qualities, is exported in large quantities. Tobaceo is raised principally in the $N$. district, and is of excellent quality. The quantity of this article has also increased prodigiously of late years. Indigo grows wild, but is not sought after. The carlamom plant is abundant, but inferior to that of Malabar; fruits and enlinary vegetables are produced, the latter in the elevated districts, in great varicty and profusion. The island abounds with timber of various descriptions, ineluding calamander, satin, rose, sapan, iron, jack, halmalille, and other beautiful woods adapted for cabinet work.

Agriculture, \&.c.-Agriculture generally, and the cultivation of the more valuable native products of the island, in particular, are improving. In the interior provinces coffee succeeds well, but sugar has proved an entire failure everywhere, both on the coast and inland. Coffee, however, has not turned out a profitable crop, in consequence of which the sales of lard by Government fell off, from 59,800 acres in 1843, to 4182 aeres in 1846. The extent of ground under coffee eultivation is between 90,000 and 100,000 acres. An agricultural society has been formed, which has been of great service to the island, having, amongst other things, introduced a variety of European vegetables and roots, including the potato, into the elevated districts, where they are succeeding admirably. The land lying on the sea coast, between Tangalle on the S. shores, about lat. $6^{\circ}$ N., and Negombo on the W. coast, lat. $7^{\circ} 20^{\prime}$ N., a distance of about 140 m ., is the most favourable on the island to the growth of the cocoa-nut tree, and there they, of course, most abound. The cinnamon of commeree is produced in the gardens on the coast, and chicfly within 20 m . of Colombo, where the temperature is equable. That grown in the interior is very inferior, hardly fit for use. The time for stripping off the bark is from May to October. The bark, after being removed from the branches previously eut from the tree, is tied up in bundles for 24 hours, during which a sort of fermentation takes place, whieh greatly facilitates the separation of the outer part of
the bark from the cuticle and epidermis. It is then rolled up into quills, or pipes, about 3 ft . in length, and thereafter conveyed to Colombo, where it is sorted by Government inspectors into three kinds, the two finest of which are exported to Europe, and the third is reserved, along with the chips and the refuse, for distillation, yielding oil of cinnamon. The area of land under cinnamon cultivation is estimated at about 14,720 ac. Rice, which is carefully cultivated by the Malabars of the N. and N.E. districts, is grown chiefly on the level lands, but also in the valleys and on the slopes of hills, various contrivances being adopted to supply the grounds with water by artificial irrigation. There are two rice harvests in the year; the first crop is sown from July to October, and reaped from January to March; the second is sown from March to May, and reaped from August to October. The quantity of rice raised, however, is not sufficient for the wants of the island; the deficiency is made up by importation from the Malabar and Coromandel coasts. The value of the rice imported in 1848 was $£ 398,000$; the value of that raised in the country about $£ 570,000$, the produce of about 300,000 ac. the estimated area of the rice crops. Notwithstanding the acknowledged fertility of Ceylon, the capabilities of its soil where justice is done to it, and the efforts now in progress to develope these capabilities, by far the largest proportion of the island is still uncultivated, and lying waste; there being, in 1842 , only $760,821 \mathrm{ac}$. in crop, and $4,882,298 \mathrm{ac}$. uncultivated. There are a few natives who possess considerable estates in land; but the law of inheritance has, for the most part, caused a minute subdivision of the soil, to a degree very favourable to its improvement. The British Government claims the proprietorship of all the waste lands, which are now disposed of by public sale.

Pearl Fishery, \&c.-The pearl fishery of Ceylon is now apparently extinct, there having been none since 1837, nor scarcely can any trace of the pearl oyster now be found, although Government still continues a strict surveillance over the banks, and occasionally subjects them to a careful examination. No cause has yet been discovered for the disappearance of the oyster. When the pearl fishery was in existence it was confined to the Gulf of Manaar, the Bay of Condatchy being the central rendezvous for the boats employed in it. The banks, where it was carried on, extend several miles along the coast from Manaar S., off Arippo, Condatchy, and Pomparipoo; the principal ones being opposite to Condatchy, and lying out at sea about 20 m ., and extending about 30 m . N. to S., and 20 m . E. to W. The fishery was a Government monopoly. The places and times where and when it was to be pursued, and the number of boats allowed to engage in it, were announced by advertisement. One-fourth part of the pearl-oysters raised was the property of the divers; the remaining three-fourths were sold at public auction. The banks on which the oysters were found are coral ridges, with 5 to 7 fathoms water. They were divided into three or four different portions, fished annually in succession, each portion being set up to sale, and fished separately; a sufficient interval being allowed between them to admit of the oysters attaining their proper growth, which is supposed to be in about 7 years, soon after which, it is said, they perish. The fishing season commenced in February, and ended about the beginning of April. Each boat employed in the pearl fishery carried a tindal or master, and 20 or 24 men, one-half of whom rowed and assisted the divers in reascending; the otleer half were divers, who went down by five or six at a time; and by thus alternately diving, gave each other time to recruit for a fresh plunge. The length of time they remained under water was about two minutes. They often made from 40 to 50 plunges in a day, bringing up each time about 100 oysters, which they gathered into a net-bag suspended from their neeks. The pearl fisherics of Ceylon, in 1797, yielded a revenue to Government of $£ 144,000$; another, in $1798, £ 192,000$; a third, in 1799 , $£ 32,063$; and for 14 years thercafter, this sum was not much exceeded, excepting in three instances; while in 1837, the last year in which any oysters were taken, it was only $£ 10,500$. The Ceylon pearls are whiter than those of Ormuz or the Arabian coast. The cliank or conch fishery was at one time carried on to a great extent, employing about 600 divers, but is abandoned owing to the little demand now made for them in Bengal, to which the greater part were sent. The chank is a sea shell (Voluta pyrum), adapted for cutting into
rings, and formerly used in great numbers by the native women of Hindoostan for bracelets and anklets.

Manufactures, Trade, \&c.-The manufactures of Ceylon are very unimportant, with exception of arrack, which, as elsewhere stated, is extracted from the blossoms of the cocoa-nut tree. Weaving, though little progress has been made in the art-and the produce is generally of the coarsest kind-gives employment to many persons. The articles manufactured are handkerchiefs, table-cloths, napkins, towcls, sail-cloth, but chiefly a coarse kind of cloth, used for their dress by the natives. The number of looms employed in producing these fabrics was, in 1842,3633 . There are also oil-mills, for pressing the cocoa-nut kernels; the number of these mills in operation, in the year above named, was 281. The Cingalese are expert workers in gold and silver, and excel in the manufacture of lacquered ware. Salt is now collected by Government officers from shallow lagoons, called, in the colony, leways, which at certain seasons are overflowed by the sea; or it is manufactured in pans, the property of the Government, and let for that purpose. The leways or lagoons, and pans, are stated to be capable of producing annually 905,000 bushels, yielding an annual revenue of about $£ 40,000$. Both the internal traffic and foreign trade of Ceylon have been rapidly improving of late years. In 1843, the imports amounted to $£ 965,027$; and the exports, to $£ 416,145$; which, in 1849 , had increased to-exports, $£ 1,206,149,8 \mathrm{~s} .8 \mathrm{~d}$.; imports, $£ 1,347,549,15 \mathrm{~s} .4 \mathrm{~d}$. The increase in the value of the exports is chiefly caused by the increased quantities of coffee now produced in the island. The principal articles of export to Great Britain are coffee, cinnamon, and cocoa-nut oil; to other places, chiefly to India and British possessions, coir rope and junk, areca-nuts, boards, planks, and tobacco, which goes almost wholly to the continent of India. The principal articles of import from Great Britain are cotton manufactures, beer, ale, and wine; iron unwrought, and iron and steel manufactures, machinery, books, and stationery. From other countries dried fish, rice, paddy, wheat, sugar, tea, cowries, \&c. The quantity of cinnamon exported in 1845 was 505,669 lbs. Mercantile accounts are kept in British currency; but the following monies also circulate in the island, namely, 3 challies $=1$ pice, 4 pice $=1$ fanam $=1 \frac{1}{2} d ; 12$ fanams $=$ 1 rix dollar $=1 \mathrm{~s} .6 \mathrm{~d}$. The Company's rupee is current at $2 s .$, and the Spanish and American dollar at $4 s .2 d$.

Government, \&c.-The Government of Ceylon is conducted by a governor and two councils, executive and legislative, of both of which the governor is president. The first is composed of 6 members, including the governor; the other of 10 members, 6 of whom are named by the governor-namely, 3 European merchants, 1 burgher, and 2 natives. The councillors are selected either by the governor himself, or by the Secretary of State for the colonies. The powers of the councils are limited, being wholly subservient to the governor, who can carry into effect any law without their concurrence. All laws, before being acted on, must be approved of by the Secretary of State. By recent regulations, any individual properly qualified, may be appointed to the most responsible situation, without reference to service, nation, or religion.

The island is divided into 6 provinces-the E., W., N., S., Central and N. Western, which, again, are subdivided into districts. In each province is stationed a Government agent. For the administration of justice throughout the island, there are, in the civil and criminal departments, a supreme court, established at Colombo; also a vice-admiralty court, and provincial courts, stationed in various districts; besides magistracies.

The establishment of the Church of England is composed of a bishop, archdeacon, and 12 European colonial chaplains; the Church of Scotland of 2 colonial chaplains; the Dutch Presbyterian Church, 1 colonial chaplain.

The force at present (1851) maintained in Ceylon consists of two regiments of infantry, two companies of the royal foot artillery, a mounted body guard for the governor, and a regiment composed principally of Malays-a brave, faithful, and soldier-like body of men, about 1500 strong. The principal fortresses are those of Colombo, Trincomalee, Galle, and Jaffna. The chief sources of revenue are the customs' duties, the export duty on cinnamon, land rents, and salt farms. The revenue for the year ending 31 st December, 1849, was $f 409,306,14 \mathrm{~s}$; the expenditure for the same period,
£418,424, 15 s .; thus leaving an excess of expenditure over revenue of $£ 9117,198$.

Religion, Language, Public Education, dec.-The Hindoo religion prevails exclusively among the population of Indian extraction, which forms a large proportion of the inhabitants of the N. and N. E. districts of Ceylon. On the W. and S. W. coast, the majority of the Singhalese profess the R.Catholic religion; the Kandians, and those of the interior, are mostly

singhalesk nuddilst priests and dagobah at kandy After Prince Soltykoff.

Buddhists. There are now 16 Protestant churches in the island, subordinate to the Bishop of Colombo; 32 dissenting places of worship, and a number of R. Catholie chapels. Buddhism, however, still prevails in the interior, and gencrally among the Singhalese of the sea-coasts. It is maintained and protected by the British Government, agreeably to the treaty of 1815.

The Singhalese have a colloquial language peculiar to themselves, but their classic and sacred writings are either in Pali or Sanscrit. The Malabars use the Tamil. The Ceylon Portuguese prevails in the European settlements, but its use is not universal among the natives. 'With regard to education,' says Mr. Knighton, 'much has been done, and much remains to do.' Fifty schools, containing 2300 scholars, are maintained by Government, of which the Colombo academy is the most important. There are schools maintained, also, by the Church Missionary Society, by the Wesleyan, the American, and the Baptist Missionary Societies, besides a number of private, and some regimental schools. The total number of scholars, in 1842 , was 20,630 .

People.-The present population of Ceylon is composed of Singhalese, Cingalese, or Ceylonese, Malabars, Mahometans or Moors, Viddahs, a small proportion of Europeans and their descendants, and negroes. The Singhalese, inhabiting the coasts, are a mild, timid race; obsequious to strangers, but hospitable and humane. They are, however, said to be indolent, cowardly, vindictive, and regardless of truth; but this unfavourable claracter of them, though often repeated, has been denied by those who have good opportunities of knowing them. Their stature is rather below the middle size; their limbs slender, but well shaped; eyes dark, finely-cut features, lair long, smooth, and black, turned up and fixed with a tortoise-shell comb on the top of the head. Colour varying trom brown to black, or rather from the lightest to the darkest tints of bronze. The Singhalese of the interior, or Kandian Singhalese, are a superior race, being stouter, handsomer, and of more manly and independent bear-
ing, with a greater degree of intelligence. The Malabars of Ceylon are similar in all respects to those of the continent, being the same active, enterprising, crafty race, in their characters of merchants, pedlars, jewellers, workers in metals, tailors, fishermen, jugglers, \&c. The Mahometans or Moors are found in all parts of the sea-coast, as well as in the interior. They are an energetic and industrious people, and engross a large proportion of the commerce and traffic of the island. They class themselves into four orders-merchants, weavers, fishermen, and bankers. The Viddahs, a savage race, are supposed to be a portion of the original inhabitants of Ceylon. They inhabit the most secluded and inaccessible parts of the island, and subsist entirely on wild fruits and animals. A cloth round the loins is their only clothing; and their habitations, generally of small dimensions, are formed for security amongst the branches of large forest trees. They are a robust and hardy race, but extremely peaceable and inoffensive. The other inhabitants of the coast consist of Dutch, Portuguese, and English colonists; some Kafirs and Javanese, a few Chinese and Parsee traders, and a various population sprung from the intermixture of these races with each other. Thero is yet another class, called Burghers, the descendants of Europeans and natives. Many of this class fill public offices and subordinate situations under Government.

The habits of the Singhalese are simple. They rise at dawn, and retire about 9 or 10 o'clock at night; they have two principal meals, one at noon, and the other at 7 or 8 o'clock in the evening. The favourite dish consists of rice, with curry; milk, ghee, oil, and fruits, are also common articles of diet. Beef is never eaten but by the lowest classes. The houscs are generally of mud, a single story in height, with tiled roofs. Their furniture consists of a few stools, mats, and earthenware dishes, a stone hand-mill, a pestle and mortar for rice. The dress of the men consists of a handkerchief wrapped round the head, and a long cloth reaching from the loins to the ankles. The dress of the women is much the same. Their manners are courteous and polished, but their intellectual powers limited. In arts and sciences they have made little progress.

The general population of the island was decreasing fur several centuries. It is now, however, on the increase; and latterly, this increase has been rapid. In 1832, the entire population scarcely amounted to $1,000,000$, of whom 6500 were whites; in 1842 , it had increased to $1,337,000$, of whom about 7500 were whites; whilst in 1843 , it is stated at $1,421,631$, being an increase, in one year, of 105,000 . This amount of population gives about 59 individuals to a squaro mile. It consisted of $1,413,356$ coloured, and 8275 whites. A considerable part of the increase in the population is, of late years, to be attributed to the great number of Malabar coolies who come from India for employment on coffee estates.

Antiquities, History, dc.-The Singhalese annals contain a historical record of events for 24 centuries; and their authenticity, as regards descriptions of ancient towns and buildings, and other works of art, is established by existing ruins, proving that the island had been, at a remete period, inhabited by a powerful and numerous people. The lake of Candeley, nearly 15 m . in circumference, is embanked in several places with a wall of huge stones, each from 12 to 14 fect long, and broad and thick in proportion, laid regularly one over the other. At one point in this majestic work, two lills are joined together in order to collect the water of the lake, by an embankment nearly 150 ft . in breadth at the base, and 30 ft . at the summit. In this part of the wall arches are to be seen; and over these, in the work which is under the level of the water, an opening is made exactly resembling the conduttori used by the Romans in some of the lakes of Italy, for letting out the water. Another of these remarkable remains of antiquity was discovered in the year 1810, in the centre of a very thick forest. It is supposed to have been a Buddha pagoda, reared, like the Egyptian pyramids, in honour of the dead. The size of the building is gigantic ; the basis of its cone is about a quarter of a mile in circumference; and on the tops and sides, large trees liave fixed their roets among the ruins, and that up to the height of 50 or 60 ft . It is surrounded by a square inclosure, 1 m . in circumference, consisting of a broad wall made of brick and inortar, and having within it a number of cells. In the
articles on Anuradhapura and Dambool further notices will be seen of remarkable Singhalese antiquities.

Ceylon was originally divided into a number of distinct petty kingdoms, but in process of time was reduced under the dominion of the King of Kandy. Little, however, was known regarding it, until the year 1505, when the Portuguese established a regular intercourse with the island, being encouraged thereto by the King of Kandy, who paid them tribute in cinnamon, to defend the island against the Arabian pirates. The Portuguese were subsequently expelled by the Dutch, who, in turn, were driven from the island by the British, after a protracted and sanguinary struggle. Hitherto Kandy had retaincd its independence; but in 1815 the Kaudyans entreated the British to depose their prince, whose tyranny had become intolerable. The request was complied with, the object accomplished, and Kandy became thereafter a part of the British dominions. A rebellion broke out there in 1817, which was not entirely quelled for nearly two years; and in 1818 , manifestations of discontent, confined, however, almost entirely to the priests and chiefs, again made their appearance, but were speedily suppressed, as the general population was perfectly contented with its lot.

The principal towns of the island are Colombo, Trincomalee, Kandy, Pont de Galle, Jaffina, and Kornegalle, the capitals of the six provinces. Pop. (1843), 1,442,000.(Knighton's History of Ceylon, 1845; Anglo-Indian and Colonial Almanac ; Journal of the Statistical Society of London; Porter's Progress of the Nation; Parliamentary Reports; Von Orlich's Travels in India; The Asiatic Journal; Ceylon Gazetteer ; Pridham's Ceylon, 1849 ; Private Communications ; \&c.)

CEZIMBRA, a tn. and small seaport, Portugal, prov. Estremadura, $20 \mathrm{~m} . \mathrm{S}$. Lisbon, on the Atlantic. It has an active fishery. Pop. 4310.

CHAAM, a vil. Holland, prov. N. Brabant, 10 m . S.S.E. Breda; in a pleasant neighbourhood, with Reformed and R. Catholic churches, a new village house, and a school. Pop. 400.

CHA'B, or KA'B, a dist. Persia, Khuzistan, lying between the rivers Karoon and Jerrahi. It is a desert tract, and destitute of water, except during the rainy season, and in the months immediately succeeding. The inhabitants, who are of Arabian descent, came originally from Wásit, and the marshes near the junction of the Tigris and Euphrates; some divisions came, also, from the Arabian coast of the Persian Gulf. But they have now lost much of the genuine Arab character, having intermingled largely with the Persians, and to a great extent abandoned the wandering life which they formerly led, and have settled down in villages situate mostly on the Karoon and Jerrahi. Their villages, which are composed mostly of liuts, built of reeds, are not, however, of a very permanent character ; for cattle-rearing, being their principal occupation, their movements depend on the condition and extent of their pastures. The authority of the Cha'b Sheïkh is very considerable, extending over a number of tribes beyond the limits of the Cha'b district. Sir John M. Kinneir, who visited Persia upwards of 40 years since, states his revenues at $£ 50,000$ a year; but Mr. Layard, a much more recent traveller, does not think it exceeds a third of that sum. The latter, however, leaves Sir John's statement that the Sheilkh can bring into the field 5000 horse, and 20,000, foot undisturbed.

CHABEUIL, a tn. France, dep. Drôme, 8 m . E.S.E. Valence, l. bank, Veoure. It is ill built, has a communal college, the ruins of an old castle and tower, and formerly had the title of principality. Manufactures :-common cloth, spun silk, and paper. There are also tanneries, and bleaching grounds. Pop. 1496.

CHABLAIS [Italian, Ciablese], a prov. Sardinian States, Savoy, on the Lake of Geneva, cap. Thonon; area, $336 \mathrm{sq} . \mathrm{m}$. It is mountainous, has fine forests, excellent pastures, and fertile valleys, yiclding grain, grapes, chestnuts, and other fruits. Trade in grain, cattle, mules, pigs, cheese, and wood. It comprises five mandamentos, and 58 communes. Chablais is one of the Sardinian provinces which, by the acts of the Congress of Vienna, was comprised in the Swiss neutrality. Pop. 52,000.

CHABLIS, a tn. France, dep. Yonne, 9 m . E. Auxerre, 1. bank, Serein; in the midst of vineyards, which produce the celebrated white wine called Chablis. Pastry and biscuit
are manufactured. There are tannerics; and a considerable trade is carried on in wine. Pop. 2583.

CHABRIS, a vil. France, dep. Indre, 25 m . N.W. Issoudun, r. bank, Cher. In the vicinity good wines are raised. Pop. 2077.

CHACAO STRAIT, a narrow channel, S. America, between the S. coast of Chili, and the N. side of the isl. Chiloe, about the middle of which is situate the town of same name; lat. $41^{\circ} 48^{\prime}$ S.; lon. $73^{\circ} 35^{\prime}$ W.

CHACAIOYAS, or San-Juan-de-la Frontera.-1, A prov. Peru, intendency of Truxillo, frontier of Ecuador. It is 114 m . long, and nearly as many broad; intersected by the central branch of the Andes; climate, trough in some places exceedingly cold, and in others equally hot, for the most part mild and agreeable. It produces wheat, maize, sugar, and all kinds of fruits and herbs; but its principal productions are cotton and tobacco. The women are employed in spinning, and the men in field labour and weaving. There are but few mines, and only one of these is gold. Pop. 10,000. -2, A tn., cap. of above prov., in lat. $6^{\circ} 8^{\prime} \mathrm{S} . ; 185 \mathrm{~m}$. N.E. Truxillo.-3, A river, flowing N.W. through the above dist., and falling into the Marañon.

CHACELEY, par. Eng. Worcester; 1710 ac. Pop. 364.
CHACO (el Gran), a dist. Republic of La Plata; bounded, N. by Bolivia, E. by Paraguay, S. by Santiago, and W. by Tucaman and Salta; about 400 m . long by 200 to 250 m broad. It is watercd by the Vermejo and Pilcomayo, and numerous other affluents of the Paraguay. In the W. it is intersected by offsets of the Andes, and in the E. forms extensive plains and marshes, with tracts at times entirely inundated; while in the $S$. are vast sandy deserts, interspersed with salt pools. It is little known, and is thinly inhabited by two races of Indians, the Tobas and Lenguas, governed by the respective chiefs, and subsisting chiefly by hunting and fishing. In certain parts are extensive forests, and a rich vegetation.

CHAD (Lake), Africa. See Tcirad.
CHAD (St.), two pars. Eng.:-1, Salop; 14,680 ac. Pop. 7625.-2, (Lichfield), Stafford; 3180 ac. Pop. 2263.

CHADDA, a river, Africa. See Tchadda.
CHADDESDEN, par. Eng. Derby; 2080 ac. Pop. 472
CHADDESLEY-Corbett, par. Eng., co. Worcester; 5780 ac. Pop. 1434.

CHADDLEWORTH, par. Eng. Berks; 3660ac. P. 481
CHADI-Leubu, a river, La Plata, forming a continuation of the Atuel, commencing in lat. $36^{\circ} \mathrm{S} . ;$ lon. $66^{\circ} 38^{\prime} \mathrm{W}$., and, after a S.E. course, entering the Salado, in lat. $36^{\circ} 40^{\prime} \mathrm{S}$.

CHADSUNT, par. Eng. Warwick; 1230 ac. Pop. 36.
CHADWELL (St. Mary), par. Eng. Essex; 1540 ac. Pop. 236.

CH $£$ RONEA, an ancient tn. Greece, dist. Attiké and Viotia, the site of which is now occupied by the modern Ka purna, 5 m . N. Lebadea or Livadia. It is famous for several battles fought in its neighbourhood, particularly one in which Philip of Macedon defeated the Athenians, and enabled his more famous son, Alexander, finally to crush their independence.

CHAFFCOMBE, par. Eng. Somerset; 1160 ac. P. 288.
CHAGFORD, a market tn. and par. England, co. Devon. The town, $14 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. by W. Exeter, is much resorted to for its pure air, and picturesque neighbourhood. It is the seat of the Stannary court. Area of par. 8710 ac. Pop. 1836

CHAGNY, a tn. France, dep. Saône-et-Loire, 10 m . N.W Châlons-sur-Saône; well built; with a fine church, of 12 th to 14th century; manufactures of serge, flannel, and other wool len fabrics; and several good stone quarries. Pop. 3072.

CHAGOS ARCHIPELAGO, a group of isls. and banks, Indian Ocean, nearly on the same meridian with the Laccadive and Maldive Islands, and, therefore, probably continuations of the same chain of submerged mountains, lying between lat. $7^{\circ} 39^{\prime}$ and $4^{\circ} 44^{\prime}$ S., and lon. $70^{\circ} 50^{\prime}$ and $72^{\circ} 50^{\prime}$ E. The principal island, Diego Garcia or Great Chagos Island, is considerably upwards of 100 m . to the S . of the main group in lat. (S. point) $7^{c} 26^{\prime} \mathrm{S}$. ; lon. $72^{\circ} 23^{\prime} \mathrm{E}$. Its length, N. to S. , is about 15 m. ; general breadth, 3 to 4 m ., having the form of a crescent, with the convex side $\mathbf{E}$. This remarkable island may be considered as a steep coral wall, the top of which is covered with tall cocoa trees, standing in the ocean; for the whole interior is a lagoon or natural harbour, nearly of the same length and breadth as the island itself, no part of
the circumjacent wall being above half a mile broad, while a great portion of the E. side is not the tenth part of a mile in breadth. It is low, not being more, generally, than 8 or 10 ft . above the sea at high tides. The French used to have a small settlement on this island, consisting of slaves and a few Europeans, who prepared cocoa-nut oil and salt fish for small vessels which came annually from Mauritius. A variety of fish abound in its harbour, the entrance to which is at the N.W. end of the island; and excellent green turtle visit the shores on the outside of the island; the land-crabs, which feed on the cocoa nuts as they fall from the trees, are also wholesome food; and good fresh water may be had in almost every part of the island, by digging 8 or 10 ft . deep. Next in value and importance to the island just described, is a group called Peros Banhos. It forms nearly a square of 50 m . in circumference, containing 27 islands of small extent; low, and covered with cocoa trees, from the nuts of which about 34,000 gallons of oil are obtained annually. Poultry, pigs, fruit, vegetables, and water can be procured here. This group was discovered by the French in 1744; its situation is between lat. $5^{\circ} 13^{\prime} 30^{\prime}$ and $5^{\circ} 27^{\prime}$ S., and lon. $71^{\circ} 47^{\prime}$ and $72^{\circ} 10^{\prime}$ E. The other islands of any extent are Egmont Islands, the largest of which is in lat. $6^{\circ} 40^{\prime}$ S.; lon. $71^{\circ} 26^{\prime} 30^{\prime \prime} \mathrm{E}$. These islands produce 6000 gallons of oil yearly ; pigs and poultry in abundance; also, pigeons and land-crabs. Water, also, is easily procurable. Eagle Island ; lat. $6^{\circ} 11^{\prime}$ S.; lon. $71^{\circ} 23^{\prime}$ E. There is a village on the N.W. side of this island. It produces annually about 6000 gallons of cocoa-nut oil ; a small quantity of cotton, soap, and tortoise-shell. Salt fish is also exported. Wood, water, and poultry are readily obtained here. The Chagos islands and banks were very imperfectly known till 1786, when they were surveyed by Capt. Archibald Blair of the Bombay Marine. They formerly had the general name of Basses de Chagos.

CHAGRES, a tn. and port, New Granada, Isthmus Panama, N. coast, at the mouth of a river of the same name; lat. $9^{\circ} 21^{\prime} \mathrm{N}$. ; lon. $79^{\circ} 59^{\prime} 15^{\prime \prime} \mathrm{W}$. (n.) It stands on a marshy site, on both sides of the river, the portion on the l. bank being called the American Town, and that on the right the old Spanish and Indian Town. The former is composed of wooden houses, with shops, stores, and lodging-houses; the latter, of huts, thatched with palmetto, and a few wooden houses also. Here is a rude old church, with bells liung on a scaffold in front. The population of American Town consists cliiefly of natives of the U. States; that of Indian Town, of negreos, halfbreeds, Indians, Spaniards, and a few English. From its low and damp situation, the town is unhealthy, and heavy tropical showers are almost continuous; but behind the town there are some fine heights, and beautifully wooded dells. Although the spot on which the town stands is flat, the coast on each side is bold, with precipitous cliffs. The harbour is very indifferent, so heavy a sea rolling in when the wind is from the N.E., N., N.W., and W., that it is with the greatest risk, although the holding ground is good, that any vessel can ride at such times. Ships, however, may water off Chagres, especially small vessels, several copions rivulets here pouring over the rocks, where boats can lie in perfect security, cutting wood while the water is filling, and that in great loads, with much ease. Chagres is the port at which the W. Indian steamers land the mails for the W. coast of S. America; and it has been recently much associated with the proposed lines of communieation between the Atlantic and Pacific Oceans, through Central America, and is pretty generally believed to be that adopted as the starting-point of the railway now in progress across the Isthmus of Panama; but the locality actually fixed upon is 3 m . N.E. Chagres, at Limon or Navy Bay, where the harbour, though not of the best description, is much better than at Chagres. The line will terminate on the opposite side, at Panama, the distance in a direct line being 33 m ., but with many rivers and ranges of hills intervening. In March, 1851, the rails were nearly laid from Navy Bay to Gatun, 5 m . on the way to Gorgona, which is half way across the isthmus. - The river rises in the mountains, about 30 m . N.E. Panama, flows through a fertile country W., and then N., and falls into the Caribbean Sea at Chagres. Its affluents are the Gatun, Pequina, and Trinidad, after the confluence of the last of which it has a depth of irom 16 to 30 ft .; but the navigation is impeded by rapids and numerous falls.

Vol. I.

CHAHARBAG, a tn. Afghanistan, 30 m. N. Cabool, cap. of a dist.; lat. $34^{\circ} 57^{\prime} \mathrm{N} . ;$ lon. $69^{\circ} 8^{\prime} \mathrm{E}$. It comprises about 500 houses, has a tolerably well-supplied bazar, and a mannfactory of swords, gun-barrels, and cutlery.

CHAlle
Cifaille-les-Marias, a tn. France, dep. Vendée, 12 m . S.W. Fontenay, in the midst of a marsh, on the high road from Bourbon to Rochelle. The inhabitants manufacture common cloth, and are engaged in tillage and rearing cattle. l'op. 2296.

CHAIN ISLAND, an isl., S. Pacific, Low Archipelago, 207 m . E.N.E. Tahiti ; lat. $17^{\circ} 23^{\prime}$ S.; lon. $145^{\circ} 38^{\prime}$ W. (n.) ; about 12 m . long, and $1 \frac{1}{2}$ broad; discovered, in 1796 , by Cook.

CHAISE-dieu (La) [anc. Casa Dei], a small tn. France, dep. Haute-Loire, $21 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Le Puy; celebrated as the site of a famons Benedictine abbey, founded by St. Robert in the ninth century, the Gothic church of which is one of the most chaste and magnificent in France, containing many exquisite paintings, and a fine organ. Large quantities of lace are manufactured here. Pop. 1923.

CHALABRE, a tn. France, dep. Aude, 24 m. S.W. Carcassonne, r. bank, Lers. It is regularly built, and has an old castle, a clock tower, considerable cloth manufactories, producing about 15,000 pieces annually; spinning-mills for wool, and dyeworks. Pop. 2855.

CHALAIN MEW, or Sillah Mew, a tn. Burmah, 1. bank, Irawadi; lat. $20^{\circ} 50^{\prime} \mathrm{N}$.; lon. $94^{\circ} 30^{\prime} \mathrm{E}$. It is the cap. of a district, and, before the British invasion, contained 10,000 imhabitants. It was formerly surrounded by a brick wall, 50 ft . high without, and 30 within, supported by slight abutments, and only $3 \frac{1}{2} \mathrm{ft}$. thick. The walls are said, by the natives, to be 1500 years old.

CHALBURY, par. Eng. Dorset; 440 ac. Pop. 152.
CHALCIS, a tn. Greece. See Negropont.
CHALCO, a tn. and lake, Central America, state of, and 18 m. S.E. Mexico. The rown, agreeably situate on the borders of the lake, enjoys a mild temperature, and has a population of about 3000 -The lake, nearly circular, and about 2 m . in diameter, serves, when necessary, to replenish the lake of Mexico, for which purpose proper sluices are provided. On it are floating gardens, formed of brushwood or other materials, and covered with mould, which are moved about the lake by the wind.

CHALCOMBE, par. Eng. Northampton; 1730 ac . P. 488.
CHALDEA, the name given to an ancient tcrritorial division of Asia, on the borders of the Euphrates, the extent of which has varied much at different times. In some parts of the Old Testament the name of Chaldeans appears to be used as a general designation for the whole subjects of the Babylonian empire ; and, in accordance with this, some of the oldest profane writers, and particularly Berosus, speak of Babylon as a great resort of the people inhabiting Chaldea. Ultimately, however, the term was much restricted in meaning, and Chaldea was used to designate only a particular district at the S.W. extremity of Babylonia, extending along the Persian Gulf, and upwards between the r. bank of the Euphrates and Arabia. In this district Ptolemy places the towns of Shanda, Rahacharta, and others along the river; and inwards, Chumara, Betlara, Beramba, and Orehre. All these places have disappeared; and we now find within the district which they occupied, the modern city of Basrah or Bussorah, and the towns of Diwaniyeh, Lamlum, Kurnah, Zobeid, \&c.

CHALDON, two pars. Eng.:-1, (Herring), Dorset; 3000 ac. Pop. 285.-2, Surrey; 1380 ac. Pop. 197.

CHALE, par. Eng. Southampton; 1880 ac. Pop. 610.
CHALEUR (BAY of), an extensive arm of the sea, N. America, in the Gulf of St. Lawrence, 85 m . long, E. to W., and 20 m . broad at its widest part. Its N. shore is in Lower Canada, and its S . in New Brunswick. It receives numerous streams, the principal of which are the Ristigouche, the estuary of which forms the upper extremity of the bay, and the Nipisguit. The navigation of the bay is perfectly safe, and the anchorage everywhere good. In July, 1760, a French fleet was here defeated by the British.

CHALFIELD (Great), par. Eng. Wilts; 1200 ac P. P. 59. CHALFONT, two pars. Eng. Bueks:-1, (St. Giles), 3550 ac. Pop. 1228.-2, (St. Peter), 4930 ac. Pop. 1483. CHALGRAVE, par. Eng. Bedford; 2130 ac. Pop. 818. CHALGKOVE, par. Eng. Oxford; 2120 ac. Pop. 691.

## CHAMALARI

## CHALK, par. Eng. Kent; 2040 ac. Pop. 385.

CHALKI ISLAND, one of the Princes' Islands, Sea of Marmora, 13 m . from Constantinople. It is the secend largest of the whole group, and the most beautiful; it is hilly, with fertile valleys between, in which corn, fruits, and wine are raised, and cattle reared. There are three convents on the island, one of which is now a college, where ancient and modern Greek are taugbt. It is much resorted to by visitors, on account of the beauty of its scenery and agreeable climate.

CHALKY (Island and Bay), New Zealand. The island, in which the bay is situate, is off the S.W. extremity of Middle Island; lat. (S. point) $46^{\circ} \mathrm{S}$. ; lon. $166^{\circ} 10^{\circ}$ E. ; about 7 m . in length, and from 3 to 4 broad at the widest part. It is not compesed of chalk, as its name would imply, bnt of hard white rock. It is covered with wood, which produces myriads of flies, of a very poisonous descriptien, that bite severely. The bay is at the S.W. end of the island. On the S. side of it, is Port Chalky, an excellent harbour, generally used by ships visiting this part of New Zealand.

CHALLA, a pass, S. America, E. Cordillera of the Bolivian Andes, $14,700 \mathrm{ft}$. above sea level; lat. $17^{\circ} 40^{\circ} \mathrm{S}$.

CHALLACOMBE, par. Eng. Devon; 5450 ac. P. 305.
CHALLANS, a vil. France, dep. Vendée, 24 m. N.W. Bourbon-Vendée. It lies in the midst of marshes, between the canals of Perier and Etier. Pop. 1458.

CHALLOK, par. Eng. Kent; 3620 ac. Pcp. 429.
CHALMERS (Port), New Zealand. See Port Chalmers.
CHALON-sur-Saône, or Challon [anc. Cabillonum], a tn. France, dep. Saône-et-Loir, 33 m. N. Macon, at the commencement of the Canal du Centre, r. bank, Saône; here crossed by a bridge of five arches, communicating with the suburb of St. Laurent. The houses are in general well built, and a fine quay lines the river; but the public buildings are not remarkable. They consist of the cathedral, a Gothic edifice of the 13th century; the church of St. Peter, a general hospital, and ene for aged persons and orphans; the Hotel de Ville, palace of Justice, an obelisk to commemorate the opening of the canal, the college, a small theatre, public baths, and the public library, centaining 20,000 volumes. Chalon is the seat of a tribunal of first resert and of commerce, and has an exchange, agricultural seciety, and communal college. Hats, vinegar, oil, and imitation pearls, are manufactured here. There are also dyeworks, foundries, potteries, oil and flour mills, and a considerable trade in grain, flour, the wines of Burgundy and the South, cattle, woel, wood, charceal, coal, iron, plaster, tiles, \&c. It is a considerable entrepôt of goeds both for the N. and S. of France, and has a very thriving commission trade. The Saône becomes navigable for steam-boats here. Cæsar had grain magazines at Chalon, and it became the capital of Burgundy under Gentran. In 1273 Edward I. of England, being invited to a tournament here on his return from Palestine, attended with 1000 men-at-arms; and some disputes having arisen, the English attacked the French, killed a great number, and left the tilting-ground strewed with the dead. This event is known as the 'little war of Chalen.' The town suffered considerably from the civil wars of the 15 th and 16 th century, and from the invasion of the allies in 1814. It was formerly very unhealthy, but has been much improved in this respect by drainage. Pop. 15,937.

CHALONNAIS [Latin, Pagus Catalonicus], a small dist. France, formerly included in prov. Champagne, and now forming part of dep. Marne.

CHALONNES-sur Loire, a tn. France, dep. Maine-etLoire, 12 m . S.W. Angers; agreeably situate, 1. bank, Loire. It has manufactures of handkerchiefs, serges, and brandy. Pop. 2338.

CHALONS-sur Marne, or Chatlons [anc. Catalaunum], a city, France, cap. dep. Marne (Champagne), 94 m. E. Paris, with which it is connected by railway; lat. $48^{\circ} 57^{\prime} 22^{\prime \prime}$ N.; lon. $4^{\circ} 21^{\prime} 41^{\prime \prime}$ E. (L.) It lies, r. bank, Marne, here crossed by a handsome stone bridge of three arches, built in 1787. Low walls now supply the place of the old ramparts, the entrance being by six gates, which open to six main roads. The houses are inferior, being principally of timber, lath, and plaster; but the general aspect of the town is agreeable. The public buildings are, the cathedral, a fine edifice; three other cburches; the Hotel de Ville, built in 1772; the Hotel de la Prefecture, built in 1764, one of the finest buildings of the
kind in France; the barracks, fermerly a Benedictine abbey . riding school, theatre, royal school of arts, college, public library, containing 20,000 volumes; museum, hospital, poorhouse, \&c. There is a fine promenade, occupying about 18 ac., planted with superb elm trees. Chalons is the cap. of the second military division of the kingdom, and has a tribunal of commerce and of first resort, consulting chamber of manufactures, societies of agriculture, arts, and sciences, communal college, and two seminaries. It is the seat of a bishopric, and of one of the three royal schools of arts and trades, where 450 pupils are maintained and instructed at the public expense. There are manufactures here of woollen and cotton goods of varions kinds; also, cotton mills, tanneries, and chamois-leather works; likewise, a considerable trade in grain, hemp, wool, rape-oil, osiers, and sparkling champagne. Chalons was fortified and embellished by the Romans. Christianity was preached here about the year 250. In 481 Attila was defeated before its walls. From the 10th century it formed a kind of independent state, governed by its bishops, till 1360, when it was united to the Crown. In 1591, the Parliament of Chalons publicly burnt, by the hands of the executioner, the bull of excemmunication launched by pope Clement VIII. against the King of France. Under its countbishops it was a considerable city, with 60,000 inhabitants. Its privileges were subsequently withdrawn, and its celebrated fairs dwindled away after the union of Champagne with France. Pop. 13,733.

CHALOO, a vil. Tibet, midway between two lakes, about 60 m . S.S.E. Chashe-lo-um-boo; lat. $28^{\circ} 20^{\prime}$ N.; lon. $89^{\circ} 25^{\prime} \mathrm{E}$. The lakes are frequented by multitudes of migratory birds, including ducks, geese, storks, and large cranes; the eggs of the cranes are collected in great quantities on the banks. One of the lakes is much venerated by the inhabitants of Bootan, who fancy it to be the haunt of their deities.

CHALOSSE (La), an anc. dist. France, which was included in prov. Guienne, and of which St. Sever was the cap. It now forms part of dep، Landes.

CHALTON, par. Eng. Southampton; 3470 ac. P. 659.
CHALUS [anc. Castrum Lucii], a tn. France, dep, HauteVienne, 18 m. S.W. Limoges. It is of high antiquity, commanded by a large and strong castle, surrounded by walls, and flanked by numerous towers. It has some trade in horscs and mules; several annual fairs are held. Pop. 1143.

CHALVINGTON, par. Eng. Sussex; 1690 ac. P. 192.
CHAM [anc. Curtis Regia]:-1,A vil. and par. Switzerland, can. of, and about 3 m . W.N.W. Zug. It is beautifully situate on a height near the N.W. shore, where the lake of that name discharges itself into a tributary of the Reuss, and contains a large and handsome parish church, with a fine organ, and a good altar piece by Reinhard of Luzern, two schools, and baths. A good deal of wine is produced in the neighourhood, and splendid views are obtained of the lake and surrounding district. Pop. 1162.-2, Cham or Kamm, a tn. Bavaria, circle Oberpfalz, a little below the junction of the Kamp with the Regen, 30 m . N.E. Regensburg. It contains a palace, townhouse, and two churches; has some linen weaving, and a trade in linen and flax, wood, and cattle. Garnets and carnelians are found in the neighbourhood. Pop. 2081.

CHAM-COLLAO, an isl. China Sea, N.E. coast of CechinChina, S. part, in lat. $15^{\circ} 54^{\prime}$ N.; lon. $108^{\circ} 30^{\prime}$ E. ; having some islets adjoining its S . end, and others projecting W. from its N.W. part. It is inhabited, well cultivated, and the anchorage on the W . side, in 4 or $4 \frac{1}{2}$ fathoms, may be considered a safe harbour in all winds. About 18 m . S.S.E. from Cham-Collao, is another small island, but of considerable height, with a reef projecting from its S. extremity, called False Cham-Collao.

CHAMA, a river, Venezuela. prov. Merida, rising in the sierra Nevada-de-Merida, about lat. $8^{\circ} 15^{\prime}$ N.; lon. $71^{\circ}$ W.; flowing first E. to W., then turning N., and falling into the lake of Maracaybo, after a ceurse of about 100 m .

CHAMALARI, Chumalari, or Schamalari, one of the highest peaks of the Himalaya mountains, on the N. frontier of Bhotan, near its W. extremity; lat. $28^{\circ}$ N.; lon. $89^{\circ}$ E. Its height is variously stated, from $23,929 \mathrm{ft}$. to $27,200 \mathrm{ft}$. a discrepancy se great, being no less than 3271 ft. , as to imply either great carelessness of statement, or inaccuracy of measurement. One of the lower estimates, $23,980 \mathrm{ft}$., is given in Humboldt's Aspects of Nature, vol. i. p. 92.

CHAMALIERES [anc. Camelaria], an anc. tn. France, dep. Puy-de-Dôme, $1 \frac{1}{2} \mathrm{~m}$. from Clermont-Ferrand. It is well built, and has a large square, adorned with a central fountain. It has an old castle, with a lofty tower, called the 'Saracen's Tower;' and near the town are two monasteries, with handsome churches. Chamalieres is chiefly noted for the thermal springs in its vicinity. Resident pop. 1025.

CHAMAS (St.), [anc. Sanctus Amantius], a tn. France, dep. Bouches-du-Rhône, 24 m . N.W. Marseille, N. shore of the lagoon of Berre. It is divided into two parts by a hill, through which a tunnel, 213 ft . long, has been driven, and by which the two parts are connected. The E. and most ancient portion is surrounded by ramparts, and has broad, straight streets. The other is regularly built, and inhabited principally by the maritime population. An extensive Government powder manufactory occupies the ground between the hill and the lagoon. The port, to which about 40 fishing vessels belong, is frequented by small vessels, and by the tenders from Arles, which come to load powder. Oil of excellent quality, flour, wine, olives, and other productions of the country, are also exported. Pop. 2709.

CHAMBERSBURG, a tı. U. States, Pennsylvania, cap. co. Franklin, 32 m. S.W. Harrisburg, finely situate in the valley of Conecocheague Creek, a tributary of the Potomac. It has a courthouse, and county offices, eight churches, a bank, a tannery, pottery, paper-mill; cotton, woollen, and edge-tool factories, an oil and two flour mills, four printing-offices, two breweries, manufactories of cutlery, and many other mechanical and mannfacturing establishments; also, four academies, and six schools. In the environs, which are fertile and well cultivated, blue limestone, freestone, and marble abound. Its trade is considerable, and has received an additional stimulus by the completion of the line of railway from Philadelphia to Pittsburg. Pop. 4030.

CHAMBERY, a tn. Sardinian States, cap. Savoy, agrecably situate on the Leysse and Albane, between two mountains, at the border of a fertile plain, $45 \mathrm{~m} . S . S . W$. Geneva. It was formerly surrounded by walls and a ditch, with four gates, three of which led to three extensive suburbs. A citadel, on a hill, still remains, and contains a handsome church. The town is tolerably well built; houses mostly of three stories, but the streets are narrow, crooked, and have a very dull appearance, with exception of the Rue Corvette, where most of the business is carried on. Chambery possesses several public squares, ornamented with fountains, a cathedral, three other churches, several convents, four hospitals, an orphan hospital, a Jesuit college, an agricultural society, a royal society, corresponding with the Royal Academy of Turin, a public library, containing 16,000 volumes, a theatre, public baths, and two fine promenades. Among the most conspicuous buildings are three barracks erected by the French. The manufactures consist of soap, silk gauze, hats, silk and woollen stockings, common lace, and nails. There are also paper and marble works, a silk spinning-mill, a refinery for alum, and some tanneries. Grain, silk, cattle, wine, liquors, and copper, form the principal articles of trade. Chambery is also the seat of an archbishopric, and of the ligh court of appeal for the whole of Savoy. The inhabitants bear a high character for urbanity, and the women are said to be the handsomest in Savoy. The air is pure, and the climate mild. The environs, at least the low grounds, are fertile, and the mountains present many cascades, much visited by travellers. About 1 m . S. of the town is Les Charmettes, the residence of Roussean, and of his friend Madame de Warrens. Chambery was founded about the 10 th century, and remained under feudal lords till 1230, when it was ceded to Thomas, first Count of Savoy, who built the castle, where the princes of Savoy resided till the Government was removed to Turin. This castle was burnt in 1745 , and again in 1798, and restored in 1803. On September 24, 1792, the gates of the town were opened to the French, who made it the capital of the department of Mont Blanc, and retained it till the second treaty of Paris, November 20, 1815. St. Real and Count Xavier le Maistre were born in Chambery. Pop. 14,000.

CiIAMBON, or Chambon Ville:-1, A tn. France, dep. Creuse, 28 m . E. Gueret, at the confluence of the Tardes and Vouize. This ancient town was the capital of the Cambiovicenses. A square temple, of Gaulish origin, to which the
lomans had made some additions, now forms part of the
church. Chambon manufactures leather, and trades in cattle. Pop. 1353.-2, Chambon-Feugerolles, a tn. France, dep. Loire, 4 m. S.W. St. Etienne, on the Dondaine-Vachery, the water of which is said to be peculiarly adapted for tempering steel. It has thriving manufactures of nails, cutlery, files, saws, and articles in cast steel, ribbons, and tape; and has forges for iron and steel. Pop. 1736.-3, Chambon is also the name of several vils. in France; one, in the dep. Haute-Loire, 9 m . S.E. Yssingeaux, has a pop. of 401 .

CHAMBORD, a vil. and royal castle, France, dep. Loir-et-Cher, 9 m . E. Blois. The village, situate l. bank, Cosson, is inconsiderable, having only about 300 inhabitants.-The CASTLE or chateau, which is of great extent, is situate in a walled park 20 m . in circumference, abounding with deer, roe, and other game. It was commenced in 1526, by Francis I., after designs by Primaticcio. It was continued by Henry II., Henry III., and Charles IX. ; and Louis XIV. and Louis XV. made some inconsiderable additions, but the original designs were never completed. The building itself has a fantastic, and, from the darkness of the stone, rather a heavy appearance. A vast group of turrets, minarets, and cones, or inverted funnels, rise from a solid basement, the chief features of which are six external round towers, of prodigious size, 60 ft . in diameter, which seem the types of all those which characterize French châteaux. Its architecture marks the transition between the fortified castle and the Italian palace, and is a fine specimen of the age and taste of Francis I. It contains 440 chambers, and the grand staircase in the central tower is a double spiral, so contrived that parties ascending do not meet

lantern in the castle of chambord.
From France Monumentale et Pittoresque.
those descending. The castle was inhabited by Francis I., who made it the scene of his gallantries; by Louis XIII., and by Louis XIV., who gave brilliant fêtes here, at one of which Molière and his company performed for the first time his play of the Bourgeois Gentilhomme. Louis XV. gave it to Stanislaus, King of Poland, who remained here several years; after which, it was successively possessed by Marshal Saxe, the Crown, the Polignac family, and the Revolutionists, who burnt the tapestries to obtain the gold and silver with which they were wrought. After the battle of Wagram, Napolcon constituted Chambord a principality, and gave it to Marshal Berthier, as Prince of Wagram. When the widow of the Marshal offered the estate for sale in 1820, a company was formed, which bought it for $\mathbf{£ 6 1 , 6 2 0}$. and gave it to the Duke
of Bordeaux, in the name of the people of France, on the day of his baptism, May 1, 1821. It is now uninhabited, dismantled, and falling to ruin.

CHAME POINT, a headland on the S.W. coast of the Isthmus of Panama; lat. $8^{\circ} 40^{\prime} 18^{\prime \prime} \mathrm{N}$. ; lon. $79^{\circ} 40^{\prime} \mathrm{W}$. (r.)

CHAMISSO, an isl. Russian America, bay of Good Hope, Kotzebue's Sound ; lat. $66^{\circ} 13^{\prime} 12^{\prime \prime} \mathrm{N}$.; lon. $161^{\circ} 46^{\prime} \mathrm{W}$. It is covered with a thick swampy moss; is steep, except to the E., where it ends in a low sandy point. Its highest point is 231 ft . above sca level.

CHAMOND (St.), a tn. France, dep. Loire, 6 m. N.E. St. Etienne, at the confluence of the Gier and Ban, and on the railway from St. Etienne to Lyons. It is well built, has a handsome parish church, a promenade, public baths, communal college, and a consulting chamber of manufactures. The old castle, on the side of a steep hill, and now in a ruinous condition, presented the singularity of a belfrey below a church, and a church below a meadow, round which a carriage could be driven. A hill in the vicinity furnishes excellent buildingstone from its summit, while the base is a mass of coal, in which extensive mines are worked. This is a thriving manufacturing town, carrying on three principal branches of industry, namely, milling silk, the manufacture of nails for the navy, \&c., and the fabrication of silk ribbons and laces. There are also dyeworks, bleaching-grounds, foundries, forges, and furnaces, and a considerable trade in horses and cattle. Pop. 8236.

CHAMONIX, Chamouni, or La Prieure [anc. Campus Mrunitus], a vil. Sardinian States, Savoy, prov. Faucigny, in valley of same name, 39 m . E.S.E. Geneva. It has several hotels, and is supported chiefly by visitors to the scenery of the valley. It originated in a Benedictine priory, founded by a count of Genevois in 1090.

CHAMONIX, or Cilamouni, a celebrated valley, Sardinian States, Savoy, prov. Faucigny, in the Pennine Alps, and 3245 ft . above sea level. It is about 12 m . long, by 1 to 6 m . broad; lies S.W. to N.E., its E. side formed by Mont Blanc and other lofty mountains of the same range, and its W. by Mont Brevent. It is traversed in its whole extent, N. to S., by the Arve, which rises on the confines of canton Valais, receives numerous rivulets in its course, and leaves the valley by a narrow gorge on the S.W., through which also passes, high above the river, the highway to Sallanches and Geneva. At its N. end the valley communicates with canton Valais, by the passes of the Col de Balme and the Tête Noire, both practicable for mules; and it may also be left by other passes, as the Col du Geant; but they are both difficult and dangerous, and only suited for practised and daring pedestrians. The mountains on the W. side of the valley, though attaining a height of 8500 ft . above sea level, are not covered with snow in summer; but those on the E. side, in the range of Mont Blanc, being from 10,000 to upwards of $15,000 \mathrm{ft}$. high, are always snow-clad, excepting where the peaks are too perpendicular for snow to lie. From the snowy range alone, of course, proceed those remarkable features of the valley, the glaciers, some of which approach close to the cultivated fields. They are very numerous, and of different sizes; but the two most important are the Glacier des Bossons, and the Mer-de-glace, the latter the most extensive glacier in the Alps. From its lower extremity, called the Glacier des Bois, the meltings of the glacier flow off in greater or less volume, according to the season of the year, from under a naturally-formed ice-arch, called the source of the Arveiron, the name given to the stream thus formed, which is an affluent of the Arve. The waters of this and other glacier streams are muddy in the extreme, from the quantity of crushed rock suspended in them. The lower slopes of the mountains are covered with timber, through which is frequently to be seen the devastating course taken by the avalanche. The climate is warm in summer, but very severe in winter, which lasts from October to May, during which the snow lies 3 ft . deep in the lowest parts, and all communication with the external world is cut off. The soil is not fertile, but it is assiduously cultivated; and the inhabitants, who are gathered together in numerous villages, of which Chamonix or La Pricure is the chief, raise barley, oats, spelt, flax, and potatoes, rear cattle, and train bees, from which most excellent honey is obtained, and a considerable quantity exported. During the winter, yarns, cloths, hats,
and implements are made, and many fanciful articles of wood are carved. All the valley is famous for its scencry, which was first brought under public notice by Windham and Pococke, two Englishmen, who visited it in 1741. Pop. 3800.

CHAMORERIL, or Chumureri, a lake, Central Asia, Ladak; lat. (N. extremity) $32^{\circ} 59^{\prime}$ N.; lon. $78^{\circ} 20^{\prime}$ E.; length, about $15 \mathrm{~m} . ;$ breadth, $1 \frac{1}{2} \mathrm{~m} . ; 15,000 \mathrm{ft}$. above sea level. Water brackish, of a blue colour, and supposed to be deep. It is surrounded by lofty mountains, rising in some places 5000 ft . above the surface of the lake. Although several considerable streams flow into it it has no efllux, being kept at its level by evaporation alone.

CHAMOUNI, valley and vil. See Cinamonix.
CILAMPA. See Anam.
CHAMPAGNE [anc. Campania Gallica], one of the largest and most important of the former provinces of France. It was subdivided into 12 districts, and, along with Brie, was one of the 12 governments of the kingdom. It now forms deps. Marne, Haute-Marne, Aube, Ardennes, and part of deps. Yonne, Aisne, Seine-et-Marne, Meuse, Côte-d Or, HauteSaône, and Vosges. The well known wine, Champagne, takes its name from this province.

CHAMPAGNEY, a tn. and com. France, dep. HauteSaône, 25 m . E.N.E. Vesoul; with manufactures of leather and tiles, and some trade in bark. The cherry crop of the district is important, the fruit being principally made into a spirit, in appearance resembling gin or whisky, and called kirschwaser (cherry water). In the vicinity is an extensive coal mine. Pop. 3017.

CHAMPAGNOLE, a tn. France, dep. Jura, 19 m . E.N.E. Lons, r. bank, Ain. It is favourably situate for trade, on the road from Paris to Geneva, and has an abundant command of water-power. There is here one of the largest wiredrawing and nail manufactories in France. Knitting-needles and carriage-drags are also manufactured ; and there are several saw-mills. Pop. 3201.

CHAMPANAGUR, a tn. Hindoostan, prov. Bahar, 3 m . W. Boglipoor ; lat. $25^{\circ} 14^{\prime}$ N.; lon. $86^{\circ} 55^{\prime}$ E. There is here a monument, of some note and of great size, of a Mahometan saint.

CHAMPAUBERT, a vil. France, dep. Marne, 28 m . S.W. Chalons. On February 10, 1814, Napoleon defeated the Prussians here. Pop. 231.

CHAMPION BAY, a bay, Australia, S.W. coast, Geelvink Channel; lat. $28^{\circ} 47^{\prime}$ S.; lon. $114^{\circ} 36^{\prime}$ E. (r.) The depth of the bay is regular, with five and six fathoms; fine white sand. It was visited by Capt. Stokes in 1840, who gave it its present name; the neighbouring heights he represents as having a brown and arid appearance, and as being destitute of timber.

CHAMPLAIN (Lake of), a lake of considerable extent, chiefly in the U. States, between the states of New York and Vermont, but the N. end of which is within Lower Canada; extreme length, N. to S. about 120 m .; breadth, from half a mile to 15 m. ; area, about $600 \mathrm{sq} . \mathrm{m} . ; 90 \mathrm{ft}$ above the level of the sea. It was discovered, in 1609 , by Samuel Champlain, a French naval officer, and Governor-General of Canada, from whom it takes its name; it is navigated by steamboats and other vessels, and is deep enough for ships of the largest class. Its outlet is the river Richelieu, flowing N. to the St. Lawrence; navigable for barges throughout, and for ships as far as St. John's, and the most frequented line of communication between U. States and Lower Canada. The S. end of the Lake is connected, by a canal, with the Hudson river, thus affording water communication between the St. Lawrence a few miles below Montreal, and the Atlantic, at New York. Upwards of 50 islands are scattered over its surface; and it receives numerous streams, none of which are very important. The scenery along its sides is picturesque. It abounds in salmon, shad, pike, and other fish; in winter, it is usually quite frozen over, and is passable on the ice. The chief port on its banks is Burlington.

CHAMPLAIN, a vil., port, and township, U. States, New York, near the N.W. extremity of lake of same name, 167 m. N. Albany, and 38 m. S. by E. Montreal. It lies on the Chazy, about 5 m . from its mouth, and has a Presbyterian and a Methodist church, a grist, and six saw-mills, and a tannery. The river is navigable for sloops to within 1 m . of the vil. Pop. of township, 3632 .

CHAMPLITTE, a tn. France, dep. Haute-Saône, 30 m . W. Vesoul, on the Salon. It manufactures brace-webs and brandy, and has a trade in grain, wax, and the wine of the district. Pop. 2770.

CHAMPON, or Choomphoon, a tn. Lower Siam, 1. bank, Taynng ; lat. $10^{\circ} 51^{\prime}$ N. ; lon. $99^{\circ} 23^{\prime}$ E.; 212 m . S.S.W. Bankok. It was formerly considered by the Siamese an important military post. Excellent timber for shipbuilding, ratans, and tin, are found in the environs.

CHAMPSAUR, a dist. France, in the former province of Dauphiné, now comprised in deps. Hautes-Alpes and Drôıne.

CHAMUSCA, a tn. and par. Portugal, prov. Estremadura, comarca of, and 10 m . N.E. Santarem; on the E. side of the Tagus, from which it is distant abont $1 \frac{1}{2} \mathrm{~m}$. It has two annual fairs, of three days cach. The vicinity produces a much esteemed red wine, of which about 1500 pipes are made annually. Pop. 2800.

CHANAK KALESSI. See Channakalasy.
CHANCAY, a prov., tn., and river, Peru. The province, dep. Lima, is about 80 m . long, and as many broad. The part of it which is covered by the Andes is cold; but in the valleys on the sea-coast it is extremely warm. The most considerable rivers are the Pasamayo and the Huaura. Guano has long been used here as a manure; and in the valleys, which are naturally very fertile, immense crops oi maize and sngar are raised by the instrumentality of this valuable fer-tilizer.--The Town, cap. of above prov., is situate in a beautiful vallcy, near the embouchure of river of same name in the Pacific, 37 m . N.W. Lima. It has a good and wellfrequented harbour.-The miver rises in the Cordillera of the Andes, and, after a W. course, falling into the Pacific, in lat. $11^{\circ} 30^{\prime} \mathrm{S} . ;$ lon. $77^{\circ} 15^{\prime} \mathrm{W}$.

CHANCE ISLAND, Bay of Bengal, W. coast, Lower Siam, about 35 m . from the mainland; lat. (highest peak) $9^{\circ} 22^{\prime} \mathrm{N}$. ; lon. $97^{\circ} 53^{\prime} \mathrm{E}$. It is from 3 to 5 m . in length, and about the same breadth, with three or four small islets on its N., S., and W. sides.

CHANDAH, a tn. Hindoostan, prov. Gundwana, cap. dist. of same name, 80 m . S. Nagpoor ; lat. $20^{\circ} 2^{\prime} \mathrm{N}$. ; lon. $79^{\circ} 23^{\prime}$ E. Its walls, of freestone, and flanked by round towers, are 6 m . in circuit, and from 15 to 20 ft . in height. It consists of straggling streets, detached houses, gardens, and plantations. In 1803, it contained 5000 houses; in 1822, only 2800 . Within the walls stands a citadel named the Bala Killa. In 1818, Chandah was taken by the British, who found there $£ 90,000$ in money, and a great deal of valuable property.-_The district is about 88 m . in length, N . to S., and 66 m . in breadth, E. to W.

CHANDAHNEE, a tn. and dist. Punjab. The town is situate on the brow of a hill, in lat. $33^{\circ} 21^{\prime} \mathrm{N}$.; lon. $76^{\circ} 6^{\prime}$ E.; abont 76 m. S. by E. Serinagur.

CHANDELEUR (Isles and BAy), a group of small, low, uninhabited islands, Gulf of Mexico, near the coast of the U. States, Louisiana, between lat. $29^{\circ} 30^{\prime}$ and $30^{\circ} 3^{\prime} \mathrm{N}$.; lon. about $88^{\circ} 50^{\prime} \mathrm{W}$. These isles, with those of Grand Grozier and Briton, form the Bay of Chandeleur, a gulf on the E. extremity of Louisiana, near the delta of the Mississippi.

CHANDERCONA, a considerable tn. Hindoostan, prov. Bengal, 55 m . W. by N. Calcutta; lat. $22^{\circ} 45^{\prime} \mathrm{N}$. ; lon. $87^{\circ} 44^{\prime}$ E. Pop. (1814) 18,145.

CHANDEREE, Chindaree, Chundeiree, a tn. and dist. Ilindoostan, prov. Malwa. The Town is a strong hill-fort; lat. $24^{\circ} 32^{\prime}$ N.; lon. $78^{\circ} 10^{\prime}$ E.; is 110 m . N.N.E. Bhopanl.The District is 90 m . from E. to W ., and 70 m . from N. to S .

CHANDERNAGORE, a tn. Hindoostan, prov. Bengal, bclonging to France, r. bank, Hooghly river, 16 m . N.N.W. Calcutta ; lat. $22^{\circ} 55^{\prime} \mathrm{N} . ;$ lon. $88^{\circ} 27^{\prime} \mathrm{E}$. It has straight, well-paved, but now deserted streets; houses of brick, whitened outside, and two stories in height, adorned with colonnades in front, and terrace-roofed. Though formerly flourishing, it has now no trade, except with Calcutta; and no manufactures, excepting some cotton cloths. It is the residence of an administrative judge, and the seat of a court of first resort. In 1676, the French obtained permission to establish a factory here, which, in 1688 , along with its territory-area, 2325 ac. -was ceded to the French E. India Company, by Aurengzebe. The town was subsequently fortified, and the factory continued to flourish till 1757, when it was attacked by Admiral Watson and Colonel Clive, who took it and dismantled the fortifica-
tions. It was restored to the French in 1816. Pop. (1836), tn. and territory, 31,235.

CHANDODE, a large tn. Hindoostan, in Gujerat, 35 m . E.N.E. Baroach, r. bank, Nerbudda; lat. $22^{\circ} 1^{\prime}$ N.; lon. $73^{\circ} 40^{\prime} \mathrm{E}$. By the Hindoos it is held in veneration as a place of great sanctity.

CIIANDORE, a fortified tn . of considerable size, Hindoostan, prov. Candeish, presid. Bombay; 78 m . N. W. Aurungabad; lat. $20^{\circ} 16^{\prime}$ N.; lon. $74^{\circ} 21^{\prime}$ L. The fortress commands one of the best passes on the range of hills on which it stands, and is quite inaccessible everywhere but at the gateway, where it is strongly fortified. Nevertheless, it surrendered, with little resistance, to the British twice; first, in 1804, and again, in 1818.

CHANERAL, a bay and isl 'hili. The bay is $1 \mathrm{~m} . \mathrm{N}$. Carrisal Bay; well sheltered $\mathrm{fr}^{\prime}$ is N . and S . winds, but expesed to gales from the S.W -The island, which lies about 4 m . W., is 2 m . lonf, ; lat. $29^{\circ} 1^{\prime} \mathrm{S}$. ; lon. $71^{\circ} 40^{\prime}$ W. (R.)

CHANG-Cheun-Cham, or St. John's Island, on the S. coast, China, prov. Quangteng; lat. (S. point) $21^{\circ} 15^{\prime} \mathrm{N}$. ; lon. $112^{\circ} 50^{\prime}$ E. It is about 15 m . in length, N. N.E. to S.S.W., and has generally been considered as two islands; the high land at each extremity appearing separated by a large gap or vacant space, which, on a near approach, is found to be a low, narrow isthmus of sand, uniting the high land, and having a bay on each side; one of these, on the W. side, has 6 and 7 fathoms water at the entrance. There is a watering-place on the S. side of the bay, and a village at the head of it.

CHANG-CHOO-FOO.-1, A city, China, prov. Fokien, $36 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Amoy, which is merely the port of the city; lat. $24^{\circ} 35^{\prime} \mathrm{N}$.; lon. $117^{\circ} 50^{\prime} \mathrm{E}$. It lies in a valley, embosomed in hills, and is intersected by a river, here crossed by two bridges, one of which is of somewhat singular construction, being built on 25 piles of stone, about 30 ft . apart, and 20 ft . high. Large beams are laid from pile to pile; these again are crossed by smaller ones, which are covered with earth, and then paved with enormous blocks of granite, some of which are about 45 ft . long, and $2 \frac{1}{2} \mathrm{ft}$. broad. This singular structure is about 9 ft . wide; half its length on beth sides is occupied by shops. The city is surrounded by a wall, $4 \frac{1}{2} \mathrm{~m}$. in circumference, inside of which it is thickly planted with large trees. In the wall a gate, formed of a door for foot-passengers, and a canal for boats, is placed at each of the cardinal points. The streets are from 10 to 12 ft . wide, and many of them are well paved; shops numerous, and well furnished, and houses in general two stories high. This is the great centre of the silk manufacture of the province, and the streets present a bustling and animated appearance. In the suburbs, which are extensive, there are large tile and sugar manufactories; and from an cminence near the city, about 80 populous agricultural villages may be seen in a large plain, 30 m . long, by nearly 20 m . broad. Pop. of city, exclusive of suburbs, variously estimated at from 800,000 to $1,000,000 .-2$, A city, China, prov. Kiangsoo, 75 m . S.E. Nankin ; lat. $31^{\circ} 55^{\prime}$ N.; lon. $121^{\circ} 43^{\prime}$ E.

CHANG-MaI, a tn. Laos, r. bank, Menam; lat. $20^{\circ} 16^{\prime}$ N. ; lon. $99^{\circ} 2^{\prime}$ E. Pop. 25,000.

CHANG-SHA, a city, China, prov. Hoouan, r. bank, Heng-Kiang, 50 m . S. its embouchure in Lake Tong-TingHou; lat. $28^{\circ} 18^{\prime} \mathrm{N}$. ; lon. $113^{\circ} \mathrm{E}$.

CHANGAMA, a tn. Hindoostan, Carnatic, 115 m . S.W. Madras, at the end of a pass, to which it gives its name. It has a lofty pagoda.

CHAN1ERS, a vil. France, dep. Charente-Inferieure, 4 m . from Saintes. In its vicinity good red wine is produced, and it has two annual fairs. Pop. 1200.

CHANNAKALASY, or Chanak Kalessi [pot castle], a tn. Asiatic Turkey, pash. Anatolia, near the S.W. entrance of the Dardanelles, about 3 m. S.S.W. Abydos; lat. $40^{\circ} 10^{\prime \prime}$ N.; lon. $26^{\circ} 25^{\prime}$ E. It is composed entirely of wooden houses, which, while new and uniform, have a peculiar and somewhat pleasing effect, resembling the Swiss villages. It has been often seriously damaged by fire. The town takes its name from the manufactures of crockery carried on in it, and is, therefore, erroneously named in our maps Sultania or Sultana. Its castle is one of the most famous on the Dardanelles.

CHANNEL ISLANDS, a group of isls. in the English Channel, off the W. coast of dep. La Manche, in France, between lat. $49^{\circ}$ and $49^{\circ} 50^{\prime} \mathrm{N}$.; and lon. $2^{\circ}$ and $2^{\circ} 45^{\prime}$ W. They
consist of Jersey, Guernsey, Alderney, and Sark (which sec), with some dependent islets. They are celebrated for a peculiar breed of cattle, known by the name of Alderney or Norman cattle. They are almost totally exempt from taxation, and enjoy, besides, all the other privileges of British

Some export trade is carried on. Quarries of granite are worked in the neighbourhood. Pop. 3935.

CHANTIBUN, or Chantabon, a dist. and tn. Siam, territory of Cambodia, at the foot of a ridge of mountains, E. side, Gulf of Siam. It produces cardamoms, rosewood, dyewoods, ship timber, hides, horns, ivory, lac, and benzoin. The Town, cap. of the dist., is a place of considerable trade; its chief export is pepper, and in its vicinity are mines of precious stones. It lies 5 m . up a small river, in lat. $12^{\circ} 45^{\prime} \mathrm{N} . ;$ lon. $102^{\circ} 18^{\prime}$ E.

CHANTILLY, a tn. France, dep. Oise, 26 m. S.E. Beauvais, on the Nonette, celebrated for its manufacture of bobbinnet and silk lace, introduced by M. Moreau in 1710. There are now seven establishments in the town, and seven in the surrounding district. The manufacturers give out the materials and patterns, and the work is done at the homes of the lacemakers. Porcelain, hosiery, and liardware are also made here. The splendid château of Chantilly, built by the great Conde, and where he spent his latter years, after retiring from military life, in the society of Racine, Boileau, Bossuet, and the other literary men of his age, was levelled by the mob at the Revolution of 1793 . The petit château and stables, considered to be among the finest in Europe, still remain. There is a good hospital here, built and endowed by the Prince de Condé. Races are held in the month of May. The headless body of Admiral Coligny, killed at the massacre of St. Bartholemew, was interred in the chapel of the castle. Among the natives of Chantilly was the Duc d'Enghien, shot in the ditch at Vincennes, March 21, 1804. P. 2335.
subjects. The government of the islands is in the hands of states, some members of which are named by the Crown, while others are chosen by the people, and others sit ex officio. These islands are a very costly appendage of the British Crown. They have been fortified at an immense experse, and their defence, in time of war, is supposed to cost fully $£ 500,000$ a year, which has to be wholly defrayed by Britain; the total revenue collected in the islands not amounting to $£ 20,000$ a year. The Channel Islands form the only remains of the Norman provinces once subject to the British crown. Pop. (1841), 76,065.

CHANNELKIRK, par. Scot. Berwick; 28 sq.m. P. 786.
CHANNI-KHAN-DIGOT, a m. Bahawulpoor, 18 m . N.E. Khanpoor ; lat. $28^{\circ} 50^{\prime} \mathrm{N}$. ; lon. $70^{\circ} 54^{\prime} \mathrm{E}$. It is a sinall, but thriving place. The surrounding country is dry, sandy, and overspread with tamarisk jungle.

CHANTANQUE (LAKE), a small lake, U. States, near S.W. extremity of the state of New York. It is 18 m . long, and for the most part from 1 to 3 m . broad. It is 726 ft . above the level of Lake Erie, and 1291 ft . above that of the Ocean, and is said to be the highest body of water in the U. States on which a steamer floats. It is navigable for steamboats; and rafts proceed from it to the Gulf of Mexico.

CHANTELLE, a tn. France, dep. Allier, 26 m. S.W. Moulins, r. bank, Bouble. On a neighbouring eminence are the ruins of an immense fortress, formerly belonging to the Seigneurs de Bonrbon, and now a quarry, whence the country people obtain supplies of building stone. Pop. 1708.

CHANTENAI, a tn. and com. France, dep. Lower Loire, $1 \frac{1}{2} \mathrm{~m}$. from Nantes, r. bank, Loire. It is well built, and the inhabitants are engaged in the manufacture of white lead, fishing, husbandry, cattle-rcaring, ship and boat building, \&c.

CHANTONNAY, a tn. France, dep. Vendée, 18 m . E. Bourbon-Vendée. Near it an extensive coal field, of the same name, is wrought; and in its vicinity, in 1793, a bloody battle was fought between the Republicans ard the Vendeans. Pup. 1176.

CHANZA, an affluent of the Guadiana, forming, during the greater part of its course, the ${ }^{4}$ boundary between Spain and Portugal. It rises near Cortegana, prov. Seville, and, proceeding S.S.W., joins l. bank, Guadiana, a little above San-Lucar-de-Guadiana; course about 40 m .

CHAO-de-Conce, a tn. and par. Portugal, prov. BeiraBaixa, on a lofty mountain, crowned with an old castle, 24 m . S.S.E. Coimbra. It contains a collegiate church, convent, hospital, and almshouse. Pop. 1160.

CHAO-HING, a city, China, prov. Chekiang, on a river 30 m . W. Ning-po ; lat. $30^{\circ} 15^{\prime} \mathrm{N}$.; lon. $120^{\circ} 3^{\prime} \mathrm{E}$. It stands on a fertile and extensive plain, is intersected by canals, has broad, clean, and well-paved streets, and is remarkably healthy. The inhabitants are famed for their knowledge of the laws, and from among them the great mandarins and governors of provinces choose their secretaries.

CHAO-KHING, or TChao-Khing, a city, China, prov. Quangtung, 50 m. W. Canton, on the Si-kiang. It is well built, and strongly fortified, and is the residence of the governor of the provinces of Quang-tung and Quang-si. There are some beautiful gardens in one of the suburbs.

CHAO-NAIMAN-Soume, Tolon-Noor, or Dolonnoor, a tn . Mongolia, Kartchin territory, on the Chan tou, 165 m . N. by W. Pekin; lat. $42^{\circ} 25^{\prime} \mathrm{N}$.; lon. $116^{\circ} 18^{\prime}$ E. This town, which is of vast extent, consists of a collection of houses without any regard to regularity; the streets are narrow and crooked; there is an indifferent foot-patli on each side
for pedestrians, but carriages and beasts of burthen must force their way through a black, deep, and disgusting mass of mud. The principal erections are the Bhuddist temples, which are numerous. In spite, however, of its unprepossessing appearance, and the natural disadvantages of its situation --being surrounded by a stcrile country, and subject to intense winter cold, as well as stiffing heat during summer-this town is a place of immense bustle and activity. The inhabitants are renowned throughout Tartary and the most remote parts of Tibet for the statues in iron and brass which they turn out from their foundries; and all the conntries addicted to the worship of Bhudda are furnished by them with idols, bells, and the different vcssels employed in their idolatrous ceremonics. The commerce of the place is also extensive. Russian merchandise is brought to it through Kiakhta. The Tartars bring numerous herds of oxen, camels, and horses, in exclange for which they receive tobacco, cloth, and tea. Merchants from the province of Chan-si are extremely numerous, but invariably return to their own country after improving their circumstances; indeed, it is remarked that the Chinese, in this commercial place, always end by making a fortune, and the Tartars by ruining themselves. The population, though not easily estimated, is said to be very great.

CHAO-TCHEOO-FOO, a city and dist. China, N. division of Quangtong, or Canton prov. The city is sitnate in a mountainous region, about $120 \mathrm{~m} . \mathrm{N}$. Canton city; lat. $24^{\circ} 55^{\prime} \mathrm{N}$. ; lon. $113^{\circ} 15^{\prime} \mathrm{E}$. ; at the confluence of the Si-ho and Tang-ho, the union of which streams form the river Pe-kiaug; both are navigable. It is a large place, and its walls run for a great distance along the Pe -kiang, here crossed by a bridge of boats. There are considerable manufactures and trade in the place, but the locality is unhealthy. Pop. estimated at about 10,000 families.

CHAOUSSY, or Tchausi, a in. Russia, gov. of, and 27 m . E. by S. Mogliev. It has two churches, a synagogue, and a school. A great market is held here annually. P. 3400.

CHAPADA (Arraial da), a small tn. or vil. Brazil, prov. Goyaz, $6 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Natividade, on one of the low, flat table lands called Chapadas, whence its name. Gold used to be found in the country around, and a number of slaves were employed in washing the soil in search of the precious metal; but the pursuit is now almost abandoned, the slaves being more profitably occupied on plantations. Pop. about 1000 .

CHAPALA, a large lake, Mexico, state Guadalajara and Michiocan, about lat. $20^{\circ} 20^{\prime} \mathrm{N}$. ; and between lon. $102^{\circ}$ to $103^{\circ} 45^{\prime} \mathrm{W}$.; area, $1300 \mathrm{~s} 9 . \mathrm{m}$. It contains numerous islands, and is traversed by the Rio Grande. The scenery on and around the lake is extremely beautiful.

CHAPARI, a river, Bolivia, rising in the mountains of Cochabamba, and, after a course from S.W. to N.E. of about 100 m. , joining the Mamore in the parallel of $17^{\circ} 5^{\prime} \mathrm{S}$.

CHAPEL.-1, par. Irel. Wexford; 3588 ac. Pop. 1031. -2 , Chapel, or Giarioch, par. Scot. Aberdeen; 10 m. by 5 m . l'op. 2038.-3, Chapel, or Pontisbright, par. Eng. Essex ; 1130 ac. Pop. 429.-4, Chapel-Colman, par. Wales, Pembroke. Pop. 142.-5, Chapel-Hill, par. Eng. Monmouth; 820 ac. Pop. $521 .-6$, Chapel-Izod, par. and tn. Irel. Dublin; 533 ac. Pop. 1536.-7, Chapel-Russel, par. Irel. Limerick; 634 ac. Pop. 1150.

CHAPEL ALLERTON, a chapelry and vil., England, co. York, bor. and $2 \frac{1}{2} \mathrm{~m}$. N. Leeds, very pleasantly situated, and the residence of many respectable families. It has a handsome Episcopal and a Wesleyan chapel. P. (1851), 2497.

Chapel-en-le-Frith, a market th. and par. England, co. Derby. The rows, $11 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Derby, has a neat parish church, a Wesleyan chapel, two endowed schools, and a library. Cotton-weaving and paper-making are the chief employments. Near it are lead and coal mines, and limestone quarries. Arca of par., 13,220 ac. Pop. 3199.

CIlapELLE (La), a vil. France, dep. Vosges, 16 m. from St. Dié. Near it is a slate quarry. Pop. 1258.

Chapelle-st.-Denis (La), a vil. France, dep. Seine, forming a N . snburb of Paris, being a continuation of the Faubourg St. Denis, and commencing outside the walls. Manufactures:-liqueurs, chemical stuffs, starch, waxcloth, brandy, and salt. Pop. 12,911.

CHAPOO, or Chapu, a fortified maritime tn. China, prov. Che-kiang, N. side of a large bay, 35 m . N. Ning-po; lat. $30^{\circ} 40^{\circ} \mathrm{N}$. ; lon. $120^{\circ} 25^{\prime} \mathrm{E}$. The houses are, in general,
small, with walls of brick, plastered and white-washed. The houses are all detached, each being surrounded by a wall about 7 ft . high. A particular portion of the town, surrounded by a wall and planned on the model of a camp, is assigned for the residence of the Manchoo troops, who form the garrison. Chapoo is a place of very considerable commerce, and the only Chinese port which is permitted to trade with Japan. In May 1842, it was attacked and taken by the British, after a vigorous resistance on the part of the garrison.

CHARAMAKOTAN, one of the Kurile isls., N. Pacific Ocean, subject to Russia, and separated from the island of Onnekotan by a channel 8 m . wide; lat. $49^{\circ} \mathrm{N}$.; lon. $154^{\circ} 39^{\prime}$ E.

CHARBAR, or Choubar Bay:-1, A bay, Beloochistan, prov. Mekran, on the Indian Ocean. It is of circular form, and about 9 m . in diameter. Ras Charbar, its E. point, is in lat. $25^{\circ} 16^{\prime} \mathrm{N}$. ; lon. $60^{\circ} 35^{\prime} \mathrm{E}$. This bay is one of the best on the coast. Fresh water, of good quality, is easily procured, and goats and sheep may be obtained, but neither bullocks nor poultry are to be had. There are here some small gardens, which produce turnips, onions, potatoes, carrots, \& c.-2, A tn. of same name, on the E. side of the bay, near its entrance, composed of straggling mat houses, occupied mostly by weavers. The country around here is so arid and barren, that famines are of frequent occurrence, compelling the inhabitants to abandon it in great numbers.

CHARD, a tn., bor. and par. England, co. Somerset. The town, 43 m . S.S.W. Bristol, contains a townhall, an extensive market-place, an hospital, and a free-grammar-school; also, places of worship for Baptists and Independents. The lace manufacture employs about 1500 hands. The clothing, malting, and corn trades are also considerable. This borough sent members to Parliament in the reign of Edward I., and two succeeding reigns, when it lost this privilege through the negligence of its freemen. Pop. of tn . 2877. Area of par. 5140 ac. Pop. 5788.

CHARDAK, a tn. European Turkey, Bulgaria, sanjak of, and 81 m. N.E. Silistria, and 22 m . W. by N. Lake Rassein.

CHARDAK, or Haji Ghiul [pilgrim lake], a salt lake, Asiatic Turkey, pash. Anatolia, E. extremity; lat. $38^{\circ} \mathrm{N}$. ; lon. $30^{\circ} \mathrm{E}$. About 10 m . in length, and 5 broad. Large quantities of salt are collected from this lake.

CHARDSTOCK, par. Eng. Dorset; 5540 ac. Pop. 1405.
CHARENTE [anc. Caranthonus], a river, France, which rises on the frontiers of the dep. to which it gives its name, and of Haute-Vienne, near Cheronnat, in a range of hills forming part of the watershed betwen the basins of the Loire and Garonne. It first proceeds N.N.W. to Civray, dep. Vienne, then turns round and proceeds almost due $S$. to Mansle. Here, its course becomes extremely tortuons, till it reaches Angoulême, near the centre of department Charente. It now proceeds almost due W., passing Cognac, and flowing onwards to Saintes, when it resumes its original course of N.N.W., and falls into the Bay of Biscay at Rochefort, where it forms a fine marine harbour. Its principal afflinents are the Bogneure, the Touvre, the Ne, the Seugne, and the Boutoune; whole course, about 200 m . It is fit for floatation from Civray, and navigable from Montignac, 60 m . above its mouth. The Charente flows generally through a rich and fertile valley, and is of great importance, both from the facili ties which it gives for transport, and the numerous public works which are placed along its banks. A little above Rochefort, two canals, the Brouage and Charras, lead off the one from its 1 . and the other from its r . bank, intended to drain the salt marshes around Rochefort, which made the whole district very unhealthy. They have proved of essential service.

CHARENTE, an inland dep. France, having N. the deps. Deux-Sevres, and Vienne, E. Haute-Vienne, S.E. Dordogne, and W. Charente-Inferieure, formed chiefly out of the ancient province of Angoumois, and deriving its name from the river Charente, by which it is traversed, between lat. $45^{\circ} 23^{\prime}$ and $46^{\circ} 15^{\prime}$ N., and lon. $0^{\circ} 29^{\prime}$ W., and $0^{\circ} 54^{\prime}$ E.; area, $1,487,447 \mathrm{ac} . ;$ cap. Angoulême. It is in general uneven, with hills covered with chestrut trees, sandy plains, meadows, \&c. Soil thin, dry, and arid; one-third devoted to tillage, a third to vineyards, and the remainder meadows, woods, and waste lands. The principal rivers are the Charente, joined by the canal of Poiton with the Vienne, the Dronne, Tardoucre, Bandia, Touvre, and Né, all abounding in fish. Waterpools
are numerous. The climate is temperate, atmosphere clear, and extremes of heat or cold are almost unknown. The cereal productions are wheat, rye, maslin, oats, millet, maize, and buckwheat; but the produce is insufficient for the local consumption. Truffles are abundant. The wines of the department are of inferior quality, and in little request for the table; but they yield the best brandy in Europe. The celebrated cognac brandy is made in the districts of Champagne, Cognac, Jarnac, Rouillac, and Aigre, from a grape called the folle blanche, which yields a white wine. The red wines furnish an inferior brandy, without the bouquet that distinguishes the genuine cognac. In good years, the wine produces a fifth of spirit at $22^{\circ}$ to $23^{\circ}$. In bad years, on the contrary, 9 or 10 parts of wine are required to produce one of brandy. The wine growers themselves carry on the distillation, each estate being furnished with stills and the necessary apparatus. Pastures are scarce, but cattle are fattened to some extent. Large numbers of pigs are also fattened, and poultry is abundant, as well as game of all kinds. In some districts, bees are reared in great numbers; and in one commune, saffron is cultivated. Iron ore is found in the department, and small quantities of lead and antimony. Excepting brandy and paper, the manufactures of the department are inconsiderable, consisting of sacking, cloth, cordage, hats, corks, and earthenware. The paper made at Angoulême is said to be the best in France. The department is divided into five arronds., containing 29 cans. and 453 coms. It forms the diocese of Angoulême. Pop. (1846), 379,031.

CHARENTE-Inferieure [lower Charentc], a maritime dep. France, W. coast; having, N., dep. Vendée, N.E. Deux-Sevres, E. Charente, S.E. Dordogne, S. Gironde, and W. the Atlantic Ocean, between lat. $45^{\circ} 6^{\prime}$ and $46^{\circ} 21^{\prime}$ N., and lon. $0^{\circ} 6^{\prime}$ and $1^{\circ} 37^{\prime} \mathrm{W}$. It comprises parts of the former provinces of Angoumois and Poiton; area, including the islands of Ré, Oleron, Madame, and Aix, $1,668,923$ ac. Surface in general flat, one-sixth consisting of marshes drained and cultivated, formerly sources of disease and death, now healthful and productive. Soil chalky and sandy, fertile, and well cultivated; and a considerable portion planted with vines. The lands that have a superficial layer, resting on a subsoil of chalky and friable tuff, are called champagnes, and furnish the best wine for distillation. The pastures are good, and well stocked with cattle, horses, and sheep. Along the coast are extensive salt marshes, from which an immense quantity of salt is produced. The extent of coast, including the E. bank of the Gironde, is about 100 m ., on which are numerous bays, several seaports, and good roadsteads. The principal rivers that traverse or bound the department, are the Charente, Gironde, Seudre, Boutonne, and Sèrre Niortaise, all of which are navigable, as well as the canal of Brouage, and that between Niort and Rochelles. The climate in general is temperate and healthy; but the districts of Marennes, Rochefort, and Rochelle are subject to fever and rheumatic affections, arising from the exhalations of the neighbouring marshes. The produce consists of grain of all kinds, more than sufficient for the consumption of the inhabitants. The wine is of common quality, and chiefly used for making brandy. Game is plentiful, and large flocks of wild fowl frequent the marshes. Oysters and sardines abound on the coast. Salt and brandy are the only articles manufactured to any great extent; but woollen goods, hosiery, leather, pottery, and vinegar, are also made; and shipbuilding is carried on in the seaports, where vessels are equipped also for the cod-fishery. Principal towns-Rochefort, Rochelle, Marennes, Saintes, and St. Jean d'Angely. The department is divided into six arronds., containing 39 cans. and 480 coms. Pop. (1846), 468,103.

Charenton-le-Pont, a tn. France, dep. Seine, 4 m . S.E. Paris, $r$ bank, Marne, near its confluence with the Seine. It is divided into two communes, one of which, containing a lunatic asylum, with accommodation for 400 patients, was called Charenton-St.-Maurice till 1842, when its name was curtailed to St. Maurice by royal ordinance. The town owes its name to a bridge across the Marne, which has always been considered one of the keys of the capital, and the frequent scene of conflict when Paris was approached by an enemy. The present structure consists of 10 arches, and was built in 1714 . Soap, chemical stuffs, and porcelain, are manufactured here. Pop. 2804.

CHARFIELD, par. Eng. Gloucester; 1430 ac. Pop. 471. CHARFORD, two pars. England, Hants:-1, (North), 570 ac. Pop. 54.-2, (South), 280 ac. Pop. 62.

CHARIKAR, a tn. Afghanistan, dist. Kohistan, 21 m . N. Cabool ; lat. $35^{\circ} 2^{\prime}$ N.; lon. $69^{\circ} 3^{\prime}$ E. It is one of the most flourishing, as well as one of the largest towns in the Kohistan or hill country, having a large trade in the coarse cotton cloths manufactured throughout the district, and in iron, both in pigs and manufactured into horse shoes. It has also a considerable transit trade to Turkestan and Central Asia. It contains a bazaar, about 400 yards in length, and loosely covered to exclude heat. At the entrance of the town is a large castle, the residence of one of the great chiefs of the country. Charikar is the place of residence, also, of the Hákam or Governor of the Kohistan; and duties are levied here on merchandise passing between it and Turkestan.

CHARING, par. Eng. Kent; 4060 ac. Pop. 1241.
CHARITE' (La), a tn. France, dep. Nièvre, 15 m . N.N.W. Nevers, r. bank, Loire. It has a fine bridge across the Loire, and a port on that river. The streets are good, but the houses indifferently built. There are here manufactures of iron goods and tools, files, steel, metal buttons, \&c.; with forges, glassworks, potteries, distilleries, vinegar-works, and tanneries. Trade :-grain, wine, wood, charcoal, and hemp, ships' anchors, \&c., and it is the entrepôt for the iron of Berry. Pop. 4522.

CHARJUI, or Charjooee, a tn. Bokhara, 1. bank, Oxus, 70 m. S.S.W. the city of Bokhara, on the high road to Persia; lat. $39^{\circ} 5^{\prime}$ N.; lon. $63^{\circ} 40^{\circ}$ E. Pop. about 500.

CHARKOV. See Kharkov.
CHARLBURY, par. Eng. Ox ford; 11,320 ac. Pop. 2982. CHARLCOMBE, par. Eng. Somerset; 570 ac. P. 84.
CHARLCOTE, par. Eng. Warwick; 2190 ac. P. 267.
CHARLEMON'T, a hamlet and fortress, France, N.W. frontier, dep. Ardennes. The works of Charlemont and Givet occupy both banks of the Meuse, about 25 m . S. Namur, at the junction of several roads on a steep hill, and completely command the river. Charlemont rises from a narrow rock, 200 ft . high, and the only side on which an attack can be apprehended is defended by six bastions, a horn, and crownwork, and several detached works.

CHARLEROI, a tn. Belgium, prov. Hainaut, 30 m . S. by E. Brussels; on both sides of the Sambre, the low town standing on the r. and the middle town and high town on the l. bank. The last stands apart, and is regularly and strongly fortified. Charleroi is the seat of a court of first resort, and possesses a college, an academy of design, a commission of agriculture, an hospital, and several primary and other schools. The only public building deserving notice is the parish chnrch, which is handsome, and was built by Louis XIV. The town is well situate both for manufactures and trade, being the centre of an extensive and valuable coal field, and having ample means of communication by railway, canals, and good roads, with the surrounding districts, and the most important towns of the kingdom. It has considerable manufactures of cloth, cutlery, soap, and tobacco; numerous glass-works, chiefly for window glass ; several forges, extensive nail-works, sugarrefineries, dye-works, brick-works, limekilns, and founderies, at some of which ordnance is cast, and steam engines are made. The chief exports may be said to consist of coal, iron, and soap. Pop. 5672.

CHARLES, two pars. Eng. Devon; 1, 710 ac. Pop. 362. 2, (-the-Martyr) 1510 ac. Pop. 13,227.

CHARLES (CAPE).-1, The most E. point of Labrador; lat. $52^{\circ} \mathrm{N}$. ; lon. $55^{\circ} 30^{\prime}$ W.——2, A cape, U. States, Virginia, forming the N. part of the entrance to Chesapeake Bay; lat. $37^{\circ} 18^{\prime} \mathrm{N}$. ; lon. $75^{\circ} 45^{\prime} \mathrm{W}$.

CHARLES ISIAND.-1, One of the Galapagos; lat. $1^{\circ} 15^{\prime} 24^{\prime \prime} \mathrm{S} . ;$ lon. $90^{\circ} 31^{\prime} 45^{\prime \prime} \mathrm{W}$. (R.) ; 20 m . long, N. to S., and about 15 m . broad. Like all the other islands of this group, it is of volcanic formation. The settlement on this island is 1000 ft . above the level of the sea.-- 2 , An isl. off the S. coast of Spitzbergen ; lat. (S. point) $78^{\circ} 13^{\prime} \mathrm{N}$.; lon. $11^{\circ} 55^{\prime}$ E. (r.)-3, An isl., N. America, Hudson's Strait; lat. (E. point) $62^{\circ} 44^{\prime} \mathrm{N}$. ; lon. $74^{\circ} 18^{\prime} \mathrm{W}$. (r.) -4 , An isl. British N. America, in the Gulf of St. Lawrence, near its N. coast ; lat. $50^{\circ} 12^{\prime} \mathrm{N}$.; lon. $63^{\circ} 15^{\prime}$ W. It is 3 m . long, and $1 \frac{1}{2} \mathrm{~m}$. broad. On its N. side it has a safe though confined harbour.

CHARLESTON, a city and seapert, U. States, S. Carolina, 590 m . S.S.W. New York; lat. $32^{\circ} 47^{\prime}$ N., lon. $79^{\circ} 64^{\prime}$ W.; on a tongue of land between Ashley and Cooper rivers. It is regularly laid ont in parallel streets, extending between these two streams, and crossed by others at right angles, somo of them adorned with trecs. Many of the houses are of brick, while others are of wood; numbers of them painted white, which, with the profusion of foliage by which they are cominonly surrounded, gives them a very agreeable appearance. The houses are generally elegant, and are often furnished with balconies and verandahs, ornamented with vines. The

town contains 24 churches-five Episcopal, four Presbyterian four Methodist, three R. Catholic, two Baptist, two German Lutheran, one French Protestant, one Jews' synagogue, and one Bethel. Among the public buildings are-the city hall, exchange, courthouse, jail, two arsenals, a theatre, an almshouse, and an orphan asylum. Charleston has a college of repute, re-organized in 1837; a medical college, founded in 1833 ; a literary society, \&c ; city library ( 20,000 vols.), a famed high school, and about 30 other schools. As a foreign port, its trade is not increasing. The chief exports are cotton, rice, and lumber: in $185 \mathrm{I}-2,502,345$ bales of the former. 126,777 tierces and 462,590 bushels of rice; and 18,300,766 ft . of lumber. In 1852, import values about $£ 443,000$ scarcely one-eighth of the exports. Shipbuilding here is now inconsiderable. Aggregate tonnage of the port shipping about 40,000 only. But native traders have great facilities for inland traffic, by rail and river. Charleston was settled between 1680-90, by English and French colonists. In 1715 , the town had about 550 houses; in 1740, a fire, of six hours' duration only, destroyed 300 of the best. In 1724, the imports from Britain were valued at $£ 60,000$. During the American war (1779), the British took it from the provincials, but left it in the following year. Pop. (1850), 42,958, including 14,692 slaves.

CHARLESTON.-1, A maritime vil. Eng., co. Cornwall, 2 m. E. by S. St. Austell, on St. Austell's Bay. It has an excellent harbour, with an inner and outer basin, and a commodious pier, defended by a battery of heavy cannon. Shipbuilding and repairing, iron•founding, \&c., are carried on here, and a great nilchard fishery. Much china-clay, prepared artificially from granite, is exported.--2, A small vil. and seaport, Scotland, co. Fife, advantageously situate on the Frith of Forth, 3 m . N. by W. Dunfermlinc. It ex-

Vol. I.
ports large quantities of coals, and near it are extensive lime works. Pop. (1841), 772.- 3 , A tn., W. Indies, isl. Nevis, S. W. coast; lat. $17^{\circ} 19^{\prime} \mathrm{N}$. ; lon. $64^{\circ} 55^{\prime} \mathrm{W}$. It is neat and well built, with a good roadstead.

CHARLESTOWN, a seaport tn., U. States, Massachusetts, on a peninsula close to and N. of Boston (which see). Streets irregular, but finely shaded; and houses generally good, some even handsome and spacious, the pure air and good site attracting many rich Boston commercialists to a residence here. Churches nine; a bank, state prison, and, reared on Breed's or Bunker'a Hill, a monument, or hollowed shaft, of granite, 220 ft . high, commemorating the battle fought here, June 17, 1775. At the foot of the same height lies a stato navy-yard. Charlestown was incorporated, apart from Boston, in 1847. Pop. (1850), 17,216.

CHARLESTOWN, par. Irel. Lowth; 2700 ac. P. 1390.
CHARLESWOR'TH, a vil. England, co. Derby; agreeably situate on the side of a hill, $3 \frac{1}{2} \mathrm{~m}$. S.S.W. Glossop. It is formed of two villages; houses of stone, well bnilt; a church in the early English style; several chapels belonging to Independents, Baptists, Methodists, and other dissenters. In the vicinity extensive coal mines are wrought ; and there are also six cotton-mills, an iron-foundry, and machine-making establishment. Pop. (1841), 2856.-(Local Correspondent.)

CHARLE'TON, two pars. Eng.:-1, Deron; 1940 ac. Pop. 703.-2, (Queen), Somerset; 1060 ac. Pop. 190.

CHARLEVILLE, a tn. France, dep. Ardenncs, 1 m . N. Mezières, l. bank, Meuse, here crossed by a suspensionbridge, sufficiently strong to allow the passage of artillery. It is regularly built, has straight, wide and clean streets, and a public square and fountain, surrounded by arcades, from which the four principal streets diverge. It is the seat of a court of first resort and of commerce, assize court, consulting chamber of manufactures, seminary, and communal college; and has an hospital, theatre, and public library, containing 22,000 volumes. It has considerable mannfactures, consisting of nails, and iron work, arms, steam engines, cardingmachines, and animal charcoal. There are also extensive tanneries, a brass-foundry, and numerous breweries. The Meuse affords facilities for traffic; and a large trade is carried on in coal, iron, wine, brandy, marble, slates, and nails. Charleville was built in 1606, by Charles, Duke of Nevers and Mantua, and named after himself. Its fortifications were destroyed in 1686-1687, and the town in consequence became much more extensive and prosperous. Pop. 8336.

CHARLEVILLE, a tn. Ireland, co. of, and 36 m . N.N.W. Cork, on the railway to Dublin. It is a respectablelooking town, and has a handsome Established clurch, with a fine steeple; a R. Catholic chapel, an extensive national school, capable of holding 800 children of both sexes; a school under the Protestant Church of England Society for 100 children ; a dispensary, fever hospital, and workhouses. Handloom weaving and spinning, formerly carried on, having been superseded by machinery, there are now no manufactures. Weekly market for oats. Employment scanty ; workhouses crowded. Pop. (1841), 4287.-(Local Correspondent.)

CHARLIEU, a tn. France, dep. Loire, 11 m. N.E. Roanne, r. bank, Ornin. It had formerly a Benedictine abbey, the cloister of which still remains. The hospital, founded by St. Louis, is one of the oldest in the kingdom. Manufac-tures:-linen, calico, silk, leather, and cotton and silk yarn. Trade in cattle considerable. Pop. 3532.

CHARLINCH, par. Eng. Somerset; 1900 ac. Pop. 215.
CHARLOIS, a vil. and par. Holland, prov. S. Holland, $2 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Rotterdam. It has a Reformed church, with two towers, some stained-glass windows, and fine interior. At its consecration in 1512, the priests being resolved, in spite of warning from the magistracy, that the procession should take advantage of the Maas being frozen over, to pass it on the ice, 8000 persons were precipitated into the river by the ice giving way. Pop. of par. 2500.

CHARLOTTE.-1, A tn. British N. America, cap. and near the centre of, l'rince Edward Island, on the bay of Hillsborough, 110 m . N. Halifax ; lat. $46^{\circ} 14^{\prime} \mathrm{N} . ;$ lon. $63^{\circ} 7^{\prime}$ W. It is advantageously situate for commerce, and its liarbour is one of the best in N. America. It ie regularly laid out with spacious squares, and broad streets at right angles; which, however, are but thinly occupied by houses, for the most part of wood. Pop. 5000.-2, (Amalia), A tn.. W. Indies,
cap. isl. St. Thomas, one of the Virgin Islands, belonging to the Danes, S . side of the island, with a large factory at its extremity. It has an excellent harbour, fit for all kinds of shipping, and in which whole fleets may lie secure, and land-locked from all winds. The town is defended by a citadel and batteries; contains several churches, belonging to as many different religious denominations; and is a considerable entrepôt for goods for the neighbouring islands. The W. India mail steamers call regularly. Pop. (1847), 10,000., of which nearly a fifth are slaves.

CHARLOTTE (Queen) ISLAND.-1, One of the Low Archipelago, S. Pacific ; lat. $19^{\circ} 18^{\prime}$ S.; lon. $138^{\circ} 42^{\prime}$ W. (r.); discovered by Capt. Wallis in 1767. It was visited again by Capt. Beechy in 1826, who reports that the coral had so grown up, that no lagoon could be perceived in the centre; and not a single specimen was to be seen of the numerous cocoa trees found by Capt. Wallis.-2, A group of isls., S. Pacific, between lat. $10^{\circ}$ and $12^{\circ} \mathrm{S}$., and lon. $165^{\circ}$ and $168^{\circ} \mathrm{E}$. Five or six of them are of considerable extent, the remainder small. The largest, Santa Cruz, is about 20 m . long, E. to W. and about half a mile wide. They are all of volcanic formation; and one of them, Volcano, lat. $10^{\circ} 23^{\prime} 30^{\prime \prime}$ S., lon. $165^{\circ} 38^{\prime}$ E., is still in a state of activity. The islands are generally well wooded, and very populous They produce the cocoa-nut, the bread-fruit, and all the products of the Friendly Islands. The inhabitants are good-natured, but given to theft. It was on one of these islands, Mallicolo, that La Perouse, the celebrated French navigator, was wrecked and lost, with all his crew. Queen Charlotte's Islauds were discovered by Mandana, in 1595.-3, A large isl. off the W. coast, N. America, Cape St. James; lat. (extreme S. point) $51^{\circ} 55^{\prime} \mathrm{N}$. ; lon. $131^{\circ} 2^{\prime}$ W.; 170 m . long, and about 30 m . average breadth throughout three-fourths of its length, N. to S., the remainder tapering rapidly to a mere point. Area, estimated at 5000 sq. m. - 4, An isl. N. Pacific Ocean, Gilbert's group; lat. $1^{\circ} 54^{\prime}$ N.; lon. $172^{\circ} 55^{\prime}$ E. (n.) It is a lagoon island; length, N.E. to S.W., 16 m . ; average breadth, 5 m . On the E. side the land is covered with cocoa-nut and pandanus groves, with some undergrowth. The N.W. and W. side is a continuous reef, 4 or 5 feet above the water's edge, on which are many islets. About the centre of the reef, S.W. side, is a ship's channel into the lagoon, which is half a mile wide. Water, the only thing in the way of supplies to be obtained here, is flat and brackish. There are a number of towns on the island, which appear to be thickly inhabited. It is also called Apia.

CHARLOTTENBURG, a tn. Prussia, prov. Brandenburg, l. bank, Spree, 5 m . W. Berlin. It consists mostly of villas and taverns, being much resorted to in summer by the citizens of Berlin. There is here a seat of the King of Prussia, built by Fredcrick I., who married Sophia Charlotte, daughter of George I. of England, after whom the town was named. The palace has beautiful gardens attached, at all times open to the public, and an extensive orangery. Within a small Doric temple in the garden, are deposited the remains of the late beautiful and unfortunate Louisa, Queen of Prussia, over which is a monument by Rauch - the figure of the Queen reposing on a marble sarcophagus-esteemed one of the most successful efforts of modern art; although, certainly, excelled by another statue of Louisa, executed 15 years later by the same artist, in the royal gardens at Potsdam. There are some manufactures of cotton and woollen stockings here, also a spinning-mill and blcaching grounds. Pop. 8269.

CHAPLTON, numerous pars. Eng.:-1, Wilts; 5940 ac . Pop. 683.-2, Wilts; 1290 ac. Pop. 201.-3, (-Ablots), Gloucester; 2190 ac. Pop. 101.-4, (-Adams), Somerset; 3910 ac. Pop. 472.-5, (-Horethorne), Somerset; 2340 ac. Pop. 569.-6, (King's), par. and vil. Gloucester; 5020 ac. Pop. 3232, forming a part of Cheltenham.-7, (-Mackerell), Somerset; 3910 ac. Pop. 405.-8, (-Musgrave), Somerset; 2180 ac. Pop. 409.-9, (-near-Dover), Kent; 190 ac. Pop. 2513.-10, (-next-Woolwich), Kent; 1250 ac. Pop. 2655.11, (-upon-Otmoor), Oxford; 1810 ac. Pop. 658.

CHARLWOOD, par. Eng. Surrey; 6290 ac. Pop. 1291.
CHARMES, or Charmes-sur-Moselle, a tn. France, dep. Vosges, 15 m. N.N.W. Epinal, l. bank, Moselle, here crossed by a bridge of 10 arches. It has a Gothic church, ornamented with painted glass, in good preservation; a handsome public fountain, and manufactures of lace, kirschwaser, and leather; with trade in grain, wine, wood, \&c. Pop. 3011.

CHARMINSTER, par. Eng. Dorset; 491 ac. Pop. 827. CHARMOUTH, par. Eng. Dorset; 790 ac. Pop. 620. CHARNEUX, a vil. and com. Belgium, prov. Liège, 9 m. N.W. Verviers. It has manufactures of cloths, two breweries, two worsted, and four flour mills. In the environs are the remains of the old abbey Val-Dieu. Pop. 2557.

CHARO [anc. Matlatzingo], a tn. Mexican confederation, state of Michoacan, at the foot of the sierra Otzumatlan, upwards of 6000 ft above sea level. It carries on a considerable commerce. Pop. 3800.

CHAROLLAIS [anc. Pagus Quadrigellensis], a small dist. France, belonging to the old province of Burgundy, and now included in dep. Saône-et-Loire. Its capital was Charolles.

CHAROLLES, a tn. France, dep. Saône-et-Loire, 28 m . W.N.W.Macon, at the confluence of the Semence and Arconce. It is well built, and has a court of first rescest, and of com merce, an agricultural society, communal collegs, public library, hat manufactories; tile-works, limekilns, and a plaster mill, and iron-works in the vicinity. Trade in grain, wine, wood, iron, coal, and cattle. A hill above the town is crowned by the picturesque ruins of the old castle of the Counts of Charollais; of which prov. Charolles was capital. Pop. 2926.

CHARONNE [Latin, Charonna], a vil. France, close upon the barrier of the faubourg St. Antoine, and, properly, only a suburb of Paris. It contains a very ancient church, and a school of arts; and has manufactories of stained paper refined wax, wax-candles, paints, and chemical products. Pop. 5433.

CHARSFIELD, par. Eng. Suffolk; 1650 ac. Pop. 551
CHARSHUMBA, or Tcherchember, a tn. Asiatic Turkey, pash. Roum, dist. Djanikili, r. bank, and 10 m . from the mouth of the Jekil Irmak, on the Black Sea; lat. $41^{\circ} 11$ N.; lon. $36^{\circ} 40^{\prime}$ E. The greater number of the houses are surrounded by gardens, and the land in the vicinity is fertile and well cultivated.

CHAR'T, three pars. Eng. Kent:-1, (Great), 3190 ac. Pop. 714.-2, (Little), 1590 ac. Pop. 300.-3, (-next-SuttonValence), 2100 ac. Pop. 604.

CHARTHAM, par. Eng. Kent; 4990 ac. Pop. 974.
CHARTRES [anc. Autricum, Civitas Carnutum], a city, France, cap. dep. Eure-et-Loire, 49 m. S.W. Paris; lat. $48^{\circ} 27^{\prime}$ N. ; lon. $1^{\circ} 29^{\prime}$ E.; situate on the slope of a hill, at the foot of which flows the Eure, and partly enclosed by walls and ditches, surrounded by ramparts planted with trees, which form an agreeable promenade. One branch of the river runs inside, and another outside of the ramparts of the lower town. Most of the houses are built of wood and plaster, and have their gables toward the street. The streets are narrow and crooked, and so steep in some parts as to be inaccessible to carriages. There are several public squares, one of which is of great extent. The only public buildings of note are-the cathedral, the church of St. Père, contiguous to a huge barrack, once a Benedictine abbey; and the obelisk to the memory of General Marceau. The cathedral, one of the most magnificent in Europe, is rendered conspicuous by its two spires, one of which is 403 ft . high, surmounting the hill on which the city stands. It has fully 130 windows filled with painted glass, of admirable workmanship; and in its chair Henry IV. was crowned, in 1594. Chartres is the seat of a bishopric, court of first resort, and of commerce, communal college, seminary, and agricultural society; and has two hospitals, a cabinet of natural history, botanical garden, and a public library, containing 40,000 volumes, and 800 MSS. Manufactures : - woollen, hosicry, hats, earthenware, and leather. It is also celebrated for its game pies. A large trade is carried on in grain, wool, cattle, game, clover-seed, and wood. The largest weekly grain markets in France are held here; and the business usually does not occupy more than three-quarters of an hour. The measuring and selling of the grain, and receiving payment for it, are managed by an ancient corporation of women, remarkable for their integrity, and implicitly trusted by the owners. Chartres was the capital of the Carnutes, and considered the capital of Celtic Gaul at the time of the Roman invasion. Towards the end of the 11 th century it was fortified; and in 1445 , St. Bernard preached in its cathedral the first crusade. Pop. (1846), 15,304.

CHARTREUSE (La Grande), a celebrated monastery France, dep. Isère, 13 m . N.N.E. Grenoble, in an extensive meadow, in the wild valley of the Guier, 3280 ft . above sea
level, surrounded by the mountain forests of the Alps. It was founded in 1084, by St. Bruno, near the village of Chartreuse, the name of which he gave to the order of St. Bruno. Until the Revolution of 1793, it was the head quarters of the order of the Chartreux. The present buildings were erected

MONASTERY OF GRANDE CHARTRFUSE-From Voyages dans I'Ancienne I'rance.
Chatead-Chinos [anc. Castrum Cauinum], atn. France, dep. Nièvre, 39 m. E. by N. Nevers, near 1. bank, Yonnc, formerly defended by a castle, and surrounded by double ditches, of which some vestiges still remain. The present town is tolerably well built, on the summit of a hill. It has a court of first resort, an agricultural society; manufactures of coarse woollens and linens; large tanneries; and a considerable trade in wood and charcoal, for the supply of the capital; leather, wool, grain, horses, and cattle. Pep. 2845.

CHATEAU-D'ex, [German, Ösch; anc. Castrodunum], a tn. Switzerland, can. Vaud, chief place of the dist. EnhantRomand, r. bank, Sarine, 22 m. E. Lausanne. Here are the ruins of an old castle of the Counts of Gruyère. Important cattle fairs are held. In 1812, a considerable sum was left to the parish by two brothers named Henchoz, to endow a higher kind of school, at which the yonth of the Alpine districts might obtain an excellent gratuitous education. Pop. 2010; mostly Calvinists.

CHATEAU-du-Loir, a tn. France, dep. Sarthe, 24 m . S.E. Le Mans, near r. bank, Loir. It consists of one straight street, from which numerous small, crooked, and steep strects run in different directions; has several squares, a Hotel-de-Ville, in 1678, after the monastery had been, for the cighth time, destroyed by fire. They are of great extent, but are more remarkable for the solidity than the beauty of their architecture. Previous to 1789, the monks were owners of many villages; but the Revolution of 1793 stripped them of their possessions, and all that remains to them is a garden, the right of cutting forest wood, and pasture for their cows, of which they have about 50 . Some of the monks who were driven out by the Republicans, returned in 1826, when the buildings that had escaped entire destruction were restored. Near the Grande Chartreuse is a remarkable grotto, called the Trou-de-Glaz or Glace [ice-hole], from ice being preserved in it for the whole year. It is 787 ft . long, and contains very large transparent stalactites.

CHARWELTON, par. Eng. Northampton; 2770 ac. Pop. 227.

CHARYBDIS, a whirlpool, Strait, Messina. See Scylla and Charybdis.

Chasgo, or Shusgao, a cluster of vils., Afghanistan, with a mud fort, in a fertile spot, 13 m . N. Ghuznee, and on the ronte thence to Cabool, 8697 ft . above the sea; lat. $33^{\circ} 43^{\prime} \mathrm{N}$.; lon. $68^{\circ} 22^{\prime}$ E.

CHASHE-lo-um-Boo, or Teshoo-Loomboo, a tn. Tibet, 160 m . W. by S. L'Hassa or Lassa; lat. $29^{\circ} 4^{\prime} 40^{\prime \prime} \mathrm{N}$. ; lon. $89^{\circ} 7^{\prime} 8^{\prime \prime} \mathrm{E}$. (L.) ; on a plain surrounded by high sterile mountains. It is properly a large monastery, consisting of 300 or 400 houses, the habitations of the Buddhist monks, besides temples, mausolcums, and the palace of the Teshoo Lama, who resides here. Its buildings are all of stone, and none less than two stories high, flat roofed, and covered with a parapet rising considerably above the roof, composed of hicath and brushwood. Above 4000 friars and nuns perform daily their devotions here. A large manufacture of idols is established, at which the most skilful workmen are employed; but there are few laymen, except the servants of the Lama. A Chinese functionary resides here to watch the proceedings of the priests. Some liundred mendicants, from India and Nepaul, are also maintained by the Lama at the public expense.

CHASTLETON, par. Eng. Oxford; 1640 ac. Pop. 239.
CHAT, or Chatte Cape, a round projecting headland, Lower Canada, S. side the estuary of the St. Lawrence; lat. $49^{\circ} 1^{\prime} \mathrm{N}$.; lon. $66^{\circ} 50^{\prime} \mathrm{W}$. A small river of same name falls into a bay 4 m . E. the cape.

Chateau (Le), or Chateau doleron, a tn. France, dep. Charente-Infcricure, 6 m . W.S.W. Marennes, on the S.E. extremity of the isl. of Oleron. It is a place of some strength, ranking as a fortress of the third class; has buildingyards, distillcries, and rope-works, and carries on a trade in corn, maizc, wine, brandy, salt, \&c. Pop. 1314.
market-place, hospital. and a handsome church. It is the centre of a considerable manufacture of fine linen, employing about 800 looms in the neighbouring communes. There are also cotton-mills and tanneries. Trade in grain, cloverseed, hemp, flax, chestnuts, game, poultry, eattle, and wine of the district. Pop. 2736.

CHATEAU Gontier, a tn. France, dep. Mayenne, 19 m . S.S.E. Laval, on the Nayenne, here crossed by a stone bridge, connceting the town with its principal suburb on the opposite side. Its houses are well built; but the streets are ill laid out. It has a court of first resort, an agricultural society, and communal college; and linen and scrge manufactories, bleachfields, tanneries; with some trade in clover-sced, linen, thread, iron, wood, wine, \&c. Pop. 6251.

CHatea U-Landon, a tn. France, dep. Seine-et Marne, 15 m . S. Fontainebleau, l. bank, Suzain. It lies in a fertile country, has three churches, and, in the 12th century, was occasionally the residence of the French Kings. Coins of Charles the Bald, Carloman II., Philip I., Louis VI. and V11., were struck here. It manufactures whiting, and has some trade in grain and wine. Pop. 2420.

CHATEAU-Porcien [Latin, Castrum Porciani], a vil. France, dep. Ardennes, 26 m. S.W. Mezieres, partly r. bank, Aisne, and partly on an island formed by that river. On a stecp rock overhanging the town are a donjon tower, and some fragments of walls forming all that remains of an ancient strong castle. The manufactures consist of serge, flannel, merino, and cassimere. There are also worsted mills, an oil-work, and several tanneries. In a hill N.E. of the town, the foundations of walls, Roman coins, and other antiquities, have been discovered. Pop. 2656.

Chateau-Renard, two tns. France:-1, A tn. dep. Bouches-du-Rhône, 11 m . N.E. Arles, I. bank, Durance; with two towers, the remains of a castle of the 12 th century. In the vicinity are limekilns. Pop. 1696.-2, A tu., dep. Loiret, 10 m . E.S.E. Montargis. It had at ore time a castle, and was fortified, but having become a stronghold of the Protestants during the wars of religion, Louis XIII. ordered the works to be demolished in 1627. It has manufactures of cloth for the troops; and some trade in linen, wool, and saffiron. Pop. 1447.

CHATEAU-Renallet, a tn. France, dep. Indre-et-Loire, 19 m . N.E. Tours, agreeably situate at the foot, and on the slope of a liill, in a beautiful country. It is traversed by the Breme; has narrow and irregular strects; and possesses an old castle, from which it derives its name, built in 981, and still in good preservation. It is famous for its leather, and has also manufactures of woollen cloth, flannel, and tiles. Pop. 3079.

Chateau-salins, a til. France, dep. Meurthe, 18 m . N.E. Nancy, r. bank, Petite Seille. It has some towers and remains of its ancient fortifications. It originated in some salt-works established here in 1330, and a castle built soon after by Isabel of Austria. The Government manufactory of salt carried on here was abandoned in 1826. There are here manufactures of glass, leather, and knitted hosiery, with some trade in sacking and plaster. Pop. 2521.

CHATEAU-Thierry, a tn. France, dep. Aisne, 33 m . S.S.W. Laon, r. bank, Marne, on the slope of a hill, the rocky summit of which is crowned by the ruins of the old castle of Thierry, said to have been erected by Charles Martel in 730. A considerable suburb extends along the left bank of the Marne, communicating with the town by a stone bridge of three arches. Another suburb along the Soisson's road is separated from the town by an ancient gate. It is the seat of a court of first resort, and communal college; and has manufactures of linen, cotton yarn; dye-works, and potteries, with a trade in grain, wine, wool, agricultural stock, plaster, grind-stones, \&c. A sheep fair is held annually, at which about 30,000 are sold. In February, 1814, this town was the scene of several conflicts between the Allies and the French troops. During the Revolution of 1793, it bore the name of Egalite-sur-Marne. La Fontaine was born here in 1621, and a handsome statue has been erected to his memory. Pop. 4147.

CHATEAU-Villatn, or Ville-sur-Aujon [Latin, Castrum Villanum], a tn. Frarice, dep. Haute-Marne, 11 m . S.W. Chaumont, r. bank, Aujon. It was once surrounded with walls, flanked with towers, and still contains an old ruined castle. It has manufactures of leather, and a trade in horses and cattle. There are blast-furnaces, and other ironworks, in the neighbourhood. Pop. 1930.

CHATEAUBRIANT, a tn . France, dep. Loire-Inferieure, 36 m. N.N.E. Nantes, on the Cher. Some remains of the old castle or château, built by Briant, Count of Penthièvre, in 1015, and from whom the town derives its name, still exist. Its houses are irregularly built, in bad taste, and are old. It has a court of first resort, an agricultural society; manufactures of woollen goods, earthenware, tiles, and leather; with a considerable trade in cattle, grain, wood, iron. It is famous also for its conserves of lingwort. Pop. 3088.

CHATEAUDUN, a tn. France, dep. Eure-et-Loir, 26 m . S.S.W. Chartres, near r. bank, Loir. Its streets are straight, and terminate in a square, from which a complete view of the town may be obtained. It has a court of first resort, an agricultural society, communal college, and a small public library. The Hotel de Ville and college buildings are deserving of notice. The old castle of the Counts of Dunois overlooks the town. Chateaudun has manufactures of blankets, and large tanneries, and some trade in agricultural produce. Pop. 5756.

CHATEAULIN, a tn. France, dep. Finistère, $14 \mathrm{~m} . \mathrm{N}$. Quimper, on the Aulne, which divides it into two parts, and forms a port for vessels of 60 or 80 tons. It is ill built; has some remains of the old castle of the Seigneurs of Chateaulin; and in the vicinity a mineral spring, and two intermittent fountains. It is the seat of a court of first resort, and has an agricultural society; and a trade in cattle, fish, butter, iron, lead, slates, \&c. Salmon and sardine fishing is prosecuted. Pop. 1523.

CHATEAUMEILLANT [Latin, Castrum Mediolanum], a tn. France, dep. Cher, 36 m . S.S.W. Bourges, in a beautiful district, on the small stream Sinoise. It is a place of great antiquity, and contains the ruins of an old castle, consisting principally of two large towers, and a number of octagonal turrets, decorated with fine sculptures, and curious arabesques. The trade is almost confined to chestnuts. There are nine annual fairs. Pop. 1710.

CHA'T'EAUNEUF-de-Randon, a small tr. France, dep. Lozere, 12 m . N.E. Mende, on a hill. It was formerly fortified, and is celebrated for the siege sustained by the English garrison in 1380, against the troops of Charles V., commanded by the chivalrous Duguesclin. During this siege, the English Governor, who had been hard pressed, promised to surrender to Duguesclin at the expiry of 15 days, if no succour arrived. Shortly after, and before the expiry of the time agreed on, Duguesclin died, when his successor, the Marechal de Sancerre, summoned the Governor, who replied that he had given his
word to Duguesclin, and would yield to no other; and when informed of the hero's death, he said, 'Then I will carry the keys to his tomb.' Accordingly, the Governor sallied forth with the garrison to Duguesclin's tent, and, on his bended knees, laid his sword and the keys of the town on the bier. In 1820, a simple commemorative monument was erected at the hamlet of Bitarelle, on the spot where this event occurred.

CHATEAUNEUF-sur-Charente [Latin, Castrum Novum], a tn. France, dep. Charente, 12 m . S. by W. Angoulême, in a fertile district, l. bank, Charente. It was once a place of strength, and, when in possession of the English, stood a siege of four years by the French, but was ultimately taken. It las some trade in cattle, wine, brandy, salt, and ship timber. It has also a monthly fair. There is a remarkable stalactite grotto in the vicinity. Pop. 1798.

CHATEAUNEUF-sur-Cher, a tn. France, dep. Cher, 16 m. S.S.W. Bourges. It stands on an island formed by the Cher, and was once defended by a strong castle, of which only some vestiges now remain. Its trade is in wine, horses, and cattle. Pop. 2041.

CHATEAUNEUF-sur-Loire, a tn. France, dep. Loiret, near r. bank, Loire, 16 m . E. Orleans. It has manufactures of woollen cloth, and refineries of beet-root sugar. Pop. 2748.

CHATEAUROUX, a tn. France, cap. dep. Indre, 144 m. S.S.W. Paris, in an extensive plain, 1. bank, Indre; lat. $46^{\circ} 48^{\prime} 50^{\prime \prime} \mathrm{N}$.; lon. $1^{\circ} 40^{\prime} 51^{\prime \prime} \mathrm{E}$. (L.) It was formerly a miser-able-looking place, but has been greatly improved since 1820. It has straight, broad, and tolerably well-paved streets, and spacious squares, a Hotel de la Prefecture, Hotel de Ville, public library, modern theatre, Gothic church, public garden, and some fine promenades. It is the seat of a court of first resort, and of commerce, consulting chamber of manufactures, societies of arts, sciences, and agriculture, communal college, and normal school. The cloth manufactures, in which the wools of Berry are almost exclusively used, are extensive, employing about 2000 workmen. Cotton hosiery, woollen yarn, tiles, paper, and parchment, are also made; and there are tanneries and dye-works. There is likewise a considerable trade in grain, wine, iron, wool, poultry, and cattle. The town owes its origin to a castle built in 950 , by Raoul le Large, of Deols, still in a tolerable state of preservation. It was considerably extended in the reign of Louis X1II., who constituted it a duchy in favour of the descendants of Henry II. of Bourbon, Prince of Conde. Charles of Bourbon sold it to Louis XV., who conferred it on one of his mistresses, at whose death it returned to the crown. During the Revolution of 1793, it was called Indre-Ville. Pop. (1846), 12,554.

CHATELET, a tn. Belgium, prov. Hainaut, 4 m . E. CharIeroi, r. bank, Sambre. It has manufactures of pottery, which bear a high name; nails, common cloth, and other woollen and cotton stuffs; tanneries, a salt-refiuery, and a brewery. Its trade with the neighbouring towns and provinces is considerable ; and it has three weekly markets, a monthly cattle, and other four annual fairs. Pop. 2859.

CHATELLERAULT, a tn. France, dep. Vienne, 20 m . N.N.E. Poitiers, r. bank, Vienne, which here begins to be navigable. On the opposite bank is a suburb connected with the town by a handsome stone bridge, at one end of which is a castellated gate formed of four large towers, said to have been built by Sully. The old walls and fortifications have been converted into promenades. The town is ill built, but has some good public edifices, among which are several churches, a theatre, public fountain, and the royal manufactory of swords and bayonets. The manufacture of cutlery has long been carried on here to a great extent, employing about 600 families. Jewellery, hardware, and lace are also manufactured; and there are bleaching grounds for wax and linen. The river port gives rise to a large trade in grain, wine, brandy, clover, and lucerne seed, fruit, hemp, salt, iron, steel, slates, staves, and millstones, of which this town is the entrepôt for an extensive district. It has a court of first resort, and an agricultural society.
The duchy of Chatellerault was bestowed by Henry II. upon James Hamilton, second Earl of Arran, Regent of Scotland, 1548, to induce him to consent to the projected match between his ward, the infant Quecn Mary, and the Dauphin Francis. The ducal title is still possessed by the Duke of Hamilton. Pop. 9738.

CHATENOIS, a tn . France, dep. Bas-Rhin, arrond. Schelestadt, about 26 m . S.S.W. Strasburg. It stands at the foot of the Vosges, overlooked by the imposing ruins of an ancient castle, which crowns a lofty mountain covered with forests. Its manufactures consist of cotton goods and paper. There is a mineral spring in the neighbourhood. Pop. 3560.

CHATHAM, a tn. naval arsenal, and seaport, England, co. Kent. The town lies on the Medway, about 29 m . S.E. London, adjoining Rochester so closely, as to form rather a suburb of that city than an independent town. A great portion of it is irregular and ill-built, and the houses, many of which are of wood, have a mean appearance, although considerable improvements lave taken place of late years. The parish church, built in 1788 , is a plain brick structure; a more modern
branches of trade connected therewith. The dockyard, and upper and lower barracks, are included within a line of strong fortifications. By the Reform Act, Chatham was united with Rochester in returning members to Parliament, but now returns a member itself; registered clectors (1850), 1257. The Rochester station of the Gravesend and Rochester Railway, is 1 m. from the town. Pop. of par. in 1841, exclusive of the barracks, hulks, and hospitals, 15,411.

CHATHAM, a t . Upper Canada, pleasantly situate r. bank, Thames, 12 m . from its embouchure in Lake St. Clair, and $65 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. London. It exports agricultural produce, timber, \&c. Pop. (1852), 2070.

CHATHAM BAY, a bay, U. States, S.W. coast, Florida, in the Gulf of Mexico, extending 75 m . from Cape Romano on the N. to Cape Sabel on the S. It receives the Sharks, Youngs, and Gallivans rivers.

CHATHAM (Cape), S. coast, Australia; lat. $35^{\circ} 2^{\prime}$ S.; lon. $116^{\circ} 28^{\prime}$ E. (r.)

CHATHAM ISLANDS. -1 , A group of three islands, S. Pacific Ocean. The largest or Chatham Islaud, the native name of which is Ware-Kauri lat. (S. point) $44^{\circ} 7^{\prime}$ S.; lon. $176^{\circ} 49^{\prime}$ E. (r.) ; is between 300 and 350 m . E. from the N.E. coast of the middle island of the New Zealand Islands, and is from 80 to 90 m . in circumference. The other islands are langi Haute or Pitt Island, 12 m . long by 8 broad; and Ranga Tira or South-East Island, a mere rock. Between 10 and $12 \mathrm{~m} . \mathrm{N}$. from the W . end of the larger island, and on the 177th meridian, are two pyramidical rocks, called the 'Two Sisters,' about 100 ft . high, covered with scanty bushes, and frequented by countless numbers of sea birds. The land on the W. side of Ware-Kauri is undulating, of small clevation, and clothed with verdure to the water's edge. 'The N. shore, especially to the W., is flat, and the headlands of the bays run out in long wooded tongues of land. The S . shore is abrupt and precipitous, but the land on the
one was erected in 1821 ; there are, besides, several Dissenting chapels, two national schools, a British school for boys and girls, and two infant schools, and a mechanics' institution; two public subscription libraries, an lospital for decayed seamen, and three or four minor charities. But the great attractions of Chatham are the naval and military establishments at Brompton, in its immediate vicinity. The arsenals, storehouses, and dockyard, cover a space of ground nearly a mile in length. In the latter are five wet docks capable of receiving vessels of the largest class, six building slips, and about 500 houses for the accommodation of the various artificers employed in the works. In the smitheries, anchors are manufactured of five tons weight; and in the rope-house, cables of 100 fathoms in length, and 25 inches in circumference. The navigable course of the Medway, that is between Chatham and Sheerness, is only about 10 m. , yet the water is deep enough to carry the largest ships up to the former place, an advantage to which it owes its importance and prosperity. The barracks consists of the lower or marine barracks, the upper or Brompton barracks, and the new or artillery barracks, with a park of artillery. The artillery hospital contains wards for 100 patients. Here is, also, a school for engineers, in which young officers and recruits are instructed in a practical knowledge of their duties. The convict establishment, which usually contained 900 to 1000 convicts, was removed several years ago. Immense quantities of every necessary for naval equipment are accumulated here, with machinery of every kind, suitable for the various processes and operations required, and all of the most improved description; and so complete is the system adopted, and the care, promptitude, and despatch observed in all the different departments, that a first-rate ship of war may be fitted ont in a few days. In the time of war, about 3000 artificers are employed in shipbuilding, and repairing, and in the other
 is level, and covered with trees. Sinall summit of the cliffis is level, and covered with trees. Sinall
streamlets trickle down the cliffs and clothe their face with herbage. On the E. side the coast continues rocky for some distance, when it is varied by a broad sandy beach and low wooded hills. It has several bays, the principal of which is Waitangi Bay, on the W. side of the island, which has a general depth of water from 7 to 12 fathoms. The harbour of Waitangi, within the bar, on its S.E. side, is much frequented by whaling vessels, which there supply themselves with fuel, provisions, and water. There are few hills in the island, and the highest does not exceed 800 ft . Some of them are regular pyramids, and all are of volcanic origin. The island contains several lakes, the largest of which, Te Wanga, is about 25 m . long and 6 or 7 broad. It is surrounded by hills, either wooded or boggy, and is separated from the sea by low sand hills. The climate is mild and agreeable, and the air cool and moist. The soil is in many places fertile, and produces potatoes of superior quality; but corn cannot be grown in consequence of the vast numbers of parroquets by which the island is infested, and which destroy the grain before it is ripe. Turnips, cabbages, pumpkins, and tobacco are successfully cultivated. The creeks and shores abound in fish, many of them excellent ; sharks, of formidable size, are numerous. The original inhabitants, now nearly extinct, were a cheerful and good-natured race. About the year 1830, they amounted to 1200 ; in 1840, their numbers, according Dr. Dieffenbach, were under 90 . The destruction of this unfortunate people is attributed to the cruelty and tyranny of the New Zealanders, who found their way here in large numbers some years ago, and, by the superior energy and ferocity of their character, soon became masters of the ill-fated though inoffensive aborigines. The present population consists chiefly of New Zealanders, and of persons from E. Cape and Port Nicho!sou. The island has now a very

## CIIAUMONT

bad reputation, being, says commander Stokes, 'considercd as a nest of rogues, several vessels having been robbed there.' The Chatham Islands were discovered by Lieut. William Robert Broughton, of H. M. brig Chatham, and taken possession of by that officer in the name of his Britannic Majesty, Nov. 29, 1791.-(Dc. Dieffenbach; London Geo. Jour., vol. ii., p. 195 ; Ross's Antarctic Voyages ; U. S. Exploring Expedition.) - 2 , An isl. W. coast, Patagonia, between Hanover Island and the mainland, N. end; lat. $50^{\circ} 30^{\prime} \mathrm{S} . ;$ lon. $74^{\circ} 30^{\prime} \mathrm{W}$. It is about 30 m . long, and about 10 broad .3, Chatham, or St. Clement's Island, one of the Galapagos.

CHATILLON-sur-Indre, a tn. France, dep. Indre, 27 m . N.W. Chateauroux, near l. bank, Indre, on a height crowned by the ruins of an old castle. The church, built about the 10th century, is remarkable for its antique sculp tures; and the market-place cominands a fine view of the Indre valley. Coarse woollen goods are manufactured. Pop. 2507.

CHATILLON-sur-Loing, a tn. France, dep. Loiret, 45 m. E. by S.E. Orleans, agreeably situate in a valley on the river and canal of Loing. Admiral Coligny, who was assassinated during the massacre of St. Bartholomew, was born in an old castle which overlooks the town, and in the chapel attached to it his tomb is still to be seen. In 1648, the town was erected into a duchy in favour of the Admiral's grandson. Some trade in wood and charcoal. Pop. 2019.

CHATILLON-sur-Loire, a tn. France, dep. Loiret, I. bank, Loire, 45 m. S.E. Orleans ; with some trade in wood. Marble and building-stone are quarried in the vicinity. P.2003.

CHATILLON-sur-Seine, a tn. France, dep. Côte d'Or, 45 m. N.W. Dijon, on the Seine. It is well built, clean, paved, and rapidly increasing; has a Hotel de Ville, palace of justice, several old churches, a public library, hospital, college, and an old castle, surrounded by a beautiful park, through which flows the Seine. It has a court of first resort and of commerce; manufactures of cloth, serges, and linen; iron furnaces, forges, paper-works, tanneries, and breweries; grain, fulling, and bark mills; wax-bleaching grounds, and distilleries; with some trade in iron, wood, wool, leather, and grindstones. Pop. 4611.

CHATRE (La), a tn. France, dep. Indre, 21 m . S.E. Chateauroux, r. bank, Indre. Its streets are irregular, but the general aspect of the town is agreeable. It has a pretty parish church, and a public fountain, a court of first resort, and communal college; manufactures of cloth, some extensive tanneries, and a considerable trade in wool, cloth, wax, goatskins, quills, and cattle. Pop. 4078.

CHATSK, or Shatzk, a tn . Russia, gov. of, and 95 m . N.N.W. Tambov, in a fertile plain, on the Chatcha. It contains five churches, and has some trade in grain, cattle, iron, and hemp. Pop. 6500.

CHATTAHOOCHEE, a river, U. States, Georgia and Alabama, rising in the Appalachian Mountains, about lat. $34^{\circ} 40^{\prime} \mathrm{N}$. ; lon. $83^{\circ} 30^{\prime} \mathrm{W}$., and flowing first W. and then S., and forming, for a considerable distance, the boundary between the above states. In its Iower course, after the junction of the Flint River from the E., it is named the Appalachicola, and is navigable to Columbus in Georgia for steam boats. Total conrse, about 200 m .

CHAT'IERIS, a market tn. and par. England, co. Cambridge, Isle of Ely. The town, $18 \frac{1}{2} \mathrm{~m}$. N. Cambridge, is well built, excellently kept, amply supplied with water, and partially lighted with gas. It has a handsome parish church, and seven chapels belonging to Methodists, Baptists, Independents, and Friends; national, British, infant, and several private schools; a literary institution, reading-room, and several charitable societies; and a handsome cemctery. The inhabitants are chiefly employed in agriculture. A considerable cern-market on F riday; two fairs annually. Area of par. 15,090 ac. Pop (1851), 5141.-(Local Correspondent.)

CHATTERPOOR, a tn. Hindoostan, prov. and 150 m . S.W. Allahabad ; formerly a flourishing place, and still possessing considerable manufactures of coarse cotton wrapper.

CHATTISHAM, par. Eng. Suffolk; 2480 ac. Pop. 215.
CHATTON, par. Eng. Northumb.; 16,300 ac. P. 1725.
CHAUCHINA, a tn. Spain, Andalusia, prov. of, and 12 m . from Granada, in an extensive but marshy plain. It is very poorly built. All the houses are of earth, excepting a few of more modern construction, which are of brick; and the streets are so badly paved, as to be almost impassible in wet
weather. The market-place is of considerable extent, and among the buildings are a parish church in a dilapidated state, surmonnted by a massive tower; a consistorial house, partly occupied as a prison, and several primary schools. A plentiful supply of water is brought into the town by an aqueduct; but, owing to the dampness of the locality, intermitting fevers are frequent. Pop. 1744.

CHAUDEFONTAINE, a com. and vil. Belgium, prov. of, and 6 m . S.E. Liège, r. bank, Vesdre ; with mineral springs, known as early as 1250, and still frequented. Pop. 1073.

CHAUDES-Aigues [anc. Calentes Baioc], a tn. France, dep. Cantal, 28 m . E.S.E. Aurillac, in a deep gorge at the foot of the mountains that separate Auvergne from the Gevandan. The road leading to it from St. Flour is cut out of the granite rock for a distance of 6561 ft . On the right hand is the mountain, and on the left a precipice from 300 to 500 ft . decp, at the foot of which flows the Truyere. The town owes its importance to its lot mineral springs, of which there are 12, all having their sources in a volcanic mountain. The water of these springs has the property of discharging the grease from sheep's wool, and a vast number of fleeces are sent hither from the department of Aveyron to be washed. From November to April, the hot water is used for warming the town, being conveyed into the houses in wooden pipes, the police seeing to its equal distribution. Some woollen goods and leather are manufactured here, and there are glass-works in the vicinity. Pop. 1422.

CHAUDIERE.-1, A river, Lower Canada, which rises on the borders of Maine, near the sources of the Kennebec; lat. $45^{\circ} 20^{\prime} \mathrm{N}$. ; lon. $70^{\circ} 51^{\prime} \mathrm{W}$.; and, after a N. course of about 120 m ., falls into the St. Lawrence, 6 m . above Quebec. Three or four miles above its entrance into the St. Lawrence, there is a remarkable cataract, of about 120 ft . perpendicular. -2, A lake on the confines of Upper and Lower Canada, 18 m . long, and about 3 average breadth; formed by an ex pansion of the Ottawa, 6 m . below the falls Des Chats. A strong current runs throngh it from N.W. to S.E.

CHAUDWAR, an anc. city, Hindoostan, prov. Orissa, near Cuttack, now in ruins. The ruins extend for many miles, but few are above ground, being mostly foundations ; there are numerous reservoirs also, and the remains of temples. It is not known when or why this great city was abandoned. - (Journal of the Asiatic Society of Bengal.)

CHAUFFAILES, a tn. and com. France, dep. Sâne-etLoire, $15 \mathrm{~m} . \mathrm{S}$. Charolles. Before the Revolution it was an insignificant village, but has now become a thriving manufacturing town, producing large quantities of calico, with which it supplies the markets of Roanne, Beaucaire, Lyons, and Villefranche. It has also cotton spinning-mills. Pop. 3705

CHAUMONT, or Chaumont-en-Bassignx, a tn. France, cap. dep. Haute-Marne ; lat. $48^{\circ} 6^{\prime} 47^{\prime \prime}$ N. ; lon. $6^{\circ} 58^{\prime} 6^{\prime \prime}$ E. (L.) ; 141 m . S.E. Paris, l. bank, Marue, $1 \frac{1}{4} \mathrm{~m}$. above its confluence with the Suize. In general it is well built, with broad clean streets, some of which, however, are difficult of access The npper part of the town is surronnded by fine promenades. Water was formerly scarce, and the inhabitants were obliged to use rain water collected in cisterns, but a hydraulic machine now affords an abundant supply from the Suize. Among the public buildings are the church of St. John, the college with its chapel, the hospital, Hotel de Ville, and a kind of triumphal arch commenced under Napoleon, and finished under Louis XVIII. It has a court of first resort and of commerce, societies of agriculture, arts and sciences, a royal college, and a public library, containing 35,000 volumes. The celebrated abbey of Val-des-Ecoliers, founded in 1212, was 2 m . from Chaumont. The manufactures of the town are considerable, and consist of woollen hosiery, ornamented with needlework; leather gloves, serges, druggets, common cloths, wax tapers, \&c. There are also wool and cotton spinning-mills, a wax-bleaching ground, tanneries, and a sugar refinery; with a trade in iron, cutlery, gloves, tapers, brandy, \&c. On March 1, 1814, the allied powers concluded a treaty here against Napoleon, 19 days before the rupture of the Congress of Chatillon. This treaty formed the basis of what was afterwards called the Holy Aliance. Pop. 5608.

CHAUMONT, a vil. Sardinian States, Savoy, prov. Carouge, $9 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. St. Julien, formerly fortified. Its castle once the residence of the Dukes of Nemours, was destroyed in the wars of the 16 th century. Pop. 1000.

CHAUMONT-sur-Loire, a vil. France, dep. Loir-etCher, about $9 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Blois, beautifully situate 1 . bank, Loire, at the foot of a wooded hill, crowned by an old castle of great extent, and most picturesque appearance. This castle,

CHAVEs [anc. Aquce Flavie], a tu. and par. l'ortugal, prov. Traz-os-Montes, on the frontier of Spain, r. bank, Tamega, hcre crossed by a Roman bridge of 18 arches, 41 m . W. Braganza. It stands in a fertile valley of same name, and is a place of some strength, being defended by three forts. It has two suburbs, a parish church, two convents, two hospitals, an almshouse, and bathing establishment, supplied by mineral springs. Its annual fair lasts three days. There are several other Roman antiquities besides the bridge. Pop. 3900.

CHAWLEIGH, or Chawley, par. Eng. Deven; 5020 ac. Pop. 850.

CHAWTON, par. Eng. Hants; 2870 ac. P. 460.
CHAY-FANG, or Tche-Fang, a tn. China, prov. Yunnan, l. bank, Lung-tchuen, 125 m . W. by S. Chunning; lat. $24^{\circ} 13^{\prime} \mathrm{N}$. ; Ion. $98^{\circ} 10^{\prime} \mathrm{E}$.

CHAYENPOOR, or Chayanapoor, a tn. and dist. Hindoostan, Nepaul. The town, 52 m . S.E. Khatmandoo, and near r. bank, Cosee, is fortificd.

The district is mountainous, thinly inhabited, and yields but a small revenue to Government. The exports to Tibet are rice, wheat, oil, butter, metals, cloths, catechu, timber, pepper, indigo, hides, furs, tobacco, sugar-candy, and pearls; whence gold, silver, musk, musk-deer skins, chowries, or whisks to keep off the flies, blankets, salt, borax, Chinese silks, and medicinal herhs, are imported.

CHaZELLES, or Chazelies-sur-Lyon, a tn. France, dep. Loire, 16 m . E. by N. Montbrison. It is surrounded by old walls, is well built, and pos-
which is an irregular structnre, with machicolated towers, built at different periods, and forming three sides of a square, was long the property of Catherine de Medicis, who used to retire to it with her astrologers to consult the stars. It was occupied for some time by Madame de Stael.

CHAUNY, a tn. France, dep. Aisnc, 19 m . W. by N. Laon, r. bank, Oise, at the beginning of the St. Quentin Canal. One half of the town is situate on an island formed by the Oise, which is here navigable. It has manufactures of sacking, worsted stockings, soda, sulphuric and nitric acids; cottonmills, hydraulic machines for polishing the plate glass of St. Gobian, large bleaching grounds, and tanneries; with a trade in grain, cider, oil, timber, hosiery, cordage, coal, horses, and cattle. Pop. 5404.

CHAUSSEY, a small isl. English Channel, belonging to France, dep. Manche, opposite Granville, 7 m . from the coast; lat. $48^{\circ} 52^{\prime} 12^{\prime \prime} \mathrm{N} . ;$ lon. $1^{\circ} 49^{\prime} 15^{\prime \prime} \mathrm{W}$. (r.) Several smaller islands and rocks surround it, and the whole group is sometimes termed the Chaussey Islands. It contains quarries of excellent granite, with which the whole of the works about the harbours of Granville and St. Malo have been constructed; it is inhabited only in summer, and by the quarrymen. It contains immense numbers of rabbits.

CHAUX-de-Fond (La), a th. Switzerland, can. of, and 9 m. N.W. Neufchâtel, in a deep valley of the Jura, which is 3000 ft . above the level of the sea, and is traversed by the road into France. The district around is extremely bleak, but the town is both well built, and of considerable extent; most of the houses being new and handsome, and standing apart, surrounded by a piece of croft or garden ground. The parish church is elegant. The whole town, indeed, furnishes one of the numerous examples in which Switzerland shows how well the hand of industry can compensate for the niggardliness of nature. A numerous community exists and prospers on a soil barely adequate to furnish a tenth of its subsistence. The manufacture to which this pleasing result is chiefly owing, is that of clocks and watches, and other forms of nice and ingenious mechanism. The workmen generally carry it on in their own homes, and appear to be in comfortable circumstances. In a recent year, 108,295 gold and silver watches were made here. The subdivision of labour is well understood, and each man confines himself to a particular piece of the work, while the finishing of the whole, the gilding, enamelling, painting, \&c., all form separate departments. The mechanists Droz, whose wonderful automata have acquired an European reputation, were born here. Chaux-de-Fond possesses two remarkable subterranean mills, which stand in an artificial hollow 60 ft . below the surface. The scenery around the town is exceedingly picturesque. Pop. 8500.
sesses a handsome square, lined with trees. The principal manufacture is hats. It has five annual fairs. Pop. 1920.

CIIEADLE, a par. England, co. Chester. comprising the townships of Cheadle-Bulkeley, Cheadle-Moseley, and Handforth cum-Bosden, with a station on the Manchester and Crewe Railway. The village of Cheadle-Bulkeley, 6 m . S. Manchester, contains a church, in the later English style; chapels for Wesleyans and R. Catholics, and an endowed school. In the vicinity are several printworks and bleacheries. Area of par. 6470 ac . Pop. 10,145; of Cheadle-Bulkeley, 5463 ; of Cheadle-Moseley, 2288; of Handforth cum-Bosden, 2394.

CHEADLE, a market tn. and par. England, co. Stafford. The town, 13 m . N.N.E. Stafford, contains a church, a chapel of ease, and places of worship for various religious sects; and has four schools, and several small charities. Tape is the chief article manufactured in the town, although there are in tlle vicinity extensive brass, tin, and copper works, with limeworks and collicries. Area of par. 5730 ac. Pop. 4399.

CHEAM, par. Eng. Surrey; 1850 ac. Pop. 1109.
CHEARSLEY, par. Eng. Bucks; 1130 ac. Pop. 308.
CHEAT, a river, U. States, Virginia, rising in Haystack Peak; flowing N., and joining W. river, an affluent of the Ohio, within the Pennsylvanian frontier. It is navigable for boats, excent in very dry seasons. Total course, about 90 m .

CHEBSEY, par. Eng. Stafford; 3760 ac. Pop. 442.
CHECINY, a tn. Russian Poland, dist. of, and about 9 m . S.W. Kielce. It stands in a level district, but has a castle on a steep height. It contains a central house of correction. Fine marble, fit for statuary and other purposes, is quarried; and lead and silver were at one time worked in the vieinity. Pop. 3000.

CHECKENDON, par. Eng. Oxford; 2800 ac. Pop. 398.
CHECKLEY, par. Eng. Stafford; 5710 ac. Pop. 2322.
CHEDABUCTO BAY, an indentation, N.E. coast, Nova Scotia, at the S. entrance to the Gut of Canso, and N. Cranberry Island and lighthouse. It is spacious and safe; and on its S. side, which is high, and nearly straight, are Crow harbour and Fox's island. It is much frequented by fishermen, and at its head is the inlet of Milford haven, about 1 m . broad, and 12 m . long.

CHEDBURGH, par. Eng. Suffolk; 550 ac. Pop. 284.
CHEDDER, a par. and decayed vil. England, co. Somerset. The village, 15 m. S.W. Bristol, is situate at the entrance of a deep gorge in the Mendip hills, presenting one of the most romantic and picturesque scenes in England, the walls of living rock on either side, extending from 2 to 3 m ., rising perpendicularly to the height of many hundred feet. The church is a handsome structure, with a square tower 100 ft . in height, surmounted by pinnacles. There is also a Wes-
leyan chapel. The ancient cross is beautifully cut, of a hexagonal form, and in good preservation. Agriculture and knitting stockings are the chief occupations. The dairies in the neighbourhood have long been famous for the excellence of their cheese. Area of par. 6690. Pop. 2325.

CHEDDINGTON, two pars. Eng. :-1, Bucks; 1170 ac. Pop. 439.-2, Dorset; 2690 ac. Pop. 186.

CHEDDLETON, a par. and thriving vil. England, co. Stafford. The village, a station on the North Staffordshire Railway, about 3 m. S. by W. Leek, has respectable houses of stone and brick ; abundant supply of water; a parish church, a Wesleyan chapel, and a Church of England school; trade in silk; agriculture is the chief employment; area of par. 9080 ac. Pop. 1824.

CHEDDON-FitzPaine, par. Eng. Somerset; 1050 ac. Pop. 357.

CHEDGRAVE, par. Eng. Norfolk; 900 ac. Pop. 348.
CHEDISTON, par. Eng. Suffolk; 1910 ac. Pop. 433.
CHEDUBA, or Cheedooba, an isl. Bay of Bengal, about 25 m . off the coast of Aracan ; lat. (W. point) $18^{\circ} 51^{\prime} \mathrm{N}$. ; lon. $93^{\circ} 28^{\prime} \mathrm{E}$. (r.) It is $15 \frac{1}{2} \mathrm{~m}$. in length, and nearly the same in breadth. Area, somewhat under $200 \mathrm{sq} . \mathrm{m}$. Its general appearance and character is that of a fertile, well-wooded, island, of moderate height ( S . peak, 1700 ft . high), and irregular outline. A level tract, of varying breadth, extends around its coasts, within which lie low undulating hills of from 50 to 500 ft . in height; but in the S. part of the island, several summits attain an elevation of about 1400 ft . The geology of the island presents some features of great interest. About 90 years since, a large portion of its present coast, with those of the adjoining country, was suddenly elevated out of the sea by volcanic action, accompanied by a violent earthquake, which, however, did no damage. Other elevations had taken place at several previous periods, and at such equal distances of time ( 100 years), that the inhabitants look upon it as a periodical occurrence, and contemplate, without alarm, the recurrence of the phenomenon in a few years. There are several mud volcanoes on the island, some of which are in constant ebullition. Its minerals are of little value, with exception of petroleum, which is obtained in considerable quantities, and might be much increased. Coal has also been found, but its quality is doubtful. The climate is extremely unhealthy to Europeans, although instances of great longevity among the natives are far from being uncommon. The most agreeable season is between the end of October and the middle of March, during which time the air is temperate, the heat rarely exceeding that of England in summer.

The general character of the soil is that of a light grayishcoloured clay, mixed more or less with vegetable mould, and in some places with fine sand. Rice is the staple produce of the island, and is exported in considerable quantities. Tobacco, of excellent quality, is a principal product; and cotton, sugar, and indigo, are also grown to a small extent. Yams are large and good, and pumpkins, gourds, shalots, and chillies, are plentiful, the last being in universal and daily demand for curry. Cattle and buffaloes are numerous, the former of a small breed, but of good quality; the latter in a domestic state, and chiefly employed in agricultural work. Domestic fowls, deer, wild hogs, and squirrels, are plentiful. Bees abound, and yield excellent honey. The coasts are amply stocked with fish, particularly a kind resembling the anchovy, which is taken in great quantities, and, after being prepared, is exported to the mainland. Turtle are likewise common.
The population is, with trifling exceptions, entirely Mugh, descendants of Burmans. In person, they are well proportioned, though generally small; they are a simple, honest, and inoffensive race, frank in their manners, and of a cheerful and forgiving disposition. They are superstitious, and have a great dread of evil spirits. Their language is nearly the same as that of the Burmese, as are also their religion, and all the leading customs and points of character. Cheduba is a dependency of Aracan, is under British dominion, and is, with the former, immediately dependent on the Presidency of Bengal. The revenue is raised from the produce of the land, and is collected without difficulty. There is a native police, but their duties are light, neither personal violence nor robbery being known. Pop. (1840), 8534.

CHEDWORTH, par. Eng. Gloucester; 4890 ac. P. 983.

CHEDZOY, par. Eng. Somerset; 1570 ac. Pop. 507. CHEERA, a city, Chinese Empire, in Thian-shan-nan-loo, 70 m . E.S.E. Khoten; lat. $36^{\circ} 30^{\prime} \mathrm{N}$.; lon. $81^{\circ} 30^{\prime}$ E. It is a place of considerable size, and silk of excellent quality is produced in the neighbourhood. Pop. estimated at 10,000 .

CHEF-Boutonne [Latin, Caput Vultunce], a tn. France, dep. Deux-Sèvres, at the source of a stream of the same name, 24 m . S.E. Niort. It is a very ancient place, being referred to by Cæsar; has manufactures of serge, drugget, and delft-ware, and carries on a trade in corn, wool, and cattle. Pop. 1372.

CHEHEL TAN, a lofty mountain, Beloochistan, 10 to $15 \mathrm{~m} . \mathrm{N}$. Moortoong, about lat. $30^{\circ} 15^{\prime} \mathrm{N} . ;$ lon. $66^{\circ} 5^{\prime} \mathrm{E}$. 1 ts elevation is supposed to exceed $11,000 \mathrm{ft}$. Opposite to the principal peak is another of somewhat lower altitude. On the summit is a zfárat or place of pilgrimage, held in great veneration by the Mahometans. The view from the top is magnificent, and of vast extent.

CHEKIANG, a maritime prov. China, between the parallels $27^{\circ}$ and $31^{\circ} \mathrm{N}$. , and, including the Chusan Archipelago, which forms a portion of it, between the meridians $117^{\circ}$ and $123^{\circ}$ E. The continental part is bounded, E. by the Pacific, N. by Kiangsoo, W. by Nganhoei and Kiangsee, and S. by Fokien; area, 39,150 sq. m., being considerably the smallest of the Chinese provinces. The S. portion is rough and hilly; but the whole of the territory is remarkably fertile, producing, in great abundance, rice and other grains, with tea, silk, and cotton; while its forest and fruit trees comprise the most valuable varieties known in the E. provinces. The rivers, of which 14 principal ones are enumerated as having their rise in the province, are short, but rapid in their course. Of these, the most important is the Tsientang, which rises in the hills near prov. Kiang-si, and, after a N.E. course of about 150 m ., through a beautiful and romantic country, falls into the sea near Chapoo. The climate is healthy. The industry and skill of the inhabitants are attested by the unrivalled beanty of their silk fabrics, which are highly esteemed in every part of the civilized world. Cotton and linen manufactures are also carried on to some extent; and tea, crockery, lackeredware, paper, ink, and other articles, are exported. Hang-foo-choo, the cap., lies in lat. $30^{\circ} 20^{\prime} 20^{\prime \prime} \mathrm{N}$.; lon. $120^{\circ} 7^{\prime} 34^{\prime \prime} \mathrm{E}$. The other principal cities include Ning-po, Ching-hai, and Chapoo. It is divided into 11 departments. Pop. 26,256,784.

CHEKSNA, a river, Russia. See Sheksna.
CHELBOROUGH, two pars Eng., Dorset:-1, (East), 1450 ac. Pop. 96.-2, (West), 590 ac. Pop. 58.

CHELDON, par. Eng. Devon; 1610 ac. Pop. 90.
CHELEK, a vil. Asiatic Turkey, pash. Diarbekir, sanjak of, and 15 m . S.W. Sert. It consists of four or five hundred houses, inhabited by Kurds and Yákúbi Christians, and is defended by a strong castle on a rock, in which the chief resides.

CHELICUT, a vil. Abyssinia, kingdom, Tigré, beautifully situate on a stream, 10 m . E. by N. Antolo; lat. $13^{\circ} 22^{\prime} \mathrm{N} . ;$ lon. $40^{\circ} \mathrm{E}$. There is here a church with a thatched roof, but highly decorated interior, esteemed one of the finest in Abyssinia. Chelicut is the usual residence of the king, who has here a palace. Pop. 8000.

CHELIGOFF.-1, A lake, Russian America, intersected by the parallel of $59^{\circ} \mathrm{N}$., and the meridian of $156^{\circ} \mathrm{W}$. It is about 80 m . long, with a medium breadth of 35 m ., and discharges its waters into Bristol bay.-2, A strait or channel, Russian America, between the island of Kodiak and the mainland.

CHELINDREH, or Gulnar, a small port, Asiatic Turkey, pash. Itshili ; lat. $36^{\circ} 9^{\prime}$ N.; lon. $33^{\circ} 22^{\prime}$ E. (r.) It is the anc. Celenderis, and about it are some antique remains. There are three small islands in front of the haven, which is now little frequented, though affording anchorage for large vessels.

CHELLASTON, par. Eng. Derby; 810 ac. Pop. 461.
CHELLESWOR'TH, or CHEL.sworth, par. Eng. Suffolk; 610 ac . Pop. 284.

CHELLINGTON, par. Eng. Bedford; 610 ac. Pop. 125.
CHELM, a tn. Russian Poland, dist. of, and 42 m . E.S.E.
Lublin. It is the seat of a United Greek bishop, and has a theological seminary. Pop., mostly Jews, 2900 .

CHELMARSH, par. Eng. Salop; 3190 ac. Pop. 495.
CHELMONDISTON, par. Eng. Suffolk; 1840ac. P.56.t.

CHELMSFORD, a tn. England, cap. co. Essex, 29 m. N.E. London, on the Eastern Connties Railway, situate in a beautiful valley between the Chelmer and Cann. It consists of one principal street, with three or four smaller ones, well paved, and well lighted with gas ; houses mestly substantially built, and have gardens behind extending to the rivers. The Chelmer is crossed by an elegant iron bridge, and the Cann by a handsome one of stone. The church is a fine old building of the 14 th or 15 th century, with a square embattled tower, crowned with pinnacles and surmounted by a tall spire. There are places of worship, besides, for various religious denominations, and an unusual proportion of benevolent societies and institutions. Besides its numerous minor charities, there is a free grammar school, founded by Edward VI., and two charity schools. Several of the public buildings and structures are exceedingly handsome; amongst the former is the shirehall, containing the corn exchange, the courts of assize, sessions, and an elegant assembly room; close by this building is a finely-sculptured conduit, to which a plentiful supply of water is brought by pipes from a well distant about 1 m. from the town. There is also in the town a theatre, and public baths, with a reading-room attached. There are no manufactures, but a considerable trade in corn and malt is carried on. On the banks of the Chelmer are several large tlour mills, and, in the vicinity of the town, some flourishing hop plantations. On Galley Common, 2 m . from the town, races are held every July. Pop. 6789.

CIIELONA, a lofty mountain on the S.E. frontiers of Albania. and N.W. frontiers of Greece, about 15 m . S.S.E. Arta, and forming the most conspicuous summit in the chain E. of the Gulf of Arta. Its height is 6312 ft .

CHELSEA, a tn. and par. England, co. Middlesex, in the Kennington division of the hundred of Ossalton. The rown, formerly a village, in the neighbourhood of London, is now a suburb of that city, being blended with it by intermediate buildings, stands on a slight eminence, l. bank, Thames, and along that part of the river called Chelsea Reach, the widest above London bridge. The older part of the town is irregular, and has a mean appearance, excepting the river frout above the hospital, which bas numerous fine buildings; but the more modern portion, towards Hyde Park, consists of handsome houses, regularly laid out. In the old church are monuments to the memories of Sir Thomas More, chancellor of Henry VIII., and Sir Hans Sloane, the founder of the British Museum, both of whom resided here. But the most remarkable object in Chelsea, and that from which it derives its elief interest, is its military hospital, a handsome structure of brick, ornamented with stone, built at an expense of $£ 150,000$, from a plan furnished by Sir C. Wren. It consists of three quadrangles, and is situate in the midst of extensive and carefully laid-out grounds, with gardens reaching down to the Thames. The aunual expenditure for the maintenance of this noble establishment, and for the support of old and maimed soldiers, for whose benefit it is appropriated, is about $£ 1,000,000$. The number of in-pensioners is usually from 500 to 550 ; they are provided with clothes, lodging, and diet, and an allowance in money, varying, according to rank, from $8 d$. to $3 s .6 d$. per week. The out pensioners, whose numbers are not limited by law, amounted, in 1846-47, to 69,862. The expense of the hospital is defrayed chiefly by an annual grant from Parliament. There is another excellent institution here connected with the military profession, called the Military Asylum, built at the national expense, at the suggestion, and under the auspices of the late Duke of York. Its purposes are to support and educate the orphan children of soldiers and non-commissioned officers, and the children of those who are on foreign stations; the boys, on leaving, enter the army; the girls are apprenticed. This institution is upheld by Parliamentary grants, and by an annual contribution of one day's pay from the whole army. The botanical gardens of Chelsea are also worthy of notice; those of the Apothecaries' Company consist of 4 ac ., and are situate on the banks of the river at the E. end of Cheyne Walk; the others, establisbed by Mr. William Curtis, author of Flora Londinensis, and the Botanical Mayazine, are situate near Sloane Street, and consist of 6 ac . In former times, Chelsea was a favourite place of residence with many persons of nete, including Queen Elizabeth, whe had a palace there. Area, 780 ac. Pop. of par. 40,179.

CHELSFIELD, par. Eng. Kent; 3330 ac. Pop. 861. CHELSHAM, par. Eng. Surrey; 2700. Pop. 347.
CHELTENHAM, a tn., parl. bor., and fashionable water-ing-place, England, co. of, and 7 m . N.E. Gloucester, a station on the railway from Bristol to Birmingham. The town, which consists principally of one fine street of about $1 \frac{1}{2} \mathrm{~m}$. in length, with some new and elegant streets branching off, is situate in an extensive and fertile valley open to the S. and W., but sheltered on all other sides by the Cotswold hills. The streets are well paved and lighted with gas; and numerous squares, adorned with trees and shrubs, add a pleasing feature to the whole. The vicinity presents much beautiful scenery, and is thickly studded with clegant villas. The principal public edifices of the town are the churches, chapels, pump-rooms, baths, the theatre, assembly-rooms, the artist'a repository, the museum, \&c. The principal places of resort -the libraries, which are numerous, there being one at each of the spas, besides several others in the town; literary saloon, and the different beautiful avenues and walks around the town. There are five churches under the establishment, and a number of chapels for various religious denominations. The parish church is a fine old Gethic structure in the form of a cross, with a tower containing a peal of eight bells, and a lofty and elegant spire. The charities of Cheltenham are numerous, and well supported. The principal are a general hospital, capable of accommodating 100 patients; a dispensary and casualty hospital, alms-houses, a benevolent and antimendicity society, with a number of gratis schools, and other minor clarities. The rise of Cheltenlam, which has been exceedingly rapid, is wholly owing to its mineral springs, which have attained for it an extensive celebrity in the fashionable world. The first spring was discovered by accident in 1716, and attracted some notice, but it was not until the place was visited, in 1778 , by George III., that its waters became widely celebrated. The circumstance of the royal visit, added to the discovery of a number of additional springs, quickly established its reputation, and from that period its progress was singularly rapid. Chloride of sodium is the predominating ingredient in all the springs; the other mineral components are sulphates of soda, magnesia, and lime, oxide of iron, and chloride of manganese. They are chiefly efficacious in bilious and dyspeptic cases. Cheltenham returns a member to the IIouse of Commons. Registered electors (1850), 2278. It has no trade excepting a little malting business, its sole dependence being on its visitors. Pop. 31,411.

CHELVA, a tn. Spain, prov. of, and 39 m. N.W. Valencia, on a river of the same name. It is well built. The houses are good, and often handsome; the streets are generally level and spacious, and there are three good squares. The buildings most deserving of notice are the court-house, which is of three stories, affords accommodation for all the public offices, and has a prison behind it; and the parish church, which is a handsome and well-proportioned edifice, with a fine façade, two pillared portals, and a lofty tower. The chief manufactures are ordinary linens, and particularly hempen shoes, which are made to a large amount. The trade is in hemp, corn, and fruit grown in the district, and exchanged for colonial produce and other articles of general consumption. A considerable number of the inhabitants find lucrative employment as muleteers. Pop. 4488.

CHELVESTON, par. Eng. Northampton; 1730 ac. Pop. 372.

CHELVEY, par. Eng. Somerset; 320 ac . Pop. 54.
CHELWOOD, par. Eng. Somerset; 1130 ac. Pop. 260.
CHEMILLE, a tn. France, dep. Maine-et-Loire, 12 m . E. Beaupreau, on the Ionne. It manufactures calicoes, handkerchiefs, and cotton yarn, and has bleaching grounds and paper-works. A large cattle market is held here every Thursday. Pop. 1827.

CHEMNITK, a tn. Saxony, circle, Zwickau, cap. dist. of same name, in a beautiful and well watered valley, on the banks of the Chemnitz, at is junction with the Kappel, 39 m . S.W. Iresden. It was formerly fortified, but its walls have been pulled down, and thcir site converted into a pleasant promenade connecting the old town with the suburbs. It has some handsome streets and squares, five Protestant, and one R. Catholic church, a lyceum, school of design, a cloth hall, and townhall, \&c., with several associations for the promotion of the arts and sciences, and the encouragement of industry.

Vul. I.

It is the seat of a tribunal of justice, and of the district Government. Chemnitz is the principal manufacturing town of Saxony. The cotton goods, especially stockings, for which it is chiefly celebrated, and to which it owes its present prosperity, rival even the English in quality and cheapness. The American market is largely supplicd with the cotton hosicry, mitts, \&c., of Chemnitz. One manufactory alone, has 18,600 spindles. But the stocking weavers for the most part work in their own cottages. The imports of cotton for the use of the manufacturers, in 1842, was 100,000 cwt.; of English yarns, $15,000 \mathrm{cwt}$; of woollen yarn, 3000 cwt ; of dyed cotton yarns, 6000 cwt ; and of dyeing and colouring materials for the extensive dyeworks of the town, 18,000 ewt. About 100,000 pieces of cotton are manufactured ycarly, and upwards of a million pairs of stockings, gloves, \&c. There are here, also, seven machine manufactures, which consume annually 1250 tons of iron. There are, besides, manufactories of woollen stuffs and linen, and of a beautiful description of shawls done in fast colours, also weaving, with wool, cotton, and silks, on jacquard looms, of which there are about 3000 . The weavers of Chemnitz cultivate in their own gardens the potatoes and other vegetables which form their usual, and principal food. The state provides them with gratuitous instruction. Chemnitz was for 400 years a Free Imperial city, and still displays in its buildings marks of its antiquity. In 1539, the Reformation was introduced here by Henry the Devout, and towards the latter end of the 17 th century, cotton weaving was established. In 1739, there were upwards of 2000 looms, which supplied all the cotton fabrics at that period used in Germany. In 1765, Chemnitz became the centre of the stocking manufactures, carried on in the villages in the neighbourhood. In 1770, Schliissel of Hamburg introduced the art of cloth printing. English quilt weaving was introduced in 1775, and English hand-spinning machines in 1790 , and the spinning machines of Arkwright in 1799. Chemnitz is the birthplace of Puffendorf. A railway from Riesa to Zwickau, which will pass through the town, is now (1851) in progress, and partly finished. Pop. 25,000, of which about 500 are R. Catholics. - (Convers. Lex.; Handel's Lex.)

CHENANGO, a river, U. States, rising in New York, and after a S. course of 75 m ., falling into the Susquebanna, at Binghampton on the borders of Pennsylvania.

CHENAUB, or Chenab, a river, Punjab, which has its source in the Himalaya Mountains, in a small lake; lat. $32^{\circ} 46^{\prime}$ N.; lon. $77^{\circ} 27^{\prime}$ E., whence it flows S.W. to Goorha, thence N. W. between the Himalaya, and to Santch Mountains, to near Kishtawar ; lat. $33^{\circ} 20^{\prime} \mathrm{N}$.; lon. $75^{\circ} 57^{\prime}$ E., whence it flows S.W. and is joined by the Jailum in lat. $31^{\circ} 10^{\prime} \mathrm{N}$. ; lon. $72^{\circ} 18^{\prime}$ E., and by the Ravee, lat. $30^{\circ} 35^{\prime} \mathrm{N} . ; \operatorname{lon} .72^{\circ} \mathrm{E}$. After a course of about 145 m . to 150 m . from this point, it falls into the Indus, near Mittunkote ; lat. $28^{\circ} 55^{\prime} \mathrm{N} . ;$ lon. $70^{\circ} 32^{\prime}$ E. At Vazeerabad, 65 m . N. Lahore, and upwards of 350 m . from its junction with the Indus, it is about $1 \frac{1}{2} \mathrm{~m}$. in breadth in the wet season, 14 ft . deep, and with a current running at the rate of about 5 m . an hour. In the dry season its breadth at this point is reduced to about 300 yards. It is believed to be the Acesines of Alexander.

CHENEE, a vil. and com. Belgium, prov. of, and 8 m . S.W. Liege, at the confluence of the Ourte and Vesdre, which a little below forms a magnificent cascade. It has several forges, at which saws, and tools, and most of the anvils used in Belgium are made, numerous nailworks, glassworks, two distilleries, and three mills. Pop. 1925.

CHENES-Thonesc, a vil. and par. Switzerland, can. of, and 2 m. E. Geneva, in a well cultivated district covered with handsome villas, and long the residence of Sismondi, the author of the Italian Republics and other esteemed works. On a hill in the neighbourhood, is the fine château of Landsits, commanding a splendid view. Pop. 2076.

CHENIES, or Islehampsted Cheyneys, par. Eng. Bucks; 2290 ac. Pop. 625.

CHENIT (Le), or Chenz, a vil. and par. Switzerland, can. Vaud, S.W. end of Lake Joux, 20 m . W. by N. Lausanne. Pop. 2715.

CHENOUCEAUX (Castle of). See Blere.
CHEPSTOW, a seaport tn. and par. England, co. Monmouth. The rown lies $12 \mathrm{~m} . \mathrm{S}$. by E. Monmouth, and 14 m . N. by W. Bristol, r. bank, Wye, here crossed by an elegant bridge, and has a station on the South Wales Railway. The
town stands on a hill gradually ascending from the river, and has a cheerful appearance, while the views from several points around are exceedingly beautiful. Streets spacious, well paved, and well lighted, but indifferently supplied with water. The church is a fine specimen of the early pointed style. There are, besides, places of worship for various religious sects, including a R. Catholic chapel. Chepstow has an endowed charity school, a national school, two hospitals, and a number of minor charities. The interesting and extensive ruins of its ancient castle, which dates from the 11 th century, cover a large space of ground on the summit of a lofty cliff overhanging the Wye. Henry Martyn, one of the judges of Charles I., died in this castle, after being confined in it for 30 years. The Wye is navigable to Chepstow, which is only about $2 \frac{1}{2} \mathrm{~m}$. from the Severn; the tide flows up the river with dangerous rapidity, and rises 40 and 50 ft . in ordinary spring tides, and between 50 and 60 at high springs; large ships are thus enabled to reach the town, while lighter vessels of 30 tons or so ascend as far as Hercford, fully 30 m . ligher up, taking the windings of the river. The town has no manufactures but enjoys a considerable foreign trade, importing wines from Oporto, and deals, hemp, flax, and pitch, from Norway and Russia. Its exports are chicfly bark, iron, cider, coal, and millstones. It sends also large quantities of timber to Plymouth, Portsmouth, and Deptford, and a great dcal of grain to Bristol. Shipbuilding is carried on here to a considerable extent, and several thousand tons of shipping belong to the port. Area of par. 1020 ac. Pop. 3366.

CHER, an inland den. France, having, N. Loiret, E. Nievre, S. Allier, and W. Indre and Loir-ct-Cher, between lat. $46^{\circ} 26^{\prime}$ and $47^{\circ} 38^{\prime}$ N., and lon. $1^{\circ} 50^{\prime}$ and $3^{\circ} 3^{\prime}$ E., and formed of parts of Berry and Bourbonnais. It is named from the river Cher, which traverses it S.E. to N.W. Area, $1,758,008 \mathrm{ac}$., or $2747 \mathrm{sq} . \mathrm{m}$. ; cap. Bourges. This department is included in the basin of the Loire, which forms the greater part of its E. boundary. The surface is in general flat, but is diversified in the N. by chains of inconsiderable hills. Soil various, but fertile in the neighbourhood of the Loire and Allier. Heath and sand prevail in the N. districts. The forests occupy akove a sixth of the area, and furnish large quantities of fuel for the iron works, and timber for shipbuilding. Pastures extensive, and sheep very numerous. More grain and wine are produced than the demands of the inhabitants require. Hemp and chestnuts are also largely cultivated. The best wines are those of Chanignol and Sancerre; and in ordinary years only the spoiled wine is distilled. Beet-root, buckwheat, flax, and hemp are also grown. Bees are reared to a considerable extent. The minerals consist of iron, lithographic stones, good building and grind stones, flint, marble, ocre, and potter's earth. The preparation and manufacture of iron, called Berry-iron, is the principal branch of industry. In 1839 , there were 25 smelting furnaces, and 42 refining furnaces, employing 689 workmen. The other manufactured articles are fine and common cloth, woollen goods, porcelain and earthenware, sacking, beet-sugar, nut-oil, paper, and glass. The dep. is divided into 3 arronds., 29 cans., and 291 coms. Pop. (1846), 294,540.

CHERASCO [anc. Clarascum], a tn. Sardinian States, div. of, and 22 m . N.E. Coni, near the confluence of the Stura and Tanaro. It was formerly strongly fortified, hut the works were demolished by the French in 1801. The town is well built, and watered by a canal dcrived from the Stura. It has seven churches, and several silk-spinning mills driven by water power. The town was taken and retaker by the French and Austrians in the wars of Italy, which terminated, in 1631, by a treaty of peace concluded here. The French took it, April 25, 1796; and on the 28th, the Sardinian commissioners concluded with Napoleon the 'Armistice of Cherasco,' by which the French troops obtained a free passage throughout the Sardinian dominions. Pop. 8500.

CHERATTE, a vil. and com. Belgium, prov. of, and 8 m . N.E. Liege. In its vicinity are numerous coal-pits. Pop. 2282.

CHERBOURG [anc. Coriallum], a principal naval seaport, France, dep. Manche, 196 m . W.N.W. Paris, S. side of the English Channel, nearly due S. to the W. end. of the Isle of Wight, at the mouth of the Divette, and the head of a bay formed E. by Cape Levi, and W. by Cape la Hague; lat. $49^{\circ} 38^{\prime} 34^{\prime \prime} \mathrm{N}$. ; lon. $1^{\circ} 37^{\prime} 16^{\prime \prime} \mathrm{W}$. (L.) The town lies in the
hollow of the valley of the Divette, which opens ont to the sea under the quartz lill of Roule. Apart from its consideration as a naval station, it is unimportant ; streets narrow and dirty, notwithstanding the number of publie fountains. The

covering them with solid blocks. This was continued to the time of Napoleon, who directed the formation of a fort on the centre of the digue. A mole was constructed, and a battery raised on it, mounting 20 guns. In 1808, a tremendous storm swept away all the buildings, and drowned 194 men. By this disaster, the operations of 16 years were nearly destroyed. A survey, made in 1828, showed that the foundations had shifted, in the course of 40 years, to a considerable distance from the position in which they had been first placed. Under Louis Philippe the work was carried on with great activity, and completed. The passage or entrance E. of the digue is 3280 ft . wide, and that to the $W .9873 \mathrm{ft}$. A fort and lighthouse occupy the centre of the digue, and there are also lighthouses at each entrance to the roadstead, and one at the entrance to the commereial port. The defences consist of the batteries of Fort Royal, of 100 guns, on the Islo Pelée, and Fort du Homeh on the W., with various other works, which render Cherbourg, if not impregnable from the sea,
public edifices are the arsenals, civil and marine hospitals, parish church, an old tower, which formed part of the ancient tortifications; Hotel de Ville, prison, baths, barracks, and the buildings connceted with the dock-yard. The port is divided into the commercial and naval ports, which are quite distinct. The commercial port consists of a harbour and a basin, 1338 lt. long and 416 ft . wide. The basin communicates with the harbour by dock gates, which prevent the reflux of the water. The channel from the harbour to the sea is 1968 ft . long and 164 ft . wide, lined by a granite quay with parapets. In this channel there is always $19 \frac{1}{2} \mathrm{ft}$. water. The port for ships of war (grand port) occupies a triangular space of ground, one side resting on the sea, and is surrounded by fortifications. The Fort Militaire, and Arsenal de la Marine, planned, but only partly begun by Louis XVI., have been more than 40 years in progress; and the new works, commenced in 1831, will take many years yet to complete. These consist of a port, 984 ft . long and 75 lft . wide, capable of containing 15 sail of the line, and accessible at all times of tide for vessels of the largest class; a floating basin, closed by lock gates; and a third basin, begun June, 1836, and now in progress. These basins have been excavated from the solid slate rock which forms the foundation of the entire yard, the two former to the depth of 56 ft . There are four slips for vessels of the largest dimensions, the roofs of which, $8 \overline{5} \mathrm{ft}$. high, rest on arches supported by piers of granite and slate. Adjoining these slips is a dry dock, and beyond are the smithy and workshops, with machinery for planing, turning, scooping, and cutting rods, beams, screws, \&c., of iron. The timber shed is 958 ft . long, supported on 130 stone pillars. A portion of the dockyard, called Chantereyne, has sheds for building frigates, and a rope walk, 546 yards long. The great work, however, for which Cherbourg is celebrated, is the digue or break-water, stretching across the roadstead, which, though protected on three sides by the land, was open to the heavy seas from the N. To secure a safe and strong harbour opiosite l'ortsmouth has long been a favourite object of the French, and no expense has been spared to accomplish that olject. The digue was commenced under Louis XVI., and has been continued ever since, with occasional interruption. It is $2 \frac{1}{4} \mathrm{~m}$. from the harbour, in water varying from 42 to 62 ft . deep. Its proportions, as compared with Plymouth break water, are-

> Bicak-water....... 41760 yd $\begin{aligned} & .262 \\ & .120\end{aligned}$ 30 ,"

The foundation was laid by sinking large caissoons of timber luaded with stones, but this phan did not succeed, and another scheme was resorted to, of forming a lank of small stones and at least very difficult of attack. On the land side it has hitherto been almost open, but the fortifications recently constructed are intended to render it more secure.

Cherbourg is a fortified place of the first class, and is the seat of a tribunal of first resort, maritime tribunal, and prefecture. It has a school of navigation, royal academical socicty, communal college, public library, and marine library; theatre, museum, and cabinet of natural history. Its principal industry is centered in the works of the dock-yard; the commercial trade and manufactures being comparatively insignificant. There are, however, chemical works, sugar and salt refineries, dye-works, tanneries, and stocking manufactories. A lace manufactory, conducted by four nuns, employs 350 females, the younger of whom are also educated. Large quantities of eggs are shipped for England, and mules and salt provisions for the W. Indics.

Cherbourg oceupies the site of a Roman station, and Aigrold, king of Denmark, resided in it about A.d. 945 . William the Conqueror founded an hospital in it, and built the castle church. The castle, in which IIenry II. frequently resided, was one of the strongholds of Normandy, and escaped the fate of the town, which, about 1295 , was pillaged by an English fleet from Yarmouth; but it sustained afterwards three memorable sieges in 1378,1418 , and 1450 . In 1748 , the town was taken by the English without opposition, notwithstanding that the garrison was large. They kept possession of it eight days, destroyed the fortifications, carried off the artillery and the bells, and only retired after having exacted a heavy ransom from the inhabitants. Pop. (1846), 22,460.

CHERCHIL, or Zerzailal, a scaport tn. Algeria, 55 m , W. Algiers. The manufacture of conmon pottery is carried on; and there is an active trade, though the harbour, which was formerly spacious and secure, has been materially injured by earthquakes. This is the Julia Cesarea of the Romans, on the site of which a town was erected by the Moors, who were expelled from Spain at the end of the 15 th century, and which was taken possession of by André Doria, in 1531. Pop. (1847), 2012, of whom 967 were Europeans.

CHEREl'OVETZ, or Tcherepovetz, a tn. European Rnssia, gov. of, and 250 m . E.N.E. Novgorod, r. bauk, Sheksna, near the confluence of the Yagorba. It has a cathedral, and four other chnrehes; and is the seat of three great annual fairs. Pop. (1842), 1649.

CHERH1LL, par. Eng. Wilts; 2370 ac. Pop. 422.
CHERIBON [properly, TJimbon], a prov., isl. Java, once a kingdom, cap. same name; having, N. the Java sea, W. prov. Krawang, S.W. and S. Preanger, and E. Tagal and Banjoemas. Among its lofty mountains is the remaik-
able volcano, Tjermai. The bread-fruit tree thrives along the coast, where, also, much salt is made. Cheribon has few wild animals, but a prodigious abundance of poultry, wild fowls, and sea and river fish. The population, notwithstanding the prevaleuce of fevers on the coast, is large, consisting of $1,350,000$ Javanese, and 200,000 Chinese, Arabs, Europeans, and half-castes. The produce reported in 1845 was-Paddy, $3,482,142 \mathrm{cwt}$.; coffee, $65,000,000 \mathrm{lbs} . ;$ sugar, 7,150,000 lbs.; indigo, 336,000 lbs.; tea, 10,000 lbs.; sacks of goonie, 70,000 pieces ; cinnamen, 1700 lbs . Cloves and cochineal are also raised. Potteries and cotton-weaving employ part of the people. -The town stands on the N. coast, half way between Batavia and Samarang, and 125 m . from each. The houses, except those of the Dutch resident and the Sultan, are of bamboo. The finest tomb in Java, that of Sjech Ibnoe Moolana, who brought Mahometanism with him from Arabia, A. D. 1406, and is now revered as a saint, stands close to the town.

CHERIKOV, or Tcherikov, a til. European Russia, gov. of, and 50 m . S.E. Mogliev, r. bank, Soj. It has two Greek Catholic churches, and a synagogue. It was founded in 1604 by Sigismund III., King of Poland. Charles XII. of Sweden, attempting to cross the river here in 1708, was repulsed by the Russians. Pop. (1851), 3163

CHERINGTON, two pars. England:-1, Gloucester; 1880 ac. Pop. 220.-2, Warwick; 890 ac. Pop. 340.

CHERITON, par. Wales, Glamorgan. Pop. 282.
CHERITON, several pars. Eng.:-1, Kent; 1790 ac. P. 1178.-2, Hants ; 980 ac. P. 556.-3, (-Bishop), Devon; 5150 ac. P. 848.-4, (North), Somerset; 1290 ac. P. 290.

CHERITON Fitzpaine, a par. and thriving vil. England, co. Devon. The village, 4 m. N.E. by N. Crediton, consists of one principal street, with several smaller ones, all kept remarkably clean. The places of worship are a large and handsome parish church, and an Independent chapel. There are some well-conducted seminaries, and several smaller schools; also, some almshouses, and other useful local charities; a tanyard, and flour-mill. Inhabitants, chiefly agricultural, are noted for their longevity. Area of par. 4770 ac . Pop 1156.

CHERKASK, or Tcherkask, a tn. Russia, country of the Don Cossacks, 37 m. E.N.E. Azov., r. bank, Don; on au isl. formed by that river, the Aksai, and one of its branches, called the Vasilievka. The streets are narrow and crooked; and the houses, which are of wood, are for the most part built on piles, raised 5 or 6 ft . above the ground, on account of the inundations to which the town is subject, from the beginning of April till the end of June. It has several public buildings, some of them of wood, including seven churches, an academy, several schools, a prison, and a townhall. It is the seat of a considerable commerce; and fishing is carried on to some extent. Its foundation is attributed to a colony of Greeks. Under the Russians it became the chief place of the government of the Don Cossacks, and such it continued till the seat of Government was removed to New Cherkask. Pop. 15,000.

CHERKASK (New), or Novoi Tcherkask, a tn. Russia, cap. country of the Don Cossacks, 40 m . N.E. Azov, and $11 \mathrm{~m} . \mathrm{N}$. Old Cherkask, on a hill, r. bank, Aksai. The streets are dirty, and neither paved nor lighted. The houses are chiefly of wood. Among the public buildings and institutions are the cathedral, a large hospital, an arsenal, and a gymnasium, where the Latin, French, and German languages with history, geography, mathematics, \&c., are taught. This town was fonnded in 1806, on the recommendation of the Hetman, Platoff. Pop. about 11,000.

CHEROKEES, a tribe of N. Ainerican Indians, occupying a territory W. of the States of Missouri and Arkansas, the possession of which has been guaranteed to them for ever by the U. States Government. They are governed by their own laws, and are extremely jealous of any encroachments on their privileges and liberties, for the protection of which they send, each year, two ambassadors to the Congress at Washington. The Cherokees are the most enlightened of the Indian tribes; they have been instructed in the pure doctrines of Christianity ; the arts of civilized life have made oonsiderable progress among them; and a native weekly newspaper is extensively circulated. They are in general engaged in agricultural pursuits. Their numbers were stated in a document laid before Congress, in 1844, to be 26,911 .

CHERRAPOONJEE, or Chirrapoonjee, a British station and vil. India, beyond the Brahmapootra, in the Cossai or Coosya hills, between 4000 and 5000 ft above the sea, and 20 m . N. Silhet. It is resorted to by invalids from Calcutta, from which it is distant 280 m ., N.N.E.

CHERRY-HINTON, par. Eng. Cambridge ; 2043 ac. Pop. 654.

CHERSO, an isl. Adriatie, belonging to Austria, Illyria, separated from Istria by the Gulf of Quarnero, between lat. $44^{\circ} 37^{\prime}$ and $45^{\circ} 10^{\prime}$ N., and lon. $14^{\circ} 16^{\prime}$ and $14^{\circ} 26^{\prime}$ E.; length, about $40 \mathrm{~m} . \mathrm{N}$. to S .; breadth, 2 to 7 m . It is mountainous and stoney, with some fertile spots, which produce olives, figs, wine, grain, \&c. A few sheep and horned cattle are reared, but the former are very indifferent. In the N . part of the island are extensive forests, from which timber for shipbuilding is obtained. Game is met with, and fish abound, especially the tunny and anchovy. The inhabitants are industrious, and manufacture coarse woollen cloth and liqueurs. Shipbuilding-confined, however, to a very small class of vessels for the coasting trade-is also carried on. In 1824, a bridge was thrown across the narrow channel between tho island of Cherso and that of Lossini.-TThe town of Cherso, cap. of the isl., is situate on the W. side, at the head of a bay nearly in the centre of the island. It is ill built and dirty, contains a cathedral and several other churches, a primary school, two convents, and a custom-house. There are four dockyards at the distance of about a quarter of a mile from the town. Pop. about 3500.-The only other town on the island is Osero, also on the W. side. It has a cathedral, with a handsome steeple, and was formerly the seat of a bishopric. It has some trade in timber. Pop. 1500.

CHERSON, a gov. and tn. Russia. See Kiferson.
CHERSONESUS [Greek, $\chi$ sppos or $\chi^{1 \text { gooos -'continent,' }}$ and vnoos-'island '], the anc. name given to several peninsulas and promontories, particularly Chersonesus T'aurica, tho modern Crimea, in the S . of Russia, between the Black Sea and the Sea of Azof; and the Chersonesus Thracia, the modern Hellespont, forming part of Turkish Gallipoli, and lying between the Gulf of Saros and the Strait of the Dardanelles.

CHERT, a tn . Spain, Valencia, prov. of, and $33 \mathrm{~m} . \mathrm{N}$. Castellon de la Plana, on the side of a hill, above l. bank, Vallivana. It is ill built, and has steep, uneven, ill-paved streets. It contains a parish church, court-house, prison, and boys' and girls' schools. There are a few manufactures of woollen, linen, and hempen cloth; and several flour-mills. Pop. 1718.

CHERTA, a tn. Spain, Catalona, prov. Tarragona, 8 m . from Tortosa, in a plain. It is well built, being formed of several spacious streets, and two public squares; contains a parish church, consistorial building, and prison, an hospital supported by voluntary contribution, and an endowed primary school; and has some manufactures of leather and numerous mills. The trade is chiefly in fruit and agricultural produce. Pop. 2433.

CHERTSEY, a tn. and par. England, co. Surrey. The Town, 20 m . S.W. London, on the South-western Railway, is pleasantly situate, r. bank, Thames, over which there is a handsome bridge, connecting it with the N. or Middlesex side of the river. The houses are mostly of brick, and in general well built. The church (St. Anne's) is a handsomo structure, with a square embattled tower, and contains a tablet to the memory of Charles James Fox, the well-known statesman, who resided for many years at St. Anne's Hill, close by the town. There are, besides, places of worship for Baptists, and Methodists. It has several alms-houses, and various minor charities, together with a school founded by Sir William Perkinz, in 1725, for clothing and educating 50 children -25 girls and 25 boys; the number is now greatly increased. The town contains a literary and scientific institution, two libraries, and a reading-room. There was formerly a monastery here, of the Benedictine order, in which Henry VI. was interred, and where his remains lay till removed to Windsor by Henry VII. The principal trade of the town is in malt, flour, bricks, and tiles, large quantities of the latter two being made here. Vegetables are extensively cultivated in the vicinity for the London market. Cowley the poet died here; his study is still preserved. Area of par. 10,020 ac. Pop. 5347.

CHESAPEAKE BAY, the deepest indentation on the E. coast, U. States, and wholly within the States of Virginia and Maryland. Its entrance (centre about lat. $36^{\circ} 35^{\prime} \mathrm{N}$.; lon. $75^{\circ} 45^{\prime}$ W.) between Cape Charles on the N., and Cape Henry on the S .; is about 20 m . in width. It is about 180 m . in length, the first 70 to 80 m . being from 25 to 30 m . broad, and the remainder from 10 to 15 m .; general depth about 9 fathoms. This spaeious bay has many eommodious harbours, and a safe and easy navigation for vessels of the greatest burden. It reecives the waters of the rivers Potomac, Susquehannah, Rappahannock, York, and James, all large and navigable, besides a number of smaller streams, draining together a surface estimated at $70,000 \mathrm{sq} . \mathrm{m}$. The Chesapeake and Delaware Canal, and the Dismal Swamp Canal, afford, in conneetion with Chesapeake Bay, an extensive inland navigation from N. to S .

CILESHAM, a tn. and par. England, co. Buckingham. The town is $26 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. London, pleasantly situate in a fertile valley, with some beautiful sylvan seenery in the vicinity, and a number of handsome country seats. It has a parish church, several dissenting places of worship, an alinshouse, and a Lancasterian sehool. The principal manufacture earried on is that of coarse wooden-ware, which, however, has much deelined. Shoe-making and straw-plaiting also employ a number of hands. There are several corn and paper mills in the vieinity. Area of par. 11,880 ae. Pop. (1841), 5593.

CHESHAM-Bors, par. Eng. Bucks; 810 ac. Pop. 218.
CHESHIRE, a maritime, co. England (cap. Chester), having, E. parts of the counties of Derby and Stafford, N. Lancashire, and the River Mersey; S. Shropshire, and part of Flintshire; W. Denbighshire, Flintshire, and the River Dee; and N.W. the Irish Sea. Extreme length E. to W., upwards of 50 m. ; extreme breadth, N . and S. about 35 m . Area, 673,280 statute aeres, of whieh 620,000 are arable, meadow, and pasture lands, including parks and pleasuregrounds. The surface is generally level, although there are a few inequalities, the most considerable of which are some hills on the $\mathbf{E}$. border of the county, and a ridge of about 18 m . in length, in the $W$. part of it. The soil is yenerally composed of clay, and sand, and although there are extensive tracts of moss and waste land, there are many distriets elothed in the richest and most luxuriant verdure, forming the finest pastures in England, the result of a mild and humid climate. The eheese of Cheshire, the principal produce of its numerous dairies, has been long in great request, not only in this country, but on the Continent and in America; London alone takes, it is said, 14,000 tons annually. Dairy husbandry is therefore a primary, and arable but a seeondary object in this eounty. The forests of Cheshire were in ancient times of great extent, but have gradually been disappear ing. Large quantities of fine timber, however, are now grown on the estates of the nobility and gentry. Coal, copper, lead, and cobalt, are amongst its mineral produets, but the principal is roek-salt, of which the supply is inexhaustible. The most extensive mines are in the vicinity of Northwich. From these about 60,000 tons are taken annually, most of which is exported for fish curing, \&c. A large quantity of white or common salt is also made from the brine springs in the neighbourhood of the rock-salt mines. Cheshire abounds with rivers, brooks, and large shcets of water called meres, many of whieh eontain fish. Its principal rivers are the Dee, the Mersey, and the Weaver, the first and second being boundary rivers-the one separating the county from Denbighshire, and Fintshire, the other from Lancashire. The Weaver, which falls into the Mersey, has been rendered navigable by locks for 20 m ., for vessels of 100 tons burthen. There are, besides, various canals, the principal of whieh is the Duke of Bridgewater's. The manufaetures of Cheshire are eonsiderable. At Stoekport, all the branches of the cotton trade are carried on extensively, and the silk-faetories of Macclesfield and Congleton are on a large scale. Hats are also manufactured in these towns in great quantities, and in others there are works for smelting copper and making brass. There are 790 parishes in Cheshire, exclusive of the city of

Chester. It sends altogether 10 members to the House of Commons. Pop. (1851), 455,725.

CHESHUNT, a vil. and par. England, co. Herts, $6 \frac{1}{2}$ m. S. by E. Hertford, near the London and Cambridge Railway. In a house atill shown in the village, liehard Cromwell, under the name of Clarke, spent his latter days, and died in 1712, at the advanced age of 80 years. Area of par. 8430 ac . Pop. 5402.

CHESILBORNE, par. Eng. Dorset; 1850 ac. Pop. 346.
CHESME, or TChisme [the fountains], a tn. Asiatic Turkey, pash. Anatolia, opposite isl. Scio, on the channel of that name, 45 m . W. Smyrna; lat. $38^{\circ} 18^{\prime} \mathrm{N}$. ; lon. $26^{\circ} 20^{\prime}$ E., pleasantly situate partly on the brink of a creek or inlet, and partly on the face of a slope, erowned by the ruins of an old Genoese castle. It contaius several mosques, small but neat publie baths, and numerous coffee-houses or sheds for lounging and smoking. The remains of a wall round the town are now only to be traced, but another Genoese castle, of small size, mueh dilapidated, situate on the shore of the ereek, nearly at the end of the town, retains its original form. Chesme owes it prosperity to the exportation of raisins exclusively, which are grown in great quantities in the neighbourhood, nearly all the fruit sold in Britain as Smyrna raisins being from this quarter. Pop. about 6000 or 7000 .

CHESSING'TON, par. Eng. Surrey; 1230 ae. Pop. 226.
CHESTE, a tn . Spain, prov. of, and 19 m . W. Valencia, in a plain. Its houses are regularly built, and it has four squares. It contains a tolerably handsome parish church, a court-house, two prisons, a boys and girls' sehool, both well endowed; and near the town a eemetery. It has manufactures of esparto, white soap, brieks, and tiles, besides a distillery of brandy, and several flour-mills. A number of the inhabitants are employed as muleteers. Pop. 3773.

CHESTER, a eity, seaport, and co. of itself, England, co. Chester, 34 m. S.W. Manchester, and 163 N.W. London; pieturesquely situate on a rocky height, r. bank, Dee, by whieh it is half encireled. It is surrounded by a wall, 5 or 6 ft . broad, evidently of Roman construction, the only entire specimen of aneient fortification in Great Britain. From this wall, which is used as a promenade by the citizens, extensive and beautiful views are obtained. The town consists of four principal streets, radiating from a centre, and a number of smaller streets crossing eaeh other at right angles; they are lighted with gas, and many of them have been reeently well paved and flagged. The town is tolerably well supplied with water from the Dee. The four principal streets have the peeuliarity of being sunk eonsiderably below the level of the lowest inhabited parts of the houses, and below the footways

Watergate street, chester, and exterior of the row. Yrom a sketch by J. \& Prout.
also, which are within piazzas, called 'the Rows,' in front of ranges of shops at some height above the street; tilus, while the carts and carriages are rolling along below, the footpassengers are moving on in safety above, on a pathway pro-
tected by a railing. Flights of steps, at convenient distances, connect the carriage-way with the Rows. There are shops, also, underneath 'the Rows,' on a level with the streets. Amongst the more remarkable modern public structures are
surmounted by a spire 156 ft . high, one of the most elegant in the N. of England. There are places of worship for Independents and Wesleyan Methodists, an endowed school, and a mechanics' institute. Ropes, nails, and tiles are manufactured to a small extent in the town. In the vicinity are corn and paper mills, and extensive collieries and iron-works. Area of par. $31,260 \mathrm{ac}$. Pop. (1841), 16,359.

CHESTERFIELD, a tn. England, co. Derly, on a rising ground, at the junction of the small rivers Hipper and Rother, on the Midland Railway, 20 m. N. Derby. There are two principal streets, the one an irregular line running nearly N. and S., and the other at right angles to it; houses in general, irregularly but substantially built; the old ones of brick, roofed with tiles; the more modern of stone (with which the country abounds), and covered with slates; lighted with gas, and amply supplied with water. The character of the place has for the last few years been undergoing a considerable change. The number of families with showy equipages has been falling off, while the middle and working classes have increased. The parish church, a Gothic building of a cathedral form, is chiefly remarkable for its crooked spire of wood, covered with lead. There are two other churches-Trinity churel, and New Brampton church, both Gothic, having square towers and lancet windows; and also two
the new bridge across the Dee, consisting of a single arch, of 200 ft . span; the linen-hall, erected by the Irish merchants in 1780 ; the exchange, in 1698 ; the union hall, and com-mercial-hall; the castle; the county-hall and jail, a fine Grecian structure; the training-college, of Tudor architecture, erected in 1842 ; and the railway station, in the Italian style, one of the largest in the kingdom. There are also some fine specimens of timber houses, but they are fast disappearing. The cathedral is a large old Gothic structure, in various styles of architecture, and contains many interesting memorials of former times. There are nine parish churches, and two others not parochial, with a number of chapels for various religious denominations. The benevolent institutions are numerous, including an infirmary, house of industry, alms-houses, and a great many charity schools. A new cemetery, on the banks of the Dee, and two public parks in the vicinity of the city, have been recently laid ont; and a spacious cattle-market has been lately erected. The principal manufactures of the place are paint, patent shot, and patent lead-pipes. Whips, tliread, tobacco, and gloves are also made to a small extent. Chester imports butter, provisions, hides, tallow, timber, iron, hemp, wine, oil, \&c. Its chief exports are cheese, lead, calamine, copper plates, cast-iron, and coals. Shipbuilding, formerly on the decline, from the filling up of the Dee, has now regained more than its ancient prosperity; and the trade of the port has in like manner been more than restored by the spirited improvements effected on the river. The gross amount of customs'duty received here, for 1847, was $£ 90,231$; and in $1848, £ 83,945$. Registered shipping belonging to the port, January 1, 1847, 117 vessels, of 11,805 tons. Society in Chester is superior to that in most provincial towns. Market-days, Wednesday and Saturday ; and many fairs throughout the year, including eight cheese-fairs, recently established, all of which, the city being in the heart of a great cheese-making district, are well attended. In spring and antumn, races take place on a fine level, called the Rood-eye, immediately beneath the walls. The city is governed by a mayor, ten aldermen, and 30 councillors. It returns two members to the House of Commons. Registered electors (1850), 2529. By railway, it is connected with Liverpool, Holyhead, Shrewsbury, and Crewe. Chester was a Roman station, called by them Deunana or Deva, probably from being half encircled by the Dee. Its British name was Caer Lleonvawr; and it was called by Saxons Legancester and Legecester. Pop. (1841), 23,115; (1851), 27,608.

CHESTER-le-Street, a vil. and par. England, co of, and 6 m. N. Durham, on the railway to Newcastle, in a valley W. of the river Wear. It consists of one street, abont 1 m . long, on the Roman military road between Durham and Newcastle. The church is a handsome stone edifice, with a tower

Independent chapels, one Wesleyan, one Primitive Methodist, and one Unitarian; the townhall, guildhall, and grammarschool, are respectable structures. Of several schools, the most important are the old grammar-school, endowed in 1594, in which 40 boys receive gratuitous instruction, and the Victoria school, in which 100 children are taught and clothed solely at the Vicar's expense. There are also several almshouses, a dispensary, savings-bank, mechanies' institution, and a literary and plilosophical society. Lace-making, silkthrowing, and the manufacture of ginglam are carried on to some extent, and afford employment to a good many of the inhabitants, as does also the manufacture of coarse carthenware. The malting trade is also of some importance. But the principal employment for the lower classes is derived from the iron-stone pits, coal mines, and smelting furnaces in the neighbourhood. Chesterfield gives the title of Earl to a branch of the Stanhope family, and Mrs. Radcliffe, the wellknown romance writer, was born in the town. Pop. 11,231. -(Local Correspondent.)

CHESTERF1ELD INLET, a gulf, British N. America, N.W. corner of Hudson's Bay, 245 m . long, E. to W., by about 15 m . average breadth. It contains numerous islands, and its upper part, called Baker's Lake, receives the waters of numerous lakes, by the rivers Cathawehaga and Doobaunk.

CHESTERFORD-1, (Great), a vil. and par. England, co. Essex, the former situate on the borders of Cambridgeshire, on the banks of the Granta, 26 m. N.W. Chelmsford. It has a fine old church, an endowed school, and a station on the Eastern Counties Railway. A horse fair is held July 5. Numerons Roman remains have been discovered in the neighbourhood. Area of par. 3,080 ac. Pop. 917.-2, (Little), par. Eng. Essex; 1260 ac. Pop. 229.

CHESTERTON, four pars. England :-1, Cambridge; 3080 ac. P. 1617.-2, Huntingdon; 1440 ac. P. 129.3, Ox ford; 2850 ac. P. 393-4, Warwick; 2960 ac. P. 192.

CHESWARDINE, a par. England, co. Salop; 6070 ac. Pop. 1015.

CHETIMACHES, a lake, U. States, Louisiana, formed by some of the branches of the Mississippi. It is a shallow swamp, 40 m . long, and from 1 to 6 m . broad, traversed by the Atchafalaya near its mouth. It is surrounded by a flat marshy country, which is annually overflowed.

CHETTLE, par. Eng. Dorset; 1510 ac. Pop. 122.
CHETTON, par. Eng. Salop; 7140 ac. Pop. 693.
CHETWA, a tn. Hindoostan, Malabar coast ; lat. $10^{\circ} 28^{\prime}$ N.; lon. $76^{\circ} 5^{\prime}$ E.; 55 m . S. by E. Calicut, on an island, 27 m . long by about 5 m . broad, separated from the mainland by a navigable inlet. Soil of the island in general poor. CHETWODE, par. Eng. Bucks; 1200 ac. Pop. 197. CHETWYND, par. Eng. Salop; 3330 ac. Pop. 740.

## CHIAVENNA

CHEVELEY, par. Eng. Cambridge; 2489 ac. Pop. 645. CIIEVENING, par. Eng. Kent; 3550 ac. Pop. 1003. CHEVERELL, two pars. Eng. Wilts:-1, (Great), 1840 ac. Pop. 557.-2, (Little), 1930 ac. Pop. 295. CHEVINGTON, par. Eng. Suffolk; 2240 ae. Pop. 624. CHEVIOT FELLS, a mountain range, S. Africa, Cape Colony, extending E. to W. in co. Somerset, between the Groen Bergen on the W. and the IIyndhope Fells on the E., about lat. $32^{\circ} 30^{\prime} \mathrm{S}$. 'The head waters of the Baviaans deseend from its S., and those of the Tarka from its N. side.

CHEVIOT IIILLA, a range of hills which divide co. Loxburgh, Seotland, from co. Northumberland, England, and are thus situate on the confines of the two countries. They oxtend from a point nearly opposite, and about $2 \frac{1}{2} \mathrm{~m}$. E. Yetholm, S.W. to another point nearly opposite to, and about the same distance E. Castleton, their whole length being upwarls of 35 m . The highest summit, called distinctively the Cheviot, is 2356 ft . high, and is in Northumberland; the other greatest elevations are from about 1600 to 2000 ft ., whieh is the height of Carter Fell. The hills are in general smooth, slope rapidly, and are covered for the most part with a close green sward. The well known and much esteemed breed of sheep, ealled Cheviots, are bred on these hills.

CIIEVREUSE, a tn. and com. France, dep. Seine-etOise, 11 m. E.N.E. Rambouillet, on the Ivette; formerly a place of importance, and hall one of the strongest castles in the province, besides giving its name to a Dukedom. It has shawl manufactories, tanneries, and tawing works; and woolwashing is carricd on. Pop. 1730.

CHEW-MAGNA, a vil. and par. England, co. Somerset, the former pleasantly situate on rising gromnd, l. bank, Chew, 6 m. S. Bristol. It has a spacious chureh, containing some interesting monuments; and places of worship for Baptists, Wesleyans, and the Society of Friends. A portion of the inhabitants are employed in coal-mines, and others are emphoyed in the manufacture of stockings. In the parish are some handsome conntry seats, an old cireular camp, and a well of reputed efficacy in the cure of diseases of the eye. Area of par. 4490 ac. Pop. 2096.

CHEVV-s'loKE, par. Eng. Somerset; 1910 ac. P. 825.
CIIEW'TON-MENDIP, a vil. and par. Eng., co. Somerset, the former situate amongst the Mendip hills, $5 \frac{1}{3} \mathrm{~m}$. N.N.E. Wells. It contains a handsome church, and a Wesleyan chapel. The inhabitants are chiefly employed in the mines, and governed by laws peeuliar to themselves. Earl Wahlegrave derives the inferior title of Viscount from Chewton. Area of par. 7020 ac. Pop. 1216.

CIIANA [anc. Clanis], a river and valley, Italy, in Tuscany and the Papal States. The river formerly flowed into the Paglia at Orvieto, after a course of about 56 m . through a swampy and unhealthy valley. About the middle of the 12 th century, the stagnant waters of this river took their course towards the Arno; but, in consequence of im. portant works becrun in 1551 , and completed only in 1823 , the valley of the Chiana was drained, and the course of the river divided into two portions or distinet streams by a wall of partition, formed at Callone de Chiusi, $3{ }_{4}^{3} \mathrm{~m}$. S. E. Chiusi, at the boundary between Tuscany and the Papal States. The first, or Pontifical Chiana, comprises the lower part of ancient Chiana, and cuters the Paglia by the l. bank at Orvieto, after a course of 31 m ; it is navigable during winter. The seeond, or Tusean Chiana, forms the navigable canal of Maestro della Chiana, which begins above the Lake of Chiusi, and enters the Arno by the I. bank, $7 \frac{1}{2} \mathrm{~m}$. N.W. Arezzo, after a cuurse of about 37 m . It forms the two small lakes of Chiusi and Montepuleiano. The draining of the valley of Chiana lias bronght into cultivation about $36 \mathrm{sq} . \mathrm{m}$. of the most fertile ground in Tuscany.

CIIIANCIANO, a tn. and com. Tuseany, 8 m . W.N.W. Chinsi, in the valley of Chiana. It oceupies the lower slopes of a spur of Mount Maddnlona, and coutains a handsome collegiate church, with mumerous ancient inseriptions. In the neishbourhood are quarries of fine marble, and mineral springs. Pop. 2050.

CIIIANTI, that part of Tuscany which lies between the sources of the Arbia, Ambra, and Ombroue, forming part of the watershed between their basins and that of the Arno. About the 11 th century it was eompletely covered with
foreste, and abounded with game. The greater part of it is now covered with vineyards, which supply the most esteemed wines of Tuscany.

CHIANTLA, a river and tn. Central America, Guatimala, prov. Totonicapa. The miver rises in the voleanic chain which traverses the centre of Guatimala, and, after a N.W. course of 150 m ., joins the Usumasinta on the l. bank, in lat. $17^{\circ} 10^{\prime} \mathrm{N} . ;$ lon. $91^{\circ} 55^{\prime} \mathrm{W}$.——The town lies on the r. bank of the river, $123 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Guatimala.

CIII APA.-1, A state, Mexican Confederation; bounded, N. and N.W. by Tabaseo, W. by Oaxaca, S. by Soconuseo, and E. by Guatimala, between lat. $15^{\circ}$ and $17^{\circ} 45^{\prime}$ N., and lon. $91^{\circ} 18^{\prime}$ and $94^{\circ} 12^{\prime}$ W.; area, $33,500 \mathrm{~s} 1 . \mathrm{m}$. It is in many parts mountainous, and covered with immense forests; and it is intersected by several considerable rivers. In the valleys the elimate is warm and moist, and the soil fertile. Maize, sugar, cacoa, cotton, and cochineal, and logwood, which is the principal export, are proluced in abundance; the horses are highly valued. In a dense forest, at the N.E. extremity of Chiapa, are some curious ruins, apparently of a large city, extending for more than 20 m . along the summit of a ridge. This state formerly belonged to Guatimala, but, in 1825 , it joined the Confederation of the Mexican States. Pop. (1837), estimated at $92,000-2$, A tn. in above prov., $32 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Ciudad Real, r. bank, Grijalva; the most commercial and most populous city of the State. Its principal trade is in sugar and logwood. Pop. 15,000.

CIIARAMONTE [ane. Claromons], a tn. Sicily, prov. of, and 32 m . W. by S. Syracuse, on a hill. It is regnlarly built, and lias good strects. The environs produce wine of good quality. Pop. 8000.

CHIARAVALLE, a tn. Naples, prov. Calabria Ultra II., 17 m. S.S.W. Catanzaro, at the foot of a hill, surronnded by a fertile district. It suffered considerably from the earthquake of 1783 . l'op. 3107.

CHIARI [Latin, Clarium], a tn. Austrim Italy, gov. Milan, 14 m . W. Brescia, and 6 m . E. the river Oglio. It is well built, has several ehurehes, two convents, an elementary school, an hospital, and a publie library. It was formerly fortified, and some of its ancient defences still exist. It lias manufactures of silk, linen, and cotton, and some tannerics. Pop. 8000 .

CHIAROMON'TE, a tn. Naples, prov. Basilicata, on a mountain 40 m. S.E. Potenza. It contains two churches, a convent, and a seminary. Silk, and wine of good quality, are produced in the neighbourhood. Pop. 2948.

CHIAVARI [Latin, Claverium], a maritime tn. Sardinian States, division of, and 23 m . E. by S. Genoa, cap. prov. Chiavari, on the Gulf of Rapallo, at the mouth of the Sturla. It is one of the most considerable places of the ancient Genoese territory, and has quite the aspect of an old Italian town. Many of the houses are well and substantially built, with open arcades, which skirt the narrow streets. It has several churehes, the prineipal of which is annexed to an ecelesiastical seminary, intended for 70 students. There is also an hospital, an agricultural society, several lace manufactorics, and some silk-mills. Large quantities of anchovies are caught here; and the surrounding district produces wine, olives, and silk. I'ope Innoeent IV, was a native of this town. Pop. 9828. -The province, in the division of Genoa, is between lat. $44^{\circ} 14^{\prime}$ and $44^{\circ} 36^{\prime} \mathrm{N}$. ; area, $155 \mathrm{sq} . \mathrm{m}$., of which about a fourth part is cultivated, a ninth uncultivated, a half in forests, and the remainder unproductive. It is mountainous, traversed in its N. parts by the Apennines; but it lias fertile valleys, yielding grain, legumes, grapes, and olive oil, in superabundance; ehestnuts are likewise plentiful. Horses, mules, and dranght oxen are reared in small numbers; also eattle, sheep, goats, swine, and silk-worms. The province is divided into 8 mandamentos, and 28 communes. Pop. 95,570.

CIIIAVENNA [Latin, Cluvenna], a tı. Austrian Italy, gov. Milan, 38 m . N.N.W. Bergamo, on the Mera, beantifully situate in a valley, and surrounded with groves of cypress and laurel trees. It has six churches, the former palace of the Republic of Grisons, and several charitable institutions; with mannfactures of silk, cotton, paper, and earthenwares, and some breweries. It enjoys also a considerable transit trade, being sitnated at the junction of two passes over the Alps, the road to the Splügen going through it. The seenery of tho neighbourhood is very fine. Pop. 3800.

## CHICLANA

CHiCA-Balapoor, or Chinabalaburam, a tn. Hindoostan, Mysore dominions, 38 m. N. by E. Bangalore. Sugarcandy and clayed sugar. of superior quality, are manufactured.

CHICAGO, a city, U. States, Illinois, S.W. shore of Lake Michigan, at the mouth of the Chicago river, which here forms an excellent natural harbour; lat. $41^{\circ} 52^{\prime} 20^{\prime \prime} \mathrm{N}$.; lon. $87^{\circ} 35^{\prime} \mathrm{W}$. It has several churehes and schools, is regularly laid out, and, being built of a pitchy stone, in which black and white are mingled, presents a singular appearance. Chicago is the largest and most commercial city in the state, and posscsses direct communication with the Atlantic by the lakes, and by railway and canal with the valley of the Mississippi and the eastern states of the Union. Its trade is in fish, timber, wool, \&c., and it is one of the chief grain ports of the world. In 1854, it shipped 12.902,320 buslels grain of all kinds, of which $1,860,636$ were wheat. Total imports (1854), $£ 6,000,000$; exports, $£ 5,000,000$. It was settled in 1831. Pop. (1840), 4853; (1850), 29,963; (1855), 75,000.

CHICAPA, a tn. Mexico, state Oaxaca, 25 m. N.W. Tehuantepec, on a river of same name Near it are silver mines, once important, but now neglected.

CHICHEN, or Chichen Itza, an ancient rained city, Yucatan, about $35 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Valladolid. The ruins are of the most magnificent description, and are eminently calculated to deepen the interest, not unassociated with awe, with which these mysterious remains of a former civilization and an unknown people are invested, and of which Yucatan is the great repository. Chichen, though in a better state of preservation than most of the other ruined cities in this territory, has a greater appearance of antiquity. A remarkable feature of many of these extraordinary structures is their utter unintelligibility, it being impossible to conjecture for what purposes they were intended. The most singular instance of this, which occurs at Chichen, is in the case of a series of small columns, the highest of which were only 6 ft ., so arranged as to form a spacious parallelogram, each row being three, four, and five deep, from the outside to the enclosed space within. These were considered by Mr. Stephens as at once the most remarkable and most incomprehensible remains he had met with. Adjoining the area formed by these pillars, there riscs
circuit, surrounds the city, and, being lined with lofty elms, gives it a singularly picturesque appearance. There are four principal streets, running in the direction of the cardinal points, having smaller streets at right angles, and a fine octagonal Gothic cross at their intersection. They are spacious, and nearly straight, have paved foot-paths, and are lighted with gas. The houses, of brick, and, for the most part, roofed with tiles, are in general handsome. Water is abundant. The principal buildings include the corn market, with fine Doric portico, built in 1832, about 260 ft . long, and 50 ft . wide ; the townhall, the last remains of an old priory, and the council-chamber, built in 1731. The cathedral, the most interesting object in the town, is an imposing structure, but, with exception of the spire, which is reckoned one of the most graceful in England, possessing no great architectural pretensions. It exhibits almost every variety of Gothic architecture, and contains many curious monuments, both ancient and modern; amongst the latter is one to the unfortunate poet Collins, who was born and died in the city. There are nine parish churches, and one extra parochial chapel, besides the cathedral chapel, attached to St. Mary's hospital. Most of these churches have a mean appearance. There are several dissenting chapels, for the most part small, and without any attraction ; schools numerous. The most important are the prebendal grammar-school, the Whitby charity, where boys are educated, clothed, and fed, and a portion of them supplied with pecuniary aid on leaving the school ; diocesan college, and college for training teachers. There is an excellent infirmary, besides almshouses, and St. Mary's hospital, for the support of 12 aged poor. The litcrary and philosophical society, lately amalgamated with the mechanics' institution, has an excellent library and museam. There is another extensive library, maintained by annual subseriptions, with a reading-room attached to it. Leather, parchment, and candles are manufactured to a very small extent; but the inhabitants, who are in a thriving condition, are chiefly employed in the shop trade. Chichester has a very extensive corn-market, and one of the largest cattle-markets in the kingdom. The latter is held every alternate Wednesday, when from 5000 to 8000 beasts are penned in the principal streets of the city. It returns two members to Parliament. Pop. (1841), 8084.- (Local Correspondent.)

CHICHIA, one of the Fejee or Viti isls., S. Pacific Ocean ; lat. (S.W. point) $17^{\circ} 48^{\prime} \mathrm{S}$.; lon. $179^{\circ} 18^{\prime} \mathrm{W}$. (r.) It is nearly circular, and is 3 m . in diameter, surrounded with a shore-reef, having no opening but for canoes. Several of its summits rise to a height of 300 ft . In some places it is thickly wooded. The soil is rich, and extremely productive, yielding everything in the greatest abundance. Extensive cocoanut groves clothe its low points. Pop. about 300 .

CHICHLEY, or Chicheley, par. Eng. Bucks; 1620 ac. Pop. 256.

CHICKERELL-West, par.Eng.Dorset; 1250 ac. P. 531.

CHICKLADE, par. Eng. Wilts; 1000 ac. Pop. 109.

CHICKNEY, par. Eng. Essex ; 680 ac. Pop. 59.

CHICLANA, a tn. Spain, Andalusía, prov. of, aud 12 m. S.E. Cadiz, in a plain between two hills, and on both sides of the
from the same plain on which they are ranged, a lofty pyramidal mound, crowned with a ruined building, called the Castillo, represented in the accompanying wood-cut. The mound measures at the base, on the N. and S. sides, about 196 ft ., and on the $\mathbf{E}$. and $\mathbf{W} .202 \mathrm{ft}$. It is built up, apparently solid, from the plain to the leight of 75 ft . The platform on the top of the mound measures 61 ft . from N. to S ., and 64 ft. from E. to W. ; and the building measures, in the same directions, 43 and 49 ft . respectively.-(Stephen's Yucatan.)

CHICHESTER, a city, England, cap. co. Sussex, on a gentle eminence, nearly surrounded by the Lavant, about 55 m . S.W. London, on the railway from Brighton to Portsmouth. An old wall, still in good preservation, of about $1 \frac{1}{2} \mathrm{~m}$. in

Lirio. It is well built, and has a very cheerful appearance, the houses bejing all built of a hewn stone, white as snow, and surrounded by gardens, which have wooden or iron railings, painted of different colours. Many of the streets, however, though spacious, are badly paved. The principal buildings are the hospital or Casa di Misericordia, situated near the centre of the town, a magnificent building, with an extensive garden and orchard, forming a very complete establishment, both for the relief of the aged, and the maintenance and education of vagrant and abandoned youth; another hospital for infirm persons of both sexes, two parish churches, a well decorated theatre, capable of containing 1000 persons; a consistorial building, now used as a prison; an old Augustine monastery, now used for the courts and public offices; and an

Augustine nunnery. The manufactures consist chiefly of linen, esparto fabrics, earthenware, starch, and brandy. The trade is in corn sent into the interior, wine exported partly to Ameriea, and fruits and garden stuffs for Cadiz. The annual fair is very numerously attended, but agricultural produce is the chief article sold at it. One of the principal attractions of Chiclana is its baths, whieh are much frequented, particularly by the inhabitants of Cadiz, to whom, indeed, most of the houses in the town belong. They have a temperature of $66^{\circ}$, are chiefly composed of common salt, lime, magnesia, soda, and sulphur, and are said to be very cfficaeious, particularly in eutaneous affections. Abont 1 m. S.W. Chiclana is Barossa, where the British, under Lord Lynedoch, March 5, 1811, defeated the French under Marshal Victor. P. 21,046.

CHICO, a river, Patagonia, supposed to rise in a lake in the interior. After a S.E. course, it falls into the estuary of Santa Cruz.

CHiCOANA, or Cmicuana, a tn. La Plata, prov. of, and 25 m. S. by W. Salta, r. bank, Quebrada del Toro, in a desert country. Pop. 2000.

CHICOBEA, the most N. of the Fejee isls., S. Pacific Ocean ; lat. $15^{\circ} 48^{\prime} \mathrm{S}$.; lon. $179^{\circ} 51^{\prime} \mathrm{W}$. (R.) It is of an oval shape, and is formed of two hummocks, of considerable elevation. It is 3 m . long S.E. and N.W., and $1 \frac{3}{4}$ wide, and is surrounded by a shore-reef, which has no openings, except for boats.

CHICOVA, a tn . in S.E. Africa, cap. of a territory of same name, r. bank, Zambesi ; lat. $16^{\circ} 30^{\prime}$ S.; lon. $32^{\circ} 15^{\prime}$ E.; 350 m . N.W. Quillimane. It was at one time celebrated for its silver mines.

CHICSOI, a river, Guatimala, forming the head stream of the Usumasinta. It rises in a mountain range about 40 m . N. the city of Guatimala, flows N.W., and, after receiving as aflluents the Pasion, San Pedro, and other minor streams, enters the Mexican state of Chiapa, where it assumes the name of Usumasinta. Total course to the Mexican frontier, exclusive of windings, 150 m .

CHIDDINGFOLD, par. Eng. Surrey; 5590 ac. P. 1135.
CHIDDINGLY, par. Eng. Sussex; 5200 ac . Pop. 930.
CHIDDINGSTONE, par. Eng. Kent; 3200 ac. P. 1405.
CHIDEOCK, par. Eng. Dorset; 2240 ac. Pop. 826.
CHIDHAM, par. Eng. Sussex; 1200 ac. Pop. 325.
CHIEM-See, or Bavarian Sea, a lake, in S.E. Bavaria, circle Isar, dist. Trostberg, 48 m . S.E. Munich; greatest length, E. to W., 10 m. ; greatest breadth, N. to S., 6 m. ; area, 56 geo. sq. m.; depth, about 480 ft . It is of an irregular shape, very much indented, and contains three pretty islands-Krautinsel, Herrenwörth, and Frauenwörth. Each of the last two had at one time a convent. The shores of the lake are generally marshy, but in the S. a range of hills runs inland, and forms a fine baek ground. From these the lake receives numerous streams, particularly the Prien and Achen. It discharges itself at its N. extremity by the Alz. Since 1845, a steam-boat has plied on the lake, and furnished easy means of viewing the fine scenery around it.

CHIENTI.-1,A river,Central Italy, Papal States, delegs. of Camerino and Macerata, rising in the E. slope of the A pennines, and after a course, chiefly E. by N., of more than 40 m . direct distance, falling into the Adriatic 25 m. S.S.E. Ancona.-2, A tn. Naples, prov. Capitanata, 33 m . N.W. Foggia. Pop. 1680.

CHIERI [anc. Carea Polentia], a tn. Sardinian States, prov. of, and 8 m . E.S.E. Turin, on the slope of a hill. It is surrounded by walls, and is tolerably well built; has four public squares, several convents, and the largest Gothic building in Piedmont, the church of Santa Maria della Scala, founded in 1406, annexed to which is a very ancient haptistry. The Dominican church was built in 1210. ,Chieri is one of the most ancient manufacturing towns in Europe. Its manufactories of fustians and cotton stuffs were established in 1422; upwards of 100,000 pieces were annually made towards the middle of the same century, and they still continue to flourish. It has also silk, cotton, and linen-thread factories. Pop. 12,000.

CHIERS [anc. Chares], a river almost wholly in France, but rising in the duchy of Luxemburg, about 5 m . beyond the French fronticr. It enters department Moselle near Longwy, and proceeding W. by a circuitous course, reaches Montmedy, department Meuse, proceeds N.N.W., joining r. bank, Meuse,
Vol. I.
about 4 m . above Sedan ; whole course, 55 m ., of which abou: 15 m . are navigable.

CHIESE, or Clisio, a river, Austrian Italy, which rises in a branch of the Rhaetian Alps, S. slope of Mount Adametto, about 20 m . W. Trent, proceeds S. and then S.E., enters the valley of Sabbio, and forms Lake Idro. Issuing thence at Pieve, it proceeds S.S.E. till its junction with the Oglio, a little to E. of Cannetto, whence it flows S.E. and falls into the Po; lat. $45^{\circ} 2^{\prime} \mathrm{N}$. ; lon. $10^{\circ} 48^{\prime}$ E.: whole course about 60 m . It only becomes navigable near its mouth.

CHIETE [anc. Teate Marrucinorum], a tn. Naples, cap. prov. Abruzzo Citra, on a hill, near r. bank, Pescara, 102 m. N. Naples. It is well built, and adorned with some handsome public edifices; contains a cathedral, four other churches, two nunneries, several monastic establishments, an extensive seminary, a royal lyceum, society of arts, agriculture, and commerce, a large hospital, several charitable institutions; a mont-de-piété, theatre, and several manufactories for cloth and other fabrics; and has some trade in cloth, silk, wine, wheat, and oil. It is the seat of an archbishopric, a high court of justiciary, and a civil court. The ancient Teate was the capital of the tribe of the Maruccini, and was one of the largest and most important cities in this part of Italy. It appears to have been possessed for some centuries by the Grceks, after which it passed successively into the hands of the Romans, Goths, Lombards, Franks, and Northmen. In 1802, it was taken by the French troops. Pop. 13,679.

CHIEVELEX, par. Eng. Berks; 9410 ac. Pop. 1936.
CHIEVRES [anc. Cervia], a tn. Belgium, prov. Hainaut, 12 m . N.W. Mons, on the IIunelle, near its junction with the Dendre. It contains an old Gothic castle, a chureh, remarkable for the number of its fine ancient monuments, with curious epitaphs; an hospital, townhouse, and numerous educational establishments. A great number of individuals are employed in spinning flax, and weaving; and there is a considerable export trade in grain, flour, oil, liqueurs, \&c. Chièvres has also brick and tile-works, breweries, salt-works, a tannery, a dye-work, several flour and oil-mills, a limestone quarry, and limekilns; a weekly market, and an important annual horse fair. Pop. 3055.

CHIGNAL, two pars. Eng. Essex :-1, (Smealy), 1050 ac . Pop. 94.-2, (St. James), 930 ac. Pop. 252.

CHIGNECTO, a bay and isthmus, Nova Scotia. The bay, which runs E.N.E., may be considered the N.E. arm of the Bay of Fundy; it is divided from the Mines Channel by the peninsula of which Cape Chignecto is the W. extremity. The width of the bay at its entrance, between Cape Chignecto and the opposite point on the coast of New Brunswick, is about 18 to 20 m . - The isthmus is the neek of land, about 8 m . wide, by which the peninsula of Nova Scotia is eonnected with the N. American continent, situate between bay Verte in Northumberland Strait, and Cumberland Basin at the N.E. extremity of the Bay of Fundy.

CHIGNOLO, a tn. Austrian Italy, gov. Venice, prov. of, and 16 m . E.S.E. Pavia. It is well built, and possesses a ehurch, townhall, and a handsome feudal palace. The neigh bourhood is fertile, and the inhabitants chiefly engaged in agricultural pursuits. A fair is held for cattle and grain in Angust. Pop. 3992.

CHIGWELL, a vil. and par England, co. Essex, the former agreeably situate $12 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. London, close to Epping Forcst, on the road to Ongar, 1. bank, Roding. It contains many good houses, and has an ancient church; also a grammar and free school, founded by Archbishop Harsnett in 1629, in the former of which Wm. Penn, the founder of Pennsylvania, was educated. An annual fair is held Sept. 30. About 1 m . distant is Chigwell Row, consisting of villas, and possessing extensive and beautiful views. Area of par., 5360 ac . Pop. 2059.

CHIHLE, prov. and gulf, China. See Pechelee.
CHIHUAHUA, a state, Mexican confederation, cap. same name, bounded, N. by Upper California, E. by the Bravo-delNorte and the desert of Bolson de Mapimi, and on ofther sides by Durango, Sonora, and Cinaloa; between lat. $27^{\circ}$ and $32^{\circ} 45^{\prime} \mathrm{N}$. ; lon. $103^{\circ} 50^{\prime}$ and $108^{\circ} 40^{\prime} \mathrm{W}$.; area, 107,584 sq. m. It is traversed by the sierra Madre and the sierra de Carcay; and its most important water courses are the Rio-del-
Norte, and the Conchos, one of its affluents. The soil is ex-
tremely sterile; but the country abounds in gold, silver, copper, iron, saltpetre, and other minerals. This state is greatly iufested by the Apache Indians, who inhabit the S. parts of Upper California and the banks of the Rio-del-Norte, and carry on a series of ceaseless hostilities against the Chihuahuans, preventing them even from working their valuable mines to any profitable extent. Game of various kinds abounds in the state; two species of bears are found in the mountains; and elks, and other deer of various kinds, are equally abundant on the sierras and in the plains. Hares, rabbits, wolves, with birds, reptiles, and insects of various kinds, are also common. Some little trade is carried on in the exportation of cacao and lead. Pop. 190,000.

CHIHUAHUA, a city, Mexican confederation, cap. of above state, on a small tributary of the Conchos, in the midst of a sterile plain, 310 m . N. by W. Durango ; lat. $28^{\circ} 50^{\prime} \mathrm{N}$. ; lon. $104^{\circ} 29^{\prime} 17^{\prime \prime} \mathrm{W}$. (L.) The houses are generally well built, and the streets regular. The cathedral is a large and rather imposing structure, of no particular style of architecture, but having a handsome façade, with statues of the 12 apostles. A little below the Plaza Mayor is the unfinished convent of San Francisco, begun by the Jesuits in 1767, prior to their expulsion from the country, and now converted into a state prison. The city is supplied with water by an aqueduct, supported by a number of stupendous arches, and communicating with the small river Chiluahua, whence it empties itself into a large stone cistern in the public square. The city is surrounded by silver mines, and contains many furnaces for smelting the ores. Here also is a mint, at which was coined, in 1846, of gold, $£ 22,400$; and of silver, $£ 102,200$. The people are described as being inhospitable to strangers, addicted to gambling, and of loose morals. The trade of the place is considerable. Chihualua was founded in 1691. Its population, according to Mr. Hardy, formerly amounted to 70,000 ; and its permanent inhabitants are nowestimated, by Mr. Ruxton, at from 8000 to 10,000 .

CHIKIRI, a river, Chinese empire, Manchooria, rising on the S. slope of the Stanavoi mountains, on the confines of Siberia, and after a course of about 450 m ., N.N. W. to S.S.E., falling into the Amoor, a little above Sagalin Oola. It is very rapid, and, at its confluence with the Amoor, is about $1 \frac{1}{2} \mathrm{~m}$. broad.

CHILA, a river, Peru, rising in the Andes, and after a W. course of about 105 m ., falling into the Pacific about 75 m . S.E. Arequipa.

CHILAPA, a tn . Mexican confederation, state of, and 155 m. S. Mexico, about 10 m . from the r . bank of the river of the same name; lat. $17^{\circ} \mathrm{N}$. ; lon. $99^{\circ} \mathrm{W}$. It has scveral manufactories of delft.- The river Chilapa rises in the N . part of the state La Puebla, near Tlascala, in about lat. $19^{\circ} 30^{\prime}$, and flowing S., divides that state, longitudinally, into two nearly equal parts, and falls into the N. Pacific Ocean near lake Ocuila, about lat. $16^{\circ} 25^{\prime} \mathrm{N}$. ; lon. $99^{\circ} 15^{\prime} \mathrm{W}$. Its whole course is about 220 m .

CHILAU, or Chilaw, a small tu. Ceylon, w. coast, 45 m . N. Colombo; lat. $7^{\circ} 48^{\prime}$ N.; lon. $79^{\circ} 40^{\circ}$ E.; on the l. bank of the stream of the same name.

CHILBOLTON, par. Eng. Hants; 2830 ac. Pop. 359.
CHILCA.- 1, A small tn . and port, Peru, 40 m . S.S.E. Lima, about lat. $12^{\circ} 29^{\prime}$ S. ; lon. $76^{\circ} 52^{\prime}$ W. The тown, which is about 8 to 10 m . N.E. the port, is a miserable place; but, from the numerous ruins scattered around, was evidently of some importance under the Government of the Incas. The inhabitants, who are Indians, and who have carefully avoided mingling with people of other races for upwards of 300 years, employ themselves in plaiting straw for lats, and cigar cases. The latter they make in a singularly beautiful style, with white and coloured straw, which they plait into various figures and patterns. Some of these cigar cases sell, it is said, for upwards of $£ 20$. The country in the immediate vicinity is utterly barren.-2, A small lake, Buenos Ayres, 42 m. S. Cape St. Antonio, close upon the coast.

CHILCOMBE, two pars. Eng.:-1, Dorset; 860 ac. Pop. 53-2, Hants; 2390 ac. Pop. 269.

CHILCOMPTON, a vil. and par. England, co. Somerset; the former, situate $5 \frac{3}{3} \mathrm{~m} . \mathrm{N}$. by E. Shepton Mallet, has a church and Wesleyan chapel. -The parish contains several beautiful villas, and abounds in pleasing scenery. Area of par. 1140 ac. Pop. (1841), 618.

CIIILD-Okeford, par. Eag. Dorset; 2100 ac. Pop. 648. CHILDERDITCH, par. Eng. Essex ; 900 ac. P. 247. CIILDERLEY, par. Eng. Cambridge; 1050 ac. P. 54. CIIILDREY, par. Eng. Berks; 2850 ac. Pop. 546.

CHILHAM, par. Eng. Kent; 4230 ac. Pop. 1165.
CHILI, or Chlle, an independent state, S. America, consisting of a long narrow strip of country on the W. shore of that continent, bordering on the Pacific Ocean, and extending from lat. $25^{\circ} 22^{\prime}$ to $43^{\circ} 30^{\prime} \mathrm{S}$.; and between lon. $70^{\circ}$ and $74^{\circ}$ W.; its entire length, from N. to $\mathrm{S} .$, being 1150 m. ; its breadth, varying from 130 m . at the broadest part, which is towards the S. extremity, to about 88 m . at the narrowest or N . end. It is bounded, N. by Bolivia, E. by Patagonia and the territory of La Plata, from which it is separated by the Andes; W . and S . by the Pacific Ocean. The country is generally billy, being crowded with ramifications from the Andes, which gradually diminish in height as they recede from the central ridge and approach the sea, forming elevated plateaux, often covered with timber and a rich vegetation, and between them deep valleys, some of them of considerable breadth, and many of them fertile, though numerous others are mere ravines. The richest and most luxuriant districts are in the S., where the scenery is pleasing and picturesque, especially the valley of Aconcagua, which varies from 1 to 6 m . in width, and is covered with farm houses and hamlets, surrounded by trees and vineyards. Proceeding N. towards Valparaiso, the hills legin to look bleak and naked, being thinly clad with a stunted brush wood. At Coquimbo even this brushwood disappears, its place being supplied by a scanty sprinkling of wiry grass. Further N. a scene of utter desolation presents itself, the hills and plains being covered with bare sand, and no trace of vegetation visible.
The mean elevation of the great chain of the Andes that runs alongst the E. limit of Chili, is from 13,000 to $14,000 \mathrm{ft}$. above sea level, but many of the peaks rise much higher. The loftiest summits are the peak of Aconcagua S. of $32^{\circ}$, the peak of Tupungato S. of $33^{\circ}$, the volcano Maypu or Peuquenes near $34^{\circ}$, the peak of Descabezado N. of $36^{\circ}$, and the voleano of Antuco N. of $37^{\circ}$. A remarkable feature of the Chilian Andes is their rising, in many instances, so abruptly from the plains on which they stand, that one foot may be placed on the latter, and another on the base of a mountain rising 6000 or 7000 ft . high. Several mountain-passes traverse the great range of the Chilian Cordillera. The most frequented is that of Aconcagua, whose bighest point is upwards of $12,000 \mathrm{ft}$. above the sea. Another is the pass of Portillo, upwards of $14,000 \mathrm{ft}$. There are, besides these, the pass del Planchon, the pass of Antuco, and others of less note. The portion of the Andes which forms the E. boundary of Chili, is thickly studded with volcanoes, some of them of the most formidable description. They are most numerous S. of $35^{\circ}$, where seven are found within a space not much exceeding 250 m. , and it is supposed that there are many still unknown, both in this and other regions of the Chilian Andes. Few of them, however, are in a state of activity, and hence the frequency, it is believed, of those tremendous convulsions that are continually spreading terror and dismay throughout the country. The last visitation of this kind, of a very memorable description, occurred on Nov. 19, 1822, when the towns of Valparaiso, Quillota, Casa Blanca, and Limachi were destroyed, and a number of their inhabitants buried in the ruins. The shock of this earthquake was felt at distances of 500 nm . from its centre, which was out at sea to the S. of Valparaiso. A line of coast, of 50 m . extent, was raised on this occasion nearly 3 ft. above its former level. On April 2, 1851, another severe earthquake visited Chili. Opposite the month of the Maypu river, it was felt 40 m . off at sea. About 200 honses in Valparaiso, including many of the principal public buildings, were rendered uninhabitable, or seriously injured; and a like calamity befell the capital, in which, the damage done was even still greater. The coast is bold and rocky, with deep water close in shore. The principal harbours are-Valdivia, Concepcion, Valparaiso, and Coquimbo. There are few rivers, and only three or four that have water all the year round. The largest rivers are the Biobio, the Copiapo, the Huasco,
and the Chuapa; the otbers are mere mountain streams, which, having their source in the Andes, have water only in the spring. The whole of Chili belongs to the basin of the Pacific, excepting the valley of Uspallata, in the latitude of Valparaiso, and formed by a bifurcation of the Andes, which sends its waters to the Atlantic.

Political Divisions. - Chili is divided into the following 12 provinces, and subdivided into 52 departments:-

| Proviscrs. | D ps. | $\underset{1843(?)}{\text { Pop }^{\text {Po }}}$ | Chief Towns. | ${ }^{\text {A pprcx }}$ pop. |
| :---: | :---: | :---: | :---: | :---: |

| Total. | 52 | 1,2C9,000 | Area 170,000 to 175,000 | sq. m |

Climate.-The climate of Chili is one of the healthiest in the world, but the temperature near the sea-coast is less subject to variations than in the interior. The months of January and February are the hottest in the year, the thermometer frequently rising then to $90^{\circ}$ and $95^{\circ}$ Fah. in the shade; but after sun-set, the air is cooled by a refreshing breeze, which continucs during the night. Rains fall only in the winter months, J une to September ; and after they have occurred, the whole country, throughout the more favoured regions, is decked with flowers. The rains often last several days, and are so excessively heavy, as to occasion a general suspension of all active operation; public offices are closed, shops and warchouses shut, and the streets descrted. In the interior parts of the Cordillera snow falls at intervals during the winter, and from June to November the more lofty ranges of hills, E. of Santiago, are covered with it. It, however, generally disappears before December, although extensive patches may be met with in the deep gorges at more advanced periods of the year. In the central parts of Chili, storms of hail, thunder, and lightning are frequent in the winter season.

Minerals.-Gold, silver, copper, lead, and iron are found in Chili; the last two, though abounding, are little sought after. Gold and silver are not considered much more profitable objects of pursuit, the expense of obtaining them often exceeding the value of the quantity obtained. Copper is the staple commodity of the country; there being, according to Capt. Hall, 50 mines of coprer tor one of gold, and 15 for one of silver. The copper nunes ane most numerous in the N. districts; that of Copiapo is the most valued. A bout 60,000 quintals of copper are exported from Huasco, Coquimbo, and Valparaiso annually; and from 150,000 to 200,000 quintals, of 100 lbs ., of copper ores are shipped annually to England, and 100,000 merks, of 8 oz ., of silver in bars. A large quintity of the copper goes to the E. Indies and the U. States. Zinc, antimony, manganese, arsenic, tin, sulphur, alum, salt, and nitre are plentiful. Coal has been found near Concepcion, and is now wrought there.

Vegetable Products, Agriculture, dic.-Though possessing many fertile tracts, the greater portion of Chili is unsusceptible of cultivation, being naked and mountainous, especially towards the N . The S. provinces present a different appearance. Here a profuse vcgetation prevails, dense forests are spread over the land, and the sides of the Andes are covered with herbaccous plants and flowers of the richest and most beautiful hues. Laurels, myrtles, cypresses, and other evergreens, attain here a gigantic size, their timber being available for various purposes. Hard woods, of different descriptions, also abound. 'The lands of Chili,' says Mr. Miers, 'may be divided into two classes-those adapted for cultivation, and those in which cattle may be reared. No one must imagine,' he adds, "that any of the modes of farming which have been carried to such perfection in Europe have been adopted in Chili. We must remove from our minds all ideas of rich level meadows, fine grass pastures, enclosures, farm-houses, sheds, barns, markets, \&c., and bring back our notions to a more pristina conditiou, and fancg the country in a wild and
natural state.' Fences or inclosnres are almost unknown, the boundaries of estates being marked by rivers or ridges of mountains. The surface of a cattle-farm generally consists of a series of heights, and of deep hollows and ravines, the first being studded with bushes, the intervals between which are covered with little flowers, herbaceous plants, and tuberose roots, which, after the first rains, produce a pleasing verdure, and afford a tolerable sustenance to the cattle. This show of verdure, however, lasts only for five months, or from May to October. In November the whole tract begins to assume a burnt-up appearance, and from December to May the country presents an aspect of extreme barrenness. Thus, though great numbers of cattle are raised, particularly in the S. provinces, their supply of food is still inadequate, and the consequence is, that both the beef and mutton are very inferior, and the milk and wool equally indifferent. The implements of husbandry in use are of the most primitive description ; the plough consisting of part of the trunk of a tree, with a crooked branch for a handle, and having a pointed flat-plate of iron nailed to the forepart of the trunk, which is wedge-shaped, for a coulter and share. The yoke is fastened, not to the shoulders, but to the horns of the oxen; and for a harrow, a heap of bushes loaded with stones is employed. In the N. districts maize is cultivated, and in the S. wheat and barley; the former is the staple of the country, considerable quantitics of flour being exported to various places. Legumes are grown abundantly, especially different kinds of beans, quantities of which are also exported. Hemp is raised in the country N. of the Maypu, and is reckoned superior to that of Russia. Vegetables are not much cultivated, except near Santiago, the capital. In the N. districts, however, potatoes are grown in large quantities. Fruits are abundant in their season-apples, pears, apricots, nectarines, plums, peaches, cherries, firs, grapes, oranges, limes, water-melons, and gourds.
Animals.-Chili is remarkably free from the larger and fiercer animals, also from noxious insects and reptiles. The animals common to the continent, however, are found bere, including the guanaco, a species of the llama, the cougar or puma, the jaguar, monkeys, \&c., and the skurk, remarkable for the offensive odour it emits. Amongst the feathered race are the great condor, vultures, pelicans, parrots, and parroquets. On the coast, whales, dolphins, cods, pilchards, \&c. are canght. Black cattle, as elsewhere mentioned, are raised in great numbers; from 4000 to 20,000 being reared on one farm. The horses are strong, hardy, and capable of performing long journeys with very little sustenance. The mules and asses are also excellent. Sheep, goats, and hogs abound, but are of indifferent quality.

Manufactures, Commerce, \&c.-The principal manufactures of Chili are carthenware jars, of a superior description, hempen cloths, cordage, soap, copperwares, leather, brandy, tallow, and charcoal. The commerce of the country is increasing rapidly. The exports consist of copper, silver, wheat, hides, wool, and hemp. Thirty thousand hides are exported, principally from Valparaiso. Five to six hundred quintals of wool are shipped annually from Concepcion. The grain and country produce are generally sent to Peru and Ecuador. By far the greater part of the foreign trade is with Great Britain; from which the cotton goods imported in 1849,1850 , and 1851, were as follows :-

|  | Calicoes (plain). | Callcoes (printed). |
| :---: | :---: | :---: |
| Year. | Yus. | Y120 |
| $18+9$. | . 10,089,769. | 16,057,436 |
| 1850 | 9,994,091. | 11,068,418 |
| 1851. | 15,619,491. | 12,163,472 |

Woollen goods, hardware, iron, \&c., are also imported from Great Britain. In 1847, 1072 vessels, tonn. 262,625, entered the ports of Chili; and 1081, tonn. 265,515, cleared. The imports consist, principally, of linens from Germany; silks, paper, perfumery, leather, wines, and brandy from France; silks, nankeens, tea, sugar, \&c., from the E. Iudies and China; tobacco, spermaceti, candles, oil, sugar, and manufactured goods from the U. States; dyes, coffee, pearls, sugar, cacan, tobacco, cotton, rice, salts, and spirits from l'eru and Central America. From La Plata and Brazil, cotton, Paraguay tea, and European goods. The coins, weights, and measures are the same as those of Spain.

Government, Public Finances, \&.c.-Chili is a republic, and esteemed the best regulated in S. America. It is under a

## CHILICOTHE

President elected for five years, and a council of state, together forming the executive power. The legislature is composed of a senate, consisting of 20 members, elected for nine years; and a house of deputies, consisting of a member for each 20,000 inhabitants, elected for three years. Foreigners require 10 years' residence to obtain citizenship, if unmarried; six years, if married; three years, if married to Chileñas. The executive council consists of eight members. The revenue of the Government in 1852 amounted to $£ 1,096,096$; and the expenditure to $£ 987,460$. The international consolidated debt amounted in 1854 to $£ 326,760$, bearing interest of 3 per cent. The foreign debt, held wholly in England, amounts to $£ 4,420,800$.
The peace establishment of the army is 3000 men; eight companies of foot and lorse artillery, two regiments of cavalry, and three battalions of infantry. The navy consisted in 1854 of eight vessels, carrying a total of 98 guns.
R. Catholicism is the state religion, other sects being merely tolerated.
People, Customs, Education, \&ec.-The Chilians are mostly of Spanish and Indian descent. 'They are remarkable,' says Captain Wilkes, 'for their love of country, and attachment to their homes.' They are generally fond of agricultural pursuits, and the lower orders are better disposed towards foreigners than in most other parts of S. America. Schools and colleges have been established, and a desire to extend the benefita of education is evinced, having been of late one of the constant aims of the Government. The Chilians, though possessing few positive virtues, have few vices of a very flagrant character. Instances, however, of dissipation and profligacy are by no means rare; while cunning, and a propensity to pilfering, are pretty general amongst the lower classes. The Chileños are represented, however, as possessing a considerable amount of activity, and to form an honourable exception to the indolence which generally characterizes the Spanish race. They are extremely fond of the dance called the Samacueca, which may be considered the national dance. It is performed on a kind of stage, under an open shed, and somewhat resembles the fandango. The higher classes of females have the name of being virtuous and estimable in their domestic circle, but it can hardly be said that they are beautiful. They dress their hair with great care and taste, leaving it to fall down in long tresses behind. Their feet are amall, and they have a graceful carriage. The French fashion of dress prevails, with some not ungraceful modifications, as may be seen in the accompanying wood-cut; and they are just beginning to wear bonnets. The attire of the men, however, seems to partake but little in the grace which distinguishes that of the women.

COSTUMES OF THE ENVIRONS OF CONCEPCION.
Its chief points are the never absent poncho, and a conical broad brimmed hat, according to fancy, neither of them particularly pleasing. The advancement of civilization is rapid, and the imitation of foreign habits and customs will soon predominate
over those of Chili. In towns, the evening, owing to the excessive heat of the day, is the gay period; then the shops are lighted up, the streets crowded with females, unattended, parading from shop to shop, for the men never walk with the women; the public walks are crowded with people of all

costumes of the environs of bantiago.-From dortigny.
classes, who meet to enjoy the cooling breeze. This contintes till near midnight, when, having previously supped, they retire to rest, the bed being often laid in the open air, from which they again rise at day-break in the morning. It is customary to dine at twelve or one o'clock, and all, without exception, make it a rule to sleep from that hour till sunset. -(Miers, vol. i. p. 380.)

The Chilcũo Indians, or aboriginal population of Indian Chili, the country to the $S$. of the river Biobio, are more advanced in civilization than the wandering Indians of the Pampas. They excel in weaving, and in the mannfacture of potteryware. The women are laborious, not only spinning, weaving, and dyeing, operations performed solely by them, but cultivating the land, while the men stand by unemployed. They know nothing of the fine arts; but are generally of amiable disposition, possessing few of the vices of other primitive races. They live in a state of independence, being subject to their own chiefs only, and being governed by their own laws.

History.-Chili originally belonged to the Incas of Peru, from whom it was wrested by Pizarro, who, in 1535, sent Almagro to invade the country, he himself having previously conquered Peru. Almagro carried all before him, till he encountered the warlike tribes of the S., who arrested his progress. He was succeeded by Valdivia, who completed the subjugation of the country, with exception of Araucania. From this period, Chili continued a colony of Spain till 1810, when a revolution commenced, which terminated in 1817 in the independence of the former. Several internal commotions have since occurred, particularly in 1850, when some violent proceedings took place on the part of the Government opposition, but nothing very serions resulted from them. An attempted rising, made, April 20, 1851, by Colonel Urriola and a battalion of troops, in Santiago, was speedily suppressed by the President and ministers, backed by the National Guard. The leader of the revolt was slain in the conflict, and other 26 lives were lost. The principal towns are Santiago, the capital; Valparaiso, the chief port; Coquimbo, Concepcion, and Valdivia. Pop. estimated at $1,200,000$--(Narrative of the U. States Exploring Expedition; Mier's Travels in Chili and La Plata; Hall's Voyages; Von Tschudi's Peru; Exploring Voy. of the Adventure and Beagle.)

CHILICOTHE, a tn. U. States, Ohio, 44 m . S. Columbus, r. bank, Scioto. The principal streets run parallel to the river, and are crossed by others at right angles. It has a courthouse and jail, two market-houses, four churches, and two academics. The Ohio Canal passes through the town, Pop. 3977.

CHILKA LAKE, a remarkable lake, Hindoostan, prov. Orissa, 50 m. S. by W. Cuttack, generally supposed to have been formed by an irruption of the ocean. It is 35 m . in length, by 18 in breadth, and is separated from the sea for many miles by a long narrow strip of sand, seldom more than 300 yds . in breadth. To the S., it is divided into numerous narrow channels by large inhabited islands. The general depth is about 4 or 5 ft .; greatest depth, 6 ft . It is believed to be rapidly filling up with the sand and mud brought down by the streams that fall into it. On the Cuttack side, its shores are flat, marshy, and destitute of picturesque beauty; but the opposite banks present some fine scenery. The islands consist of huge rounded blocks, of a highly indurated porphyritic granite, containing large crystals of felspar, tossed and piled on each other in the wildest confusion, exhibiting every symptom of violent convulsion, and presenting the most extraordinary and fantastic forms. They are studded with small hamlets, as are also the banks of the lake. The lake yields valuable salt, called Karkach, obtained solcly by evaporation. Extensive fisheries are also carried on in it, the produce of which, when dried, forms a considerable article of export.

CHILLENDEN, par. Eng. Kent; 180 ac. Pop. 137.
CIIILLESFORD, par. Eng. Suffolk; 1420 ac. Pop. 220.
CHILLINGHAM, par. Eng. Northumberland; 4980 ac. гор. 459.

CHILLINGTON, par.Eng. Somerset; 830 ac. Pop. 321.
CIIILKEAII, an inland tn. Hindoostan, prov. Delhi, on the borders of Kumaon, 110 m . N.E. Delhi ; lat. $29^{\circ} 24^{\prime} \mathrm{N}$. ; lon. $79^{\circ} 5^{\prime}$ E. It is one of the principal marts of trade with Kumaon, and through that district with Tibet and Tartary; but is abandoned in the unhealthy season, when malaria prevails.

CIILLLAMBARAM, a maritime tn. Ifindoostan, Carnatic, 34 m . S. Pondicherry; lat. $11^{\circ} 28^{\prime}$ N.; lon. $79^{\circ} 47^{\prime}$ E. In the neighbourhood are some celebrated antique IIindoo temples. There was an extensive indigo manufactory here some years since.

CHILLIANWALLA, a vil. Punjab, about 5 m . from 1. bank, Jailum; lat. $32^{\circ} 37^{\prime}$ N.; lon. $73^{\circ} 50^{\prime}$ E. About $1 \frac{1}{2} \mathrm{~m}$. N. from this village was fought, on January 13, 1849, the celebrated battle which now bears its name, between the Sikh army and the British forces, under Lord Gough. The result of this engagement was more than doubtful, while the loss of life was more than usually heavy. On the side of the British, 2269 officers and men were killed and wounded, on that of the sikhs, 4000 . The British remained masters of the ficld, but the Sikhs, who fought with great bravery, and had taken several guns and stands of colours, were found on the following day in compact order, and ready for another encounter, which, in fact, took place, eight days afterwards, at Goojerat, about 27 m . W. Chillianwalla, when the Siklis were not only defeated, but their military power nearly annihilated, with comparatively small loss to the British.

CILILLON, a famous castle, Switzerland, can. Vaud, on the Lake of Geneva, $6 \frac{1}{2}$ m. S.E. Vevay. This castlo was built in 1218, by a Count of Savoy, and was once an important stronghold, guarding a mountain pass. Franz Bonnivard, prior of st. Victor, Geneva, was imprisoned here from 1530 to 1536; it being at once a prison and a fortress, like most of the great feudal kecps. It is now partly used as a military storchouse ; and, having acquired additional interest from Byron's poem, 'The prisoner of Chillon,' is much visited.

CHILLON, a tn. Spain, New Castile, prov. of, and 56 m . S.W. Cindad-Real, on the crest of a hill, surrounded by lofty and rugged mountains. It contains a parish church, a large and handsome edifice, consisting of three naves; several primary schools, an hospital, and almshouse. The inhabitants are chiefly employed in the quicksilver mines, which are extensively worked in the neighbourhood. Chillon obtained an unenviable notoriety in the beginning of the 16th century, by the cruel bigotry with which it persecnted all who were supposed to be infected with heresy. A woman, who distinguished herself in this infamons work, has a marble statue crected to her honour in the public square. Pop. 2415.

CHILMANY [Chalamari], a tn. Ilindoostan, prov. Bengal, on the Brahmapootra, 120 m . N. by W. Dacea; lat. $25^{\circ} 30^{\prime}$ N.; lon. $88^{\circ} 42^{\prime} \mathrm{E}$. An annual festival is held here, on the Varuni Chur, a sandbank in the bed of the river, which is frequently attended by 60,000 to 100,000 pilgrims and others.

A considerable amount of busiuess, likewise, is at the samo time transacted.

## CHILMARK, par. Eng. Wilts; 3210 ac. Pop. 593.

CHILOE, a large isl., S.W. coast of S. America, and forming, with a number of smaller islands lying between it and the mainland, a province of the Chilian republic. It is situate off the S. extremity of Chili, and W. coast of Patagonia, being separated from the former by a narrow channel, and from the latter by a passage about 35 m . wide, called the Gulf of Ancud. Its s.W. point, Cape Quilan, is in lat. $43^{\circ} 17^{\prime} \mathrm{S}$. ; lon. $74^{\circ} 26^{\prime} \mathrm{W}$. (r.) It is 120 m . in length, N . to $S$., and about 50 in breadth, at the widest part; but a deep indentation in its centre reduces its breadth at that point to little more than 15 m . It is mountainous, and is covered with magnificent, but almost inaccessible forests, which give to the whole island a singularly agreeable and pieturesque appear ancc. The W. shores are composed of rocky masses, rising abruptly from the ocean to the height of 1500 or 3000 ft .; but the E. shores are of moderate elevation. There are numerons inlets on the coasts, which afford secure anchorage, but few harbours of any extent. The principal are St. Carlos, Chacao, Dalcahue, and Castro. Of the interior little is known. No mines have yet been discovered in Chiloe, or any of the islands of the province, although many of the streams are strongly impregnated with mincral substances. Some have a copperish taste, while others, pure and limpid, appear to be impregnated with carbonate of iron. Traces of coal, also, have been found in several parts. The climate is extremely moist and cool, but far from unhealthy, as the appearance of the inhabitants sufficiently proves; both men, women, and children having fair and rosy complexions. Although perfectly salubrious, it is however, on the whole, very unpleasant, being damp and wet for at least 10 months of the year; while, even in the summer, there are seldom two fine dry days in succession. The soil is in many parts rich, though never manured; it consists of dark mould and fine loam upon chalk. The trees of which the forests are composed, are chiefly a bastard cedar, of great durability, and well adapted for beams and rafters. The other more valuable trecs are the avellana (Quedra hetrophylla), the roble (Fagus obliqua), Tigui, laurel, manu-muermo, and suma (Myrtus suma), \&c. The cultivated productions are wheat, barley, oats, maize, potatoes, all sorts of European vegetables, and fruits, the latter in great quantity, as apples and pears. The grains mentioned are, however, produced in but small quantities, and only in a few spots; for, on account of the constant moisture, cercals do not thrive. Potatoes grow wild in Chiloe, but, though adjoining the native land of that root, they are greatly inferior to the cultivated kind, both in size and flavour. Agriculture is little understood in the island, and the implements used are of the rudest description; they have no plough, but, instead, use two long pointed poles, worked by two Indians, who, by a peculiar mode of managing these apparently unsuitable implements, contrive to produce a furrow, which they repeat at a vast expense of labour, until the entire surface of the field is broken up. Oxen, sheep, horses, and pigs, are bred. The horses are small, and not handsomely formed, but very spirited and strong. The cows, sheep, and swine are small and lank. The last swarm throughout the island, being domesticated, and generally living in the houses. The hams of Chiloe are celebrated for their fine quality, and high flavour. Poultry abounds, particularly ducks, which, as they are not much approved of for eating, have wonderfully multiplied, althouglı it was only about 1830 they were first introduced. Amongst the native wild birds, the most remarkable are the cagge, the caucania or cauquena, and the barking bird. The harbours and coast in gencral abound with all sorts of fish, including the finest oysters, and other shell fish. The supply of the latter is apparently inexhaustible, and the quality of many of them excellent. They form a principal article of food with tho inhabitants, who have a peculiar mode of cooking them, by which they are rendered excecdingly tender and palatable. The ease with which this description of fool can be obtained, is said to be the principal cause of that want of industry which is so remarkable in the Chilotes. The principal manufactures of Chiloe, as of the other islands that composo the province, are casso, a coarse woollen cloth, two and a half or three yards long, and three quarters of a yard wide, used for men's garments, and of very durable quality. Pouchos, a kind of cloak,

## Chinachin

blankets, and a variety of other fabrics, known only by their native names, are also among the manufactures, but none, with exception of the ponchos, are exported, a sufficiency for home use only being made. Cables, hawsers, and ropes are also manufactured. The exports consist chiefly of beams, planks, and boards, hams, a little wheat, some dried fish, fircwood, and brooms. The imports are sugar, wine, brandy, salt, wearing apparel, and household furniture. The inhabitants of the island consist of whites, Indians, and people of mixed blood. The Indians, who are of the Araucana race, are now few in number; they are short and thick-set, and have long, straight coarse hair. Their faces are round and full, eyes small, and countenance wanting in intelligence. The whites are either Chileños or Spaniards; the latter are almost the only Europeans who have become settlers here. All classes are of good disposition, obliging, temperate, and honest. Murder, robbery, and drunkenness, are unknown; the last never being seen except when European vessels are in port. No private dwelling in town or country has a lock on the doors. The dress of men in the lower orders consists of a pair of trowsers, and a shirt, over which is thrown the all-concealing poncho. The women are as sligltty clad, but instead of a poncho, they wear a rebozo, or shawl, which, however, is very often dispensed with. The language in common use is Spanish; the original Indian tongue being almost forgotten.

The province of Chiloe is composed of the island just described, of 63 smaller islands situate between it and the coast of Patagonia, and of which 36 are inhabited, and of that portion of the mainland lying between its extreme S. point and the S. bank of the Maullin, or about lat. $42^{\circ} 22^{\prime}$ N. The civil, political, and administrative Government of the province is exercised by an intendente or civil Governor, who is supreme, and by the commander of the forces, either in person or by deputies; the latter governing in their respective districts. The principal revenue consists of a tax to the extent of a tenth of all produce, which is farmed out annually, and yields from $£ 1600$ to $£ 1800$. The chief towns are San Carlos, the capital, situate in a fine bay at the N. extremity of the island; and Castro, in the centre, on the E. coast. Pop. of Chiloe and islands attached to it, in 1832, 43,832.-(Voyage of the Adventure and Beagle; Von Tschudi's Peru; Capt. Blanckley in Jour. Roy. Geo. Soc.)

CHILON, a vil. Bolivia, dep. of, and 120 m . S.W. Santa Cruz de la Sierra, on the frontier of dep. Chuquisaca. It is mostly in ruins, and lies in an unhealthy district; the most of the inhabitants being afflicted with goitre. In the vicinity, potatoes, truffles, tobacco, and pimento are cultivated for exportation. Pop. 150.

CHILPANZINGO, a tn. Mexican confederation, state of, and 130 m . S. by W. Mexico, in a fertile valley, upwards of 4000 ft . above sca level, on the road to Acapulco. Pop. 2700.

CHILTERN, two pars. Eng. Wilts:-1, (All-Saints), 4500 ac. Pop. 403.-2, (St. Mary), 2150 ac. Pop. $^{2} 80$.

CHILTERN HILLS, a range of flint and chalk hills, England, extending from Henley-upon-Thames, in Oxfordshire, to Tring, in Hertfordshire passing through the centre of the county of Buckingham, where its loftiest summit attains a height of 905 ft above sea level. These hills were anciently covered with forests, and were infested by numerous bands of thieves. To protect the inhabitants of the neighbouring districts from the depredations of these banditti, an officer was appointed by the Crown, called the steward of the Chiltern Hundreds, and although the duties have long ceased, the office still exists, and is made use of to afford members of the Mouse of Commons an opportunity of resigning their seats when they desire it. Being a Government appointment, though without either duties or emoluments, the acceptance of it disqualifies a member from retaining his seat.

CHILTHORNE Domer, par. Eng. Somerset; 1190 ac. Pop. 291.

CHILLTINGTON.-1, (East), a vil. England, co. Sussex, $4 \frac{1}{2} \mathrm{~m}$. N.W. by N. Lewes. It has a handsome chapel of ease. Pop. 271.-2, (West), par. Eng. Sussex ; 3690 ac . Pop. 747.

CHILTON, several pars. Eng.:-1, Berks; 1500 ac. Pop. 309.-2, Bucks; 2080 ac. Pop. 364.-3, Suffolk; 1090 ac. Pop. 98-4, (Cantilo), Somerset; 540 ac. Pop. 134.-5, (Fuliatt), Berks; 3740 ac. Pop. 727.-6, (Trinity), Somerset; 1250 ac. Pop. 74.

CHILVERS-Coton, par.Eng. Warwick; 3730ac. P. 2508. CHILWELL, a vil. England, co. of, and 4 m. S.W. Nottingham, containing a Methodist chapel, a Sunday school, and two almshouses. The inhabitants are chiefly engaged in the manufacture of stockings and lace. Pop. 772.

CHILWORTH, par. Eng. Hants; 1400 ac. Pop. 177.
CHIMAI, or Chumay, a tn. Belgium, prov. Hainaut, 31 m. S.S.E. Mons, at the S.E. extremity of the province. It is commanded by a castle, built on a huge rock in its centre, and surrounded by an extensive park intersected by the river Blanche. The streets are regular and well kept; and there are a church and college; a dye-work, and several breweries; and considerable manufactures of woollen and cotton fabrics, lace, tobacco, leather, and hardware. Marble is extensively quarried in the vicinity, and forms, with iron, timber, and agricultural produce, its principal trade. Three fairs are held yearly. Pop. 2928.

CHIMALAPA, a vil. Central America, state of, and 55 m. N.E. Guatimala. Several years ago it contained about 90 huts, and the ruins of a church.

CHIMANAS, a group of islets, Caribbean Sea, off the coast of Venezuela, about lat. $10^{\circ} 19^{\prime} \mathrm{N}$. ; lon. $64^{\circ} 51^{\prime} \mathrm{W}$.

CHIMBARONGO, a river, Chile, prov. Colchagua It rises in the Andes, about lat. $34^{\circ} 55^{\prime}$ S., flows in a N.W direction to lat. $34^{\circ} 25^{\prime}$, where it is joined by the Tinguiririca, the united stream subsequently joining the Rapel, at lat. $24^{\circ} 12^{\prime}$. It waters and fertilizes some fine valleys, abounding in pastures, whereon vast numbers of cattle are reared. There is a small village of the same name on its r. bank, 10 m . S. San Fernando.

CHIMBO, a tn. Ecuador, 60 m . N.E. Guayaquil, on a river of same name. It carries on an active transit trade with Peru.

CHIMBORAZO, a well-known mountain, S. America, and the culminating point of the Colombian Andes, $90 \mathrm{~m} . \mathrm{S}$. by W. Quito, and about 110 m . from the coast; lat. $1^{\circ} 29^{\prime} \mathrm{S}$.; lon. $79^{\circ} 5^{\prime} \mathrm{W}$. It was long believed to be, not only the highest summit of the Andes, but the highest in the world. It is now known to be the sixth loftiest peak of the Andes only, being surpassed by four in Peru and one in Chili, while it comes far short of the culminating points of the Himalaya chain, in which occur, at least, 18 summits of much greater elevation. The height of Chimborazo, as fixed by Humboldt, is $21,424 \mathrm{ft}$. above sea level ; but above the valley of Quito, which forms its base, it only rises $11,958 \mathrm{ft}$., an apparent height, not quite equal to that of Mont Blanc, above the valley of Chamonix, and much less than that of Mount Ararat, above the plain of the Aras. This vast mountain, the top of which is covered with perpetual snow, presents a most magnificent spectacle when seen from the shores of the Pacific, after the transparency of the air has been suddenly increased by the long rains of winter. It was ascended in 1802, by Humboldt and Bonpland, to the height of $19,286 \mathrm{ft}$; and in 1831, by J. B. Boussingault, to the height of $19,689 \mathrm{ft}$.

CHIMEP'ANIl'ES'TICK, a river, Lower Canada, falling into the Gulf of St. Lawrence, N. side, about 20 m . S.W. Seven Island Bay; lat. $50^{\circ} 2^{\prime} \mathrm{N}$. ; lon. $66^{\circ} 40^{\prime} \mathrm{W}$. ; after a S.W. course of about 100 m .

CHIN-vy-Tao, an isl. China, Yellow Sea, W. coast Corea; lat. $39^{\circ} 18^{\prime} \mathrm{N} . ;$ lon. $125^{\circ} 10^{\prime} \mathrm{E}$.

CHIN-Gan, or Tchin-Ngan, a tn. China, prov. Quangsee, on an affluent of the Ngo-yu-kiang; lat. $23^{\circ} 15^{\prime} \mathrm{N}$. ; lon. $106^{\circ} 35^{\prime} \mathrm{E}$.

CHINA SEA, that part of the N. Pacific Ocean, bounded, N. by Formosa, N.W. by China, W. by Anam and the Malay peninsula, S.E. by Borneo, and E. by the Philippines. It contains numerons islands, receives several considerable rivers, and forms the inportant Gulfs of Siam and Tonquin. The currents in this sea are very mutable, depending much upon local circumstances.

CHINACHIN, a tn. Nepaul, $r$. bank of an affluent of the Gogra; lat. $29^{\circ} 10^{\prime} \mathrm{N}$. ; lon. $81^{\circ} 20^{\prime} \mathrm{E}$. It is a large and scattered place. All the houses are built of brick or stone, and have flat roofs. It contains two remarkable temples; and has a daily market, in which, amongst other things, are exposed to sale two highly esteemed birds, known by the names, respectively, of the manal and damphiya. There are also exposed to sale, on these occasions, many sheep and goats, loaded with salt, musk, medicinal herbs, \&c.

CHINANDEGA, a tn. Central America, Nicaragua, 20 m . N.W. Leon ; lat. $12^{\circ} 30^{\prime} \mathrm{N}$. ; lon. $87^{\circ} \mathrm{W}$. It is elosely built towards the centre, but on the outskirts the houses are mostly furnished with gardens, which keep them about 40 or 50 yards apart. The fences are often of bamboo, but more frequently of the cylindrical cactus, which runs up to 20 ft . The houses, generally built of adobes, are of one story, with an open court in the centre. The church is large, and a respectable building. The produce of the vicinity is chiefly maize, sugar-cane, cotton, fruit, poultry, and hides. Coffce also has been grown, and produces well, but none has been yet exported. The population has been estimated at 8000 .

CIINCIIA ISLANDS.-1, A group of small isls. off the coast of Peru; lat. $13^{\circ} 38^{\prime}$ S.; lon. $76^{\circ} 28^{\prime}$ W. They are granitic, arid, and destitute of vegetation; and the coasts bold and difficult of access. Immense deposits of guano were discovered on these islands a few years ago. On the N. island, this substance was said to be 80 ft . thick in 1846 .2 , Town and river, on the mainland of Peru, nearly opposite the islands; the former is 20 m . N. Pisco, and the latter about half way between these two places.

CHINCHAYCOCHA (Lake), Peru, prov. of, and $12 \mathrm{~m} . \mathrm{S}$. Pasco, its N.W. extremity is in lat. $10^{\circ} 42^{\prime} \mathrm{S}$. ; lon. $75^{\circ} 40^{\prime}$ W., at a height of $13,000 \mathrm{ft}$. above sea level; about 36 m . long, and 6 or 7 m . broad. It is the largest of the $S$. American lakes, next to the Laguna de Titicaca. As Chinchacocha loses, by various outlets, much more water than it receives from its tributary sources, it is evident that it must be fed by subterraneous springs. Its marshy banks are overgrown by totora (Malacochate totora), and are inhabited by numerous water fowl. The Indians entertain a belief that this lake is haunted by huge fish-like animals, which, at certain hours of the night, leave their water abode to prowl about the adjacent pasture lands, where they commit great havoc among the cattle. The S.W. end of the lake is intersceted by a marshy piece of ground, interspersed with stoncs, called the Calzada, whech forms a communication between the two banks of the lake.

CLINCHEW, a seaport th. China, on a bay of same name, 1. bank, a river which flows from the Ankoi tea districts; lat. $24^{\circ} 53^{\prime} \mathrm{N}$. ; lon. $118^{\circ} 38^{\prime} \mathrm{E}$. It is a place of some trade; and the river has sufficient depth of water, for vessels of 17 ft . draught, to come within 7 m . of the harbour. Junks lie close to the town, but cannot pass the bar excepting at high water. In the bay is a station for merchant vessels.

CIIlNCHILLA, a city, Spain, Murcia, prov. of, and 10 m. S.E. Albacete, on a rocky eminence. 1t is surrounded by a wall flanked with towers, entered by three gates, and commanded by a castle. The houses are, in general, substantially built, and form several regular streets, and seven squares, the principal of which is lined with handsome edifices, and ornamented with rows of balconies. Its handsome parish church has three naves, and a lofty tower containing six bells; the interior is richly decorated, and has many valuable pictures and other works of art. The eity also has several chapels and convents, town and chapter houses, a prison, hospital, theatre, harracks, store-house, cemetery, poor-house, Latin, and numerous primary schools. Manufactures :-linen, woollen, aud hempen fabrics; glass, earthenware, tiles, bricks, leather, shoes, hardware, brandy, wine, and oil. Trade :cattle, wool, grain, fruits, building stone, \&c. Numerous quarrics of granite, alabaster, gypsum, and lime-stone are wrought in the vicinity. Two annual fairs, for cattle and general merchandise, are held in March and August. Pop. 7465.-(Madoz.)

CHINCIION, a tn. Spain, New Castile, prov. of, and 23 m. S.S.E. Madrid, agrecably situate on the brow and summit of a hill ; well built, houses all of two stories, often handsome, and gencrally provided with large subterranean ecllars for the preservation of wine. In the centre of the town is a public square, of an oblong shape, and tolerably level. The streets are for the most part spacious, regular, and paved, but some of them, from the site of the town, are necessarily steep. They are all well cleaned. The principal buildings are a handsome modern chureh, completed in 1840 , to replace one which the French had burned down; the public eourts and offices, vecupying the buildings of a suppressed Augustine convent; the grammar school, an hospital, and storehouse. The inhabitants are chiefly employed in agriculture; but there are some manu-
factures of common linen, leather, and earthenware, and several mills. Pop. 5288.

CIIINCHOOR, a tn. Ilindoostan, presid. Bombay, prov. Aurungabad; lat. $18^{\circ} 37^{\prime}$ N.; lon. $73^{\circ} 56^{\prime}$ E.; on the road from Bombay to Poonah. It is a thriving commercial town, with many good houses and shops; lut is chiefly remarkable as the residence of Chintamun Dco, considered by a great proportion of the Mahrattas to be an incarnation of their favourite deity Goonputty.

CHINE (La), vil. Lower Canada. See Lacinne.
CHINESE EMPIRE, an immense territory, stretching from the centre to the E. extremities of Asia, and occupying nearly a third of the surface of that continent; between lat. $18^{\circ} 20^{\prime}$ and $56^{\circ} \mathrm{N}$.; and lon. $70^{\circ}$ and $143^{\circ} 30^{\prime}$ E.; bounded, N. by Siberia, W. Independent Tartary and the Punjab, S. IIindoostan, Burmah, Laos Anam, and the China Sea, E. difterent arms of the N. Pacific Ocean, under the names of Tongay or E. Sea, Whanliae or Yellow Sea, Sea of Japan, and Sea of Okhotsk; greatest length, S.W. to N.E. 3350 m .; greatest breadth, 2100 m. ; area, about $5,000,000 \mathrm{sq} . \mathrm{m}$. This vast empire is usually divided into China Proper, which forms its nucleus, and the following dependencies:-Korea or Corea, Manchooria, Mongolia, lli including Sungaria and E. Turkestan, Koko-nor, Tibet, and numerous islands, the largest of which are Formosa and Hainan. The anthority which the Chinese exercise over their dependencies is by no means uniform. Some of the dependencies, as Manchooria, are so closely connected with the empire, as almost to be incorporated into it, while others are merely tributary, and not a few so independent as to do little more than profess a nominal allegiance. As the dependencies will be described under their respective heads, it may be sufficient here to give a general idea of the whole empire, by mentioning that it has a coast line of 3350 m ., a circuit of $12,550 \mathrm{~m}$., an area nearly equal to a tenth of the labitable globe, and a population of at least 400,000,000.

China Proper [anc. Cathay; Chinese, Chung Kwoh, 'Middle Kingdom '], forms the S.E. portion of the Chinese Empire, and occupics about a third of its whole extent. Not including the island of 1 Iainan, it lies between lat. $20^{\circ} 20^{\prime}$ and $41^{\circ} \mathrm{N}$.; and lon. $98^{\circ}$ and $123^{\circ}$ E. ; and is bounded, N. by one of the most remarkable of human structures, the Great Wall, which proceeds dircetly over mountain and valley, and, for a length of 1250 m ., forms the barrier between China and Mongolia, W. Tibet, S. Burmah, Laos Anam, and the China Sca, and E. the N. Pacific Occan. Excluding a considerable prominence in the N.W., a second in the N.E., and another of smaller dimensions in the $S$., it bears no inconsiderable resemblance to a semicircle, the diameter of which lies obliquely, N.E. to SW., for a length of about 1600 m ., while the curve bends round from each extremity, and attains its greatest convexity in the E. The coast line exceeds 2500 m ., and the mainland frontier 4400 m .; area, $1,297,999 \mathrm{sq} . \mathrm{m}$., or more than a third that of Europe. For administrative purposes, it is divided into provinces, the names, areas, and pepulation of which are as follows-

| Nams | Area in sq. m . | Population. | $\begin{aligned} & \text { Pop. } \\ & \text { sq. } \mathrm{m} . \end{aligned}$ | Capital. |
| :---: | :---: | :---: | :---: | :---: |

Physical Features.-Owing to the barriers, both natural and artificial, which guard the frontiers of China, and the rigid exclusion of foreigners from its interior, great part of the country
must be regarded as a terra incognita. The coast line, which could not be made inaccessible, is pretty well known. Forming an irregular curve of about 2500 m ., it gives about 1 m . of coast for every 520 m . of arca. One of its peculiar features is the vast number of islet groups by which it is bordered. It is not deeply penetrated by gulfs, the only one of great extent being that of Pechelee in the N.E., but numerous indentations of sufficient dimensions to form safe and capacious roadsteads are found in every quarter. With exception of a bold and rocky peninsula in the province of Shantung, the shore, from the gulf of Pechelee S. to the island of Chusan, is flat, and in many places so little raised above the sea level, as to be extensively inundated during a continuance of strong winds. From Chusan to the mouth of Canton river it is usually rocky, bold, and precipitous; from this point S.W. flats, occasionally interrupted by bold headlands, again prevail. The interior of the country commences in the N.W. in a series of lofty mountain ranges, forming the abutments of the great table land of Central Asia. The principal chain, called Yun-lin, has its main axis N. to S. Its average height is not known, but many of its summits are described as towering far above the line of perpetual snow. Its most important ramifications take an E. direction, and becoming the leading water sheds of the country, divide it into three great basins, the waters of which are accumulated in mighty rivers, and carried E. to the sea. The general slope of China, as thus indicated by its principal rivers, is W. to E., the mountains lowering gradually as they proceed towards the coast, and ultimately sinking down by a succession of descending terraces into level tracts, the largest of which, called the Great Plain, has a length of not less than 700 m ., and a width varying from 150 to 500 m ., and consisting generally of a deep alluvium, which is of unparalleled fertility, and probably maintains a denser population than any other portion of the earth's surface of similar extent. The geology of China is very imperfectly known, but there is no doubt that all the leading geological formations are found in it. Primary formations are most largely developed in the mountainous regions of the W., where granite, gneiss, and primitive schists prevail. The same formations exist to a more limited extent in the S.E., where bleak mountains of granite give that district its distinguishing feature. The secondary formation, including the carboniferous and cretaceous system occurs to a small extent in the central province of Honar ; and the space traversed by the imperial canal in uniting the Hoang-ho and Yang-tsekiang, but more largely in the neighbourhood of Pekin, where a zone of no great width, but considerable length, forms an irregular curve from N.E. to S.W., and contains beds of coal, from which the capital and the surrounding districts obtain their principal supplies of fuel. The tertiary formation has its largest development in the N.E., and probably underlies the greater part of the alluvium which covers the surface of the Great Plain.

Rivers and Lakes.-No country of the world is better watered than China. The Yang-tse-kiang which traverses the country centrally W. to E., has a course of 2900 m . The Hoang-ho, the next in size, has a course of 2000 m ., during the larger and lower part of which it gradually approaches the former, and being connected with it by the imperial canal, which has a length of 700 m ., furnishes what is said to be the most magnificent system of water communication in existence -a system which brings all the provinces into direct communication with each other, and gives an inland navigation which meets with only one interruption from Canton to Pekin. Besides these rivers and thir numerous tributaries, the most deserving of notice are the Hong-kiang of considerable size, but still more commercial importance, having its embouchure at Canton; and the Eu-ho, which, instead of the E. course followed by the great rivers of China, flows N., forming part of the line of the Imperial Canal, and falls into the Gulf of $\mathrm{Pe}-$ chelee. The lakes of China are mere dilatations of the rivers, and, though numerous, are not individually of great extent. The largest, Tungting, province Honan, which furnishes an important affluent to the Yang-tse-kiang, has a circuit of 220 m . The next in size, Poyang, province Kiangsee, is 90 m . long by 20 broad, abounds in fish, and is remarkable both for the picturesque scenery around it, and the numerous beautiful and populous islets which it encloses in its bosom.

Climate.-The greater part of China belongs to the tem-
perate zone, only a small portion of the S. lying within the tropics. It has what is called an excessive climate, and has a far greater range of temperature than is usual within the same parallels of latitude. Pekin, the capital, is nearly a degree $S$. of Naples, and yet while the mean temperature of the latter is $63^{\circ}$, that of the former is only $54^{\circ}$. In summer, however, the heat reaches from $90^{\circ}$ to $100^{\circ}$ in the shade, while the winter is so cold, that the rivers usually continue frozen from December to March. Hence in the N. of China, silks, the common dress of summer, are in winter exchanged for fur and woollens. At Hong Kong, notwithstanding of the influence of the sea in checking extremes, the thermometer, in June and July, the hottest months, frequently stands at $90^{\circ}$, and in winter, from December to March, sinks nearly to the freezing point. At Canton and the adjacent lills, snow, though rarely, has sometimes fallen. At Shanghae, lat. $31^{\circ} 20^{\prime}$, the range of temperature is still greater, the maximum reaching $100^{\circ}$, and the minimum falling at least $20^{\circ}$ below freezing, or $12^{\circ}$ Fah. Still, the climate is eulogized as one of the finest in the world. In the S., the S.W., and N.E., monsoons blow with great regularity, and nearly divide the year between them. In the N. they are more variable, and the wind not unfrequently blows from other quarters. Among the greatest scourges of the country, and perils of the adjoining seas, are the dreadful gales known by the name of typhoons, a corruption of the Chinese Ta fung or 'great wind.' They never fail to commit great devastation, though their effects are doubtless much modified by the distinct and timely notice which they give of their approach, and the consequent preparations which are made throughout the whole of the threatened districts to guard against them.

Natural Productions.-From its vast extent, the varicties of structure in its geological formation, and its range of temperature, which inclades both tropical heats and almost Siberian colds, and is even wider than might have been anticipated from the number of degrees of latitude over which it extends, China naturally contains numerous specimens belonging nearly to every class of the three kingdoms - the mineral, animal, and vegetable. A bricf reference to each is the utmost that can here be attempted.

Mineralogy.-Perhaps the only metal which China is not known to possess is platina. Gold, though not thought to be very abundant, is obtained by washing the sand of several of the rivers, particularly those of the upper branch of the Yang-tse-kiang, and in the mountainous and almost inaccessible regions of Yunnan. Silver is also found in the same regions. Much of it is of great purity, and is well known under the name of sycee silver. The quantity also must be considerable, since it has not only furnished the vast sums exacted by the British in compensation for the last war, but also suffices for a large annual export, chiefly in payment of opium. Copper, besides forming the ordinary currency in limited mercantile transactions, is worked to a great extent for economical purposes. A species, called petong or white copper, and when polished scarcely distinguishable from silver, is said by some to be peculiar to China, while others, with more probability assert, that instead of being a simple metal, it is merely a compound of copper and zinc. Quicksilver, in the form of cinnabar, is of frequent occurrence, and is much used both for colouring and medicine. Its fumes, the poisonons nature of which is well known, are even said to be inhaled like opium or tobacco. There is no want of iron either in the form of rich haematite, or in that of the carbonate of the coal measures, from which almost all the iron of Britain is derived, but the quality is said to be inferior. Lead, tin, and zinc exist, but owing either to a deficiency in quantity, or ignorance of the method of extracting them economically from the ores, the native product falls short of the consumption, and leaves room for a large importation. Reference has already been made to the coal fields of China, and the extensive use of coal for fuel. It occurs both as bituminous coal and anthracite, but the quality is injured both by the presence of sulphur and a preponderance of ashes. As most of it is raised without machinery, by the rudest forms of manual labour, the price being necessarily high, confines the use of it in a great measure to the rich, while the poorer classes are obliged to content themselves with coarse mixtures of culm and earth, or other still more inefficient and less attractive compounds. Among other mineral substances may be mentioned nitre, alum, gypsum,
and, more important than all, inexhaustible beds of kaolin or porcelain earth, the early possession of which by the Chinese and their great skill in working it, has given the name of China to the beautiful ware which so long monopolized the market of Europe. A peculiar species of nephrite, called juh $y u$ or jude, of a green colour, and valued chiefly for the property of emitting a musical sound when struck, though not peculiar to it, appears to be found in China in its most perfect form, and is there held in the highest estimation. Various precious stones also are found, anl agates especially, admirably wrought, form a particular article of commerce, but it is supposed that many of the fine stones are not native but importel.
Zoology.-Of this, almost all that is yet known is derived from the casual glimpses of ambassadors and their suits in passing along some of the great thoroughfares, from merchants not allowed to go beyond the suburbs of frontier towns, and from missionaries, whose opportunities have indeed been better, but whose accounts savour more of credulity than discrimination. But the emperor having now thrown open the country to the investigation of travellers, we may expect, in due time, to obtain more accurate information on this and on many other subjects, of which we are at present comparatively isnorant. Of quadrumanous animals, one is described as 'perfectly resembling man, but longer armed and hairy all over, called fe-se, most swift and greedy after human flesh.' This is evidently an exaggerated picture of some animal identical with or allied to the orang-outang. Of the same order is the dorre, commonly called the Cochin-China monkey, and remarkable for the variety of its stripes and colours. Still more curious is the kakan or proboscis monkey, in which the combined properties of man and beast seem to be ludicrously caricatured. Of feline animals, the lion appears to have only a fabulous existence. Tigers and leopards were at one time so numerous as to have been bunted on a magnificent scale by the emperors. That mode of chase is now abandoned, and the native existence of the animals which formed the objects of it begins to be doubted. A small species of wild cat exists in the S., is sought for as game, and served at table as a de.. licacy. Bears are frequently mentioned, and their paws are said to be in high request among Chinese gourmands. Both camels and elephants, though not indigenous, are largely domesticated. Bats are numerous; one in particular is said to be as large as a hen, and is extensively used as food. To the indigenous animals already mentioned may be added the wild hog, porcupine, racoon-faced $\log$ or Chincse fox, and several species of rats, more especially one of a yellow colour, larger than those of Europe, and mnch prized for its skin. In feathered tribes, China is understood to be extremely rich. Pheasants in particular are famous, both for abundance and for beauty. Among others are the well known gold and silver pheasants, and above all the barred-tailed pheasant, a most magnificent bird, with tail feathers sometimes 7 ft . in length, but extromely rare even in China, and so highly valued, that the exportation of it is prohibited under the severest penaltics. Water birds of almost every kind abound, but perhaps the most remarkable is the leit tse or fishing cormorant, the training of which forms an important employment, and is so complete, that when a bird has secured a fish, which from its size he cannot manage singly, his neighbour darts down and assists him to complete the capture. The reptilia of China include several serpents of monstrous size, not regarded as dangerous, and one of a black and white colour, hence called pak-y-hak, which never exceeds 3 ft . in length, but is very venomous. Tortoises of various sizes are common, and are often to be found domesticated in gardens and pleasure-grounds. No country is said to have a more complete ichthyology than China. All its waters-its rivers, lakes, pools, canals, and even ditches, are full of fish: This is partly owing to the artificial means by which the natural supply is vastly increased. Boat-loads of water, containing spawn, are carried to distant parts and deposited in ponds, where the fry, when so small as to be scarcely visible, are fed with various species of lentils, or with yolks of eggs. It is not uncommon even to resort to the more curious device of hatching spawn, by placing it under a hen in an egg previously emptied of its contents, and re-opening it a few days after, with the young fish in a state of incipient development.

Botany.-This is only beginning to be known Mr. For-
Vol. I.
tune's late Wanderings, under the auspices of the Horticultural Society of London, have done much, both in dissipating erroneous ideas previously entertained, and actually enriching the gardens of Europe with numerous fine plants, the existence of which was only conjectured or altogether unknown. Among trees, the bamboo, as in India, is perhaps the most valuable of all, not on account of its magnitude, though stems with wavy plumes of 50 ft . in height are not uncommon. as on account of the almost endless uses to which it is applied. Several species of willow attain a large size. Staunton mentions one with a girth of 15 ft . Oaks of different species are common, and the economical uses of the various parts-the wood, bark, and galls, are perfectly understood. Even the acorns of some kinds are ground into flour, and converted into a farinaceous paste. Coniferous trees are represented by numerous forms of pine, yew, and cypress. One of these, a cedar, called nan-muh or southern-wood, having the property of resisting both time and insects, is deemed too good for common use, and reserved for inperial purposes. The tallow and camphor trees abound, and the koo-soo, a species of sycomore, furnishes paper from its inner bark. Palms are not abundant, but the cocoa-nut flourishes in Hainan and on the adjacent coast. The pandanus or screw pine is abundant, but the date palm is not known. The chestnut, walnut, and hazel are all indigenous. The fruit trees include many species of fig -the mango, guava, wanghee, orange, peach, pomegranate, quince, nectarine, plam, and apricot. In general the fruits are of indifferent quality. Among shrubby plants, the first place is unquestionably due to Thea bohea and Thea viridis, of which mention will afterwards be made. The next in importance is the mulberry. Among flowering shrubs or trees, the rose, with its numerous varieties, are most conspicuous. Nor must we omit to mention the hydrangea, the passion flower, the lagerstroemia, in its white, purple, and red varieties; Indian pride, the Chinese tamarisk, the cactus, the cereus, seen sometimes in the $S$. with more than 50 splendid flowers in full bloom; and the camellia, in almost endless variety. No department of the Chinese flora is richer than that of the azalea, of which Mr. Fortune says: 'Few can form any idea of the gorgeous beauty of the azalea-clad hill, when on every side the eye rests on masses of flowers of dazzling brightness and surpassing beauty.' IIe adds, ' Nor is it the azalea alone that claims our admiration; clematises, wild roses, honey suckles, and a hundred others, mingle their flowers with them, and make us confess that China is indeed "the central flowery land.", Dwarfing is a favourite occupation of the Chinese gardeners, and no small degree of scientific acquaintance with vegetable physiology is implied in the success with which they manage to cramp the natural growth of plants, and force them to assume the most fantastic forms. Many of the shapes are curious in the extreme, but the pity is that so much labour and ingenuity should be so perversely employed. Several plants of economical importance, not here mentioned, will be referred to under the following head.

Agriculture. - This first of arts has always been held in the highest veneration in China. The Emperor himself, to do it honour, repairs annually to an appointed spot with three princes, nine high officers, 40 old and 40 young husbandmen, and taking the plough in his hand, draws a furrow and sows some seed. A similar festival is held in the capital of each province. A branch of industry thus honoured can scarcely have failed to make great progress, and accordingly the agriculture of the Chinese has been lauded in high terms by almost all who have had opportunities of witnessing it. In the important processes of stirring the soil, eradicating weeds, economising manures, and applying them in the form best fitted to nourish the crops and bring it to maturity, they display unwearied industry and no small degree of skill. It is a mistake, however, to suppose that they are adepts in what may be called the science of agriculture. They slavishly follow a routine which has been handed down, without change, from untold generations, and not only display no inventive powers themselves, but from overweening conceit obstinately refuse to profit by the inventions of other countries when placed before them. Their implements generally are of the rudest description, and though improved British ploughs have been sent out and urged on their acceptance, they reject them with disdain, preferring a rude shapeless thing drawn by oxen or disdain, preferring a rude shapeless thing drawn $\mathbf{8 6}_{\mathbf{8}}$
buffaloes. They appear to have no idea of raising improved breeds of horses and cattle by the arts so well known and practised in this country. The only animal of which the Chinese can be said to have furnished us with an improved breed is the pig. Rice, as the principal food of the people, is the staple crop. The rich alluvial plains which cover a great part of the surface are admirably adapted for its culture, and, by careful management, yield anazing crops-not one merely, but in the S . latitudes two crops of rice in the hot season, besides a winter green crop usually ploughed in for manure. In the neighbourhood of Ningpo, lat. $30^{\circ}$, where the summer is too short to mature two crops in succession, they are still ottained by an ingenious device. The rice is sown in seed beds, and afterwards planted out in drills. A first planting is made about the middle of May, and in two or three weeks after a second planting is made in the intervals between the previous drills. When the first crop is reaped in August, the other is still green, but being stirred and manured, and having plenty of light and air, comes rapidly forward, and is reaped in November. The whole steps of the process are conducted with the greatest care; and the water-wheel, worked by the hand, or by an ox or buffalo, is kept in daily operation from the first planting of the crop till it is nearly ripe. The reaping instrument is not unlike our sickle; and the crop, when not thrashed on the field, as is generally the case, is carried home and built up into stacks which so much resemble our own, particularly in the N., that the farm yards at a distance are scarcely distinguishable from those of Europe. The rice is not always grown on alluvial flats. The sides of the hills are often laid out in a snccession of gently sloping terraces, which sometimes rise to the height of 600 or 800 ft . above sea level, and planted with rice in drills running across the declivity, thus admitting of being irrigated by streams which, retarded at every step, move slowly forward without acquiring any impetus. In the first stages of the crop, these terraces are clothed with luxuriant green, which contrasts finely with the rugged steeps in their neighbourhood, and forms an enchanting landscape. The same mode of culture being evidently applicable to other crops is in general use, and is noticed with admiration by almost all travellers as a distinguishing feature in Chinese husbandry. After rice, the staple crops on their terraces are sweet potatoes and earth-nuts. In the neighbourhood of Canton the common winter crops are our own ordinary garden vegetables-potatoes, pease, onions, and cabbages, for the use of European residents; in the N. their crops principally consist of our ordinary cereals and legumes-wheat, barley, pease, and beans. The two last are the same as our field kind, and are indigenous; the two first are inferior varieties. Both the heads and grains are small, and the straw, of wheat in particular, is so short, that instead of being cut, it is pulled by the hand. Varieties of the cabbage tribe are extensively cultivated for the sake of the oil extracted from the seeds. The raising of green crops to be ploughed in as manure has already been adverted to, and is common in all the districts where rice is cultivated. Two kinds of plants are chiefly employed; one of them, a trefoil, grown on ridges similar to those which form the intervals in our celery beds. Among other crops regularly and extensively grown may be mentioned sugar cane, used chiefly in a green state; indigo, particularly a kind called tein-ching observed by Fortune, and now ascertained to be the Isatis indigotica; the castor-oil plant, and numerous plants grown for their roots. Three other plants of the greatest economical importance, and so extensively grown, as to form important branches of Chinese agriculture, deserve a separate notice. The first is the mulberry. Judging from the quantity of raw silk annually exported, and the general use of silk for dress, at least by the wealthier classes of the country, it is evident that thousands of acres must be appropriated to the cultivation of this shrub, and millions of persons employed in the different processes connected with it. In a journey which Fortune hazarded by an interdicted road from Ningpo to Shanghae, he passed through an extensive district where the mulberry was a principal object of cultivation, and at a time when the natives were busily employed in gathering the leaves and feeding the silk.worms. He states that the plants are all grafted, and produce very fine thick leaves. They form trees, or rather bushes, which are not allowed to exceed from 4 to 6 ft . in height, and are planted in rows, often along the banks of
canals. The mulberry farms are small, and are generally worked by the farmer and his family, who not only plant, graft, and cultivate the mulberry, but gather the leaves, feed the silk-worms, and wind the silk off the cocoons. The worms are kept in round bamboo sieves placed on shelves, fitted up in dark rooms. The Chinese silk is much heavier than the Italian, and preferred in fabrics requiring lustre and firmness. Whether it owes its quality to a particular variety of mulberry, or to the climate or soil, has not yet been ascertained. The second plant more particularly deserving of notice is the cotton plant. That used in China, and called in the N. provinces the ' Mie wha,' is of the same species as the Amcrican, namely, Gossypium herbaceum. The yellow cotton used in the manufacture of nankeen appears to be of a more stunted habit than the ordinary gossypium, but has no characters which constitute a distinct species. It is chiefly cultivated in a level tract around Shanghae, forming part of the Great Plain, and is the staple summer crop. The culture differs little from that of other cotton countries, more especially the cotton districts of India, and, therefore, need not be particularized. The cotton harvest field of China, however, presents a more pleasing scene than that of the great cotton growing country of the W. Instead of the gang of slaves, are seen the farmer and his family, sometimes consisting of three or even four generations, all busily engaged in reaping a harvest which is their own, and by the produce of which their own comforts are to be increased. The last crop to be here mentioned, and to us and our Government the most important of all raised in China, is that of tea. There are two varieties of the plant-Thea bohea and Thea viridis, and though it was long supposed that the former only yielded the black and the latter the green teas exported to this country, it is now proved that both kinds of tea are obtained from eacl. . The plant, whose botanical affinities ally it to the camellia, in its natural state as seen in Assam attains the height of 30 ft ., but in China only from 3 to 6 ft ., where it is kept down by prunings, and made to assume a bushy form, presenting a dense mass of foliage on an infinite number of small shoots. The leaf is dark green, of an oblong oval shape, and the flowers are single, white, and without smell. The seeds, three in number, are enclosed in a husk resembling that of the hazel-nut, having a somewhat acrid taste, and, by extraction, yield an oil which is used for various purposes. The great tea provinces are Quangtong, Fokien, and Chekiang. In the first the Thea bohea is grown, and the tea is of inferior quality; in the other two the Thea viridis, which yields all the finer qualities, and furnishes the greater part of all that is exported to this country. In these two provinces, where the culture is most extensive and carried to its highest perfection, the tea plantations are usually formed in a deep rich loam, never on the low lands but on the low hilly slopes. The plants, consisting of seedlings previously grown in nursery beds, are placed in rows about 4 ft . apart from each other every way, and when grown, look at a distance like little shrubberics of ever-greens. The tea farms, as common throughout China in all kinds of culture, are small, and their manazement, including not merely all the steps of the culture of the plant, but the preparation of the leaves for market, is almost invariably confined to the farmer's family. The leaves are gathered thrice-abont the middle of April when the leaf buds are beginning to unfold, about a fortnight after, in the beginning of May, when the leaves are fully grown, and when the leaves again are newly formed. The first gathering yields a fine and delicate hyson, in small quantities, and with considerable injury to the plants, hence both scarce and expensive, but highly valued by the natives, and generally distributed in small quantities as presents. The after processes, for the purpose of drying and curling the leaves, are performed chiefly by means of heat applied to shallow iron pans heated by flues, and accompanied by sundry manipulations not unlike those which a baker uses in working up his leaven.

Manufactures.-In all the arts necessary to the comfort of lifo, and in not a few of those conducive to luxury, the Chinese have made considerable progress. One peculiar feature in their processes is the general absence of machinery. In almost every production the grat moving power is manual labour. Even to give the names of all the arts practised by the Chinese would far exceed our limits, and, therefore, little more than a simple reference to those most remarkable for
their economical importance, or the skill and ingenuity displayed in them, is here attempted. The silk stuffs of China have long borne a high name, and in several qualities are still unsurpassed. Tha loom in common use is worked by two persons, one of whom sits on the top of the frame, where he pulls the triddles and assista in making the various changes which must be made on the machine while in operation. By means of it the workman can imitate almost any pattern, and excel particularly in crapes and flowered satins, and damasks for official dresses. Everybody wears silks. It is the pre scribed attire of high officers; soldiers are not considered in full uniform without it. The finer kinds of it form the ordinary dresses of the opulent, while the poorest manage to deck themselves in coarser if not on common, at least on gala days. The embroidery of silk is carried on to an amazing extent, the perfection to which it has been brought creating an almost unlimited demand, both domestic and foreign, and employing myriads of the inhabitants. In cotton gooda the Chinese might have been supposed to excel, but for the wonderful inventions which have so rapidly carried that manufacture, especially in Britain, to the highest perfection, and produced fabrics, which both for quality and cheapness defy all competition. Nankeen, however, once so common, but now never seen in this country, is produced as before, of excellent quality, and continues to form an important branch of domestic manufacture. Linen seems not to be made in China. Flax is not grown, but a good substitute for it is found in the fibres of two or three plants, from which the beantiful grass-cloth, similar in appearance to linen, is extensively woven. The only woollen fabrics are felt for the soles of shoes and winter hats, and a sort of rug or carpet. The consumption of leather in China is not great, and the manufacture of it is very imperfect. Owing to ignorance of the best methods of tanning, the leather is tender, and so porous as to be almost no protection against moisture. The porcelain of China has been famous from the earliest periods. The manufacture of the finest forms of it being long known to the Chinese alone, gave them the monopoly of the world, and though in elegance of shape and design they must yield the palm to Europe, for quality of material and rich gorgeous colouring they still hold the foremost place. The chief ingredient of the ware, mixed in various proportions according to its desired fineness, is kaolin, obtained from disentegrated granite, and composed of nearly pure felspar and petuntse, which is nearly pure quartz or silex. Steatite or soap stone, with proportions of carbonate and sulphate of lime, are employed when the ware wanted is to be white, fine, and very light. The manufacture of glass is chiefly carried on at Canten, and is one of the few arts which, at lcast in regard to its finer processes, the Chinese have condescended to learn from Europeans. In every branch of it they have proved indifferent scholars, and if they are
ever to attain excellence, must still take many lessons from their masters. In beautiful lacquered ware the Chinese continue unsurpassed. Much of its excellence appears to be owing to the fine varnishes which they have learned to extract from native plants. In working in metals the Chinese have only attained to mediocrity. Bells and tripods are occasionally made of large size, but the most of their castings are comparatively small. Wrought iron is little used except for nails, screws, hinges, and other small articles. The metallic products inost deserving of notice are gong $\$$, mirrors, statuettes in copper and bronze, and various kinds of carved, chased, and filigree work, both in gold and silver. In a great number of minor articles the workmanship is exquisite. Fans, card cases, seals, snuff boxes, combs, counters, chessmen of wood, ivory, mother of pearl, tortoiseshell, \&c., exhibit a finish and delicacy which no other workmen in the world can equal.

Tiade and Commerce.-The inland trade of China, aided by the unusual facilities which it derives from a system of water communication, ramifying like net-work over all its provinces, is of incalculable magnitude. Its rivers and canals are so covered with junks and barges and swarms of smaller boats, that there does not scem much exaggeration in the estimate which makes the tonnage belonging to the Chinese, little short of the combined tonnage of all other nations. The coasting trade is small in comparison, and is much impeded not merely by the dangers of navigation, along a coast frequently visited by storms of terrific violence, but by hordes of pirates who are permitted to roum about almost with impunity, and make an easy prey of defenceless traders. Of the coasting trade there is no means of forming even an approximate estimate, but according to a return of it for the port of Foochowfoo alone for a year (two quarters of 1845 , and two quarters of 1846), 1678 junks arrived with cargoes valued at $£ 651,906$, and 1281 junks departed with cargoes valued at $£ 2,428,052$. In this return the largest exports in value are timber and paper; the largest imports sugar, salt-fish, and pease. Till the late war, the trade with foreigners, exclusive of that carried on by the mainland chiefly with the Russians, was zealously restricted to the mouth of Canton River. By the treaty of Nanking, four other ports have been thrown open, namely, Amoy, Foochowfoo, Ningpo, and Shanghae. By this arrangement the trade has been placed on a more satisfactory footing, and has increased considerably, though not at all to the extent which had been sanguinely anticipated. The articles which China can furnish for foreign export are few, consisting chiefly of tca and silk goods, and unless the demand for these increase and enable the Chinese to sell, it is not casy to see how they can purchase more largely. The following table gives the total value of the imports and exports at each of the five open ports of China, in British and foreign vessels, from 1814 to 1817.

| Ports. | 184. |  |  |  | 845. |  |  |  |

The above table only gives the legal trade, and of course excludes one item, which in amount far exceeds that of all other imports, and which, though as used, is not only worthless but noxious and demoralising in the extreme, is paid for by the Chinese in hard eash. The opium which forms this
import, is chiefly grown in British India, where the East India Company cultivate it as a monopoly, and sell it to private traders with the full knowledge of its having been grown and sold to be smuggled into China! The export from Calcutta in 1845, was 18,792 chests, and from Bombay in

1843 (the latest return), 18,321 chests; in all 37,113 chests, value $£ 4,800,000$. The amount continues to increase, and the value is about five millions. The principal imports to China from the United Kingdom, in 1847, were:-cotton manufactures, $£ 848,814$; cotton yarn, $£ 164,264$; linen manufactures, £9321; woollen manufactures, $£ 390,437$; bear and ale, $£ 9786$; iron and steel, £15,768; glass, £7494. The principal exports from China to the United Kingdom in same year were: -nankeens, 67,110 pieces; rhubarb, 148,936 lbs.; silk, raw, $2,015,288 \mathrm{lbs}$.; silk, thrown, 5167 lbs . silk, manufactured, namely-handkerchiefs, 19,005 pieces; silks and crapes in pieces, 4435 ; crapes, shawls, and handkerchiefs, in number, 16,191 ; tea, $55,355,590$ lbs. At the price of $4 s$. per Ib., this last item has a value of $£ 11,071,118$; and at 2 s .1 d . per lb., and five per cent of duty, yields to the British revenue $£ 5,067,043$. The total export of tea from China, and the total consumption in different countries on an estimated annual average of five years ending 1848, is as follows:-

| G | 8000,000 |
| :---: | :---: |

The Chinese, in carrying on their extensive dealings, domestic and foreign, have in all 24 weights and measures, but of these only six are in common use, namely, the tael $=1 \frac{1}{3} \mathrm{oz}$. avord., catty $=1 \frac{1}{3} \mathrm{lb}$. do., and pecul $=133 \frac{1}{3} \mathrm{lbs}$., used in weighing bulky articles; and decimals of a tael called, mace, candareen and cash, used in reckoning bullion, gems, drugs, \&c., 10 cash making 1 candareen, 10 candareens 1 mace. The only native coin now current is the cash, a small piece of thin circular copper about $\frac{3}{4}$ inch diameter, with a square hole in middle for convenience of stringing. It should weigh 1 mace or 58 grains troy, and its value should be $7^{\frac{1}{2}} 0$ of a dollar, but by adulteration it has become one of the basest coins in existence, and is only worth $\frac{1}{\frac{1}{2} 0}$ of a dollar, or $\frac{1}{6}$ of a farthing sterling, in other words, 12 cash $=1$ half-penny. Repeated attempts have been made to establish a silver currency, but the dexterity of the Chinese in adulterating the quality, and so passing off base as pure metal, has hitherto prevented its success. Native silver bullion, called sycee, and gold bullion of similar shape, and usually stamped with the names of the banker, and workmen, and the year and district in which it is cast, are used in larger transactions. All taxes are payed in sycee of 98 per cent. fineness. Private bankers are found in all large towns, and some of tbem pay interest on deposits. They issue paper money, which passes current in the particular districts where they are known.

People, Language, and Religion. - The Chinese belong to that variety of the human race which has been called Mongolian, but in them, its harsher features, as represented in the genuine Tartars, are considerably softened. They are generally of low stature, have small hands and feet (the last artificially made so small in the females as to become a deformity, a dark complexion, much modified by the degree of its exposure to the open air, a wide forehead, black hair, eyes and eyebrows obliquely turned upwards at the outer extremities. In thickness of lips, flattened nose, and expanded nostril, they bear a considerable resemblance to the negro. In bodily strength they are far inferior to Europeans, but superior to most Asiatics-their great assiduity, and patient endurance of fatigue, making them highly prized as labourers throughout the Indian Archipelago. The finest physical specimens of the race are to be seen in the coolies or porters of Canton. Perhaps not constitutionally, but certainly in fact, they are most deficient in courage. In their moral qualities there is much that is amiable. They are strongly attached to their homes, hold age in respect, toil hard for the support of their families, and
in the interior, where the worst kind of foreign intercourse has not debased them, exhibit an unsophisticated simplicity of manners which recals the age of the patriarchs. In the great mass, these qualities are counterbalanced or rather sup-

Chinese peasantry and watermen playing at dice. From Alexander's Costume of the Chinese.
planted by numerous vices-treachery, lying, and nameless abominations.

The Chinese tongue is unquestionably the most ancient spoken, and, with the exception of the Hebrew, the most ancient written language. The difficulties which foreigners experience in learning to speak it, are owing to the brevity of the words and peculiarities of pronunciation, numerous consonants and imperfect vowel sounds not known, at least in any European language, being in constant use, and varieties of tone producing endless varieties of meaning. It would seem, however, from the number of foreigners who make themselves understood in Chinese, that the difficulties have been somewhat exaggerated. The written characters appear to have been originally rude copies of the natural and artificial objects designed to be expressed by them, and hence, so far as this system was carried, each separate object must have been represented by a separate character. Some writers, assuming that the whole language was formed on this principle, have concluded that a knowledge of it was only to be attained by submitting to the intolerable drudgery of cramming the memory with myriads of arbitrary marks. Better judges declare, that seven-eighths of the characters have been formed from less then 2000 symbols, and that any person well acquainted with these can both read and write Chinese. In writing or printing the characters, they are not arranged horizontally either irom left to right as European languages, or from right to left as in Hebrew and cognate dialects, but in vertical columns, to be read from top to bottom. The art of making paper is said to have been known in the first century, and printing from wooden blocks in the seventh or eighth century, hundreds of years before these valuable arts were reinvented in Europe; and in the books which have continued since to appear in great numbers, are to be found treatises on almost all subjects-science, history, geography, belles letters, and poetry; embodying a literature of no mean description, though sometimes ludicrously overrated by being placed in competition with that of Europe. If it equal that of Europe in any respect, it is in the degree of encouragement which it receives; literary eminence being the sure avenue to the highest honours and offices of the state, and hence, in the words of Dr. Morrison 'the literati are the gentry, the magistrates, the governors, the negotiators, the ministers of China.' With such rewards to stimulate industry and tempt ambition, we need hardly say, that among the more comfortable classes,
education of the kind which promises to be best rewarded is almost universal. For the lower classes also, every village throughout the empire has its school, but the subjects taught are of the most elementary description, and attendance is not so general as was at one time supposed. In cities perhaps half the males receive some instruction; in the villages not more than one in twenty can read.

Judging by the multitude of temples and joss-houses seen in every quarter, and the endless number of ritual acts performed, on high festivals and in the ordinary interconrse of life, the Chinese are a most religions people. It would seem, however, that the feeling seldom goes deeper than the external act, and that veneration, when actually paid, instead of ascending to a supreme being, stops short at inferior agencies of fabulous origin, and not unfrequently fails to find a higher object than the Emperor. The religion of the state, if it may be so called, is that founded by Kou-Fu-Tse or Confucius, about 530 b.c. A kind of sacerdotal college at Pekin regulates its observance, but among many of its members, and generally among the upper classes, scepticism is said to be in fashion. Buddhism is generally professed in several provinces, and Tanism, a kind of demon worship prevalent among the Mongolians, though now decayed, once counted vast numbers of votaries. Attempts to introdnce Christianity were made by the Nestorians as early as the sixth century, but the celebrity of the Jesuit missions has thrown all others into the shade. The number of their converts is still nominally great, and bears strong testimony to their subtle policy and unwearied zeal. The great regret is, that in their eagerness to imitate the subtilty of the serpent, they forget the harmlessness of the dove, and give their sanction to a kind of mongrel religion, in which it were difficult to say whether popery or heathenism prevailed. Varions Protestant bodies carry on missionary operations in China, but hitherto with indifferent success. But a new era would seem to be approaching; for in the Annales de la Propagation de la Foi, it is stated that the young Emperor of China, who succecded his father at his death in February, 1850, having, at his accession, rejected the demands addressed to him by the mandarins for permission to persecute the Christians within his dominions, published a decree, in the month of June in the same year, permitting the free exercise of the Christian religion throvghout his dominions. The Emperor is stated to have been edncated by a Christian lady, in whom the late Emperor placed un bounded confidence.

Customs, Manners, Dress, \&c.--Early taught to suppress and conceal their real feelings, there is much of what might be called hypocrisy in the conduct of the Chinese, but it leads also to better results; it induces great politeness in their intercourse with cach other, probably carried to an extreme, but still forming an agreeable characteristic of their social relations. Under the influence of this early training, they scrupulously avoid all contradiction in conversation, and are careful not to use any offensive or irritating expressions to each other. From the same source arises the tedious, frivolous, and often absurd etiquette, and extravagant compliment, for which the Chinese are remarkable. But even here, a wish to please and gratify is sufficiently evident. An invitation to dinner is written on a slip of red paper, and is sent some days before; it is usually in this style-'On the _day, a trifling entertainment will await the light of your countenance; Tsau Sanwei's compliments.' This is followed by another card naming the hour. The dinner itself is sumptuous, wine and spirits are drank freely, and the whole affair goes off with a great deal of boisterous merriment. Fresh pork, fish, and fowls form the staple articles of food, with vegetables of various kinds. Beef and mutton are rare.

In ordinary cases, strict separation prevails between the male and female branches of a household. Betrothment is entirely in the hands of the parents, and is conducted through the medium of a class of persons called mei-jin, or go-betweens, whose office of natchmaking is considered honourable. The marriage itself is conducted with much ceremony, gay processions, and other convivialities.

The return of the new year is an occasion of unbounded festivity and hilarity in China. For some weeks previonsly, the principal streets are lined with tables, upon which articles of dress, furniture, and fancy, are disposed for sale in the most attractive manner. At this season, too, all accounts are ex-
pected to be adjusted, and if delayed or neglected, the creditor has sometimes recourse to the expedient of carrying off the house or shop door of his debtor, leaving his premises exposed to interlopers. On new year's morning all shops are shut, and the streets nearly deserted. As the day advances, however, they begin to fill with well-dressed persons, in holiday attire, hastening to make calls of friendship and congratulation. Who that knows the practice in Scotland, on similar occasions, will fail to be struck with the resemblance between it and that of this remote empire. Gambling is universal in China. Hucksters at the roadside are provided with a cup and sancer, and the clicking of their dice is heard at every corner. Gaming houscs are opened by scores; and women, in the privacy of their apartments, while away their time at cards and dominoes. Porters play by the wayside while waiting for employment; and hardly has the retinue of a great official seen the latter enter the house, than they pull out their cards or dice, and squat down to a game. Dress, like other things, undergoes its changes in China, and fashions alter there as well as elsewhere; but they are not as rapid or as striking as among Enropean nations. The full costume of both sexes, is both commodious and graceful; its principal

mandarin in dress of ceremony, chinese lady, her son, and servant.-From Alexander's Costume of the Chinese.
components are inner and outer tunics, of various lengtlis, made of cotton or silk, reaching below the loins, or to the feet; the lapel on the right side folds over the breast, and fits close about the neck, which is left uncovered. The sleeves are much wider and longer than the arms, have no cuffs or facings, and in ordinary cases, serve for pockets. The shoes are made of silk or cotton, with thick felt soles. The head dress of married females is becoming, and even elegant. The copious black hair is bonnd upon the head in an oval formed knot. No caps, bonnets, hoods, or veils are worn abroad; a light bamboo hat, or an umbrella, protects from the sun. The custom of wearing extravagantly long nails, for which the Chinese have been celebrated, is, in reality practised by very few. It is not regarded as singular, but is considered by well-bred persons as vulgar, and in bad taste. The extraordinary and nuiversal practice, peculiar to China, of compressing the feet of females into unnatural form and dimensions, has been already alluded to. Dwelling-houses in China are generally of one story, having neither cellars nor basements. The common building materials are bricks, sifted earth, matting, or thatch, for the walls, stone for the foundation, brick tiling for the roof, and wood for the inner work. The fronts present no opening but the door. The walls are often stuccoed, but not painted, and the bricks are occasionally rubbed smooth with stones, and the interstices pointed with fine cement. Tho general internal arrangement of a Chinese dwelling of the better sort, is that of a series of rooms of different dimensions,
separated and lighted by intervening courts and accessible along a covered corridor, communicating with each, or by side passages leading through the courts. The Chinese usually travel by water; where this is impossible, sedan chairs are used. Goods are carried by coolies, with poles and slings.
Government, Laws, Army, and Navy, \&c.-This is an unmingled despotism. The Emperor unites in his person the attributes of supreme magistrate and sovereign pontiff, and as 'Heaven's Son' is to heaven alone accountable. In practice, however, the rigour of this despotism is considerably softened, and the form of Government assuming the name, would doubtless possess many of the realities of the patriarchal, were the Emperor, who calls himself the 'father of his people,' able to keep a watclful eye over all his 'children.' Instead of this, the greater part of his time is spent within the inclosures of his palace at Pekin, and corruption, in every form which ingenuity can devise, is rampant throughout the empire. The Emperor's principal ministers, four in number, form the interior council chamber, and beneath them are a number of assessors, who form the principal council of state. The Government business is distributed among six boards, having cognizance respectively of all civil officers of revenue, of rates and ceremonies, of military affairs, of crime, of public works. There is, besides, an office of censors, 40 or 50 in number, who go out into the empire as imperial inspectors, and are privileged to make any remonstrance to the Emperor without endangering their lives. The provinces, either singly or by twos, are under a governor and sub-governor, and each province has also a chief criminal judge and a treasurer. Particular magistrates, estimated at 14,000 , preside over particular districts and cities, and, instead of being permanent, are changed about once in three years. The great object aimed at is to maintain a strict surveillance and mutual responsibility among all classes; in other words, to imbue them with fear of the Government and infuse a universal distrust. The chief protection of the people is in a body of laws, called Ta-Tsing-LiuhLi , that is, statutes and rescripts of the great pure dynasty, which are held in high regard, and agreeably to which, with occasional violations, all public functions are discharged. The military force of China has been estimated at more than $1,000,000$, but those receiving pay do not excced 700,000 . The real number is of little consequence, as the great body of them are of the most worthless description, scarcely fit for show, and not at all fit for use. The accompanying woodcut represents two of these defenders of the celestial empire;

MILITARY MANDARIN AND CHINESE SOLDIER.
From Alexander's Costume of the Chinese.
but rather favourable specimens on the whole, it may be presumed, notwithstanding their absurd-looking paraphernalia. The navy consists of two fleets-one for rivers and another for the sea. The war junks are large and showy, but miserably equipped, and so far from being able to cope with a regular enemy, are not able to clear their own seas of pirates. The
river fleet has 1036 ships, 9500 men; and the war fleet, 918 ships; $98,421 \mathrm{men}$; together, 107,921 men. The largest guns, do not exceed a 12-pounder, and are so fixed on wooden carriages that they can neither be elevated nor depressed. The revenue of the empire, derived from customs, excisc, and more especially from a land and house or workshop tax, is payable partly in sycee silver and partly in grain, and amounts to about 25 millions sterling.

History. - The early history of the Chinese is shrouded in fable, but it is certain that civilization had advanced much among them, when it was only beginning to dawn on the nations of Europe. Their earliest existing records consist of the compilations of Confucius, 550 b.c., from which period they descend in an unbroken series to the present day. Under their earliest, namely, the Tsin dynasty, they attained considerable prosperity, and tempted the rapacity of the Tartars; as a protection against whose incursions the great wall was built. About the end of the second century the empire was divided into three states, and continued so till A. D. 585 , when it became united under one ruler. Three centuries later, the right to the throne was disputed, and civil war raged till an adjustment took place by the establishment of the Tsoong dynasty under Taetsoo, A.D. 950. Under this dynasty great progress was made in literature and art. New inroads of the Tartars now pressed the Chinese so hard, that they called in the aid of the Mongols, who freed them from their oppressors, but gave them a new master in the celebrated Kublai Khan, who founded the Mongol dynasty, and removed the capital from Nanking to Pekin. His ninth descendant was driven from the throne, and a native dynasty, called Ming, again succeeded in 1366 , in the person of Hungwu. A long period of peace ensued, but was broken in 1618 , when the Manchoos, a mixed Tartar and Mongol race, gained the ascendancy, and, after a war of 27 years, established the existing Tartar dynasty in the person of Shunchy. According to the Chinese, their dynasties, 26 in number, embrace a period of about 5000 years, during which 236 sovereigns have held the throne. The earliest authentic accounts of China, published in Europe, are those of Marco Polo, who visited the country in the 13 th century. The first British intercourse was attempted under Queen Elizabeth, in 1596 , but the vessel sent did not reach its destination. A trade was subsequently established by the East India Company, but no direct intercourse between the Governments took place till the embassy of Lord Macartney, in 1792. A second embassy, in 1816, by Lord Amherst, was treated with insolence, and returned with a letter from the Emperor to the Prince Regent, bearing among other things, 'I have sent thine ambassadors back to their own country, without punishing them for the high crime they have committed.' The arrogance thus manifested could not fail, sooner or later, to bring on a collision; and accordingly, in 1841, the British, on being refused redress for injuries, partly real and partly alleged, proceeded to hostilities, and after scattering, almost without a struggle, every force which was opposed to them, were preparing to lay siege to Nanking, when the Chinese found it necessary to sue for peace. In consequence of it, China is virtually opened, but the treaty is generally complained of as having very imperfectly provided for British interests, and still more imperfectly for British honour.(Gutzlaff's China Opened; Martin's China; The Middle Kingdom; Fortune's Wanderings; Parliamentary Papers, \&ic.)

CHING-Hai, a seaport tn. China, prov. Che-kiang, at the mouth of the river leading to, and 9 m . N.E. Ning-po, at the foot of a hill. It is surrounded by a wall 20 ft . high, and 3 m . in circumference ; with extensive suburbs stretching along the water side. It has two batteries on the river side, and a strong citadel, on a precipitous cliff 250 ft . high. In Oct., 1841, a severe engagement took place in the vieinity, between the Chinese and the British, in which the former were signally defeated.

CHING-Kiang-Foo, or Tchang-Kiang, a city, China, prov. Kiangsoo, r. bank, Yang-tse-Kiang, near the junction of the Imperial Canal ; lat. $32^{\circ} 17^{\prime} \mathrm{N}$. ; lon. $119^{\circ} 25^{\prime} \mathrm{E}$. It is advantageously situate for trade, and surrounded by a lofty and solid wall, 4 m . in circumference, with hills of considerable height beyond. Extensive suburbs stretch along the river and the canal ; and the bustle and activity exhibited on the waters afford a striking evidence of the industry of the natives, and of the commercial importance of the city. It
forms, indeed, the key of the empire, as the blockade of the river and canal at this spot would, in a great measure, prevent all communication between the N. and S. The city is strongly fortified; but, in 1842, it was taken by the British, after a determined resistance on the part of the Manchoo garrison.

CHING-tif, or Tching-tih, a tn. China. See Geho.
CHing ting, or Tching-ting, a tn. China, prov. Pechelce, 1 . bank, Honto, 165 m. S.W. Pekin. It is about 4 m . in circumference, and contains several monuments erected in honour of heroes, one of which is consecrated to the first Emperor of the IIan dynasty. The neighbouring mountains abound with rare plants.

CIIING-rou, or Tcming-tou, a tn. China, prov. Sechuen; lat. $30^{\circ} 42^{\prime} \mathrm{N}$.; lon. $104^{\circ} \mathrm{E}$. It is traversed by several canals, and is a large, populous, and commercial town. It was formerly the residence of the Emperors, and one of the largest towns of China; but, in 1646, during the civil wars, it was almost entirely destroyed by the Tartars.

CHINGFORD, par. Eng. Essex; 3000 ac. Pop. 971.
CHINGLEPUT, a coast dist., and its cap. Hindoostan, in the Carnatic, presid. Madras. The district, which lies s: of Arcot and Madras, area, about 2742 sq . m., has generally a bad soil, broken up frequently by granite rocks. Water being scarce, a large portion of the land does not repay the cost of cultivation; the more fertile localities yield grain, fruit, oil, \&e., which are exported to Madras. The palmyra palm thrives with little care, and is abundant and cheap. There are manufactures of cloth on a small scale. The chief towns are Chingleput and Conjeveram. This tract of country was, in 1750 and 1763 , obtained by the East India Company from the Nabob of Arcot. It was invaded by Hyder Ali in 1768, and again in 1780, when it was nearly depopulated by famine and emigration. -The rown, cap. of the dist., is 20 m . W. from the Bay of Bengal, and 35 m . S.S.W. Madras ; lat. $12^{\circ} 41^{\prime} 59^{\prime \prime} \mathrm{N}$. ; lon. $80^{\circ} 1^{\prime} 8^{\prime \prime} \mathrm{E}$. (L.) ; in a small valley, confined on all sides by hills, and nearly half covered by an artificial lake. The fortress, formerly of considerable extent and strength, has been allowed to go into decay, and is now garrisoned by a few invalids. In 1751, it was taken by the Frencl, but, in the following year, was retaken by the British, under Clive. The town outside the walls is a mere village.

CIIINI, a large vil. N. IIindoostan, dist. Kunawur, one of the most rugged and mountainous in India. It stands at the height of $10,200 \mathrm{ft}$. above the sea, yet grapes grow here in the greatest perfection, 18 different varieties being cultivated in the district.

CHINIAN (St.), a tn. France, dep. Herault, agreeably situate in a large and beautiful valley on the Bernasobre, 48 m. W.S.W. Montpellier. Its staple manufacture is broad cloth, which is extensively made, and both sent into the initerior of France and exported to the Levant. There are also tanneries, distilleries, dye-works, and three annual fairs. Pop. 2941.

CHiNiNi, or Chineanee, a tn . Punjab, 120 m . N. by E. Lahore ; lat. $32^{\circ} 55^{\prime} \mathrm{N}$.; lon. $75^{\circ} 8^{\prime} \mathrm{E}$. It is a place of considerable size, is neatly built, and has a palace belonging to the rajah. Being in an elevated position, it commands extensive and magnificent views,

CHINNACHIN, a large tn . Nepaul, 255 m . N.W. Khatamandoo; lat. $29^{\circ} 10^{\prime} \mathrm{N}$.; lon. $81^{\circ} 15^{\prime} \mathrm{E}$. The houses are of brick and stone, with flat roofs; it has two temples, dedicated to Siva; and an export trade in horses, chowries, sheep, salt, musk, drugs, and woollon cloth; the imports are metals, spices, and cloth.

CHINNOCK, three pars. Eng. Somerset:-1, (East), 2090 ac. Pop. 735.-2, (West), 600 ac. 1'op. 561.3, (Middle), 280 ac. Pop. 222.

CIIINNOR, par. Eng. Oxford; $2760 \mathrm{ac} . \quad$ Pop. 1308.
CIIINON [anc.Caino Turonum], a in. France, dep. Indre-et-Loire, 26 m. W.S.W. Tours, r. bank, Vienne, between that river and a hill, on which are seen the extensive ruins of its old castle. It is rapidly improving, its old ramparts being replaced by spacious quays. It contains a townhall and college, with manufactures of serges, druggets, earthen ware, and saltpetre; and has a considerable trade in grain, wine, brandy, nut-oil, wax, honey, quills, and prunes. Rabelais was borin in the vicinity. Pop. 4859.

CHINRAIPATAM, a tn. Hindoostan, Mysore territory, 40 m. N.N.W. Seringapatam ; lat. $12^{\circ} 52^{\prime}$ N.; lon. $76^{\circ} 30^{\prime}$ E. CHINSURAH, a tn. Hindoostan, prov. Bengal, beautifully situate on the edge of the Hoogly, 20 m . N. Calcutta; lat. $22^{\circ} 52^{\prime} \mathrm{N}$., lon. $88^{\circ} 30^{\prime} \mathrm{E}$. It contains many neat, though small, houses, in the Dutch style, having been formerly a Dutch settlement. It is now a military station, has a chapel, and several schools; those under the missionaries of the Free Church of Scotland having an average attendance of 740. It is celebrated for the manufacture of cheroots. Pop. 14,000.

CHIO, Chios, an isl. Ngean Sea. See Scro.
CHIOBBE, a tn. China, prov. Fokien, 15 m. S.W. Amoy; lat. $24^{\circ} 35^{\prime} \mathrm{N}$. ; lon. $117^{\circ} 55^{\prime} \mathrm{E}$. ; on a considerable river, which bears different names, according to the district through which it flows. Here it is 300 yards wide, and navigable at high water for junks of about 400 tons. The town is large, has a custom-house and citadel, and along the river are numerous fortifications. It is a great emporium of common china ware; and a considerable number of the inhabitants are employed in the fisheries, and in the cultivation of the soil. There are no fewer than 18 villages in the vicinity, one of which contains a body of R. Catholics, under the superintendence of a Spanish priest. The district of Leung-key, in which the town is situated, is famed for the cultivation of the mulberry tree, and the rearing of silk-worms. Pop. of Chiobbe, estimated at 300,000 --(Naut. Mag., 1847.)

CHIOGGIA, or Chiozza, a seaport tn. Austrian Italy, gov. Venice, on the Adriatic ; lat. $45^{\circ} 12^{\prime} 54^{\prime \prime} \mathrm{N}$.; lon. $12^{\circ} 17^{\prime}$ E. (R.); 15 m. S. by W. Venice, at the S. extremity of the lagoon; situate on an island, and built partly on piles. It is a handsome town, and contains many good streets. The principal one is lined with porticos. It has a cathedral, several other churches, an hospital, orphan asylum, workhouse, custom-house, theatre, gymnasium, philological and theological seminary, a female school, and an evening-school, in which upwards of 300 poor children are instructed. A stone bridge, of 43 arches, connects the S. extremity of the island with the mainland. The harbour, in which there are 17 ft . water, is protected by 2 forts, and is considered one of the strongest places on the Venetian lagoons. It has considerable manufactures of cordage, lace, \&c., and several shipbuilding establishments, with, altogether, 36 slips. It has also a considerable coasting trade, an active fishery, and an extensive traffic in German and Italian produce. Chioggia is the seat of a bishopric, and of the government of the district. Pop. 23,800.

CHIPIONA [anc. Turris Cepionis], a tn. Spain, prov. of, and 12 m . N.N.W. Cadiz, on the Atlantic. It contains a parish clureh, in which is an image of the Virgin, to which numerous pilgrimages are made; an hospital, and primary school. The inhabitants are chiefly employed in the culture of the vine, from the produce of which both excellent wine and brandy are made, which are largely exported. Pop. 1731.

CIIPPENHAM, a tn. and par. England, co. Wilts. The town is 12 m. N.E. Bath, l. bank, Avon, over which there is a very handsome old stone bridge, of 22 arches. It is a handsome, thriving-looking town, of very attractive appearance, with one principal street, from which all the others diverge; lighted with gas, well paved, and drained, and always kept remarkably clean; houses well built, generally of Bath stone, from the quarries of Box, in the neighbourhood; but many of the cottages and smaller houses are of brick; supply of water abundant. It has a parish church, an ancient Gothic structure, with an elevated spire ; chapels for Baptists, Wesleyans, Independents, and Primitive Methodists; a townhall, numerous schools, several charitable and benevolent institutions, and a beautiful little cemetery. It has a very considerable retail trade. Woollen manufactories were formerly numerous, but there is now only one. There is also a small manufactory of silks, and a large flour-mill; and tanning and malting are carried on extensively in the town and neighbourhood. Chippenham is governed by a mayor, four aldermen, and 12 councillors, and returns a member to Parliament. Area of par. 9100 ac. Pop. (1851), 5002.-(Local Corres pondent.)

CHIPPENHANI, par. Eng.Cambridge; 4500 ac. P. 666.
CHIPPEWA.-1, A vil. Upper Canada, l. bank, Niagara, near the confluence of the Welland Canal, 2 m . above the great falls. Pop. (1852), 1193.-2, A river, U. States, Wisconsin.

It is formed by the junction of the Ajasoni and Manidowish; lat. $45^{\circ} \mathrm{N}$., whence it flows S.W., and, after receiving a large tributary from the right, and a smaller one from the left, it falls into the Mississippi, about lat. $44^{\circ} 25^{\prime}$, immediately below Lake Pepin. Total course from the source of the Manidowish, on the frontier of Michigan, 150 m .

CHIPPEWAYAN, or Chippewyan (Fort), a fort, British N. America, on a rock, near the N. bank of Lake Athabasca, at the confluence of the Slam river; lat. $58^{\circ} 40^{\prime}$ N.; lon. $112^{\circ} 22^{\prime}$ W. It belongs to the North-west Company, and is the centre of their commercial operations, and the general rendezvous of all the traders of the surrounding country.

CHIPPEWAYS, a tribe of N . American Indians, U. States and Canada. They are distributed through Wisconsin, Michigan, on the Chippeway, and the Ottawa; are tall, active, and well formed, and subsist chiefly by hunting and fishing. They amount to about 11,000 .

CHIPPING, two pars. Eng.:-1, Lancaster ; 8990 ac. Pop. 1675.-2, (Warden), Northampton; 2440 ac. Pop. 545.

CHIPPING-Campden, a tn. England. See CampdenChipping.

CHIPPING-Norton, a market tn. and par. England, co. Oxford. The Town, picturesquely situate on the slope of a hill, 18 m . N.W. Oxford, consists of one main street, with several subordinate streets diverging from it; is amply supplied with water, partially paved, and well lighted with gas; houses in general built of stone, obtained in the neighbour hood. The townhall is a substantial Doric building, and the parish church is large and elegant. There are, besides, places of worship for Baptists, Wesleyan Methodists, Friends, and R. Catholics; also, an endowed grammar-school, national and British schools, and two ladies' boarding-schools. There is here a manufactory of woollen shawls, tweeds, and horsecloths. Chipping-Norton returned two members to the House of Commons, from a very early period, up to the reign of Edward 1II. The government of the town is vested in a mayor, four aldermen, and 12 councillors. Pop. 2029. Area of par. 4780 ac. Pop. (tn. inclusive), 3031.-(Local Correspondent.)

CHIPPING-Sonbury, a market tn. and par. England, co. Gloucester. The town is situate at the foot of a hill, $24 \frac{1}{2} \mathrm{~m}$. S.S.W. Gloucester, and $1 \frac{1}{2} \mathrm{~m}$. E. the Yate station, on the railway from Bristol to Gloucester. Within the last few years the principal street, which is wide and spacious, has been paved; and the appearance of the town, in other respects, has been greatly improved. It has an ancient structure, with a lofty tower; places of worship for Baptists, the Society of Friends, and R. Catholies; an endowed grammar-school, a national school, and several valuable charities. Malting is carried on to some extent; and in the neighbourhood are several coal-mines, lime-kilns, and stone quarries. Area of par. 120 ac. Pop. 1273.

CHIPROVATZ, or Tchiprovatz, a tn. Europcan Turkey, in Bulgaria, l. bank, Zibritza, at the foot of Mount Vidich, 46 m. S. Widdin.

CHIPSTABLE, par. Eng. Somerset; 2420 ac. Pop. 389.
CHIPSTEA1, par. Eng. Surrey ; 2490 ac. Pop. 666.
CHIQUIMULA (de la sierra), a tn. Central America, state of, and 75 m. E. by N. Guatimala. Considerable trade is carried on here, and maize is extensively raised in the neighbourhood. Pop. 6000.—The name Isthmus of ChiQUIMULA, is given to that portion of this state extending along the coast of the Carribean Sea, from the mouth of the Motagua to the N.W. extremity of Honduras Bay. The distance between the Atlantic and Pacific, across the narrowest part of this isthmus, is 150 m .

CHIQUITOS, a prov. Bolivia, dep. Santa Cruz de la Sierra, extending, in an irregular oval, between lat. $14^{\circ}$ and $21^{\circ}$ S., and lon. $55^{\circ} 30^{\prime}$ and $62^{\circ} 30^{\prime}$ W.; area, $108,000 \mathrm{sq}$. m., or equal to half of France. This immense territory is bounded, from E. to N., by the Paraguay and the Brazilian province of Mato Grosso ; N.W. it is separated from the Moxos by marshes and uninhabitable forests; W. the Rio Grande divides it from the province of Santa Cruz; while to the S. lies the unclaimed wilderness of the Gran Chaco. In the middle of this region rises a mountain-system of moderate height, and composed of several chains of hills, extending N.N.W. to S.S.E., which divides the waters flowing into the Amazons from those which join the La Plata. From these chains of
hills, which are named-from the adjoining missions-sierra de San Lorenzo, sierra de Santiago, sierra de San Juan (or Sunsas), \&c., there flow into the Paraguay, and thence into the la Plata, the rivers Tucabaca, San Rafael, Tapanakich, and San Tomas, all more or less navigable during the floods. The Tucabaca and San Rafael unite to form the Otuquis, on the banks of which it was attempted to found a settlement, having for its especial object the navigation of the rivers downwards to the sea. From the opposite side of the hills, the rivers Magdalena or San Mignel, Scrre, Rio Verde, Baures, and Barbados, hasten N. to the Itenez or Guapore, which descends by the Madeira into the Amazons. The two last named rivers are the largest, and may be navigated in boats to the foot of the hills. There are many fresh-water lakes, abounding with fish, in the plains of the Chiquitos; but the chief lakes are the Salinas of San José and Santiago, lat. $29^{\circ} 20^{\prime} \mathrm{S}$. ; lon. $60^{\circ} \mathrm{W} .$, which yield excellent salt.

The country of the Chiquitos is not by any means so intemperately lot as might be supposed from its position; nor, though beset with lakes and marshes, is it troubled with intermittent fevers. The soil is extremely rich, and nourishes some of the most superb forests in the world. Vanilla and indigo grow wild, and are but little heeded. Cotton, sugar, and tamarinds are exported to a small extent; but, generally speaking, the prodice of the country is valueless, through want of markets.

This region is said to have been thickly peopled when first visited by the Spaniards, in the 16 th century; but of the 100 nations then described as inhabiting it, not more than 13 can be recognized at the present day, as the policy of the Jesuits, the founders and rulers of the missions, who, while they discountenanced the use of a multiplicity of tongues, gave a constant preference to that of the Chiquitos, has nearly attained its proposed end, numerous petty tribes or nations having become extinct or absorbed in the predominating one. The Chiquitos, who originally occupied the hills and elevated plateau, united agriculture with the chase, and thus possessing large resources, were always comparatively numerous. Their language, which is now the common language of the missions, is characterized by its copiousness, and presents the singularity of a separate vocabulary for female use. The native population of this immense and fertile territory amounted, in 1830 , to only 15,316 souls, distributed among ten mission stations, namely, San Xavier, Concepcion, San Miguel, Santa Anna, San Ignacio, San Rafael, San José, Santiago, Santa Corazon, and San Juan. In these remote Jesuit missions, which were originally connected with Paraguay, the stranger is astonished at the size and decoration of the churches, and at the perfection of the church music in which the natives take a part. The grand designs, and persevering labours of the Jesuits, are fully exhibited in these sequestered wilds.

CHIRBURY, a vil. and par. England, co. Salop; 11,880 ac. The village, situate on an acclivity $16 \frac{1}{2} \mathrm{~m}$. S.W. Shrewsbury, is well kept and amply supplied with water, and is, in general, well built, although many of the houses are of wood and plaster, in the style of the 17 th century. It has the ruins of a priory of St. Augustine, part of which forms the present parish church. Inhabitants, agriculturist. Pop. 1593.

CHIRICO-Raparo (San), a tn. and com. Naples, prov. Basilicata, 17 m. E.N.E. Lagonegro. Pop. 3747.

CHIRIQUI, a lagoon, Central America, formed by the Caribbean Sea, state Costa Rica, dep. Veragua, between lat. $8^{\circ} 50^{\prime}$ and $9^{\circ} 20^{\prime} \mathrm{N}$. ; lon. $81^{\circ} 20^{\prime}$ and $82^{\circ} 10^{\prime} \mathrm{W}$. It receives a river of same name, and several other considerable streams; is separated from the Caribbean Sea by a range of islands ; has three entrances, the largest of which is 2 m . wide, and is capable of containing ships of the largest class, having an average depth of about 100 ft . water.

CHlRK, a vil. and par. Wales, co. Denbigh; 4635 ac. The village, delightfully situate $19 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Chester, at the S.end of a somewhat clevated valley of same name, between and connecting the lower valleys of the Dee and Ceriog, consists of one straggling but well-kept street, houses mostly of brick, well-built, clean, and comfortable ; is well-supplied with water, brought in pipes from a fine spring distant 2 m . It has a gothic church, Welsh Methodist chapel, a girls', and two public and two private schools, two friendly societies, and a parish library. A small quantity of iron is made, but the chief occupation is coal and lime-stone mining. Chirk castle,
a Norman fortress, besicged by Cromwell, is in the parish, and still in good preservation. Sir Thomas Middleton, the Parliamentary general, aud the Countess of Warwick, afterwards the wife of Addison, were born in the parish. Pop. 1611.(Local Correspondent.)

CHIRNSIDE, a vil. and par. Scotland, co. of, and the former 8 m . N.W. Berwick.-The village consists of two streets nearly half a mile in length, and has a church, a Dissenting meeting-house, and an annual fair. Hume, the historian, was brought up in the parish from lis infancy. Par., 4 m. by 3 m . Pop. 1203.

CHIRTON, a vil. and township, England, co. Northumberland, about $1 \mathrm{~m} . \mathrm{S}$. by W. North Shields. It is a straggling place, with a mining population. Lord Collingwood was born in Chirton House in the vicinity. Pop. 4360.

CHISELBOROUGH, par. Eng. Somerset; 810 ac. P. 540.
CHISELHAMPTON, par. Eng. Oxford; 1210 ac. P. 153.
CHISELHURST, par. Eng. Kent ; 4050 ac. Pop. 1792.
CHISHALL, two pars. England, Essex. :-1, (Great); 1410 ac. Pop. 466.-2, (Little); 1420 ac. Pop. 96.

CHISLEDON, par. Eng. Wilts ; 5710 ac. Pop. 1176.
CHISLETT, par. Eng. Kent; 5180 ac. Pop. 1097.
CHISWELL'S ISLANDS, a group of isls. near the S. coast of Russian America, lat. $59^{\circ} 30^{\circ} \mathrm{N}$. ; lon. $149^{\circ} 2^{\prime} \mathrm{W}$. They appear to be barren rocks, entirely destitute of vegetation.

CHISWICK, a vil. and par. England, co. Middlesex, 5 m. W. Hyde Park Corner, London; 1120 ac . It has an ancient chureh, and several schools, contains the gardens of the horticultural society of London and Devonshire House, in which Fox and Canning died. It is a station on the Brentford Loop branch of the London and south Western Railway. Pop. 5811.

CHITHURST, par. Eng. Sussex; 1100 ac. Pop. 233.
CHITLONG, a tn. Nepaul, 20 m . S.W. Khatamandoo ; lat. $27^{\circ} 35^{\prime} \mathrm{N}$. ; lon. $84^{\circ} 50^{\prime} \mathrm{E}$. It is well built, and is chief town of a district ; its inhabitants are mostly Newars.

CHITRAL, a dist. and tn. Kafiristan, S . slope of the Hindoo-Koosh. The mistrict consists of a valley about 100 m . inlength, extending S.W. to N.E., and from 15 to 20 m . broad, watered by the Kooner, which flows along the eentre. It lies between lat. $35^{\circ} 45^{\prime}$ and $36^{\circ} 25^{\prime} \mathrm{N}$.; lon. $71^{\circ} 20^{\prime}$ and $73^{\circ} 10^{\prime}$ E.—The Town, eap. of the district, l. bank, Kaina, is 60 m . S.S.E. Budukshan ; lat. $36^{\circ} 11^{\prime} \mathrm{N}$.; lon. $71^{\circ} 59^{\prime} \mathrm{E}$. It contains a bazaar, and between 3000 and 4000 inhabitants, chiefly Shia Mahometans, and a few Hindoos.

CHITVAGONG, a dist. Hindoostan, S.E. extremity of prov. Bengal, beyond the Brahmapootra, bounded, N. by Tipperah, E. by Burmah, S. by Aracan, and W. by the Bay of Bengal, between lat. $21^{\circ}$ and $23^{\circ}$ N., and lon. $91^{\circ}$ and $93^{\circ}$ E.; length, N. to S., about 120 m .; average breadtb, supposed to be not over 25 m ., though in some parts it is 50 m . broad, but its E . boundary is not accurately known; area, estimated at 2987 sq. m. ; cap. Islamabad or Chittagong. Along the coast are several islands of considerable extent, including those of Hattia, Sundeep, and Bameeny, all of which are under the jurisdietion of Chittagong. The Mugh mountains traverse the district N. to S., seemingly about its centre, and form, to a considerable extent, a water-shed; the streams from their $W$. slope flowing to the Bay of Bengal, while those from their E. flow to the Koludyng, an affluer.t of the Aracan River. In the N.F. the Blue Mountain attains an clevation of 5600 ft ., and near the centre are Pyramid Hill, 3260 ft ; Bring's Hill, 2360 ft . ; Tyn IIill, 3100 ft ; and Eadgong Hill, 2230 ft. Several streams water the district, of which the most considerable is the Karnaphuli or Chittagong River, formed of the rivers Chingree and Kurmsoolee, which, rising in the hills about lat. $22^{\circ} 45^{\prime}$ N., lon. $92^{\circ} 45^{\prime}$ E., after a circuitous course, join about lat. $22^{\circ} 38^{\prime} \mathrm{N}$., whence the united strean flows in a winding channel W.S.W. past Islamabad, below which, about 10 m ., it falls into the Bay of l Sengal by a wide estuary. At Islamabad it is about 1 m . wide, but above that town it contracts to about 200 yards. The climate is similar to that of Bengal, excepting that the rainy season sets in earlier, and continues later. The level and fertile lands are chiefly on the coast, and in numerous valleys between the hills. They yield large crops with little labour. Excellent coffee, ginger, betel, plantains, indigo, rice, cotton, sugar-cane, tobaceo, and capsicums are produced; and hogs, goats, and poultry are reared. On the sea-coast the Government has a manufactory

Vol. I.
of salt. The exports are chiefly timber, planks, canvas, coarse cloths, and elephants, which are large and well suited for the camp and the chase. The inhabitants consist of aborigines resembling the Burmese, Bengalcse, and Mughs; the last imigrated in large numbers from Aracan, after the conquest of that country by the Burmese in 1783. Exclusive of the last named race, who are chiefly small traders and mechanics, the population is presumed to be about $1,000,000$. The Mahometans exceed the Hindoos, in the proportion of two to three ; and there are no Bhuddists. During the wars between the Moguls and Afghans, Chittagong was held by the Bhuddists of Aracan. In 1760, it was ceded to the East India Com pany by Jaffier Ali Khan; and, in 1826, when the Company acquired A racan from the Burmese, the political superintendence of Chittagong was comprehended within the government of Aracan, and has so coutinued.

CIIT'TAI, one of the Laccadive isls. in the Indian Ocean 115 m . from the S.W. coast of Hindoostan ; lat. $11^{\circ} 40^{\prime} \mathrm{N}$.; lon. $72^{\circ} 42^{\prime}$ E. (R.)

CHITTELDROOG [native, Situla Durga, spotted castle], a tı. and fortress, Hindoostan, dominions of Mysore, but occupied by a British garrison, on a cluster of rocky hills, about 800 ft . high, forming the extremity of the Chitteldroog ridge, 280 m . W.N.W. Madras ; lat. $14^{\circ} 4^{\prime} \mathrm{N}$. ; lon. $76^{\circ} 30^{\circ} \mathrm{E}$. The town within the fortress is neither large nor populous, but its principal street is spacious; that outside the fortress stretches along the the base of the hill or droog, and is enclosed on the N.E. by solid well-cut ramparts of granite. Chitteldroog is probably the most elaborate existing specimen of the fortified rocks in the S. of India. An endless labyrinth ot fortifications, all of solid masonry, winds irregularly up from rock to rock to the summit, guarding every accessible point ; the ascent is partly by steps, and partly by shallow notehes cut in the surface of the rock. The more exposed points are crowned with batteries. The country around Chitteldroog is noted for the great variety and excellence of its fruits.

CHITTLEHAMPTON, a vil. and par. England, co. Devon. The village, about 7 m. S.E. Barnstaple, is finely situate on the slope of a hill, and surrounded by beautifinl meadows and pasture lands. It consists of one main street, with an elegant square in the centre; supply of water abundant. The Established church, erected in the 13 th century, is a gothic structure, and has a tower. There are also two Baptist mceting-houses, a chapel of ease, and two schools. Area of par., 5700 ac . Pop., ehiefly agricultural, 1893.

CIIITTOOR, or Chitrore.-1, A tn. and fort, Hindoostan; prov. Rajpootana, r. bank, Bairass, 70 m . N. E. Odeypoor; lat. $24^{\circ} 52^{\prime}$ N. ; lon. $74^{\circ} 45^{\prime} \mathrm{E}$. The Town was formerly, and for several centuries, capital of the principality of Odeypoor, and celebrated for its strength and riches. It has lost much of both, but is still a considerable and a finetown, containing many temples and other well-eonstructed buildings, inelnding two handsome towers of white marble, about 100 ft . high, and finely earved, dedicated to Siva.-The FORT, formerly considered one of the strongest in India, stands upon a steep rock overlooking the town.-2, A tn. Hindoostan, Carnatic, situate in the Eastern Ghauts, not far from r. bank, Poiney, an affluent of the Palaur, 81 m . W. Madras ; lat. $13^{\circ} 15^{\prime} \mathrm{N} . ;$ lon. $79^{\circ} 10^{\prime}$ E. It was formerly one of several small pollams or hill distriets, and came into possession of the English in 1801, though the hill chiefs were not finally subdued till 1804. Near Chittoor are a series of very remarkable antique tombs, covering an area of $1 \mathrm{sq} . \mathrm{m}$., of which neither history nor tradition exist ; they are said to have a close resemblance to the Druidieal remains in Great Britain, and are attributed, by the natives of India, to dwarfs and fairies. Most of them are formed of enormous slabs of granite, laid as floors, walls, and roofs; the sarcophagi, containing the dead bodies, being placed on the floor slab, and covered to the depth of 3 or 4 ft . with eartl. Vessels of common red terra cota, filled with earth, were found in them, of no remarkable workmanship, but differing wholly from those now used in India.

CHITTliA, a tn. Hindoostan, presid. Bengal, prov. of, and 87 m . S.W. Bahar. It is the seat of a court of justice; but has an unhealthy elimate.

CHIURO, a tn. and com. Austrian Italy, prov. of, and about 10 m. E. Sondrio, on a slope of the hills which confine the r. bank of the Adda. It has an important anuual fair, lasting four days. In its vicinity rich copper pyrites has been dis-

87
covered. The plague which ravaged Lombardy, and particularly Milan, $1629-30$, is said to have first appeared here. Pop. 2314.

CHIUSA.-1, A tn. Sardinian States, Piedmont, prov. of, and 8 m . S.E. Coni, 1. bank, Pesio. It is well built, and has silk-mills, and manufactures of silk and glass, particularly mirrors. It contains the ruins of the old castle of Mirabella. Pop. $7000 .-2$, A tn. Sicily, prov. of, and 30 m . S. by W. Palermo. Agates are found in the neighbouring district. Pop. 6002.-3, Chiusa, or Klausen, a tn. Austrian Tyrol, prov. of, and 8 m . S. W. Brixen, r. bank of the Eisach, here crossed by a bridge. It is one of the most miserable places in the monarchy, but has a church which contains some paintings of merit. Pop. 775.

CHIUSANO, a tn. and com. Naples, prov. Principato Ultra, dist of, and 6 m. E.N.E. Arellino, with a college, a mont-depiété, and an annual fair. Pop. 2454.

CHIUSI [anc. Clusium], a tn. and lake, Tuscany, prov. Senese. The town is situate on a hill near the Chiana, 43 m . S . Arezzo, and 3 m . W. the lake. It is the seat of a bishopric, and contains some valuable private collections of Etruscan and Roman antiquities. It is one of the most ancient towns in Italy, the Clusium of the Romans, the Camars of the Etruscans, and formerly one of the 12 capitals of Etruria, and chief town of the states of Porsenna. In the Middle Ages it was ruined by the accumulation of the waters of the Chiana, which converted its territory into a pestilential marsh. Numerous remains of antiquity, walls, catacombs, \&c., are still to be seen in the neighbourhood. Pop. 2226.--The lake, 9 m . E.S.E. lake Montepulciano, and 4 m . W. lake Perugia or Trasimeno, is about 4 m . N. to S., and $1 \frac{1}{2} \mathrm{~m}$. greatest breadth. Its N. and E. banks form the boundary between Tuscany and the Papal States.

CHIVA, a tn . Spain, prov. of, and 20 m . W by S. Valencia. Its streets are for the most part wide, regular, and clean ; and its squares, of which there are three, spacions, and lined with substantial houses and public buildings. The parish church, large and highly ornamented, possesses many fine pictures. The other public buildings are a townhouse, prison, barracks, cemetery, chapel, two schools, and a handsome palace of the Duke of Medinaceli. Manufactures:-esparto articles, soap, brandy, earthenware, bricks, tiles, and ropes. Trade :-grain, fruit, and cattle. Pop. 2983.

CHIVA, khanate, Asia. See Kinva.
CHIVASSO, a tn . Sardinian States, prov. of, and 14 m . N.E. Turin, in a fertile plain, l. bank, Po. It was formerly one of the strongest places in Piedmont, but the fortifications were demolished by the French, in 1804, when their possession of Lombardy placed Chivasso in the midst of their own territory. It has a public square, a church, and five convents. Grain and cattle form the principal articles of trade. Pop. 6000.

CHIVELSTONE, par. Eng. Devon; 2720 ac. Pop. 591.
CHKLOV, or Schklov, a tn. Russia, gov. of, and 25 m . N.N.W. Mogilev, r. bank, Duieper. It is well built of wood, with regular streets; the market-place, built of stone, is particularly good. Chklov contains cight churches, three convents, and a synagogue. A considerable traffic is carried on by the Jews in merchandize, which they import from Ger many and send into the interior. The Czar Alexis Mikhaylovitch here gained a victory over the Poles, commanded by Prince Radziwil. Pop. (1851), 11,565.

CHLUMETZ, or Chlumecz, several places, Austria particularly two tus. Bohemia :-1, Circle Bidschow, on the Czidlina, 44 m . E. Prague. It consists of the town proper and three suburbs, and contains a palace, several churches, one of them a deanery church, with some good pictures; a townhouse, and the ruins of an old castle. The chief employments are agriculture and weaving. In the neighbourhood are a mineral spring in great repute, and several large pools well supplied with fish. Pop. 2620.-2, Circle, Budweis, on the Daubrawka, 32 m. S. Prague. It contains a palace and chapel ; and has manufactures of potash and paper. P. 1226.

CHMIELNIK, a vil. Russian Poland, gov. of, and 19 m . S.S.E. Kielce. It has several important fairs; and is celebrated for the battle fought near it, in 1240, in which the Poles were defeated by the Tartars. Pop. 1800.

CHOBANDO, or Sebando, a tn. Tibet, 230 m . E.N.E. Lassa ; lat. $30^{\circ} 17^{\prime} \mathrm{N}$. ; lon. $95^{\circ} 40^{\prime}$ E.; situate at the foot of a mountain. Before it runs a narrow, but dcep river, crossed
by a crazy-looking wooden bridge. The houses are painted with red ochre, giving them an odd, but not disagreeable appearance. It has a Chinese military post, composed of 25 soldiers, under a Mandarin. There are two Buddhist convents here, in one of which is a printing-press, which furnishes sacred books to the temples of the province of Khan.

CHOBHAM, a vil. and par. England, co. Surrey, the former situate 7 m . N.E. Guildford, and within 3 m . of the Woking station on the London and South-western Railway. The houses are well built, of brick, and there are also several respectable shops. The church is in the early style of English architecture; and there are, besides, a Baptist chapel, and a chapel of ease at the W. end, with a school, and several small charities. Area of par., 9470 ac. Pop. 1989.

CHOC, or Choque Bay, W. Indies, N.W. coast of St. Lucia, one of the Windward Isls., situate between Brelotte Point on the N., and Point d'Estrées on the S., and intersected nearly in the centre by N. lat. $14^{\circ}$. It is open to the W. and N.W. Within the bay is a small island, and on the mainland a vil. and river, all of the same name.

CHOCO.-1, A prov. New Granada, on the coast of the Pacific, S. of prov. Darien, and W. of Autioquia. It is traversed by the most W. branch of the Andes, and watered by the San Juan and the Atrato. In 1788, a canal is said to have been dug in the ravine of Raspadura, which united these two rivers, and established, in the rainy season, a commnnication between the two seas. The climate is moist and warm; and the greater part of the province being covered with dense forests, which prevent the free circulation of the air, it is rendered unhealthy. The soil is very fertile, and, wherever it is cultivated, produces maize and cacao of excellent quality. Gold and platina are said to be abun lant. Considerable commerce is carried on with Popayan, and much cacao and other productions are exported by the canal of Raspadura. Novita is the principal town. The population is composed of negroes, mulattoes, a few whites, and some Indians.-2, A large bay, W. coast of New Granada, extending from Point Chirambira on the N., to Point Guascama on the S., between the parallels of $2^{\circ} 30^{\prime}$ and $4^{\circ} 18^{\prime}$ N.-3, A bay, Central America, forming the most S. [rert of the Gulf of Darien. The Atrato falls into it.

CHOCTAWHATCIIEE, a river, U. States, rising in Alabama, and, after a S. course of 130 m ., falling into a bay of same name in Florida.

CHOCTAWS, a tribe of N. American Indians, located on the W. side of the Mississippi, E. of the Chicasaws. They are civilized and industrious, are devoted to agriculture, and have made considerable progress in useful mannfactures. They seem to appreciate knowledge, having appropriated a portion of their annuity from the U. States Government to the support of schools. Numbers abont 20,000.

CHOCZIM, or Cholzıs [properly, Khotin], a tn. Russia, gov. Bessarabia, r. bank, Dniester, about 10 m . S. Kamenctz. It gives name to an archiepiscopal Greck diocese; is walled, and, being a frontier stronghold, possession of it was often contested by Poles, Turks, and Russians. The old citadel of Choczim, partly of Genocse, partly of Turkish construction, with its massive walls and frowning towers, was once thought all but impregnable. As it is surrounded by hills, which completely command it, in modern war it would scarcely be considered defensible. It has fallen greatly into decay, and its only importarce at present is as a military station. Pop., formerly 20,000 ; (1849), 12.200.

CHODSCHELI, a tn. khanate of, and 86 m . N.N.W. Khiva, near l. bank, Amoo-Daria, in the delta. It is walled, has markets twice a week, and is inhabited chiefly by Usbecks, with Kirgheses and Karakalpaks in the environs.

CHODZIESEN, a tn. Prussia, prov. Posen, gov. of, and 46 m . W. by S . Bromberg, cap. circle of same name. . It lics on a lake, contains a Protestant and a R. Catholic church, a synagogue, and hospital ; has manufactures of woollen, linen, and lace; some general trade, and four yearly markets. Pop. 3100 ; of whom 1000 are Jews.-The circle, area, 324 geo. sq. m., is watered by the Netz, and thongh covered to a considerable extent with forests and marshes, is, on the whole, fertile. Pop. 40,554.

CHOISEUL.-1, An isl., S. Pacific Ocean, one of the Solomon group. E. point in lat. $7^{\circ} 29^{\prime} \mathrm{S}$.; lon. $157^{\circ} 55^{\prime}$ E. _2. A port, isl. Madagascar, at the head of Antongil Bay,
N.E. coast; lat. $15^{\circ} 25^{\prime} \mathrm{S}$. ; lon. $49^{\circ} 40^{\prime} \mathrm{E}$. It is an excellent harbour, where ships may anchor in 6 or 7 fathoms, and may obtain rice, bullocks, \&o.

CIIOISY-le-Roi, ol Choisy-sur-Seine, a tn. France, dep. Seine, 7 m . S. Paris, 1. bank, Seine, here crossed by a wooden bridge, with stone piers, and a station on the Paris and Orleans Railway. Its broad, straight streets, elegant honses, and fine avenues, with the proximity of the Seine, and of the railway, contribute to render it one of the most agreeable towns in the vieinity of Paris. It has manufactures of waxcloth, soap, chemical stuffs, glass, morocco leather, earthenware, porcelain, and vinegar. There are also some distilleries. It has some trade in wine, vinegar, coal, \&e. The castle, built hore by Louis XV., has entirely disappeared. Pop. 3227.

CIOLDERTON (West),par.Eng. Wilts; 1390ac. P.170.
Choleechel, or Isla-de Rosas, an isl. La Plata confederation, formed by the Rio Negro, on the Patagonian frontier, about 212 m . N.W. Carmen, under the lat. of $39^{\circ} \mathrm{S}$. lt affords good pasturage, and a fort has been erected on it for the protection of the S. frontier of La Plata.

CHOLET, or Chollet, a tn. France, dep. Maine-et-Loire, 32 m. S.W. Angers, r. bank, Moine. It has a tribunal of commerce, consulting chanber of manufactures, and commual college; manufuctures of handkerchiefs and cotton goods, called cholettes, tlannels, and woollen stuffs. There are also wool and cotton spinning mills, bleachfields, dyeworks, and tanneries; with a large trade in the above articles, and in eattle. Pop. 7539.

CIIOLLERTON, par. Eng. Northumberland; 16,020 ae. l'op. 1129.

CHOLSEY, par. Eng. Berks; 5060 ac. Pop. 1191.
CHOLULA, a city, Mexican confederation, state of, and 12 m. from La Puebla, $60 \mathrm{~m} . \mathrm{S} . E$. by E. Mexico. The streets are regular and spacious, the houses mostly of one story, and flat-roofed. Though fallen from the importance it had attained in the early part of the 16th century, it still exhibits traces of its former greatness. Under the name of Chunultecol, it was onee the eapital of an independent distriet, and the seat of the religion of the ancient Mexicans. At that time it contained, it is said, 40,000 houses, and more than 400 temples. One of these temples still remains, though in ruins, atid to which the people resort in crowds at the festival of the Virgin. It is described by Humboldt as being built in the form of a pyramid, of four stories of equal height, in alternate layers of clay and sun-burnt bricks; each side of its base measuring 1440 ft ., and its height in all 164 ft . At the present day, the form is so altered, that it looks at a distance like a natural hill. On one of its highest platforms a clapel has been constructed, in the form of a cross, 90 ft . long, with two towers, and a cupola. Pop. 10,000 .

CIIONES, a river, Eeuador. It rises in one of the hilly districts in prov. Pinchincha, about lat. $0^{\circ} 23^{\prime}$ S., flows W., and falls into the Pacifie at Earaques Bay, Lat. $0^{\circ} 35^{\prime} \mathrm{S}$., after a course of about 60 m .--There is a village, or small town, of the same name, on its r. bank, lat. $0^{\circ} 30^{\prime} \mathrm{S}$. At the N. side of its entrance from the sea, which is $2 \frac{1}{2} \mathrm{~m}$. wide, stood the ancient city of Cara, of which some vestiges still remain.

CHONOS [anc. Chome], a large vil. Asiatic Tarkey, about 60 m . S.S.E. Ala-Shelier, or Philadelphia; lat. $37^{\circ} 15^{\prime}$ N.; Ion. $29^{\circ} 23^{\prime}$ E. ; situate on a rising bank, sloping gently to the N. It is straggling, and consists of about 200 houses, 20 or 30 of which are Greek. It is said to have contained, formerly, three times that number of houses, or rather families, but it has declined much of late years. A great quantity of tobacco is raised in the neighbourhood, and many fine waluut trees are to be seen in the grounds about the village. This place derives its interest from standing on the site of Chonx, chiefly known for being the birthplace of Nicetas, the byzantine historian. The only remains of buildings are the ruins of a eastle, on a rocky platform above the village.

CIIONOS ARCHIPELAGO, a group of small isls., off the W. coast of S. America, Patagonia. It is comprised between lat. $44^{\circ}$ and $46^{\circ} \mathrm{S}$.; lon. $74^{\circ}$ and $75^{\circ} \mathrm{W}$.

CHOOROO, a tu. Hindoostan, prov. Ajmeer, principality of, and 100 m . E. by N. Bicanere; lat. $28^{\circ} 12^{\prime} \mathrm{N}$.; lon. $74^{\circ} 35^{\prime}$ E.; circumference, about $1 \frac{1}{2} \mathrm{~m}$., exclusive of suburbs. The walls and houses are built of limestone, found in great abundance in this district ; it is very white, but soft, and liable to crumble.

CHORILLOS, a vil. Peru, dep. of, and 10 m . S. Lima. It is much resorted to for sea-bathing during summer by the inhabitants of the capital. The neighbourhood abounds with the remains of ancient edifices.

CHORLEY, a market tn. and par. England, co. Laneaster. The rown, on the rivulet Chor, from which it takes its name, is 20 m . N.W. Manchester, a station on the railway from Bolton to Preston. It is, on the whole, well built, and the streets spacious, and well lighted with gas, and the supply of water abundant. It has a townhall, with small prison, a handsome market-house, two established churches, and chapels for Wesleyan and Primitive Methodists, Baptists, Independents, Unitarians, and R. Catholics; national schools, and a free grammar-school, with almshouses, and some minor charities. Cotton-spinning and weaving is carried on here, and in the immediate vicinity, to a great extent; the princijal fabries produced are muslins, jaconets, and fancy goods, exelnsive of yarn. On the banks of the neighbouring streams are extensive bleach-greens and print-works. In the vicinity are coal, lead, and iron mines; also quarries of slate and gritstone for mills. Area of par., 3110 ac. Pop. 13,139.

CHORLTON-on-Medlock, a large and increasing tn. England, co. Lancaster, about $1 \frac{1}{2} \mathrm{~m}$. S. Manchester. It was formerly an agricultural township, called Chorlton Row, but -ince the introduction of the cotton manufacture, in which, aloug with Manchester, it largely partakes, it has risen rapidly in importance and extent, and now contains several respectable streets, well paved, and lighted with gas. The principal public buildings, besides the churehes, are the townhall, with which are comected a constable's dwelling-house, and a dispensary; an educational lycenm, and an institution for popular instruction. There are three churches, and seven places of worship for different dissenting bodies, including Presbyterians, Baptists, Methodists, Independents, Unitarians, and the Society of Friends. The church of All-Saints is a handsome structure, in the doric order, with an elegant steeple, surmounted by a dome, and gilded cross. Attached to this church is a cemetery; and there is also a cemetery for the interment of all denominations. The schools are numerous, ineluding daily, Sunday, and infant schools. Pop. (1841), 28,336.

CHOROLQUE, a snowy mountain, S. America, Bolivia, prov. Cinti, near Tupisa, the provincial cap.; lat. $21^{\circ} 28^{\prime} \mathrm{N}$. Elevation, according to 1r. Redhead, $16,548 \mathrm{ft}$. above sealevel.

CHOROS ISLANDS, three small isls. S. Pacific Ocean, off the coast of Chile. The largest is 4 or 5 m . from the mainland, and about 45 m . N.N.W. Coquimbo; lat. $29^{\circ} 17^{\prime} \mathrm{S}$.; lom. $71^{\circ} 3 \overrightarrow{0}^{\prime} \mathrm{W}$. It is about 2 m . long, the top is very much broken, and the S.W. end resembles a castle. The other two are much smaller, and nearer to the shore, one of them so close that a boat only can pass between it and the land.

CHOROSTKOW, a tu. Austria, Galicia, 30 m . S.S.E. Tarnapol, 1. bank, Teyna ; it has a Unitarian church. P. 2400.

CIIORRERA, a tn. New Granada, isthmus of, and 15 m . S.W. Panama, near the head of a river of same mame, which enters the Pacific 10 m. S.W. Pamana. Pop. 4000.

CIIOSARASP, a tn . khanate of, and 40 m . E. by S. Khiva, near l. bank, Amoo. It is surrounded by a mud-wall, forming a quadrangle of 185 fathoms, and has two castles, of which the one in the citadel is of brick; 10 mosques, and a brick college. Market on Monday and Friday.

CHOTEESGHUR, a large dist. Hirdoostan, prov. Gundwana, 260 m . long, and surrounded by hills. It is somewhat remarhable, that in this far land witehcraft presents precisely the same features, and is aecompanied by preeisely the same circumstances, by which it was distinguished in Scotland two centuries ago. The belief in it is general ; old women are supposed to be almost exelusively the possessors of the power, and the ordeal of the pond is the usual mode of ascertaining the guilt or innocence of suspected persons.

CHOTIEBORZ, a tn. Bohemia, circle, Czaslau, on the Daubrawka, 60 m . S.E. Prague. It contains a parish churel, a castle with a chapel, a townhouse, and hospital. Manufac tures:-both woollens and linens, aud has six yearly markets. Pop. 3386.

CHOTZEN, or Choczen, a tn. Bohemia, circle, Chrudim, on the Stille Adler, 24 m . S.E. Königgrätz. It contains a parish church, castle, townhouse, and hospital; and has a paper and two flour mills. Chotzen is a station on the Prague,

Olmïtz, and Vienna Railway. Pop., including the suburb Chocinck, 1955.

CHOULESBURY, par. Eng. Bucks; 170 ac. Pop. 124.
CHOWAN, a river, U. States, Virginia and N. Carolina, formed by the union of the Nottaway, Meherrin, and Blackwater. It rises and flows S.E., chiefly in Virginia, and falls into Albemarle Sound, a little N. the mouth of the Reanoke. It is about 3 m . wide near its mouth.

CHOWBEN'T, or Atherton, a vil. and chapelry, England, co. Lancaster, 12 m. W. by N. Manchester, and a station on the railway thence to Bolton. It has a plain chapel in connection with the Established church, and places of worship for Baptists and Unitarians; and infant and other schools. The inhabitants are principally employed in the cotton and silk manufactures ; and many of them are also engaged in the collieries and in nail making. Petty sessions are held fortnightly. Pop. 4475.

CHRISHALL, par. Eng. Essex ; 2698 ac. Pop. 521.
CHRISTCHURCH, a parl. bor. and par. England, co. Hampshire. The Town, $21 \mathrm{~m} . \mathrm{S} . W$. Southampton, is pleaantly situate at the confluence of the Avon and Stour, about 1 m . from the sea, but has by no means a thriving appearance; houses, in general, of a very indifferent description. The church, in the form of a cross, partly of Norman architecture, contains the finest sculptured altar-piece now remaining in England. There are several Dissenting chapels, two Episcopal, and one R. Catholic; a free grammar achool, a national and Lancasterian school, and several endowed charities. It has a very limited manufacture of watch springs, which, with the knitting of stockings, form the chief employment of the women and children. There are also two breweries. It returns a member to the House of Commons; electors (1850), 305.-Christchurch Bay, about $1 \frac{1}{2} \mathrm{~m}$. below the town, is a spacious harbour, but being obstructed by a moving bar of sand, it can be entered only at high water, and by vessels drawing no more than 5 or 6 ft . water. Area of par., 24,640 ac. Pop. 5994.

CHRISTCHURCH, three pars. England:-1, Monmouth; 5320 ac. Pop. 1310.-2, Surrey. Pop. 14,616.3, (Christchurch or Holy Trinity), Gloucester; 1840 ac. Pop. 1092.

CHRISTIAN, or Christiansamt, a bail. Norway, prov. Aggershuus; bounded, N. by Trondhjem, E. Hedemarken, S. Buskerud and Aggershuus, W. Bergen; area, 63,012 ac. It is mountainous, leaning $N$. on the Dovre-fjeld and the Sogne-fjeld, which there form several of the culminating points of the kingdom, including Snæhatten. It comprises a large portion of the extensive valley of Gulbrand, watered by the Lougen, which forms lake Miösen. The soil is fertile, yielding barley, rye, oats, pease, potatoes, flax, hops, and some homp. Some cattle are reared. The fisheries are important. It is divided into 3 fogderi, and 68 pars.; and lias only one town, Lille-hammer. Pop. (1845), 106,840.

CHRISTIAN-MALFORD, a vil. and par. England, co. Wilts; 2810 ac . The village, on the Avon, $4 \frac{1}{2} \mathrm{~m}$. N. by E. Chippenham, contains an ancient cross, a parish church, and an old Independent chapel ; and two cloth-mills. Pop. 1179.

CHRISTIANIA, prov. Norway. See Aggershuus.
CHRISTIANIA, a city, port, and cap., Norway, prov. Aggershuus or Christiania, at the head of the long narrow inlet, called Christiania Fjord, about 60 m . from the open sea or Skaggcrack ; lat. $59^{\circ} 54^{\prime} 42^{\prime \prime}$ N. ; lon. $1043^{\prime} 30^{\prime \prime}$ E. (r.) Higlı hills rise around it on all sides, excepting to wards the bay, but at considerable distances, particularly on the N. The streets are straight, broad, and well paved, and lighted with gas. The houses are mostly of brick and stone, few of the ancient picturesque log-houses now remaining; they are rarely more than two storics in height, and are generally squat, plain buildings, atterly devoid of architectural pretension. Some exceptions, however, are to be met with, particularly in the street leading to the new palace, where are scveral specimens of an improved domestic architecture. The most interesting building, perhaps, in the town, is the fine old castle of Aggershuus, with its church and citadel crowning a point jutting ont into the fjord. It is surrounded by a deep moat, and commands the cntrance of the harbour. Within the exterior works is a spacious place d'armes, with some beautiful avenues of trees, and a fine promenade on the ramparts overlooking the fjord. At the W. end of the town, which is here, also,
considered the fashionable quarter, and where some very handsome mansions have been recently erected, stands, on a gentle elevation, the new palace, the residence of the Crown Prince, a massive square building, without any architectural ornament, but commanding delightful views of the fjord and its beautifully winding shores. The hall in which the Storthing holds its sittings is also a very plain building. The other public edifices are the military academy, cathedral, university, theatre, a neat detached building; national bank, the army depôt, and the freemasons' hall, in which there is a very large ball or assembly room. None of the churches possess any particular architectural interest. Attached to the university is a museum, containing a fine collection of antiquities. The staff of the military or krig school, as it is called, consists of. a lieutenant-colonel, a captain, and two subalterns. All the professors are also officers. The cadets live and board in private lodgings in the town. There is an athenæum in the city, where there is a good collection of French and English newspapers. At the distance of about 1 m . is the botanic garden, happily situated, and enriched with a large collection of arctic plants. Near the new palace are the public gardens, where a band of German performers attend, and which are much frequented in the fine season. The climate of Christiania is delightful. It is screened from violent winds; and even in winter, though the cold is severe, the weather is scldom variable, but bright and settled, and free from damp and fog. In summer it is warm but not sultry, with a light and buoyant atmosphere. Most of the fruits of S . climes ripen in the open air. The mean temperature in the warmest month, July, is about $105^{\circ}$, and in the coldest, February, $18^{\circ} 6^{\prime}$. The society of Christiania is described as particularly agreeable. Great hospitality prevails; and the upper classes aro generally highly educated, and unusually intelligent. The few manufactures of the city consist of woollen cloth, ironware, tobacco, paper, leather, soap, spirits, glass, \&c. There are also some extensive breweries. The exports are principally timber, deal planks, and iron. The environs of the city are exceedingly beautiful, the approach to it by the magnificent fjord, at the head of which it is situated, exciting the admiration of all visitors. The fjord, itself, is frozen for upwards of two months in the year, for about 20 m . from Chrisiiania to the sea; and the harbour is generally locked up for three or four months. Pop. (1845), 26,141.

CHRISTIANS O, a group of islets, Denmark, prov. Zceland, in the Baltic, 12 m. N. isl. Bornholm ; consisting of three rocks, Christians-ö, Frederiks-ö, aud Grresholm, between the two first of which is a secure haven, used as a return port by ships of war. It is fortified, defended by strong batteries, and has a castle, built by Christian IV. in 1684, used as a state prison. On Christians- $\ddot{0}$ is placed a revolving light; lat. $55^{\circ} 19^{\prime} 12^{\prime \prime} \mathrm{N} . ;$ lon. $15^{\circ} 12^{\prime}$ E. Pop. 450.

CHRISTIANSAND, an administrative prov. and diocese, Norway; bounded, N. by Bergen and Aggershuus. or Christiania, N.E. and E. Christiania, S. the Skagerrack, and W. the German Ocean ; between lat. $57^{\circ} 56^{\prime}$ and $60^{\circ} 10^{\prime} \mathrm{N}$. ; and lon. $5^{\circ} 12^{\prime}$ and $10^{\circ} 28^{\prime}$ E.; area, 7728 geo. sq. m. The surface is mountainous throughout, and presents only a few narrow valleys, little adapted for agricultural operations, though the soil, which is, for the most part, of a loamy nature, with occasional mixtures of sand and chalk, is naturally fertile. The coast is very much broken, particularly on the W., where it is deeply penetrated by the Bukke Fjord. One of its characteristic features is the number of islands by which it is lined. The rivers are small, but numerous; the names of the principal are the Mandclself, Nidelf, Torrisdalelf, and Quinisdalelf. They are all confined within romantic rocky banks, have clear crystal water, and rush along with an impetuous course. Though the corn grown is very limited, and chiefly confined to oats and barley, which, in quantity, fall far short of the consumption, the pastures are good, and rear great numbers of cattle, which form the chief riches of the province. Next in importance are the fisheries, which are extensively carried on, both on the coasts and in the streams. Wood is plentiful, excepting in the district of Stavanger, on the W. coast, and not only supplies abundance of fuel, but produces excellent timber, chiefly pine, much of which is sawn up into planks on the spot, and largely exported. It is also extensively used in smelting iron, which is almost the only mineral of any consequence that is found, but is both
nbundant and of good quality. The inhabitants are almost all Lutherans, and under the superintendence of the bishop of Christiansand. For administrative purposes, the prov. is divided into 3 bailiwicks-Upper Tellemarken or Bradsberg, Nedenæs and Raabygdelangets, Lister and Mandal (containing Christiansand, the capital), and Stavanger. Pop. (1845), 219,006.

CHRISTIANSAND, a seaport tn. Norway, cap. prov. of same name, on the N. coast of the Skagerrack, a little W. from the mouth of the Torrisdal ; lat. (church) $58^{\circ} 8^{\prime} 6^{\prime \prime} \mathrm{N}$. ; lon. $7^{\circ} 59^{\prime}$ E. (R.) It is built on a sandy plain close to the sea, but enclosed on the land side by lofty picturesque-looking rocks. The streets are broad and straight, but are rendered of extraordinary length by the large gardens that intervene between the houses. The latter are chiefly of wood, but neatly constructed. The most remarkable edifice in the town is the cathedral, built of gray stone; the only other noteworthy structures are the national bank, grammar school, provincial Government-house and offices, and the provincial appeal court, and bridewell. The manufactures of the place sre trifling, being confined almost wholly to a little sailcloth making, and the distillation of corn spirits. There is also some shipbuilding, Christiansand being situated in the only district of Norway where oak grows. The trade of the port is considerable, though it possesses but few vessels of its own. The principal exports are logs, deals, and lobsters, nearly all of which go to England; the lobsters wholly to London, lobstersmacks regnlarly ruming between that eity and the Norwegian coast for this purpose. The harbour is deep, and wellsheltered, and is defended by several batteries, and by the fort of Christianholm, on the small islands of Odderö, at the entranee to the harbour. Christiansand is the residence of a bishop, and of the Stiftsamtmand, or governor of the province. It was founded in 1641, by Christian IV., whose name it bears, and was in possession of the British for a short time in 1807, during the war with Denmark. Pop. 12,000.

CHRISTIANSFELD, a tn. Denmark, duchy Schleswig, 7 m . N. Hadersleben, founded in 1773 , by the Moravian brethren. It is the seat of busy industry-tanning, currying, glove-making, hat-making, and the manufacture of tobacco and candles being carricd on. It has fertile environs. Pop. 700.

CHRISTIANSTAD, a fortified tn. Sweden, län or co. of same name, on a peninsula in the Helge Lake, not far from the mouth of the Helge river ; lat. $56^{\circ} 3^{\prime}$ N.; lon. $1 t^{\circ} 10^{\prime}$ E.; about 10 m . from the shores of the Baltic. It is well built, and is prettily situated; has a eitadel, in which there is a bridewell, and an artillery barracks. There are manufactures, to a small extent, of gloves, linen and woollen fabrics. It has also some trade through the port of ihus, at the mouth of the Helge. Pop. 4500.-TThe Lïn or co., is near the S.W. extremity of the kingdom, the fertile valley of the Helge occupying its centre. Products:-timber, corn, flax, hemp, and hops. It has also quarries of marble and stone, and saltpetre pits. An active fishery is carried on on its coasts. Area, 2400 sq. m. Pop. 165,800.

CHRISTIANSTEDT, a tn., cap. isl. St. Croix, Danish W. Indies, on the N. shore towards the E. part of the island, observatory in lat. $17^{\circ} 44^{\prime} 5^{\prime \prime} \mathrm{N}$.; lon. $64^{\circ} 41^{\prime} \mathrm{W}$. It is defended by two forts, one on a small islet in front of the town, the other on a neck of land to the $E$. The harbour is very difficult of access, being encumbered with many shoals, one of which stretehes out nearly 2 m . to seaward in a N.E. direction.

CHRISTIANSUND, a seaport tn ., N.W. coast, Norway, cap. bail. Romsdal, $82 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Trondhjem, on three islands, or rather rocks, whieh enclose its beautifnl land-locked harbour ; lat. $62^{\circ} 10^{\prime} \mathrm{N}$. ; lon $8^{\circ} 15^{\prime} \mathrm{E}$. The surface of the islands on which the town is situate is so irregular, that hardly any two houses, which are all of wood coloured with red ochre, stand exaetly on the same level. The trade of the place is considerable, and the town itself is fast rising into importance. The principal export is stock-fish, chiefly for the Spanish and Italian markets. Fromits singular position, there are scarcely any regular strects in Christiansund, and the communication between one part of the town and another is kept up chiefly by water. Pop. (1845), 2634.

CHRISTINA (SANTA), an isl., S. Pacifie Ocean, one of the Marquesas; lat. $9^{\circ} 56^{\prime} 18^{\prime \prime} \mathrm{S}$. ; lon. $139^{\circ} 10^{\prime} \mathrm{W}$. (r.) It is traversed lengthways by a ridge of rocky mountains, which attain an elevation of 3000 ft . See Mareuesas.

CHRISTINEHAMN, a tn . Sweden, lain of, and 24 m . E. by S. Carlstad, in a bay on the N.E. shore of Lake Wenern. Two streams, their banks planted with trees, flow through the town, unite there, and fall into the lake; and over the streams are two stone bridges. The town is regularly built; the market-place lies on both sides of the rivers; and there are a townhall, theatre, and asscmbly rooms. A considerable quantity of iron is shipped here annually, and the market price of the metal is fixed, and contraets made for the whole year at the fair held in March, which is one of the most important and most frequented in Sweden. Near the town are mineral wells. Pop. 1700.

CHRISTINESTAD, a seaport tn. Russia, gov. Finland, dist. of, and 60 m. S.S.W. Vasa ; lat. $62^{\circ} 16^{\prime} 12^{\prime \prime} \mathrm{N}$. ; lon. $21^{\circ} 23^{\prime}$ E. (r.) It stands on the peninsula of Coppa, contains a chureh, and is well built. The harbour is sate, and has a considerable trade. The ehief exports are timber, pitch tallow, and butter. There is a building dock. P. (1841), 2007.

CHRISTLETON, par. Eng. Chester; 3070 ac. P. 875.
CHRISTMAS.-1, An isl. Indian Ocean; between lat. $10^{\circ} 27^{\prime}$ and $10^{\circ} 35^{\prime} \mathrm{S}$.; lon. $105^{\circ} 29^{\prime}$ and $105^{\circ} 39^{\prime} \mathrm{E}$. It is about 9 m . long, and as many broad, and abounds with trees. It has a depth of 95 fathoms at a cable's length from the shore, and is inaccessible, except on the N.W., at a small beach formed of white stones and coral.——2, An isl. N. Paeific Ocean ; lat. (S.E. point) $1^{\circ} 41^{\prime} \mathrm{N}$. ; Ion. $157^{\circ} 15^{\prime} \mathrm{W}$. It is about 60 m . in circumference; of coral formation; and the W. point, which projects a little, is covered with cocoa-nut trees. Cook, in his third voyage, in 1777, landed on this island to observe an celipse of the sun.- $3, \mathbf{A}$ harbour on the N . side of Kcrguelen Island, in the S. Pacific Ocean; lat. $48^{\circ} 41^{\prime}$ S.; Ion. $69^{\circ} 6^{\prime}$ E.--4, Cataracts, British Guiana, on the Berbice.-5, A sound, S. America, about 120 m. N.W. Cape Horn, between the islands of Hoste and York Minster.

CHRISTON, par. Eng. Somerset; 350 ac. Pop. 91.
CHRISTOPHERS (St.), isl. W. Indies. See Kıtrs (St.)
CHRISTOV $\tilde{L}$ (SÃ). -1, A tn.Venezuela, prov. Merida, r. bank, Taehira, and near its junction with the Orivante, 70 m . S.S.W. Merida; lat. $7^{\circ} 20^{\prime} \mathrm{N}$. ; lon. $71^{\circ} 58^{\prime} \mathrm{W}$. It has a good church and convent. The elimate is very hot, but not unhealthy. Sugar-cane and tobacco are grown in great abundance in the vieinity.-2, A tu. Mexican confederation, state of, and $12 \mathrm{~m} . \mathrm{N}$. the city of Mexico, N.W. bank of a lake of its own name.

ChRistovio-são, or Sergipe-del-Rey:-1, A tu. Brazil, cap. prov. Sergipe-del-Rey, agrecably situate on a hill near the Sergipe, or Vazabarris, liere crossed by a bridge, about 18 m . W. the Atlantic, and 170 m . N.N.E. Bahia; lat. $11^{\circ} 10^{\prime} 4 \underline{2}^{\prime \prime}$ S.; lon. $36^{\circ} 7^{\prime} 49^{\prime \prime} \mathrm{W}$. (L.) Its private houses are mean, and only of onc story; but the publie buildings are of stone. Of these the prineipal are the governor's palace, where both the president and military and civil authorities reside, and the provincial assembly holds its sittings ; four churches, two convents, a Carmelite and Franciscan, each of which also has a ehurch and an hospital. In the Carmelite convent is a lyceum, in which Latin and Freneh, rhetoric, philosophy, an 1 geometry are taught; and there are, besides, two primary schools. The harbour is very indifferent, and the access to it dificult and dangerous, a great swell setting into the bay from the Atlantic, and there being, moreover, a bar with littlo depth of water. The chicf exports are sugar, cotton, and tobacco. Pop. of tn . 2000; of dist., containing two pars., 9066.-2, A vil. and par. Brazil, prov. of, and at a short dis. tance from Rio-de-Janeiro. It contains a church, and in its neighbourhood are the palace of Boa Vista, where the En1peror usually resides, the palace of Ponta do Cajn, and an ancient convent, now converted into a lazaretto.

CHRISTOW, par. Eng. Devon; 3680 ac. Pop. 624.
CHROMA, or Dubrownik, a small Dalmatian isl., in the Adriatic, off Ragusa; lat. $42^{\circ} 38^{\prime}$ N.; lon. $18^{\circ} 8^{\prime} 23^{\prime \prime} \mathrm{E}$. It is covered with trees and shrubs; but, besides a fort by which it is crowned, has no other habitation.

CHRUDIDI, a tn . Bohemia, cap. circle of same name, 62 m . S.E. Prazue, beantifully situate on the small river Chrudimka. It is surrounded with walls, and contains an old church, a Capuchin couvent, and a royal high school. It is the seat of the Government of the eircle; and has manufactures of commen cloth. The horse markets held here aro the most important in the monarchy. Pop. 6500.

## CHUPAT

CHRZANOV, a tri. Austrian Poland, on the Chechlo. It is the second place of the district of Cracow, and has a busy trade. Pop. 4000; mostly Jews.

CHTCHELINSKOE, a lake, European Russia, gov. Riazan, dist. Zaraisk, near 1. bank, Oka, to which its waters flow S.E., by two small rivers.

CHU-Kiana, or Pearl River, a river, China, the main branch of which, called the Si Kiang, rises in the prov. of Yunnan, flows E. through Quangsee, receiving numerous tributaries, is joined by the Peh-Kiang or N. river, and by the E. river, after a course of 200 m . respectively, and, after a course of 500 m ., falls into the sea below Canton, by numerous moutlis; the most celebrated of which is the Boca Tigris. The number of boats, of various kinds, employed on this river, not only for the transport of goods and passengers, but as the dwellings of families, is almost incredible.

CHUAPA, a river, Chili, forming the S . boundary line of prov. Coquimbo, and separating it from Aconcagua. It rises on the W. slope of the Andes, near the volcano of same name, flows W., and falls into the Pacific after a course of about 125 m ., in lat. $31^{\circ} 38^{\prime} \mathrm{S}$. It receives the Illapel on the right, and is one of the very few rivers of any importance of which Chili can boast.

CHUCUITO, or Chuquito, a tn. Peru, dep. of, and 15 m . S.E. Puño, W. bank of Lake Taticaca. It has greatly declined from its former importance; the population, which, at the commencement of the 18th century, amounted to 30,000 , being now only about 5000 .

CHUDLEIGH, a tn. and par. Eng., co. Devon; 6230 ac. The town, 8 m. S.W. Exeter, situate on an eminence, near l. bank, Teign; consists principally of one street of substantial, well-built houses. In the year 1807, the greater part of the town was destroyed by fire, but has since been renovated. It has a church, and chapels for Methodists, Independents, and R.C'atholics; endowed grammar-school, several national schools, and various charities. The manufacture of woollen fabrics was at one time carried on bere to a considerable extent, but has now entirely ceased. It still, however, retains a high character for cider. Pop. 2415.

CHUENPEE, or Shaкок, an isl. China, at the mouth of the Canton river, about lat. $22^{\circ} 42^{\prime} \mathrm{N}$.; lon. $113^{\circ} 38^{\prime} \mathrm{E}$. It is composed entirely of small hills rising from a general level. Previously to the late war with China, it was strongly fortified, and was considered the outer defence to Canton river, but on that occasion its forts or batteries were quickly demolished by the British ships of war.

CHUI, a river, Independent Tartary. See Tchui.
CHULMLEIGH, a market tn. and par. England, co. Devon. The tows, which is situated $19 \frac{1}{2}$ m. N.W. Exeter, has a spacious parish church, and chapels for Independents and Wesleyans. The church was damaged by lightning in 1797 ; and, in 1803, a considerable portion of the town was destroyed by fire. Area of par., 8650 ac . Pop. 1647.

CHULUMANI, a tn. Bolivia, cap. prov. Yungas, situate a little N. of Mount Illimani, 27 m . N.E. La Paz; lat $17^{\circ} 4^{\prime}$ S . ; lon. $68^{\circ} 30^{\prime} \mathrm{W}$. It is ill-built, and dirty ; but placed in a fertile district, of great picturesque beauty. P. under 2000.

CHULUWAN, or Holy Island, an isl. E. coast, Africa, Mozambique Channel ; lat. (N. point) $20^{\circ} 38^{\prime} \mathrm{S}$. ; lon. $34^{\circ} 53^{\prime}$ E. It is 5 or 6 m . long, appears to be joined to the mainland, lies low, and is covered with trees; but projecting shoals render the navigation of the passage impracticable, except for boats.

CHUMALARI, a mountain, Himalaya. See Chamalari.
CHUMBA.-1, A dist. and tn . of N.E. Punjab, the former lying between the Santeh and Mori mountains, watered by the Sawa, Ravi, and Suang. The town, cap. of the district, is beautifully and picturesquely situate, r. bank, Ravi; lat. $32^{\circ} 22^{\prime} \mathrm{N}$. ; lon. $75^{\circ} 56^{\prime} \mathrm{E}$. The houses, about 1000 in number, are of wood, and ranged about a rectangular open space, 500 yds. long, and 80 broad.- 2 , A vil. Punjab, on the road from Attock to Torbela; lat. $34^{\circ} 4^{\prime} \mathrm{N}$. ; lon. $72^{\circ} 43^{\prime} \mathrm{E}$.

CHUMBUL, a large river, Hindoostan. It rises in Malwa, in the Vindhya mountains, about 50 m . S. Oojein, flows N., enters Rajpootana, through which it runs N.E., and
ialls into the Jumna, about 90 m . S.E. Agra, after a course of about 500 m .

CHUMIE.-1, A moıntain range, S. Africa, Cape Colony, between the parallels of $32^{\circ}$ and $33^{\circ} \mathrm{S}$., and near the meridian of $27^{\circ}$ E., in which basaltic rock, wood, and grassy slopes are curiously intermingled.- 2 , A river flowing from the above range, and from the Katberg, and pursuing a S.S.E. course to the Keiskanıma.-3, A Presbyterian missionary settlement, on a tributary of the river of same name, 12 m. N.E. Fort Beaufort.

CHUMPANEER, a dist. and tn. Hindoostan, prov. Gujerat, the former lying between lat. $22^{\circ}$ and $24^{\circ} \mathrm{N}$. The Town, formerly cap. of the district, is 22 m . N.E. Baroda; lat. $22^{\circ} 31^{\prime} \mathrm{N}$.; lon. $73^{\circ} 41^{\prime} \mathrm{E}$. It stands on the summit of a mountain 2500 ft . high, and on some sides is apparently perpendicular.

CHUN-King, a city, China, prov. of Sechuen, 130 m . E. Ching-too, on a tributary of the Yang-tse-Kiang. The houses are built on a hill, in the form of an amphitheatre. Numerous silk-worms are bred here.

CHUNAR Ghur, a tn., fortress, and invalid station, Hindoostan, prov. Allahabad, r. bank, Ganges, 17 m. S.W. Benares; lat. $25^{\circ} 9^{\prime} \mathrm{N}$. ; lon. $82^{\circ} 54^{\prime}$ E. The town, situate E. of the fort, contains many stone houses.--The fortress stands on a lofty rock, rising abruptly from the river, and presents a bold and picturesque appearance when viewed from the water. In the last enclosure, on the very summit of the mountain, which is calculated to make a defence, even should all the lower works have fallen, are several very interesting

FORT OF CIIUNARGHUA.- From an Original Drawing by Capt R. Smith, 4th Hegt
buildings; one of them is the old Hindoo palace, a central dome, surrounded by several vaulted apartments, with many remains of painting and carving, but dark, low, and impervious to heat. On one side of this structure, is a loftier and more airy building, now used as an armoury, but formerly the residence of the Mussulman governor, with handsome rooms, and beautifully carved oriel windows. The country in the neighbourhood rises into low, barren hills, from which a very good stone for building is obtained.

CHUNCHOS, a savage race of Indians, Ecuador, S.W extremity, dist. Jaen. They lave their chief residence in Chibatizo, 27 m . from Pucara. When on their expeditions, they are almost in a state of nudity. Sometimes they wear a short whitish-brown shirt, without sleeves. This garment, when worn by the chiefs, is red. Most of them dye their hair with achote, a deep vermillion, and paint the face and breast the same colour. Their weapons are the bow and arrow. They are cruel and treacherous. Tschudi relates, that while they were on their lunting expeditions, he left in their huts knives, fish-hooks, carrings, \&c., with the view of establishing a friendly intercomrse with them. In return for these presents, they left him some of their edible roots poisoned.

CHUPAT, a small and little-known river, S. America, in Patagonia, pursuing, as far as it has been traced, a winding E. course, and falling into the Atlantic in Engaño ISay, in lat. $43^{\circ} 20^{\circ} \mathrm{S}$. ; lon. $65^{\circ} \mathrm{W}$. It can be entered only by small craft.

CHUPJERA-Mowh, or Churpra-Mow, a th. or large vil. Hindoostan, prov. Bahar, 1. bank, Ganges, along which it extends for nearly a mile, 32 m. W.N.W. Patna; lat. $25^{\circ} 46^{\prime} \mathrm{N}$. ; lon. $84^{\circ} 46^{\prime} \mathrm{E}$. It contains a musjid, and several brick houses; the annexed view of one of the latter in the

Native hon'ses ar eherpror wown. From an 0 ifinal Drawing by (ayt. R Smith, 44 th Regt.
centre of the town, will give a pretty correct idea of the residence of the respectable classes.

CHUPRAH, a tn. Hindoostan, prov. Bahar, l. bank, Ganges, 32 m. W.N.W. Patna. It is narrow, but extends along the river for nearly a mile; and has an active trade. Pop. 43,500 .

CHUQUIBAMBA, a tn. Perı, dep. of, and 83 m . N.W. Arequipa. The temperature is cold and disagreeable; and in the neighbourhood is a mountain of same name, $21,000 \mathrm{ft}$. above the level of the sea.

CIIUQUISACA, a dep. Bolivia, on the S.E. of the great table land, comprehending four provinces, namely, Chuquisaca, Cinti, Yamparaes, and Tomina, which all four pour their waters into the Pilcomayo, an affluent of the La Plata. The pop. may be estimated at 95,000 ; of whom rather more than half are Indians.-Chuquisaca, the province, is the most N. and most elevated part of the department.

CIIUQUISACA, or La Plata, the eap. of Bolivia, agrecably situate 9343 ft . above sea level, on a small plateau above the banks of the Rio de la Plata, a small stream flowing into the Cachimayo; lat. $19^{\circ} 30^{\prime} \mathrm{S}$. ; Ion. $66^{\circ} 42^{\prime} \mathrm{W}$. The houses, generally of two stories, are well built, and have usually
well cleaned. The central pavement, of large round pebbles, is unpleasant to the feet; but the principal streets have side pathways smoothly and regularly paved. The principal square is adorned with an elegant fountain. The buildings most deserving of notice are the cathedral, occupying one of the sides of the square now mentioned, a magnificent edifice, in the moresque style, with lofty towers and an immense dome, and richly decorated within ; the president's palace, occupying another side of the same square; the churches of San Francisco and San Miguel, two monasteries, one of them a handsome structure, seated on a height which overlooks the town; three nunneries, and a theatre, recently constructed. The principal educational establishonents are the seminary of St. Christopher, where young ecclesiastics are trained; and the college of Junin, where a good education, comprehending Latin, mathematies, physics, logic, and moral philosophy, is given. There is also an endowment called Collegio de las educandas, where poor female orphans are brought up. Chaquisaca is the seat of the Legislature, of the supreme court of justice, and several other important conrts and offices, and is also the see of an archbishop. It cannot be said to have either manufactures or trade, and owes all its prosperity to its being the capital. The environs are generally arid; but the valleys are well enltivated by the plough, and yield large erops of corn, clover, and potatoes. The great body of the population are Iudians, who are very singular in their dress, and speak a language called Quichua. From the terms Choque saca, in this language, meaning 'bridge of gold,' the town is supposed to have derived its nane, in consequence of the immense treasures which were carried across the river at this point on the way to Cuzco, the town of the Incas. Pop. about 12,000.-(Castelnau Expedition dans les parties centrales de l'Amérique du Sud.)

CHUQUITO, a tn. Peru. See Chucuito.
CHUR, a mountain, Hindoostan, one of the lofty peaks of Gurhwal, near the sources of the Jnmna; its height is estimated at $12,149 \mathrm{ft}$; lat. $30^{\circ} 52^{\prime} \mathrm{N}$. ; lon. $77^{\circ} 28^{\prime} \mathrm{E}$.

CHUR. See Coire.
CHURCH, several pars. Eng:-1, (Churchdow), Gloncester; 4070 ac. Pop. 999.-2, (Giesley), Derby ; 6700 ac . Pop. 2764.-3, (-Knowle), Dorset ; 2500 ac. Pop. 463.-4, (-Langton), Leicester ; 4280 ac. Pop. 869.-5, (-Lawton), Chester; 1540 ac . Pop. 622.-6, (-Over), Warwick; 1440 ac . Pop. 339.-7, (Stantom), Devon; 4980 ac. Pop. 1086.8, (-Stow), Devon; 1640 ac. Pop. 542.

CHURCI (States of the). See Papal States.
CIIURCII-Conistone, a vil. England, co. Lancaster, $12 \frac{1}{2} \mathrm{~m}$. N. Ulverstone, containing a chapel, and several schools. N.W. of the village is the Ohl Man, the most elevated monntain in the county, 2576 ft . high. The inhabitants are principally employed in the mines and slate quarries connected with the village. Pop. (1851), 1287.

CHURCH-Sтоке, a vil. and par. N. Wales, co. Montgomery. The village is situate near the confluence of the Camlet and Caebitra, $3 \frac{1}{2} \mathrm{~m}$. S.E. Montgomery ; and has a neat chureh, several schools, and numerous charitics. Several interesting Roman remains have been discovered in the parish. Area, 1560 ac. Pop. 1527.

CIIURCH-Stretton, a tn. and par. England, co. Salop; 11,790 ac. The town, 12 m . S. by W. Shrewsbury, is sitnate in a narrow romantic valley between the Longmynd and Caer Caradoc hills, the former of which rises almost perpendicularly from the town to a height of 1600 ft . It consists of one street, the houses in general plain oldfashioned buildings, mostly of stone. It is kept in good order, well supplied with water, and is slowly increasing. The church is a fine old cruciform structure. There is a small paved conts with a small streann of limpid water run- | small trade in ning through thom; the streets are regular, spacious, and $\mid$ in agriculture. Pop. 1604.-(Local Correspondent.) fine old cruciform structure. There is a

CIEN-POZUELOS

CHURCHAM, par. Eng. Gloucester; 4100 ac. Pop. 870.
CHURCHILL.-1, Called also Missinnippi and English River, a river, British N. America, rising in Lake Methy; lat. $51^{\circ} 10^{\prime} \mathrm{N} . ;$ lon. $109^{\circ} 30^{\prime} \mathrm{W}$. ; in the great central plain, first flowing S.E. through the lakes Buffalo and La Crosse; then turning N.E., and running almost due E. to Nelson's lake, whence it flows in a N.E. direction through two considerable lakes, and falls into Hudson's Bay, after a course of about 700 m ., in lat. $54^{\circ} \mathrm{N}$. It traverses a woody region, is full of rapids; but it is, nevertheless, navigable, portages being formed at the most difficult rapids.-2, A fort at the mouth of the preceding. It has been allowed to remain in a dilapidated state since 1782 , when it was taken by the French under La Perouse.-3, A cape, British N. Annerica, on the S.W. coast of Hudson's Bay, 50 m . E. the embouchure of river of same name; lat. $58^{\circ} 50^{\prime} \mathrm{N}$. ; lon. $93^{\circ} 10^{\prime} \mathrm{W}$. (r.)

CHURSTON-Ferrers, par.Eng.Devon; 2380 ac. P. 772.
CHURTON, or Cherington, par. Eng. Wilts; 2040 ac. Pop. 428.

CHURUM, or Tchorum, a tn. Asiatic Turkey, pash. Sivas, 70 m. S.W. Amasia, r. bank of an affluent of the Kizil Irmak, and near its junction with that river; lat. $40^{\circ} 20^{\prime} \mathrm{N}$.; lon. $34^{\circ} 50^{\prime}$ E. It contains a castle, 16 mosques, several khans, and baths, and nearly 2000 houses.

CHUSAN, or ChowsAN [boat-like], an isl. E. coast, China, giving its name to a group which forms the Chusan Archipelago. It is attached to the province Che-kiang, being about 7 m . from the mainland, and 50 m . N.E. the provincial capital Ningpo; lat. of Tinghai its chief port $30^{\circ} 1^{\prime} \mathrm{N}$.; lon. $122^{\circ} 6^{\prime}$ E. (R.) ; greatest length, N.W. to S.E. 21 m .; breadth, varying from 6 to 11 m ., average 7 m .; circuit, 51 m . Its general aspect is hilly, a series of ridges intersecting it, and sending out branches which ramify over the greater part of the island. Some of these ridges are steep and occasionally rise up into peaks. The average height is about 600 ft ., but one at the E. extremity is 1100 ft . above sea level. Between the ridges valleys of considerable extent, some of them 8 to 9 m . long, intervene. The geological structure is evidently volcanic, the prevailing rocks being claystone, trachyte, and compact and porphyritic felspar. The claystone affords good material for building and paving, and is extensively quarried. Timber is scarce, but this is owing not to any want of fertility in the soil, but to its almost universal appropriation for ordinary culture. The valleys are portioned out into numerous small enclosures, each of which has the appearance of a well managed garden, and even the sides of the hills are terraced and regularly cropped. The spade is the chief implement employed, but the importance both of manure and irrigation is well understood. Almost every valley has its canal, and not a torrent from the hills is allowed to run to waste. On the same slope may be scen growing wheat, tea, sweet potatoes, cotton, and tobacco, each occupying the place and soil best adapted for it, and nourished by some stream which visits the different crops in succession, and finally descends into the plains, to be conveyed over extensive rice grounds. The whole island is studded with towns and villages, and manual labour being thus easily obtained, is universally employed. Every article, even the most weighty, is transported by men, who by means of a bamboo placed scross their shoulders, and supporting their load equally balanced at either extremity, move along nuder almost incredible burdens. No carriages or beasts of burden are employed, and the roads, accordingly, are merely paved footpaths. The coast is indented by numerous bays, some of which are good harbours and teem with fish, in the capture of which a considerable number of persons is employed. Chusan, situate near the mouth of the Yang-tseKiang, which forms the great channel of communication with the capital, and the mouth of that other great stream, the Hoang-ho, is so important in a commercial and political point of view, as to have been termed by the highest living military authority, the 'key of China,' and hence was on two recent occasions taken possession of by the British, and retained till the terms of their treaty with the Chinese were fulfilled.

Previously to their possession, the climate was regarded a3 one of the finest in the world. An extraordinary mortality among the British troops was thought to belie this view, but it has since been satisfactorily proved, that the fault was not in the climate, but in the very improper locality selected for barracks, and that Chusan is still entitled to be regarded as ' the Montpellier of China.' Pop. about 200,000 .

CHUSENLI, an important tn . khanate of, and $80 \mathrm{~m} . \mathrm{N}$. Khiva, on the Amoo-Daria. Its inhabitants are engaged in agriculture and trade. Weekly markets, attended by Turcomans and Kirgheses.

CHUTA AHMEDPOOR, a tn. Hindoostan, principality of, and 145 m . S.W. Bahawulpoor, on the frontiers of Scinde. It is of considerable size, is surrounded by a mud wall, anc has several recently erected, but detached fortresses. From its proximity to Scinde, it is protected by a garrison of 350 men, with six guns.

CHUTA NAGPOOR .[Little Nagpore], a large dist. Hindoostan, presid. Bengal, forming the S. extremity of prov. Bahar; area, 9329 sq. m., named Chuta to distinguish it from a district of the same name in province Bejapoor. See Bahar.

CHUTE, par. Eng. Wilts; 3220 ac. Pop. 525.
CHUTTERPORE, a tn. Hindoostan. See Chatterpoor.
CHYROW, a tn. Austria, Galicia, 56 m. S.W. Lemberg, on the Streewiatz, with manufactures of stockings. Pop. 2000.

Ciamot, Сamot, or Chamut [Italian, Cima del Monte], a vil. Switzerland, can. Grisons, in the valley of the Vorder Rhein, and about 3 m. N.E. of Mount Baduz, where that river has its source. It stands 5000 ft . above the sea. Here commenced, in 1799, the rising against the French.

CIANCIANA, a tn. and com. Sicily, prov. Girgenti, 7 m . S. Bivona. Sulphur is obtained to a great extent annually within the commune. Pop. 3400.

CIARA. See Ceara.
CIBAO, a mountain chain, isl. Hayti, near the centre of the island, extending about 60 m. N.W. to S.E., rising about 8000 ft . above sea level, and forming the culminating peaks of the island. It contains the sources of the Neva, the Artibonite, the Yuma, and the Monte Christi, the principal rivers of the island. This range contains also several excellent gold mines.

CIBOURE, a vil. France, dep. Basses.Pyrénées, about 13 m. from Bayonne. Pop. 1537.

CICACOLE, a dist. and tn. Hindoostan. The former was an ancient division of the N. Circars, and is now comprehended in the collectorate of Gaujam. The town is large, situate 445 m . N.E. Madras, lat. $18^{\circ} 20^{\prime} \mathrm{N}$. ; lon. $84^{\circ} 1^{\prime}$ E.; 1. bank, Cicacole, which rises in the Gundwana Mountains, and falls into the sea a few miles below it, where it is about onethird of a mile broad. Cicacole contains several considerable bazaars, but is irregularly built. Mosques and other small Mahomedan buildings are numerons. The principal mosque, erected in 1051, is of stone, and has a good appearance.

CICCIANO, a tn. Naples, prov. Terra di Lavoro, 2 m . N. Nola, one of the ancient fiefs of the knights of Malta. It contains several churches. Pop. 3060.

CICOLA, a riv. Austria, Dalmatia, rising lat. $43^{\circ} 45^{\prime}$ N., and, after a circuitous course N.W., falling into the Kerba, 11 m ., direct distance, above its embouchure in the Adriatic.

CIECHANOW, a tn. Russian Poland, gov. of, and 45 m . N.E. Plock, situate among marshes, 1. bank, Lidinia. It has a castle, a convent, synagogue, manufactures of leather, brandy distilleries, several fairs, and some trade. Pop., one half Jews, 2400.

CIECHANOWICE. - 1, A tn. Russian Poland, woiwodschaft, Augustow, on the Nurzec, about 9 m . above its junction with the Bug, 72 m . E.N.E. Warsaw, and opposite the Russian town of same name. It contains a handsome palace, two churches, a convent of the sisters of charity, and an hospital. It has numerous brandy distilleries, and some trade. Pop. 2651.-2, A tn. Russia, prov. Bialostock, about 80 m. S.W. Grodno, l. bank, Nurzec, opposite the Polish town of same name. Pop. 2700, of whom one half are Jews.

CIENFUEGOS, a tn. isl. Cuba, in the midst of extensive sugar plantations. Pop. (1841), 2437, of whom 1494 were whites, 448 free people of colour, and 495 slaves.

CIEN-POZUELOS, a tn. Spain, New Castile, prov. of and 20 m . S. by E. Madrid, on a gentle acclivity, near r. bank, Jarama. The houses are mostly of substantial construction,
and the town contains a square, parish church, three chapels, two sehools, a prison, hospital, storehouse, cemetery and convent. The inhabitants are engaged in the manufacture of saltpetre, and trade in grain, wine, and cattle. Pop. 2060.

CIEPLICE, a vil. Austria, Galicia, circle of, and 30 m . N.N.W. Przemysl. Pop. 2125.

CIESZKOWICE, a tn. Austria, Galicia, r. bank, Biala, circle of, and 17 m. N.E. Neu-Sandec. It has some linen manufaetures. Pop. 1910

CIEKA, a tn. Spain, prov. of, and 24 m. N.W. Mureia, 22 m. S.E. by S. Ilellin, on a rising ground near r. bank, Segura. The houses in general are tolerably built; the streets spacious, paved, supplied with wide footpaths, but dirty in rainy weather. The town has three squares, in the principal of which are the town, and courthonses, with a tower containing the public clock; a large chureh, two convents, several chapels, a Latin and five primary schools, a prison, hospital, storehouse, cemetery, and an old dilapidated tower of fealty. Manufactures:-linen, and hempen fabries, saltpetre, soap, wine, and oil. Silk-werms are reared in the vicinity, and some trade is carried on in grain and fruits. An annual fair is held in August. PQp. 10,371.

CIGLIANO, a tn. Sardinian States, prov. Vercelli, 23 m . N.E. Turin; once surrounded with walls and towers, which are now dismantled. A magnificent view of Monte Rosa is oltained from this place. Rice is extensively cultivated in the vicinity. Pop. 3600.

ClLA VEGNA, a tn. Sardinian States, Piedmont, div. Novara, prov. Lomellina, about 3 m . N.E. Mortara. I'op. 3000.

ClLCEN, par. Wales, Flint. Pop. 1267.
CILCENNIN, par. Wales, Cardigan. Pop. 617.
CILICIA, an ancient div. of Asia Minor, now inehded in the Turkish pashalic of Itshili. It was bounded, N. by the Taurus range, which separated it from Cappadocia, E. by Amanus, which divided it from Syria, S. by the Gulf of Issus (Iskenderoon) and the Cilieian Sea, and W. by Pamphylia; between lat. $36^{\circ}$ and $38^{\circ} \mathrm{N}$.; lon. $32^{\circ} 10^{\prime}$ and $37^{\circ} 8^{\prime}$ E. The E. part, which was called by the ancients, Cilicia Proper, produced varions kinds of grain and fruits, in great abundance; and contained a number of towns, including Tarsus, the birthplace of the apostle Paul. The W. part of the country, which was called Cilicia Trachea [the rough], furnished an inexhaustible supply of cedars and firs for shipbuilding, and was famed for its breed of geats and horses. The sea-coast was for a long time infested by pirates, but their depredations were at length suppressed by Pompey. Many Jews, as we learn from the Aets of the Apostles, were settled in Cilicia.

CILLEROS, a tı. Spain, Estremadura, prov. of, and 50 m. N.N.W. Caceres. The houses are badly built, the strects narrow and ill-paved, the town possesses two squares, a parish ehurch, townhall, two schools, a prison, storehouse, and eemetery. The people are chiefly engaged in expressing oil and wine, tillage, and cattle-rearing. Pop. 2520.

CILLI [anc. Cilleia], a tn. Austria, duehy of Styria, cap. circle of same name, 40 m. N.W. Agram, and 83 m . N.E. Trieste, pleasantly situate near the confluence of the Ködingbach with the Sann, whieh is here navigable. It contains several churches, a remarkable, old gothic chapel, two convents, a gymnasium, a primary sehool, a eustom-house, and a barrack. It is the seat of the Govermment of the eirele, and has a considerable trade in grain, wine, \&c. Being intermediate between Trieste and Vienna, it has also a considerable transit trade, whieh has greatly increased since the opening of the railway between it and the latter eity, and whieh will, no doubt, be further improved, when the continuation of the line to Trieste, now ( 1851 ) opened as far as Laibach, is completed. In the vicinity of the town are the mineral waters of Rohitch, large quantities of which are bottled and sent to varions pliaces. Numerous Roman remains exist here. In the neighbourhood is the old castle of Cilli, formerly the residence of the Counts of that name. Pop. 1800.

CILYCWM, par. Wales, Carmarthen. Pop. 1/181.
CILYMAENLLWYD, par. Wales, Carmarthen. ]'583.
CIMBEBASIA, a country on S. W. coast, Afriea, having N. Benguela, and S. the country of the Hottentots, between lat. $17^{\circ}$ and $26^{\circ} 3 \overline{5}^{\prime}$ s.; length, 825 m . The coast consists of sand and rocks, and has no trace either of water or vegetation. The interior is also barren, but is said to be inhabited by the Cimbebas, who have given their name to the country.

「ol. I.

CIMBRISHAMN [ane. Cimbrorum Portus], a seaport tn. Sweden, län of, and 31 m. S.S.E. Christianstad, on the Baltic; lat. $55^{\circ} 33^{\prime} 30^{\prime \prime} \mathrm{N}$. ; lon. $14^{\circ} 21^{\prime} 15^{\prime \prime}$ E. (r.). It has some trade in grain; a dyework, tannery, tile-work, and vinegar factory ; and fisling is carried on. Pop. 1032.

CIMINNA, a tn. Sieily, prov. Palermo, 11 m. S.W. Termini. Pop. 6150.

CIMITI, a cape, Naples, N.F. coast of Calabria, between Cape Colonne on the N., and Cape Rizzuto on the S., and between the gulfs of Otranto and Squillace; lat. $39^{\circ} \mathrm{N}$.; lon. $17^{\circ} 8^{\prime} \mathrm{E}$.

CIMITILE, a tn. and com. Naples, prov. Terra di Lavoro, dist. of, and about 1 m . N. Nola. It is chiefly deserving of notice, as the reputed place where several thousand Christians suffered martyrdom, during the reign of the Emperor Mareus Aurelins. The church and different chapels of the town contain numerous pictures and ancient monuments relating to the fact. Pop. 2296.

CIMONE, a mountain, Italy, duchy and dist. Modena, N. Apennines, 6 m . E. Pieve-Pelage; lat. $44^{\circ} 13^{\prime} \mathrm{N}$. ; lon. $10^{\circ} 43^{\prime} \mathrm{E}$. , formerly one of the summits of the central Apennines. It is composed chiefly of graywacke, and rises to an elevation of 6975 ft . above sea Ievel.

CINALOA, or Sinaloa.-1, A dep. Mexican Confederation, formerly a prov. now united with dep. Sonora, and called the Statc of Occidente. Its coast stretches along the Gulf of California, from the River Bayona to the River Mayo, or from lat. $22^{\circ} 33^{\prime}$ to $26^{\circ} 58^{\prime}$ N., about 220 m . with a general breadth of about 150 m . The country along the coast is generally low and flat, with a sandy soil, which, however, yields good erops of Indian corn and wheat, when it can be irrigated. The principal products are wheat, Indian corn, and sugar. The mountains are usually without wood, and only covered with low stunted trees and bushes, but towards the sierra Madre, on the E. frentier, there are extensive forests. The population consists ehiefly of whites, the number of Indians being inconsiderable.-2, A tn. situated within 8 or 10 m . 1. bank of a river of same name, about 50 m . from the Gulf of California; lat. $22^{\circ} 45^{\prime} \mathrm{N}$. ; lon. $108^{\circ} 7^{\prime} \mathrm{W}$. It is a thriving place, and contains 9500 inhabitants.

CINCA [anc. Cinga], a river, Spain, which rises in a small lake in the Pyrénées, on the French frontier in the valley of Bielsa, prov. Huesca, and proceeding $S$. through Aragon, joins r. bank, Segre, a little above its confluence with the Ebro. Its principal tribntaries are the Essera, which joins its l. bank, and the Isuela which joins its r. bank; whole course about 70 m . It is very rapid, and subjeet to inundations, which frequently oceasion great damage. It is well stocked with fish.

CINCINNATI, a eity and river port, U. States, Ohio, on r. bank Ohio river, 500 m . above its junction with the Mississippi; lat. $39^{\circ} 6^{\prime} 30^{\prime \prime} \mathrm{N} . ;$ lon. $84^{\circ} 26^{\prime} \mathrm{W}$. It is finely situated in a valley, 3 m . broad, closed in with hills, on the gentle slopes of which the houses, mostly of good form and material, are built. 'The strects are generally wide and straight, several having footways lined with trees. The water for general use is raised from the river, by steam-pumping, into a large filtering rescrvoir. Among the finest public edifices are the R. Catholic eathedral, the l'rotestant Episcopal church, the First Presbyterian ehureh, \&e. There are nearly 100 other places of worslip, a handsome city hall. two museums. a theatre, and large music liall; a meehanies' institute, and several good public libraries; three colleges-one of public endownent (the Cincinnati); one private (the Woodward); and the St. Francis Xavier, a R. Catholic foundation; with nunerous academies, seminaries, \&c. In the eity and environs are several asylums for the diseased and destitute, including one hospital or more. It is a great seat of industry, being the recognized focus of the mid-western commerce of the Union, whence lines of communication, by river, rail, and canal, radiate around-inland, seaward, and lakeward. Up and down the Ohio, to and from the city, trade or ply about 300 steamers, many of them large vessels. The chief article of native produce is pork, of which the exports in 1852 exceeded $£ 1,000,000$. All other kinds of produce are also largely exported. The principal manufactures are machines, iron and other metal wares, floured grain, textile fabries, articles of clothing, furniture, books, saddlery, \&c.;-in 1851, estimated to the value of nearly $£ 12,000,000$. Cincinnati is now the to the value of nearly $£ 12,000,000$. Cincinnati is $\mathbf{n}$
fifth city in the $\mathbf{U}$. States for population, and is of still greater relative importance in some other respects. Pop. (1800) about 750 ; (1820), 9602; (1830) 24,830; (1840), 46,338; (1850), 115,438; (1853), 160,186.

CINCU-Señores, a tn . Mexican Confederation, state of, and $106 \mathrm{~m} . \mathrm{N}$. by W. Durango. It formed one of the mission settlements of the Jesuits, and was occupied by Indians.

CINEY, or Chiney [anc. Cinnacum], a tn. and com. Belgium, prov. of, and 16 m. S.E. Namur, on an isolated plateau near the Haljoux. It is surrounded by old ramparts, with bastions attributed to the Romans; has regularly built houses, and clean and spacious streets. The parish church is surmounted by a square tower, and is said to date from the beginning of the fourth century. Ciney is celebrated for its ironware, and varnished pottery, has a considerable trade in horses and cattle, corn, wool, and wood, and eight annual fairs. In the vicinity several ancient tombs and other antiquities have been found. Pop. 1472.

CINGOLI, or Cingolo, a tn . Papal States, deleg. of, and 13 m. W.N.W. Macerata, r. bank, Musone. It contains a collegiate chureh, and three convents, and has several fairs Pop. 2022.

CINISI, a tn. Sicily, prov. of, and 13 m . W.N.W. Palermo, near the sea. The manna plant, and the Indian fig, are cultivated in the neighbourhood. Pop. 3459.

CINQUE PORT'S, seaports of England, namely, Dover, Sandwiche, Hythe, and Romney, on the coast of Kent, and Sussex, Rye, Winchelsea, Hastings, and Seaford, on that of Sussex. Their number, as the name imports, was originally five; Winchelsea, Rye, and Seaford, having been subsequently added. The original Cinque Ports were created by Willian the Conqueror, the others were added before the reign of Henry III. They were endowed with various important privileges, in consideration of their furnishing a certain quota of ships of war, properly equipped and manned, for the King's use, when demanded. In the time of Edward I., the number they were bound to provide was 57 , the period of gratuitous service being limited to 15 days. Over these ports is appointed a warden, a most honourable, but quite a sinecure, appointment; and, prior to 1831, each had a right to send two members, called barons, to Parliament.

CINQUEFRONDI, a tn. Naples, prov. Calabria Ultra I., about 44 m . S.S.W. Catanzaro. The former town was entirely destroyed by the earthquake of 1783 . Pop. 4552.

CINTEGABELLE, a tn. France, dep. Haute-Garonne, at the confluence of the Lers with the Ariege, which here begins to be navigable. It carries on some trade, and has four annual fairs. Pop. 3971.

CINTI, or Zinti, a tn. Bolivia, cap.prov. of same name, dep. Chuquisaca. It is situate in a vale of the same name, 1 . bank, Chico, a small affluent of the Pilcomayo, and within 10 m . of its junction with that river ; lat. $21^{\circ} 16^{\prime}$ S. ; lon. $65^{\circ} 25^{\prime} \mathrm{W}$. It has a considerable trade in wine and brandy. Pop. 200. --The vale of Cinti, in which the town stands, is extremely fertile.

Cintra (Mons Cynthles), a tn. Portugal, prov. Estremadura, comarca, Torres Yedras, 15 m. W.N.W. Lisbon, on the slope of the sierra de Cintra. The country around is extremely beautiful, and the climate mild and agreeable. On these accounts it is much resorted to by the wealthier inhabitants of Lisbon, who have here their quintas or country houses. Many Euglish and other foreigners have villas here also. The Kings of Portugal have a palace at Cintra, with fine gardens ornamented with fountains. W. of the town a little, is the beautiful valley of Collares, which opens to the sea, and which is also thickly studded with country mansions. There are four annual fairs, one of which lasts two days. The country abounds with fruits of all descriptions, including oranges, and lemons, and in the neighbourhood are quarries of beautiful marble. Cintra is celebrated for the convention entered into there in 1808, by which the French, after their defeat at Vimeira, were not only permitted to leave Portugal, but were conveyed to France with their arms, artillery, and property. Pop. 2562.

CINTRUENIGO, a tn. Spain, Navarre, 13 m. S.W. Tudela, r. bank, Alhama. Its streets are regularly built, its square spacious, and lined with handsome houses, and public buildings. Here are a fine church, several chapels, a townhall, prison, cemetery, and two schools. The inhabitants
express oil in large quantities, and trade in grain and fruits. Pop. 2200.

CIOTAT (La), a seaport tn. France, dep. Bouches-duRhône, 15 m . S.E. Marseille, on the Mediterranean. It is built at the head of a bight, $W$. side of the bay of Lèques, and is surrounded by an old rampart in tolerable preservation. The streets are straight, and well paved, and most of the houses are tastefully built. An agreeable promenade, called the Tasse, overlooks the town. The port is safe, and commodious, and large enough to contain 150 vessels, with water sufficient for ships of 800 tons. There is good anchorage for large vessels in the bay, and two fixed lights on the moles. The port is defended by a castle, and several batteries. There are here a tribunal of commerce, and a school of navigation, cotton-mills, shipbuilding yards, and a manufactory of steam engines. The surrounding district produces excellent muscatel wine, oil of superior quality, figs, oranges, \&c., in which articles a considerable trade is carried on. Sardines and anchovies are caught along the coast. Ciotat town is said to occupy the site of the ancient Catharistes, founded by the Marseillaise b.c. 160. The Romans had a naval station here. Pop. 4093.
CIRCARS (Northern), a large maritime prov. E. coast, Hindoostan, the limits of which are differently stated by different authorities, but which may be said, generally, to extend between lat. $16^{\circ}$ and $19^{\circ} 25^{\prime}$ N., having W., Orissa; E., the Bay of Bengal; S., the Carnatic; and N., Cuttack. The Circars are included in the Madras presidency, and politically divided into five districts-Ganjam, Vizagapatam, Rajamundry, Masulipatam, and Guntoor. A range of mountains extends along the whole W. frontier, from the Chilka Lake on the N. to the banks of the Godavery on the S. Their distance from the coast, to which they run parallel, is generally from 30 to 40 m ., but in several places they approach much nearer The climate S. of the Godavery is intensely hot, to the N . it is more temperate. The periodical rains generally set in about the middle of June, falling in moderate showers, with a W. wind, till the end of August, when they begin to descend in greater abundance, and so continue till the beginning of November. From this period, till the end of March, when the hot season commences, the weather is fair and pleasant. In the hilly regions S. of the Godavery, a noxious state of air prevails throughout the different seasons of vegetation, giving rise to a disease called the hill fever. Grain is raised here in large quantities, but fruits, roots, and green esculents are scarce. Sugar, ginger, turmeric, cotton, and tobacco, are also produced, the latter of excellent quality. The forests on the hills particularly those of Rajamundry, contain vast numbers of valuable teak trees. The principal quadrupeds are sheep, and the larger species of horned cattle. The neighbouring seas abound in fish of various kinds. The chief manufactures are cotton stuffs, carpets, chintzes, indigo, punjum cloths, muslins, and silks, but of some of these the quantities manufactured are very trifling. The raw silk is all imported. Shipbuilding is carried on to a considerable extent in the Godavery, and above 50,000 tons of small native craft are employed in the coasting trade, principally with Madras. The exports to Europe are chiefly fine cotton fabrics. The native inhabitants of these districts, represented as a superior class of men to those of Bengal, are wholly Hindoos, with exception of a few Mahomedans dispersed through the different towns. The villages consist of mud huts, but in general, tolerably commodious. The roads are so bad that wheeled carriages are very little employed, while the want of bridges and proper ferry-boats, render travelling in the interior exceedingly tedious, and in some places almost impracticable. The Northern Cirears were among the earliest of the territorial possessions of the East India Company, the latter having acquired four of them in 1765, from Mogul Shah Allum, who bestowed them on the Company as a free gift. The fifth, Guntoor, came into our possession in 1788. The local administration of the territory was continued under the management of the natives until 1769 , when provincial chiefs and councils were appointed, and this mode of government continued until 1794, when a change in the internal Government took place. The system of a permanent assessment was introduced and established during the years 1802 and 1804, when the province was divided into the five jurisdictions or collectorates already named.

CIRCASSIA, or Tcherkessia, a country in the S.E.
corner of Europe, the E. portion of which is called Little Abkasia, claimed by Russia, but in fact independent, between lat. $41^{\circ} 50^{\prime}$ and $45^{\circ} 20^{\circ}$ N., and lon. $37^{\circ}$ and $47^{\circ} 20^{\prime}$ E.; bounded, N. by the rivers Kouban and Terek, and part of the Lussian government of Caucasus, N.W. by the Black sea, S.W. and S. by the mountains of Caucasus, and E. by Daghestan and the district of Kamiki ; greatest length, N.W. to S.E., 550 m. ; a verage breadth, 75 m .; area, about 40.000 sq. in. It oceupics the whole of the N., and in the N.W. a part of the S. side of the Caueasus ; and is intersected throughout by branches of that mountain-chain, separated from each other by deep precipitons ravines, which in general are only wide enough to form the beds of foaming torrents, but occasionally, atter commencing with narrow gorges, spread out into valleys of some extent and great fertility. The highest summits are, for nine months in the year, covered with snow ; some of them, indeed, never altogether parting with this covering; at a lower level, where the surface is not so preeipitous as to leave no soil for vegetation, magnificent forests, chiefly of oak, prevail; and lower still grassy slopes appear, succceded occasionally by cultivated fields; the whole uniting to form a scenery which, according to all accounts, is of the most magnificent description. The climate of Cireassia is represented as generally temperate and salubrious, and good evidence of this is furnished by the fact that the inhabitants are healthy, not subject to chronic diseases, and live, when life is allowed to run its natural course, to a good old age. The geology of Circassia, where not included in that of the Caucasus (which see), is very imperfeetly known. Rich beds of iron exist, but have not been turned to account. Traces of copper and lead have also been discovered; and, in some districts, coal not only is found, but is said to be partially worked, and used for fuel. Circassia abounds in mountantorrents; but none of its streams deserve the name of river, if we except the Kouban and Terck, which both rise within it, and are indebted to it for almost all their affluents, but acquire no importance till they reach its frontiers. The natural vegetation of Circassia is vigorous and luxuriant. Reference has already been made to the magnificent inountainforests. Some of these extend into the lower grounds, and there have a rank under-growth, which becomes almost impenetrable; and, while blocking up all ordinary means of naffic, compensates for the evil by furnishing adinirable means of defence against hostile attacks. The wild animals, though perhaps not so various in kind as might be anticipated in such eircumstances, are very numerous, and consist chiefly of bears, wolves, foxes, and hogs. Various kinds of deer abound, and the reedy marshes along the banks of the Kouban are said to be hannted by the elk. Eagles are often seen, and the part of the country washed by the Black Sea is the resort of numerous Hocks of swan and geese. Among smaller birds, the nightingale oceasionally is heard; but many others, as the blackbird and thrush, though abundant, and externally the same as our own well-known songsters, appear to have lost their notes. A few fish are taken on the coast, and most of the mountain streams are well supplied with trout. Where the surface is sufficiently level to admit of eultivation, the soil is generally a deep rich loam, with a substratum of limestone or chalk. The implements and mode of cultivation are very defective; but corn and wine, and all the ordinary productions of temperate climates, are freely raised. The crop most extensively grown is millet, the flour of which, made into porridge, may be regarded as the national diet. The horses, though generally small, are active, sure-footed, quick-eyed, and remarka̧bly sagacious. Almost every Circassian has his horse, and tends it with a care scarcely surpassed by that which is paid by the Arab of the desert to his steed. Both eattle and sheep are extensively reared; but the domestic animal existing in greatest numbers is the goat, which grows up with almost no care, browsing on the twigs and undergrowth of the forests. Agriculture, and the rearing of cattle, seem to be the only industrial occupations. There are no manufactures, in the proper sense of the term. The only thing approading to them are the scanty products of a few individuals employed as a kind of ornamental silversmiths, gun and sword smiths, cartwrights, and coopers. It is said, however, that there is no laek of domestic industry; and, that while the males are occupied with the labours of
the field, the females are busily engaged, not only in ordinary household work, but in carrying wool, hemp, and flax through all their various processes up to the finished garment, weaving and tailoring included. The trade is almost as nominal as the manufactures. When it has any existence, it is only as barter, money being almost unknown, an ox or cow forming the ordinary standard of value. The country, however, is by no means destitute of materials for export. It has ample supplies of excellent oak timber, and could furnish considerable quantities of honey, wax, tallow, hides, and furs. Of the last, indeed, a beautiful fiteh fur is sent to Constantinople, and much valued for pelisses. To Constantinople, also, are sent Circassian slaves, both male and female; the former used to recruit the corps of Mamelukes in Egypt, and the latter, chicfly natives of Georgia, Imeritia, and Mingrelia, to supply the harems of wealthy Turks. The E. part of Circassia is visited by Armenian traders.

But the chief interest connected with Circassia is not of a commercial nature. It seems to be universally admitted that its people exhibit man in his finest physical form, and are the original stock from which the races now dominant throughout the civilized world were derived. In consequence of this, everything connected with them-their shape and features, their manners, institutions, and general history-have justly engaged a far greater degree of attention than the extent of their country, and even the heroic achievements, of which they have made it the theatre, could have otherwise deserved. Unfortunately, in regard to many points, the difficulty of inquiry is as great as its importance. Although the different tribes inhabiting Circassia bear a striking resemblance to each other, both externally, and in habits and enstoms; they differ widely in language. Within a narrow space, not less than 72 dialects have been counted; and one particular spot, where this varicty is more remarkably exhibited, has been surnamed, by Abulfeda, 'Jebel-el-Alason' [the Mount of Tongues]. To add to the perplexity, none of their languages have a written character; while their pronunciation consists of strange, uncouth, deep, guttural sounds, which European letters can hardly express, and European organs vainly attempt to articulate. In external form the Circassians are of middle stature, broad-shouldered, but otherwise rather slimly made,

CIRCASsians -From Honmaire de Ilell, steppes ce la mer Caspienia*
with small hands and feet, and keen lively eyes. Their bearing is manly and dignified; but they have a kind of lofty gait, which perhaps indicates, and, at all events, may easily be mistaken for, haughtiness. They may be livided into two great classes-the Circassians proper or the Teherkessians, and the Tschetschenzes. They take the common name of

Adighé; but the former, occupying the W. parts of the Caucasus, and including among them smaller tribes of Kabardians, Abkases, Ubiches, Tschigetes, \&c., amount to 400,000 or 500,000 souls; while the latter, occupying the E. parts, have probably risen, by their own energy and prowess, from a comparatively feeble stock; and now amount to about 150,000 , thus making the whole population not to exceed 650,000-a number roughly, but apparently fairly, estimated by Wagner, though Mr. Bell tries to prove that it cannot fall short of a million. The Circassians are divided into four different classes, which are ranged under each other in a manner which bears some resemblance to our feudal system. At the head stand the Princes or Pschis, who are independent of each other, and have no common head unless when on great emergencies they concur in appointing one. Their rank is hereditary, and they are particularly careful to preserve it untainted by intermarrying only with families which possess it. Hence this elass is considered to furnish the best specimens of the pure Circassian stock. Under each Pschi are, 1, Usdis or nobility ; 2, Tschfokotes or full freemen; 3, Pschilt-mere freemen, or rather serfs. Beneath all these, though their unfortunate position scarcely allows them to be regarded as a class, are slaves. Each prince, though nominally independent, is by no means despotic. The extent of his powers is well understood; and any attempt to overstretch them would be at once resisted by the nobility, at least in so far as their own privileges were affected. Of the privileges of those below them they might not be so careful, and the oppression of the serfs or Pschilt, by both princes and nobles, is by no means uncommon; but the Tschfokotes or full freemen, the most numerous class of all, well deserve the name, and have both power and spirit sufficient to maintain their position. The Circassians are civilized enough to live in towns, but the nature of the country, combined with other causes, induces them to prefer hamlets or single homesteads, often widely scattered. The houses are generally of a very humble description; they are almost invariably of one story. The better description are built of wood, but the greater part have merely a framework of wood, filled up with clay, and in many cases are of clay throughout. The interior is corresponding. There is no decoration, and scarcely anything which deserves the name of furniture. A kind of bench, raised above the surface, and often covered with mats, forms what is called the divan, and there the inmates sit, eat, and sleep. The imperfect accommodation thus provided is partly explained by the fact, that the Circassian spends the greater part of his time in the open air, and there, not in his house, finds his heme. In domestic life, the Circassian is very much of a Turk. His authority in his own house is absolute. His wife must hide herself from strangers, and not walk out without being veiled. His children must stand in his presence, and, when they eat, go into a corner and turn their backs. The best feature in the domestic arrangement is that there is no harem, and polygamy is almost unknown. Still, so long as public law values the life of a woman at half that of a man, and he sells his daughter, not only to the countryman who honestly takes her for his wife, but sometimes even to the trader who means to make a speculation of her charms-without questioning the truth of all that is said of his manliness, generosity, courage, and love of freedom, it is impossible to deny that, in many essential respects, he is more than half a savage.

The religion of the Circassians exhibits a strange jumble of Christianity, Mahometanism, and Paganism. The first, unfortunately, has scarcely a nominal existence, and is chiefly discernible in a superstitious reverence paid to the cross, figures of which, in stone, are set up in many localities, which in consequence often become famous trysting-places, and at which some kind of worship is paid. The paganism appears in the homage which is paid, chiefly by the vulgar, to two spirits, a good and a bad-Merem, a benevolent deity, and Tschible, the spirit of thunder. Mahometanism exists in a more definite form; and in some districts considerable influence is possessed by its priests, who, in addition to their proper duties, act as teachers, and keep schools, in which-as there is no printed vernacular-Turkish, and occasionally a little Persian, are taught. The true Circassian education is that which the youths receive who are trained to war from their earliest years, and never cease from it till they are able to take the field.

The Circassians having no annals, and very few traditions, their early history is almost a blank. Much ingenuity and labour have been employed in endeavouring to trace their origin through the affinities of language. The success as yet has been very partial; but there can be no doubt that they came from the East, and the probability is that they were originally Medes. From them Greece received her first inhabitants, and in return appears to have sent back colonists, who settled on the Circassian coast, and ultimately fell under the Roman domination. In more modern times, between the 10th and 13th centuries, they became subject to the kingdom of Georgia, whose queen, Tamar, is sard to have spread a knowledge of Christianity among them. In 1424 they threw off the Georgian yoke, asserted their independence, and not only maintained it, but extended their boundaries so far, that they were at last brought into fierce conflict with the Tartars, who ultimately prevailed and made the Circassians their tributaries. They continued so till 1705, when they rose against their oppressors, and, by a decisive victory, effected their freedom. In 1781, Russia acquired the Kuban as a frontier ; and, in 1784, the Turks built the fort Anapa, and thence directed their efforts to stir up the Circassians against the Czar. Anapa, taken by the Russians in 1807, was restored to Turkey in 1812, at the peace of Bucharest. The quiet which followed this treaty was used by the Turks to convert the Circassians to Islamism, and thus implant in them an ever-during enmity to Russia. In 1829, Anapa again fell into the hands of the Russians; and by the treaty of Adrianople, they also acquired all the other Turkish possessions on this coast. Upon this they ground their claims of sovereignty over Circassia, which in fact was never under Turkish rule. The claim is indignantly scouted by the Circassians, who for many years have not only kept the Russian armies at bay, but inflicted a series of defeats, as honourable to the victors as humiliating and disastrous to their foes.-(Wagner's Kaukasus; Nouv. Ann. Voy.; Bell's Circassia; \&c.)

CIRCELLO, or Circeo [anc. Circceum Promontorium], a cape and mount, S. Italy, on the Mediterranean, near the S . extremity of the Papal States; lat. $41^{\circ} 13^{\prime} \mathrm{N}$. ; lon. $13^{\circ} 2^{\prime} 30^{\prime \prime} \mathrm{E}$. It rises 1713 ft . above sea level, and derives its name from Circe, the famous sorceress.

CIRCLEVILLE, a tn. U. States, Ohio, 26 m . S. Columbus. It has regular streets, at right angles to each other, and contains a court-house, jail, market-house, six public offices, four churches, and an academy; a distillery, a brewery, three tanneries, and three printing offices. Pop. about 2000.

CIRENCESTER [usually called Cicester], a parl. bor. England, co. of, and 18 m . S.E. Gloucester, on the Cheltenham branch of the Great Western Railway. It consists of four principal streets, seven smaller, and several lanes, extending over an area about 2 m . in circumference. The houses are mostly of stone, and well built; the streets well paved, and lighted with gas. It has altogether a respectable appearance, having the air of a town inhabited by persons in opulent circuinstances. The church, which is in the style of the 15th century, is one of the most magnificent parochial edifices in England, and contains a number of interesting monuments; its tower is 132 ft . high. There are several dissenting chapels, a free grammar-school, and numerous char ities. Woollen cloths and carpets are manufactured here to a small extent ; also currier's knives, which are much esteemed. There is little trade of any other kind carried on. It returns two members to the House of Commons. Registered electors (1850), 467. Cirencester was a city of the Britons, and subsequently a Roman station called, by Ptolemy, Corinium. A number of Roman remains have been discovered in the vicinity, including an amphitheatre. Pop. 6014.
CikEY-les-forges, a tn. France, dep. Meurthe, 11 m . S.W. Sarrebourg, at the foot of the Vosges, near the source of the Vezouze. It manufactures plate glass on a very extensive scale, delft ware, and paper; and has also saw mills. Pop. 2347.

CIRIE, a tn. Sardinian States, prov. of, and 13 m. N.N.W. Turin, on a branch of the Stura. It has three churches, and several convents. Pop. 4600.

CIRO, a tn. Naples, prov. Calabria Ultra, 42 m. N.E. Catanzaro, on the summit of a hill about 3 m . from the Ionian Sea. It is surrounded by walls, defended by a citadel, and contains three clurches, a palace, the ordinary residence of

## CIRON

701
CIUDAD-REAL
the bishops of Umbriatico, and a seminary. The astronomer Gigli, who reformed the calendar under Gregory XIII., was a native of this town. The district produces a considerable quantity of manna. Pop. 2934.

CLRON, a small river, France, which rises on the fronticrs of dep. Landes, near Lubon, and, after a N.W. course of about 25 m., joins 1. bank, Garonne, below Langon.

CISMAIR, a hanlet, Denmark, cap. bail. of same name, duchy, Holstein, 9 m . S.E. Oldenbirg, between the Baltie and the Gruber-See. An ancient abbey of Benedictines was founded here in the 13th century, and suppressed in 1544. The bail., area about 9 m ., contains three towns and thrce parishes. Pop. 5830.

CISNEROS, a tn. Spain, Leon, prov. of, and 24 m . N.W. Palencia, on a gentle cminence, of a circular form. It contains three parish churches, a handsome townhouse, a large storehouse, and well-endowed primary school. The inbabitants are chiefly employed in agriculture and the ordinary handicrafts; but a fourth of them spin and prepare wool tor the great woollen factories of Palencia. Pop. 2029.

CISTERNA.-1, A tı. Papal States, deleg. of, and 28 m . W. Frosinone, near the Appian Way. The only object deserving of notice is the façade of the Bavonal palace, in the public square. The district is unhealthy, being not far from the Pontine marshes. An extensive forest stretches from Cisterna to the Mediterranean. Pop. 2500.-2, A vil. Sar dinian States, division, Alexandria, pov. Asti, and about 18 m. S.E. Turin. Pop. 2000.

CISTERNINO, a tn. Naples, prov. of, and $41 \mathrm{~m} . \mathrm{S} . \mathrm{E}$. Bari, on a monntain. It has a collegiate church and an hospital. Pop. 4637.

CITARA, a tn. Naples, prov. Principato Citra, on the culf of, and 4 m . S.W. Salerno. Some cotton is spun and nanufactured, but the inhabitants are chiefly employed in fishing. Pop. 2230.

CITARA, or Quindo, a tı. New Granada, prov. and cap. of Choco, r. bank, Atrato, 85 m . S. W. Antioquia, with a moist climate, and having rich gold washings near it. Pop. 2600.

CITEAUX [formerly Cisteaux; anc. Cistercium], a small hamlet, France, dep. Côte-d'Or, 14 m. N.E. Beaune, r. bank, louge, the seat of the celebrated monastery of Citeaux, the buildings of which still remain to attest its former magnificence. The monastic order of Cistercians, which owes its name to it, was founded here in 1098, by Robert, Abbot of Molesme; and, in the conrse of a few years, had become so numerous as to throw off the colonies of Ferte, Pontivy, Clairvaux, and Morimond; which four monasteries were called the daughters of Citeaux, and held the rank of chicf houses of the order, although always under the direction of Citeaux. Through the exertions of St. Bernard de Clairvaux, it had increased so much, 100 sears after its origin, as to embrace 800 rich abbeys in different countries of Europe. The Benedictine rule had originally been given to the order, but the Cistercians soon had rules peculiar to themselves. They succeeded in frceing themsclves from the superintendence of the bishops, and formed a kind of spiritual republic under the immediate superintendence of the pope. The abbot of Citeaux, the abbots of the four houses already mentioned, and 20 other defuitores, governed the body. Among the fraternities emanating from them, the most remarkable are the barefooted monks or Feuillans, the nuns of Port-royal, the Recollets, and the monks of La Trappe. In the 18th century, 1800 monasteries and 1400 nunncries depended on the abbey of Citeaux.

CITIIAERON, or Elatea, a mountain, Greece, forming an elevated ridge, which lies in a N.W. direction, separating Bocotra from Mcgaris and Attica. Its culminating point, or Cithaeron proper, overhanging the ancient Platace, which stood on its N. slope, whose walls may still be traced in all their circuit, is 4620 ft . above the sea. This slope gradually sinks down into the celebrated plains of Bootia. The mo-
 owes to the pine forests by which its summit is crowned. Under its ancient name, it is celebrated, by poets and other writers, as the scene of many events, fabulous or authentic.

CITTA-della-pieve, a tn. Papal States, deleg. of, and $20 \mathrm{~m} . \mathrm{S}$. W. Perugia. It stands on a height, is surrounded with walls, and is a clean town, with some good streets, and handsome but deserted palaces. Its chicf interest is derived
from its being the birth-place of the celebrated Pictro Per ugino, one of whose finest frescoes, representing the Adoration of the Magi, adorns the Chicsarella or oratory of Santa Maria de' Bianchi. Others of his pieces adorn the cathedral and the churches of the Servites and of Antonio. There are six convents. Pop. 2400.

CITTA-di-castello [anc. Tifernum, Tibernum], a tn. Papal States, 25 m. N.N.W. Perugia, l. bank, Tiber. It is the seat of a bishopric, and has a citadel, cathedral, nine churches, several eonvents, and some silk mills. In 1798 the French captured the town from the Neapolitans, who had recently taken possession of it. Pop. 7000.

ClTTA NUOVA, a th. Austria, ducliy, Styria; on a spit of land on the Adriatic, at the mouth of the Queto, 26 m . S.W. Trieste. It is old, much fallen off, has a cathedral, and three other churches; is the seat of a bishop, and esteemed very unhealthy. Pop. 1184.

CI'T'TA-Vecchia, or Civita-Veccilia, a tı. Malta, near the centre, and almost on the hishest point of the island, 7 m . W.S.W. Valetta. The rise of the latter town has almost ruined it, and its magnificent houses and palaces are almost descrted. The cathedral, dedicated to St. Paul, a large and handsome edifice, from which a view of the whole island is obtained, is said to occupy the site of the house of Publius, who was Roman governor when the apostle suffered shipwreck. The catacombs, situated in the suburb Rabato, are among the most interesting objects of the place. They are excavated in the tertiary limestone of the island, and run a considerable way under ground. The rudely sculptured cross which is on the roof of many of the tombs, and the inscription, In pace posita sunt, leave no doubt that they were the work of the early Christians. Many of them were probably used for refuge. Citta-Vecchia, while in possession of the Saracens, was called Medina; and in that of the Aragonese, Notabile.

CITTA.Vecchia [anc. Pharia], a tn. Austria, N.W. coast, isl. Lesina, Dalmatia, head of a deep bay of same name. It contains a parish church, and has a capacious harbour, and some trade. Shipbuilding and fishing are the chief employments. As the town occupies the site of the ancient Pharia, a great number, both of Greek and Roman antiquities, are found within it. Pop. 2300.

CITTADELLA, a tn. Austrian Italy, gov. Venice, in prov. of, and 15 m. N.E. Vicenza, on the Brentella, an affluent of the Brenta. It is surrounded by walls flanked with towers, and has manufactures of linen and paper. Pop. 6594.

CI'T'TADELLA-di-ponto, a tn. and com. Austrian Italy, gov. Venice, prov. of and 2 m. N.N.W. Mantua, separated from that city by the Mincio. It is strongly fortified, begirt with walls, and overlooked by a fortress. Pop. 2900.

ClTY POIN'T, a vil., river, and port, U. States, Virginia, 33 m . S.E. Richmond, r. bank, James, which is navigable to this place for large vessels.

CIUDAD-Real, a tn. Mexican Confederation, cap. of dep. Chiapa, in a fertile plain, on the Rio de los Zeldales, 285 m. S.E. Vera Cruz. It has a cathedral, three monasteries, a nunnery, an episcopal seminary, and a R. Catholic college. It was founded, in 1528 , on the site of an Indian town, and raised to a bishop's sce 10 sears after. It has a college, hospital, some manufactures and trade in cacao, cochineal, cotton, and wool; and in its vicinity an intermittent spring, and a stalactite cavern. It was originally called Villa-Real, then Villa Viciosa, next San-Christoval-de-los-Llanos, after which it received its present name. It is, likewise, sometimes called Ciudad de-las-Cazas. Pop. 4300.

CIUDAD-Real, a prov. Spain, occupying the S. extremity of New Castile; bounded, N. by prov. Toledo, E. Albacete, S. Cordova and Jaen, and W. Caceres and Badajos; area. $11,768 \mathrm{sq} . \mathrm{m}$. The province, in general, is bare looking, immense plains stretching from the mountains of Toledo to the sierra Morena; the central parts are sands and barren, but N. and S. are lofty sierras and deep valleys, in some places clothed with forests, in others rocky and precipitous, with no other vegetation than lichen, wild thyme, or thistles. The mountains of Ciulad-Real abound in mines of iron, silver, copper, lead, antimony, cinnabar, and coal; also in quarries of marble, jasper, quartzite, granite, \&c. From them likewise flow various streams, chicfly atfluents of the Guadiana, which traverse and fertilize the country. Medicinal and mineral springs, both hot and cold, are abundant. The cli-
mate is dry, and, in the heat of summer, very oppressive; E. and S. winds frequently bring most destructive visitations of locusts. The plains and valleys are productive in the vicinity of the rivers, but are, for the most part, barren for want of moisture; in favourable seasons, however, good crops of wheat, rye, barley, maize, oats, beans, pease, hemp, flax, aniseed, esparto, and barilla, are obtained. Sheep, goats, pigs, horned cattle, horses, mules, and asses, are reared. Woollen, linen, cotton, hempen, and silken fabrics, soap, saltpetre, hardware, earthenware, esparto, copper utensils, \&c., are manufactured; brandy distilled, and wine and oil of good quality, and in considerable quantities, made. Iron, silver, copper, and other metals; manufactured goods, brandy, wine, and oil; horses, mules, and cattle, are exported. Sugar, coffee, rice, lace, and perfumery, imported. Ciudad-Real possesses, in comparison, more schools than the generality of the Spanish provinces, yet, strange to say, the proportional attendance is under the average, and crime predominates in an equal ratio. Pop. 302,593.-(Madoz.)

CIUDAD-Real, a tn. Spain, New Castile, cap. above prov., on a low plain, about 5 m . S. l. bank, Guadiana, and 100 in. S. Madrid. When viewed at a distance, its walls, buildings, and planted and well cultivated environs, give it a very pleasing appearance; but on entering it, its attractions vanish. The walls are found to be, in many parts, ruinous, and the whole town has a deserted look, the space which it occupies being evidently far larger than its actual population requires. It is, however, in general, well built. The houses are of solid construction, and many of them are handsome, adorned with iron railings and balconies, and painted white; the streets are regular and wide, well paved, and almost flat as a bowling green. This last circumstance has the disadvantage of not affording a proper descent for the water, and, moreover, makes the town liable to inundations, from which it has often suffered severely. The only public square deserving of notice is the Plaza Mayor, or of the Constitucion. It is of considerable extent, and the handsome houses which form it are lined with arcades. The principal edifices are three parish churches, particularly that of Santa Maria, a magnificent structure, consisting only of a single nave, but so grand, spacious, and lofty, that no other in Spain, except the cathedral of Coria, equals it, and surmounted by a very lofty tower of hewn stone; six monasteries, three nunneries, a large and richlyendowed hospital, partly occupied as a penitentiary, and house of refuge for juvenile vagrants; several other ordinary hospitals, a secondary college, and a superior school. Manufactures and trade are of little importance. The former consists chiefly of woollens of coarse quality, but very durable, and plain linens and table cloths. Some good watches also are made. The trade is almost confined to grain sent into the provinces of Mureia and Valencia, and wheat, wine, and potatoes sent to Madrid. Besides a weekly market, there is an important annual fair. Pop. 10,235.

CIUDAD-Rodrigo, a tn. Spain, Leon, prov. of, and 55 m. S.W. Salamanca, on a gentle eminence above $r$. bank, Agueda, 15 m . from the frontiers of Portugal. It ranks as a fortress of the second class, being surrounded by a wall and ditch, and defended by a strong castle and other works. It consists principally of two streets, which traverse the town centrically, cutting each other at right angles, and are opened out by a number of minor streets or lanes. The houses are only of indifferent construction, and very little attention is paid to cleanliness. The principal edifices are the cathedral, in the form of a cross, and a mongrel style of architecture; the chapel of Cerralbo, in a ruinous condition, but still an elegant structure; and the church of the Augustine convent. There are several educational and charitable establishments, but none of them deserve particular notice. One of the most remarkable structures is the magnificent bridge over the Agueda, outside the Coleda gate. Ciudad-Rodrigo is a place of great antiquity, and makes a considerable figure in the early history of Spain; but the interest which it thus excites is small, compared with that which it now possesses, in consequence of the important events which took place within it, or in its neighbourhood, during the Peninsular war. In 1810, it was taken by the French, and, in 1812, after a regular siege, retaken by the British. It afterwards continued, for some time, to be the head quarters of the Duke of Wellington, and the centre of military operations. The famous
cardinal, Francisco di Pachecho, who distinguished himself as a diplomatist in the reign of Philip II., was a native of Ciudad-Rodrigo. Pop. 4852.

CIUDADELA, a city and seaport, Spain, isl. Minorca; lat. $39^{\circ} 58^{\prime} \mathrm{N}$. ; lon. $3^{\circ} 52^{\prime}$ E. ; on a plain at the W. side of the isl. It is surrounded by walls and a ditch, is entered by five gates, and possesses several spacious and paved squares, a cathedral, municipal buildings, a school, hospital, cemetery, and several convents, with churches attached. The inhabitants are engaged in weaving woollen fabrics, expressing oil and wine, and in husbandry. They import brandy, oil, hemp, baize, wax, fruit, soap, paper, bricks, hardware, linen and cotton fabrics, \&c.; and export coal, barley, potatoes, hewn stone, wool, vinegar, shoes, hemp, and timber. As a port, its commerce is inconsiderable. Pop. 7335.-(Madoz.)

CIVEH, a vil. W. A frica, r. bank, Senegal ; lat. $15^{\circ} 46^{\prime} \mathrm{N}$.; lon. about $13^{\circ} \mathrm{W}$. It has a low, but beautifully verdant site, amidst a natural forest. Its inhabitants are chiefly Moorish Marabouts, who teach the Koran, and impart Mahometan civilization to the people of the surrounding districts.

CIVEZZANO, a tn. and com. Austria, duchy Tyrol, prov. of, and 5 m . E. by N. Trent, on the highroad thence to Venice. It has a handsome church, and several silk manufactories. Pop. 2557.

CI VIDALE [anc. Forum Julii], a tn. and par. Anstrian Italy, gov. Venice, agreeably situate 8 m . E.N.E. Udine, on the Natisone, here crossed by an ancient stone bridge. It is surrounded by walls and ditches, and hemmed in by the Julian Alps. Besides the town proper, there are five suburbs, and within both no fewer than seven churches; of which the most noteworthy is the cathedral Santa Maria, a structure with three gothic portals, a handsome altar screen, a curious baptismal font, and several fine paintings. Cividale has also a museum of antiquities, a record office, containing some very curious charters, two hospitals, and an educational establishment for females. It also possesses several mills, and silk and cotton factories. Great numbers of interesting antiquities exist in the neighbourhood. Pop. 6000.

CIVI'T'A, several small tns. Naples:-1, (-Camporano), a tn. and com., prov. Molise, 9 m . W. Larino; with two churches, and two annual fairs. Pop. 3189.-2, (-Nuova), a tn. and com. prov. Molise, 10 m . E.N.E. Isernia, on the Trigno. Pop. 2933.-3, (-Ducale), a tn. and com. prov. Abruzzo Ultra II., cap. dist. of same name, 5 m . E. Rieti, r. bank, Velino. It contains a cathedral, seminary, and four convents; is the see of a bishop, and seat of a court of law. Pop. of tn. 1620; of com. 3331.-4, (St. Angelo), a tn. prov. Abruzzo Ultra I., dist. of, and 8 m . N.E. Civita-di-Penne. It stands on a hill about 4 m . W. the Adriatic. It contains a collegiate church, four convents, and an hospital ; manufactures chiefly leather; trades in corn, wine, and oil; and has five annual fairs. Pop. 5974.

CIVITA-Castellana, a tn. Papal States, 28 m . N. Rome, on a steep hill near the Kio-Maggiore, here crossed by a handsome bridge, 150 ft . above the water built by Clement XI. It has a citadel, a public square, ornamented by a fountain; a cathedral, three convents, a college, and a state prison. Here, on December 4, 1798, the French, commanded by General Macdonald, defeated the Neapolitans commanded by Mack. Pop. 4000.

CIVITA-di-Penne [anc. Pinna-Vestina], a tn. Naples, prov. Abruzzo Ultra I., built on two hills, 29 m . E. by N. Aquila. In conjunction with Atri, it is the seat of a bishopric. Although in general ill built, it contains some fine edifices, among which are the cathedral and diocesan seminary. It has five churches, seven monasteries, two nunneries, an hos. pital, theatre, dyework, and a tannery. Civita-di-Penne was destroyed by Sylla during the Roman civil war. The Northmen having expelled ihe Greeks and Saracens from it, founded the kingdom of the two Sicilies; and Roger I. here took the title of King, and declared this place the royal city. It belonged to Charles de Bourbon, who, on his accession to the throne of Spain, ceded it to his son Ferdinand IV. Pop. 8860.

CIVITA-Lavigna, or Lavinia, a tn. Papal States, 17 m . S.S.E. Rome, occupying the site of the ancient Lanuvium. It is built of massive rectangular blocks, evidently the remains of ancient buildings. Near it are the remains of a building supposed to have been part of the temple of Juno, and also of an amphitheatre. Pop. 800.

## CLAIRAC

CIVITA-Vecchia, a deleg. Papal States; bounded, N.N.W. and N.E. by deleg. Viterbo, S.E.Comarea Rome, and S.W. the Mediterranean; length, N. W. to S.E., about 30 m. ; breadth, N.E. to S.W., about 20 m . In the E. it is billy, being traversed by distant ramifications, of the Apennines; but the W. is generally flat, and contains numerous small lakes. Its principal rivers are the Marta, with its tributary the Arone, and the Mignone. The hills in the N.E. contain alum, which is extensively worked. The climate is, in general, unhealthy. Pop. about 24,000.

CIVITA-Vecchia [anc. Civitas-Vetus; Centum-Cellee], a seaport tn . Papal States, cap. deleg. of same name, on the Mediterrancan, 38 m . N.W. Rome, of which it is the port; lat. $42^{\circ} 5^{\prime} 42^{\prime \prime} \mathrm{N} . ;$ lon. $11^{\circ} 44^{\prime} \mathrm{E}$. (r.) The town is fortified, and tolerably well built; streete narrow, but straight. It has scveral convents, a church, a theatre, a lazaretto, and a convict station. The air is considered unhealthy, and the water is of bad quality. It is the seat of a bishop, a college, and a tribunal of commerce; has some manufactures of cotton goods; and in the environs extensive alum-works, the produce of which is sold under the name of Roman alum. The port, which owes its origin to the Emperor Trajan, is one of the best in the Papal dominions. The basin is round. and

CIVITA-VECCHIL. - Fiom a sketch by W Leiteh.
esteemed a ehef-deurre. Two large moles form the harbour, and a breakwater outside, constructed on a similar plan to the Plymouth breakwater, protects the shipping from tlic heavy sea brought in by the W. gales. A lighthouse is erected on its $S$. end, with a lantern 74 ft . above sea level. The harbour has depth of water for vessels of 400 or 500 tons, and ships of greater draft may anchor inside the breakwater. CivitaVecchia is a free port, but the quarantine regulations are enforced with extreme strictness. Consuls from the principal European states reside at it. The principal foreign commerce of the state, chiefly with Genoa, Marseille, and England, is carried on here; but the trade is not so extensive as formerly. The exports consist of wood, grain, wool, cheesc, potash, pumice stone, and alum ; and the imports of colonial produce, salt, salt fish, wine, potteryware, glass, and hardware. There is regular steam communication to Marseille, Genoa, Leghorn, Naples, Grecce, Egypt, and Turkey. Civita-Vecchia also bore the name of Portus Trajanus. It was captured by Totila, and retaken by Narses in 553 . Since that period it has been frequently taken and destroyed, but has been, on each occasion, rebuilt by the conquerors. It was made a free port by Clement XII.; its fortress was begun in 1512, by Julius II., from designs by Michael Angelo, and finished by Paul IIl. The walls of the town were built in 1590 , by by Urban VlI., but the place is quite incapable of defence. Pop. 7000 ; exclusive of convicts, whose number may amount to 1000 or 120 .

CIVITELLA, two places, Naples:-1, (-Canora), a tn. prov. Abruzzo Ultra I., dist. of, and 8 m . S. Civita-di-Penne. Pop. 2271.-2, (del Tronto), a tn. and com. prov. Abruzzo Ultra I., dist. of, and 9 m . N. Teramo, on an affluent on the Tronto. It is scated on a rock, and is a place of considerable
strength, being defended by a castle. It contains a collegiate church, three convents, and an hospital ; and has two annual fairs. Pop. 5703.-Several other small places in Italy have the same name.

CIVO, a tn. Austrian Italy, gov. Milan, 14 m . E. Sondrio, near the Adda; with a chapel, and several mills. Pop. 2600.

CIVRAY, a tn. France, dep. Vienne, 29 m . S. Poitiers, r. bank, Charente. It was formerly fortified, and the ruins of its old castle are still seen. It has a court of first resort, agricultural society, communal college, and a Romanesque church, with a curiously sculptured façadc. It manufactures woollen goods, and has a trade in grain, truffles, chestnuts, clover and lucerne seed, and cattlc. Pop. 2109.

CLACHNAHARRY [the watchman's stone], a vil. Scotland, co. of, and $1 \frac{1}{2} \mathrm{~m}$. W.S.W. Inverness, at the mouth of the Caledonian Canal, chiefly inhabited by fishermen and boat-builders. A desperate battle was fought here in 1333, between the Clan-Chattan and the Munroes of Fowlis. P. 260.

CLACKMANNAN, the smallest co. of Scotland, being only about 10 m . in length, 4 in breadth, and containing little more than 52 sq. m., or about $30,720 \mathrm{ac}$; situate on the N . side of the Forth, by which it is bounded S.W.; on nearly all the other sides, it is enclosed by the counties of Perth and Stirling. The N. part of the county is occupied by the Uchil Hills, but the other portions are comparatively level, and exceedingly fertile, yielding large crops of wheat and beans. The minerals are valuable, especially coal, which abounds. There are also some extensive iron-works in the county, and some large breweries and distillcries; but few other manufactures. The principal towns are Alloa and Clackmannan; the latter is the county town, but the former is the larger. It is divided into four parishes. Pop. (1851), 22.951.

CLACKMANNAN, a small th. Scotland, cap. above co., beautifully situate on an eminence, l. bank, Forth, from which it is distant about 2 m . The town itself, however, is mean and straggling, consisting chiefly of one long, broad, unpaved street. King Robert Bruce resided in the vicinity, and many objects and localities bear reference in their names to that monarch, such as the King's Stone, the King's Seat Hill, \&c. Pop. 1077.

CLACKMANNAN, par. Scot. Clackmannan. Pop. 5145.

CLACTON (Great), par. Eng. Essex; 4170 ac. Pop. 1296.
CLACTON (Little), a vil. and par. England, co. Essex, the former beautifully situate $11 \frac{1}{2} \mathrm{~m}$. E.S.E. Colchester, with a small green in the centre, on which a fair is held on July 25. The church is a small building, with a wooden turret. Area of par. 3110 ac. Pop. 547.

Clagenfurthi, a tn. Austria. Sie Klagenfurt.
CLAIN [anc. Clanis or Clytis], a small river, France, which rises in arrond. Consolens, dep. Charente, and procceding N. through a hilly district, enters dep. Vienne. It then turns first N. W., and afterwards almost due N. passing Poitiers, when it gradually changes its direction to N.N.E., and joins 1. bank, Vienne, below Cernon. During its course, of about $60 \mathrm{~m} .$, it receives the Dive, Vonne, Auzance, Puln, \&c. Operations have been undertaken to make it navigable as far as Poitiers.

CLAINES, par. Eng. Worcester; 4600 ac. Pop. 6395.
CLAIR (St.), a lake and river, N. America, between the state of Michigan and Upper Canada, forming, with the river Detroit, the communication between lakes Huron and Erie. The lake is 36 m. S. Lake Muron, and 24 N. Lake Erie; length, 30 m .; mean breadth, 12 m .; area, about $360 \mathrm{sq} . \mathrm{m}$. It has a uniform depth of 20 ft . contains numerous islands, of which Walpole Island, inhabited by Indians, and St. Anne's lsland, are the most important. On the E. it receives the Thames and Great Bear Creck.-The river, which forms the outlet of Lake Huron, is about 40 m . long, $\frac{1}{2} \mathrm{~m}$. broad, 50 ft . deep, and navigable for ships of any burden.

CLAIRAC, a th. France, dep. Lot-et-Garonne, 17 m . N.W. Agen, r. bank, Lot. It is clean, well-built, and agreeably situate; has flour-mills, and a trade in white wine, tobacco, prunes, \&c., grown in the district. It owes its origin to a Benedictine abbey, founded about the eighth century. In

1527, the abbot, Gerard Rousselle, embraced the Protestant faith. The town followed his example, and was the first in the S. of France that professed the doctrines of the Reformation. It was subsequently taken and retaken several times, by the Romanists and Huguenots. Pop. 2399.

CLAIRVAUX [anc. Clara Vallis], a hamlet, France, dep. Aube, 33 m. S.E. Troyes, l. bank, Aube. Its celebrated abbey was founded in 1114, by St. Bernard. The monks were Cistercians (see Citeaux), and so rapid was the increase of the order, that before St. Bernard's death, in 1153, there were 700 monks here, while St. Bernard liad either founded or affiliated to this abbey no less than 76 monasteries, of which 35 were in France, 11 in Spain, 10 in England and Ireland, 6 in Flanders, 4 in ltaly, 2 in Germany, 2 in Sweden, 1 in IIungary, and 1 in Jenmark. The history of Clairvaux bears favourable testimony to the Benedictine rule, which was distinguished from all others, by a spirit of labour and utility. This abbey presented the singular spectacle of an immense manufactory and agricultural institution, carried on by monks. They cut and sawed timber, had water works for irrigation, and draining, and mills of all kinds; they farmed, forged, made oil, tanned leather, wove labries, spun yarn, and engaged in all kinds of useful industry. The productions were far more than sufficient for the wants of the community, and the fairs of Chatillon-sur-Scine, and Bar-sur-Aube, re ceived large supplies of the superfluities. When the monasteries were suppressed at the Revolution, the walls of this abbey were about $1 \frac{1}{4} \mathrm{~m}$. in circumference, and hesides the splendid monastic buildings, contained several churches, a spacious cellar (in which was the famous tun containing 800 hogsheads of wine), the manorial wine press, bakebouse, quarries, lime-kilns, saw-mills, tan and corn mills, a tannery, infirmary, prison, ice house, \&c. It is now transformed into an immense criminal cotton factory. Trades of all kinds are also carried on by the prisoners, among whom are tailors, shoemakers, ropemakers, carpenters, \&c. Wool is also prepared and spun. Flax is spun and woven, and all the requisites for the prisoners are made in the establishment.

CLAMECY, a tn. France, dep. Nière, 38 m . N.N.E. Nevers, l. bank, Ionne, at the mouth of the Beuvron. It was formerly surrounded by enormous walls, and defended by a castle, which commanded the town and environs. One of its suburbs, situate on the opposite side of the Yonne, was the seat of a bishopric in partibus, known as the bishopric of Bethlehem, founded in 1180, for the bishop of that place, who had been expelled by the Saracens, and suppressed at the Revolution. Wood-rafts for the supply of Paris with fire wood are made up here, and floated down the Yonne, and Seine. The parish church, founded in 1497, is remarkable for its tower, and for some fine sculptures. Clamecy has a tribunal of first resort and of commerce, an agricultural society, and a communal college, with manufactures of common cloth, dyeworks, fulling-mills, potterics, and numerous tanneries. Pop. 5257.

CLANABOROUGH, par. Eng. Devon; 1780 ac. P. 69.
CLANDON, two pars. Eng. Surrey.-1, (East), 1430 ac. Pop. 293.-2, (West), 990 ac. Pop. 407.

CLANE, a tn. and par. Ireland, co. Kildare; 4663 ac. The town, pleasantly situate on the Liffey, spanned here by a bridge of six arches, 17 m . W.S.W. Dublin, was partly burned by the King's troops, during the disturbances of 1798. The woollen manufacture is carried on to a small extent. Four annual fairs, chiefly for cattle, shecp, and pigs. Pop. 2160.

CLANFIELD.-1, A vil. and par. Eng. co. Hants, the former pleasantly situate 5 m . S.W. Petersfield. Area of par. 2280 ac. Pop. 239.-2, Par. Oxford; 1640 ac . Pop. 584.

CLANWILLIAM.-1, A maritime dist. in the N.W. of the Capescolony, bounded N. by the Kousie, in lat. $29^{\circ} 45^{\prime} \mathrm{S}$., and S. by Worcester district and the great Berg liver ; lat. $32^{\circ} 45^{\prime}$ S., E. by Beaufort district, and the Great Riet River, and W. by the Atlantic. The Karee, Nardouw, and Cedar bergen or mountains, traverse it N. to S., parallel to, and 25 to 40 m . from the coast; and the Roggeveld mountains, in like manner, traverse it near meridian $20^{\circ} \mathrm{E}$.; and it is intersected S.E. to N.W. by the Olifant or Elephant's river, and its tributaries, as far as lat. $31^{\circ} 30^{\prime} \mathrm{S}$. ; the Groene, Bitter, and Zwartlintjes, water its more N. parts; area, $24,100 \mathrm{sq} . \mathrm{m}$. It has a healthy climate and a fertile soil. Pop. (1845), 9416. $-2, \Lambda$ vil. cap. of the above district, agreeably situate at the
junction of the Jan Dissel and Olifant Rivers, 140 m . N.N.E. Cape Town. It has a handsome church, with an English free school, and contains a considerable coloured population. There are two hat manufactories in the village, and a fine chalybeate spring in the neighbourhood.

CLAPHAM, a vil. and par. England, co. Surrey. The village 5 m. S.S.W. London, is one of the most beautiful in the environs of the metropolis. It is built round a common of 190 ac., which has been elegantly planted and laid out in carriage drives. This common, which has more the appearance of a park, is surrounded by villas and mansions; and indeed the whole road from London is lined on both sides with elegant houses and gardens or lawns. There are several elegant churches, and chapels for Wesleyans, Baptists, and Independents. Area of par. 1070 ac. Pop. 12,106.

CLAPHAM, a vil. and par. England, co. York, W. Riding ; 24,340 ac. The village, 6 m. N.W. by W. Settle, has an ancient church, and two annual fairs for cattle. The parish contains the most magnificent cavern in the kingdom, extending for about 1000 yards in the limestone rock, and consisting of numerous spacious chambers, beautifully adorned with stalactites and other splendid concretions. Pop. 1853.

CLAPHAM, two pars. Eng.:- 1, Bedford; 1490 ac. Pop. 370.-2, Sussex ; 1920 ac. Pop. 262.

CLAPPERTON ISLAND, an isl. in the Aretic Ocean, Darnley Bay; lat. $69^{\circ} 42^{\prime}$ N.; lon. $123^{\circ} 15^{\prime}$ W. This island, like the neighbouring coast, is of limestone formation. It was discovered by Sir John Franklin, who named it in honour of the distinguished African traveller.

CLAP'S ISLAND, a small isl. Indian Archipelago, on the equator; lon. $98^{\circ}$ E. (R.)

CLALTON, three pars. Eng.:-1, Northampton; 1900ac. Pop. 119.-2, Somerset; 980 ac. Pop. 138.-3, (on the Hill), Gloucester; 700 ac. Pop. 117.

CLAP'TON, a hamlet, England, co. Middlesex, par. Hackney, 3 m . N. by E., London. It is divided into Upper and Lower Clapton. Both divisions contain many spacious and elegant mansions, with tastefully laid out gardens and grounds. Here are a church and chapel, and places of worship for Wesleyans and Independents. At Lower Clapton is the London orphan asylum, a handsome building, for the benevolent purpose of maintaining and educating destitute orphans. P. 5475.

CLARA, a tn. Ireland, King's co. on a plain surrounded by beautiful hills and richly planted grounds, $17 \mathrm{~m} . \mathrm{S} . W$. Mullingar. It consists of one principal street, with three smaller oncs branching off from it, and several bye lanes; houses indifferently built, and the greater part of them thatched with straw, although some of the better sort are slated; but as the streets are kept remarkably clean, the dwellings, however humble, have a respectable appearance. There is a handsome church, a R. Catholic chapel, and a commodious school-house. In the neighbourhood are extensive corn-mills, and a tan-yard. Pop. 1155.-(Local Correspondcnt.)

CLARA, par. Irel. Kilkenny ; 3201 ac. Pop. 663.
CLARA SAN'TA.-1, A small isl. Canaries, off the N. point of Lanzarote ; lat. (centre peak) $29^{\circ} 18^{\prime} \mathrm{N}$. ; lon. $13^{\circ} 32^{\prime} \mathrm{W}$. It is uninkabited and destitute of fresh-water.-2, An isl. Mergui Archipelago, Bay of Bengal ; lat. $11^{\circ} 30^{\prime}$ N.; lon. $97^{\circ} 30^{\prime} \mathrm{E}$. It is about 2 or 3 m . long, and 1 m . broad; is high and has several small peaks, the s. one very sharp like a sugar loaf.-3, A tn. called also Villa Clara, isl. Cuba, in the central dcpartment, 45 m . N. W. Trinidad, in a sugar district. Pop. 6132, of whom 3355 are whites, 1891 free people of colour, and 886 slaves.--4, An isl. coast of Pern, gulf of Guyaquil; lat. $3^{\circ} 15^{\prime} \mathrm{S} . ;$ lon. $80^{\circ} 18^{\prime} \mathrm{W}$. It is about 6 m . long and uninhabited.

CLARAN BRIDGE, a vil. Ireland, co. of, and 8 m . S.E. Galway. In the vicinity are the ruins of an ancient castle. Pop. 200.

CLARBESTON, par. Wales, Pembroke. Pop. 244.
CLARE, a maritime co. Ireland, prov. Munster, (cap. Ennis); having N. Galway co. and bay, S. the Shannon, E. part of Galway, Lough Derg, and part of Tipperary co.; and W. the Atlantic. Extreme length, S.W to N.E., 62 m. ; extreme breadth, N. to S., about 40 m . ; area, $827,994 \mathrm{ac}$., of which 455,009 are arable, and 296,033 uncultivated. The surface is irregular, rising, in many places, into mountains of considerable elevation, particularly in the E., W., and N.W. districts. But there are extensive tracts of level and fertile
land, which yield abundant crops of potatoes, oats, wheat, barley, flax, \&e. There are also extensive grazing lands, called Corcasses, which produce from six to eight tons of hay per Irish acre. Lakes are numerous, but generally of small size. The county is deficient in wood, but the practice of planting is gaining ground, although the extremely violent çales from the Atlantic, to which it is exposed, are unfavourable to the growth of timber. The condition of the smaller cotticrs is extremely bad, being, in no respect, better than in other parts of Ireland. Manufactures are hardly known. Linen is made by the inhabitants in their own dwellings, but almost entirely for home consumption. A small quantity of coarse diaper for towels, and canvas for sacks and bags, are also made, and sold at fairs and markets. There are some fisheries, but they are pursued with no great spirit, although the rivers and coasts of the county present many facilities and inducements for the cultivation of this branch of industry. It is not, however, altogether neglected. The fishery district of Miltownmalbay, which comprises 193 m . of coast, had, in 1845, 676 registered fishing vessels, employing 2393 men and boys. In September 1845, there were 87 national schools in operation. Clare returns three members to the Ilouse of Commons-two for the co., and one for the bor. of Ennis. Pop. (1811), 286,394; (1851), 212,428.

CLARE, an isl. Ireland, co. Mayo, in the Atlantic, about the middle of the entrance to Clew Bay, 18 m . W. Westport. Length, $4 \mathrm{~m} . ;$ breadth, 2 m . ; area, 3959 ac . It has a lighthouse, on the N.E. extremity, 487 ft . above sca level ; lat. $53^{\circ} 49^{\prime} 30^{\prime \prime} \mathrm{N}$.; lon. $9^{\circ} 55^{\prime} 30^{\prime \prime} \mathrm{W}$. The highest point of the island is 1520 ft . above sea level.

CLARE, a vil. Ireland, co. of, and $8 \frac{1}{2}$ m. E.S.E. Armagh, on the Cusher, which propels extensive flour, meal, and flax mills, and over which is an ancient stone bridge. There are places of worship for Presbytcrians and Seceders, including several male and female sehools. An annual fair is held for horses and cattle. In the vicinity are the ruins of Clare castle.

CLARE, a market tn. and par. England, co. Suffolk; 3410 ac. The town is situate, r . bank, Stour, $12 \frac{3}{4} \mathrm{~m}$. S. by W. Bury St. Edmunds; streets spacious, but liouses, in general, old, though considerable improvements have of late years been effected. The old market cross was taken down in 1838, and a spacious corn exchange erected in its stead. It has a handsome church, and places of worship for Independents and Baptists. But the most interesting buildings are the remains of the ancient castle, and the priory of Austin friars; the latter of which, thongh long ago eonverted into a residence, still bears traces of its original destination. The manufacture of straw-plait is carricd on liere to a considerable extent. lop. 1700.

Clare-Castle, a tn. Ireland, co. Clare, on the Ferfus, about 2 m . S. Ennis. It was formerly called Clare, but, a few years ago, was made a post town inder the name of Clare-Castlc. It consists chiefly of one long, straggling, miserable looking street, with another of the same character at right angles to it, the honses being very badly built, and renerally in a ruinous condition. It is remarkably well supplied with water, but destitute of almost every other advantage. There is a l'rotestant church, with a R. Catholic chapel, two sehools, and a dispensary. The military barracks of Clare-Castle, from which the town took the addition to its name, are in the immediate neighbourhood, on an island in the Fergus, connected with the mainland by two bridges. The Fergus is navigable to the town for vessels of 300 tons, but the harbour is very bad, and the traffic inconsiderable. No manufactures of any kind are carried on, and the people, who are either fishermen or agricultural labourers, are in a most wretched condition. 1'op. 879.-(Local Correspondent.)

CLARE-Morris, a tn. Ireland, co. Mayo, in a plain, 15 m . S.E. Castlebar. Its three principal streets are straight, wide and well kept, but many of the houses have, within the last few years, been falling into decay. It is well supplied with water, laving a small lake, besides numerous springs, in the neighbourhood; and although it presents evident traces of dilapidation, it has a clean and even attractive appearance. It has a court-house, police constabulary barracks, work house, a handsome l'rotestant church, and IR. Catholic chapel. There are national, male and female, Church Education society, and infant schools, with poorhouse and dispensary.

Vol. 1.

Hat-making is carried on extensively, and in the Church Education school a great number of girls are employed in knitting crotchet and other fine work-a branch of industry to which many families in the place owe their support. A considerable portion of the inhabitants are employed in agricultural labour. Pop. 2256.-(Local Correspondent.)

CLAREABBEY, par. Irel. Clare ; 7029 ac. Pop. 3280.
CLAREBOROUGH, par. Eng. Notts; 3870 ac. P. 2207.
CLAREGALIVAY, par. Ireland, Galway; $12,453 \mathrm{ac}$. Pop. 4042.

CLAREMONT ISLES, a group of low woody isIs.,-off the N.F. coast, Australia, Cape York peninsula, abont lat. $13^{\circ} 38^{\prime}$ S.; lon. $141^{\circ} 45^{\prime}$ E.

CLARENCE.-1, A cape, forming the N. extremity of Jones'Sound, Baffin's Bay; lat. $76^{\circ} 45^{\prime}$ N.; lon. $77^{\circ} 45^{\prime}$ W. (r.) The peaks of the surrounding mountains, which are lost in the clouds, are covered with perpetual snow, while their sides arc black and inaccessible.-2, An isl. S. Pacific; lat. $9^{\circ} 5^{\prime} \mathrm{S}$.; lon. $171^{\circ} 38^{\prime}$ W. (r.) - 3 , An isl. Antarctic Ocean, forming part of the S. Shetland group. It is of an oval form, and presents several prominent points, the most N. of which bears the name of Lyod's Cape; the S. point is called Cape Bowles. 4, A harbour, Russian Amcrica, on the E. side of Behring's Strait, 45 m . S.E. Cape Prince of Wales.-5, A strait, Persian Gulf, between the isl. Kishm and the mainland, varying from 3 to 13 m . in breadth, and containing numerous islands. -6. A bay, tn., and settlement, N. side of isl. Fernando Po W. Africa, Bight of Biafra. The nay, which is situated in lat. $3^{\circ} 46^{\prime}$ N.; lon. $8^{\circ} 47^{\prime} 30^{\prime \prime}$ E., affords excellent anchorage, and swarms with fish of various kinds.-The settlement was formed with a view to the suppression of the slave trade, and a British military force stationed there, which was withdrawn in 1834.-The town, among other public buildings, contains a large hospital, unfortunately rendered necessary by the nuwholesomeness of the climate. A number of liberated negroes, who live in the neighbourhood of the Government house, appear to be in comfortable circumstances, having neat cottages, with a garden attached to each.- 7 , $\Lambda$ peak, in the preceding isl., $10,700 \mathrm{ft}$. above the level of the sca.8, An isl. S. Amcrica, W. coast of Tierra del Fucgo. It is intersected by the parallel of $54^{\circ} \mathrm{S}$., and the meridian of $72^{\circ}$ W. It is 52 m . long, and 23 broad, and is much indented with bays.

CLARENCE LAKE, or Great Lake, a lake, Yan Diemen's Land, Norfolk Plains, of irregular form, about 9 m . in length, and abont 4 in breadth at the broadest parts.

CLARENCE RIVER, a maritime dist. New S. Wales, between lat. $28^{\circ} 30^{\prime}$ and $29^{\circ} 50^{\prime} \mathrm{S}$. It is intersected, N.N. W. to S.S.E., by the rivers Clarence and Riehmond. The stoek of the district comprises 1340 horses, 31,942 head of horned cattle, 540 pigs, and 179,561 sheep. It contains several lofty mountains, the principal of which are, Mount Warning, 3300 ft . high ; Mount Lindsay or Landesay, 5700 ft . Cassino on the Richmond river, is the ehief place. Pop. 1225. --The river of this name rises in the mountainous region around Mount Lindsay. After pursuing a S.W., and then a N.E. conrse through the district of Clarence, it falls into the Pacific Ocean near Shoal Bay. Its whole length is about 110 m. ; it is navigable for upward 3 of 80 m . from its embouchure.

CLARENCE STRAIT'-1, The cliannel between Melville isl. and the N.W. coast of Australia, communicating with Van Diemen's Gulf. It is about 12 m . in breadth at the narrowest part, and is studded with small isles, rocks, and reefs, having rapid currents between them. -2 , The passage between the isl. of Kishm, in the Persian Gulf, and the mainland of Laristan. It is about 7 m . wide at the E . entrance, but becomes contracted by sandbanks. The tide, in some parts, runs with great rapidity. This channel is also sometimes called Kishm Strait.

CLARENS, a vil. Switzerland, can. Yaud, $13 \mathrm{~m} . \mathrm{E} . \mathrm{by}$ S. Lausanne, on the lake of Geneva. It lies at the liead of a bay, here forming a creek, and in which the water occasionally rises to an extent that floods the place. Clarens is an insignificant place, which has had an undue celebrity given to it by Ronsseau and Byron.

CLARION, or Cloud's Island, an isl., N. Pacific Ocean, off W. coast, Mexico; lat. $18^{\circ} \mathrm{N}$. ; lon. $114^{\circ} 50^{\prime} \mathrm{W}$. Turtle are here plentiful, and birds numerous, including gannct,
frigate, pelican, several varieties of boobies, of tern, ducks, and doves. Vegetation is pretty luxuriant, but does not seem to comprise any edible production. Water scarce.

ClarK or Flathead River, a river, U. States, Oregon territory, rising in the Rocky Mountains, and, after a winding N.W. course of about 500 m ., during which it expands into an extensive lake, falling into the Columbia, in lat. $48^{\circ} 50^{\prime} \mathrm{N}$.; lon. $117^{\circ} 50^{\prime}$ W. Before reaching Lake Kulluspelm, through which it passes, its name is Cokalahischket or Bitterroot Fork.

CLARK'S FORK, a river, U. States, N.W. territory, rising in an offset of the Rocky Mountains, and, after a course of about 180 m . S.W. to N.E., falling into the Yellow Stone, in lat. $45^{\circ} 35^{\prime} \mathrm{N}$. ; lon. $106^{\circ} 30^{\prime} \mathrm{W}$.

CLARK's ISLAND.-1, The most S. of the Furneaux group, Bank's Strait, off the N.E. end of Van Diemen's Land, S. extremity in lat. $40^{\circ} 34^{\prime} \mathrm{S}$.; it forms the N. boundary of the Strait.- 2, An isl., N. Pacific ; lat. $27^{\circ} 48^{\prime}$ N.; lon. $176^{\circ} \mathrm{W}$.

CLARK's (Sir George) ISLE, an isl. Aretic Ocean, 10 m . off the coast of British N. Amcrica; lat. $69^{\circ} 20^{\prime} \mathrm{N}$.; lon. $118^{\circ} 40^{\prime} \mathrm{W}$.

CLARY, a vil. France, dep. Nord, 9 m. S.E. Cambray. It was once a place of some importance, defended by a strong castle; and has manufactures of gauze, jaconet, and other articles of St. Quentin; tulle, lace, lace thread, and pottery. There are also breweries and tanneries. Pop. 2330.

CLASHACROW, par. Irel. Kilkenny; 999 ac . Pop. 291.
CLASHMORE, a post. tn. and par. Ireland, cc. Waterford, 7202 ac. The town is 9 m . S.W. Dungarvan, and has a distillery, producing nearly 20,000 gallons of whisky annually. Pop. 3777.

CLATFORD, two pars. Eng.:-1, (Goodworth), Hants; 3390 ac. Pop. $^{213 .-2,(\text { Upper }), ~ H a n t s ; ~} 970 \mathrm{ac}$. Pop. 620.

CLATT, par. Scot. Aberdeen, 4 m . by 3 m . Pop. 524.
CLATWORTHY, par. Eng. Somerset; 4000 ac. P. 309.
CLAUDE (St.), a tu. France, dep. Jura, 25 m . S.E. Lons-le-Saulnier, at the confluence of the Bienne and Tacon. It is clean, well built, and has a cathedral, a suspension bridge across the Tacon, and a fine promenade along the Bienne. It owes its origin to a celebrated Benedictine abbey, founded in the 5th century, and erected into a bishopric in 1742. The privileges of this abbey were so excessive, that if a peasar.t remained for a year on the abbey lands he became a serf, and his goods were confiscated. This was the last place in France where serfdom existed, and the bishop and chapter obstinately refused to abolish it before the revolution of 1793, although solicited to do so by Louis XVI. In 1799, the town was almost entirely destroyed by fire, and the Government devoted the sum of $£ 30,000$ to its re-erection. It has a court of first resort, and of commerce, consulting chamber of manufactures, an agricultural society, and communal college; and is the seat of a bishopric. Large quantities of turnery-ware are made here, consisting of articles in horn, shell, bone, ivory, box, and wood. Buttons, snuff-boxes, musical boxes, hardware, pins, \&c., are also made, and there are cotton spinning-mills, tanneries, paper-works, tile works, and potteries. A considerable trade is done in the above articles. Pop. 4460.

CLAUDY.- 1 , A vil. Ireland, co. of, and 9 m . S.S.E. Londonderry. It has a R. Catholic chapel, a Presbyterian meeting-house, and a national school; and in the vicinity are some handsome seats, and extensive woods and plantations. Pop. 191.-2, (or Clady), a vil. Irel., co. Tyroue, 4 m. S.S.W. Strabane, on the Finn, and consisting of one irregularly built street. Adjacent to the village is a handsome bridge of seven arches over the Finn, connecting Claudy with the county of Donegal. Two fairs are held annually for the sale of cattle, sheep, and pigs. Pop. 219.

CLAUSENBURG,atn.Transylvania. See Klausenburg.
CLAUSTHAL, a tn. Hanover. See Klausthal.
CLAVERING, a vil. and par. England, co. Essex, and on the confines of Hertford; 1680 ac. The village, situate in a valley, watcred by a small stream, has a handsome gothic church, two chapcls belonging to Independents and Primitive Methodists, with a burial-ground attached to each; and two schools-a national one for girls, and a British one for boys. No manufactures, excepting flour ; people chiefly employed in agriculture; their social condition seems to be far below that of several towns in the neighbourhood. Pop. 1172.-(Local Correspondent.)

CLAVERLEY, a vil. and par. England, co. Salop 7530 ac. The village stands on elevated ground, about 5 m . E. Bridgnorth, and is neatly built of brick, and red sandstone. It has a handsome gothic church, two schools for girls, supported by voluntary contributions, and one endowed boys' schocl ; inhabitants wholly employed in agriculture. Pop. 1669.-(Local Correspondent.)

CLAVERTON, a vil. and par. England, co. Somerset; 1180 ac . The village, romantically situate $2 \frac{1}{4} \mathrm{~m}$. E.S.E., Bath, in a beautiful and picturesque district, has an elegant church, with a square ivy-mantled tower. Pop. 177.

CLEOLURY-MOR'TIMOR, a tn. and par. England, eo. Salop; 7670 ac . The town, beautifully situate on an acclivity surrounded by hills, $27 \mathrm{~m} . \mathrm{S} . \mathrm{S} . \mathrm{E}$. Shrewsbury, consists chiefly of one long, broad, straggling street; houses generally well built, chiefly of brick; water abundant, and of excellent quality. It has a parish chureh, a fine old structure; a Wesleyan Methodist chapel, an endowed school for boys and girls, one infant, one R. Catholic, one dame, and two private ladies' schools; several minor charities, a book society, and juvenile lending library. Within $\frac{1}{4} \mathrm{~m}$. of the town there are paper and flour mills on the Rea. The people are chiefly engared in agriculture and the colleries. Pop. 1716.-(Local Correspondent.)

CLERCKEN, a vil. and com. Beiginm, W. Flanders, 9 m. S.E. Furnes. It has two breweries, and two oil-works; bat the ehief employments are agrieultural. Pop. 3182.

CLERFF, or Clerviux, a small vil. Molland, duchy of, and 33 m. N. by W. Lnxemburg ; in a valley, watered by the Woltz. It has a school and R. Catholie chureh; and a castle belonging to the Count of Lannois. Pop. 800.

CLERIIIAN, a vil. Ireland, co. Tipperary, par. Newchapel, $4 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Clonmel ; with a neat R. Catholic ehapel.

CLERKENWELL (St. James), par. Eng. Middlesex; 320 ac Pop. 56,756.

CLERKE'S ISLAND, Evoogisona, or St. Lawrence Island, an isl., Pacific Ocean; lat. $63^{\circ} 4^{\prime} \mathrm{N}$. ; lon. $170^{\circ} 30^{\prime}$ W. It has several hills, connected by low ground, which, at distance, appear like a group of islands. Near the E. extremity is a sinall island, remarkable for three elevated rocks. both the large and small islands are inlabited.

CLERMONT, a tn. and com. Belgium, prov. Liège, 6 m . N. Verviers. It has considerable manufactures of eloth, two flour mills, a briek-work, limekiln, quarries of limestone and sandstone, and several coal mines. Pop. 2184.

CLERMONT, Clermont-de-Lodeve, or Clermont 1.'Ieradlt, a tı. France, dep. Herault, $23 \mathrm{~m} . \mathrm{W}$. by N. Montpellier, on the Ronel, pleasantly situate on the slope of a hill, on the summit of which are the remains of an old castle. It has a tribunal of commerce, a savings-bank, a communal college, and a handsome Gothic church, remarkable for the height of its spire. The eloth manufaetories here produce about 24,000 pieces annually. Handkerehiefs, cotton and woollen hosiery, eream of tartar, vitriol, eutlery, and pottery are also manufactured here. There are, besides, silk and
cotton mills, tanneries, brandy distilleries, vinegar-works, tile and brick-works, limekilns, \&c. Trade in wine, brandy, olive-oil, verdegris, cattle, and fruit. l'op. 5700.

CLERMONT, Clehmont-en-Beauvoisis, or ClermontOise, a tn. France, dep. Oise, 17 m . E. by S. Beauvais, r. bank, Brèche. It was formerly fortified, but its ramparts have disappeared. It has manufactures of calico and saltpetre, and las spinning-mills, bleaching-grounds, breweries, and tameries; with a trade in grain, fruit, flax, linen made in the elivirons, horses, eattle, \&e. It has a communal college, and public library with 12,000 volumes. The old eastle, formerly the property of the Prince de Condé, is now a prison for females. Pop. 3105.

CLERMON'I'-Ferrand [anc. Nemetum, Urbs Averni, Clarus Mons], a city, France, eap. dep. Puy-de-Dôme, 215 m . S. by L. Paris; lat. $45^{\circ} 46^{\prime} 46^{\prime \prime} \mathrm{N}$. ; lon. $3^{\circ} 5^{\prime} 20^{\prime \prime}$ E.; between the Arrier and the Bedat. It is built on a hill, composed chiefly of volcanic tuff, at the foot of that extraordinary range of extinct volcanoes, surmounted by the mountain of the Puy-de-Dôme, which, though apparently overhanging the town, is 5 m . distant. To the E. is the fertile plain of the Limagne, over which the view extends 20 or 30 m . A linc of boulevards, planted with trees, encircles the town, except to the N.W., and outside of these are the extensive suburbs. The streets in many parts are narrow, confined, and crooked; and

CLERMONT-FRHKAND. From boyasea usus 1 Ancienne France.
the houses have a dull appearance, being all built of lava. Arthur Young described it as 'one of the worst built, dirtiest, and most stinking places he had ever met with;' and adds, that 'many of its streets, for highmess, dirt, and ill seents, could only be represented by narrow channels cut in a dunghill.' Some parts of the town, however, have undergone improvement, and the new strects are wide, and well paved. Some quarters have been alnost entirely rebuilt, and fountains, several of them elegant, have been multiplied; abundantly supplied with good water, brought from Royat, about 3 m . distant. It has ten squares, in one of which, the Place du Tanreau, is a fine fountain, built in the form of an obelisk, 39 ft . high; erected as a monument to the memory of General Desaix. The principal building is the eathedral, an irregular pile of dark hue, built of volcanic lava. During the revolution of 1793 , it was stripped of its ornaments and monuments, and only saved from total destruction by the exertions of a magistrate, M. Verdier Latour, who represented to the mob that it would be useful for holding popular meetings in. It was begun in 1248 , and carried on till 1265 . by the arehitect Jean Desehamps, but never completed. The interior is remarkable for its lightness, and loftiness of the vaulted roof. Of the four towers that originally existed, only one remains. The most ancient and interesting ehnreh is Nôtre Dame dn Port, a Romanesque edifice, originally founded, A.D. 580 ; burnt by the Northmen, A.D. 824 ; and rebuilt, A.D. 853 . It is enerusted externally with rude Mosaies, of black and white
stone. The other public buildings are the Hotel de Ville, palace of justice, grain market, linen market, Hotel Dieu, general hospital, and theatre. There is also a public library, containing 18,000 volumes; a botanic garden, museum of natural history, rich cabinet of mineralogy, containing specimens of the rocks and volcanic substances of Auvergne; museum of antiquities and college. Clermont is the seat of a bishopric, suffiragan to Bourges, tribunal of first resort, tribunal of commerce, academie universitaire for four departments, secondary school of medicine, royal college, and primary normal school. It has also a consistorial Protestant church. It has numerous, but not very important manufactures. They consist of silk stockings, druggets, India rubber fabrics, house paper, playing cards, furniture, archil, nails, chocolate, potato flour, potted meats, and preserved frnits, including the famed apricot preserves. There are also cotton and hemp spinning-mills, saltpetre refineries, extensive tanneries, and a manufactory of painted glass. The trade of Clermont is considerable. Five large fairs, each lasting a week, are held annually, and are well frequented. Linens, made in the country districts, are sold to the amount of $£ 160,000$ annually; and large quantities of hemp, thread, wool, and hides are disposed of. There is a considerable trade in grain, wine, salt, oil, and cheese. The transit trade, also, is extensive, the town being on the road from Bordeaux to Lyon, and being the entrepôt for the products of Provence and Languedoc, with which it supplies Paris. There are several mineral springs in the neighbourhood, the most remarkable of which is in the suburb of St. Allyre. This spring has deposited, in the course of ages, a mass of limestone 240 ft . long, 16 ft . high, and 12 ft . wide at its termination, and has formed, across a rivulet, a natural bridge 21 ft . long. Anterior to the Roman conquest, Clermont was called Nemetum; and in the reign of Angustus, Augusto-Nemetum. It became the capital of the Averni after the destruction of Gergovia, the ancient capital, which seems to have occupied a hill $4 \frac{1}{2} \mathrm{~m}$. from Clermont. Christianity was established here, and a bishopric founded, about the year 250 . The city, which had become very considerable under the Romans, suffered severely from the irruption of the northern tribes; and, A.D. 507, it was taken by Thierry, and united to the Crown of France. In A.D. 761, it was sacked by Pepin. The great council, in which the Crusades originated, was held here in 1095. It was convoked by Pope Urban II., who presided, at the head of his cardinals. Thirteen archbishops, 225 bishops, about as many mitred abbots, several thousand knights, and an immense crowd of people, of all conditions, encamped here seven days, waiting for the decision of the church. The place of meeting is supposed to have been an open space to the rear of the church of Nôtre Dame du Port. Here, from a throne raised in the midst, around which were grouped the tents of tens of thousands of enthusiastic hearers, the Pope pronounced that eloquent discourse which melted all to tears, and was followed by the universal shout of 'Diex le volt' (Dieu le veut, God wills it), when the cloaks of red cloth worn by the noble bystanders were torn into shreds, to form the badge of the cross, then first adopted. In 1556, Clermont was declared the capital of the duchy of Auvergne. In 1751, it was joined to the town of Montferrand, with which it communicates by a fine avenue $1 \frac{1}{2} \mathrm{~m}$. long. Since that period, it has borne the name of Clermont-Ferrand. Gregory of Tours, Blaise Pascal, the poet Delille, and General Desaix, were natives of this town. Pop. (1846), 26,738.

CLERMONT-Tonnere, or Minerva Island, S. Pacific Ocean, Low Archipelago; lat. (S.E. point) $18^{\circ} 33^{\prime}$ S.; lon. $136^{\circ} 20^{\prime} \mathrm{W}$. (r.) This is one of those beautiful atol or lagoon islands that occur so frequently in the Pacific and Indian Oceans, but in no other sea. The ring or belt surrounding the lagoon of this island is about 12 ft . high, and 600 ft . wide; it is, as usual in the case of atols, covered with cocoanut palms and pandanus, the water of the lagoon inside being of a beautiful blue tint, and almost always smooth. It is inhabited by a fine athletic race, much above the ordinary size, of a darker colour than the N. American Indians, but in other respects much resembling them. Their hair is long, black, and straight, and is allowed to hang loose; the chiefs, however, having theirs drawn back, and tied in a knot bchind. They obstinately refuse to hold any intercourse with ships visiting their island.

## Clervaux, a tn. Holland. See Clerff.

CLES, a tn. and com. Austria, Tyrol, prov. of, and 19 m. N. by W. Trent, r. bank, Noce, here crossed by a bridge. It is well built, commanded by a castle, and possesses a parish church, townhall, Franciscan convent, with a large library and picture gallery, and several silk-mills. Pop. 2046.

CLETHER (St.), par. Eng. Cornwall; 3540ac. Pop. 221.
CLEVEDON, a vil. and par. Eng. co. Somerset; 2970 ac. The village, 12 m . W. by S. Bristol, on a branch of the Bristol and Exeter Railway, at the base of picturesque hills, which afford shelter from the neighbouring sea, is rapidly becoming a favourite watering-place, being highly salubrious and agreeable ; the limestone rocks, exposed to the sun, tending to keep up the temperature, which again is cooled and freshened by W. breezes from the Bristol channel. Shrubs of all sorts, from the myrtle to the arbutus, flourish in the warmer spots, and excellent building stone is obtained in the vicinity. There are two churches belonging to the Establishment, an Independent chapel, two schools, a dispensary, and other local charities. Pop., chiefly agricultural, 1748.-(Local Correspondent.)

CLEVELAND, a tn. U. States, cap. Cuyahoga, Ohio, 359 m . N.W. Washington ; lat. $41^{\circ} 31^{\prime} \mathrm{N} . ;$ lon. $81^{\circ} 46^{\prime} \mathrm{W}$. It is advantageously situate on Lake Eric, at the mouth of a river of its own name, and at the N. termination of the Ohio Canal, by which it is connected with the River Ohio. The streets are spacious and regular, crossing each other at right angles. It contains a courthouse, jail, eight churches, several insurance companies, numerous retail stores, several distilleries, breweries, printing-offices, five academies, and numerous well attended schools. The harbour is commodious and safe. Cleveland being intermediate between Buffalo and Cincinnati, and the depôt of the merchandise destined to the E. and W., has become one of the most important cities of the W. In 1842, the exports amounted to $£ 1,170,379$, of which $£ 203,395$ went to Canada. In 1850 , the exports and imports amounted to $£ 2,511,822$. Pop. (1840), 6071.

CLEVELAND (Cape and Bay), Australia, N.E. coast. The former is in lat. $19^{\circ} 10^{\prime} 10^{\prime \prime} \mathrm{S}$.; lon. $146^{\circ} 57^{\prime} 56^{\prime \prime} \mathrm{E}$. It rises abruptly from a projection of low land. The bAY is about 20 m . in width at the entrance, but does not go deep into the land.

CLEVES [German, Cleve or Kleve; Latin, Clivum], an anc. tn. Rhenish Prussia, cap. circle of same name, 70 m . N.W. Cologne, near the Dutch frontier, on the declivities of three hills, about 3 m . from l. bank, Rhine, with which it has communication by a canal. It consists of an Upper and Lower town, is well built in the Dutch style, and is surrounded with walls. It has one R. Catholic, and three Protestant churches, a Menonite meeting-house, and a synagogue. The collegiate church, built in 1341, contains the burial vault of the Dukes of Cleves, with a number of well-executed monuments. The old castle, Schwanenburg, formerly the residence of the Dukes, now converted into public offices, has a tower 190 ft . higl, from which an extensive view of the surrounding country is obtained. Cleves has a gymnasium, a handsome townhouse, three hospitals, a house of industry, and a house of correction, and is the scat of a court of justice. There are manufactures of cotton and woollen fabrics, hosiery, silks, flannels, hats, and tobacco. The country around is remarkable for its beauty and fertility. There are some beautiful gardens and walks in the vicinity, laid out by Maurice, Prince of Nassau Siegen. Pop. (1846), 8395 . The circle, area, 64 geo. sq. m., bounds N. and W. on IIolland, is flat and fertile, being watered by the Rhine, and several other streams. It yields grain, turnips, potatoes, linseed, and tobacco; a considerable number of horses, cattle, sheep, \&c., are reared, and fishing, and manufactures of various kinds are actively carried on. Pop. (1846), 49,050.

CLEW BAY, an inlet, W. coast. Jreland, co. Mayo, extending inland for about 15 m ., with an average breadth of 8 m . At its entrance it has Achil Bay on the N. side, Emlogh point on the S., and Clare Island in the middle. There are numerous indentations along its shores, which form excellent harbours ; and at its upper end is an archipelago of 200 beautiful, cultivated, and fertile islets. The fishings are extremely valuable, and afford employment to a great many persons.

CLIBURN, par. Eng. Westmorland; 1360 ac. Pop. 251.

CLICHY-la-Garenne [Latin, Clipiacum], a tn. France, dep. Seine, in a beautiful plain ncar r. bank, Seine, and on the railway between Paris and St. Germain, about 4 m . N.W. Paris. It is a place of consillerable antiquity, and in the seventh century, during the reign of Dagobert, who had a palace here to which he was particularly attached, was frequently the residence of the court. It contains a parish ehurch, the erection of which is due to the celelrated Vincent de Paul, who was eurate of Cliely in 1612; and las manufactures of white leal, of very superior quality, and extensively exported; chemical products, glue, varnish, rolled lead, \&e. Clichy suffered much in 1814, from an attempt to defend it against the approach of the Allies upon Paris. Pop. 5425.

CLIDDESDEN, par. Eng. Hants; 2150 ac. Pop. 306.
(LLFI)PN, a seaport tn . Ireland, co. of, and 43 m . N.W. Galway, heautifully situate on an estuary which communicates with Ardbear Bay. In 1815, it contained only one house, and now it is a considerable and thriving seaport, and contains an elegant ehureh, a R. Catholie chapel, two sehools, a bridewell, a dispensary, and fever hospital. Weekly markets are held Welnestlay and Saturday; and four fairs annually. It is the seat of quarter sessions, and petty sessions are held every alternate Thursday. It is also a constabulary police and coast-guard station. The harbour is excellent ; and there is a quay which slips of 200 tons can approach. Fish, in which the neighbouring coast abounds, and corn, with a little kelp, are the principal exports; and the imports consist of groceries, manutactured goods, \&e. Pop. 1509.

The village, 3 m . S.W. by s. Nottingham, contains a fine church, with a massive tower, and almshouses for six poor widows. Pop. 419.-7, (-uponTeme), a vil. and par. co. Worcester; 3310 a . The village, delightfully seated on a lofty eliff overlooking the Teme, 9 m . N.W by W. Worcester, has a chureh with a tower surmounted by a spire, and a subseription school. Hancastle, which suffercd severely from the parliamentary forces in 1646, was restored in 1840. Pop. 512.

CLIMPING, par. Eng. Sussex ; 2060 ac. Pop. 279.
CLIN(H.-1, A river, U. States, Virginia, and Tennessee, rising in the former state, and after a S.W. course of 200 m ., for great part of which it is navigable for boats, uniting in the latter with the Holston, at Kingston, to form the Tennessee. -2 , A mountain-range, forming a branch of the Alleghanies, between the parallels of $36^{\circ}$ and $37^{\circ} \mathrm{N}$., and separating the waters of the Clineh from those of the Holston, which run parallel to each other up to the junction.

CLINTON-COLDEN (LAKE), an extensive sheet of water, British N. America, connected with Lake Aylmer on the N.W., and with Artillery Lake on the S., intersected by the parallel of $64^{\circ} \mathrm{N}$., and by the meridian of $107^{\circ} 30^{\prime} \mathrm{W}$. It was discovered in 1833, by Capt. Back.

CLIPPERTON LOCK, more correctly an isl., N. Paeifie Ocean, N.W. from the Galapagos; lat. $10^{\circ} 14^{\prime} \mathrm{N} . ; \operatorname{lon} .109^{\circ} 19^{\prime}$ W. (r.) It is a low coral lagoon island, about 3 m . long N . to S., and about the same broad E. to W. It is destitute of trees, with a high rock on its S. ellec, but is covered with sea fowl, gamet, boobies, frigates, pelicans, and several kinds of tern. Sharks, porpoises, and turtle, abound on its coasts. It is extremely dangerous, the coral belt being invisible until elosely approached; while the high rock above alluded to has so strong a resemblance to a vessel under sail, that it may very readily be mistaken for one. Both the existence and and position of this perilous island were doubtful, until ascertained by Capt. Beleher, who sought it out, and found it on May 18, 1839.

CLIPPESBY, par. Eng. Norfolk; 1300 ae. Pop. 123.
CLIPSHAM, par. Eng. Rutland; 1570 ae. Pop. 206.
CLIPSTON, par. Eng. Northampton ; 2800 ac. Pop. 859.
CLISSA [ane. Andetrium], a fortress, Austria, Dalmatia, cirele of, and 4 m . N.E. Spalatro. It is perched on an isolated rocky eminence, between Mount Caprario and Mount Mossor, inaccessible on three sides, and commands the approach to Salona from the N.E. The works are irregular, but strong, and kept in a state of defence. The inhabitants are chiefly employed in cultivating the vine and olive. Clissa, from the importanee of its position, has always been a first oljecet of attack by any army invading this part of Dalmatia, and has, accordingly, stood many sieges, and passed under the hand of many masters. Pop. 1300.

CLISSON, a tn. France, dep. Loire-Inferieure, 15 m . S.E. Nantes, in the deep valley of the Sevre, on one side of which is the old castle, one of the most stately in France. The houses are mostly modern, the town laving been destroyed in the Vendean war. The valley is crossed by a handsome new bridge of 12 arelies. Woollen goods, cotton yarn, handkerchiefs, paper, and leather, are manufactured here. There is also some trade in grain, and in the coarse woollens mado in the environs. Pop. 1372.

CLIS'T, several pars. England, Devon:-1, (-Broadt, 10,270 ae. Pop. 2407.-2, (-1Hydon), 3000 ac . Pop. 325. -3 , (St. George), 860 ae. Pop. 370.-4, (St. Lawrencc), 1380 ac. Pop. 168.-5, (St. Mury), $580 \mathrm{ac} . \quad$ Pop. 197.

CLIST-llonitos, a vil. and par. England, co. Devon; 1410 ac . The village, situated 1. bank, Clist, E. by N. Exeter, was nearly destroged by fire in 1825. Pop. (1851), 421.

CLITIIEROE, a bor. and market tn. England, co. Laneaster, 28 m . N.N.W. Manchester, a station on the Blackburn and Bolton Railway, E. bank, Ribole, at the foot of Pendle Hill, which here attains an elevation of 1800 ft ; strects well paved; supply of water ample. Besides the church, there are places of worship for Methodists, Independents, and R. Catholies, to which Sunday-schools are attachel. There is a free granmar-school, founded in 1554, by Queen Mary of England; two prineipal daily schools, an infant and a national school; several libraries, and a mechanies' institute. The town has not a very thriving appearance, but is prospering nevertheless, being the seat of some extensive cotton spinning and weaving establishments, and large print-works. In the neighbourhood are extensive beds of limestone, which is burnt for manure and building. Clitheroe returns one nember to the House of Commons. Pop. 6765.

CLOCAENOG, a vil. and par. N. Wales, co. Denbigh. The village, situated $3 \frac{1}{2} \mathrm{~m}$. S.W. Ruthen, contains a neat chureh, a national school, and has numerous charities. In the vieinity are excellent stone quarrics, among which is found that peculiar kind of stone used for hones. Pop. 457.

CLOCII, or Clougil Point, a healland, Scotland, eo. Renfrew, S. shore Firth of Clyde, 4 m . W. by S. Greenock, with a lighthouse, exhibiting a white stationary light, 70 ft . abovo high water.

CLODOCK, par. Eng. IIereford; 18,250 ac. Pop. 1762.
CLOFORD, par. Eng. Somerset; 2080 ac. Pop. 253.
CLOGH, or Ci.ovair, a vil. Ireland, co. of, and 17 m . N. Antrim, near the Ravel water, and at the junction of several roals. It contains the manorial court-house of Old Stone.

On a high rock overlooking the village, are the remains of an old castle.

CLOGHAN, a vil. and post tn. Ireland, King's co., 4 m . N.N.E. Banagher, near the Shamnon, consisting of neatly thatched cottages. Three annual fairs. Pop. 664.

CLOGHANE, a vil. and par. Ireland, co. Kerry; 17,572 ac. The village, situate 6 m . N.N.E. Dingle, near the shore of the bay, contains the parish church, and a R. Catholic chapel; the parish school, and a R. Catholic school. P. 2994.

CLOGHEEN, a market tn. Ireland, co. Tipperary, 13 m . S.W. Clonmel. It has a church, market-house, cavalry barracks, bridewell, dispensary, and fever hospital ; extensive flour-mills, and a brewery. Petty sessions every alternate Thursday. In the neighbourhood are two remarkable caverns. Pop. 2049.

CLOGHER, par. Irel. Tipperary ; 8119 ac. Pop. 2643.
CLOGHER, a vil. and par. Ireland, co. Louth; 1861 a a. The village, 7 m . N.E. Drogheda, and about one half mile W. Clogher Head, contains the ruins of the old church. Inlabitants are chiefly engaged in fishing. Pop. 1371.

CLOGHER, a tn. and par. Ireland, co. Tyrone; 49,761 ac. The town lies on a hill, 7 m . W. Aughnacloy, and consists of one long street, with substantial houses of stone on one side only, the opposite side being occupied with the wall of the bishop's demesne, and the clurchyard. The inhabitants are supplied with water from wells, and from the Blackwater, on
which the town is situated. It has a cathedral, a court-house, and bridewell; a free, and an infant school. Quarter sessions are held twice in the year. Clogher was erected into a borough in the reign of Charles I., and continued to return two members to the Irish parliament till the Union, when it was disfranchised. Pop. of par. 17,813, of tn. 523.-(Local Correspondent.)

CLOGHER HEAD, a cape, E. coast, Ireland, co. Louth, $5 \frac{1}{2} \mathrm{~m}$. N.N.E. the mouth of the Bogne ; lat. $53^{\circ} 47^{\prime} 36^{\prime \prime} \mathrm{N}$.; lon. $6^{\circ} 13^{\prime} \mathrm{W}$. (r.)

CLOGHERBRIEN, par. Irel. Kerry ; 3410 ac . P. 1444.
CLOGHEREEN, a vil. Ireland, co. Kerry, 3 m . S. Kil
larney, containing numerous neatly-built and slated houses.
CLOGIIERNEY, par. Irel. Tyrone; 17,790 ac. P. 7553.
CLOGHJORDAN, a post tin. Ireland, co. Tipperary, $8 \frac{1}{2} \mathrm{~m}$. W. Roscrea, consisting chiefly of one principal street, which has a cheerful appearance. It contains a church, a R. Catholic chapel, and places of worship for Baptists, Wesleyans and Primitive Methodists; a dispensary, and fever hospital ; and a large distillery, in which about 60,000 gallons of whisky are annually mado. Fairs three times amiually. Pop. 1164.

CLOGHPRIOR, par. Irel. Tipperary; 3724 ac. P. 1306.
CLOGHRAN, par. Irel. Dublin; 1558 ac. Pop. 549.
CLOGHRAN-Hidart, par. Irel. Dublin; 778 ac. P. 111.
CLOMANTAGH, par. Irel. Kilkenny; $3704 \mathrm{ac} . \mathrm{P} .1058$.

CLON [from Irish, Cluan, or Cluain, a frequent prefix to names in Irish topography, signifying a lawn or piece of pasture land, or, more specifically, a fertile piece of land surrounded by a bog or moor, or on one side by a bog, and on the other
by water.-Petrie's Round Towers of Lieland.] The following list contains all the parishes in Ireland, the names of which begin with Clon, excepting those noticed with towns or villages :-

CLONAKILTY, a tn. and seaport, lreland, co. Cork, at the head of a bay of same name, $25 \mathrm{~m} . \mathrm{S}$. W. Cork. It is surrgunded on all sides by rising ground, and is liable, in many parts, to be flooded by high tides. The streets are narrow and ill kept, but great improvements are in progress. There is a fine square, with a green in the centre, tastefully planted and laid out with walks. The places of worship are the old parish chureh, standing on a hill in the centre of the town; and two chapels, one of them belonging to the Wesleyans. There are also the court-house, and a handsome poor-house; numerous schools, and an academy. Linen weaving, and the manufacture of cotton, and fishing, are carried on. The harbour is not adapted for large vessels, but is often resorted to as a place of shelter by the small craft along the coast. 1'op. 3807.-(Local Correspondent.)

CLONARD, a par. and vil. Ireland, co. Meath, formerly a place of considerable importance, but now dwindled down to a few thatched cottages ; area of par. 13,324 ac. Pop. 4503.

Clonibulloge, or Purefor's Place, a vil. Ireland, King's co., $8 \frac{1}{2} \mathrm{~m}$. N.N.E. Portarlington, on the Barrow. It is indifferently built, and has a parish chureh. Pop. 313.

CLONDALKIN, a vil. and par. Ireland, co. Dublin; 4934 ac. The village, situate on the Camma, $5 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Dublin, consists of one principal street of irregular construction, and has a parish church, a monastery, school, dispensary, charitable institution, and the ruins of a castle. Pop. 2546.

CLONEGAL, a post tn . Ireland, co. of, and 14 m . N.E. Carlow. It contains a parish chureh, R. Catholic chapel, a Methodist meeting-house, and a handsome national sehoolhouse. Four cattle fairs annually. Pop. 431.

CLONES, a market tur. and par. Ircland, co. of, and 11 m . S.W. Monaghan. The town, which stands on a rising ground, has some tolerably well-built houses, with many of an inferior description. It is abundantly supplied with water. The places of worship are the parish church, situated in the market-place, a handsome structure with a square tower; a R. Catholic, and two Methodist chapels. It likewise possesses a market-house, a union work-house, five schools, and several local charities. In a small R. Catholic cemetery, in the heart of the town, stand the remains, though greatly dilapidated, of an ancient abbey; and in another cemetery not far distant are the ruins of a round tower. Area of par., 38,364 ac. P. 23,506; of tn. 2877.-(Local Correspondent.)

CLONMEL, a tn . and parl. bor. Ireland, partly in co. Waterford, and partly in co. Tipperary, 90 m . S.W. Dublin, and $25 \mathrm{~N} . \mathrm{W}$. Waterford on the Suir, in a beantiful valley, surrounded by picturesque mountains. The greater portion of the town is on the Tipperary side of the river, and is connected with the Waterford portion by three stone bridges. The principal street is spacious, and upwards of 1 m . in length; there are several other good streets, with a number of smaller ones, all well paved and lighted with gas. Public
props in the various streets afford an ample supply of water. The whole town has thus a cheerful and prosperous appearance. At the E . end of the town is a handsome newsroom, called the county club-house. In the same quarter are extensive barracks for artillery, cavalry, and infantry, with a small military hospital behind. The new court-house is a light and elegant structure, and the county jail a large stone building. The parish church, situate at the W. end of the town, is a handsome old building, with some beautifully painted glass windows, and a pieturesque tower. There are also two R. Catholic chapels, a Franciscan and Presentation chapel, with meeting houses for various dissenting congregations, a large and well endowed grammar-school, founded in 1685, with varions other schools for the humbler classes, some of which are maintained by voluntary contribution. Besides these institutions, there are a large district lunatic asylum, union work-house, infirmary, fever bospital, dispensary, and varions charitable institutions, including two orphan establishments, and a mendicity association. The Mayor's court is held, every Wednesday, and petty sessions every alternate Friday. The trade of Clonmel is considerable, chiefly in corn, cattle, bacon, and butter, large quantities of which are exported to Liverpool, London, and Bristol. There are several extensive corn-mills in the neighbourhood, an extensive distillery, and in the town are two large porter and ale breweries. The butter market is a commodions building, with all conveniences for facilitating the traffic in that commodity. Market days, Tucsdays and Saturdays. Fairs in May and November, and on the first Wednesday of every other month, chiefly for cattle. Clonmel sends one member to the IIouse of Commons. Registered electors (1850), 271. 1'op. (1841). 13,505.

CLONMELLON, a market and post tn. Ireland, eo. Westmeath, 18 m . N.E. Mullingar. It has a parish ehurch, school, and a dispensary. Petty sessions are held once a fortnight. Four fairs annually. Pop. 859.

CLONMUL'T, a vil. and par. Ireland, co. of, and 13 m . N.E. Cork; 4601 ac. The village has a R. Catholic chapel, and a school. Pop. 1146.

CLONONY, or Clonana, a vil. Ireland, King's co., $9 \frac{1}{2} \mathrm{~m}$. N. W. Frankford. Adjacent to it is the old castle of Clonony, a quadrangular structure, built on a rock, and in a state of excellent preservation. Pop. 205.

CLONROCIIE, a thriving vil. Ireland, co. of, and 13 m . N.W. Wexford. Pop. 265.

CLONSKEAGH, a vil. Ireland, co. of, and 2 m . S. Dublin, on the Dodder. It contains extensive corn-mills, ironworks, and a dye-stuff factory. Pop. 352.

ClON'TARF, a vil. and par. Ireland, eo. Dublin; 1190 ac. The vilhage, N. shore Inablin bay, 5 m . E.N.E. the city, is of considerable extent, and is much frequented for sea bathing. It contains a neat chapel, a monastery, and an extensive bakery. In the vicinity are numerous handsome villas. Pop. 2664.

CLOU1) (Nr.) [anc. Novigentum], a tn. France, dep. Seinettoise, 5 m . N.E. Versailles, 6 m . S. W. Paris, l. bank Seine, and on one of the railway lines from Paris to Versailles. It is agreeably situate on a hill slope overhanging the river. Its fair, September 7, is one of the most celebrated in the neiglibourhood of I'aris. It lasts three weeks, and is attended by multitudes from the capital. The town owes its origin and
name to Clodoald, a grandson of Clovis, who founded a monastery here in 551 . In 1589, Henry III. was assassidated here by Jacques Clement. St. Cloud is, however, chiefly celebrated for its chateau, built by the Dnke of Orleans, brother to Louis XIV., and formerly the residence of the Dukes of Orleans. It consists of a centre and two wings. It is richly furnished, and has numerous statues, vases, pictures, and articles of vertu. The park extends from the bank of the Seine, about 10 m . to Garches, and has some fine cascades, and water works. The château lias been the scene of many important historical events. In it General Bonaparte laid the foundation of his power, on the memorable 19th Brumaire (November 11, 1799), by expelling, with his armed grenadiers, the council of Five Hundred from the orangerie in which they held their sittings; and here Charles X. signed the ordonnances of July 1830, which led to the second revolution. In 1814, St. Cloud was attacked by the van-guard of the Allies under Langeron, March 31, and was the head quarters of the army from April 7, to June 3. It was the head quarters also of Blücher in the following year, and here was concluded the military convention (July 3), by which Paris fell a second time into the hands of the Allies. Pop. 3051.

CLOUDY BAY, a bay, New Zealand, Cook's Strait, N.E. coast, middle island, lat. (S. point) $41^{\circ} 32^{\prime} \mathrm{S}$. ; lon. $174^{\circ} 17^{\prime}$ E. (R.) The anchorage in this bay is good, but the wind sweeps down the gulleys in strong squalls, the water, however, remaining at all times smooth. The prevailing winds in summer and the beginning of autumn, from November to March, are S.E. and N.W. There was, recently, five whaling establishments in this bay, each employing from 20 to 30 hands, chiefly New Zealanders. Many thousand barrels of oil are prepared here annually.

CLOUGH.-1, A post th. Ircland, co. Down, $5 \frac{1}{2} \mathrm{~m}$. S. W. Downpatrick, containing a Prebyterian meeting-house, and an old castle said to have been erected by the Danes. Five annual fairs. Pop. 435.-2, (or Clogh), a vil. Ireland, co. of, and $12 \frac{1}{2} \mathrm{~m}$. N.N.E. Kilkenny. It has a R. Catholic chapel, and a brewery on the Dinane rivulet; inhabitants chiefly employed in the neighbouring collieries. Pop. 525.

CLOVELLY, a maritime vil. and par. England, co. Devon; 4200 ac. The village is situate on the S. coast of Barnstaple Bay in the Bristol Channel, on the declivities of a remarkably picturesque rock, which rises several hundred feet above the harbour, 9 m . W. by S . Bideford. It has a church, with several elegant monuments, and a Wesleyan chapel. The harbour is secure. The herring fishery is carried on. Pop. 950.

CLOWN, par. Eng. Derby; 1860 ac. Pop. 677.
CLOYDAGII, par. Irel. Carlow and Queen's co.; 4944 ac . Pop. 1499.

CLOYNE, a market tn. and par. Ireland, co. Cork; 9969 ac. The town, 16 m . E. by S. Cork, consists of two principal well-built streets. It has an ancient parish chureh, a R. Catholic chapel, a free school founded by Bishop Crow in 1726, with two national schools for boys and girls, a benevolent loan fund, and various other charities. There is very little trade, and the only manufacture is that of brogues and hats. Market day, Thursday; six fairs annually for horses, cattle, sheep, and pigs. A manor court is held once in three weeks, and petty sessions every alternate Wednesday. Pop. of tn .2200 ; of par. 6720.

CLUN, a tn. and par. England, co. Salop; 22,600 ac. The town stands on an acclivity, on the Clun, $5 \frac{1}{2} \mathrm{~m}$. S.S.W. Bishop's Castle, and consists of two streets, very much neglected, houses generally of stone; plentiful supply of water. It has a parish church, a Wesleyan, and a Primitive Methodist chapel, and almshouses for 14 aged decayed tradesmen. A small trade in malt is carried on. Pop. 2077.

CLUNBURY, a vil. and par. England, co. Salop; 7870 ac. The village, which is pleasantly seated at the foot of a hill, 6 m. S.S.E. Bishop's Castle, has a neat ancient church, chapels for Wesleyans and Primitive Mcthodists, and a national school. Pop. 994.

CLUNGUNFORD, par. Eng. Salop; 3710 ac. Pop. 554.
CLUN1E (LOCH), a lake Scotland, co. of, and 13 m . N. Perth, about $2 \frac{1}{2} \mathrm{~m}$. in circumference and of considerable depth. In it is a small island on which is an old castle, formerly the residence of the Earls of Airlie.

CLUNY, two pars. Scot.:-1, Aberdeen, 10 m . by 2 m . Pop. 959.-2, Perth; 8000 ac. Pop. 763.

CLUNY, a tn. France, dep. Saône-et-Loire, and 11 m . N.W. Macon, l. bank, Grosne. It was formerly surrounded by fortifications, parts of which still remain, and was long celebrated for its Benedictine abbey, founded in 910 by William, first Duke of Aquitaine. It had 600 religious houses under its direction. Only a small portion of it now remains, laving been all but utterly destroyed in 1789. Manufactures of druggets, stcel ware, vinegar, paper, tiles, earthenware, leather, \&c., are carried on. Trade:-in wood, grain, forage, and cattle. Pop. 3407.

CLUSES, a tri. and com. Sardinian States, Savoy, prov. Faucigny, $22 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Geneva, r. bank, Arve, which in the neighbourhood is crossed by a handsome stone bridge. It is a miserable looking place, and has repeatedly been almost destroyed both by fire and plague, but the people are industrious and ingenious. Their chief occupation is the making of clocks and watches, in which they particularly excel. Owing to their early business habits and general ability, several of the richest bankers of Augsburg, Strasburg, and Lyon, are natives of Cluses. Pop. 2000.

CLUSONE, a tn. Austrian Italy, gov. Milan, in the valley of the Serio, near l. bank, river of that name, 17 m . N.E. Bergamo. It is the capital of the district, has three churches, two hospitals, and a gymnasium. It has some manufactures of linen, and a considerable trade in corn, for which there is a weekly market. In the vicinity are some copper foundries, and sulphuric acid manufactories. Pop. 5500 .

CLUTTON, a vil. and par. Eng. co. Somerset; 2120 ac. The village stands high, and consists of several scattered groups of houses, principally of stone ; and has a parish church, and chapels for Independents and Methodists, national schools for boys, a day school for Methodists, a Sunday school for Independents, and a girls' school connected with the Established church. Thère are three coal mincs, and the people generally are employed as miners. Pop. 1434.

CLW YD, a river, Wales, co. Denbigh, rising on the N.E. of the Bronbanog, and entering Abergele Bay, after a course chiefly N.W. of about 30 m ., during which it is joined by several small tributaries. It is navigable at highwater for vessels of 80 tons burthen to the town of Rhuddlan, 2 m . from its embouchure.--The vale of Clwyd which is about 20 m . in length, and from 3 m . to 8 m . in breadth, is extremely fertile, and in a high state of cultivation.

CLYDE, a well known river, Scotland, the third in size, but the first in commercial importance in that kingdom. It rises amidst some wastes, 1400 ft . above sea level, at the S . extremity of county of Lanark, being formed by a combination of many streamlets having their sources in this district, and known by various names; the most distant source appears to be the head of the Dear water, 7 m . E. by N. Thornhill. It flows N.W., and about 12 m . from the junction of the streams, it becomes a considerable strcam, and is now called the Clyde. Holding on its way in a N. direction, it gradually increases in size ly the contributions of numerous tributaries, till it approaches Lanark, about 2 m . above which it forms the beautiful fall of Bonniton, about 30 ft . perpendicular height; the upper verge of this fall is 400 ft . above sea level. It now hurries through a rocky channel about half a mile long, whose walls rise, on either side, to the leight of from 70 to 100 ft ., till it reaches the fall of Cora Lin, a still more magnificent cascade or series of cascades, for there are three distinct breaks, than the former, being altogether 80 ft . in height; the upper verge of this fall is 365 ft . above sea level. About a quarter of a mile below, a third, but smaller fall occurs, called Dundaf Lin, and 3 m . further down are the picturesque falls of Stonebyres, consisting, as in the case of Cora Lin, of three distinct breaks, and being, together, about the same height, namely, 80 ft ., where the upper verge is 250 ft . above sea level. The river, though with many turnings and windings, now takes a N.W. course through some fine sylvan scenery, passes Hamilton, and finally reaches Glasgow, where its importance as a commercial stream commences; thence to the ocean, being capable of floating vessels of the largest size. The course of the river to Glasgow is wholly confined to the county of Lanark; below that city it enters the county of Renfrew, and subsequently separates the latter from the county of Dumbarton. The entire course of the river to Dumbarton, where the river may be said to end and the firth to com-
mence, is 98 m . Below Dumbarton and the confluence of the Leven, it suddenly expands into a firth, anciently called Dumbarton Firth; and at Greenock it attains a width of about 4 m . Beyond Greenock, the firth bends suddenly S., and soon after cxpands into an open sea, including the islands of Bute, Cumbraes, and Arran, and terminating at Ailsa Craig, where it is 20 m . broad. The principal affluents of the Clyde above the falls of Corra Lin, are the Duneaton, Biggar, Douglas, and Medwin; between these falls and Glasgow, the Nethan, Avon, and N. and S. Calder; and below Glasgow, the Kelvin, Cart, and Leven. The whole hasin of the river comprises an area of $1580 \mathrm{sq} . \mathrm{m}$. Few rivers, perhaps none, can boast of scenery of greater variety of character, or of greater beauty than the Clyde. Above Glasgow, its course is now through verdant lawns, now through rocky defiles, and now between steep and gorgeously wooded banks. Below the city, where it widens into an estuary, lofty hills rise on every side, and bound the far distance; locks or arms of the sea, resembling Norwegian fjords, branch off at various points on the N. and W. sides, carrying the eye into the recesses of the mountainous districts, while the shores are studded with beautiful watering-places, the summer resort of the Glasgow citizens; all presenting a panorama of unequalled beauty, grandeur, and magnificence. Its history, in reference to its commercial character and importance is interesting, but for this the reader is referred to the article Glasgow, to which it more properly belongs. Suffice it to mention here, that on the Clyde, in 1812, was launched the Comet, the first steam vessel built in the United Kingdom ; and the pre-eminence thus obtaincd over the other parts of the country it still retains, Clyde-built steamers being esteemed the finest in the empire.

CLYDE, a river, British N. America, falling into Baffin's Bay; lat. $70^{\circ} 10^{\prime} \mathrm{N} . ;$ lon. $69^{\circ} \mathrm{W}$.

CLYDEY, par. Wales, Pembroke. Pop. 1269.
CLYNE, par. Scot. Sutherland, 24 m . by 8 m . Pop. 1765.
CLYNNOG, par. Wales, Carnarvon. Pop. 1789.
CLYRO, par Wales, Radnor. Pop. 766.
CLYTHNESS, a headland, Scotland, co. Caithness, par. of Latheran; lat. $58^{\circ} 20^{\prime} \mathrm{N}$. ; lon. $3^{\circ} 18^{\prime} \mathrm{W}$.

COA, a small isl., Asiatic Archipelago, on the S. coast, isl. Flores ; lat. $9^{\circ}$ S.; lon. $122^{\circ}$ E.

COA [anc. Cuda], a river, Portugal, rising in prov. Beira, near Sabugal, and, after a course S. to N. of about 75 m. , entering the Douro on the 1 . bank, 5 m . S.S.W. Torre-de-Moncorvo. Its principal affluents are the Pinhel and the Lamegal.

COAGHI, a vil. Ireland, co. Tyrone, 4 m . S. by E. Moneymore, on the Coagh or Ballinderry, over which is an ancient stone bridge of six arches, 4 m . W. Lough Neagh. It contains a market-louse, a Presbytcrian chapel, and two schools. Steamers ply on Lough Neagh between this place and the railway at Portadown. Linen is the principal manufacture, for the sale of which a market is held on the first Friday of every month. In 1688, James II. crossed the river at this place, on his march to the siege of Derry. Pop. 388.

COAL ISLAND, a vil. Ireland, co. Tyrone, 4 m . N.E. Dungannor. It consists of two streets, straight and well kept; plentifully supplied with water; steadily increasing and improving. It contains a church and R. Catholic chapel; parochial and national schools, and has a loan fund; brick, tile, and draining-pipe works; flax and flour mills, and several potteries contiguous to the village, employing a considerable number of hands. In the vicinity are extensive coal pits. Pop. 451. - (Local Correspondent.)

COALBROOKDALE, or Corebrookdale, a hamlet and dist. England, co. Salop, par. Madely, $5 \mathrm{~m} . \mathrm{S}$. by E. Wellington. It is a remarkably beautiful and picturesque valley, the steep hills on its sides being almost covered with trees towards their summits, and thickly studded on their lower parts with neat cottages and gardens. Here the Severn is crossed by a cast iron bridge, crected in 1779, of one arch. more than 100 ft . span, and 40 ft . high. The houses are plain brick buildings, and the main road is lighted with gas ; water abundant. There are a Quakers' meeting-house, a Wesleyan chapel, and a place of worship for members of the Established church; several schools, and a benevolent society. Here arc extensive iron-works, where steam-engines and all kinds of machinery are manufactured, castings to the average anount of 30 tons being produced daily. Railroads, formed
of wood, were first used here in 1620 and 1650 ; and about 100 years afterwards, iron plates were put upon the wooden rails. The inhabitants are employed principally in the foundries and collieries. See Madely.-(Local Correspondent.)

COALEY, par. Eng. Gloucester; 2460 ac. Pop. 979.
COALTOWNS (EASt and West), two adjacent vils. Scotland, co. Fife, 4 m. N.E. Kirkaldy, inhabited by colliers. Pop. E. Coaltown, 165 ; W. Coaltown, 372.

COALVILLE, a vil. England, co. Leicester, 5 m . N.W. Ashby de-la-Zouch, and a station on the Leicestor and Bristol line of railway. It derives its importance chiefly from its extensive collieries, and the excellent quality of its coal, known by the Whitwick and Snibstone Main. Previous to 1824 , when the collieries were opened, there were but two houses here; there are now about 300 ; also a handsome church, in the early English style; chapels for the General Baptists and Primitive Methodists, and a national, and other schools. Pop. 1300.

COANZA, a river, W. Africa, Lower Guinea, falling into the Atlantic, with a broad and turbid stream S . of St . Paul de Loando; lat. $9^{\circ} 10^{\prime} \mathrm{S}$. Its course is but imperfectly known, but it is supposed to have its source in a large lake on the $E$. boundary of Cassange, and to flow W. for upwards of 600 m . It is navigable for a considerable distance; but, on account of the formidable bar at its mouth, can be entered only by small vessels.

COARRAZE, a vil. France, dep. Basses-Pyrénées, agreeably situate in a valley, r. bank, Gave-du-Pau, here spanned by a bold arch, 10 m. S.E. Pau. In its castle, which crowned a mound above the river, Henri IV. spent his early years, and by sharing in the coarse fare and adventurous sports of the peasantry, inured himself to the difficulties and hardships of his future career. The only part of the old castle now remaining, is a tower, with an enclosure; but part of the site is occupied by a modern château. Coarraze has manufactures of woollen covers, and brick and limekilns. Pop. 1388.

COATBRIDGE, a vil. Scotland, co. Lanark, par. Old Monkland, $9 \frac{1}{2} \mathrm{~m}$. E. Glasgow. The inhabitants are chiefly employed in the extensive iron-works in the neighbourhood. Pop. (1841), 1599.

COATES, six pars. Eng.:-1, Gloucester; 2330 ac. Pop. 373.-2, Lincoln; 950 ac. Pop. 47.-3, Sussex; 510 ac. Pop. 67.-4, (Great), Lincoln; 2200 ac. Pop. 245.-5, (Little), Lincoln; 1060 ac. Pop. 40.-6, (North), Lincoln; 2420 ac. Pop. 225.

COAZACUALCO, a river, Mexico, rising in the sierra Madre, state of Oaxaca, and, after a winding N. course, between the states of Vera Cruz and Tabasco, falling into a bay of same name, in the Carribean Sea, 40 m . S.E. Vera Cruz. It has been proposed to open a communication between the Atlantic and the Pacific, by means of this river and the Chicapa, and it is alleged that the distance has actually been accomplished by this route in the course of eight days.

COAZZO, a tn. Sardinian States, division Turin, prov. of, and 13 m . E.S.E. Susa, near the confluence of the Singone and Sangonetto. Common cloth is made here. Pop. 3000.

COBAN, or Vera Paz, a city. Central America, state of, and 90 m. N.E. Guatimala, cap. prov. Vera Paz ; lat. $15^{\circ} 50^{\prime} \mathrm{N} . ;$ lon. $89^{\circ} 45^{\prime}$ W.; 1. bank, and near the source of the Dnlce or Dolce. The inhabitants, all of whom are aborigines, are more wealthy than in any other part of the country. The valley is exceedingly fertile, and covered with plantations of sugar-cane, bananas, and pimento trees, and various kinds of fruit trees. Pop. 14,000.

COBBE, a tı. Darfoor. Sve Kobne.
COBDO, or Kobdo, a city and territory in N. W. Mongolia, W. of Lake Ike-Aral-Nor. The city stands on the r. bank, and near the sources of the Iso, a tributary of the Djabkan; lat. $48^{\circ} \mathrm{N} . ;$ lon. $91^{\prime} \mathrm{E}$. It is said to contain 2000 houses, is regularly built, and carries on some trade with Kurun.-The territory is bounded N. and W. by the Russian Governments of Yenissei and Tomsk, and separated from Kussia by the Altai mountains. It contains several lakes, many of which receive rivers, without having any outlet; but it is not known whether they are all salt. The largest is the Upsa or Onbsa. The tribes in Cobdo rescmble the American Indians in their habits, dispositions, and modes of life. The Chinese rnle over these tribes is conducted on the same principles as that over the other Mongols, and they

Vol. I.
all render fealty to the Einperor through the chief resident at Uliasutai, but how much obedience is really paid to his orders is not known.

COBHAM, a vil. and par. England, co. Surrey; 5240 ac. The village, on a slight acclivity on the Mole, about 5 m . W.N.W. Leatherhead, is divided into two parts-one on the London and Portsmouth road, called Street-Cobham; the other, a little farther S., called Church-Cobham. It consists of two principal streets, one straight, and one crooked; houses generally of brick; supply of water abundant. It has an Episcopal church, with chapels for Independents, Calvinists, and other dissenters; five schools, two flour-mills, a flockmill, and a brewery ; people chiefly employed in agriculture. Pop. 1617.

COBHAM, a vil. and par. England, co. Kent; 2800 ac. The village, 4 m . S. by E. Gravesend, has a handsome church, with a tower, and some interesting monuments ; and a charity for the maintenance of 20 poor persons. Coblam gives the inferior title of Baron to the Duke of Buckingham. Pop. 758.

COBI, a desert, Central Asia. See Gobr.
COBIJA, a division, Bolivia, on the footing of a dep., and properly styled the Maritime Government of Cobija. It embraces the whole of the sea coast belonging to that state, having an extent of about 270 m . from the mouth of the river Loa. on the frontier of Peru in the N., lat. $21^{\circ} 30^{\prime}$, to the boundary of Chili in the S., lat. $25^{\circ} 28^{\prime}$. Its width cannot be stated with precision, the maritime chain of the Andes which bounds it on the E. being, for the most part, an unexplored wilderness. Many summits of this chain rise above the snow-line, but their waters flow to the interior, and the coast, on which no rain has fallen within the memory of man, has only the river Loa, and a few inconsiderable torrents, which are dry the greater part of the year. The Government is divided into five districts-Atacama, Calama, Chiwchiu, Cobija, and Esmaraca; but it is, in general, a desert of the most inhospitable and impassable character, and contains no town, nor even village, of any importance, besides Cobija.

COBIJA, or Puento-la-Mar, a port and bay, Bolivia, prov. Atacama; lat. $22^{\circ} 34^{\prime} \mathrm{S}$. ; lon. $70^{\circ} 21^{\prime} \mathrm{W}$. It is the only recognized seaport in the repnblic; and, on a point jutting into the sea there is a small fort, mounting five or six guns. It is a very poor place, composed of a few wooden houses. Water is scarce. Fresh meat is procured from the interior, but flour, fruit, vegetables, and nearly all other necessaries, are obtained from Valparaiso.

This port is the principal outlet for the exports of Bolivia, consisting chiefly of silver; it is through it that all the southern provinces of the republic are supplied with foreign commodities. Of late years, attempts have been made to improve this port; a mole, barracks, and custom-house have been built; the numbers of vessels frequenting it are apparently on the increase. Cobija is a frce port; in official documents it is always called Puerto-la-Mar, but English works and maps still retain the name Cobija.

COBLENZ, or Koblenz, a gov. Rhenish Prussia; bounded, N. by gov. Cologne, E. duchies of Hessen-Darmstadt, and Nassau; S. Rhenish Bavaria, and Rhenish posses sions of the duke of Oldenburg, and landgrave of HessenHomburg ; and W. govs. Trier and Aix-la-Chapelle; area, 1754 geo. sq. m. It is mountainous, particularly in the S ., where its surface is occupied by the Hundsriick, and, in the N., by the Eifel Mountains. Being traversed, however, both by the Moselle and the Rhine, it possesses fertile valleys watered by these rivers; and the far larger part of its surface is cither arable or covered with fine timber. Gardens and vineyards also abound, the latter, especially, along the fine slopes of the two rivers mentioned. The government is divided into 12 circles. That of Coblenz, containing the capital of the government, is among the most fertile, and has an area of 79 gco. sq. m. Pop. of gov. (1846), 499,557 ; of circle, 63,410.

COBLENZ, or Koblenz [anc. Confluentes], a tn. Rhenish Prussia, cap. circle of same name, beautifully situate at the confluence of the Moselle with the Rhine, whence its ancient name Confluentes, modernized into Coblenz. The streets are mostly well-built, especially in the New Town or Clemenstadt; but there are many mean and filthy lanes and thoroughfares. The principal buildings are the four R. Catholic
churches, one of which, called the church of St. Castor, situated precisely at the confluence of the two rivers, is remarkable for its antiquity, having been founded in 836 ; and also as the place where the grandsons of Charlemagne met (843)

to divide his vast empire into Germany, France, and Italy. It contains some fine ancient monuments, and a beautiful altar-piece. The palace, in the New Town, the summer residence of the King, is a fine structure, with a long and handsome façade extending along the Rhine. It was bnilt by the last Elector of Treves, in 1779, and was converted by the French, for a time, into a barrack. The Protestant church contains some fine specimens of early painted glass. The theatre is a handsome building, and well fitted up, but neglected. The Cassino or town club is also a fine cdifice, and contains an elegant ball-room, good reading-rooms, and has gardens attached. There are residences of several noble families in the town, including that of Prince Metternich; an hospital, admirably conducted by the sisters of charity ; a town library, with valuable collections of coins, paintings, and antiquities. A free stone bridge of 14 arches crosses the Moselle; and another bridge, constructed of boats, connects the town with the village of Ehrenbreitstein, on the opposite bank of the Rhine, where there is a strong fortress, with 400 pieces of cannon, and containing vast arched cisterns, capable of holding three years' supply of water. Coblenz is also strongly fortified. The expense of constructing both works, the former being an out-work of the latter, was upwards of $£ 750,000$. Together, they are capable of accommodating 100,000 men, while the magazines are large enough to contain provisions for 8000 men , for 10 years. These extensive fortifications, which are constructed partly on the system of Vauban, and partly on that of Montalembert, render Coblenz the strongest place in the Prussian dominions. Coblenz is the seat of a central and criminal court, of a general court of justice, of a tribunal of commerce, of a board of taxation, and is the place of residence of the lord-lieutenant (Oberpräsident) of the province of the Rhine.
Coblenz is a free port, and carries on an active commerce by the Rhine, Moselle, and Lahn. It is the staple place of the Rhine and Moselle wines intended for exportation. Grain, oil, iron, and Seltzer water, are also exported to a considerable extent; the latter to the amount of $1 \frac{1}{2}$ million bottles annually. Millstones, manufactured from the lava of extinct volcanoes in the neighbourhood; pumice stone, potter's clay,
and bark, are also articles of trade. Japanned wares, linen, and tobacco, are amongst the manufactures. Pop. (1846), 23,431,

COBLENZ, a vil. Switzerland, can. Aargau, at the embouchure of the Aar in the Rhine, 930 ft . above sea level. Pop. 643.

COBOURG, a tn . Upper Canada, pleasantly situated on Lake Ontario, 64 m. N.E. Toronto. It is well laid out, and possesses many good streets. Victoria college was founded by the Methodists in 1835 . There are six churches, a jail, court-house, and a mechanics' institution. The harbour is excellent, and, during the season, regular communication is maintained by steamers with various places of importance. An extensive cloth factory has been recently erected. Pop. (1852), 3871.

COBRAS.-1, An isl. group, E. coast, Africa; lat. $6^{\circ}$ S., including Remba, Monfia, and Zanzibar, all wooded and in-habited.- 2 , An isl. and fort, Brazil, bay of Rio de Janeiro, and about 1 m . from the city, of which the fort is one of the principal defences, being capable of holding 1000 men, and 100 pieces of cannon. It is also used as a state prison. Pop. 300 , besides the garrison.

COBRE, a tn., isl. Cuba, in the E. dep., 12 m . N. San-tiago-de-Cuba. Coffee is the principal product of the vicinity. Pop. 2661 ; of whom 614 are whites, 1052 free people of colour, and 995 slaves.

COBRIDGE, or Corbridge, a large vil. England, co. Stafford, $2 \frac{1}{2} \mathrm{~m}$. N.N.E. Newcastle-under-Lyne. It has a neat church, a R. Catholic chapel, and a Methodist meeting-house; and near it are several manufactories and collieries.

COBURG, or Saxe-Coburg-Gotha [German, Sachsen-Koburg-Gotha], a duehy, central Germany, and the most S. of the independent Saxon principalities, between lat. $50^{\circ} 7^{\prime}$ and $51^{\circ} 22^{\prime} \mathrm{N}$.; and lon. $10^{\circ} 15^{\prime}$ and $12^{\circ} 40^{\prime}$ E.; surrounded by the territories of Prussia, Bavaria, Saxe-Weimar, Meiningen, and Schwarzburg. The duchy contains, altogether, about 9000 sq. m., and has 11 towns, 10 market towns, and 253 hamlets and villages. It is divided into two provinces, Coburg Proper, S. of the Thïringer Wald (Thuringian Forest), and Gotha, on the N. side. The former is traversed by the Itz and Rodach, the latter by the Gera, Nessa, Werra, Tlen, and Unstrut. The S. of Gotha and N. of Coburg are both mountainous. In the former are the great Beerberg, 2850 ft . high ; the Schneekopf, 2829 ft ; and the Inselberg, 2655 ft . Both divisions are fertile; the hills are covered with wood, and in Gotha coal and other minerals are found. The climate is mild and healthy. The chief occupations of the inhabitants, particularly in Coburg, are cattle-rearing and agriculture. The products of the latter are grain, pease, beans, hops, hemp, flax, potatoes-a principal article of food; and some wine. Hogs are fattened in the forests, which also yield timber, pitch, tar, charcoal, and potash. The people of Gotha employ themselves in the manufacture of linen cloth, tick, tape, leather, iron, steel, and copper wares; paper, glass, and toys. Breweries, distilleries, sawing-mills, and linenbleaching establishments, are also numerous in the duchy. The principal articles of export are fat cattle, grain, butter, leather, wood, wool, linen, and other manufactured goods. The government is a constitutional monarchy. Each province has its own elective assembly, which unite and form one chamber of 17 members or representatives, of whom six are deputies of the nobility, five from the three principal towns, and six from the inferior towns and country districts. No person can be elected a member who is under 30 years of age, and who is not possessed of an estate, free of mortgage or other incumbrance, of the value of $£ 416$, or an annual income of $£ 33$. The revenue of Coburg amounts to $£ 20,450$ annually; of Gotha, to $£ 391,812$. The public debt, in 1846, was $£ 235,950$. Amongst the institutions for public instruction are the university of Jcna, a gymnasium at Gotha, another at Coburg, in both of which there are also commercial and normal schools, and near Gotha an observatory; a lyceum at Ohrdruff, and the Salzmann college at Schnepfenthal, founded in 1785. There are, altogether, upwards of 35 town schools and 300 village schools in the duchy. The ducal house, and the greater part of the population, profess the Lutheran faith; but there are about 2400 R . Catholies, and 1200 Jews. There is entire toleration in religious matters, all sects and religions enjoying equal civil rights. The duke of Saxe-Coburg-Gotha takes the fifth rank among the Saxon dukes, and holds the

12th place in the German diet. The duchy is bound to furnish a contingent of 1116 men to the army of the confederation. The house of Coburg has been singularly fertunate in its matrimonial connections. Leopold, uncle of the present duke, and now King of the Belgians, was marricd to the heiress of the British throne, and afterwards to a daughter of the King of the French. A son of another uncle is consert to the Queen of Pertugal, one aunt was married to the duke of Kent, and another to Constantine, prince hereditary of Russia. The present (Ernest II.) duke's cousin is married to the duke of Nemours, and his younger brother Albert, is the husband of the Queen of Britain. Pop. (1846), Coburg, 44,010; Getha, 103,185. Tetal, 147,195.

COBURG, or Koburg, a tn. Germany, cap. of above duchy, finely situate, 1. bank, Itz, 106 m. E. by N. Frank-fort-on the-Mayn ; lat. $50^{\circ} 15^{\prime} 19^{\prime \prime}$ N.; lon. $10^{\circ} 58^{\prime} 8^{\prime \prime}$ E. (L.) The streets are narrew, and the town itself altogether unattractive, thongh possessing some pleasant public walks. It has three suburbs, two publie squares, and three bridges across the Itz. The principal buildings are the Ehrenburg palace, one of the town residences of the duke of Saxe-CoburgGotha, built in 1549. It centains a picture gallery, a library of 27,000 volumes, and valuable collections of engravings, coins, antiquities, minerals, \&c. It is lewer than any other part of the town, and is built in different styles. Some of the old doors exhibit beautiful specimens of marqueterie or inlaid work, an art for which Coburg is still celebrated. The Government house is a handsome structure in the Italian style; and there are a town-hall, arsenal, containing a fine collection of ancient armour; theatre, and riding-school. There are five Protestant churches, in one of which, the St. Maurice, is the ducal burial vault, and seme geod monuments, one R. Catholic chapel, an orphan asylum, three hospitals, a gymnasium, a seminary, four parochial scheols, Sunday and free schools, an institution fer the deaf and dumb, and a public library of 26,000 volumes. On an eminence overhanging the town is an ancient castle of the dukes of Coburg, surreunded by a strong wall, from which extensive views are ebtained. It is now, in part, cenverted into a prisen and house of cerrection, but some of the chambers remain in their original condition, amongst them those occupied by Luther, during his concealment here, and in which he composed some of his best werks, with his bedstead and pulpit. This castle was unsuccessfully besieged by Wallenstein, during the Thirty Years' War, the chronicles of which make mention of a lime tree whiel still flourishes on ene of the bastions. Coburg has some insignificant manufactures of potasl, cotton fabrics, tick, glass, tape, woellen goods, and teys; it has also dye-works, breweries, \&c. In the vicinity there is a marble-work, seme iron-werks, and a powder-mili. Coburg is the seat of the gevernment, and of the beard of taxation for the duchy; of the superior judicial courts and church consistory fer the principality. Pop. 12,000.-(Kratzsch, Handbuch der Deutschen Bundesstaaten; Murray's Handbook.)

COBURG PENINSULA, a projecting point of land of irregular shape, N. coast, Australia, forming the N.E. side of Van Diemen Gulf, and the E. of Dundas Strait. Extreme W. point in lat. $11^{\circ} 20^{\prime} \mathrm{S}$.; lon. $131^{\circ} 42^{\prime} \mathrm{E}$. The peninsula is about 70 m . in length, and is joined to the main by a narrow neck of land. Port Essington, now abandoned, is in this promontery.

COCAES Arbalal-de, a mining vil. Brazil, prov. MinasGeraes, about lat. $20^{\circ} \mathrm{S}$.; lon. $44^{\circ} \mathrm{W}$. It is beautifully situate on the gentle slepe and summit of a low hill, in the hosom of a semicircle here formed by the serra de Cocaes. Near the village runs a small stream, called the Ulna, whose banks have cverywhere been turned over and washed in search of gold. The Arraial-de-Cocaes, does not show any of the decayed appearance exhibited by many places in the same district. The houses are neat, and mostly whitewashed, and surrounded by gardens, filled with erange and coffee trees, bauanas, \& c The church, which stands out prominently frem the rest of the buildings, is surrounded by a few palings, giving the whole a truly tropical aspect. The village is inhabited chiefly by those engaged in the neighbouring gold mines.-(Gardner's Travels in Brazil, 1836-41.)

COCAES, a vil. Brazil, prov. Matto-Gresso, about 30 m . N.W. Cuiaba. It contains a church, and has twe chapels in its neighbourhood. Pop. above 2000.

COCHABAMBA, or Condorillo, a river, Belivia, rising near the parallel of $18^{\circ} \mathrm{S}$., flowing S.E., and, after receiving numerous tributaries, assuming the name of Rio Grande, in lat. $19^{\circ} 42^{\prime} \mathrm{S} . ;$ lon. $64^{\circ} \mathrm{W}$.

COCHABAMBA, a dep. Bolivia, embracing, besides the province of the same name, those also of Sacaba, Tapacari, Arque, Ayopaya, Clissa, and Misque. These provinces all lie round the head waters of the Rio Grande, one of the chief tributaries of the Amazen. The department extends at least 400 m . E. and W., and about 300 m . N. and S., and includes every climate - perpetual snows overhanging its northern boundary, while the sugar-cane and cacao grow in the rich valleys beneath. Pep. about 280,000 .-The province of Cochabamba lies immediately at the foot of the snowy mountains, on the N . side of the department. The passes affording access to it are nearly $15,000 \mathrm{ft}$. high. The claracter of the valley is indicated by the name, cocha, a lake, pampa, a plain, which signifies the inundated plain. The level plain is cultivated throughout, and resembles in its productions the S. of France-the vegetation consisting wholly of imperted species. The indigenous character remains only in the cabins of the natives.

COCHABAMBA, a city, Bolivia, cap. prov. and dep. of same name, stands at the $E$. end of a plain 18 m . long, and 2 m . wide, 8370 ft . above the sea; lat. $17^{\circ} 27^{\prime} \mathrm{S}$. ; lon $65^{\circ} 46^{\prime}$ W. The Rio de Recha, from the the valley of Sacaba, flows through the town, and is jeined lower down by the Tamborada-both overflowing in the rainy season, though almost dry in winter. The city of Cochabamba occupies a great space, owing to the lowness of the houses, which rarely rise abeve a single story, and to the number of gardens inter mingled with them. In the middle of the city is the grand Plaza, round which are four churches, and the C bildo, or Gevernment-house, a large, but plain building. Of 15 churches, the handsomest is that which fermerly belonged to the cellege of the Jesuits. The streets are bread, and in good condition ; but the plazas, or epen squares, being used as market-places, are erdinarily littered with wares, and crowded with Indians. Tewards the berders of the town, the tile-reofed houses, with large woeden balconies, disappear, and thatched cabins of Indian form become numerous. The general language is the Quichua; and nene but men of rank can speak good Spanish. The people are passionately fond of chicha-an inebriating drink, made of maize; and, some times, during religious festivals, they devote whele days to drinking it ; they are otherwise sober and econonical, but have little patient industry. As pedlars, however, or itiner ant traders, they are often very successful. While Potosi, Oruro, and other towns in the mining districts, lave fallen to decay, Cochabamba, situate in a valley, devoted whelly to agriculture, and, therefore, despised by the Spanish settlers, has continued to prosper, and centained, in $1835,25,000$ in habitants. The name Oropesa, given to C'ochabamba, in 1579, hy the viceroy of Lima, was never adopted by the people; and, though feund in maps and public decuments, is now wholly unknown in Bolivia.

COCHE, an isl. Caribbean Sea, between isl. Margarita and the peninsula forming the N . beundary of the Gulf of Cariaco ; lat. $10^{\circ} 47^{\prime} \mathrm{N} . ;$ len. $64^{\circ} \mathrm{W}$. It is about 7 m . long, by 4 bread, was fermerly celebrated for its pearl fishery, and is now chiefly reserted to for turtle and fish-great quantities of which are sent to the neighbouring islands and the continent.

COCHIN, a small principality or rajahship, Hindoostan, Malabar coast, intersected by lat. $10^{\circ} \mathrm{N}$. A portion of the territory is subject to the British cede of Indian laws, the remainder is under the jurisdiction of the rajah, who is tributary to the British. The narrow valleys in the N. parts of the country are well watered and fertile, yielding two crops of rice annually. The higher grounds are covered with forests, consisting, in part, of teak, jackwood, ironwood, and blackwood, all of which are in great demand in Bengal. There are a number of Christian villages in the territory; these are, in gencral, well-built and clcanly. Jews are numerous in the vicinity of the tewn of Cochin-they are composed of two classes, the Jerusalem, or white Jews, and the ancient. or black Jews, who have a synagogue in the town.

COCH1N, a maritime tu. Hindoestan, built on a small island ; lat. $9^{\circ} 58^{\prime} \mathrm{N}$. ; lon. $76^{\circ} 18^{\prime} 29^{\prime \prime} \mathrm{E}$. (L.), formerly cap. of above principality, but in possession of the British since
1796. Its harbour, next to Bombay, is the best on the W. coast of Hindoostan, and the only one $S$. of the former, where ships of large size can be built. It has been in a declining state for many years; but still carries on some trade with the rest of the Malabar coast, China, and the Arabian and Persian Gulfs. The chief exports are teak, sandal-wood, pepper, cardamoms, cocoa-nuts, coir, cordage, cassia, and fish maws. Provisions are extremely cheap. Ships, from 500 to 1000 tons, have been built here by the East India Company, and several frigates for the British navy. Cochin is the see of a R. Catholic bishop, whose diocese includes Ceylon.

COCHIN-CHINA. See Anam.
COCKAYNE-IIATLEy, par. Eng. Bedford; 1460 ac. Pop. 99.

COCKBURN.-1, (Cape), N. Australia, forming the E. entrance to Mountmorris Bay; lat. $11^{\circ} 18^{\prime} \mathrm{S} . ;$ lon. $132^{\circ} 51^{\prime}$ E. (r.)-2, (Channcl), an inlet of the sea, on the W. coast of S. America, Terra del Fuego, having Clarence Island on the N., about lat. $54^{\circ} 30^{\prime} \mathrm{S}$. ; lon. $72^{\circ} \mathrm{W}$.3, (Islands), a reef, stretching along the N.E. coast of Australia, for 14 m. E. to W. near the entrance of Shelburne Bay; lat. (E. point), $11^{\circ} 50^{\prime}$ S. ; lon. $143^{\circ} 32^{\prime}$ E. (R.)-4, (Port), N. Australia, Apsley Strait; lat. $11^{\circ} 25^{\prime}$ S.; lon. $130^{\circ} 24^{\prime}$ E. Port Cockburn was established as a British settlement in 1824 , but has been relinquished, chiefly on account of the searcity of fresh water, and the sterility of the soil.- 5 , (Port), W. side of isl. Pemba, coast of Zanzibar, E. Africa; about lat. $5^{\circ} 4^{\prime}$ S. -6 , (Sound), S.W. Australia, between Garden Island and the mainland, may be considered as the outer harbour of Swan River, from the entrance of which it is distant about 6 m . further S. ; lat. (N. entrance) $32^{\circ} 10^{\prime} \mathrm{S}$. ; lon. $115^{\circ} 40^{\prime}$ E. Cockburn Sound is the best anchorage on this coast; the depth in it varies from 12 to 7 fathoms. It is perfectly secure, and capable of sheltering any number of vessels of the largest size.

COCKBURN ISLAND, a small isl. S. Pacific Ocean, immediately S. of Cape Horn, discovered by Sir James Ross, January 1, 1843 , and placed by him in lat. $64^{\circ} 12^{\prime} \mathrm{S}$. ; lon. $59^{\circ} 49^{\prime} \mathrm{W}$. It is described as of a deep brown colour, of great elevation for its size, with a rock resembling a watch tower, on its N. point, and a high volcanic crater-like peak on its S. end. Its elevation above the sea is 2760 ft ., and its diameter about twice as much. The flora of this remote and barren rock, on which the last vestiges of vegetation in those high latitudes are to be found, consists, according to Dr. Hooker, of 19 species, all belonging to the orders mosses, algoe, and lichens, and of which, seven are peculiar to the island. It is covered with penguins and cormorants, and here were found, what, says Captain Ross, were never before seen, the eggs of the white petrel. The island is covered during nearly the entire year with snow. Captains Ross and Crozier took formal possession of it, and the contiguous lands, on January 6, 1843.-(Ross's Southern and Antarctic Expedition.)

COCKBURNSPATH, par. Scot. Berwick; $4 \frac{1}{2}$ sq. m. Pop. 1149.

COCKENZIE, a maritime vil. Scotland, co. Haddington, 1 m. E. Prestonpans; inhabitants chiefly employed in fishing, and in the manufacture of salt. Pop. 960.

COCKERIIAM, par. Eng. Lancaster; 10,420 ac. P. 3230 .
COCKERINGTON, two pars. Eng. Lincoln:-1, (North, or St. Mary), 2030 ac. Pop. 227.-2, (South, or St. Leonard's), 1430 ac. Pop. 246.

COCKERMOUTH, a market tn. and parl. bor. England, co. Cumberland, at the confluence of the small river Cocker, from which it derives its name, and the Derwent, $24 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Carlisle, connected by a railway, 8 m . in length, to Workington with the Maryport and Carlisle, and Whitehaven Junction lines. The streets are irregularly built, many of them narrow, but the houses, though few of them are of the better class, are neat, and indicate the enjoyment of a superior degree of comfort on the part of the working classes. The rivers Cocker and Derwent are crossed each by a handsome stone bridgc. The church, originally crected in the reign of Edward III., rebuilt in 1711, enlarged in 1825, but unfortunately burnt in 1850, is now (1851), about being re-erected. The other places of worship are for Methodists, Independents, R. Catholics, and the Society of Eriends. There are here a free grammarschool, with library; national, British, and Sunday schools, as well as numerous daily schools, an almshouse, and dispen-
sary, savings-bank, mechanics' institution, library, and newsroom. The principal public buildings are a house of correction, and a courthouse, where the quarter sessions and various public mectings are held; a commodious market-house, savings-bank, gas works, \&c. The trade is considerable, including flax and tow spinning, the manufacture of woollens, cotton checks, and ginghams, sewing-thread, hats to a considerable extent, \&c. There are, besides, tanneries, breweries, and dyeworks; and on the Cocker, near the town, several corn-mills, and a paper-mill. The castle, the principal object of attraction, is beautifully situate, on a rising ground, at the junction of the Cocker and Derwent, and, in the olden time, was a fortress of great strength. It was taken after a short siege, by the Parliamentary forces in 1648 , and dismantled. Cockermouth is the birthplace of the poet Wordsworth; and John Walker, author of a Geography and Universal Gazetteer, was likewise a native. Cockermouth sends two members to the House of Commons ; electors (1850), 332. Pop. 4940.

COCKE'T, or CoquEt, a river, and isl. England, co. Northumberland, the former rising near the Cheviot hills, and, after a winding S.E. course through a beautiful pastoral district, falling into the North Sea near Warkworth Castle. The latter, about 1 m . E. by S . the mouth of the river, is about 1 m . in circumference, has the remains of an ancient Benedictine monastery, and on its S.W. extremity, in lat. $55^{\circ} 20^{\prime} 1^{\prime \prime} \mathrm{N} . ;$ lon. $1^{\circ} 32^{\prime} 15^{\prime \prime} \mathrm{W}$., a lighthouse, with a bright fixed light 83 ft . above high water.

COCKFIELD, two pars. Eng. :-1, Durham; 5230 ac. Pop. 1187.-2, Suffolk; 3470 ac . Pop. 951.

COCKING, par. Eng. Sussex ; 2370 ac. Pop. 464.
COCKINGTON, par. Eng. Devon; 1560 ac. Pop. 203.
COCKLEY-Cley, par. Eng. Norfolk; 4370 ac. Pop. 244.
COCKPEN, par. Scot. Edinburgh; 4 sq. m. Pop. 3228.
COCKTHORPE, par. Eng. Norfolk; 530 ac. Pop. 42.
COCLE, a river, New Granada, Isthmus of Panama, formed by the union of the Panonome and Rata, and falling into the Caribbean Sea, 50 m . S.E. Chagres, after a course of 75 m . ; for a considerable part of which it is navigable.

COCO ISLANDS.-1, Two isls., Bay of Bengal, called, respectively, Great and Little Coco. The first extends from lat. $14^{\circ} 2^{\prime} \mathrm{N}$. to $14^{\circ} 8^{\prime} \mathrm{N}$.; lon. $93^{\circ} 25^{\prime} \mathrm{E} \quad \mathrm{It}$ is nearly 6 m . in length, $N$. and $S$. , and 2 m . in breadth, covered with trees, some of which, near the sea, are cocoa-nut trees. It is of moderate height, but may be seen from a distance of 20 m . It affords nothing but firewood, with exception of a little water, which may be had in some parts by digging pits. Little Coco lies abont 9 m . S.W. the Great Coco, the centre in lat. $13^{\circ} 58^{\prime} 30^{\prime \prime} \mathrm{N}$.; it is about $2 \frac{1}{2} \mathrm{~m}$. long, N. and S., and $\frac{1}{2} \mathrm{~m}$. broad: moderately elevated, and covered with trees, some of which are cocoa-nut and palmyra trees. Both islands abound with monkeys and squirrels.-2, An isl.,(Pulo Coco), Strait of Malacca, N.E. Junkseylon.-3, An isl., Sooloo Archipelago, on the E. side of the S.W. extremity of Mindanao, it is low ; lat. $6^{\circ} 45^{\prime} \mathrm{N}$.; lon. $122^{\circ} 23^{\circ} \mathrm{E}$. It is sometimes called Manalipa and Malinipa.-4, An isl., China Sea, off the S.W. end of the Great Natunas; lat. $3^{\circ} 40^{\prime} \mathrm{N}$. ; lon. $108^{\circ} \mathrm{E}$.

COCOA-NU'T ISLANDS.- 1 , An isl., off the S.W. extremity of Java, W. side, Wine Cooper's Bay. W. point, lat. $7^{\circ} 1^{\prime}$ S.; lon. $105^{\circ} 30^{\prime} \mathrm{E}$. (R.); about 3 m . in length from E. to W. It is known also by the name of Klapa or Klapp Island.

2, One of the smallest of the Sandwich group, N. Pacific Ocean, on the E. coast of Hawai, at the entrance of Byron Bay; lat. $19^{\circ} 43^{\prime} 9^{\prime \prime} \mathrm{N}$. ; lon. $155^{\circ} 2^{\prime} \mathrm{W}$. (R.) -3 , An isl., S. Pacific, Torres Strait, between S. coast New Guinea and Cape York, in Australia; lat. $10^{\circ} 4^{\prime} \mathrm{S}$. ; lon. $143^{\circ} 10^{\prime}$ E. This island has now no cocoa trees, though at one time they were abundant; but bastard sago, palm, pandanus, \&c., grow luxuriantly. The reefs, points, and cliffs are entirely composed of limestone, frequently crystallized._-4, A small isl., S. Pacific Ocean, off S.W. coast, New Ireland, about lat. $4^{\circ} 42^{\prime} \mathrm{S}$. ; lon. $152^{\circ} 44^{\prime} 5^{\prime \prime}$ E. (n.)

COCONATO, a tn. Sardinian States, Piedmont, division Alexandria, on a hill, 17 m . E.N.E. Turin. It has several plaster kilns, and an annual fair. Fine chestnuts grow in the neighbourhood. Pop. 2500.

COCOS ISLANDS.-1, An isl., group Indian Ocean, called also Borneo Coral Islands; centre, and largest island, about lat. $12^{\circ} \mathrm{S}$. ; lon. $98^{\circ} \mathrm{E}$.; consists of a circular chain of
islands almost touching each other, lined on the exterior side by a steep coral reef, and forming inside an extensive lagoon or harbour, named Port Albion or Refuge Port. It has only one entrance for ships, which is at the N. extremity, and is about 2 m . wide. Most of the islands composing the group are covered with cocoa-nut, and two other species of trees, one of them white, soft, and spongy; the other heavy, hard, dark-looking timber. The beaches abound with land crabs, aquatic birds, and turtle.-2, Two small, low isls., Indian Ocean, off W. coast, Sumatra; lat. $3^{\circ} 6^{\prime}$ N. ; lon. $95^{\circ} 30^{\prime}$ E.; separated from each other by a channel $1 \frac{1}{2}$ or 2 m . wide, of doubtful safety. The islands are covered with trees.-_3, An isl., N. Pacific Ocean; lat. $13^{\circ} 13^{\prime}$ N.; lon. $144^{\circ} 40^{\prime} \mathrm{W} .-4$, An isl., S. Pacific; lat. $15^{\circ} 57^{\prime}$ S.; lon. $173^{\circ} 58^{\prime} \mathrm{W}$. -5 , An isl., group S. Pacific, N.E. Bougainville's Island, and due E. New Ireland; lat. $4^{\circ} 40^{\prime} \mathrm{S}$. ; lon. $156^{\circ} 50^{\prime} \mathrm{E}$.

COD (Cape).-A peninsula, U. States, Massachusetts, curved inwards in the form of a hook, 65 m . long, and 1 to 20 broad. It contains the town of Barnstable, and near its N. extremity has a lighthouse 167 ft . high; lat. $42^{\circ} 2^{\prime} 24^{\prime \prime} \mathrm{N}$. ; lon. $70^{\circ} 4^{\prime}$ W. (R.) -2, A spacious bay, formed inside the hooked peninsula, terminated by Cape Cod. It is about 28 m . square, and contains tho ports of Barnstable and Plymouth.

CODDENIIAM, par. Eng. Suffolk; 1540 сc.

lop. 924.
CODDINGTON, three pars. Eng.:-1, Chester; 2640 ac . Pop. 324.-2, Hereford; 1510 ac. Pop. 158.-3, Nottingham; 1850 ac. Pop. 436.

CODERA, a cape, Venezuela, 50 m . E. by N. Caracas; lat. $10^{\circ} 36^{\prime} \mathrm{N} . ;$ lon. $66^{\circ} 3^{\prime} \mathrm{W}$.

CODFORD, two pars. Eng. Wilts:- 1, (St. Mary), 1540 ac. Pop. 338.-2, (St. Peter), 1170 ac. Pop. 394.

CODICO'TE, par. Eng. Hertford; 2580 ac. Pop. 906. CODIGORO, a tn. Papal States, deleg. of, and 24 m . E. Ferrara, l. bank, Po-di-Volano, and 9 m . from the Adriatic. Iop. 3000 .

CODO, a tn. Brazil, prov. Maranhão, at the confluence of the Codo with l. bank, Itapicaru, 50 m . N.W. Caxias. It contains a parish church, and a primary school. In the vicinity are extensive native forests, in which the fugitive Indians often take refuge, and from which the wild Indians often make incursions into the district. For the purpose of curbing and keeping thein in check, a company of soldicrs or hunters is kept here.

CODOGNO, a tn. Austrian Italy, gov. Milan, in a fertile district, between the Po and the Adda, 17 m . S.E. Lodi. It is well built, has spacious streets, three churches, a college, and several schools, a townhall, theatre, barracks, and some charitable institutions. It is the scat of the Government of the district, and has a board of taxation, and a custom-house. There are several manufactories of silk, linen, carthenware, tiles, \&c.; and a considerable trade in Parmesan cheese. In 1796, the Austrians were defeated by the French near this town. Pop. 9632.

CODROIP(), a tn. and par. Austrian Italy, prov. Friuli. 24 m . S.W. Udine, r. bank, Stella. It contains a parish church, and several public offices; and has considerable manufactures of woollens and hemp canvas. Its position on the road between Udine and Venice, gives it an important transit trade. Pop. 3500 .

CODSALL, a vil. and par. England, co. Stafford; 2580 ac. The village, pleasantly situate on an eminence, $4_{4}^{3} \mathrm{~m}$. N.W. Wolverhampton, contains several handsome villas. It has a parish church, an Independent chapel, two schools, and two sulphureous springs, in high repute. It has a station on the Shrewsbury and Birmingham Railway. Pop. 1096.

COED-Frank, a vil. Wales, co. Glamorgan, consisting of rows of cottages, built of stone, and ill supplied with water, It has an Episcopal, and two dissenting chapels, and a school. The extensive copper mines and collieries in the vicinity employ the inhabitants. Pop. 1126.

COEDCANLASS, par. Wales, Pembroke. Pop. 245.
COEDKERNEW, par. Wales, Monmouth; 710 ac.
COEDKERNEW, par. Wales, Monmouth; 710 ac . Pop. 149.

COEL, a tn. Hindoostan, prov. of, and 50 m . N. Agra; lat. $27^{\circ} 54^{\prime}$ N.; lon. $78^{\circ}$ E. It is of considerable size, has maniy brick buildings, and a large and well supplied bazaar. The only remarkable buildings are the great mosque, and a round tower close by. The mosque, which stands on rising ground in the centre of the town, is a handsome structure, in the

ANCIENT MINARET AND MOSQUE AT COEL.
Fiom an Griginal Drawing by Captain R. Sumto, 4th Regh.
more ancient style of Mogul architecture ; it is principally of cut stone, the other parts being of brick covered with chunami, and ornamented with coloured tiles. The tower is of reddish sandstone, excepting the upper part, which is of brick, and apparently of more modern date. The entrance is several feet from the ground; in this, and other respects, resembling very much the round towers of Ireland, and, like those ancient monuments also, its age and use are involved in mystery.

COELE-SYRIA [Greek, in $x 0, \lambda \eta$ vuosa-the hollow Syria], an anc. country and great valley, Syria, enclosed between the Lebanon and Anti-Lebanon mountains. The valley is dry and arid, and its scanty inhabitants are extremely ignorant and superstitions. They are, however, brave and enterprising, and have acted an important part in the wars and troubles that at different periods have desolated Syria. The name also, at one period, included all the tract of country betweem Seleucis and Arabia, and the confines of Egypt, except Judea and Phœnicia. Under the Romans, this country formed, at first, part of the kingdom of Decapolis; but under Diocletian, it was incorporated with Phonicia Libanica. Coele-Syria is now comprised in the modern Turkish pashalics of Saide and Damascus.

## COEPANG. Se Coorang.

COETIVY, an isl. Indian Ocean, about 550 m . N.E. Madagascar; lat. $7^{\circ} 6^{\prime}$ S.; lon. $56^{\circ} 30^{\prime}$ E. From the S.W. point of the island a coral reef extends for several miles, on which the sea is constantly breaking. Another reef stretches from the $N$. end for about $2 \frac{1}{2} \mathrm{~m}$., on which the sea breaks when there is any swell. Abundance of good water, cocoanuts, vegetables, fowls, and turtle in their season, may be obtained here. Fish are also plentiful.-(Naut. May.)

COFFIN'S ISLAND, one of the Magdalen Islands, Gulf of St. Lawrence ; lat. $44^{\circ} 3^{\prime} \mathrm{N}$. ; lon. $64^{\circ} 36^{\prime} \mathrm{W}$. (r.) It is the largest of the group, and contains some settlements. It is 25 m . long, and in some places 3 m . wide. The population, which is about 1000, are chiefly French Canadians. They have no agriculture beyond the cultivation of some potato grounds, but they have pasture lands, on which they maintain some live stock. The inhabitants derive their subsistence from the fisherics, which are chiefly for seals, herring, and cod. The fishery of the sea-cow, as it was called, was formerly productive, but it has now ceased to be followed, as the seacows have deserted their usual places of resort. The inhabitants are healthy, have light complexion and flaxen hair.

COFFINSWELL, par. Eng. Devon; 1010 ac. Pop. 215.
COFRENTES, a tn. Spain, prov. of, and 50 m . W.S.W. Valencia, at the extremity of the valley of same name, on an elevated tongue of land, formed by the confluence of the Cabriel and Jucar. During the last civil war, it was encloaed
by an earthen rampart, not capable of much defence. It is poorly built. The houses are generally low and ill-arranged, and the streets narrow and winding. It contains a castle and a parish church, and has some manufactures of woollen and linen cloth, a trade in wood, and an annual fair. The district around is mountainous and sterile, excepting the valley of Cofrentes, which, though not of great extent, is both fertile and beautiful. Pop. 1624.

COGAN, par. Wales, Glamorgan; 700 ac. Pop. 28.
COGENHOE, or Cucknoe, a vil. and par. England, co. and 5 m . E. Noribampton; 960 ac . The village on rising ground, has a handome cliurch, chapels for Wesleyans and Baptists, and a neat school. Pop. 322.

COGGESHALL, a tn. and par. Eng. co. Essex; 2770 ac. The town, 42 m. N.E. London, and within 3 m . of the Kelvedon station on the Eastern Counties Railway, is built partly on low ground, l. bank, Blackwater, and partly a hill slope, same side. It has a large church at the W. end, and chapels for various descriptions of dissenters, a free school, and other charitable institutions, including almshouses. The place was once famous for the manufacture of a kind of baize, celebrated under the name of 'Coggeshall whites,' but this trade has almost wholly disappeared; and its place is now occupied by the manufacture of silk, which is carried on to a considerable extent; and also fine velvet, gelatine, \&c. The hamlet of Little Coggeshall is on the opposite side of the Blackwater, which is crossed here by an ancient bridge of three arches, said to have been built by King Stephen, who founded here also an abbey for Cistercians. Pop. 3408.

COGGESHALL (Little), par. Eng. Essex.; 830 ac. Pop. 443.

COGGS, par. Eng. Oxford; 1820 ac. Pop. 757.
COGHLANSTOWN, par. Irel. Kildare; 1515 ac. P.327.
COGNAC, a tn. Frauce, dep. Charente, 22 m . W. Angoulême, l. bank, Charente, on which it has a port. It is pleasantly situate on a hill, and is overlooked by the remains of an old castle. It has a court of first resort and of commerce, a communal college, and an agricultural society. It gives its name to the well known Cognac brandy, made here, and in the surrounding district, and which is exported to all parts of the world. The quantity produced annually does not exceed 6000 butts, but the number sold under the name of Les fines Champagnes, by which the best quality is distinguished, exceeds 15,000 butts. Cognac has numerons distilleries, and also a large trade in brandy, made in other parts of the department. It likewise manufactures earthenware and leather, and has a trade in grain and hemp. Francis I. is said to have been born here under an elm tree, his mother, Louise de Savoie, Duchess d'Angoulême, having been seized unexpectedly with the pains of labour while walking in the park. Pop. 4148.

COGNE (VAL DE), a beautiful and romantic valley, Sardinian States, Savoy, opening out of the Val d'Aosta; remarkable for containing a Roman tunnel or gallery, cut in the rock during the reign of Augustus. This antique excavation is 180 ft . long, 14 ft . high, and 3 ft . wide. At one end is a well-cut contemporary inscription, attesting its age, and that it was done at the expense of C. Aimus of Padua.

COGOLETO, a tn . Sardinian States, on the gulf of, and 14 m . W.S.W. Genoa. It derives great interest from being the birthplace of Columbus. His house there is still shown. Genoa disputes with Cogoleto the honour of having given him birth. Near the town is a celcbrated foundry of shot and shells. The iron is brought from Elba.

COHAHUILA, a state, Mexican Confederation, bounded N. and N.E. by the Rio Bravo del Norte, which separates it from Texas ; E., Nuevo Leon; S., Zacatecas; and W., Chihuahua and Durango, between lat. $24^{\circ} 17^{\prime}$ and $30^{\circ} 5^{\prime} \mathrm{N}$. ; lon. $100^{\circ}$ and $104^{\circ} \mathrm{W}$. Length, 390 m. ; greatest breadth, 270 m . The vegetation is in general scanty, and the soil is nowhere extensively cultivated. Tbe S. districts are chiefly pasture gronnd for sheep; the N. parts present a broken and hilly surface, and the W. portion is occupied by a desert called the Bolson de Mapimi. There are several silver mines in this province, and horses, mules, and wool, are exported. The principal towns are Saltillo the capital, Cohahuila or Montelovez, Santa Rosa, and Parras. Pop. 46,000.

COHOES. - 1, A vil. U. States, New York, 8 m . N. Albany on the Mohawk. near the junction of the Champlain
and Erie canals. It contains six churches, a cotton factory, a flour-mill, several saw-mills, an iron and brass foundry, and other manufactories. Pop. 2000.-2, Falls on the Mohawk, near the village, and 70 ft . high, by 300 to 400 ft . broad.

COIMBATOOR, a prov. S. Hindoostan, bounded, N. ly Mysore ; S., Dindignl ; E., Salem, and Trichinopoly ; and W. by the province Malabar. Length, N. to S .50 m. ; breadth E. to W. about 45 m .; between lat. $10^{\circ} 8^{\prime}$ and $12^{\circ} 48^{\prime} \mathrm{N}$.; and lon. $76^{\circ} 50^{\prime}$ and $78^{\circ} 10^{\prime} \mathrm{E}$. It comprises a portion of the Neilgherry Mountains, including a peak, which rises to a height of nearly 9000 ft . above sea level. The other parts consist of an elevated undulating table-land, the lowest portions of which are 900 ft . above sea level. The principal river is the Cavery, next to it, the Bhoowani, and Amravutti, with numerous smaller streams. The climate is upon the whole pleasant and healthy, although dangerous in the high lands at certain seasons. In December and January the thermometer ranges from $62^{\circ}$ to $80^{\circ}$ in the shade, and in May from $79^{\circ}$ to $97^{\circ}$. Its mineral productions comprise common salt, nitre, and iron. The soil for the most part is dry, but in the vicinity of the hills, and also in some of the S. parts, there is much low marshy ground. It is, however, generally fertile, and is well cultivated. The chief articles of produce are cotton, rice, and tobacco. The cotton cultivated is principally American, the indigenous plant, now receiving comparatively little attention. In the hilly grounds, barley, and other dry grains, with very fine vegetables and fruits, are produced. The animals are black cattle and buffaloes, a species of sheep, wild elk, bears, and tigers. The inhabitants of the low country are chiefly Hindoos, but the hilly regions are occupied by fonr different races, one of which, called the Toders, are the aborigines, who subsist by pasturing cattle. They are quite distinct in language and religion from the Hindoos; and are represented as a fine-looking race, often fair, and generally of good size and figure, but extremely rude and ignorant. Their numbers do not now exceed 500 or 600 . Pop. of prov. estimated at 700,000 .

COIMBATOOR, a tn. Hindoostan, cap. of above prov. 1. bank, and near the source of the Noil; lat. $10^{\circ} 52^{\prime} \mathrm{N}$.; lon. $77^{\circ} 55^{\prime}$ E. It occupies an elevated and dry situation, is well built, and contains about 2000 houses. There is here a musjid built by Tippoo Sultaun, who made this town one of his principal military stations. About 2 m . from the town at a place called Peruru, is a celebrated Hindoo temple known by the name of Mail Chittumbra. It is a rude piece of workmanship, destitute of elegance, but covered with a profusion of Hindoo ornaments. Some time since, an ancient tumulus or mound, near the town, was opened, and found to contain varions weapons and other articles, such as were formerly used by the Romans. Some of the most elevated summits of the Neilgherry Mountains are in the immediate vicinity of Coimbatoor. It was twice taken by the British; first in 1783, and again in 1790.

COIMBRA, a city, Portugal, prov. Beira, cap. dist. r. bank, Mondego, over which there is a handsome stone bridge and large aqueduct; 110 m. N.N.E. Lisbon, on the high road between that city and Oporto. It is built in the form of an amphitheatre, on the slope of a hill; the streets are steep, narrow, ill-paved, and dirty. There are, however, several fine buildings, amongst which are the university, at one time a royal palace, and the various colleges connected with it, the cathedral, and other churches and convents. There are, besides, several squares, adorned with fountains, and a number of churches, convents, and hospitals. The university, which is well-endowed, the only one in Portugal, and which was transferred from Lisbon for the second time, in 1537, consists of 18 colleges, and is divided into six faculties-theology, canon law, civil law, medicine, natural philosophy, and mathe-matics-the last two having been added in 1773, by the Marquis Pombal, who effected, besides, several useful reforms in the system of instruction, which, however, is still far from being complete. There are, attached to the university, a library, of about 30,000 volumes, a botanical garden, a museum of natural history, with a collection of minerals, a chemical laboratory, and an observatory, well furnished with instru ments of the best kind. The immediate neighbourhood of Coimbra is beautiful, being covered with gardens and country mansions. In the town, are manufactories of earthenware and woollen and linen cloths. Pop. 13,400.

COIN, a tn. Spain, Andalusia, prov. of, and $21 \mathrm{~m} . \mathrm{W}$. Malaga, on a gentle declivity, facing the N. The houses are tolerably built; and the town possesses numerous spacious and clean streets, and three squares-the principal having a promenade and handsome fountain in its centre. It has two large churches, two chapels, some convents, fonr schools, a town-hall, prison, storehouse, cemetery, an Episcopal palace; and, in the environs, several public walks and gardens, adorned with fruit trees, flowers, and fountains. Manufactures :linen and woollen fabrics, esparto mats, soap, paper, hempen shoes, wine, and oil. Trade :-cattle, grain, fruits, \&c. In the neighbouring hills, quarries of marble are wrought; and jasper, of all colours, is obtained; and an annual fair is held in August. Pop. 8239.-(Madoz.)

COIRE, [German, Chur, Latin, Curia], a small, but ancient and interesting city, Switzerland, cap. can. Grisons, situate fully 1800 ft . above the sea level, in a wide and fertile plain, surrounded by lofty hills, on the Plessur, about 2 m . above its junction with the upper Rhine; 97 m . E. Bern, 58 m. E.S.E. Luzern; lat. $46^{\circ} 50^{\prime} 54^{\prime \prime}$ N. ; lon. $9^{\circ} 31^{\prime} 38^{\prime \prime}$ E. (L.) It lies on the highway leading to the important alpine passes of the Spliigen and Bernardin, \&c.; and is surrounded by walls, flanked with towers, and is divided into the high and low town. The former is chiefly composed of the bishop's court, which contains several edifices, and is enclosed by a wall; within it are the old cathedral, a round-arched or Byzantine edifice, founded in the eighth century, and contain ing several remarkable tombs; the bishop's palace, a provostry, a canonry, a Capuchin monastery, the old convent of St. Lucius, in the buidings of which is a R . Catholic theological seminary, laving 12 teachers, and nearly 200 pupils. The lower town, which has been somewhat augmented, and much improved of late years, comprises nearly 400 houses, and contains St. Martin's church, a turreted edifice; the government-house, with a fine garden; St. Margaret's castle, the Schwarz-house, once the hôtel for foreign envoys; and a number of other still more ancient edifices. Among the public institutions of Coire, are the cantonal head academy, with 15 teachers, including a section for languages, a polytechnic elementary school, a normal primary school, a midwifery school, \&c., a mint-the canton coins its own money; two public libraries, a museum, three scientific societies, poor-house, bridewell, \&c. The situation of Coire makes it the centre of an important transit trade between W. Germany and Italy. It has several large trading firms, and an association of merchants, for assuring the sate transit of goods through the canton. There is one cloth manufactory in it ; also a lead and a zinc flatting-mill. The city is of Roman foundation, and the Curia Rhætorum of the lower empire. It was made a Christian bishopric a.d. 452. The doctrines of the Reformation were early and eagerly received here; and the present poputation, about 5000 , is nearly all Calvmistic.

COJUTEPEKE, a tn. and lake, Central America, Guatimala. The town, $15 \mathrm{~m} . \mathrm{S}$. San Salvador, has a pop. estimated at 15,000 ; and the lake, at some miles distance from it, presents a curious phenomenon, in the dark greenish hue which its waters assume after a gale, when fish are caught with great facility, and are cast ashore dead in considerable quantities.

COKALAHISKIT, or Bitter-root Fork, a river, U. States, Oregon, rising in some offsets of the Rocky Mountains, about lat. $46^{\circ} 24^{\prime} \mathrm{N}$.; lon. $113^{\circ} 56^{\prime} \mathrm{W}$. It flows S.E. for about 50 m ., then N.E. for other 50 m ., whence it flows N.W. in a very winding course, for 200 m . direct distance, and falls into Lake Kalluspelm, or Pendoreilles; lat. $47^{\circ} \mathrm{N}$.; lon. $115^{\circ} 24^{\prime} \mathrm{W}$. On leaving the lake the river assumes the name of Clark, or Flathead; and, ultimately, after a very circuitous course, and forming several falls, unites with Lewis river in forming the Columbia or Oregon river.

COKER, two pars. Eng. Somerset :-1, (East) ; 2140 ac. Pop. 1334.-2, (West) ; 1100 ac. Pop. 1046.

COL ['neck,'] a French name, used as a prefix to numerous passes of the Alps, as Col de Tende. For the position and height of the more important ones, see Alps, p. 104.

COLABAH ISLAND. See Bombay.
COLAGAL, a tn. Hindoostan, presid. Madras, prov. Coimbatoor, 31 m. E.S.E. Seringapatam; lat. $12^{\circ} 13^{\prime}$ N.; lon. $77^{\circ} 14^{\prime} \mathbf{E}$. It consists of large white, tiled cottages, uni-
formly built, and inhabited by weavers.

COLAIR, a lake, IIindoostan, N. Circars, Masulipatam, 5 m . E. Ellore; lat. $16^{\circ} 36^{\prime} \mathrm{N}$.; lon. $81^{\circ} 22^{\prime} \mathrm{E}$. It lies in a natural hollow, is of an oval shape, about 22 m . long, by 7 to 12 broad, and formed chiefly by the overflowings of the Krishna and Godavery. It has several islands, which are annually covered when the lake swells during the wet season, and on which good rice crops are produced; but when the periodical rains fail, it dries up completely. By the river Ooputnair the lake communicates with the Bay of Bengal, distant about 20 m .

COLAN, par. Eng. Cornwall; 1790 ac. Pop. 217.
COI $\triangle$ POOR, a tn. S. Hindoostan, prov. Bejapoor, cap. rajaliship of same name, 130 m . S. Poonah; lat. $16^{\circ} 19^{\prime} \mathrm{N}$. ; lon. $74^{\circ} 25^{\prime} \mathrm{E}$. It is situate in a valley, between a curved range of hills, by which it is protected on three sides. It is also guarded by a fort, but of no great strength. The rajahship is situate partly below the Ghauts in the Concan, and partly in the elevated land within the Ghauts; but is so intermingled with the possessions of the other Maharatta chiefs, and with those of the British Government, that its precise limits cannot be easily indicated.

COLAR, a tn. Hindoostan, in Mysore, 39 m . E.N.E. Bangalore, 112 m. N.E. Seringapatam ; lat. $13^{\circ} 10^{\prime}$ N.; lon. $78^{\circ} 13^{\prime} \mathrm{E}$. It is surrounded by a mud wall, and defended by a stone fort ; and has 700 houses, a mosque, and a Mahometan college, to which is attached a musical conservatory; the tomb of Feth-Mahomet, begun by himself in 1749, and finished by his son Hyder Ali; and some mannfactures of cotton cloths. In the environs are many fine gardens highly cultivated. Colar was taken by the British in 1768, and retaken soon after by Hyder. Pop. 3850.

COLBERG, or Kolberg, a fortified seaport tn. Prussia, prov. Pomerania, on the Persante, and about 1 m . from its moutli; lat. $54^{\circ} 9^{\prime} \mathrm{N}$. ; lon. $15^{\circ} 36^{\prime} \mathrm{E}$. It is surrounded with ditches, which can be at any time filled with water from the Persante. It contains five churches, a town-hall, a gymnasium, house of correction, and an old castle, formerly the residence of the dukes of Pomerania, now an asylum for destitnte females of respectable character and family. The town is well supplied with water. It has some manufactures, and considerable fisheries of salmon and lampreys. There are salt springs in the vicinity, which yield from 1500 to 1600 tons of salt annually. In 1806-1807, it was bravely defended against the French. Pop. (1846), 9765.

COLBY, par Eng. Norfolk; 1000 ac. Pop. 346.
COLCHAGUA, a prov. Chili; bounded, N. by Santiago, E. the Andes, S. prov. Maule, and W. the Pacific; length, about 150 m ; breadth, 30 to 33 m . It is fertile in corn, and produces cattle, horses, and mules, in great numbers. There are some gold and copper mines ; and in a part of the province are some hot baths, esteemed highly efficacious for cutaneous diseases and wounds.

COLCHESTER, a parl. bor. and river-port, England, co. Essex, about 50 in . N.E. by E. London, a station on the E. Counties Railway. The greater portion of the town is situate on the summit, and N. and E. sides of an eminence rising from the river Colne; it is well-built, paved, and lighted with gas, and amply supplied with water. Many of the streets are spacious, and the principal one, which runs nearly E. and W., contains a number of elegant shops and handsome residences. The town was formerly surrounded by walls, in which were four principal gates, but both have now nearly disappeared. On an elevated spot to the N. of the Highstreet are the remains of an old castle, said to have been founded by Edward the Elder, from which an extensive and beautiful view is obtained. Besides the parish churches, there are places of worship for various descriptions of dissenters, a free grammar-school, with exhibition, founded by Henry VIII.; two charity schools, and others upon the national and Lancasterian systems ; the Society of Friends have also a school for children, with a library attached. The charities are numerous; amongst them are a hospital founded by James I ; another, called the Essex and Colchester hospital ; several alms-houses, and a great many benevolent societies and institutions, on limited scales, and for special purposes. There are literary, philosophical, medical, musical, botanical, and horticultural societies, and a neat theatre. Woollen manufactures were formerly carried on here to a great extent, particularly the baize and serge trade, but are now
entirely extinct. The woollen was superseded by the silk trade, which is now also, in its turn, on the decline. Many of the inhabitants find employment in the oyster fishery of the river, which has been long celebrated.

Colchester was constituted a bonding port in 1808, but its foreign imports are inconsiderable, and are not increasing. The principal articles of foreign import are wines, oil-cake, and timber. The coasting trade, however, is pretty extensive, especially with London and the N. counties of England. The principal exports are corn, malt, and oysters; in the latter traffic a great number of snall craft are employed, nearly all the oysters being carried to the London market. The Colne is navigable, for vessels of 150 tons, to Hythe, a short distance down the river, where is the custom-house, a spacious quay, commodious warehouses, and bonding yards.

Colchester is a place of high antiquity, there bcing no place in the kingdom where so great a quantity and variety of Roman remains have been found as here. It suffered severely during the war between Charles I. and his parliament, having then-1648-sustained a siege of 11 weeks' duration, conducted by Fairfax. It has returned, with some intermission, two members to the House of Commons since the time of Edward I. Pop. of tn. and liberties (1841), 17,790.

COLD, three pars. England:-1, (Ashton), Gloucester; 2310 ac. Pop. 414.-2, (Higham), Northampton; 1660 ac. Pop. 388.-3, (Norton), Essex; 1570 ac. Pop. 118.

COLDINGHAM, par. Scot. Berwick; 57,600 ac. P.2746.
COLDITZ, a tn . Saxony, circle of, and 25 m . S.E. Leipzig, cap. dist. of same name, on the Mulde, here crossed by a bridge. It contains two churches and a castle, and has a worsted, and a paper mill, dye-works, bleachfields, and manufactures of linen, paper, and earthenware. Pop. 3360. Area of dist., 58 geo. sq. m. ; pop. 19,000.

COLDRED, par. Eng. Kent; 1630 ac. Pop. 157.
COLDRIDGE, par. Eng. Devon; 2190 ac. Pop. 677.
COLDS'TREAM, a border tn., Scotland, co. Berwick, 1. bank, Tweed, 43 m. S.E. Edinburgh. It is irregularly luilt, and, notwithstanding its proximity to England, entirely Scottish in its general character and appearance. There is a great cattle market held here on the first Thursday of cach month, and a corn market cevery Thursday. The town contains a parish church, two Presbyterian dissenting chapels, three subscription libraries, and various educational establishments. The ford of Coldstream through the Tweed was a favourite point in ancient times with the invading armies of England and Scotland, being the passage by which they alternately made their way into the countries of each otber. By this ford, Edward I. entered Scotland in 1296 with his army; and by this ford, also, the Covenanters entered England in 1640. A handsome bridge of red freestone, of five arches, now spans the river at this point, and forms one of the greatest thoroughfares between the two kingdoms. General Monk resided here for some time in 1659, and, during his stay, raised a regiment which he called the Coldstream Guards, a name which the corps still retains. Pop. 2020.

COLE-Orton, a vil. and par. England, co. Leicester; 1750 ac . The village, situate at the extremity of Charnwood forest, 2 m. E. Ashby-de-la-Zouch, has a handsome church, a national school, and an hospital for six widows. Pop. 601.

COLEBROOKE, par. Eng. Devon; 4200 ac. Pop. 878.
COLEFORD, a tn. England, co. of, and 17 m . W.S.W.
Gloucester. It is beautifully situate on an acclivity, and consists of three principal streets, ill-kept; houses generally wellbuilt of stone; supply of water abundant, but streets not lighted with gas, although there are gas-works in the town. It has a church, and chapels belonging to Wesleyans, Baptists, and Independents; a market house, and two national schools. Mining and quarrying are carried on extensively in the adjacent forest of Dean; coal, iron, and stone being aburdant. Pop. 2208- (Local Correspondent.)-2, A hamlet, England, co. Somerset, $5 \frac{1}{2} \mathrm{~m}$. W. by N. Frome. It has a chapel belonging to the Established church, places of worship for Independents and Wesleyans, and a national school. In the vicinity is a small coal mine. Pop. 825.

COLEMORE, par. Eng. Hants; 1270 ac. Pop. 144.
COLERAINE, a maritime tn. and parl. bor. Ireland, co. Londonderry, r. bank, Bawn, about 4 m . from its influx into the sea, 47 m . N. W. Belfast. It is a large, and, on the whole,
well-built town, consisting of five principal streets, a spacious square, called the Diamond, formerly used as a market-place; and several smaller streets. On the opposite side of the river, is the village of Killowen or Waterside, with which Coleraine is connected by a handsome bridge. It has two parish churches, two R. Catholic chapels, three chapels for Presbyterians, and one each for Methodists, Baptists, and Independents. The new market-place is situate on the E. side of the town, and is commodiously fitted up for the various descriptions of agricultural produce brought there for sale. This town has been long celebrated for its manufacture of a fine kind of linen, known by the name of 'Coleraines.' The other manufactures carried on here are those of cotton, bard and soft soap, bleaching salts, leather, and paper. There is also a large ale brewery in the town. The general trade of the port is considerable, chiefly in grain, meal, pork, salmon, butter, linen cloth (Coleraines), potatoes, and whisky. The imports are timber, iron, barilla, ashes, coal, and salt. There is here a custom-honse, bonding stores, and a timber yard. An extensive salmon fishery is carried on at Crannagh, on the Bawn, which yields nearly 200 tons of fish annually, the whole of which is packed in ice, and exported to Liverpool, and other distant markets. Another fishery on the same river, called the Cutts, yields about 80 tons of fish yearly. Market day Saturday, and several fairs. Coleraine sends one member to the House of Commons. Registered electors (1850), 994. Pop. 6255.

COLERNE, par. Eng. Wilts; 3620 ac. Pop. 1209.
COLEROON, a river, Hindoostan, Carnatic prov. Tanjore, the N. branch of the Cavery, from which the others branch off, near Trichinopoly. It forms the N. boundary of Tanjore, and, after a N.E. course of 80 m ., falls into the Bay of Bengal at Devicotta, $120 \mathrm{~m} . \mathrm{S}$. by W. Madras. It is very shallow.

COLESBERG, a dist. S. Africa, Cape Colony; bounded, S. by Cradock and Graaf-Reynct, E. by Stormberg river, and N. by the Orange river, which separates it from the Hottentot country ; area, $11,654 \mathrm{sq} . \mathrm{m}$. It occupies an elevated situation, and is well adapted for the rearing of stock. It is, however, very deficient in water, and, in the dry season, breeders of stock are obliged to remove from place to place. Pop. (1845), 8828.—The town of Colesberg, in lat. $30^{\circ} 40^{\prime}$ S.; lon. $25^{\circ} 30^{\prime}$ E., has a heavy-looking Dutch church, a Wesleyan chapel, and a free school. Pop. 500.

COLESBORNE, par. Eng. Gloucester; area, 2120 ac. Pop. 256.

COLESHILL, a market tn. and par. England, co. Warwick; 6200 ac. The rown, 7 m . E. by N. Birmingham, r. bank, Cole, here crossed by a handsome bridge of six arches, consists principally of one long street, from the centre of which another one branches off; houses well built; water abundant. It has a spacious church, and places of worship for Wesleyans, Independents, and R. Catholics; a free grammar, and several other schools. The only other public buildings are a station on the Midland Railway, and the workhouse, part of which is used as a prison. Pop. 2172.

COLESHILL, par. Eng. Berks; 2520 ac. Pop. 386.
COLESSEAH, a small seaport tn. and vil., N.W. coast, isl. Socotra, Arabian Sca. It is situate at the gorge of a valley, and consists of a few miserable houses, some Cadjan huts, and a small building which serves as a mosque. The inhabitants seem wretchedly poor. They have a few fishingboats, which also scrve for watering the ships that put in here. Dragon's blood, aloes, and ghee, are shipped in small quantities. A few fowls, and some starved-looking sheep may be obtained, but no other supplies. The people, who are all Arabs, bear, even with their own class, the character of being bigoted, selfish, and avaricious to a proverb.

COLGONG, a tn. Hindoostan, presid. Bengal, prov. Babar, near r. bank, Ganges, 102 m. N.W. Moorshedabad. In its vicinity chalk quarries are wrought. In 1809, it had 400 houses.

COLICO, a vil. Austrian Italy, gov. Milan, prov. of, and N.E. side of Lake Como, 21 m . W.S.W. Sondrio. It contains two churches, and manufactures paper. The steamer on the lake calls here daily. The roads over the Spligen and Stelvio unite at Colico. In consequence of the draining and cultivating of the extensive marshes in its vicinity, which formerly exhaled pestilential miasmata, the population has, in a very few years, nearly doubled. Pop 2700.

COLIJNSPLAAT, commonly Cooltuesplatat, a vil. Iolland, prov. Zeeland, isl. N. Beveland, 19 m . N.W. Bergen op-Zoom. It lies on the N. shore, and is the most important place on the island. It is well built, planted with trees, and has a court house, Reformed church, school, and harbour, whence small vessels ply to Middelburg and Rotterdam, and whence there is a regular ferry to Zierikzee. It has a fair in July. Pop. 1688.

COLIMA, a tn. port, and dist. Mexican Confederation state, Guadalajaris. The town is situate in a fertile plain; lat. $19^{\circ} \mathrm{N} . ; \operatorname{lon} .103^{\circ} 7^{\prime} \mathrm{W}$., near the volcano of the same name, which rises to a lieight of $12,003 \mathrm{ft}$. above the level of the sea. It is a pretty large town, and has a considerable demand for various articles of trade, such as linens, cotton goods, woollens, and hardware. Pop. 30,000.-The Port, which is about 30 m . S.S.W. from the city; lat. $18^{\circ} 33^{\prime} \mathrm{N}$.; lon. $103^{\circ} 35^{\prime}$ W., has a good anchorage, and is well protected against the S . winds prevalent during the rainy geason, but on account of a very considerable lake of stagnant water in its immediate neighbourhood, is very mhealthy during the summer. Infested by myriads of mosquitos and sand flies; even in the dry season it is nearly impossible to reside there. This port has bcen open to foreign commerce for several years, but has not been able to make much progress. The port itself has not a single house, and the tirst adjacent town is Colima, formerly the capital of the territory bearing the same name, now embodicd with the department of Michoacan, -The district is situate on the shores of the Pacific, where it oecupies a coast line of about 100 m . Its surface is, generally speaking, level, though presenting several high hills, including the volcano of Colima, but with these exceptions no part of the country rises more, probably, than 1000 ft . above the level of the sea. The climate is consequently hot, and as the soil is fertile, it yields many tropical products, particularly cotton of excellent quality. Nearly all the inhabitants are Indians, who, at their own request, have a Government independent of that of Xalisco, to which they formerly belonged.

COLINSBURGH, a vil. Scotland, co. Fife, $8 \frac{1}{2} \mathrm{~m}$. S.E. by S. Cupar. It has a Dissenting meeting-house, a tannery, weekly corn market, and two annual fairs. Pop. 482.

COLINTON, par. Scot. Edinburgh; area, 8 sq. m. Pop. (1851), 2676.

COLKIRK, par. Eng. Norfolk; 1310 ac. Pop. 462.
COLL, a small isl. W. coast, Scotland, off Mull, co. Argyle, one of the Hebrides; lat. $56^{\circ} 49^{\prime} \mathrm{N}$.; lon. $6^{\circ} 30^{\prime} \mathrm{W}$. , about 12 m . long, and from 3 to $3 \frac{1}{2} \mathrm{~m}$. broad, with about 60 m . of bold, rocky coast. It has two bays, one on the S . side called Loch-Breacacha, which runs about a mile into the land, and affords tolerable anchorage in summer; the other, called Crosspool, a little further W. is useless, being full of sunken rocks, and much exposed to the S . and S.W. winds. The only harbour worthy of notice is at Arinangour, about the middle of the island. There are several sinall fresh water lakes, but no rivers. On the N.W. side are three mineral springs. The surface is rugged and uneven, but its highest summits do not exceed 300 ft . A vein of lead ore is known to exist in the W. end of the island, but it has never been wrought. A great portion of Coll, particularly on the S.E. side, is composed of barren moor, incapable of cultivation or improvement. There are, however, many small spots of remarkable fertility, and some tracts of light and sandy soil along the N.W. coast, which are tolerably productive. The whole arable or meadow land is estimated at 4500 ac. The black cattle reared in Coll are reckoned of superior quality. Rabbits abound. The inhabitants are said to be in general intelligent and enterprising, but such character seems hardly consistent with their neglect of their fisheries, which they leave to be prosccuted by fishermen from Abcrdeenshire, who come to the island yearly and carry off immense quantitics of ling. Gaelic is the universal language of the island. The remains of several Danish forts and religious houses are still visible. Stone coffins also have been found, together with coins, and other relics of antiquity. Pop. (1851), 1109.

COLLACE, par. Scot. Perth, 5 sq. m. Pop. 702.
COLLARES.-1, A tn. and par. Portugal, prov. Estremadura, near the sea, a little N.E. of Cape Rocea, 10 m . W.N.W. Lisbon. The valley around is famous for its fruit, and an excellent wine resembling Burgundy. Pop. 1744.2, A tn. Brazil, prov. Para, on an island in the mouth of the

Vol. I.

Tocantins, separatcd from the mainland by a narrow channel, 15 m . N. by W. Para or Belem. It is an old place, and contains a parish church, but has fallen very much into decay. Its district is very fertile, yiclding in abundance excelleut coffee and cacao.

COLLE, several towns, Italy, particularly:-1, A tn. and com. Naples, prov. Sannio or Molise, dist. of, and 17 m . S.S.E. Campobasso, with several churches, and an annual fair. Pop. 4361.-2, Colle d'Anchise, a tn. and com. Naples, dist. of, and 7 m. S.W. Campobasso, agreeably situate on a hill. It contains several churches, two abbeys, and an hospital. A kind of indigo is made from plants which grow in the neighbourlood. Pop. 1768.-3, A tn. and com. Tuscany, prov. of, and 22 m . S.S.W. Florence, on the Elsa. It is divided by a stcep ridge into two distinct portions, the high and the low town. The former is the larger and better built portion, containing the principal buildings and public offices; the latter is chiefly occupied by manufacturing establishments. Colle possesses a cathedral and a castle, and is the see of a bishop, and scat of a court of justice. It has several manufactures, but the chief is paper, for which it has long been celebrated. The commune enjoys a salubrious climate, has a fertile soil, and produces much grain, wine, olive oil, and silk. Pop. 6231.

COLLESANO, a tı. and com. Sicily, dist. Cefalu, 37 m . E.S.E. Palermo. In its neighbourhood are found green jaspers and agates. Pop. 3000 .

COLLESSIE, par. Scot. Fife, 8 m. by 4. P. $(1851), 1520$.
COLLETORTO, a tn. and com. Naples, prov. Molise or Sannio, dist. of, and 10 m. S.S.E. Larino, on a lill. Pop. 2895.

COLLEY-Weston, par. Eng. Northampton; 1690 ac Pop. 434.

COLLIANO [anc. Cosilinum], a tn. and com. Naples, prov. Principato Citra, dist. of, and 9 m . N.E. Campagna. It stands at the foot of a hill, and contains two churches and an hospital. Pop. 3187.

COLLIER BAY, Australia, N.W. coast, between Cambden Sound and King's Sound; lat. $16^{\circ} 7^{\prime}$ S.; lon. $124^{\circ} 7^{\prime}$ E. It is 20 m . wide at its entrance. The tide rises in this bay 36 ft .

COLLIGAN, par. Irel. Waterford; 3785 ac. Pop. 1084.
COLLIN, Kolin, or Neu Kolin, a tn. Bohemia, 35 m . E. by S. Prague, picturesquely situate on an elevated rock, 1. bank, Elbe, and on the railway from Prague to Vienna. It is well built, is surrounded by a wall, and contains a handsome gothic parish and several other churches, a townhall, a school, and an old inhabited castle, to which are attached pleasure and botanic gardens. It has manufactures of cotton and potash, and has a considerable trade in carnelians, garnets, topazes, \&c., found in the neighbourhood. Between the town and the castle of Chotzemitz, Frederick the Great was defeated by the Austrians under General Daun, June 18, 1757. Pop. 5750 , among which are numerous Jews.

COLLINGBOURNE-Ducis, a par. and vil. Eig. Wilts; 3570 ac. Pop. 518.

COLLINGBOURNE-Kingston, a par. England, Wilts; 7160 ac. Pop. 933.

COLLINGHAM, three pars. Eng.:-1, York, W. Riding; 2200 ac. Pop. 324.-2, (Vorth), Notts; 1820 ac. Pop. 911.-3, (South), Notts ; 3220 ac. Pop. 721.

COLLINGTON, par. Eng. Hereford; 1120ac. Pop. 160.
COLLING'I'REE, par. Eng. Northampton; 1190 ac. Pop. 232.

COLLINSTOWN, a market tin. Ireland, co. Westmeath, $4 \frac{1}{2} \mathrm{~m}$. S.E. Castle-Pollard, S. bank, Lough Lane. It contains a market house, and a R. Catholic chapel. Market on Saturday, and fairs twice annually.

COLL10, a vil. Austrian Italy, gov. Milan, prov. of, and 21 m. N.N.E. Brescia, on a lofty hill called Moniva, near the Mella. It contains a parish church, and in the neighbourhood are iron mines, blast furnaces, foundries, and a quarry of grcen marble with a red ground. Yop. 2256.

COLLIOURE [anc. Cocoliberis, Illiberis], a scaport tn. France, dep. Pyrénées-Orientales, 15 m . S.E. Perpignan; agreeably situate on a hill slope on the Mediterranean. Its streets are crooked, houses ill-built, and it is defended by several forts, of which that specially named the castle is built on the summit of a scarped rock washed by the sea. There is here a school of navigation. The port is only suitable for small vessels. Some trade is done in excellent wines,
sardines, salt fish and ortolans. Corks are manufactured, and the tunny and sardine fishery is prosecuted. The Roman ambassadors landed at Collioure, on their way to Ruscino, to solicit assistance against Hannibal. In 1793, it was taken by the Spaniards, and retaken by the French in 1794. Pop. 3073.

COLLO, a tn. Algeria, prov. Constantine, on a bay of same name, 62 m . W. Bona. It was taken possession of by the French in 1843. Pop. 2500.

COLLOBRIERES [Latin, Colluberia], a tn. France, dep. Var, 20 m . E.N.E. Toulon. It has manufactures of corks, and an annual fair. Pop. 1890.

COLLON, a tn. and par. Ireland, cos. Meath and Louth; 8813 ac . The town is beautifully situate on the slope of a hill, about 7 m . W.N.W. Drogheda, and consists of two principal streets, straight and well-kept. The houses are well-built, slated, and neat; water abundant. It has a bandsome parish church, a R. Catholic chapel, and Methodist mecting-house; several schools, a dispensary, and a lending library. The manufacture of linen has of late been revived, and considerable quantities are sent to Belfast. There are also corn-mills, a bleachfield, and a nursery garden in the neighbourhood, which, with weaving and agricultural labour, afford employment to the great body of the inhabitants. Pop. 3275.(Local Correspondent.)

COLLOONEY, a market and pest tn. Ireland, co. of, and 6 m . S. Sligo, on the road to Dublin, consisting of one long sireet, the houses of which are partly slated and partly thatched. It contains a handsome parish church, a R. Catholic chapel, a linen hall, dispensary, two schools, a large bleaching establishment, and an oatmeal mill. Pop. 651.

COLLUMPTON, a tn. Eng. See Cullompton.
COLMAN, par. Irel. Tipperary; 2738 ac. Pop. 719.
COLMA NSWELL, par. Irel. Limerick; 2811 ac. P. 924.
COLMAR, or Kolmar [anc. Columbaria], a city, France, cap. dep. Haut-Rhin, 238 m . E. Paris, 39 m . S.S.W. Strasburg, on the railway thence to Basel, at the confluence of the Lauch, and a branch of the Fecht, which join the Ill 2 m . below the town ; lat. $48^{\circ} 5^{\prime} \mathrm{N}$.; lon. $7^{\circ} 22^{\prime} \mathrm{E}$. It is agreeably situate about 2 m . from the foot of the Vosges Mountains. The streets are irregular, but the houses are, in general, well built. Its fortifications were destroyed in 1673 , and it is now surrounded by boulevards, and entered by three gates. The only public square of importance is that in front of the cathedral, where a weekly market is held, attended by the country people from more than 50 surrounding villages. The public buildings are not remarkable; they consist of the cathedral, built in 1363 ; the palace of justice, hotel de ville, college, containing the public library with 36,000 volumes, and some pictures by Schön, Albert Durer, \&c.; the deaf and dumb institution, the civil and military hospital, theatre, college, church, built by the Jesuits in 1750 ; the church of the Dominicans, with its much admired nave, now used as a corn-market; the church of the Trinity, now occupied by the Protestants ; and the museum, where, among other curiosities, a remarkable aërolite is preserved, which fell near Ensisheim in 1492, and originally weighed about 284 lbs. The portion here weighs about 142 lbs .

Colmar is the seat of a royal court for the departments Haut-Rhin and Bas-Rhin, court of first resort and of commerce; and has a communal college, synagogue, and departmental nursery ground. It has manufactures of printed goods, calicoes, silks, handkerchiefs, house paper, ribbons, and hosiery, besides cotton-spinning mills, tanneries, and chamois leather-works. It has a considerable trade in the manufactured goods of Alsace, and in iron, grain, wine, plants, madder, \&c.; and in colonial produce, with which it supplies Switzerland. In 1552 , Colmar was surrounded by walls and towers, and made an imperial free town. In 1632, it was taken by the Swedes, who kept it two years. It was united to France in 1697, by the peace of Riswick. Pop. 18,200.

COLMENAR, several tns. Spain :-1, A tn. Andalusia, prov. of, and 16 m. N. Malaga, 12 m . W.S.W. Alhama, on a small hill; houses generally well-built; streets well-paved. In a square, are a large and handsome prison. It also has a parish church, chapel, school, storehouse, and cemetery. The manufacture of brandy, oil, wine, and leather, and curing of raisins, are carried on. Trade:-dried fruits, grain, brandy, and hardware. Pop. 5930.-2, Culmenar de Oreja, a tn.

New Castile, prov. of, and 26 m . S.E. by E. Madrid, in an extensive plain. The streets are indifferent; and there are two squares, one of which contains the prison. It also has a parish church, town-house, two hospitals, several schools, a storehouse, and cemetery. Manufactures :-common cloth, esparto mats, wine, and oil. Barley is exported to a considerable extent. Pop. 4484.-3, Colmenar Viejo, a tn. New Castile, prov. of, and $20 \mathrm{~m} . \mathrm{N}$. Madrid, in a hilly region. The streets are regular; and the public square is spacious and handsome, containing the town hall, prison, and other wellbuilt edifices. The town possesses, besides, a parish church, numerous chapels, a college, Latin, and several primary schools, varions hospitals, a sturehouse, and cemetery. Manu-factures:-woollen fabrics, leather, pottery-ware, wine, and oil. Trade :-cattle, grain, honey, wax, and wool. A yearly cattle fair in August. Pop. 3728.

COLMONELL, par. Scot. Ayr ; 56,800 ac. Pop. 2801.
COLMWORTH, par. Eng. Bedford; 2310 ac. Pop. 575.
COLN, three pars. England Gloucester:-1, (Rogers), 1480 ac. Pop. 137.-2, (St. Aldwins), 3420 ac. Pop. 428. -3, (St. Denis), 2430 ac. Pop. 200.

COLN-BROOK, a tn. and chapelry England, co. Bucks, r. bank, Colne, 18 m . W. by S. London, and within 4 m . of the Slough station on the Great Western Railway. It consists principally of one long, narrow, and generally straight, street; the greater portion of the houses old, chiefly of brick and wood, roofed with tiles, presenting rather a mean appearance. Water is plentiful and excellent. The church is a neat little structure, lately erected, in the modern Gothic style. There are, besides, three chapels, belonging to Baptists, Independents, and Primitive Methodists; and two schools. In the immediate neighbourhood are extensive paper-mills. Pop. (1841), 1050.-(Local Correspondent.)

COLNE, three rivers, England :-1, cos. Hereford and Middlesex, rising about 9 m . N.W. St. Albans, flowing S.E., and then S., and joining the Thames at Staines, after a course of about 30 m ., past St. Albans, Watford, Rickmansworth, Uxbridge, W. Drayton, and Colnbrook.-2, co. Essex, rising near the N. of the co. about 9 m. N. W. IIalstead; and, after a S.E. course of about 35 m ., past Halstead and Colchester, falling into the German Ocean, by a broad estuary, separated from the Blackwater by the island Mersea.-3, co. Gloucester, rising near Cheltenham, and joining the Isis, near Lechlade, after a S.E. course of about 25 m .

COLNE, five pars. Eng.:-1, Huntingdon, 1980 ac. Pop. 544.-2, (Earl's), Essex, 2910 ac. Pop. 1385.-3, (Engain), Essex, 2020 ac. Pop. 329.-4, (Wakes), Essex, 1430 ac. Pop. 209.-5, (Whyte), Essex, 1730 ac. Pop. 419.

CULNE, a market tn. England. co. of. and 31 m . S.E. Lancaster. It consists of one princıpal street, running E. and W., almost in a straight line. with several subordinate ones diverging from it, N. and S.; houses of stone, but only some of them good buildings; well supplied with excellent water; lighted with gas, and presenting altogether a thriving appearance. Besides the parochial church-a spacious old building, there are six chapels belonging to Wesleyans, Independents, Baptists, and other Dissenters. The most remarkable edifice is the Piece-hall, in the Elizabethan style, originally erected for the weekly display of woollen goods; but now only open at the annual fairs. There are four principal, and several minor schools, as also a mechanics' institution. The chief manufactures are those of mousseline de laine and calicoes, the former carried on to a considerable extent, and sent principally to Glasgow for printing. The poorer classes are chicfly employed in weaving. Colne was one of the earliest seats of the woollen manufacture in England, having had a fulling mill in the time of Edward II. The celebrated Archbishop Tillotson received the rudiments of his education at the free grammar-school of Colne. Pop. of township, 8615. -(Local Correspondent.)

COLNEY, par. Eng. Norfolk; 750 ac. Pop. 110.
COLOCZA, or Kalocsa, a tn. Hungary, circle of, and 68 m . S. Pesth, in a marshy plain, l. bank, Danube. It is the seat of an archbishop, and contains a cathedral, a lyceum, a theological seminary, a gymnasium, a R. Catholic grammarschool, a Piarist college (a species of Ignorantines), and an ancient castle, in which the archbishop resides, and which contains a library of 30,000 volumes, and some valuable MSS. The town was at one time fortified, and was a place of con-
siderable note, but was much injured by the Turkish war. Cattle and horses are bred to some extent in the neighbourhood, and it has a pretty active fishery. Pop. 6300.

COLOGNA, a tn. Ausirian Italy, gov. Venice, prov. of, and 20 m . S.E. Verona. It is surrounded by ruined walls and ditches. It has several churehes, and considerable manufactures of silk, leather, and cordage, with some trade in wine and olives. Silkworms are reared in the environs. Pop. 6200.

COLOGNE, or KöLn, a gov. Rhenish Prussia, bounded, N. by gov. Diisseldorf, E. Arnsberg, S. Coblentz, and W. Aachen, or Aix-la-Chapelle; length, E. to. W., about $45 \mathrm{~m} . ;$ breadth, N. to S., 27 m. , area, 1158 geo. sq. m. It lies wholly in the valley of the Rhine, which traverses it in a N.N.W. direction, receiving on its l. bank the Mühlenbael, Nassel, and Erft ; and on its r. bank, the Sieg, Strunderbach, and Wipper. The government is divided into 10 eireles, of which that of the same name, containing the capital, has an area of 132 geo. $\mathrm{sq} . \mathrm{m}$. The E., W., and S. parts of the government are hilly. The Eifel advances into it as far as the district of Bonn, where sevcral of its highest points and most remarkable volcanic cones appear. The N. part, on the l. bank of the Rhine, is flat, and has searcely a single hill. The soil is generally fertile-more especially the circles of Cologne, Bonn, and Rheinbach, and the valleys watered by the Sieg, Wipper, and Agger. The best wooded cirele is Wipperfurt, the most barren Gummersbach, and in Euskirchen there is a good deal of heath. Both agriculture and manufactures have made considerable progress. Pop. (1846), of gov., 484,593; of circle, including city, 139,971 .

COLOGNE [German, Köln], a well known city, Prussia, 1. bank, Rhine, cap. of Rhine prov., and of circle of same name. It stands close upon the river, in the form of a crescent, and is connected with the town of Deutz, on the opposite side, by

1. Cathedral. 3. Townhall. 4. Pownhali.
2. Pulace of Justice.
3. Arsenal.
4. Ch. of S. Maria im Capitul.

in the thoroughfares. Of late, however, Government has paid some attention to the cleanliness and sanitary condition of the town generally, by opening up public walks, and by widening and paving the streets. It contains 27 ehurches, eight chapels, a synagogue, and many public buildings, including the town-house, a remarkably fine old building; the hall of justice, the archiepiscopal palaee, the Gürzenich, finished in 1474, in the large lower hall of which, now used as a store-house, several diets of the empire were held, and here the carnival halls are given; the Tempelhans, a Byzantine building, used now for public meetings respecting navigation, industry, and commerce. But the object of greatest interest in the town is the cathedral, begun in 1248, one of the finest and purest Gothic monuments in Europe. It is in the form of a cross; its entire length is about 511 ft ; ; breadth 231 ft ; the roof rests on 100 columns, of which the four centre ones are 30 ft . in circumference. The choir, however, is the only part finished ; it is 161 ft . high, and, with its pillars, arches, chapels, and its superb painted glass windows, presents one of the finest sights conceivable. In 1842, the completion of this magnificent edifice was commenced, after designs by Zwirner, under the auspices of the King of Prussia. and the works have been vigorously proseented since that time. The estimated cost of the completion is $£ 750,000$. The other remarkable churehes are those of St. Peter, in which is an altar-piece of the crucifixion of that saint, by Rubens, who presented it to this church, in which he was baptized; St. Mary, on the capitol, occupying the site of the capitol of the ancient Roman city, and dating from about the year 1000, with some good stained glass windows; the Apostles' church, in the Neumarkt, built about the year 1200, a perfect specimen of the Romanesque style, having a singularly elegant and picturesque exterior ; the church of St. Ursula, filled with the bones of the 11,000 British virgins destroyed here on their way to Bretagne, under the guidance of St. Ursula; the church of the Jesuits, or Maria Himmelsfahrt, dating from 1636, overloaded with gorgeous decorations of marble sculpture, \&c.; and St. Gereon's, which, like the church of St. Ursula, is lined with bones, not, however. of virgins, but of the Theban legion of martyrs, slain, according to tradition, during the reign of Diocletian; this is one of the finest, as well as most ancient churehes in the city. In the accompanying view, the harbour tower is seen dark in the fore gronnd; the chureh on the right is that of the Jesuits, or Maria IImmelsfahrt; that in the centre is the nave of the eathedral, and that on the extreme left is the chureh of St. Mary, on the capitol. The city contains two gymnasia-one for R. Catholies, the other for Protestants; the latter has a library of 33,000 volumes ; an observatory, and botanieal garden; a normal school, a public library, a theatre, several hospitals, a school of design, a museum, containing an interesting collection of pictures of the school of Cologne, and of Roman antiquities found in and about Cologne; and an arsenal, in which is a great varicty of ancient arms and armour.

The manufactures are considerable, and consist ehiefly of cotton yarn, woollen stockings, bonnets, silks, velvets, tobacco, soap, hats, lace, and the celebrated eau de Cologne [Gemman, Kolnisches Wasser], of which there are no fewer than 30 different manufacturers, who export, annually, $1,500,000$ bottles to all parts of the world. There are, besides, some tanneries, distilleries, and 15 sugar refineries. Its eommerce is considerable, and, in consequence of the opening of the Rhine in 1837, the navigation of which had been closed by the Duteh, is rapidly improva bridge of boats. It is snrronnded by walls, which form a circuit of several mikes, and present perfect examples of the fortifieations of the Middle Ages. Outside the walls are fine gardens and walks. In the older quarters of the town, the houses bear the impress of the Middle Ages-the streets are dark, narrow, and filthy, pools of dirty water being left to stagnate
ing; it has a good port on the Rhine, and an ex-
ilway communication with the interior of Germany and with Antwerp. It is the principal entrepot of the corn, wine, and oil trade on the river, and has active commercial relations with the Netherlands, Germany, Alsace, and Switzerland; while the transports of corn and Rhenish wine down the Rhine, and into the neighbouring countries of IIolland,

Belgium, and Westphalia, employ a great many vessels; and numerous well-appointed steamers are continually passing, with passengers, up and down the river. Three railroads brauch out from Cologne-one, on the N., going W. to Aachen
of New Granada, the captain-generalcy of the Caracas or Veneof New Gratada, the captain-generalcy of the Caracas or Venc-
zuela, and the province of Quito in the viceroyalty of Peru. It continued in this condition till the beginning of the present century, when the inhabitants, driven to despair by the tyranny and oppression of the mother country, Spain, rose in arms, headed by the patriot general Bolivar, and, after a long-protracted and sanguinary war, which closed with the decisive battle of Carabobo, fought on June 21, 1821, in which the patriot army was victorious, succeeded in throwing off the Spanish yoke; an event which was followed by the dismemberment of Colombia, and its erection, in 1832 , into the three distinct and independent republics into which it is now divided, namely, Venezuela, New Granada, and Ecuador (which see). The region occupied by the two republics first named, was anciently called Terra Firma, now almost obsolete.

COLOMBIER, or Collommer, a vil. Switzerland, can. of, and 4 m . S.W. Ncufchatel. It is beautifully situate on a
or Aix-la-Chapelle, and Belgium; a second, on the E., from Deutz, leading to Diisseldorf and N. Germany; and a third, on the S., leading to Bonn.

Cologne owes its origin to the Romans, and was anciently called Oppidum Ubiorum. It was annexed to the German empire in 870 , and was one of the most powerful and wealthy cities of the Hanseatic league, its population then amounting to 150,000 . As early as the 11 th century, Cologne carried on an extensive trade with foreign countries, including England, in the produce of the country-wine, corn, flour, malt, beer, \&c. The arts and sciences also flourished, and its university was one of the most famous in Germany. Intestine divisions, and the intolerant and persecuting spirit of its magistrates, with some other canses, finally effected its ruin, and, in 1792, it ceased to be a free city. Duns Scotus died in Cologne in 1308, and was interred in the chapel of the Minorites; and Rubens was born here in 1577, in the same house in which Mary of Medicis died, in 1642. Pop. (1846), 90,246 , of whom only about 7000 are Protestants.

COLOGNO, a tn. and com. Austrian Italy, prov. of, and 9 m . S. by E. Bergamo. It is tolerably built, surrounded by walls with a wide fosse, and contains a church, poorhouse, and hospital. The commune yields good crops of grain, fruits, and vegetables. Pop. 2674.

COLOMBAN des-Villars (St.), a vil. Sardinian States, Savoy, prov. Maurienne, on the Glandon, 4 m . W.N.W. St. Jean-Maurienne. Pop. 2000.

COLOMBANO (SAN), a market tn. Austrian Italy, gov. Milan, prov. of, and 10 m . S. Lodi, r. bank, Lambro, surrounded by liills, in which fine red granite, porphyry, and feldspar occur; also limestone containing numerous fossils, and extensively burnt for lime. Pop. 5000.

COLOMBES, a com. and vil. France, dep. Seine, 6 m . N.W. Paris, agreeably situate on a hill, in the second bend made by the Seine below Paris, and near the bifurcation of the Rouen and St. Germain Railways. It is well built, and has some good squares, planted with trees. In the environs are numerous country houses, in one of which Rollin wrote his Ancient Mistory. Manufactures.-cotton hose, glue, gelatine, potato flour, and oil refining. It formerly had a royal castle, where Henrietta of England died, 1669. Pop. 1633.

COLOMBIA, a name formerly applied to the N.W. portion of S. America, comprehended between lat. $5^{\circ} \mathrm{S}$. , and $12^{\circ} 30^{\prime}$ N.; and lon. $60^{\circ}$ and $83^{\circ} \mathrm{W} . ;$ bounded, N. by the Caribbcan Sea, E. by the Atlantic and British Guiana, S. by Brazil and Peru, and W. by the Pacific Ocean. It was so called after the illustrious navigator Columbus, who visited the coast of Paria in 1498, and thus became the discoverer of the New World. Under the Spaniards it formed the viceroyalty
height in the Traversthal, about 1 m . from the W. shore of Lake Neufchatel, and contains a considerable number of wellbuilt houses. The most interesting object near it is an extensive old castle, with fine planted walks, formed by the good Henry II., Duke of Longueville. The celebrated Scotch marshal, Keith, the friend of Frederick the Great, possessed it for some time. Pop. 910.

COLOMBO, a seaport tn. Ceylon, S.W. coast, near the mouth of the Kalani River, and about 70 m . W. by S. Kandy; lat. $6^{\circ} 57^{\prime}$ N.; lon. $79^{\circ} 56^{\prime}$ E., the seat of the British Goverument, and principal emporium of the island. It is handsome, and is nearly divided into four parts by two broad streets. A portion of it, comprising the best houses in the town, is within the walls of its very extensive fort, occupying a projecting point of land, and embracing a circumference of nearly $1 \frac{1}{4} \mathrm{~m}$. The principal street, Queen's Street, is wide and well planted with surya trees. The streets are well watered daring the day, and the fallen foliage is regularly removed every morning, but they are not lighted. Within the fort there are several straight and regular streets, with smaller ones crossing at right angles. On the N . side of it , on the margin of the sea, is the Pettah or black town, regularly built, and divided into 15 streets, of which eight run E. and W. crossed by others at right angles. The houses are in general of kabook, and neatly washed with chunam; some of them are of two storics. Several of the streets are lined with rows of trees. There are many Duteh houses in the town, which may be distinguished from those of the English by their glass windows instead of venctians. The houses of the Europeans outside the town are very beautifully situate, especially those near the sea. The floors are almost universally of brick, very unsightly, and disagreeable from the dust they occasion. There are a great number of well stocked shops in the town, and several bazars or market places, amply supplied with provisions of all kinds, and with tropical herbs and fruits, the latter including pine apples and oranges of superior quality. The public institutions and buildings are the United Service library, containing a good selection of books; a hall of commerce or exchange, lately built; the museum, medical library, the Bank of Ceylon, council room, Government offices, Governnent house, hall of the supreme court, district court, Fiscal's office, and jail. Some of these are very handsome structures. The places of worship are two Presbyterian churches, two Portuguese Protestants, two Episcopal churches one of which is within the fort, R. Catholic, Wesleyan, and Baptist chapels. The Moors have two handsome mosques decorated with minarets, the Hindoos also have their temples, rudely sculptured. There are a number of charitable, benevolent, and religious associations and institutions, including a
tispensary and hospital. There is also a horticultural society. The fort of Colombo mounts 126 guns and six mortars, and is garrisoned by a force of 650 European troops and 30 officers. The ramparts are very strong, having eight principal bastions, and a number of lesser ones, with curtains, banquets, and parapets, communicating with one another all round. The whole of the fort, except the side next the sea, has a deep ditch or fosse in front. Behind it, there is a lake, which almost insulates the town. In the centre of this lake, is a tongue of land called Slave Island, from the use to which it was applied by the Dutch; it is covered with neat houses, bungalows, and other buildings, interspersed among stately areca and bread-fruit trees, and cocoa-nut palms. There are upwards of 20 commercial houses in Colombo, which carry on a pretty large trade. The principal exports to Europe are cinnamon, cardamoms, coffee, cocoa-nut oil, coir cordage, cbony, pepper, plumbago, and satin-wood. The harbour, which is in the form of a semicircle, is capable of recciving small vesscls only, and the roads where the large ships cast anchor, at upwards of a mile from the shore, is exposed to the S.W. monsoon, but severe gales seldom occur now, so that ships may and do frequent it all the year through with perfeet safety. The value of exports in 1845 , amounted to $£ 491,026$; imports for the same year $£ 1,188,418$. There are now mail coaches running regularly to and from Colombo to Kandy, Galle, and Negombo. The land about Colombo is low near the sea, with some hills to the S.E. a little way in the country. Pop. (1831), 31,549.

COLOMBRETEES, isl. Spain. Sec Columbretes.
COLOMERA, a tn. Spain, Andalnsia, prov. of, and 13 m . N. by E. Granada, on the river of its own name. The strects are well paved, and clean, bnt steep, and rather irregular. It has two squares, one of which contains the townhall, and prison; and the other the church, cemetery, and storehouse. It has also a chapel, orphan asylum, almshouse, and several schools. In the vicinity are some pleasant public walks along the margin of the Colomera, which is crossed by a stone bridge. Trade:-in grain, fruits, oil, \&c. Pop. 3102.

COLONIA do Santissimo Sacramento, a fortified seaport tn. Uruguay, N. bank of the estuary of the Plata, opposite Buenos Ayres; lat. $34^{\circ} 28^{\prime}$ s.; lon. $57^{\circ} 49^{\prime} 45^{\prime \prime} \mathrm{W}$. In 1845, it was taken by the English and French fleets. Pop. 2500.

COLONNA CAPE [anc. Sunium Promontorium], forming the most S. point of Attica, Grecee ; lat. $37^{\circ} 38^{\prime} 32^{\prime \prime}$ N.; Ion. $24^{\circ} 1^{\prime} 45^{\prime \prime} \mathbf{E}$. It is of a remarkable appearance and forms a most conspicuous object at sea. Its summit is crowned by the ruins of a temple, 269 ft . above the sea, said to have been dedicated to Minerva, and of which 16 columns of white marble are still standing. From these pillars the cape takes its modern name. Beneath the eape are caverns, the frequent resort of pirates.

COLONNELLA, a tn. and com. Naples, prov. Abruzzo Ultra I. dist. of, and N.N.E. Teramo, near r. bank, Tronto. It contains five churches, a convent, and school, and has two annual fairs. Pop. 2467.

COLONSAY, and Oronsay, two isls. W. coast, Scotland, co. Argyle ; lat. (Colonsay N. Point) $56^{\circ} 8^{\prime}$ N.; lon. $6^{\circ} 10^{\prime}$ W. (R.) They are not more than 100 yarls apart, and are separated from each other at high water only. Together they are about 12 m . long, and from 1 to 3 m . broad. A considerable portion of the soil is arable, and is cultivated according to the newest and most improved system. The principal crops are potatoes and barley; and black eattle and sheep in large numbers, and of superior breed, are raised on the pastures. Oronsay is rendered interesting by containing the remains of an extensive priory, founded by the Lord of the lsles, and occupied by canons bronght from the Abbey of Holyrood at Edinburgh. The ruins are of the finest and most imposing deseription, and equalled only by those of lona. On a small island in the middle of a lake in Colonsay are the ruins of an ancient castle, the stronghold of the early lords of the island. Colonsay contains an excellent harbour, called Portnafeamin, in which there is a substantial quay. There are also two good roadsteads. Cod-fishing is earried on to a considerable extent by the inhabitants. Pop., about 840.-Little Colonsay is a small isl. in the above co., between Staffa and Gometra. It contains very few inhabitants, and affords pasture to a number of sheep.

COLORADO, several rivers, America:-1, Rio Colorado del Occidente, a river, U. States, Upper California, the sources of which are in the Rocky Mountains, apparently (for its head waters are not well known) in the Oregon territory, about lat. $43^{\circ}$ N., and about 150 m . N.E. the Great Salt Lake of California. It flows S.E. and S. under the name of the Green River; receives, on the left bank, the San Rafael, from Lang's Peak, about lat. $39^{\circ}$; thence it flows S.W., receives several affluents, chicfly on the left bank, and falls into the head of the Gulf of California, after a course of nearly 1000 m . Its most important affluent is the Gila, which separates California from the Mexican State of Sonora, and which enters the Colorado about 50 m . above its mouth. Excepting on the immediate banks of the river, the country, as far as known, through which the Colorado runs, more especially S. of lat. $40^{\circ}$, appears to be a sterile and arid waste.- 2 , Rio Colorado de Texas, a river, U. States, Texas, rising in the sicrra de Guadalupe, about lat. $29^{\circ} 40^{\prime} \mathrm{N}$. ; lon. $100^{\circ} 45^{\prime} \mathrm{W}$. It flows N.E. and, in lat. $31^{\circ} 40^{\prime} \mathrm{N} . ;$ lon. $100^{\circ} 35^{\prime} \mathrm{W} .$, is joined by the Pasigono, which more than doubles its volume, on the left bank, after whieh the united waters take a S.E. and very winding course, and fall into the Bay of Matagorda, Gulf of Mexico, by several mouths, after a conrse, to the sources of the Colorado proper, of upwards of 400 m .; and to the sources of the Iasigono, of upwards of 600 m . It is navigable for $150 \mathrm{~m} .-3$, Colorado, or Cobri Leubri, a river, S. America, La Plata, rising in the Andes, near lat. $36^{\circ}$ S., and after a S.E. course through a country almost unknown, falling into the Atlantic in lat. $40^{\circ} 5^{\prime} \mathrm{S} .-4$, One of the months of the San Juan del Norte, or Nicaragua River, Central America.

COLORADOS (Los), a cluster of rocks and islets, near the entrance of the Gulf of Mexico, off the N.W. side of the island of Cuba, in lat. $22^{\circ} 15^{\prime} \mathrm{N} . ;$ lon. $84^{\circ} 40^{\prime} \mathrm{W}$.

COLORNO [anc. Colurnium], a tn. and com. Italy, duchy of, and 9 m . N. Parma, on river of that name, crossed here by two bridges. It is well built, and possesses two churches, one collegiate, the other formerly belonging to the Benedictine monastery, but both large and elaborately ornamented; a townhall, ILebrew, medical, vetcrinary, and several primary schools, a public library, philosophical society, and a ducal palace. Candles, saltpetre, woollen fabries, and wine, are manufactured; and trade is carricd on in cattle, grain, and fruits. An annual fair is held in July. Pop. 7049.

COLP, par. Ircl. Meath ; 5787 ac . Pop. 2141.
COLSTERWOR'TH, a vil. and par. England, co. Lincoln ; 3000 ac . The village, in a pleasant valley $7 \mathrm{~m} . \mathrm{S}$. Grantham, has a chureh, a Wesleyan chapel, and a national school for boys and girls. Sir Isaac Newton was born in a farm-house in this parish, December 25, 1642. Pop. 1017.

COLSTON-Basset, par. Eng. Notts; 2530 ac. P. 403.
COLTISHALL, par. Eng. Norfolk; 1060 ac. P. 897.
COL'TON, three pars. Eng. :-1, Lancaster; 13,330 ac. Pop. (1851), 1993.-2, Norfolk; 1020 ac. Pop. 282.3, Stafford; 3870 ac. Pop. 672.

COLUM13, or Columba (St.), a tn., vil. and two pars. Eng. Cornwall.-1, (Major), A tn. and par.; 11,680 ac. The Town, on an acclivity $21 \frac{1}{2} \mathrm{~m}$. W. Liskeard, consists of one principal strect; houses chiefly of stone; well supplied with water; lighted with gas. It has a clean and respectable appearance. It has a market-house, chureh, and three chapels belonging to Wesleyan and Independents, two schools, and a mutual improvement society. Inhabitants chicfly employed in agriculture. Pop. $3146 .-2$, (Minor), A vil. and par. 5 m . W.S.W Columb (St.), Major; 5520 ae. The village, on an elevated site, consists of one strcet, or rather of a row of houses on each side of a public road, generally of stone, and those recently erected of a respectable appearance; water abnodant and good. It has a church, and two chapels belonging to Methodists and Bryanites, and a national sehool. Inhabitants chiefly employed in agriculture. There is also in the parish a large village and seaport, called Now Quay, having some trade, and resorted to during summer as a wa-tcring-place. Pop. 1681.-(Local Correspondent.)

COLUMBIA, several places, U. States.-1, A dist., 10 m . sq., on both sides of the Potomae, about 120 m . from its mouth; ceded to the federal republic, in 1790, by Maryland and Virginia, for the purpuse of becoming the seat of the Legislature. The soil is naturally sterile, but the surface is gently undulating, and the climate healthy. Manufactures
of various kinds are carried on to some extent; and the commerce is very considerable, especially in the exportation of flour from the Potomac. The district is not represented in Congress, but is under the immediate government of that body, and subject to any laws which they may please to enact. It is divided into two counties by the Potomac, one of which is governed by the laws of Maryland, and the other by those of Virginia. Besides Washington, the seat of the National Legislature, and the capital city of the Union, it contains Alexandria and Georgia. Pop., in 1840, 43,712 ; of which number 30,657 were whites, 8361 were free-coloured persons, and 4694 were slaves. - 2 , A tn., cap. of S. Carolina, 104 m. N. by W. Charleston, l. bank, Congaree. It is situate on an elevated plain, and is regularly laid out, with streets 100 ft . wide crossing each other at right angles. It has a spacious state-house, a court-house, jail, market-house, two banks, six churches, and three academies. It is also the seat of S . Carolina college, the buildings connected with which have an imposing appearance. It is connected with Charleston by a railway; and the river is navigable for boats at high-flood tides. Pop. 3500.-3, A tn. Pennsylvania, 30 m. S.E. Harrisburg, l. bank, Susquehanna, here crossed by a bridge 5690 ft . long. It has a townhall, market-house, eight churches, a bank, an academy, and a library; and carries on a considerable trade with Baltimore and Philadelphia in lumber, coal, iron, and agricultural produce. It is connected by a canal with Havre de Grace at the mouth of the Susquehanna, and is intersected by the Columbia and Philadelphia Railway. Pop. (1840), 2719.

COLUMBIA, or Oregon River, a large river, N. America, partly in the British territory, and partly in that of the U. States. It issues from a small lake in the former, situate between two ridges of the Rocky Mountains, about lat. $50^{\circ} 5^{\prime}$ N.; lon. $116^{\circ}$ W. From this point it flows N.W., passing through another small lake, and confined by the double range to a parallel course with the Rocky Mountains, till it reaches lat. $52^{\circ}$ N., a distance of 160 m ., when it proceeds due W. to lon. $119^{\circ}$, from which it flows S . to lat. $48^{\circ}$, parallel, but in an opposite direction to its earlier course. Between this point and lat. $46^{\circ}$, its course is extremely devious and winding, varying from W. to S.S.E., but latterly takes a decidedly W. direction, which it retains till it reaches Fort Vancouver, lat. $45^{\circ} 32^{\prime}$ N.; when it once more proceeds N., but again turns to the W. at lat. $46^{\circ} \mathrm{N}$. , and finally falls into the N. Pacific Ocean, at lat. $46^{\circ} 13^{\prime} \mathrm{N}$. ; lon. $123^{\circ} 20^{\prime}$ W., after a course, altogether, of upwards of 1000 m ., more than the lalf of which is in British N. America, the remainder in the territory of the U. States, which it enters about lat. $48^{\circ} 25^{\prime} \mathrm{N}$. Its principal affluents from the E. are the Kootanie or Flat Bow River, which joins it about lat. $49^{\circ} 10^{\prime} \mathrm{N}$. ; Flat Head or Clarke's River, 10 m . lower down; the Sahaptin or Lewis River, which falls into it above Fort Wallawalla, about lat. $46^{\circ} 12^{\prime} \mathrm{N}$. ; and the Wallamette, which unites with it near Fort Vancouver. Its tributaries from the N. and W. are comparatively small, none of them approaching in size any of those just enumerated. The largest are the Okonagan, the Yakima, and the Cathtates. The entrance to the Columbia river is replete, it would seem, with difficulty and danger. 'Mere description,' says Commander Wilkes, 'can give little idea of the terrors of its bar; all who have seen it have spoken of the wildness of the scene, and the incessant roar of the waters, representing it as one of the most fearful sights that can possibly meet the eye of the sailor.' The flood of the Columbia, when at its greatest height, presents a magnificent spectacle, gliding past swiftly but with majestic silence, bearing along the gigantic forest trees, whose immense trunks appear as mere chips. They frequently lodge for a time, in which case others are speedily caught by them, which, obstructing the flow of the water, form rapids, until, by a sudden rusb, the whole is borne off to the ocean. An entire forest of pines has been seen standing erect under the waters of the Columbia; and individual trees in the same position, with their roots spreading as when growing in their native forests. These are supposed to have been deposited in the river by land slips, which would account for their erect position. The trees on the banks of the Columbia attain extraordinary dimensions. Capt. Belcher measured one, a drift tree, and found it to be 174 ft . in length, by 20 ft . in circumference; troes of 150 ft . in length, and 13 to 18 ft . in circumference,
being common, while many much larger than the largest just spoken of, are found in the thickest parts of the woods, where they attain the greatest size. The waters of the Columbia are said to have no fertilizing qualities, but, on the contrary, are said to deteriorate and exhaust the soil. Numerous watersnakes are met with in the river, but they are harmless. They are called 'the fishing-snake,' from their subsisting chiefly on fish, which they are very dexterous in taking. By the Oregon treaty with the U. States, the free navigation of the Columbia river was secured to British subjects.-(Belcher's Voyage Round the World; U. States Exploring Expedition; Lyell's Geology.)

COLUMBKILLE, two pars. Ireland:-1, Kilkenny; 4473 ac. Pop. $1116 .-2$, Longford; 20,314 ac. Pop. 9273.

COLUMBRETES, or Colombretes, four groups of small isls. Mediterranean, off E. coast, Spain, about lat. $39^{\circ} 54^{\prime}$ N.; lon. $0^{\circ} 44^{\prime}$ E.; 29 m . S.E. Cape Oropesa, and having deep water between them. They are of volcanic origin, and have a picturesque appearance, their broken masses resembling the wrecks of a more considerable island. In the largest island, Santa Maria de Colombres, there is a harbour called Tofino, in the form of a capacious basin, which could accommodate several vessels in 5 to 12 fathoms water; it is about a quarter of a mile across at the entrance, and is tolerably secure from all winds, excepting the N.E., E., and S.E. On this island there is a hill of considerable elevation, called Monte Colibre, and several of lesser heights. They are covered with an exuberance of dwarf olives, geraniums, prickly pears, myrtles, and brushwood; but every other part exhibits lavas, obsidian, and scoriæ. The climate is temperate and healthy, and, though the surface is much broken, crops are raised of rye, maize, pulse, potatoes, hemp, \&c. The whole island is almost literally swarming with snakes, generally between 2 and 3 ft . long, and beautifully marked: they seem to be harmless. The shores abound with crabs and shell-fish. A few rabbits are also to be met with. In time of war, these islands are of considerable importance as a military station.

COLUMBUS, several towns, U. States :-1, A city, cap. Ohio, 100 m . N.E. Cincinnati ; lat. $39^{\circ} 58^{\prime} \mathrm{N}$. ; lon. $83^{\circ} \mathrm{W} . ;$ on the Scioto, here crossed by a bridge, connecting it with Franklinton. It rises gradually from the river; and the streets cross each other at right angles. the principal ones being broad and spacious. The capitol is a large edifice of whitish limestone, 304 ft . long. The other public buildings include 20 churches, several of which are elegant structures; the state penitentiary, a spacious edifice; the asylum for the deaf and dumb, a large brick building, with bandsome Doric porticoes; a lunatic asylum, a blind asylum, and a German Lutheran theological seminary. There are here several tanneries, distilleries, and breweries, a pottery, and four printing offices. A commodious wharf, 1300 ft . long, extends along the margin of the river; the national road passes through the town; and a canal, 11 m . long, connects it with the Ohio canal. Pop. (1850), 18,138.-2, A tn. Mississippi, cap. co. Lowndes, 132 m. N.E. Jackson, l. bank Tombigbee. It has a courthouse, jail, two banks, a theatre, several churches and educational establishments, and a market house. P. (1850), 2611.-3, A tn. Georgia, cap. co. Muscogee, l. bank, Chattahoochee river, immediately below the falls, 240 m . W. by N. Savannah. It is regularly built, with broad, spacious streets, crossing at right angles; and has a court-house, several churches, schools, and academies; a paper, four cotton, and several flour mills, and two iron foundries. P. (1850). 5942

COLVEND and SOUTHWICK, par. Scot. Kirkcudbright; 8 m. by $4 . \quad$ Pop. 1495.

COLVESTON, par. Eng. Norfolk; 1100 ac. Pop. 42.
COLWALL, par. Eng. Hereford; 3800 ac. Pop. 940.
COLWICH, par. Eng. Stafford; 8800 ac. Pop. 2024.
COLWICK, par. Eng. Notts; 1010 ac. Pop. 109.
COLWINST()NE, par. Wales, Glamorgan; 1667 ac. Pop. 287.

COLYTON, a par. and tn. England, co. Devon; 5430 ac. The town, in a beautiful valley, on the Coly (from which it takes its name), near its junction with the Axe, and 20 m . E. Exeter, has very irregular streets, kept, however, very clean. Many of the houses are respectable; but the cottages of the poor are built of $c o b$, a mixture of trodden clay and chopped straw. Water abundant. It has a parisb shurch,
with a tower, and two neat chapels belonging to Independents and Unitarians; a free school, and several local charities. Manufactures:-Honiton lace, which gives employment to a number of women and children; paper, and leather. The inhabitants are chiefly engaged in agriculture. Pop. 2451.(Local Correspondent.)

COMACCHIO [anc. Comaclium], a tn. Papal States, 27 m . E.S.E. Ferrara, amidst unhealthy marshes, about 2 m . from the Adriatic. Salt is manufactured here, to the extent of above $2,000,000 \mathrm{lbs}$ annually, and productive fisheries are carried on in the neighbouring lagoons. It is the seat of a bishopric. Pop. 5500.

CUMANCIES, an American Indian tribe, Mexico and Texas, who roam along the prairie ground beyond the Puercos and Rio Grande del Norte. They are extremely warlike, and make regular organized inroads, for the sake of plunder, into the Mexiean territories, especially into Durango and Chihuahua. In some respects the Comanches differ from other Indian tribes; but the only ground of difference calling for particular notice is their aversion to ardent spirits, it being extremely difficult to induce any of them to taste a drop of intoxicating liquor. Their numbers are estimated at 10,000 .

COMAYAGUA, or Valladolid-la-nueva, a tn. and dist. Central America, Honduras. The town is situate 186 m . E. Guatemala, l. bank, Sirano, and has a fine church, a college, several convents, and a richly endowed hospital. Pop. 12,000 .- The District, which is near the centre of the province, extending S. to the boundary of San Salvador, in common with the district of Choluteca and Yoro, is famed for its superior breed of cattle; which, however, are exported only to a very linited extent.

COMB-HAY, par. Eng. Somerset; 1180 ac. Pop. 239.
COMB-MAR'TIN, a par. and tn. England, co. Devon; 4730 ac. The town, in a beautiful valley, 4 m . E. Ilfracombe, and surrounded on all sides by hills, consists of one principal street, somewhat irregrlar, and about $1 \frac{1}{2} \mathrm{~m}$. long ; houses in general well built of stone; supply of water abundant. It is both inereasing and improving; and has an Established church, Independent, Baptist, and Wesleyan Methodist chapels; and several schools. Burning of lime is the staple trade of the place, from 70,000 to 80,000 bushels being annually sent to the neighbouring parishes. The most of the people are employed in the limestone quarrics; but many also in the lead mines of the parish. Pop. 1399.

COMBA, a small isl., Indian Archipelago, Flores Sca, 33 m. N.N.E. isl. Adenara; lat. $7^{\circ} 49^{\prime} \mathrm{S}$. ; lon. $123^{\circ} 38^{\prime}$ E. (r.)

COMBACONUM, a th. IIindoostan, Carnatic, prov. of, and 20 m . E. Tanjore; lat. $10^{\circ} 58^{\prime}$ N.; lon. $79^{\circ} 26^{\prime}$ E. This city was the aneient cap. of the Chola dynasty, from whieh the whole coast of Coromandel (a corruption of Cholamandel), has received its name. It is now inhabited chiefly by Brahmins, whose dwellings are neat and comfortable. Being reckoned a place of peculiar sanctity by the IIindoos, it has numerous pagodas, gateways, and tanks, of a superior description. It is believed that one of these tanks is filled every [2th year by the watcrs of the Ganges, which find their way into it by a subterranean passage ; and as this water is deemed capable of purifying from all sin and uncleanness, thousands resort hither at the favoured scason with undoubting confidence in its efficacy. In this stronghold of idolatry a Protestant mission has been some time established, and is making satisfactory progress. There are also considerable numbers of R. Catholics. Pop. estimated by Malcom at 40,000 .

COMBE, several pars. Eng.:-1, Hants ; 2190 ac. Pop. 203.-2, (Florey), Somerset; 1500 ac. Pop. 304.-3, (Long), Oxford; 1450 ac. Pop. 605.-4, (Rawleigh), Devon; 2100 ac. Pop. 276.-5, (St. Nicholas), Somerset; 4100 ac. Pop. 1293.

COMBEINTEIGNHEAD, par. Eng. Devon; 2000 ac. Pop. 425.

COMBER, par. and small tn. Irel. Down; 16,134 ac. Pop. 8436.

COMBERTON, three pars.Eng.:-1,Cambridge; 1804ac. Pop. 520.-2, (Great), Worcester; 960 ac. Pop. 215.-3, (Little), Worcester; 770 ac. Pop. 229.

COMBIN, a mountain, Europe, between the Swiss canton Valais and the Sardinian States, prov. Aosta, one of the culminating peaks of the Pennine Alps. It lies at the head of the Val de Bagnes, 15 m . S.E. Martigny, and E. of the Great St. Bernard ; lat. $45^{\circ} 56^{\prime}$ N.; lon. $7^{\circ} 19^{\prime}$ E.; height, $14,125 \mathrm{ft}$.

It is covered with extensive glaciers, that of Chermontare descending from its N.E. slope.

COMBOURG, a tn. France, dep. Ille-et-Vilaine, 21 m S.S.E. St. Malo, near a lake, on the small river Liuon. It contains an old castle, flanked with four towers, and in good preservation, and has manufactures of linen and leather, and a trade in cattle. Chateaubriand was born here. Pop. 1247.

COMBPYNE, par. Eng. Devon; 1070 ac. Pop. 143.
COMBRAILLE [anc. Combralia], a small dist. France, formerly part of old prov. Auvergne, and now included in dep. Creuse. Its capital was Evaux.

COMBRONDE, a tı. France, dep. Puy-de-Dôme, 6 m . N. Riom. It has a trade in cattle, and five annual fairs. Pop. 1488.

COMBS, par. Eng. Suffolk; 3060 ac. Pop. 1064.
COME (St.), a tn. France, dep. Aveyron, 19 m. N.E. Rodez. It is agreeably situate on the Lot, but very poorly built. It has manufactures of flannel, and four annual fairs. Pop. 1108.

COMETA, a tn. Brazil. See Vicosa.
COMFORT POIN'T, a cape, U. States, Virginia, at the embouchure of the James, 19 m . W. Cape IIenry, and opposite Willoughby point.

COMILLAH, an inland tn., IIindoostan, prov. Bengal, cap. dist. Tipperah, on the Gomont, a tributary of the Brahmapootra, 47 m . S.E. Dacca. Six m. W. are the remains of many large brick buildings, and of a fort nearly 70 yards square, the residenee of the former rajahs of Tipperah.

COMINES. See Commines.
COMINGES, or Comminges [Lat. Convennensis Ager] a dist. France, ancient prov. Gascogne. Its capital was St. Bertrand-de-Cominges. It is now comprised in deps. Haute-Garonne and Gers.

COMINO, a cape forming the most E. point of isl. Sar dinia, in lat. $40^{\circ} 31^{\prime} 24^{\prime \prime} \mathrm{N}$. ; lon. $9^{\circ} 50^{\prime} 30^{\prime \prime} \mathrm{E}$. (r.) It forms a narrow projecting point, on which a tower is built. The sea around contains several rocks.

COMINO, a small isl., Mediterranean, S.E. Gozzo, and separated from the N.W. extremity of Malta by a channel called the Freghi Road; greatest length, S.E. to N.W., not quite 2 m .; greatest breadth, about $1 \frac{1}{2} \mathrm{~m}$. Its coast is much indented, and its surface is very hilly. A rocky islet to the W., separated from it by a very narrow channel, is called Cominotto.

COMISO, a vil. and com. Sicily, prov. Syracuse, dist. of and 12 m . N. W. Modica, chief place of circondario. It has a paper mill. Pop. of vil. and circondario, 10,445.

COMITE, a river, U. States, Mississippi and Louisiana, which, after a course N. to S. of about 60 m ., joins the Amite in the latter state, $15 \mathrm{~m} . \mathrm{E}$. Baton Rouge.

COMITI, a tn. Sicily, prov. Trapani, 10 m. N.N.E. Mazzara. Pop. 3500.

COMITLAN, a tn. Mexican confederation, state Chiapas, 30 m. S.E. Ciudad-Real, on the Grijalva. It has a magnificent ehurch, and is a place of considerable trade.

COMMENDA, a settlement, S.W. Africa, coast of Guinea, 15 m. W.S.W. Cape Coast Castle. It was once a place of considerable trade, and still contains two abandoned forts, which belonged to the English and the Dutch. The English fort, which is a square structure of about 190 ft . in the side, stands on the W. side of the river Soosn; and about 500 yards from it, on the opposite bank of the river, stands what remains of the Dutch fort. At the foot of each is a native town.

COMMENTRY, a vil. France, dep. Allier, on the Gil, $7 \mathrm{~m} . \mathrm{S} . E$. Montluçon. It gives its name to a coal-ficld, which occupies a considerable area in the surrounding districts, and is extensively worked. Pop. 1884.

COMMERAGH MOUNTAINS, a mountain range, Ireland, co. Waterford, rising on the S. side of the Suir, somewhat abruptly from the water's edge, to an average height of 1750 ft . above sea level. This range consists principally of gray slate, and the acclivitics along its front are either cultivated or planted as far up as there is any soil to be found.

COMMERCY, a m . France, dep. Meuse, cap. and 21 m . E. Bar-le-Duc, l. bank, Meuse. It is tolerably well built, and has some good public fountains, a communal college, barracks, riding school, Hotel de Ville, hospital, markets, \&c. Manu-factures:-cotton and hardware; breweries, and tanneries:
witl trade in grain, wine, oil, hemp, leather, wood, cattle, \&c. In the environs are iron furnaces and forges. Commercy, at first a simple seignory, obtained the title of commune in 1324. In 1554 it was besieged by Charles V. It formed at that time two seignories, the upper and lower castle, the former of which belonged to Philippe Emanuel de Gondy, who transmitted it to his son, the famous Cardinal Retz, who here wrote his memoirs. The castle, rebuilt in 1708 by the Prince de Vaudemont, and made a magnificent residence by Stanislas, is now transformed into a cavalry barrack. Pop. 3424.

COMMEWYNE, or Commewyna, a river, Dutch Guiana, rising in the hilly grounds in the $E$. part of the colony. It flows first N.W., and then W., is joined by the Cottica, after which it forms a fine navigable stream, and falls into the estuary of the Surinam, between the forts Amsterdam and Leyden. Its banks are adorned with the finest plantations in the colony. Before its junction with the Cottica, it is called the Upper, and after the junction, the Lower Commewyne. Total course, exclusive of windings, about 70 m .

COMMINES, or Comines:-1, A tn. France, dep. Nord, 8 m. N. Lille, r. bank, Lys, and on the frontier of Belgium, opposite the Belgian town of same name. Before the cession of French Flanders to France, the old town of Commines was a fortified place, and comprised both the present towns. The French dismantled it in 1672. It has ribbon manufactories, breweries, a distillery, oil and flour mills, and tanneries. Pop. 2988.-2, [Flemish, Comen], a tn. and com. Belgium, prov. W. Flanders, 8 m. S.E. Ypres, l. bank, Lys, opposite Commines, the two places being connected by a drawbridge. The manufactures consist chiefly of ribbons, tape, bed-ticking, handkerchiefs, nankeens, other cotton stuffs, and tobacco. It possesses likewise bleacheries, dyeworks, tanneries, and oilmills. In the 15 th century, this was a fortified place, and had a castle, in which the famous Philip de Commines was born. Pop. 3503.

COMO (Crty of) [anc. Comum], a city, Austrian Italy, gov. Milan, cap. deleg. of same name, 23 m . N.N.W. Milan, S.W. extremity of Lake Como; in a delightful valley, encireled by lills, the slopes of which are covered with gardens, and with olive and chestnut groves. Although the first view of Como is exceedingly striking, and the scenery around of surpassing beauty, it is found to be irregularly built, the streets to be narrow, dark, and filthy, and the public buildings heavy and dull. It is surrounded by double walls, with towers, in the former of which are four lofty gateways, fine specimens of the military architecture of the Middle Ages. It was further protected or commanded by the once strong castle of Baradello, the ruins of which still occupy the summit of a steep and lofty hill. Although the eity proper has few attractions to boast of, the suburbs, particularly that called Borgo Vico, which stretches along the lake, have many, including numerous magnificent palaces of the nobility, and various handsome public buildings. The suburb in which the various manufactures are earried on is the Borgo di St. Agostino. Como has 13 churches, amongst which are the cathedral, a structure of the middle ages, the exterior of which is eased with white marble; and the church of St. Fedele, still older, and likewise a rather remarkable edifice. It has also a lyceum, erected by the French, with a library of 50,000 volumes, and an extersive collection of philosophical apparatus; an ecclesiastical college, three gymnasia, two female seminaries, an hospital, workhouse, orphan asylum, and several other charitable institutions; a eabinet of natural history and botanic garden, a theatre and an amphitheatre, the former a fine building, with a good façade. A handsome casino or literary club-house has been lately built. It has manufactures of silks, velvets, taffetas, stockings, gloves, \&c., also of woollen cloths, cotton yarn, hats, and soap. A considerable trade is carried on, in rice and manufactured silks, with Switzerland and Italy, by the lake. There are metal foundries and marble quarries in the vicinity, from the latter of which an excellent statuary marble is obtained. Como is a bishopric, the seat of the provineial council, of civil, criminal, and commercial tribunals, and was at one time a principal seat of the inquisition. The climate is exceedingly agreeable, though, from its vicinity to the Alps, sometimes chill. The artizans of this city have always been remarkable for their propensity to a wandering life, and are to be met with all over Europe hawking telescopes, mirrors, spectacles, baro-
meters, \&c. The inhabitants also have been, from a remote period, famous as masons, travelling the country as such, and doing so to this day. Como was a place of importance under the Romans, having been rendered so by a colony of Greeks. sent there by Julius Cæsar, when it obtained the name of Novum Comum. It is the birthplace of Pliny the younger. a statue of whom stands in the centre of the gothic façade of the cathedral, with bas relief alluding to his writings. Pop. (1846), 18,192 .-The delegation, area, 824 geo. sq. m., bounds, N. with the Swiss canton Tessin, and W. with Sar dinia. It is mountainous in the N. parts, being covered witl offsets of the Lepontine Alps. It has fine pastures, and yields abundance of grain, fruits, esteemed wines, and silk also a small quantity of wool, and a considerable quantity of butter, cheese, and chestnuts. Alabaster, gypsum, slates, flint, and building stone, are wrought ; and cloth, linen, silk firearms, paper, strings for musical instruments, soap, and wax-candles, are manufactured. It is divided into 26 districts and 530 communes. Under the French, it formed the de partment of Lario. Pop. 370,093.

COMO (Lake of) [Italian, Lago di Como; anc. Larius Lacus], a celebrated lake, Italy, gov. Milan, at the foot of the Lepontine and Rhetian Alps, 700 ft . above sea level. It is formed chiefly by the river Adda, which enters at its N . end, and leaves at its S.E. extremity, forming its only outlet. Its greatest length, which is from the city of Como to Rivathe former at its S.. the latter at its N. extremity-is about 35 m. , following its windings. At Belaggio, about 15 m . N.E. Como, the lake throws off a braneh in a S.E. direction which passes Lecco and terminates in the outlet of the Adda, and is altogether about 15 m . in length. The lake being thus divided into three arms, is sometimes distinguished by three different names-that portion of it extending from Como to Belaggio, bcing called the Lake of Como; that from Belaggio to Riva, the Lake of Bellano, from a town of that name on its banks; and that from Belaggio to the outlet of the Adda, the Lake of Lecco, so named for a similar reason The broadest part of the lake, which is at Belaggio, is about 3 m . Its general breadth, however, does not exceed 2 m ., and the greater part of it is much less. Its depth varies from 40 to 600 ft . Besides the Adda it receives the waters of the Maria and other less considerable streams. The scenery around the lake is singularly beautiful and picturesque, its banks, throughout its whole extent, being formed of steep and lofty mountains, 3000 to 4000 ft . high, in many places clothed with wood, and studded with villas and cottages. The spot from which this fine sheet of water is seen to most advantage is Belaggio, wherc, as already mentioned, it is broadest, and from whieh a view of the three branches is commanded. Each of these seem to have distinct attractions. Those of the Lake of Como are its villas, villages, and its cultivation; those of the lake of Lecco a native picturesque leauty; and those of Bellano a stern and rugged grandeur. Trout, eels, pike, pelieans, swans, and other aquatic birds, abound in or upon the lake; and sea-gulls are frequently so numerous, that from their Latin name, Larus, the aneient name of the lake is said to be derived. The younger Pliny had several seats on the border of the lake, but their sites cannot now be identified. Amongst the modern mansions is that of the Villa d' Este, once the property and residence of Queen Caroline of England, who gave it the name it bears. The lake is traversed in all directions by steamers, by which all the prineipal places on its shores may be visited. The climate around the lake is mild and healthful.

COMODO, an isl. Indian Archipelago, Flores Sea, between the islands of Flores and Sumbawa, and forming, with the latter isl., the Strait of Sapy ; lat. (N.E. peak) $8^{\circ} 22^{\prime} \mathrm{S} . ;$ lon. $119^{\circ} 36^{\prime}$ E. (r.) It is high, about 45 m . long, N. to S., and 22 m. broad.

COMOE, a tn. W. Africa, Boussa, r. bank, Niger. It is of considerable size, and situate about half a mile from the ferry across the river, 50 m . E. by N. Kiama; lat. $9^{\circ} 45^{\prime} \mathrm{N}$. ; lon. $6^{\circ} 7^{\prime}$ E.

COMORIN (Care) [cape of the Virgin], the S. extremity of Hindoostan, lat. $8^{\circ} 5^{\prime} \mathrm{N}$. ; lon. $77^{\circ} 30^{\prime} \mathrm{E}$. (R.), formed of a circular, low, sandy point, not discernible at above 12 or 16 m . distance from the deck of a large ship. To the W. the shore is sandy and barren, but to the E. abounds with trees. Immediately adjacent to the cape, the beach is covered
with the rough grains of disintegrated granite, which a native tradition asserts is a kind of lapidified rice, and accounts for its transformation by stating that a king gave once a marriage feast to his danghter at this place; that the bridegroom, having failed to appear at the appointed hour, the disappointed bride cursed the teast, of which an enormous quantity of rice formed the principal part, and that therenpon the said rice became grains of granite, as it now lies on the beach. Eighteen miles N. from the cape is a lofty, isolated mountain,
and tropieal fruits are plentiful, but no water to be procured. The inhabitants speak Arabic, and profess Islamism. Pop. 30,000.

COMPE'TA, a tn. Spain, Andalusia, prov. of, and 26 m . N.E. Malaga. It is well built, and possesses a ehureh, townhall, prison, two schools, and several fountains. The inhabitants are engaged in distilling brandy, expressing wine and oil, tillage, and cattle-rearing. Pop. 2753.

COMPIANO [ane. Complanum], a th. and eom. Italy, duehy of, and 35 m . S. W. Parma, l. bank, Taro. It is tolerably well built, surrounded by walls, entered by three gates, and commanded by a castle on an adjacent hill. It also possesses a ehureh, primary and medical schools, and extensive ironworks. Trade:-cattle, grain, and fruits. Pop. 5383.

COMPIEGNE [anc. Palatium Compendium], a tı. France, dep. Oise, 34 m . E. by S. Beauvais, l. bank, Oise, 1 m . below the junction of the Aisne. It is agreeably situate between a forest and the Oise, which is crossed by a handsome bridge of three arches. The streets are irregular, and the houses hadly built, with exception of those near the castle, and those on the Place d'armes. It has two good churches, a Gothic IIotel de Ville, modern theatre, and commmal eollege; but the principal edifice is the royal ehattean, built under Louis X V., from the designs of Gabricl. It has all the magnificence of a palace, and is one of the finest structures of the kind in France. The gardens are extensive, and well laid out. Napoleon embellished this chattean, and spent much of his time in it; and here, on March 27, 1810, he reecived Marie Louise, areh-duchess of Austria, his affianced bride. The forest of Compiène occupies an area of more than 3000 ae., and contains some fine oak timber. Compième has a tribunal of first resort and of commerce, communal college, and publie library, with 28,000 volumes; manufactures of steking, cordage, hosiery, sabots, and turneryware. Doats are built here, and a trade is carried on in coal, wood, hemp, and grain. Before its walls, once strong, but now razed, the Maid of Orleans was made prisoner. It was in possession of the English from the early part of the 15 th centnry, till they were expelled by Charles VII. Pop. 8106.

COMI'sTALL, a vil. England, co. Chester, 5 m. E. Stockport. The inhabitants are largely employed in the eotton manufaeture, and in extensive eoal mines in the neighbourhood.

COMPTLE-Avignon, an anc. dist. Franee, which belonged to prov. Provence, and extended beyond the Durance as far as Tarascon. It now forms part of dep. Vancluse. For a long time the portion of it occupied by the town of Avignon, the burgh Morieres, and the parish of Montfaret, was nuler the sway of the l'opes.

COMPTON, numerons pars. Eng.:-1, Hants; 1800 ac. Pop. 304.-2, Surrey; 1790 ae. 1’op. 522.-3, Sussex; 1750 ac. Pop. 274.-4, (-Ablas), 1)orset; 1330 ac. COMRIE, a par. and vil. Scotland, co. l'erth. The parisur, about 13 m . long, by 10 broad, abounds in beautitul scenery. - The village, $6 \frac{1}{2} \mathrm{~m}$. W. Crieff, is a burgh of harony; and contains the parish chureh, a handsome structure, with a spire; Free and U. Iresbyterian ehmrehes; a parochial school and library; and has a distillery, a woollen-mill, and some eotton weaving. Earthquakes have frequently beenfelt hre. The
remains of several druidical temples may still be seen in the parish. Pop. of vil., 803; par. 2471.

COMSAN, a tn. France, dep. Aude, 4 m. N.N.E. Narbonne; in the middle of a fertile plain, r. bank, Aude. Pop. 2010.

COMTAT-Venaissin [anc. Comitatus Vindiscinus], a small prov. France, formerly dependent on that of Provence, and now included in Vaucluse. Along with the portion of Comté-d'-Avignon, noticed above, it formed an independent state, of which, till the revolution of 1793 , the Pope had the sovereignty. Its capital was Venasque.

CONAN, or Conon, a river, Scotland, co. Ross, rising in Loch Chroisk, and, after an E. course of 35 m ., falling into the upper end of Cromarty Firth, near Dingwall. Its tributaries are the Garve, Meig, and Orrin. It is an excellent trouting stream, and its salmon fisheries are very valuable.-Conan Bridge, a vil. on the banks of the Conan, $2 \frac{1}{2} \mathrm{~m} . \mathrm{S}$. Dingwall. Pop. 342.

CONCAN, a maritime subdivision, Hindoostan, presid. Bombay, provs. Aurungabad, Deccan, and Bejapoor. It is composed of a strip of sea coast, bounded, E. by the W. Ghaut mountains; length, N. to $\mathrm{S} ., 220 \mathrm{~m}$. ; breadth, $35 \mathrm{~m} . ;$ and lying chiefly between lat. $16^{\circ}$ and $20^{\circ}$ N., and lon. $72^{\circ} 40^{\prime}$ and $74^{\circ}$ E. It is divided into N. and S. Concan, and contains many spots well adapted for cultivation, which yield hemp of superior quality, the principal crop; rice, cocoa-nuts, oil-seeds, sugar-cane, turmeric, and ginger; but, in general, the surface is very uneven, and much intersected by steep, rocky hills. Towards the W., the country is possessed of great military strength, being crossed by hills, intersected by ravines, and covered with dense forests. The range of hills is from 2000 to 4000 ft . high, and on the W. abrupt, and difficult of access; the passes are numerous, but impracticable for wheeled carriages. The table land on the E. is nearly as high as many parts of the mountain range, and is intersected by deep, rugged valleys covered with jungle. There are many mountain streams in the district, but no river of any importance. Along the coast are numerous small bays and harbours, extremely shallow, and, commercially, of little value, excepting that of Bombay. A great part of N. Concan was formerly held by the Portuguese, who divided the land into large estates, and gave them to Europeans, whose wealth is attested by the remains of numerous superb buildings, both public and private, which they then erected, and which are now standing in the midst of what at present are mere wastes. In 1817 and 1818, both N. and S. Concar came into possession of the British, the former by cession, and the latter partly by conquest. N. Concan comprehends 46 pergunnalis, containing 2111 vils. ; S. Concan, 47 pergunnahs, and 2291 vils. Pop. $1,250,000$.

CONCARNEAU [Latin, Concarneum], a seaport tn. France, dep. Finistère, 12 m . S.E. Quimper, on a small island, bay of La Foret. The island is only 400 paces long, and 120 broad. It can be approached at low water on the W. side; on the E . channel there is a ferry.-The Town is surrounded by thick stone walls, with a projecting parapet, and towers at regular distances. It contains some very old houses, and the ruins of a Gothic church. The suburbs are more extensive than the town, and, in general, better built. The port can reccive vessels of 500 tons, and has good anchorage, but is dangerous from the proximity of the Peuro rocks. About 300 boats, belonging to this place, are engaged in the pilchard fishery. The quantity taken is from 12,000 to 30,000 barrels, according to the season; and the luggers from the coast of Vannes carry off as many more to the ports of Nantes, Rochelle, and Bordeaux. Besides pilchards, and other fish, the town exports cider, wood, and grain; and imports salt, wine, spirits, and Norway deals. Pop. 2024.

CONCEIÇAO, several places Brazil, particularly:-1, A tn. prov. Goyaz, r. bank, Palina, $60 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Natividade; lat. $12^{\circ} \mathrm{S} . ;$ lon. $48^{\circ} 5^{\prime} \mathrm{W}$. It promised at one time to become an important place, in consequence of the discovery of gold mines on the banks of the river. Some adventurers took possession, and erected a church; but the mines proving unproductive were soon abandoned, and the inhabitants are now chiefly employed in cultivation. Pop. 2000. -2 , A vil., prov. Alagoas, l. bank, Curaripe, about 4 m . from the sea, and at a short distance from Poxim. It contains a church, which attracts numerous visitors at its annual festival; and has a
convenient, though shallow harbour, at which there is some trade. The district near the sea is sterile, but inland is fer-tile.-3, (-da-Serra), a tn., prov. Espirito-Santo, on Mount Mestre-Alvaro, about 16 m . N.W. Victoria. It contains a parish church. Pop., almost entirely agricultural, 1500.4, (-do-Serro), a tn., prov. Minas-Geraes, about $48 \mathrm{~m} . \mathrm{S} . W$. Serro, or Villa do Principe. It consists of two parallel streets, with rather more than 200 houses, all of them in a ruinous state. Mines of iron were long worked in the neighbourhood, and extensive iron-works were established. But the mines have almost ccased to be worked, and the population, which chiefly depended on them, has rapidly diminished. Pop. 8000.

CONCEICÃO-d'-Itamaraca. See Itamaraca.
CONCEIÇÃO (Arraial de), or Concepcion, a small vil. Brazil, prov. Goyaz, 110 m. S.W. Natividade, in a hollow between two small hills. It consists of two long streets, and contains two churches, one of which is in ruins. The soil, for about 3 m . round the village, has been all turned over in search of gold, which was formerly found in considerable quantities, either in minute particles, or in grains of all sizes, some of several ounces weight. The search for gold does not now repay the trouble, though there are said to be rich veins in the solid rocks in the vicinity, and a mine so productive that a bucket of soil yields nearly an ounce of gold; but, owing to the ignorance of the natives of the most ordinary mechanical contrivances, neither of them are wrought. (Gardner's Brazil.)

CONCENTAINA, a tn. Spain, Valencia, prov. of, and 28 m . N. Alicante, on a slope of the sierra Mariola. It is surrounded by ancient walls, flanked by 14 towers, entered by several gates, and overlooked by a strong castle of Roman construction, which, though of later date than the walls, is of high antiquity. The strects are numerous, clean, and paved; and the town possesses 10 squares, two parish churches, town and session houses, two schools, an hospital, prison, storehouse, cemetery, theatre, several convents, with churches attached, and an extensive palace of the Duke of Medinaceli. Manufactures :-linen, woollen, and hempen fabrics, soap, paper, tiles, and bricks; oil, wine, and brandy. Trade:cattle, grain, fruits, and wool. An annual cattle fair, one of the largest in Spain, is held in November. Pop. 5972.

CONCEPCION, a prov. Chili, lying between the Itata and Biobio, between the parallels of $36^{\circ}$ and $37^{\circ} 30^{\prime}$ S., and the meridians $70^{\circ}$ and $74^{\circ} \mathrm{W} . ;$ area, $5210 \mathrm{sq} . \mathrm{m}$. It has a delightful climate, and a fertile soil, producing, in great abundance, grain, and various kinds of fruits. The wines of this province were formerly much estecmed, but have greatly deteriorated. An inferior kind of coal is also found in great abundance. Pop. 102,000.

CONCEI'CIUN, or Concepcion-la-Nueva, Concepcion-de-Mocha, Concepcion-de-Penco, a port, Chili, cap. above prov., 270 m . S.S. W. Santiago, r. bank, Biobio, $7 \frac{1}{2} \mathrm{~m}$. from its mouth; lat. $36^{\circ} 49^{\prime} 30^{\prime \prime} \mathrm{S}$.; lon. $73^{\circ} 5^{\prime} 30^{\prime \prime} \mathrm{W}$. (R.) It is the seat of a bishop, and of a military commandant of the district and of the forts along the Biobio, and contains a college, a seminary, and some other literary institutions. Its port at Talcahuano, a small fortified town on the bay of Concepcion, about 8 m . distant, is one of the best in Chili. The bay forms an extensive and excellent roadstead, and is shut in by the island of Quiriquina, on either side of which is a chamncl. Trade in grain, hides, tallow, and salted beef; and in the vicinity at Penco is an important coal mine. In 1846, the vessels entered were 243 ; tonn. 52,951 ;-cleared, 240 ; tonn. 51,706 ; in 1847, the numbers were, entered, 258 ; tonn. 65,952 ;-cleared, 256 ; tomn. 64,966 . In 1846, the imports in British vessels amounted to $£ 156,800$; exports, $£ 158,800$; in 1847 , the amount was, imports, $£ 89,440$; exports, $£ 91,040$. The number of British vessels arriving and departing in those two years was four and five, respectively. Concepcion was founded, 1550 , by Pedro Valdivia, on the S. side of Concepcion bay. In 1554,1555 , and 1603 , it was taken and burnt by the Araucanians, and as often rebuilt ; and, in 1730, it was destroyed by an eartlqquake, and a great part of it swallowed up by the sca. It was again destroyed by an earthquake in 1751 ; after which the town was rebuilt on its present site. The Araucanians again devastated a portion of it in 1823; and, in 1825 , when its population was about 20,000 , a terriblo earthquake laid it in ruins. It has since partially recovered, and has now a pop. of about 10,000 .

## CONDOM

CONCEPCION, four ths. La Plata:-1, A tn. Cordova. Pop. 2000.-2, (or Villa-Real de la), a th. Paraguay, eap. dep. of same name, and on l. bank, Paraguay, 135 m. N.N.E. Asuncion. Pop. 1800.-3, (del-Arroyo-de-la-China), a th. Entre-Rios, r. bank, Uruguay, 197 m . N.W. Monte Video. Pop. 3500.-4, A tn. Nissiones, near l. bank, Uruguay, 190 m . W. by S. Corrientes.

CONCEPClON, two tns. Bolivia:-1, A tn. prov. Tarija, or Tarila, 240 m . S.E. Chuquisaca, in a fertile country, produeing esteemed wine. Pop. 2000.-2, A th. prov. Chiquitos, 145 m . N.E. Santa-Cruz-de-la-sierra, in an elevated distriet, eontaining mines. Pop. 2200.

CONCEPCION.- 1, A tn. New Granada, on the frontier of Costa Riea, 70 m . W.S.W. Chagres, on the Caribbean Sea, near the mouth of a small stream of its own name.- 2 , A th. Venezuela, 161 m. S.E. Caraceas, on the Macuros, about 37 m . above its embouehure in the Orinoeo.

CONCEPCION-de ha-Vega-Real, or La Vega, a tn. Haiti, dep. of the N.E., 70 m . N.E. San Domingo, near an extensive, fertile, and well-watered plain, ealled Vega-Real. It is very regularly built, and lies 3 m . W. the rnins of the old town of Vega-Real, founded by Columbus, and eompletely destroyed by an earthquake in 1564 ; before which event, it was the most flourishing town in the island, and possessed a mint. Pop. 5000.

CONCEDTION BAY, a large inlet, eoast of Newfoundland, between Trinity Bay and Sit. John's. Its entranee between Cape St. Franeis on the E., and Flamboro' Head on the W., is intersected by the parallel of $47^{\circ} 50^{\prime} \mathrm{N}$., and the meridian of $53^{\circ} 30^{\prime} \mathrm{W}$. It extends inland 38 m . from Cape St. Franeis, and has an average breadth of about 20 m .

CONCHAGUA, an Indian th. or vil., and port, Central America, San Salvador, on gulf of same name. The тown is situate 3 m . up the Amapala Mountain, an extinet volcano. The Indians by whom it is inhabited are rather a well-formed raee, and of a lighter east of countenance and milder manuers than their neighbours. The site of the port, whieh is so completely land-loeked as to resemble an inland sea, is in the N. W. hook of the gulf, in lat. $13^{\circ} 14^{\prime} \mathrm{N} . ;$ lon. $87^{\circ} 35^{\prime} \mathrm{W}$. It is badly ehosen, there being at all times great difficulty in landing, while at low water it is nearly impossible. During strong N. winds the communieation is frequently eut off for days, independent of unsafe holding-ground for shipping.The gulf, also called Fonseca, has an entrance about 20 m . wide, having N.W. point Candadillo, and S.E. point Cosiquina; inside it expands to 50 m . N.W. to S.E., with an average breadth of about 25 m . It is enclosed by the land on all sides but at its entranee. It has a considerable number of islands, and is the recipient of several rivers.

CONCHEs, a tn. France, dep. Eure, 10 m. S. W. Evreux, r. bank, lton, surmounted by the ruins of an old eastle. Agrieultural implements and nails are manufactured here. There are also tameries, potteries, iron-foundries, forges, and furnaces, with some trade in iron, and potteryware. In the neighbourhood there are four mineral springs. Pop. 1672.

CONCHOS, a river, Mexico, rising in dep. Durango, and, after a N . course of about 300 m . through that department and Chihuaha, joining the Rio Bravo del Norte, in lat. $39^{\circ} 30^{\prime} \mathrm{N}$.; lon. nearly $104^{\circ} \mathrm{W}$.

CONClSE, a vil. Switzerland, ean. of, and 14 m . S.E. Nenfehatel, on the banks of Lake Neufehâtel. In the vicinity good wine is produced, and yellow marble is found. Pop. 570 .

CON(ORD, several places, N. Ameriea, partieularly a tn. U. States, cap. New Hampshire, on both sides the Mcrimae, $70 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Boston; lat. $41^{\circ} 11^{\prime} \mathrm{N} . ;$ lon. $71^{\circ} 31^{\prime} \mathrm{W}$. It consists chiefly of two streets on the r. bank of the river, which is here crossed by two brilges, nearly 2 m . apart. It contains five commodious and handsome churehes, a statehouse and state-prison of hewn granite, an aeademy, and twenty-cight sehools. In 1823 the courts were removed from Port-mouth, and are now held here. By means of Coneord river, the Middlesex eamal, and a railway, it communicates with Boston, the centre of its extensive trade. Manutactures:-hardware, eutlery, woollen fabries, and paper, lulling, and several grist and saw-mills, tanneries, potteries, むe. Pop. 4897.

CONCOR1)LA.-1, (Coneordia di quì), a tn. Austrian Italy, gov. of, and ahout 3 fm . N.E. Venice, r. bank, Limene. It eontains a cathedral, a parish church, and a sanctuary; was
a place of some note under the Romans, but is very monch deeayed. Its name of di qua is given to distinguish it from a village depending upon it in the neibhbourhood, and called Coneordia di la. Pop. 1330.-2, A tn. duehy Modena, dist. of, and 18 m . N.N.E. city of Modena, r. bank, Seechia. It is walled, and has several important fairs. Pop. 2500.

CONDAMINE, a large river, Australia, New S. Wales, having its sources in the mountain-ranges of Moreton bay, about lat. $28^{\circ} 55^{\prime}$ S.; from whieh point it flows N.N.W., subsequently bends romen to the S.W., is joined by the Cogoon, afterwards by the Maranoa, and latterly disappears without presenting any definite termination.

CONDAl'LLLY, a tır. and extinct cirear, Hindoostan, the latter being now eomprehended in the Masulipatam colleetorship. The rown, the ancient eap. of the eirear, is situate on the l. bank of the Kistnah; lat. $16^{\circ} 37^{\prime} \mathrm{N}$. ; lon. $80^{\circ} 33^{\prime} \mathrm{E} . ; 49 \mathrm{~m}$. N. W. Masulipatam. It is now in a state of deeay.

CONDATCIIY, a vil. and bay, isl. Ceylon, on the N.W. eoast, 20 m s . Manaar; the most central rendezvous of the boats employed in the pearl fishery.

CONDE, several places, Brazil, partieularly-1, A tn. and seaport, prov. of, aud 85 m . N.E. Bahia, at the mouth of the Inhambupe. It contains a parish chureh, and a primary school, and has some trade in sugar, tobacco, and mandioea, the produce of the surrounding district. Iop. 2000.-2, A th., prov. of, and about $20 \mathrm{~m} . \mathrm{S}$. Paraiba; in a plain, between the small rivers Japoquinha and Japoca. It contains a parish church. The inhabitants, ehiefly of Indian extraction, are engaged in cultivating the fields, and in making mats and other artieles from a kind of straw obtained from a lake in the province, ealled Peripiri. Pop. 800.-3, A tn., prov. of, and $22 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Para, r. bauk, Tocantins. It stands upon a kind of island formed by this river, the Moju, and the Ignapé-Mirim, a canal forming a communication between them; and eontains a parish chureh. Its inhabitants, ehiefly Indians, are very indolent.

CONDÉ, a tn. France, dep. Nord, 7 m . N.N.E. Valenciennes, at the confluence of the Hayne and Seheldt, whence a canal leads direct to Mons. It is well built, well laid out, and has a handsome IIotel de Ville, a superb arsenal, and sluices for the defenee of the town. The fortifications were eonstructed by Vauban. It has manufaetories for stareh and ehicory, establishments for refining oil and salt, bleachinggrounds, nail and rope-works, tanneries, dyeworks, and a trade in coal, cattle, \&e. In 1794, it was besieged and taken by the Austrians, after a long and vigorous defence; retaken by the French after the battle of Fleurus, and again taken by the allies in 1815. Pop. 3504.

CONDE-sur-Norreau, a tn. France, dep. Calvados, 25 m . S.S.W. Caen, at the confluence of the Noirean and Drouance. It owes its origin to an old fortress, said to have been eonstructed by the Romans. The houses are generally old, heavy, and tasteless. The only public buildings of note are two old churehes, eontainng some fine stained glass. There are here manufactures of cotton goods, nails, and eulery. spinning-mills, tanneries, and dyeworks, with some trade in flax, thread, horses, eattle, honey, \&e. This was one of the first towns in France that embraced the Reformed religion; and in 1674 a Protestant provincial synod was hi ld here. Pop. 5485.

CONDESUYOS, a dist. l'eru, dep. Arequipa, extending from the N.E. boundary of Bolivia to Camana on the W. and intersected N.E. to S.W. by the Val-de-Mayes. The high grounds, although exposed to great eold, are well adapted for pasturage ; and in the valleys wine, grain, and cochineal are produeed in abundance. The gold mines here are not so productive as formerly. lop. 20,145.

CONDICOTE, par. Eng. (iloucester; 890 ac. Fop. 165.
CONDINO, a vil. Austria, duehy, Tyrol, circle of, and 21 m. W. Roveredo, eap. dist. of same name, on the Sarea. It eontains a chureh, a Capuelin monaste $r y$, and has an ironwork. Pop. of dist. 9405 .

COND(IM, a tn. France, dep. Gers, 25 m . N. N. W. Auch; agreeably situate on a height, at the foot of which flows the bairse, here crossed by two stone bridges. It is for the most part old, and ill built, but is improving. In its centre is a large square, containing the parish chureh, formerly the catliedral, a noble gothic edifice, hut dilapidated. It is the

## CONGREHOY

seat of a tribunal of first resort, communal college, and of an agricultural society; and has manufactures of quills, corks, porcelain, woollen yarn, leather, and brandy. A considcrable trade is carriel on in grain, flour, wine, and brandy. Condom was formerly the capital of an extensive district, called the Pays de Condomois. Pop. 3937.

CONDOMOIS, a former dist. of France, in the old prov. Gascogue, but now comprised in the deps. Gers, Landes and Lot-ct-Garome.

CONDORE, an isl. Malay Sea. Sce Konnon Condore.
CONDOVER, par. Eng. Salop; 10,540 ac. Pop. 1550.
CONDRIEU [anc. Conderates], a tn. France, dep. Rhone, 21 m. S. Lyons, r. bank, Rhone; in a fertile district, producing excellent white wine. The vines are said to have been brought from Dalmatia by the Romans, who had a station here. Many of the irhabitants are engaged in the difficult navigation of the Rhone, at which they are said to be particularly expert. Great numbers of the vessels used on that river are constructed here. There are manufactures of black silk, leather, caske; dyeworks, and a salt-refinery. Trade:-grain, staves, hoops, \&e. A large cattle market weekly. Pop. 3172.

CONEGLIANO, a tn. Austrian Italy, gov. of, and on a hill slope, 28 m . N. Venice. It is the seat of the district govermment, has several churches, and an hospital, and some manufactures of silk and of woollen cloths. Marshal Moncey derived his ducal title from this town. Pop. 6400.

CONEJERA, a small uninhabited isl. Mediterranean, forming the highest of the Cabrera group, about 6 m . from Cape Salinas, on the S. coast of Ivica. Its length, N.N.E. to S.S.W., is about 1 m . It takes its name, Conejera [Coney], from the number of rabbits which swarm upon it.

CONEY INLAND [anc. Inishmulcloyhy], an isl. Ireland, co. of, and 5 m . W.N.W. Sligo, in Sligo biay; $1 \frac{1}{2} \mathrm{~m}$. long, by half a nile average breadth.

CONFEY, par. Irel. Kildare; 1129 ac. Pop. 135.
CONFIENZA, a vil. Sardinian States, Piedmont, div. of, and 9 m . S.S.W. Novara. Pop. 1539.

CONFLANS, a tn. Sardinian States, Upper Savoy, at the confluence of the Arli with the Isere, opposite L'Hopital, and 22 m. N.N.E. Chambery. It has a church, a college, and two convents. Silver ore is obtained in considerable quantities from the lead mines in the immediate vicinity. It was formerly a fortified place, but was taken and dismantled by Francis I. in 1536. l'op. 1500.

CONFLENTI, a tn. Naples, prov. Calabria Ultra, 8 m . N. Nicastro. Lint and silk are here cultivated to some extent. Pop. 2000.

CONFOLENS, a tn. France, dep. Charente, 36 m . N.E. Angouleme, $r$. bank, Vieune, here crossed by an ancient bridge. It lics in a sterile district, and is ill built. It has manufactures of leather, and a good trade in staves, hoops, timber, cattle and grain. It has a tribunal of first resort, communal college, and an agricultural society. Pop. 2289.

CONG, a par. and post tn. Ireland, co. Galway, $37,340 \mathrm{ac}$. The town, 21 m . N.W. by N. Galway, is situate on an island formed by the several openings of a subterraneous river flowing from Lough Mask into Lough Corrib. It consists of two principal strcets, and has an Established chureh, a R. Catholic chapel, a school, two large mills, and an aneient abbey, said to have been the residence of Roderic O'Connor, the last native king of Ireland, for the last 15 years of his life. He died in 1198, aged 82. Near to the town is one of the finest limestone quarries in the kingdom. 1'op. (1841) 8835 ; of tn. 364 .

CONGAREE, a river, U. States, S. Carolina, formed by the junction of the Broad and Saluda rivers at Columbia, and, after a S.E. course of 30 m ., uniting with the Watcree to form the Santee.

CONGERSTON, par. Eng. Leicester; 1020 ac. P. 267.
CONGLETON, a market tn. and bor. England, co. Chester, and a station on the N. Staffordshire Railway, on the Dane, in a deep valley, 22 m . S. Manchester. The Town, though presenting an antique appearance, many of the houses being of timber framing and plaster, is clean and respectable; well lighted with gas, with its principal streets partly paved and partly macadamized, while in the immediate vicinity are a number of neat detached houses and gardens. It has three Established churches, several dissenting meeting-houses, and a R. Catholic chapel; a grammar school, other public and
private seminaries, an infant school, several Sunday schools, it mechanics' institute, athenæum news-room and library, and a number of benevolent and charitable institutions. Congleton was early distinguished for the manufacture of gloves and leather laces, called Congleton points; but these have been long superseded by cotton and silk manufactures, the latter now forming the principal trade of the town, and the only remaining cotton-mill being about to be converted into a silkmill. The inhabitants are chiefly employed in silk throwing and spinning; besides which waisteoats and ribbons, of a very superior description, handkerchiefs, and various other articles, are mannfactured. Parnell, the poet, was a native of Congleton. l'op. 9222.-(Local Correspondent.)

CONGO, a territory, in S.W. Africa, discovered by the Portuguese navigator, Diego Cam, in 1497. By the Portuguese the name was applicd to the whole tract of coast country extending from Cape Lopez, lat. $0^{\circ} 36^{\prime}$ S., to Cape Negro, lat. $15^{\circ} 40^{\circ} 42^{\prime \prime} \mathrm{S} .$, now known under the names of Loango, Congo, Angola, and Benguela. Congo, as now understood, is a comparatively limited and little-known tract, lying S. of the river Congo or Zaire, and bounded s. by the Dande, including in all about 170 m . of coast. Its cap. is St. Salvador, or Banza-Congo, the residence of the dominant chief.

CONGO, or Zane, a large river, in S.W. Africa, having its embouchure in the S. Atlantic, lat. $6^{\circ} \mathrm{S} . ;$ long. $12^{\circ} 40^{\prime} \mathrm{E}$. Of its origin and affluents hardly anything is known; but, ac cording to the accounts of the natives, it issues from an extensive marsh, about lat. $2^{\circ} 15^{\prime} \mathrm{N} . ;$ lon. $17^{\circ} 30^{\prime}$ E.; although M'Queen is disposed to think that its sources lie considerably further N . At its mouth it is 10 m . wide, a iittle higher up it diminishes to 7 ; and at 140 m . from the sca, narrows com mence and continue for 40 m ., through which space the river is not gencrally more than from 300 to 500 yards wide, and mostly contined between lofty rugged rocks, where tremendous falls and cataracts occur ; and below, where it begins to expand, are fearful whirlpools. Above the narrows, for a bout 100 m ., the river again expands to a breadth of 2,3 , and even more than 4 m ., flowing with a current of 2 or 3 m . an hour. Immediately off its mouth, Captain Tuckey found no bottom with 150 fathoms of line, the velocity of the stream varying from $2 \frac{1}{2}$ to 5 knots an hour. Thirteen miles from the entrance the water is perfectly fresh, of a dingy red colour; it ferments in a few days, and remains for some time in a highly putrescent state, discoloming silver greatly, bat it atterwards becomes perfectly clear and colourless, and deposits no sediment. The rise of the Congo, at its lighest flood, is, towards its mouth, about 12 feet, and every third and fourth year it is said to rise to a greater height than it does in the intermediate years. The banks on cither side are low and swampy, principally covered with two diflerent kinds of mangroves-one a low hush, the other a stately tree; there are also many kinds of palms, two of which bear fruit, one of them poisonous. The natives here are perfectly black, but their noses are not quite so flat, or their lips so large, as among the generality of negroes; the clothing consists of a single wrapper, of dungaree or cloth, round the loins; and umbrellas appear to be the emblens of rank. They wear numerous charms or ' Fetiches,' in which they place great faith.

CONGONHAN-de-Sabara (arkalal de), an irregularlybuilt mining vil. Brazil, prov. Minas-Geraes, about lat. $19^{\circ}$ $50^{\prime} \mathrm{S} . ;$ long. $45^{\circ} \mathrm{W}$. It lies near the mine of Morro Velho, wrought by a British eompany, and is chiefly inhabited by those connected with the mining operations. It has 3 churches, one of which has never been finished, and is now falling into decay. Pop. 2000. - (Gardner's Travcls in Brazil, 1836-41.)

CONGONHAS-do-Campo, a tı. and par. Brazil, prov. Minas-Geraes, on a river of same name, about $16 \mathrm{~m} . \mathrm{W}$. Queluz. The greater part of the houses stand in the form of an amphitheatre on the $r$. bank of the river, and the church occupies the most elevated portion of a public square. A college established here eujoys a high reputation, and in the neighbourhood are mines of iron, employing 5 furnaces. Pop. 3000.

CONGREHOY, a river, Central America, Guatemala, prov. Honduras, flowing N., and falling into the Carribcan sea, about 55 m . W. by S . Truxillo. A few miles above its embouchure is a singular peak, of same name, 7500 ft . high.

## CONNECTICUT

CONGRESBURY, a par. and vil. England, co. Somerget; 4280 ae. The village, $11 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Bristol, is intersected by the Yeo, and, from the delightful scenery around, has a most attractive appearance; the houses generally small and old-fashioned, but comtortable, and remarkably clean. It has a $a^{2}$ ish chureh, a Wesleyan chapel, 2 schools, and an old cross in the centre of the village. The inhabitants are chiefly employed in agricultural labour. Pop. 1380.

CONGOON, a seaport, Persia, prov. Laristan, on the Persian Gulf, and 130 m . S.S. E. Shiraz. Its roadstead is said to be good, and to have deep water; but the whole coast in its vicinity is in possession of piratical Arabs. Pop. 6000.

CONI, or Cuneo, a th. Sardinian States, cap. div. and prov. Coni, on a high hill, at the confluence of the Stura and the Gezzo, 46 m . S. Turin. It is surrounded by a simple wall, and has two gates. The prineipal street has areades throughout its whole length, and displays a series of handsome shops. The other streets are mere lanes. The town contains 3 churches, 4 monasteries, 3 convents, an hospital, an orphan hospital, public baths, and a royal college. There are also some silk spinning-mills, and manufactories of various kinds of silk and woollen goods. The position of the town is highly favourable to trade, as all the merchandise passing from the seaport of Nice to Lombarily, Switzerland, and Germany, goes by this route. Grain, hemp, and silk, produced in the neighbourhood, also form articles of commeree. 'Two fairs are held ammally. Coni is the seat of a bishop and of a court of first resort. Pop. 18,777.

CONIEH, a th. Turkey in Asia. See Komient.
CONIL, a tn. and small port, Spain, Andalnsia, prov. of, and 22 m . S. E. Cadiz, 4 m . N.W. Cape Trafalgar, on the Atlantic. It possesses 3 squares, a parish church, chapel of ease, town hall, prison, poorhouse, 2 schools, a cemetery, and several fountains of mineral and other waters. The people are chicfly occupied in tillage, cattle-rearing, fishing, and fish-curing. Grain, fish, fruits, \&e., are exported; and brandy, esparto, soap, hardware, earthenware, wine, \&e., imported. Pop. 3542 .

CONINGSBY, par. Eng. Lincoln; 5560 ac. Pop. 19.99.
CONIN(iTON, 2 pars. Eng.:-1, Cambridge; 1477 ac . Pop. 196.-2, IIuntingion; 3000 ac . lop. 224 .

CONISBROUGIl, a par. and vil. Eng. W. Riding, York; 4000 ae. The vhifage, of high antiquity, is pieturesquely situate on a lofty elevation, about 6 m . S. W. Doncaster, overlooking a rich and wooded country, and has an ancient ehureh. In its vicinity are the ruins of as saxon castle, one of the principal seenes in Sir W. Seott's novel of Ieanhoe. Iop. 1445.

CONISCLIFFE, a par. and vil. Eng. Durham; 2950 ae. Pop. $42 \%$.

CONISHOLME, par. Eng. Lincoln; 1680 ac. P. 146.
CONISTON LAKE, a small lake, England, co. of, and 20 m . N.W. Lancaster, 6 m . long by $\frac{1}{2} \mathrm{~m}$. broad, and about 27 fathoms deep. It abounds with char, and the scenery on its banks is picturesque. The romantic Coniston Fells, at its N. extremity, contain slate quarries and eopper mines.

CONJEVERAM [Canchirura, the Golden City], a in. llindoostan, Carnatie, $48 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Madras, lat. $12^{\circ} 49^{\prime} \mathrm{N}$. ; long. $79^{\circ} \cdot 11^{\prime}$ E. It stands in a valley, is irregularly built, and from 5 to 6 m . long, resembling rather a series of villages, intermingled with gardens and coeoa-nut plantations, than a town. There are here two splendid pagodas; one dedicated to Vishnu Conjee, riehly sculptured, and highly venerated by the Hindoos; the other, a larger and more imposing strueture, dedieated to Siva, from the summit of whieh a magnificent view is obtained. There are many smaller pagodas; and choultrics, or houses of accommodation for travellers, abound. Red handkerchiefs, turbans, and cloths adapted for native dresses, are manufactured here. The town is surronnded by a hedge of the American aloe, a plant formerly much used in India as a defence against sudden incursions of mounted bandits. A sehool here, comneeted with the Free Chureh of Scotland Madras Mission, is (1851) attended by 309 pupils.

CONKAIR, or Konkerr, a tn. Hindoostan, prov. Gumbwana, at the foot of a rocky hill, r. bank Mahanuddy, 157 m . S.E. Nagpoor. It is surrounded by hills inhabited by wild Gond mountaincers, and the country in the neighbourhood is for the most part covered with lofty woods.

CONKI, a riv. Hindoostan, rising in the S. slope of the Mergou mountains, and forming the boundary between Nepaul and the territory of Sikkim. It flows $S$., enters Bengal, and joins the Mahanada 20 m . E. Purneah, after a course of about 150 m .

CONN (Lovaii), a lake, Ireland, co. Mayo, between Castlebar and ballina, about 10 m . in length and 2 to 3 m . in breadth. Its lower extremity, called Lough Cnlleen, is separated from the main body by a narrow channel, spanned by a bridge, called the Pontoon.

CONNA, a vil. Ireland, co. Cork, 5 m . W.N.W. Tallow-on-the-Bride. It has a R. Catholie chapel, and the ruins of a eastle, burucd in 16553 . Excellent salmon and trout are caught in the Bride. Pop. 434.

CONNAUGH'T, one of the four provinces of Ireland, comprising the most $W$. and barren portion of the islaud; bounded E. and N.E. by Leinster and Ulster, S. by Munster, and N. and W. by the Atlantie. Length, N. to S., 112 m .; breadtlı, E. to W., 99 m . area, $4,392,043 \mathrm{ac}$. Its W. coast is mueh broken up by numerous bays and inlets, and is thickly studded with islands. It is also extremely rugged and mountainons, and abounds in magnifieent and pieturesque scenery. The central parts are comparatively level, and of limestone formation, while the surrounding mountains are formed of sandstone, clay-slate, granite, and quartz. A large proportion of the provinee is bog, and, generally, it is the least fertile of all the provinees. In 1849, the number of acres under erop was 583,431 , of which 398,463 were corn and beans, 74.532 potatoes and other roots, 108,618 hay and clover, and 1818 flax. The Irish language is still prevalent in this province, and so also are poverty and ignorance. The poverty is of the most deplorable kind; and that the ignoranee is not less is shown by the faet that, a few years since, the most respectable bookseller in the province soll also watches, hosicry, and potatoes, being unable to make a living by bookselling alone. Connaught was formerly a kingdom of the lrish Pentarchy. Its kings were of the race of O'Connor. It is divided into five comnties-Galway, Mayo, Roscommon, Leitrim, and Sligo.

CONNECTICU'T, one of the smaller of the N.E. U. States, N. America; between lat. $41^{\circ}$ and $42^{\circ} \mathrm{N}$. , and lon. $7 \cong{ }^{\circ}$ and $73^{\circ} 55^{\prime} \mathrm{W}$.; having E. Rhode lsland, W. the state of New York, N. Massachusetts, and S. Long Island Sound; length, E. to $\mathrm{W} .$, abont 95 m . greatest breadth, N. to S., about 72 m . ; area, 4674 sq . m. It contains several distinet ranges of hills, but none of them have any great elevation. Its prineipal river is the Comectient, which divides it into two nearly equal parts, and is navigable for 50 m . for pretty large vessels; the other rivers of any note are the Housatonie and the Thames, both of which are also navigable for 12 to 17 m. up their respective streams. The coast is indented with numerous bays and crecks, which furaish many harbours-some of them exeellent. Its minerals eomprise iron, copper, lead, eobalt, plumbago, marble, freestone, por-celain-elay, and coal. Some of its mountans, particularly Green Mountain range, are supposed to be rich in minerals. The elimate is healthy, thongh subject to extremes of heat and cold; on the sea coast it is particularly variable. In winter the winds are cold and piereing. The soil is in general good, particularly in some of the valleys, where-it is extremely fertile, and very easily tilled. It is, however, on the whole, better suited for grazing than tillage, abounding, as it does, in fine meadows. but where agriculture is praetised, the soil is well cultivated, and produces ample erops of Indian corn, rye, wheat, oats, barley, buckwheat, and potatues, some pmopins, turnips, peas, beans, \&c. Fruits also are cultivated with great suceess, particularly apples. A large proportion of the farms are fenced with stone walls. Cattle, horses, sheep, butter, and eheese, are produced in largo quantities.

The estimated amount of crops of the several kinds of agricultural proluce in Comecticut, in the year 1850, was:-

| Protuce. | Hushels. | Protuce. | $\mathrm{n}_{\text {ushele. }}$ |
| :---: | :---: | :---: | :---: |
| Wheat... | 417 ti 2 | Mrize... | , 435, 04.3 |
| Grass Seeds | S0) 449 | lye | 6 6ו 893 |
| Oats | ,158.735 | lota | 2,6-9,725 |
| Buck Wheat | 229,297 | Tobacco. | 1,267,244 |

There were produced, besides the above-hntter, $6,498,119$ Ibs. ; cheese, $5,363,277 \mathrm{lbs}$; and wool, $497,4 \overline{1} 1 \mathrm{lbs}$.

The mannfactures of Connecticut are considerable; they consist chiefly of woollen and cotton goods, metals, paper, wooden clocks, hats and caps, saddleries and other leather manufactures; potteries, glass houses, machinery, hardware. cutlery, soap, tallow and wax candles, bricks, gunpowder, carriages, with tanneries, and numerous flour, grist, and saw mills. The exports of Connceticut consist principally of becf, pork, horses, cattle, mules, butter, cheese, Indian corn, rye, flax seed, fish, wooden clocks, candles, and soap. In 1852 the total foreign exports amounted to $£ 101,235$, and the imports to $£ 78,935$. Tonnage entered, 30,850 ; cleared, 87,744 ; total tonnage belonging to the state, 125,088 , of whieh 25,992 was engaged in the whale fishery, 6764 in the cod, and 1554 in the mackerel fishery.

The principal religious denominations are Congregationalists, Baptists, Episcopalians, and Methodists. There are three colleges in the State, 127 academies and grammar schools, with 4865 students, 1619 common and primary schools, with 65,739 scholars. Connecticut is divided into eight counties ; and it possesses two capitals, Hartford and New Haven, in which the legislature meets alternately. Besides these, it has four other cities-New London, Middletown, Bridgeport, and Norwieh. The government is vested in a governor, lieutenant-governor, who is president of the senate, and in a senate and house of representatives. The senate consists of not less than 18 , and not more than 24 , members. Most of the towns choose two representatives, some of less population only one. The supreme court consists of five judges, appointed by the legislature, during good belaviour, or until 70 years of are. These judges hold separately a court twice a year in each county, and all the judges together hold one court annually in each county.

The state at first consisted of two colonies-Connecticut, with its seat of government at Hartford; and New Haven, at New Haven. The colony of Connecticut was settled in 1633 by emigrants from Massachussets. Hartford was settled by English in 1635, the Dutch having previously built a fort there. The colony of New Haven was settled by English in 1638 , and the two colonies were united in 1665 by a charter, granted by Charles II. The present constitution was formed in 1818. Pop. (1840), 309,978; (1850), 370,791.

CONNEC'IICUT', a river, U. States, the W. branch of which forms, by treaty, the boundary between the U. States and Canada, to lat. $45^{\circ} \mathrm{N}$. It rises in the highlands, on the N. border of New Hampshire; and after a S. by W. course of 410 m . through a fine country, and past numerous flourishing towns, during which it forms the boundary between Vermont and New Hampshire, passes through the W. part of Massachusetts, and the central part of Connecticut, and falls into Long Island Sound. It is navigable to Middleton for vessels drawing 10 ft . water, and for vessels drawing 8 ft . it is navigable to Hartford, about 40 m . from its mouth. Above this the navigation is impeded by rapids and falls, which, however, may be passed by canals formed alongside the river. By means of small stcam tow-boats, the river may be navigated by boats of 10 or 12 tons 250 m . above ILartford. The Connecticut is famed for its shad fisheries, but salmon, which were formerly abundant, are no longer to be found in it.

CONNEMARA [ the Bays of the Ocean'], a dist. Ireland, co. Galway, occupying its W. portion. It is about 30 m . in length, and 15 to 20 m . in breadth. It consists cliefly of mountains and bogs, interspersed with numerous small lakes, presenting some wild and interesting scenery. Its coasts are indented by arms of the sea and bays innumerable. It is sub-divided into Connemara Proper in the W., Jar-Connaught in the S., and Joyce country in the N. Pop. 62,564.

CONNOR, a par. and vil. Ireland, co. Antrim; 17,136 ac. The village, 18 m . N. W. Belfast, forms almost a suburb of Kells, though once a walled town. It gives its name to the bishopric of Connor, united now with that of Down. Pop. par. 8272 ; vil, 265.

CONOCON, or Conucon (Sierra), a mountain range British Guiana, extending for 30 m . in a N.E. direction from parallel $3^{\circ} \mathrm{N}$., through which the Rupunoony has forced a passage of about 390 ft . wide. Its peaks, in many cases, rise to an abrupt height of 2000 to 2500 ft . It is of granitic formation, well wooded, and inhabited by a numerous tribe of Indians.

CONON, a river, Scotland. See Cosan.

CONONICU'T, an isl. U. States, Rhode Island, in Narraganset bay, 8 m . long by 1 broad. On its S . end is a lighthouse with a fixed light.

CONQUET (Le), a vil. and port, France, dep. Finistère, 12 m . E. Brest. Its harbour is capable of recciving small vessels, and its roads are secure. Pop. 1280.

CONRY, par. Ireland, Westmeath; 3697 ac. Pop. 908.
CONSECA, or Couscea, a walled tn. Upper Guinea, 150 m. E.S.E. Free Town, Sierra Leone. Pop. 20,000.

CONSEGUINA [anc. Quisiguina], -1, A volcano, Central America, Nicaragua, on a promontory s. side of Conchagua, or Fonseca Gulf, and about 10 m . from the Pacific. The verge of the crater, which is half a mile in diameter, is elevated about 3800 feet above the mean level; thence the interior walls fall perpendicularly to a depth of about 200 ft . The last eruption of this volcano occurred in January 1835, when a large tract of country in the immediate vicinity, which had been previously covered with the richest pasture, and abounded in fine cedars, was converted into a dreary and desolate waste. Not a vestige of its former verdure remained, while its noble trees stood, barkless, bleached, or scorched; others, of the largest forest kind, were uprooted and strewed in wild disorder.-2, A point W. from above volcano, forming the S. entrance point of Conchagua, or Fonseca Gulf, lat. $12^{\circ} 58^{\prime}$ N.; lon. $87^{\circ} 37^{\prime}$ W. (r.)

CONSELICE, a tn. Papal States, deleg. of, and 25 m . S.S.E. Ferrara. Pop. 3000.

CONSELVE, a th. Austrian Italy, gov. Venice, prov. of, and 13 m. S. Padua. It contains five cliurches, is the seat of several public offices, and has a refinery of saltpetre. P. 3888 .

CONSOLACIUN, Consolation, or St. Augustine, the most E. cape of Brazil, forming the most E. point of S. America. It is in prov. Pernambuco; lat. $8^{\circ} 21^{\prime} \mathrm{S} . ;$ lon. $34^{\circ} 56^{\prime}$ W. (k.) It was discovered by Pinzon, January 26, 1500 , and was the first land of Brazil seen.

CUNSTANCE, Konstanz, or Costnitz [anc. Constantia], a city, Baden, cap. circle of same name, or Circle of the Lake, beatitifully situate, S . bank, Lake Constance, on the narrow passage which comects that sheet of water with its S . arm, the Untersee, 73 m. E. by N. Basel, and 95 m . N. N. E. Bern. It is well built, and surrounded with high walls, flanked by towers, with a ditch in front. These fortifications being in the old style, give the town at once an antique and interesting appearance. Nor is this effect lessened by a nearer inspection, many of the streets and houses being of the 15 th century, and remaining unaltered since that period. The town is connected with the opposite shore of the lake by a long wooden covered bridge, resting upon stone piers, which leads to the suburb of Petershausen, the ancient ramparts of which have been converted into public walks. There are other two suburbs, called, respectively, the Kreuzlingen and the Paradise, the latter consisting chiefly of gardens and orchards. The principal buildings of the town are the minster, a handsome Gothic structure, begun in 1052 ; the nave is supported by 16 pillars, each composed of a single block. In this cathedral, the spot is pointed out on which Huss stood, when sentenced to be burned to death in 1415 , now marked by a plate of brass let into the floor; and there are many other interesting relics in this venerable structure. A fine view of the lake, mountains of Tyrol, and valley of the Rhine, is obtained from the tower. The palaee of the bishop is another fine specimen of Gothic architecture. There are, also, the church of St. Stephens, built in 831, and the old townhall. The Franciscan eonvent, Huss' first prison, is in ruins; and his second place of confincment, the Dominican monastery, is now a cotton factory. The house in which the martyr resided previous to his imprisonment, is also pointed out, as is likewise the place where the stake at which he suf fered was planted in a field outside the town. The Kauf-haus or merchants' hall, built in 1388 , contains the hall in which the famous council of Constance was held from 1414 to 1418, by whieh Huss and his brother reformer, Jerome of Prague, were condemned to death. Therc are here several excellent educational institutions, including an establishment for the instruction of poor girls; also, a lyceum, a gymnasium, an liospital, a theatre, and several collections of objects of art and science. The commerce and manufaetures of Constance, which declined from the period of the Reformation till lately, are now reviving. The manufacture of cotton cloth, yarn, and silk
fabrics, cloeks. and rausical instruments is considerable ; there are also several saw-mills. The chief occupation of the inhabitants, however, is in the cultivation of vineyards and gardens, in the navigation of the lake, and in its fisheries. Constance is one of the oldest towns in Germany. It was formerly a free imperial town, but fell under the ban of the empire in 1548 and in 1549 was annexed to Austria, which ceded it to Baden in 1810. In the 15 th and 16 th centuries, the population was between 25,000 and 30,000 . It has now deereased to 6500 , mostly R. Catholies.

CONSTANCE (LAKE OF) [anc. Lacus Brigantinus; German, Boden See], a lake, Central Europe, forming a common centre, in which Switzerland, and the territories of Baden, Würtemberg, Bavaria, and Austria meet. It lies between lat. $47^{\circ} 28^{\prime}$ and $47^{\circ} 50^{\prime}$ N.; and lon. $9^{\circ}$ and $9^{\circ} 42^{\prime}$ E. ; length, N.W. to S.E., 40 m . ; greatest breadth. about 9 m. ; area, 200 sq . m.; greatest depth, which is between Friedrichshafen and Rorschach, $964 \mathrm{ft} . ; 1283 \mathrm{ft}$. above sea level. At its N. W. extremity, the lake divides into two branches or arms, each about 14 m . in length; the $N$. arm is called the Uberlingen Lake, after the town of Uberlingen, on its N. bank; the S. branch the Zellersee or Untersee, in which is situate the fertile island of Reichenau, belonging to Baden, about 3 m . long, and $1 \frac{1}{2}$ broad. The Rhine enters the lake at Rheinek, at its S.L. extremity, and leaves it at Stein, at its N.W. termination. Various other smaller rivers empty themselves into it. The lake, the waters of which are of a dark green liue, and very clear, are subject to sudden risings, the causes of which are unknown. In 1770 , it rose in one hour from 20 to 24 feet above the ordinary level. It freezes in severe wimers only. It is frequented by numerous aquatie birds, and contains a great variety and abundance of fish, including salmon, salmon trout, pike, and carp. The traffic on it is considerable, although its navigation by sailing vessels is rendered dangerous by sudden and violent squalls. Steamers ply on the lake between Constance and various points on its shores. The banks are either flat, or gently undulating, and are not remarkable for picturesque beauty; but they are extremely fertile, and are covered with corn fields, orehards, and gardens, interspersed with ruined castles, and other remains of the Middle Ages, and with numerous towns and villages, producing, altogether, a very pleasing and striking effect.

CONSTANTLA, a tn. Cape Colony, S. Africa, $9 \mathrm{~m} . \mathrm{S}$. Cape Town, E. and at the foot of a mountain of its own name. It is celebrated for its wine, which, after Tokay, is esteemed one of the best liqueur wines. Thee plants from which the grapes are obtained were brought from Shiraz, in I'ersia.

CONS'TAN'TINA, a th. Spain, Andalusia, prov. of, and 32 m. N.N.E. Seville, in a mountainous district, traversed by a branch of the sierra Morena. It is large, industrious, and improving ; contains five public squares, five tountains, a parish church, court-louses, an ordinary and a foundling hospital, two primary schools, a numery, and almshouse; and has manufactures of leather and soap, several distilleries, and flour-mills; and a trade in corn, flour, wood, and winc. Pop. 6983.

CONSTANTINE, a prov. and city, Algeria, N. Africa. The reovince oceupies the E. portion of Algeria, extemding over considerably more than a third of the entire territory, and therefore much the largest of the three provinces into which it is divided, and is at the same time also the most populous. It is watered hy several streams, the larger of which fall into the Mediterranean Sea. Contrary to an opinion whieh very generally prevailed till lately, that Algiers had little mineral wealth to boast of, the province of Constantine has been found unusually rich in that department, comprising statuary marble, salt and antimony.- The crey of Constartine, cap. of above prov., stands on a lofty rocky peninsula, 1968 ft . above the level of the sea, and is aceessible on one side only, being on
all others begirt by a ravine of 60 ft . in breadth, and of great depth, at the bottom of which flows the Rummel. It is about 207 m . E. by S. Algiers; lat. $36^{\circ} 20^{\prime}$ N.; lon. $6^{\circ} 28^{\prime}$ E. It is nearly 2700 yards in circumference, and is surrounded 1.7

CONSTANTINE.-From kobets Spanish scenery.
walls, in which there are four clegant gateways, constructed by the Arabs, but ehiefly of Romau seulptured stones. The streets are paved, but narrow, tortuous, and dirty; the houses are of brick, generally of three stories, and ill-built, most of them resting on large square cut blocks of stone, the remains of ancient foundations, and are covered with sloping tiled roofs. They are without external windows, and, having low doorways, look like prisons. None of the mosques or publie buildings are calculated to attract much attention, with exception, as regards the latter, of a handsome ancient stone bridge acrosis the Rummel, adorned with bas reliefs; and the palace of the last Bey, now the French Government-honse, which is yet more remarkable for its interior decorations, than for its external appearance. The city and its environs abound in Roman remains, though many of those in the former have been cleared away by the Freneh. The manufactures of Constantine are considerable, consisting of cloth, and other woollen stuffs, ironware, and artieles in leather, particularly saddery, boots, shoes, \&e. The trade, chietly export, is in corn, linen, and wax. This city has the most important native market in Algeria.

Constantine oceupies the site of Cirta, which was, in ancient times, a great city, and capital of the Kings of Numidia. It was ravaged in the year 311 , but afterwards re-built by Constantine, whose name it took. It partook of the fortunes of Algiers in succeeding times, till the oceupation of the province by the French in 1830 . Constantine stood a siege in 1836 , and held out till October 13, 1837, when it was taken by assault. Pop. (I849), 22,994.

CONS'A.N'TINE, a par. and vil. England, co. Cornwall; 8470 ac . The vhlage, situate on a gentle deelivity, 5 m . E. by N. Helston, consists of one irregular and ill-kept street; houses indifferently built, all of stone, some slated, and others thatched. It has a chureh, a Wesleyan chapel, and a parish school. No manufaetures, and little trade. Ocenpations:agriculture and mining. Pop. 2042.

CONSTANTINOPLE [Turk., Stamboul; Greek, Istammoli], a celebrated city, Turkey in Europe, cap. of the Turkish Empire; lat. $41^{\circ} 0^{\prime} 15^{\prime \prime}$ N.; lon. $28^{\circ} 5 y^{\prime} 15^{\prime \prime}$ E. (R.), picturesquely situate on an undulating declivity or series of qentle hills, at the E. extremity of a triangular promontory of the province of Roomelia, having the sea of Marmara and the Bosporus on the S. and E., and the folden Horn, :n inlet of the latter of about 6 m . in lensth, on the N . It is thus surrounded by water on all sides, exeepting the $W$. and has a sea front altogether of about 8 m . in extent. Taking the form of the groum on which it stands, the city is also triangular in shape, its apex projecting into the Bosporns, and its base, a loty double wall, of 4 m . in length, stretching across the promontory, from the Sea of Marmara to the Golden Morn. Each of
stantinople, all of them less or more distinguished by grandeur and beauty, but the most remarkable are the royal mosques, of which there are about 15, esteemed the finest in the world; of these, the largest and most splendid is that of Suleimania, situated on the N.E. side of the city, and standing in the midst of a large square, surrounded inside by an arcade upen pillars of granite and marble. Next to it in extent, but of much
the sides may be about $3 \frac{3}{4} \mathrm{~m}$. in length, and within these limits the whole of the city proper is included. On the opposite side of the Golden Horn, and also occupying the extremity of a promontory, sometimes called the Peninsula of Pera, are situated the extensive suburbs, Galata, Pera, and Tophana, to be afterwards alluded to. Constantinople was formerly walled on all sides; but those along the Golden Horn and Sea of Marmara, the N. and S. sides of the city respectively, are in a ruinous state, and in many places have altogether disappeared. The inland or $W$. wall, a magnificent specimen of mural architecture, containing six gates, theugh also dilapidated in parts, could be easily restored. The streets are extremely narrow, dark, dirty, and ill paved, and so crooked and tortuous that hardly any two of them run for any length parallel to each other, the whole seeming one vast and incomprehensible labyrinth of filthy lanes. The houses are generally low and in built, consisting of wood, earth, and in some cases of rough, unhewn stone, the latter forming the foundation, and rising to the height of 8 or 10 ft ., on which is reared a superstructure of wood, supported on curved beams which rest upon the masonry. A far projecting roof, surmounted by a cupola, which commands a view of the distant country, covers the whole. The windows are strictly closed with latticework of cane, in the centre of which the wife of the Turk, excluded from public view, endeavours to see what is passing in the street. The city is supplied with water by public fountains, which are very numerous, and some of them extremely beautiful, having pure white marble façades, cla- 1 borate arabesque ornaments, and Chinese roofs; they generally stand in the centre of an open 'place' or square. The ancient cisterns of Constantinople are amongst its most remarl able

12. Bastuk-hazare. 14. Baluk-bazar (Fish-market).
older date, is the mosque of St. Sophia, near the E. extremity of the city, the pattern of almost every mosque in the land; its walls and domes, of which last it has 20 of equal dimensions, springing from the same level, and sustained by 12 huge columns, are encrusted with mosaic, forming various figures and devices. The court or open square in which it stands is paved with marble, and shaded by fine planetrees. This is the most ancient existing Christian church, having been only converted inte a mosque in 1453. It has been recently thoroughly restored by an English architect, by order of the Sultan, and the layer of plaster removed by which the superb mosaics and frescoes that decorate its walls was covered. The mosque of Yem Djami, known also as that of Sultana Valide, was built by the mother of Mahomet IV., and is esteemed one of the most magnificent in the capital. It stands almost on the edge of the port, and this point being the ferry between Galata and Stamboul, is constantly thronged with boats. Here almost every Frank first lands in the 'City of the Faithful.' The mosque is constructed of white marble, and has two peculiarly elegant minarets, encircled by no less than three galleries of richly perforated svorkmanship. The principal dome rests upon four lesser ones, which appear to lift it to the clouds. Another celebrated mosque is that of Sultan Aclimet, a little S.E. from the structures. They are huge covered excavations, the roofs of which are supported on numcrous marble columns, and a singular and impressive sight it is said to be, to descend to the brink of the water and look through the maze of columns, till the cye is lost in the dark and seemingly interminable labyrinth.

Mosques.-There are about 300 mosques altogether in Con-
former. From the elevated position this building occupies, it is the most conspicuous object in the city when viewed from the Sea of Marmara. The minarets are of great beauty, and ascend to an immense height. All the other mosques are murch less in size than those described, but very much resemble them in plan, and other features. All of them are enriched by $\mathrm{s}_{1}$ lendid colunns of marble, or Egyptian granite,
or serpentine, and have massive and lighly ornamented gateways and porches, and handsome courts and cisterns for ablution.

Seraglio.-On the extreme N.E. point of the promontory on which the city stands, called Point Serai, is situated the Seraglio or I alace of the Sultan, having the Bosporus in front, and the Golden Horn on the left, and commanding a magnificent view of the opposite shore, including the beautiful town of Scutari, and its cypress-covered hills. The Seraglio, with its gardens and groves, includes a large space and is washed by the sea for two thirds of its extent. IIaving been enlarged and altered at various periods, according to the taste or caprice of the Princes and Sultanas, it now consists of a conglomeration of buildings, clustering together without order or design. Its apartments, however, are spacious and richly furnishea. At the principal entrance is a large and lofty gate, called Babi Humayon, the 'high door' or 'sublime porte,' from which has been derived the well known diplomatic phrase, all political business being transacted, as suppesed, under this portal. Within the precincts of the palace is the celebrated Divan and the Harem, with the 'Garden of Delight,' in which are numerous gorgeous parterres and pavilions; the latter as bright with painting and gilding as the flowers which blossom on every side, while clusters of roses bloom in baskets of gilded wickerwork, and fountains murmur under the deep shadow of overhanging boughs. Near the Seraglio there is a battery of heavy cannon, the fire of which is happily confined to rejoicing days.

Bazaars, Squares, Institutions, \&.c.-The bazaars of Constantinople are numerous, but in no way very remarkable. Some of them are covered, others open. The covered bazaars have a somewhat mean appearance, resembling a row of booths at a fair, but the arrangement and manner of exposing the gay and glittering wares is sufficiently attractive. The

the great bazaar, constantineple
After M. Ad. de Beaumont.
principal or Great Dazaar, consists of long avenues covered over with lofty arches of brick, lighted by apertures in the roof, and branching off in different directions. The ceilings of the raults, and various parts of the walls, are ornamented with painted flowers and devices. On each side of the passage are counters and stalls, with a wide passage between them, and on each counter sits the merchant, generally smoking his pipe or chibouck, with his crossed legs drawn under him. The bazaars, both the open and covered, are severally allotted to particular trades and merchandise; they are gen-
Vol. I.
erally so crowded, chiefly by ladies, that it is difficult to pass through them. Constantinople has but one remarkable square, called the At-Meidan. It occupies the site of the ancient Hippodrome ['horse-course '], a place at one time of great splendour, having been ornamented with marble colonnades, and surrounded by seats like an amphitheatre. The present area is an irregular quadrangle, about 260 yards long, by 150 wide; containing some obelisks which belonged to the ancient structure, one of which, of granite, is composed of a single piece 50 ft . high. There are about 130 public baths in the city, mostly of marble, of plain exterior, but handsome and commodious within, with every accommodation and appliance requisite. They are divided into a number of circular rooms, lighted from above, and sufficiently spacious to admit a number of bathers at the same time. There are a vast number of coffee-houses and lodging-houses, called Khans, dispersed throughout the city. The latter, amounting to nearly 200 in number, resemble inmense stone barracks or closed squares. They are intended for the use of strangers during their temporary sojourn in the city, who may have here an apartment, with command of the key, in which they may deposit their property, and live themselves in perfect security, without any further charge than a small present tc the servant at departing.

Constantinople has several charitable institutions, though none of them precisely resemble those of Europe in principle or management. The most remarkable are the imarets (or kitchens) of the poor. At these placcs, bread, rice, and meats are distributed every day to such poor persons as have been furnished with a ticket by the trustees of the mosqne, or the imam of the quarter. Each imaret supports from 2000 to 3000 persons. There are, besides, large buildings, having spacious and airy rooms, appropriated to the reception of the poor and infirm, with gardens attached for their recreation. There are also a military hospital, and a public hospital for lunatics; each religions sect, besides, having one for its own insane. There are 35 public libraries in the city, either in connection with the mosques and colleges, or apart, as distinct institutions; none of them containing less than 1000 manuscripts, and some more than 5000 .

The numerous cemeteries scattered through Constantinople, but mostly in its vicinity, outside the western wall, are among its greatest ornaments. From their antiquity, they have become vast forests, extending for miles round the city and its suburbs. The people of every creed have distinct quarters allotted to them. The tombstones of the Turks are of white marble. Coffins are not used when the body is deposited in the grave, but thin boards are placed over it to prevent the earth from pressing on it. A narked feature of the improving civilization of the Turks is shown in the large and commodious barracks, with well ventilated apartments for the accommodation of the soldiers, and an internal economy, conducted with order and regularity. Schools, likewise, are attached to each, where young men are prepared for the military service. There is also a military college, where 300 students are lodged, fed, and instructed gratuitously for the army. The total number of elementary schools in the city is said to be above 1000,13 scminaries, attached to mosques, for the study of law and theology, with 1600 pupils, maintained by the Sultan; numerous medresses, a kind of free schools ; a school of mathematics and navigation.

Trade and Commerce.-The few manufactures of Constantinople are chicfly confined to articles in steel arms, morocco leather, saddlery, tobacco pipes, fez caps, \&c.; but its foreign commerce is considerable. The harbour, or golden horn, which more resembles a large river than a harbour, is deep, commodious, well sheltered. and capable of containing 1200 large ships, which may load and unload alongside the quays. It is about 6 m . long, and little more than half a mile broad at the widest part; its general breadth, however, does not much exceed a quarter of a mile; at its entrance it has a width, from Seraglio Pont, or Point Serai, to the opposite shore, of about 1000 yards. The horn is usually crowded with vessels and light boats, and presents a lively, bustling scene. Among the annual imports are about 2000 tons coffee, $1,200,000 \mathrm{lbs}$. sugar, $300,000 \mathrm{lbs}$. pepper and spices, 2000 puncheons rum, and large quantities of low priced cotton manufactures. The other articles of import are corn, iron, timber, tallow, and furs from the Black Sea and Russia, cotton stuffs, and yarn,
woollens, silks, metallic goods, watches, jewellery, furniture, dyes and drugs from W. Europe, and wax, copper, gums, drugs, and porcelain overland from China. The exports consist of silk, carpets, hides, wool, goats' hair, potash, gall, yellow berries, linseed, madder, valonia, bones. The imports from Great Britain, in 1842, were estimated to amount in valne to £1,357,067.

Social Condition.-The social condition and every-day life of Constantinople presents some curious phases. The streets are generally dull and deserted, all bustle and animation being confined to the bazaars. Many of the houses have no windows at all towards the street, but only a long narrow dingy door. and where there are any, they are latticed and closed. Till 1844-45, there were no lamps or lights of any kind in the streets, neither were the latter named, nor the houses numbered. All this, however, is now remedied. Towards evening the coffee-houses are much thronged; but at sunset the Turks retire to their homes, and do not go abroad till next day. Constantinople is but indifferently supplied with public means of conveyance, the chief one being the caiqques or wherries, the number of which plying on the waters has been estimated at 80,000 . They may be hired like cabs or hackney coaches in a European city, are extremely light, elegantly constructed, and move with great rapidity; but are crank and dangerous, unless due caution is used in entering them, and in maintaining a steady position after being seated. There are, besides the caïques, a class of large and heavy boats that ply regularly between the city and the opposite shores. Omnibuses have been recently introduced; besides plying on the thoroughfares, they run also to Adrianople.

The dogs of Constantinople form an important feature in all descriptions of the Turkish capital. They are extremely numerous, acting as the city scavengers, feeding on the garbage thrown into the streets, and prowling along the edge of the water in search of the carcasses of men or beasts that may be thrown ashore. They are the property ot no individual, being supported by the whole community, and their litters are never destroyed. Each dog belongs to a district of his own, and should any one trespass on the territory of another, he is immediately driven off by the dogs that occupy it. No Christian is allowed to reside permanently in the city proper; all foreigners, therefore, including the ambassadors from the European courts, reside on the opposite promontory on which Galata stands. The climate of Constantinople is variable, and the temperature, especially in winter and spring, subject to great vicissitudes; snow and hard frost alternate with mild weather. Mean temperature of the year, $56^{\circ} 3^{\prime}$; of winter, $40^{\circ} 8^{\prime}$; of summer, $71^{\circ} 2^{\prime}$ Fah.

Galata (which see), the largest of the suburbs of Constantinople, is the principal seat of commeree, and the usual land-ing-place from the sea of Marmora. It is here that the merchants of all nations have their stores and counting-houses. Here, too, are situated the arsenals, the dockyard, the artillery barracks, the Government docks, warehouses, rope-walks, and workshops, extending along the shore of the Bosporus for nearly $1 \frac{1}{2} \mathrm{~m}$. It is an ancient city, and was strongly fortified.

Pera (which see), occupies the more elevated portion of the promontory, of which Galata forms the maritime port. It is separated from the latter by a wall with gates, which are closed at night.
Tormana (which see), is situate a little further up the Bosporus than Galata, of which it forms a continuation. Here is a Government foundry and arsenal for cannon, the two words top-hana signifying a cannon repository; and a spacious quay, the usual place of embarkation for Scutari and the villages on the Bosporus.

Constantinople occupies the site of the ancient Byzantium. It was originally founded by Byzas, B.c. 656, and rebuilt by Constantine, A.D. 328, who gave it his name. No city in the world has been subjected to such numerous and celebrated sieges; and no other has undergone so many vicissitudes of fortune. Yet it has only been taken twice, namely, in 1204 by the Crusaders, who retained it till 1261 ; and by the Turks, under Mahomet II., May 29, 1453 -an event which completed the extinction of the Roman empire in the East. The population of Constantinople is uncertain, but would appear to be somewhere between 400,000 and 700,000 , including the suburbs, composed of Turks, Arabians, Grecks, Armenians, Jews, and Europeans.

CONSTITUCION (La), a small maritime tn., Chili, prov of, and at the mouth of the river Maule, 162 m . S.S.W. Valparaiso.

CONSTITUIÇÃO, or Piracicaba, a tn. and par. Brazil, prov. of, and 120 m . N.W. São-Paulo, in a beautiful plain, near r. bank Piracicaba, the navigation of which is here interrupted by a cataract. It contains a parish church. The district aronnd is covered partly with magnificent forests, and partly with rich pastures. On the latter vast herds of cattle are fed. Pop. 2500.

CONSUEGRA, a tn. Spain, New Castile, prov. of, and $35 \mathrm{~m} . \mathrm{S} . \mathrm{E}$. by S . Toledo, overlooked by an ancient castle, built by Trajan. It has three squares, two parish churches, two townhouses, a prison, three schools, some convents, the ruins of a Roman amphitheatre, an aqueduct, and a palace of the grand prior of the Knights of St. John. Weaving, dyeing, expressing eil and wine, and husbandry, oceupy the inhabitants. Pop. 4842.

CONTAI, a tn. Hindoostan, presid. Bengal, lat. $21^{\circ} 48^{\prime}$ N., lon. $87^{\circ} 54^{\prime} \mathrm{E}$., on a hill about 5 m . from the sea. It is considered extremely unhealthy during the rainy season.

CONTAMINES, a vil. Sardinian States, Savoy, prov. Faucigny, r. bank Arve, 10 m. S. W. Chamouni, at the W. foot of Mont Blanc. Pop. 890.

CONTANAGUR, a tn. Hindoostan, presid. Bengal, 112 m. N. by E. Moorshedabad, lat. $25^{\circ} 44^{\prime}$ N., lon. $88^{\circ} 43^{\prime}$ E. It was formerly a place of some note, and still contains one of the finest Hindoo temples in Bengal, but is now, in other respects, in a state of utter decay.

CON'TARINA, a tn. Austrian Italy, prov. of, and 29 m . S. Venice, l. bank Po, which here forms the boundary between the Austrian dominions and the Papal States. It has a suburb, a parish chureh, and several oratories; and a weekly market. Pop. 2850.

CONTAS, or Jussiape, a riv. Brazil, prov. Bahia, which rises in the Serra da Tromba, about 24 m . N.W. the town of Rio-de-Contas; flows E.S.E., and, after a direct course of 250 m ., falls into the Atlantic, a little below the town of Barra do-Rio-de-Contas.

CONTESSA, or Orphano (Gulf of), [anc. Strymonicus Sirus], an inlet of the Archipelago, on the S. coast of European Turkey, in Roomelia, sandjak of Salonica. It is 25 m . wide at its entrance, between the peninsula of Mount Athos, on the S.W., and the island of Thaso, on the N.E., and extends inland for about 50 m . It contains the Gulf of Istillar, and other smaller bays, receives several rivers, and on its $N$. shore has the ruins of the ancient town of Contessa, not far from which is situate the modern town of Orphano.

CONTESSA, a tn. Sicily, 25 m . S.W. Palermo, near an affluent of the Belici. Pop. 3000.

CONTHEY, a par. and tn. Switzerland, can. Valais, 3 m . W. Sion, on the Morge, near its junction with the Rhone. A fine sort of wine is produced in the vicinity. Pop. 2239.

CONTICH, a th. and com. Belgium, 7 m . S. Antwerp. It has manufactures of linen and hats, several corn and oil mills, and a considerable retail trade. Pop. 3687.

CONTIN, par. Scot. Ross, 33 m. by 30 m . Pop. 1770.
CONTOOCOOK, a river, U. States, New Hampshire. Its principal branch rises in Cheshire co., and flows N. and N.E. until it joins the Merrimac, to the N. of Concord.

CONTOY, or Loggerhead, an isl. Caribbean Sea, off the coast of Yucatan, 16 m . W. by N. Cape Catoche, lat. (N. point) $21^{\circ} 32^{\prime}$ N.; lon. $86^{\circ} 49^{\prime} \mathrm{W}$.

CONTRARIETIES ISLAND, s . Pacific Ocean, one of the Solomon Islands; lat. $9^{\circ} 49^{\prime}$ S., lon. $162^{\circ} 3^{\prime}$ E. (r.)

CONTRERAS ISLANDS, a group of small islands N. Pacific, S.W. coast Guatemala, prov. Veragua, close in shore, lat. $7^{\circ} 50^{\prime} \mathrm{N} . ;$ lon. $82^{\circ} \mathrm{W}$.

CONTRES, a tn. France, dep. Loirc-et-Cher, $13 \mathrm{~m} . \mathrm{S}$. by E. Blois; r. bank Bièvre. It has numerous fairs. Pop. 1817.

CON'TROGUERRA, a tn. Naples, prov. Abruzzo Ultra, 15 m . N.N.E. Teramo, with a custom-house. Pop. 2500.

CONTRONE, a tn. Naples, prov. Principato Citra, 10 m. S.E. Campagna, 2 m. E. r. bank, Calore. In the vicinity are fine gardens, a royal castle, and an abbey. Pop. 2000.

CONTURSI, a tn. Naples, prov. Principato Citra, on the Sele, 21 m . E. Salerno. It has several springs, and an annual fair. Pop. 3000.

CONTWOY-TO, or RUM, a lake, British N. America, in the country of the Copper Indians, intersected by the parallel of $65^{\circ} 35^{\prime} \mathrm{N}$., and the meridian of $111^{\circ} 50^{\prime} \mathrm{W}$.

CONVERSANO, a tn. Naples, prov. of, and 18 m . S.E. Bari, agreeably situate on a hill. It is the seat of a bishop, and has a citadel, a handsome cathedral, several convents, a diocesan seminary, and an hospital. The district produces wine, oil, almonds, flax, and cotton, and a good trade is carried on in these articles. The foundation of the town is attributed to the Etruscans. P'op. 8730.

CONVOY, a par. and vil. Ireland, co. Donegal; 20,082 ac. The vil., on the Deele, 32 m. N.E. Ballyshannon, consists of one long street, and has three annual fairs. Pop. 5479.

CONWAL, par. Ireland, Donegal; 45,270 ac. P. 12,666.
CONWAY CAPE, A ustralia, N.E. coast, lat. $20^{\circ} 32^{\prime}$ S., long. $148^{\circ} 54^{\prime} \mathrm{E}$. It is the W. himit of the S. entrance of Whitsunday Passage, and is a steep point, sloping off the eastward.

CONWAY, Conwy, or Aberconwy, a th. and parl. bor. and par. N. Wales, co. Caernarvon, about 13 m. E. N. E. Bangor. The tows, nearly of a triangular form, is picturesquely situate 1. bank, Conway, and surrounded with an old wall, still in good preservation, 12 feet thick, and fortified with towers and battlements. The old castle of Conway, erected in the 13th century, by Edward I., is one of the most magnificent structures of the kind in England. Many parts of it are still entire, including the state-hall, which is 130 ft . long, 32 broad, and 20 high. There is little trade here, and no manufactures. A few small vessels belong to the port, trom which some timber, slates, and lead, are exported. The harbour is dry at ebb tide. A stupendous suspension bridge ${ }^{\text {over }}$ the river, finished in 1826, superseded a dangerous ferry at the same spot. In 1848, another bridge was thrown across the river, by Mr. R. Stephenson, for the accommodation of the Chester and Holyhead Railway. It is a wroughtiron tubular bridge, on the same principle as the Britannia bridge over the Menai Strait. The length of the tube is 400 ft ., and it is 18 ft above high water mark. Pop. 1358. -The river Conway rises from two head streams, one in the S.E. of co. Caernarvon, and the other in the S.W. of co. Denbigh, which unite about $15 \mathrm{~m} . \mathrm{S}$. Conway. The united stream flows N., separates Caernarvon from Denbighshire, and falls into Beaumaris bay, after a course of from 25 to 30 m . It is navigable to Llanwst, or about 10 m . from its mouth.

CONWIL-CAYO, par. Wales, Carmarthen. Pop. 2108.
CONZA, a tn. Naples, prov. Principato Ultra, 35 m . S.E. Benevento. It contains a cathedral, an archbishop's palace, and a diocesan seminary. It was nearly destroyed by an earthquake in 1694. Pop. 2000.

Cooch-bahar, or Vhiar, a principality, Hindoostan, N.E. extremity of presid. Bengal, between lat. $26^{\circ}$ and $26^{\circ} 30^{\prime}$ N., and lon. $89^{\circ} 20^{\prime}$ and $90^{\circ} 20^{\prime} \mathrm{E}$.; greatest length about 60 m ., mean breadth about 22 m .; area $1302 \mathrm{sq} . \mathrm{m}$. The S . parts of this principality are fertile, and well cultivated; but those in the N. are low, marshy, and covered with jungle. The chief objecta of culture are opium, cotton, indigo, wheat, and a little barley. The distinctive name of Cooch-Bahar, given to discriminate between this rajahship and the province of Bahar, ia said to displease the native chiefs, who disclaim all connection with the Cooch, and style themselves Rajbangsis, or descendants of princes. Many of the Cooch tribes have become Brahmins, while others not only eat pork, mutton, \&c., but also dogs, cats, \&c. In the Ayeen Akbari of Abul Fazel, the chief is described as a powerful sovereign, at the head of an army of 10,000 cavalry and 100,000 infantry, and laving Assan and the whole kingdom of Camroop under his sway. In 1661, the territory was taken by the Moguls, who destroyed a great number of the temples, \&c. Along with the rest of Bengal, the Mogul rights to this tract of country devolved on the East India Company, in 1765; but it was little attended to till 1772, when the rajah applied for protection against the Bootaners to the collector of Rungpore, which lie obtained on payment of tribute. In 1813, the tribute bcing withheld, and the country in a state of anarchy and misrule, a resident British commissioner was appointed by the Governor-General, and a system of active and efficient criminal jurisprudence introduced.

COODOONLA, a river, N.W. Africa, Soodan, territory Jacoba, rises in a mountainous district, in lat. $9^{\circ} 7^{\prime} \mathrm{N} \cdot$; lon.
$10^{\circ} 0^{\prime}$ E.; flows first in a N.W. direction, afterwards S.W., and latterly due S., till it falls into the Niger a little N.W. Egga, lat. $8^{\circ} 37^{\prime} \mathrm{N} . ;$ lon. $8^{\circ} \mathrm{W}$.

COOGEE, a small seaport tn., New S. Wales, co. Cumberland, about 4 m . S. Sydney, on a fine sandy bay of the same name, about half a mile in length.

COOK, an inland co. New S. Wales, of an irregular form, 58 m . in length, N.W. to S.E.; breadth, 45 m. ; area, $1,065,600 \mathrm{ac}$. The soil is hard and rocky, but there are several fertile valleys, and a large extent of table land, from 2000 to 3000 ft . high, abounding with picturesque and romantic views. It sends, in conjunction with the co. of Hunter, one member to the Legislative Council. Popl. 3598.

COOK'S ISLANDS:-1, A group of islands, S. Pacific Ocean, between the Friendly and Society archipclagos. The parallel $20^{\circ}$ S. passes nearly through the centre of the group. -2 , An inlet, Russian America, a large indentation, which penetrates nearly 200 m . into the land, and is about 60 m . wide at the entrance.-3, A strait, New Zcaland, the channel which separates the two large islands New Munster or Middle Island, and New Ulster or North Island.

COOK'S LAND, or Moreton Bay District, a maritime territory, in E. Australia, New S. Wales, extending from about lat. $26^{\circ}$ to $29^{\circ} \mathrm{S}$. It seems to be well adapted both for sheep and agricultural farming, a copious supply of rain insuring not merely an abundance, but the greatest variety in the indigenous vegetation. Next to the native grass, the indigenous timber of Cook's Land is the moat valuable of its natural productions. The principal trees, of which there is a great variety, are the Araucaria Cunninghami, or the Moreton Bay pine, an elegant tree, which grows to the height of $150 \mathrm{ft} . ;$ and the Araucaria Bidwellii, which attains about the same height, the red cedar, \&c., and a number of others, that produce either the most durable or the most beautifully variegated woods. Many of these trees yield gums, which might be found valuable in arts and manufactures. The climate and soil appear well suited to the cultivation of the sugarcane, cotton, arrow-root, tobacco, indigo, and other tropical products; but it seems doubtful whether the vine would succeed, as the periodical rains of January and February come on precisely at the season when the fruit needs maturing by a hot sun. Barley, wheat, and maize thrive well, particularly the last, which is alwaya a large and never-failing crop. The English potato, and the Indian, or sweet potato, are both cultivated successfully. Honey, also, is obtained here in great quantities from the native bee. The chief town of the district is Brisbane.

COOKBURY, par. Eng. Devon; 2340 ac. Pop. 301.
COOKHAM, par. Eng. Berks; 6710 ac. Pop. 3676.
COOKLEY, a vil. England, co. Worcester, $3 \mathrm{~m} . \mathrm{N}$. by E. Kidderminster; the seat of long established and extensive iron-works.

COOKLEY, par. Eng. Suffolk; 1210 ac. Pop. 324.
COOKSTOW N, a tn. Ireland, co. Tyrone, on the Ballinderry, 10 m . N. Dungannon. It consists of one long and wide street, upwards of $1 \frac{1}{4} \mathrm{~m}$. long, and of another shorter street, intersecting the former at right angles. The houses are mostly good, many of them handsome, and the principal street is lined with trees on cither side, which gives it a pleasant rural character, and renders it one of the most interesting and prettiest little towns in Ireland. It has a handsome parish church, a large and elegant Presbyterian meeting-honse in the centre of the town, and two others in different parts of it; several other dissenting places of worship, and a large 1 . Catholic chapel, at a short distance from the town; a newsroom, a dispensary, and several schools. Linens are manufactured to a small extent. Pop. 3006.

COOKSTOWN, par. Irel. Meath; 1238 ac. Pop. 142.
COOLAGHMORE, par. Irel. Kilkenny; 5505 ac . P. 1621.
COOLANEY, a market tn . Ireland, co. of, and $8 \frac{1}{2} \mathrm{~m}$. S.S.W. Sligo; containing a Baptist meeting-house, a dispensary, and a court-house in the centre of the village, where petty sessions are held on alternate Wednesdays. Pop. 380.

COOLBANAGHER, par. Irel. Queen's co.; 9621 ac. Pop. 2383.

COOLCASHIN, par. Irel. Kilkenny; 1671 ac. Pop. 455.
COOLCRAHEEN, par. Irel. Kilkenny; 2509 ac. P. 652.
COOLE, a vil. Ireland, co. Westmeath, 4 m. N.W. Castle-
Pollard, on the road to Granard. Pop. 371.

COOLE, par. Irel. Cork; 1153 ac. Pop. 283.
COOLEAGH, par. Irel. Tipperary; 2558 ac. Pop. 772.
COOLGRANEY, a vil. Ireland, co. Wexford, 3 m . S.S.W. Arklow. The vicinity was the scene of the last pitched battle between the insurgent and royalist forces, during the disturbances of 1793. Pop. 311.

COOLIN, or Cuchullin Hills, a range of wild romantic hills, Scotland, Isle of Skye, commencing at the head of Scavaig Bay, and stretching in a N.W. direction, enclosing the romantic valley of Loch Cornish, and that of Hart-oCorry on the N.E. Scuir-na-Gillean, at the N.E. extremity of the range, is estimated to be upwards of 3200 ft . high.

COOLINEY, par. Irel. Cork; 1152 ac. Pop. 437.
COOLING, par. Eng. Kent; 2000 ac. Pop. 144.
COOLKERRY, par. Irel. Queen's co.; 1619 ac. P. 457.
COOLMUNDRY, par. Irel. Tipperary; 1688 ac. P. 350.
COOLOCK, par. and small tn. Irel. Dublin; 1734 ac. Pop. 499.

COOLOO, or Kooloo:-1, A dist. in N. India, between lat. $31^{\circ} 20^{\prime}$ and $33^{\circ} 0^{\prime} \mathrm{N}$. ; and lon. $76^{\circ} 40^{\prime}$ and $78^{\circ} 35^{\prime}$ E.; having the Himalayas N. and N.E. and N.W., the Sutlej S. and S.E., and the Beas W. and N.W. It is extremely mountainous, and the aspect of its hills is peculiarly dreary and barren, presenting nothing but craggy precipices and sharp peaks, projecting through the scanty soil. The only cultivation to be seen is adjacent to the petty forts and villages; but sheep pasture is said to be abundant in the proper season. Principal town, Sultanpore, near the source of the Beas; lat. $31^{\circ} 55^{\prime}$ N.; lon. $77^{\circ} 5^{\prime}$ E. -2, A tn. Hindoostan, prov. Orissa; lat. $20^{\circ} 31^{\prime}$ N.; lon. $84^{\circ} 39^{\prime}$ E.; 80 m . S.E. Sumbulpoor. It is a considerable inland mart, the Berar merchants bringing their cotton to Cooloo, whence they return to the interior with salt.

COOLSCAMP, a vil. and com. Belgium, prov. W. Flanders, 11 m. S. Bruges. It has two brick-works, and four mills; but the inhabitants are chiefly employed in agriculture and weaving. Pop. 2661.

COOLSTUFF, par. Irel. Wexford; 3347 ac. Pop. 636.
COOMASSIE, a large tn. W. Africa, cap. of Ashantee, residence of the Sovereign, 130 m . N. Cape Coast Castle, situated, according to Dupuis, nearly in lat. $6^{\circ} 51^{\prime} \mathrm{N}$. ; lon. $2^{\circ} 16^{\prime} \mathrm{W}$. It is built on the side of a large rocky hill of ironstone, is of an oblong form, and nearly 4 m . in circuit. Four of the principal streets are about half a mile long each, and from 50 to 100 yards widc. The walls of the houses are formed of stakes and wattle-work, filled up with clay. All have gable ends, and ridged roofs, consisting of a framework of bamboo, thatched with palm leaves. Some have arcades, and many are bighly ornamented with paint and carved work. The doors are of cotton wood, entire pieces, and occasionally the flooring is of the same material. The windows are of open wood-work, fancifully carved, ${ }^{\text {a ainted }}$ red, and frequently cased in gold as thick as cartridge paper. Pop. estimated by the Ashantees themselves at upwards of 100,000 .

COOMBE, two pars. Eug.:-1, (-Bisset), Wilts; 3110 ac. Pop. 406.-2, (-Keynes), Dorset; 1470 ac. Pop. 135.

COOMBS, par. Eng. Sussex; 1270 ac. Pop. 80.
Coopang, Coupang, Coepang, or Koepang, a tin., Indian archipelago, S.W. coast, isl. Timor, in a bay of same name; lat. (Fort Concordia) $10^{\circ} 9^{\prime} 54^{\prime \prime} \mathrm{S}$.; lon. $123^{\circ} 35^{\prime} 45^{\prime \prime}$ E. (r.) It is the principal Dutch station on the island, is intersected by a shallow stream, and consists of two streets running parallel to the beach, and of about a quarter of a mile long, crossed by two small irregular streets. The houses near the sea are mostly small, and inhabited chiefly by Chinesc, and consist chiefly of shops and stores, two or three of the latter belonging to Europeans. There are a pretty spacious Reformed church, built of brick; a school, and a dilapidated Dutch fort named Concordia; and the ordinary force consists of fifty soldiers, only a fifth part of whom are Europeans. The ground behind the town rises to a height of 500 ft ., and is partially covered with wood; and on the low lands, belind the beach, areextensive groves of cocoa-nut trees. Coopang carries on a good deal of trade, exporting gold, maize, sandal-wood, wax, wax-candles, cordage, horses, pigs, and buffalocs; and importing bees, cutlery, hats, cloth, the products of Java and Celebes; Chinese earthenware, tools, iron vessels, mirrors, and coral. Ships passing frequently call at Coopang for supplies of vegetables and provisions, which are plentiful and
cheap, provided the purchasers can bargain in the Malay language. Pop. 5000 . -The bay, about 15 m . long, E. to W., by probably half that width, has good anchorage, and is safe during the $\mathbf{E}$. monsoon; and during the W. monsoon, safe anchorage is found a few miles S. from Coopang Bay, in the narrow, but deep channel, between the S.W. point of the island of Timor and the small island of Simoa, Samao, or Semao.

COOPER POINT, a headland on the E. coast of Australia; lat. $17^{\circ} 20^{\prime} \mathrm{S}$.; lon. $145^{\circ} 50^{\prime} \mathrm{E}$.

COOPER (Port), or Toko-labo Harbour, New Zealand, E. coast, Middle Island, N. side, Bank's peninsula; lat. $43^{\circ} 36^{\prime} \mathrm{S}$.; lon. $172^{\circ} 54^{\prime} \mathrm{E}$. (r.) A considerable village of wooden houses has recently arisen here, and an excellent road formed, condncting to the interior. Much pains have been bestowed on the construction of this road, and where walls were found necessary, there was a degree of rivalry in building them, between the Maori and European labourers, the former, in a short time, equalling the latter in the execution of their work.

COOPER'S ISLE, an isl., N. Pacific ; lat. $25^{\circ} 30^{\prime} \mathrm{N}$. ; lou. $130^{\circ} 30^{\prime} \mathrm{W}$.

COOPERS'TOWN, a vil., U. States, New York, agreeably situate at the outlet of Otsego Lake, 62 m . W. Albany. It has a court-house, jail, five churches, and an academy. Pop. 1400.

COORG, or Koorg [Coduga], an ancient principality, Hindoostan, among the W. Ghauts, formerly independent, but now under the management of a British resident commissioner, between lat. $11^{\circ} 25^{\prime}$ and $12^{\circ} 42^{\prime} \mathrm{N}$., and about lon. $76^{\circ}$ E.; greatest length about 60 m ., mean breadth about 35 m. ; area $2165 \mathrm{sq} . \mathrm{m}$. The country in general is extremely rugged, and covered with forests, in some parts abounding in sandal and other valuable woods, but in others overrua with jungle, the resort of elephants and beasts of prey. From the moderate elevation of Coorg, the climate is temperate and healthy; the soil also is fertile, and in many parts well cultivated, yielding, in abundance, rice of superior quality. Great numbers of cattle are reared. The culture of pepper, cardamoms, and other spices, is much attended to. The manufactures are confined to the apparcl of the natives; all their cotton cloths are imported. Periapatam was formerly the capital of the principality, but Mercara is the residence of the rajah, and the seat of his government.

In 1773, Hyder Ali made the rajah prisoner, and took possession of his dominions. This rajah dying in 1779, Hyder confined his son, Beer Rajindra, in Periapatam, and parcelled out the country into jaghires, among some petty Mogul chiefs. After an imprisonment of eight years he was released, and, being joined by all ranks of his subjects, succeeded in expelling the invaders. Before his death, in 1808, he wished to be succeeded by an infant daughter, to the exclusion of his brother, but she soon abdicated in favour of her uncle, who was at last confirmed in the government by the British. Pop. 60,000.

COOSA, a river, U. States, rising in Georgia, and, after a S.W. course of about 240 m . through the N.W. part of that state, and the N.E. part of Alabama, uniting with the Tallapoosa, 8 m . below Wetumpka, to form the Alabama. It is navigable for 8 m . above the point of junction.

COOSIMA, or Koosima, a small volcanic isl. Japanese Archipelago, at the entrance of the strait of Sangar, between the islands of Jesso and Niphon, lat. $41^{\circ} 21^{\prime}$ N.; lon. $139^{\circ} 46^{\prime}$ E. It is completely barren, and uninhabited.

COOSOO, or Koosoo; a tn., N.W. Africa, Guinea, Yarribba territory, N. side of the Kong Mountains, lat. $8^{\circ} 53^{\prime}$ N.; lon. $4^{\circ} 45^{\prime}$ E.

COOSYA, or Cossar, a mountainous country, Hindoostan, E. of the Brahmapootra, lying between Bengal and Burmal, formerly part of the latter empire, now an independent state, under British protection. The inhabitants are good artificers, and formerly supplied all the gunsmiths of Burmah. The climate is healthy, and the country is, on this account, much resorted to by invalids from Calcutta.

COOTEHILL, a tn. Ireland, co. of, and $11 \mathrm{~m} . \mathrm{N} . \mathrm{E}$. Cavan, on the Cootehill. It consists of four wide streets, is well built, and respectably inhabited. It contains a handsome church, a R. Catholic chapel, two Presbyterian meetinghouses, and places of worship for Methodists, Moravians, and

Quakers; with a market house, a court-house, and a bridewell. It has an extensive market for linen. General market, Friday; corn market, Saturday; fairs on the second Friday in each month for cattle, flax, and yarn. Pop. 2425.

COPAIS, or Topolias, a lake, Greece, Boeotia, 42 m . N.W. Athens, 47 m . in circuit; area $30,000 \mathrm{ac}$. Its breadth, at the $\mathrm{S} . \mathrm{W}$. end, is about 10 m ., but diminishes abruptly, towards the N.E., to about 3 m . It is, by far, the most considerable lake in Greece, and in ancient times was celebrated, as it still is, for the large size and excellence of its eels, much estemed by the epicures of antiquity, and one of the delicacies of the Athenian market. Some of those of extraordinary size were offered up as saerifices, and decorated like victims. Iu Strabo's time, the lake had various names, derived from the towns along its shores; that of Copais, however, finally prevailed, as Copæ was situate near the deepest part of it. In ancient times, the waters of the lake were drawn off by natural subterranean canals or channels, called by the modern Greeks Katabothra; but these having become choked up, the vast plain on which the lake is situate was inundated, and twelve flourishing cities were annihilated by the rising waters.

COPAN, a ruined city, Central America, Guatemala, 30 m. E. Chiquimala, extending for 2 m . along the river of same name, a tributary of the Motagıa. Its remains, described in Stephens' Central America, contain numerous specimens of the architecture and art of the ancient Americans, including the walls of what appears to have been a temple, 624 ft . long, and many singular struetures, with sculptured figures, bearing a strong resemblance to the idols of the IIindoos or ancient Egyptians.

COPANO, a sea-port tn., U. States, Texas, N.W. side of a commodious bay of same name, dist. of, and 7 m . S. W. Refugio.

COPAY, a small uninhabited isl. Scotland, one of the lIebrides, co. Inverness, Sound of Harris.

COPDOCK, par. Eng. Suffolk; 610 ac. Pop. 299.
COPELAND ISLANDS, a group of isles, Ireland, co. Down, 2 m. N. Donaghadee, near the entrance to the Belfast Lough. The largest of the group comprises about 2.20 ac . of land, mostly arable, and contains about 100 inhabitants. The other two, about 1 m . N. of the above, called respectively Mew and Lighthouse Island, contain each about 30 ac . On the latter a lighthouse has been erected.

COPENHAGEN [Latin, Hafnia; Danish, Kjöbenhavn -'Merchant's Haven '], the capital of Denmark, and one of the finest cities of $\mathbf{N}$. Europe, partly on the E. coast of the

Island of Sceland, and partly on the N.W. coast of the adt jacent Island of Amager; lat. (observatory) $55^{\circ} 40^{\prime} 9^{\prime \prime} \mathrm{N}$.; Ion. $12^{\circ} 34^{\prime} 7^{\prime \prime}$ E. (R.) It occupies an extensive flat, so very
low, as to require to be protected by embankments even from the tideless Baltic, and hence, in whatever direction it may be approached, it neither becomes visible at any great distance, nor presents a very imposing appearance. Its form is that of an irregular circle, the curvature of which is greatest towards the $\mathrm{S} .$, and least towards the N ; diameter, about 2 m .; circumference, rather more than 6 m . It is strongly fortified, being surrounded on the land side by a lofty wall flanked with bastions, and by a broad deep ditch filled with water from the Baltic, and defended toward the sea by most formidable batteries, especially one on the water level, called Trekronner, and the polygonal citadel of Frederickshavn, a maiden fortress, deemed almost impregnable. In consequence of repeated conflagrations, the greater part of the older houses of Copenhagen, which were chiefly of wood, have disappeared, and been replaced by edifices of modern construction, lofty and well built, either formed into handsome squares, or lining the sides of long spacious streets; usually of brick but occasionally of Norwegian granite. In general the pavement, particularly for foot passengers, is very indifferent; and Copenhagen suffers much by one of the worst evils to which a town can be subjected-a deficiency of good fresh water. The natural division of the town is into two parts, separated by the channel between the two islands, and connected by draw-bridges; but another division, once recognized, and still useful for purposes of description, though it has almost ceased to be correct, is into the old town and the new town (both on the Island of Seeland, and together composing Copenhagen Proper), and, Christianshavn, on the Island of Amager. The boundary between the old and the new town is a principal street, called Gothersgade [Goth's Street], which, with its continuation along the canal of Nyehavn [New Haven], stretches through Copenhagen Proper from N. to S., and cutting it centrically, divides it into two nearly equal parts. The W. part or old town, where it has not been replaced by modern buildings, exhibits the Copenhagen of the olden time, and consists generally of narrow crooked streets, lined by mean, and in many cases, wooden houses. Many of the finest public buildings, however, belong to this division, particularly that part of it called Slotsholm [eastle island], a kind of island which is formed by the channel already mentioned, and canals branching from it, and which, though the original nucleus of the city, las become one of its newest sections. The E. part or new town, and also Christianshavn, are almost entirely of modern construction, the former being built according to a plan, which, if completed, would give Copenhagen a first place among European cities. The city is entered by four gates, and contains 256 streets and lanes, and 16 public squares and market-places. The largest and most handsome of these squares is Kongen's Nyetorv [New King's Market]. It covers an extensive space almost in the very middle of the town, and no fewer than 12 streets open into it. Its houses are chiefly occupied as public buildings or hotels; and in its centre is a colossal equestrian statue of Christian V., with curious allegorical figures, the meaning of which is not easily unravelled. Its E.side forms part of the Gothersgade already mentioned, which is the principal thoroughfare, and contains the finest shops, some of which, however, are of a very superior description. The only other squares deserving of notice, are the Gammel-og-Nyctorv [Old and New Market], adorned with a fountain, and used as a market for hay and straw; and Frederick's Place, a circus divided by four streets into four equal parts, each of which is a palace. The public buildings and establishments of Copenhagen may be noticed under the following heads:-

Churches.-The first of these, and the metropolitan church of the kingdom, is the Frue Kirke (Church of our Lady), in Norregade [North Street], in the N. part of the old town. It consists of a parallelogram of Greco-Roman architecture, and has a square tower, which formerly terminated in a spire, nearly 400 ft . high; but the whole building suffered greatly during the bombardment by the British, and the spire was completely demolished, leaving only the tower, from the top of which still-about 200 ft .-a commanding view is obtained. The choir forms a rotunda, surmounted by a Grecian dome. The interior is of great simplicity, and owes its chief attrac tions to Thorwaldsen, who has enriched it with some of his masterpieces. In the same street, a little to the $N$. stands the Church of St. Peter, built in the form of a Greek cross,
and surmounted with a handsome tower, about 250 ft . high. In the same quarter, but eastward, is Trinity Church, an edifice of singular construction, founded by Christian IV., remarkable for its round tower, and containing some fine oak carvings. Over the ceiling of the church is the hall of the university library; while the top of the tower is used as an observatory, the ascent to which is by an internal inclined plane, up which Peter the Great used to ride, and once drove his Empress in a carriage. The only other churches deserving of notice are the Church of the Holy Ghost, containing several interesting paintings, and a silver bas-relief of the Holy Supper; the Holmen's Kirke or Mariner's Church in the form of a cross, founded in 1617, recently restored, and possessing a fine altar and chancel, enriched with curious oak carvings; and the Church of our Redeemer, situate in Christianshavn, an edifice with an exterior remarkable alike for simplicity and beauty, and an interior adorned with an altar of Carrara marble, and several statues the size of life.

Palaces.-With these Copenhagen is amply supplied. In the Slotsholm, already mentioned, stands the palace of Christiansborg, a large massive building, of imposing appearance, on the spot where, in the 12th century, was erected the fortress which formed the first nucleus of the present city. Since then numerous royal buildings have occupied the same site. The chief of these was a palace, founded in 1731, and afterwards, ín 1740 , greatly altered and improved by Christian VI., who furnished it at immense expense, and enriched it with innumerable articles of vertu. In 1794, everything but its walls perished by fire. The present building, commenced in 1828, and of immense extent, has little architectural merit, but many of its decorations are by Thorwaldsen. In one of its wings the supreme court holds its sittings, in a hall which contains numerous sculptures and pictures by native artists, and in which is a superb throne, supported by lions of silver,
high, pointed roof. The regalia are kept here; and at one end of the Rittersaal-a spacious room, hung with ancient tapestry-is a magnificent throne of solid silver.
Municipal and other Public Buildings.-The townhouse, situate in the Gammeltorv, and containing within its precincts the courts of justice, police office, \&c., is a building of recent construction, but of no architectural merit. The most remarkable circumstance connected with it is, that it is the sixth townhouse which Copenhagen has had, the five which preceded it having perished by the flames. Adjoining the townhouse is the jail. The exchange, situate on the Slotsholm, near the palace, is a large, irregular, clumsy edifice, which has nothing worthy of notice connected with it, except its tower, which is about 176 ft . high, and covered with lead, terminating in a point, about which the tails of four dragons are twisted together, while their heads are turned so as to point out the four cardinal points. Tradition bears that this tower was transported from Kalmar, in Sweden, by Christian IV., as a trophy of his victory. Copenhagen is rich in museums and curious collections. The most recently formed, but at the same time, perhaps, the most interesting of these, is Thorwaldsen's Mnseum, situate on the Slotsholm. It is built in the form of a parallelogram, in a style of architecture partly Egyptian, partly Grecian, and contains the rich bequest which that great sculptor made to his country, of his compositions and collections, during the course of half a centnry. The Museum of Northern Antiquities occupies a wing of the palace of Cliristiansborg, but a considerable part of the collections properly belonging to it is deposited in the Royal Museum, in the Droningen Tvergade. These combined collections form a museum which is almost unique. The antiquities are arranged in four sections, according to the ages to which they belong, and proceed in regular gradation, from the rudest efforts of heathenism to the age of chivalry. The royal museum of Natural History, in the Stormgade, is rich both in zoological and mineralogical specimens. Among the former, the most deserving of notice are the birds (particularly a complete collection of those of Iceland), and the insects; among the latter, a mass of native silver from Norway-the largest in the world, about 6 ft . long, 2 ft . broad, and 8 inches thick-and a magnificent piece of amber, found in 5 utland, and weighing above 27 lbs . The other important collections are the royal cabinet of coins and medals, in the Castle of Rosenborg, alike remarkable for the number and the rarity of its specimens; the tthnographical museum, and the royal gallery of paintings, in the Christiansborg, containing about 1000 pictures, many of them by the first masters.

Educational Establishments, dic.-Among these the university naturally takes the first place. It was founded by Christian I. in 1478. The number of professors and lecturers at the commencement of 1850 was 46 , of whom only 16 have a seat and vote in the Senatus or Consistorium. The average attendance of students is from 1000 to 1200 . The present buildings, opposite the Frue Kirke, was erected in 1836. They are in the Gothic style, and have a façade 220 ft . long, with a portal 72 ft . high, over which is a flying eagle, in high relief, with the inscription Coelestem aspecit lucem. The university is well endowed, and possesses numerous bursariesthe Regenz (domus regia), an establishment connected with it, lodges, and partially maintains, 120 students. To the university, too, belong the chirurgical aca-
gilt, and surmounted by a crimson canopy. The principal government offices are in the immediate vicinity; and behind the palace are royal stables for 200 horses, and a large riding school. The palace of Amalienborg, or rather four symmetrical palaces forming the circus of Frederick's Place, already mentioned, is the ordinary residence of the King and the royal family. There are several other palaces; but the only one deserving particular notice is the Palace or Castle of Rosenborg, in the N. part of the new town, and surrounded by extensive gardens, which are open to the public, and reaching up to the finely-planted ramparts, forms, along with them, the principal promenade. The castle is an irregular gothic building, planned by one of our own celebrated architeets, Inigo Jones. It is flanked by four towers, and has a
demy, two observatories, the one in the round tower already mentioned, and another recently erected near the W. gate; the botanical garden in Nyehavn, and the polytechnic school, in which a complete preparatory course is given. The other principal schools are the metropolitan school, the veterinary school, the military high school, the naval and military cadet academies, and the town schools. The principal scientific and literary associations of Copenhagen are-the academy of arts, which holds its sittings in the old palace of Charlottenburg, and possesses a considerable endowment ; the royal Danish literary and scientific society, the royal society for northern antiquities, the agricultural society, the art-union, artist's union, musical union, \&c. Copenhagen possesses several extensive and valuable libraries. That of the university, kept,
as already mentioned, in the top of Trinity church, has 120,000 volumes; but by far the most important is the royal library, which occupics a large building to the S. of Christiansborg, and contains 400,000 volumes, and $15,000 \mathrm{MSS}$. It is particularly rich in nerthern literature, and among the MSS. is Rask's Sanscrit and Singhalese collection, which is said to be unique in Europe. Copenhagen possesses numerous hospitals and asylums, in which no kind of disease, peverty, or helplessness appears to be forgotten. At the head of these establishments is Frederick's hospital, which has beds for 350 patients, and which, in addition to the admirable accommodations of its interior, has a spacious court, laid out in planted alleys, as a promenade for the convalescent. The inhabitants of Copenhagen have a kecn relish for public amusements, and find ample means of gratifying it in their theatres, casinos, and tivolis.

Marbour, Trade, de.-The harbour is formed by the channel between the islands of Seeland and Amager, and possesses all essential requisites, being deep, spacious, and secure. The channel is closed at both ends-on the W. by the Langebröe [long bridge], which opens in the middle, and has a length of 440 ft .; and on the E. by a continuation of a floating bridge, stretching in the direction of the channel for 1100 yards, and dividing it into two unequal parts; that on the S. forming the great naval station of Denmark, where each ship has its place, and a woolen gallery ranges round, so as to enclose the whole fleet, and make it as easy and commodious to view the ships as if they lay on dry ground. The average width of the channel is about 70 yards; its depth from 18 to 22 ft .; and from either side of it numerous canals branch off; those on the S., giving access to the arsenal, the building and graving docks, and other extensive premises required by the navy, while those to the N . often penetrate a considerable way into the city, and give important facilitics for trade. The manufactures of Copenhagen are not very important, and are almost entirely confined to the supply of articles for home consumption, or for the army and navy. The chief of these are woollen cloth, for which, in addition to private establishments, there is a Government factory, employing 1200 persons, and annually furnishing about 150,000 ells; linen, and sailcloth, leather, tobacco, ironware, and porcclain. The shipping trade of Copenhagen is less extensive than might be expected from its admirable position, and other advantages. The number of vessels belonging to the port, in 1844 , was 252 ; tonn. 15,579 . The average entries of foreign vessels is 1400 ; tonn. 145,640 . Of these, 250 come from Great Britain with cargoes almost exclusively confined to coal, salt, and iron. The transit trade has considerably diminished; the perts, from which much of it used to come, now communicating directly ; but the coasting trade still gives the entries at 4000 vessels; tonn. 115,920 . The chief imports of Copenlagen are colonial produce, wine, tobacco, and naval stores; the chief exports, grain, hides, and cattle. Copenhagen is regularly visited by steam packets, chiefly from ports in the Baltic, and a railway, to connect it with Corsöcr, about $62 \mathrm{~m} . \mathrm{S} . \mathrm{W}$., has been conpleted as far as Röeskilde.

History.-Copenhagen is first mentioned as a fishing hamlet in 1043. In 1168, Bishop Absalon founded a haven, and erected a fort on the Slotsholm, as a place of refuge against the northern pirates. It then bore the nane of Axclhuis. Shortly after it rose to importance, and acquired its present name of Kjübenhavn, or Merchant's Haven. It has occasionally suffered much from hostile ravages, and still more from accidental fires, which have repeatedly laid the greater part of it in ruins. Its crowning disaster was the bombardment by the British in 1807. Pop. 127,000, of whom the greater part are Protestants.-(Bagessen's Danische Staat; Kopenhagen und seine Umgebungen. 1850.)

COPFORD, par. Eng. Essex ; 2350 ac. Pop. 645.
COPGROVE, par. Eng., E. York; 1050 ac. Pop. 103.
C(OPIAP(), or St. Francisco-de-la-Selva, a tn. Chili, S. America, prov. Atacama, on r. bank river of same name, about 60 m . from its mouth, at which lies the village of Copiapo, once the port, but this is now Caldera, a little to the N., lat. $27^{\circ} 19^{\prime} \mathrm{S} . ;$ lon. $71^{\circ} 2^{\prime} \mathrm{W}$. The town is regularly built, mostly of sun-dried bricks and wood. It has a college and several convents. Earthquakes are of very frequent occurrence, and are at times very destructive. So accustomed are the inhabitants to these shakings, that thongh they have to rush out of their houses when they hear the rumbling noise that usually pre-
cedes them, they return as soon as the trembliug is over, and converse as if nothing had occurred. In 1819 and 1822 the town was almost wholly destroyed by these visitations, and on 26th May, 1851, it was again serionsly damaged, and the houses in one street shattered. The want of volcanees in the neighbourhood is assigned as the reason for the frequency of earthquakes, theugh the whole country gives evidence of former and tremendous volcanic action.

Copiapo is the centre of the chief silver-mining districts of Chili, and possesses numerous establishments for the reduction of the ore by the well-known process of amalgamation, the machinery being worked by water-power. Besides silver, copper is very abundant (see Atacama); and gold, quicksilver, and lapis lazuli, are to be found in the vicinity; but silver and copper are the only metals that are regularly* worked. Pop. (1847), 11,898-The Raver, which, descending from the Andes, flows N.W., and falls inte the Pacific, has a total course of about 100 m . direct distance.

COPINSHAY, one of the Orkney Islands, Scotland, off the S.E. end of Mainland; lat. $58^{\circ} 55^{\prime} \mathrm{N}$.; lon. $2^{\circ} 26^{\prime} \mathrm{W}$. It is about 1 m . long, by $\frac{1}{2} \mathrm{~m}$. broad. During summer it is frequented by wild fowl, of various kinds, whose eggs and feathers constitute its chief traffic. Pop. (1841), 13.

COPLE, par. Eng. Bedford; 2170 ac. Pop. 551.
COPPARO, a tn. Papal States, deleg. of, and 11 m . E.N.E. Ferrara; with an annual fair. Pop. 2330.

COPPENAME, Coponame, or Cupanama, a river, Dutch Guiana. It rises in the mountains of the Guacanayas country, flows N., and falls into the ocean at the mouth of the Saramacca. It is a broad and noble river, but obstructed with rocks and shoals. Its banks present a uniform and im. penetrable mass of under-wood and timber trees, some of which are particularly adapted for boatbuilding, as the wood neither shrinks nor warps. Large quantities accordingly are taken for the Dutcl royal marine. Total direct course, 93 m .

COPPENHALL, par. Eng. Chester; 3050 ac. Pop. 747.
COPPERMINE RIVER:-1, A river, British N. America, which falls, after a course of about 300 m ., into the Arctic Ocean, at the Duke of York's archipelage, in lat. $67^{\circ} 40^{\prime} \mathrm{N}$. ; lon. $115^{\circ} 37^{\prime} \mathrm{W}$.; having its source in a rocky district, about lat. $65^{\circ} \mathrm{N}$., and lon. $112^{\circ} \mathrm{W}$. -2 , A river, U. States, rising in the N.W. territory, near the parallel $46^{\circ}$ N., and, after a short N. course, falling into Lake Superior, between the Flint Steel on the E., and the Iron on the W.

COP1'ET, a vil. Switzerland, can. Vaud, on the lake, and 9 m . N.N.E. Geneva. It is only remarkable for its château, with gardens and park, once the residence of Bayle (1670-1672), afterwards of the financier Necker, and his celebrated daughter, Madame de Staël-Holstein. Coppet has two yearly markets. In its vicinity several Roman inscriptions have been found. Pop. 600, all Calvinistic Protestants.

COPPINGFORD, par. Eng. Huntingdon; 1030 ac. P. 45.
COP'S, the Christian descendants of the most ancient inhabitants of Egypt, mingled, in some degree, with the Greeks, Nubians, Persians, and Abyssinians; but kept entirely separate, by religious antipathies, from the Arabian and Turkish invaders. They prove their antique origin by the striking resemblance of their features to the paintings and sculptures on their ancient temples, and even to the mummies which are still preserved. Their characteristic features aredark half-woolly hair, a flat forehead, small dark eyes, high cheeks, a short and somewhat elevated nose, large mouth, with thick lips, and a scanty beard. They have continued to profess Christianity, but have separated from the Greek church, and profess the tenets of the Eutychean sect. The Coptic language is now understood by few persons, and the Arabic being adopted in its stead, it may be considered a dead language. The Copts were at one time far more numerons than at present; they do not now compese more than onefourteenth part of the population of Egypt, their number not exceeding 150,000 , about 10,000 of whom reside at Cairo. They are distinguished by wearing a turban of black or blue, or a grayish or light brown colour, in contradistinction to the red or white turban. The Coptic era reckons from the persecution of Diocletian, called the Era of Martyrs, or from August 29, A.D 284.

COQ (Les), a til. Senegambia, country Foota Tore, at the W. extremity of isl. Morfil, formed by a branch of the Senegal; lat. $16^{\circ} 38^{\prime} \mathrm{N}$.; lon. $15^{\circ} 5^{\prime} \mathrm{W}$.

COQULET, an isl. England, in the German Ocean, off the coast of Northumberland, with a lighthouse, having i fixed light 80 ft . above sea level; lat. $55^{\circ} 20^{\prime} 6^{\prime \prime} \mathrm{N}$.; lon. $1^{\circ} 32^{\prime} 15^{\prime \prime}$ W. (r.)

COQUET, a river, England. See Cocket.
COQUILAGE (Grande and Petrte), two isls., Chagos archipelago, Indian Ocean, about lat. $5^{\circ} 20^{\prime} \mathrm{S}$.; lon. $72^{\circ} 20^{\prime}$ E., covered with cocoa trees. Close to the N. island, Petite Coquilage, there is a good channel, with 14 to 15 fathoms lepth of water in it; between the two islands, there are also 4 and 5 fathoms.

CUQUIMBO, a prov Chili, cap. same name; bounded, N. by prov. Atacama, E. the Andes, S. the river Choapa, and W. the Pacific. It occupies the entire breadth of Chili, from the Andes to the Pacific, and is generally about 100 m . broad. It is very mountainous; but there is only one voleano, that of Limari, within its limits. It has numerous mines of copper; and contains also gold, silver, quicksilver, and lead. The copper-mines are abundant and extensively wrought. forming now the staple mineral of the province, and of which very large quantities are exported. The flow of water throughout the province, except during the winter-months (May to August) is extremely small; none of the streams are navigable; the scantiness of their waters, the rapidity of their descent, and the ruggedness of their rocky and stony bottoms, rendering all attempts at navigation impracticable. The sides of the rivers are nearly perpendicular, and are sometimes crossed by a hanging lasso-bridge. The principal streams are the Coquimbo, the Barrazo, the Tongoy, and the Choapa; the latter, as already stated, forming the S. bourdary of the province.

The climate is remarkably salubrious and delightiul, it being always equable and mild. The province is not fertile in grain, not producing enough for its consumption, particularly in the N. valleys; but fruit is abundant, especially figs and grapes. About 25 m . E. from La Serena, there occurs a valley of 6 m . to 7 m . wide, remarkable for what are called parallel roads-narrow planes or terraces resembling roadsrunning along opposite sides of valleys at equal heights, supposed to be produced by the action of water, although there are instances where such supposition by no means fully or satisfactorily accounts for the plenomenon. These horizontal planes are in some places $\frac{1}{2} \mathrm{~m}$. broad, but their general width is from 20 to 50 yards. 'There are three distinctly characterized sets, the uppermost being 300 ft . or 400 ft . above the level of the sea, and 250 ft . from the bottom of the valley; the other two are, respectively, about 10 and 20 yards lower down. The rocks in this valley are principally granite and gneiss, with masses of schist, trap, and quartz mixed indiscriminately. Pop. (1847), 78,574.

COQUIMBO, or La Serena, a seaport tn. Chili, cap. above prov., beautifully situated on the river of same name, and not far from its embouchure in the Bay of Coquimbo; lat. $29^{\circ} 54^{\prime} \mathrm{S}$; ; lon. $71^{\circ} 19^{\prime} \mathrm{W}$. The town is well and regularly built ; the houses, one story in height, are mostly constructed of sun-dried bricks, and standing apart from each other, with large gardens between. It is a bishop's see, and contains several churches and convents; a public school and hospital; and at the S. extremity is the plaza or public square. The port of Coquimbo is several miles from La Serena. It is well sheltered on the N., and is both spacious and safe in all seasons, and on this account is much frequented, although both wood and water are scarce, the latter being besides of indifferent quality. These inconveniences, however, are in some measure compensated by an abundance of fish and fresh provisions, both of which are to be liad cheap. The export trade of the port consists cliefly of copper and more precious metals; the imports are provisions, clothing, and other necessaries, for the supply of the inlabitants and of the mines. The number and tonuage of vessels that entered the port in 1847, was 145 , tonn. 39,987 ; value of cargoes, $£ 150,850$. The value of exports, $£ 259,244$. But from the accounts lately received, the export trade has greatly increased during the last few years.

The inhabitants of La Serena are of mild and unaffected manners, well-bred, and hospitable, and appear to be, generally, in easy circumstances.

The name ' La Serena' was given to it by its founder, Don Francisco-de-Aguirre, in 1542, in honour of his native
place of the same name, in the province of Estremadura, old Spain. Pop. (1847). 16,000.

CORA, a tn. Turkey, cap. isl. Samos; lat. $37^{\circ} 46^{\prime}$ N., lon. $27^{\circ} \mathrm{E}$. At a little distance are the ruins of the temple of Juno. Pop. 1000.

CORA, Core, or Cori, a tn. Papal States, deleg. Frosinone, 30 m . S.E. Rome, situate on a hill, on which are the ruins of two temples-one of Hercules, and the other of Castor and Pollux ; the former now occupied as the baptistry of an adjoining church. The town originally belonged to the Volsci, and in its neighbourhood the remains of Cyclopean walls are traced. Pop. 3000.

CORAL, a small rocky isl., Brazil, S.E. coast, prov. SãoPaulo, 20 m . S.S.E. Paranagua ; lat. $25^{\circ} 45^{\prime}$ S.; lon. $48^{\circ} 35^{\prime}$ W . Abont 2 m . E. of the island, the water deepens to 12 fathoms.

CORAL SEA, a name first given by Flinders to that part of the S . Pacific Ocean lying between the Great Barrier Reef (see Barrier Reff), on the N.E. coast of Australia, and the Solomon, Queen Charlotte's, and New Hebrides islands. From the extensive development of coral in this region, the name is exceedingly characteristic.

CORANNAS, a tribe of S. Africa, inhabiting the country lying between Griqua-land on the E., and Namacqua-land on the W . They much resemble the Namacquas in customs, appearance, and language. They are chiefly to be found along the banks of the Great Orange River; are good looking, but excessively filthy. Their huts are constructed of matting, and are often removed from place to place. They cultivate nothing but tobacco, subsisting chiefly on the milk of their eattle, of which they have great numbers; their flocks also are immense.

CORANSAH, a dist. Upper Guinea, near the centre of the Ashantee country. Principal towns-Coransah, Sasafoor, and Boben. The first lies 70 m. N.N.E. Coomassie.

CORATO, a tn. Naples, prov. of, and 27 m . W. Bari, cap, circordario of same name. It contains a handsome collegiate church, five convents, and an asylum for female orphans. Pop. of tn., 3500 ; of circordario, 13,163 .

CORAZON, a mountain, Ecuador, in the Andes, 20 m . S.W. Quito. Its summit is occasionally covered with snow, and bears the form of a heart, from which it derives its name.

CORBALLY, three pars. Ireland:-1, King's co. and Tipperary; 12,747 ac. Pop. 3373 .-2, Cork; 869 ac. Pop. 193.-3, Waterford; 725 ac. Pop. 315.

CORBEIL, a tn. France, dep. Seine-et-Oise. 17 m. S.S.E. Paris, agreeably situate, 1. bank, Seine, at the confluence of the Essonne. It has large flour-mills, a grain market, an immense granary of six stories, capable of containing grain sufficient to supply Paris for a fortnight; and an ancient church. It has manufactures of shawls, cashmeres, printed goods, girths, woollen yarn, earthenware, and plaster; and has an extensive trade in grain, for the supply of the capital. Pop. 4358.

CORBETTA [anc. Curia Picta, Curbitum], a tn. and com., Austrian Italy, gov. Milan, prov. of, and 22 m. N.N.W. Pavia, 10 m . W. Milan. It is well built, and has a large parish church, and a castle. The inhabitants are chiefly agricultural ; good wine is produced. Pop. 4020.

CORBRIDGE, a par. and vil. England, co. Northumber land; 13,130 ac. The village, agreeably situate, 1 . bank, Tyne, here crossed by an old bridge of seven arches, and 33 m . E. Hexham, has six respectable streets, and, besides the parish church, contains Wesleyan and Primitive Methodist chapels, a national, and three other schools. The in habitants are chiefly employed in agriculture; the only mannfactures being earthenware, bricks, and tiles. Corbridge was formerly a borough and market town, and a place of considerable importance. Fairs for live stock, anong the largest in the kingdom, are still held at Stagshaw Bank, within the parish. There is a station bere on the York, Newcastle, and Berwick Railway. Pop. of par. 2103; of vil. 1356.-(Local Correspondent.)

CORBY, par. Eng. Northampton; 2800 ac. Pop. 791.
CORBY, a par. and vil. England, co. Lincoln; 3790 ac. The village, 28 m. S. by W. Lincoln, was once a market town. It has an ancient church, a Wesleyan cbapel, and a free grammar-school. Pop. 714.

CORCOMOHIDE, par. Irel. Cork; 10,013 ac. P. 5943.

CORCOVADO, a remarkable mounlain, Brazil, 2 m. from Rio-de-Janeiro. The highest portion of the mountain, which appears separated from the general mass, rises in a sharp isolated peak to an elevation of 2000 ft . above the level of the sea. The view from the summit is magnificent, comprising the harbour, eity, and euvirons of Rio Janeiro.

CORCUBION, a th. and port, Spain, Galicia, prov. of, and 50 m . S.W. Coruña, near Cape Finisterre. It has two squares, a parish ehurel, sehool, prison, and some fountains. Fishing, salting fish, tillage, and cattle-rearing occupy the inhabitants. Im-ports:-sugar, brandy, soap, paper, wine, oil, glass, iron, esparto, fish-hooks, earthenware, wearing apparel, \&e. Exports:grain, timber, potatoes, salt fish, \&e. Vessels that entered in 1813,209 ; tonn. 5220. Pop. 1140.

CORDANGAN, par. Irel. Tipperary ${ }^{*}$ 3906 ac. Pop. 3088.

CORDES BAY, S. coast, Patagonia, Strait of Magalhaens, 45 m . N.W. Cape Froward. Its entrance is obstructed by sandbanks, and, in some places, ly rocks. It was discovered, in 1599 , by simon de Coriles, a Duteh navigator.

CORDUUAN Light-house. See Anthos.

CORDOV A, a prov. Spain, Andalusia, bcunded N. by prov. Badajos and Cindad Real, E. by Jaen, S. by Granada and Malaga, and W. by Seville; between lat. $37^{\circ} 12^{\prime}$ and $38^{\circ} 44^{\prime} \mathrm{N}$.; and lon. $3^{\circ} 56^{\prime}$ and $5^{\circ} 32^{\prime} \mathrm{W}$.; area, $6177 \mathrm{sq} . \mathrm{m}$. It is naturally divided into two parts by the Guadalquiver. The N. portion is mountainous and rugged, being eovered by offsets of the sierra Morena. The S. side is comparatively level, and remarkable for fertility and picturesque seenery. The mountain slopes are elothed with pine, oak, holly, beeeh, chestnut, bireh, heather, broom, and other trees and shrubs; and they likewise yield iron, copper, silver, lead, antimony, and coal, marble, granite, \&c. The plains and valleys are very fertile, produeing large erops of crain, hemp, and flax; and a great abundance of grapes, figs, melons, oranges, lemons, mulberries, olives, and other fruits. Sheep, goats, pigs, horned eattle, mules, and an esteemed breed of horses, are reared; game and fish are also plentiful. The Giuadalquiver, one of the finest rivers in Spain. traverses the province from E.N.E. to W.S.W., reeciving in its course the (iuadabardo, Guadiato, Bembeza, Guadajoz, Guadamillata, and numerous smaller tributaries. The clinate among the highlands is bracing and healtly, though cold and damp in winter; in the plains it is solt and genial, suited to the perfecting the rich fruits, and odoriferous and tropieal flowers whieh abound. Woollen, linen, hempen, and silken fabries, baize, hats, paper, soap, hardware, earthenware, leather, and esparto, are manufactured, brandy distilled, and wine and oil of fine quality expressed. The people are, however, ehiefly devoted to tillage. Numerous universities, eolleges, schools, and other benevolent institutions, are established in the towns. Pop. 348,956.

CORDOVA, or Condona [anc. Corduba, and Colonia Patricia], a tn. Spain, Andalusia, cap. above prov., lat. $37^{\circ}$ $52^{\prime} 15^{\prime \prime} \mathrm{N} . ;$ lon. $4^{\circ} 49^{\prime} 37^{\prime \prime} \mathrm{W} .($ (.) ; in a beautiful and extensive plain, r. bank, Guadalquiver, here erossed by a Moorish bridge of 16 arehes, 65 m . N.E. Seville. It is surrounded hy a wall, flanked with towers, several of whieh are in a rninous state, and is entered by 13 gates, all of considerable antiquity, but of little architectural merit, exeepting that ealled Puente, leading to Seville, consisting of a magnifieent areh, resting on four Dorie columns. The town is of a rectangular form, with its greatest length E. to W., and consists of two distinct portions-an upper and a lower-separated from each other by a wall. The former is the original nucleus of the town, forming that part to which the name of Villa properly belongs, and was occupied originally by the Romans, who founded it; the latter was intended for the native population. The extent of space oecupied is far larger than the present inhabitants require, and hence signs of ruin and deeay meet the eye in every quarter. In eonsequence, Cordova has

VoL. I.
sometimes been deseribed as partaking less of the character of an existing town, than of a magnificent inuseum of antiquities. The houses are generally large and commodious, consist of two stories, and have spacious courts, often entered by a

## CORDOVA.-From Huberts' Spansh shetches.

porch of marble columns, and supplied with fountains of pure water. They have usually good gardens attaehed to them. The streets, on the contrary, are generally narrow, dirty, and ill paved. There are several exceptions, however; but, by a strange reversal of the nsual order, the one called Feria, which is the most spacions of all, is one of the worst built. The squares are numerous, and, for the most part, of large dimensions. They are 18 in number; lut the only one deserving of particular notice is that cailed Plaza de la Constituçion, still better known by its original name, Corredera, given to it as the place where tournaments and other feats of ehivalry were performed, and bull fights exhibited. The honses around it are built on an miform plan, with the greatest regularity, are supported on arehes, and adorned with three rows of balconies. The edifiees most deserving of notice are the cathedral, a vast structure, oceupying the site of a Roman temple of Janus-originally luilt by the Moors, in the 8 th eentury, for their prineipal mosque-of a square eastellated form, and unprepossessing appearanee externally, but remarkable within for its labyrinth of low pillars, consisting of rare marbles, jasper, and other costly materials, collected, and in a manner luddled together from all quarters, and for the variety and richess of its decorations; the coliegiate chureh of San Hipolito, founded in 1348 , by Alphonso XI., who, as well as his father, Ferdinand IV., are buried in it; the churel of Santa Marima, of very ancient Gothic, and adorned with some fine paintings; the chureh of San Salvador, a beautiful Doric structure, originally belonging to the Jesuit College; the ehureh of santa Maria Magdatena, one of the oldest in Cordova, and believed to have been used as a Christian chureh during the domination of the Moors; the monastery of San Pablo, one of the most remarkable edifices of the place, but now, in consequence of the suppression of the monastery, in a very dilapidated state; the monastery of San Pedro el Real, also suppressed, and hence, though a beantiful and noble structure, converted into a cloth factory; the provineial and city offices, forming an extensive series of buildings, many of them interesting from the remains of Roman and Moorish struetures incorporated with them; the Episcopal Palace, finely sitnate, surrounded by beautiful gardens, and possessing a library of 15,000 volumes, but, though of mueh pretension, of no arehitectural merit; the general hospital, foundling, and several others; the diocesan seminary, colleges of Ascension and Santa Victoria, and a large number of primary sehools. The manufactures, whieh were at one time extensive, have greatly fallen off, and now eonsist chiefly of common woollen and linen eloth, a few silk stuffs, as taffety serge and ribbons, soft soap, hats, plate, leather, and stareh. There are also a paper, and numerous flour mills. The trade
in the above articles is of very limited extent; and the only other article deserving notice is flour, of which a good many barrels are sent to Madrid and other places. Besides a weekly market, there are two annual fairs, both of which last three days, and are numerously attended. The business done is chiefly in cattle and horses.

Cordova was founded by the Romans, but at what period is uncertain. It was afterwards taken by the Goths, and again by the Moors, when it was rendered subject to the Caliphs of Damascus. In 1236 it was taken, and almost wholly destroyed, by Ferdinand III. of Castile-a blow from which it never recovered. It contained, in the 10 th century, nearly a million of inhabitants, 300 mosques, 900 baths, and 600 inns-a statement which sufficiently marks the importance and splendour from which it has fallen. Cordova is the birthplace of the two Senecas, and of Lucan, the poet. Pop. 41,976.

CORDOVA, a prov. and city, $L_{a}$ Plata. The PRovince, which, after that of Buenos Ayres, is the most important of the Union, is bounded, N. by Santiago del Estero, E. by Santa Fe, S. by the Pampas, and W. by provs. Rioja, San Juan, and San Luis. Near the W. frontier, running N.W. to S.E., and also ramified throughout the central parts of the province, are the mountain ranges of the sierra de Cordova, from which descend numerous rivers and streams, fertilizing the adjacent plains. Of these streams, the Tercero is the only one which reaches the Paranà, all the rest being lost in the level intervening plains. The plains, being perpetually irrigated by so many streams, produce abundance of excellent pasture for cattle and sheep, which are reared in great numbers, as the people prefer pastoral to agricultural pursuits. That portion of the province nearest the sierra is covered with woods and forests. The trees are, for the most part, varieties of the mimosa family; and the palm, aloe, and cactus, in every variety, are also found in the northern part. The governor, though elective, possesses nearly arbitrary power; he not only commands the troops and the militia, but, on appeal, may reverse the decisions of the legal tribunals. Besides Cordova, the capital, there are other towns-Concepcion, Ranchos, and Carlotta-which are little else than miserable villages. Pop. (1822-23) 85,000.——The city, cap. of above prov., is situate in a beautiful valley, on the Primero, and is well sheltered from the N. and S. winds, 387 m . N. W. Buenos Ayres, lat. $31^{\circ} 35^{\prime} \mathrm{S}$. ; lon. $63^{\circ} 50^{\prime} \mathrm{W}$. It is well built, and contains many churches, and a university, once held in great repute, but now dwindled down to a mere provincial school. It was for a long period the residence of a bishop. Here, also, was the celebrated library belonging to the Jesuits, which, on their expulsion from the city, was transferred to Buenos Ayres. Provisions are remarkably cheap, and the inhabitants are noted for their unbounded hospitality to strangers. Cordova is the centre of communication between Buenos Ayres and the upper pro vinces. Its produce, which consists principally of hides and wool, is sent to the capital of the republic, from which it receives goods of European manufacture in return. It was founded by the conquerors of Tucuman, in 1573. Pop. (1822-23) 13,000.

CORDOVA, or Cordoba, a tn. Mexican Confederation, state of, and 57 m . W.S.W. Vera Cruz, at the foot of the volcano of Orizaba. The streets are broad, and well paved; the houses generally of stone. It has numerous domes, towers, and steeples, and a large square in the centre, with Gothic arcades on three sides-the Cathedral (a very handsome edifice, and richly decorated in the interior) occupying the fourth -and a fountain in the middle. Cotton, woollen stuffs, and leather, are manufactured, and sugar, coffee, and tobacco, cultivated. According to Humboldt, the quantity of tobacco produced in the districts of Cordova and Orizaba was sufficient, before the revolution, for the supply of all Mexico. The climate is hot and moist, and the country around very productive. Pop. (1841) 6000.

CORDOVADO, a tn. Austrian Italy, gov. Venice, 17 m . S.S.W. Udine, betwcen the Tagliamento and the Limene. It contains a castle, parish church, and six oratorios. P. 2395.

COREA, or Korea [called by the natives Tsjo-sien, by the Chinese, to whom it is tributary, Kao-li, and by the Japanese Korai, whence its European name of Corea, or Korea], is an extensive country in N.E. Asia, whose limits are not
accurately known, bounded, N. by Manchooria, from which it is separated by the Amba Chayan Alin mountains; N.W. by the Chinese prov. Leao-tong, from which it is separated by a wooden stockade, now in ruins, and connected with the great wall of China; E. by the Sea of Japan, S. by the strait of Corea, and W. by the Whanghai, or Yellow Sea, and the Gulf of Leao-tong. The cap., King-hi-tao, is situate on the Kiang river, in the centre of the kingdom, lat. $37^{\circ} 40^{\prime} \mathrm{N}$.; and long. $127^{\circ} 20^{\prime}$ E. Corea comprises a peninsula with a small portion of the continent to which it is attached-the continental portion extending in breadth from lon. $124^{\circ}$ to $132^{\circ}$ E., the peninsula from lon. $125^{\circ} \cdot 15^{\prime}$ to $131^{\circ} 30^{\prime} \mathrm{E}$., its average width being about 135 m ., while the total length of the country, from N. to S., is somewhat less than 600 m. , between lat. $33^{\circ} 20^{\prime}$ and $43^{\circ} \mathrm{N}$. Corea also includes numerous groups of islands in the Yellow Sea and strait of Corea, and the island of Quelpaert, $50 \mathrm{~m} . S$. the peninsula. Area of continental portion, about $80,000 \mathrm{sq}$. m.

The peninsula is traversed through its length by a cordillera, abrupt and precipitous on the E., but forming a gentle slope on the W. side, which, being watered by the principal rivers of the country, is exceedingly fertile. The largest of these rivers are the Yalukiang and the Thumenkiang, navigable for considerable distances into the interior, for boats of ordinary size. The former is capable of bearing vessels of large burden for 20 m . above its mouth. The coasts are, for the most part, rocky and almost inaccessible; yet there are some excellent harbours. The climate is very cold, and in the summer rain is frequent. In the N. the only grain that can be grown is barley; but in the S. the soil is fertile, and wheat, cotton, rice, millet, indifferent legumes, and hemp, are grown extensively. The rice is inferior to that of Japan, but cultivated with much assiduity, and under considerable disadvantages, from the hilly nature of the country. A decoction of pinang, a kind of walnut, is substituted for tea. The ginseng root is a production of Corea, greatly valued in China and Japan, where high prices are given for it. Its virtue is said to depend much upon the locality whence it is brought, the best being from the mountains of the $\mathbf{N}$. It is transparent, and of an amber colour, and is kept in beautiful boxes of gold and silver, among grains of rice. Potatoes were introduced by Gutzlaff and Lindsay, in 1832 . The uncultivated northern parts of the kingdom are covered with extensive forests. Fruits are abundant, including pears, plums, strawberries, blackberries, apricots, and grapes; but, on account of the continual summer rains, all are watery and insipid. Gold, silver, copper, rock-salt, iron, and coal, are found, but are little attended to. The domestic animals are oxen, pigs, goais, dogs, and cats, and a small race of horses, very strong and spirited, called mon-k-wat. Oxen only are used for agricultural labours, the horse being reserved expressly for the saddle. Sheep are almost unknown, there being, it is said, a prohibition against rearing them. Stags, hares, foxes, wolves, and sables, are abundant; and the skins of the sables form a prominent article of tribute. The royal tiger and panther are so numerous that their skins form an article of commerce with foreigners. These aninals are distinguished from those of the same kind found in the tropics by the greater length of the hair-the Bengal tiger being far inferior in beauty of coat to that of Corea. Corean musk is much used as a medicine and perfume. The birds are, domestic fowls, pigeons, geese, ducks, cormorants, pheasants, falcons, herons, cranes, and storks. Caymans, of 30 or 40 ft . long, are said to be in the rivers, and venomous serpents are common. Whales, seals, \&c., frequent the coast in winter. Fish are very plentiful.

The manufactures of Corea are, generally speaking, coarse. They comprise tissues of hemp, cotton, and grass, strong but coarse; silk in cousiderable quantity, but not very fine; pottery and porcelain, sometimes of monstrous size; excellent arms-Corean sabres and poignards being much sought for by the Chinese; and well-made matchlocks. Paper is an important article of manufacture, entering, as it does in Corea, into the construction of numerous articles. Of paper are made hats, umbrellas, sacks, and cloaks, which appear to wear well. A few slips of wood, covered with paper, forms a door, through which the occupant, by making a hole with his finger, is enabled to see what is going on in the street. Ships in Corea are simple and light, from 30 to 50 ft . long; the wood work clumsy, and fastened with wooden pegs, no metal being

## COREA

employed in joining any part of them. They have two masts, each supporting a sail made of straw matting, attached to a heavy yard, and capable of being furled or unfurled by means of a pulley at the upper extremity of the mast. The anchor is of wood, as it is never necessary to sink it, and the cordage made of straw, or the stalks of palm leaves.
The foreign commerce is trifling, and confined to China and Japan. Skins, silk, raw and mannfactured, cotton cloths, paper, and ginseng, are exported; and aromatie woods, pepper, various kinds of horn, and Japan ware, are imported. A strong feeling of jealousy existing, on the part of the government, of intercourse with foreign conntries, there is little or no commercial communication with Europeans, and scarcely even with the Chinese. A similar disinclination existing to traffic with the Manchoo Tartars, the northern frontier is deserted for several miles. Internal commerce there can be almost none, from the want of good roads; those that are best not being capable of admitting more than four men abreast, and frequently, by rocks or large stones, reduced to half that breadth: many are mere paths, scarcely traceable, and often inundated. The bridges, composed of stakes fixed in the stream, and covered with earth, are swept away by every flood; but numerous streams have not even this apology for a bridge, but are supplied only with stepping-stones.

Corea is governed by a king, whose sway is, in a manner, absolute, and, though tributary to China, his freedom of action secms quite uncontrolled. The governmental constitution of the crown is organized like that of China. The ministry is divided into five departments, which form the centre of all civil and military appointments, so that from them issues the administration of every religious, political, and social ordinance. The power of the king is held inviolable and sacred, from the union in his own person of the hierarchical and secular sovereignty. The country is divided into eight circles, or provinces, each of which is placed under the authority of special governors, who, as in Japan, are personally responslble to the government. The king's revenues, which are very considerable, are derived chiefly from the letting out of lands, and a tithe of all produce, he being the possessor of nearly all the landed property in the kingdom. The prevailing religion is Buddhism, which was introduced, from China, in the year 372 , although there appears to be another religion in existence in the country, like the Sin-too in Japan, and the Taosyn in China. Confucius also is much esteemed in Corea, and has many followers. Christianity, which had been introduced through Japan, is now extinct. By some, the population is divided into four classes-peasants, artisans, soldiers, and priests; by others, into slaves, people, and nobles. In whatever manner divided, it would appear that the privileged classes, whether rich or poor, exact great submission from those under them, demanding and obtaining the infliction of most summary and unreasonable punishment on those who have offended them, and often, with impunity, taking the law in their own hands.

The Coreans, in stature, rarely exceed $5 \frac{1}{2} \mathrm{ft}$. They are strong, well-made, and active. The majority have the low forehead, the depressed nose, wide nostrils, oblique eyes, thick lips, and scanty beard, characteristic of the Mongolians; while others have the nose straight, and elevated at the root, the conformation of the eyes resembling the European, the forehesd higher, and the beard thicker, than those of the other race-altogether indicating a Caucasian origin. In manners, the Corean is habitnally serious, but he readily becomes frank and cheerful. His deportment is casy and assured, and seems to show more pride and independence than that of the Chinese and Japanese; but he is inferior to the latter in civilization and intelligence. He is said to be faithful and honest, but gluttonous, and fond of an intoxicating liquor made of rice, and, altogether, more inclined to oriental effeminacy than the Japanese; yet, though loving repose, he does not fear fatigue, and, in summer, labours all day and sleeps little. The Corcan is fond of music and dancing, is a great talker, and a habitual liar, knowing and having seen everything. He is filthy in his person and in his house, which in towns, though sometimes built of brick, more frequently consists of a few branches covered with earth and straw, raised a few inches above the ground, to admit below the flues of the cooking fires, and without any aperture for light or air, except the door. The beams of the roof form the wardrobe;
the earthen floor is covered with mats, which also serve as beds, and, altogether, the interior is sombre, dirty, and miserable-looking, and is rich in nothing but insects of every size and kind. The dog is considered a delicacy, and takes the place of mutton, there being, as already stated, no sheep in Corea. Vinegar, oil, onions, and garlic, are used at repasts; also wine of many kinds and colours, but none made of grapes. In warm weather, the nobles drink brandy and honey-water; the common people rice-water.

Polygamy is allowed in Corea, but the women enjoy more freedom than in China. For dress, both sexes wear wide pantaloons; the men have a vest which reaches below the haunches; the women a linen jacket, and a short robe, confined in plaits at the loins. Ladies wear very ample robes, and sleeves which conceal the hands. The rich wear silk stuffs; the common people cotton, generally white, which, being easily soiled, gives them a very slovenly appearance. Sandals, made of straw, are used by the women and children, worn elegantly interlaced with bands of coloured cotton; persons of consequence have shoes like the Chinese. Young and unmarried persons, in general, wear long hair, parted in the centre of the forehead, and falling on the neck; ladies have their hair curled in a tuft on the forehead, and confined at the back of the neck with a needle magnificently ornamented. The men fasten their hair in a knot on the top of the head, and have a band of horse hair, called man-gong, curiously twisted, round the forehead. In summer, pointed hats of straw or bamboo are worn, having immense brims, and covered with cotton, painted white or black; and in winter, caps which entirely cover the head, and are lined with the fur of the gray squirrel. Parasols and fans are generally used, the latter often beautifully adorned with precious stones.

Of all the languages of N.E. Asia, the Corean is the least known. Pure and original in principle, it has become corrupted by the introduction of a multitude of Chinese words, and by the general use of Chinese characters, which are employed by the higher classes for all official, scientific, and religious purposes, while, for the uses of private life, another kind of character is used, remarkable for simplicity.

Corea was first subjugated by the Tartars, but in about B.c. 1120 , the Chinese appear to have gained possession of the country. The Japanese conquered and held it between the years 1692 and 1698, when it again fell under the sway of China, and still pays a small annual tribute of 800 oz . of silver to the Emperor; to whom, also, an embassy is sent every year with presents, and to communicate information of any political event of importance that may have occurred. (Siebold's Archiv. zur Beschreibung von Japan; Belcher's Voyage of the Samarang; Klaproth; Ritter's Erdkunde; Du Halde; Nouv. Ann. Voy., \&c.)

COREA, or Korea (Archipelago of), or Corean Archipelago, an extensive group, or a series of groups, of islands, chiefly in the Whanghai or Yellow Sea, W. coast, Corea, and extending from the island of Quelpaert ; lat. (N. part) $33^{\circ} 29^{\prime} 42^{\prime \prime} \mathrm{N}$., lon. $126^{\circ} 56^{\prime} 30^{\prime \prime} \mathrm{E}$. to lat. $36^{\circ} 50^{\prime} \mathrm{N}$. They are very imperfectly known, but form several groups, of which, reckoning $S$. to N., may be named, Port Hamilton, Lyra's, Amherst's, Hatton's, and Clifford's islands. They are chiefly of granite rock, rising at times to sharp peaks of 2000 ft . high, and having frequently most fantastic shapes, and rugged and bare; basalt likewise occurs, and sometimes is columnar. Many of the islands, however, are fertile, and covered with a luxuriant vegetation, and the hamlets and houses of the more wealthy inhabitants are often delightfully situate, embossomed in shady groves, with verdant meadows beside, browsed on by numerous cattle. The houses consist of a sitting-room, a sleeping apartment, and a shed for culinary purposes. A main occupation on many of the islands, more especially those having little vegetation, is fishing, which, in fact, must form the principal source of subsistence to the inhabitants. See Quelpaert.

COREA (Strait of), a narrow sca connecting the sea of Japan with the Yellow Sea; and having the peninsula of Corea on the N.W., and the Japanese island of Kiu-Siu on the S.E. It contains several islands.

CORELEY, par. Eng. Salop, 1340 ac Pop. 525.
CORELLA, a tn. Spain, Navarre, 12 m . W. Tudela, 15 m. N.N.W. 'Tarazona, in a plain, l. bank, Alhama. The streets are clean, paved, and lighted with lamps. The town
comprises five squares, five churches, four chapels, a townhouse, prison, hospital, two schools, and a cemetery. Manu-factures:-soap, wax, earthenware, cordage, shoes, brandy, wine, oil, and liquorice. Trade:-cattle, grain, and fruits. A yearly fair is held in September. Pop. 4000.

COREN'TYN, a large river, $S$. America, forming the boundary between British and Dutch Guiana. It rises in lat. $1^{\circ}$ N., and, after a course chiefly N., falls into the Atlantic, by a broad estuary, in lat. $6^{\circ} 2^{\prime} 15^{\prime \prime} \mathrm{N}$. ; lon. $57^{\circ} 1^{\prime} 47^{\prime \prime} \mathrm{W}$. It is navigable for boats to the junction of the Cabalaba, a distance of 150 m . from the sea.

CORFE, par. Eng. Somerset; 1050 ac. Pop. 279.
CORFE-CAstle, a par. and tu. England, co. Dorset; 9850 ac . The town, situate on an eminence nearly in the centre of the peninsula of Purbeck, $17 \frac{3}{4} \mathrm{~m}$. E. by S. Dorchester, consists of two priucipal streets, diverging from the market-place, in the centre of which is an ancient stone cross. It has a spacious old chureh, a chapel for Independents, with national and British schools for boys and girls. An extensive trade was formerly carried on in gray or Purbeck marble, in which the neighbourliood abounds; but the inhabitants are now chiefly employed in the digging of potter's clay, upwards of 30,000 tons of which article are annually shipped for the Staffordshire potteries. CorfeCastle formerly returned two members to the House of Commons, but was disfranchised by the Reform Bill.-The castle, now in ruins, from which the place takes its name, stands a little N. of the town, with which it is connected by a bridge of four arches. It was built by King Edgar, and at its gate his son Edward, the martyr, was murdered. It was the occasional residence of King John, and was for some time the prison of Edward II. During the great civil war, it was heroically defended against the Par-
 liamentarian forces by Lady Bankes. It was subsequently taken by Fairfax, through the treachery of an officer of the garrison, when it was demolished. Pop. 1946.

CORFE-Mullen, par. Eng. Durset; 2890 ac. Pop. 758.
CORFU [anc. Corcyra], an isl. Mediterranean, seat of the Government of the Ionian islands, of which it is the most N., off S. coast Albania, between lat. $39^{\circ} 22^{\prime}$ and $39^{\circ} 50^{\prime} \mathrm{N}$. and lon. $19^{\circ} 33^{\prime}$ and $20^{\circ} 8^{\prime}$ E. Length, N.W. to S.E., 40 m .; breadth, at the $N$. end, about 18 m ., from which it suddenly diminishes to 8 , and afterwards gradually to 3 or 4 , termin ating, finally, in a narrow point. Area, $227 \mathrm{sq} . \mathrm{m}$. At its N. extremity, it is separated from the mainland by a channel not exceeding $1 \frac{1}{2} \mathrm{~m}$. in width. The island is, for the most part, rocky and mountainous. The greatest heights are attained in the N.W., where one peak, St. Salvador, reaches an elevation of 2979 ft . The higher regions are extremely rugged and barren, but the valleys and level tracts between are fertile, though, in general, very narrow, in consequence of the close arrangement of the hills. The climate is mild, but variable, being subject to sudden and extreme changes from heat to cold, the winds from the N. and E. bringing the latter by passing over the snowy mountains of the continent; those from the S. bringing the former, with, frequently, rain and thick fogs. Earthquakes are also felt here occasionally, but are attended with less serious consequences than in Cephalonia, from which it is distant about 65 m . only. Corfu consists chiefly of nummulitic limestone, with silicious and arenaceous beds, and near the city some tertiary formation of blue clay and fine sand. The island is, on the whole, wellwatered, though many of its streamlets are dried up during the summer. Its principal products are-olive-oil, wine, vegetables, fruit, honey, wax, salt, flax, some corn and pulse, but, singular enough, no currants, the most important crop of the other islands. There are few timber trees in Corfu. The chief article of export is the olive-oil, which empleys about 1000 presses. Next in importance is salt, obtained from the water of the salt marshes that communicate with the sea. Pop. (1836), 65,107.

CORFU, the cap. of above isl., and situate on the E. side, at nearly an equal distance from either extremity ; lat. (citadel) $39^{\circ} 36^{\prime} 48^{\prime \prime} \mathrm{N} . ;$ lon. $19^{\circ} 15^{\prime} 30^{\prime \prime} \mathrm{E}$. (R.) It is strongly forti-
fied, both towards the sea and the land, with three gates fronting the former, and one on the land side. The houses are generally two stories high, with terraces at the top; the streets are narrow and irregular, and the principal ones only are paved. Close to the town is the citadel, on a rocky promontory, separated from the former by wet ditches, and an esplanade. Here are a barrack, arsenal, military hospital, the residence of the Lord High Commissioner, and a number of private houses. Corfu is defended by two forts besides the citadel, one of these, Fort Vido, is on a small island about $1 \mathrm{~m} . \mathrm{N}$. from it. The city contains a cathedral, with a number of Greek and R. Catholic churches and chapels,
a university, having four faculties-theology, law, medicine, and philosophy, with 14 professors; a gymnasium, an ecclesiastical seminary, and several primary schools, all supported by the Government. The harbour, formed by the island of Vido, is safe and commodious, with a depth of from 12 to 17 fathoms. At its N. entrance is a lighthouse, and at its S . extremity a floating light. Around the city are many agreeable walks, including the esplanade, which is adorned with trees. Corfu was formerly ill-provided with water, but is now abundantly supplied with that necessary element, which is conveyed to it by iron pipes from a distance of 7 m . It is the residence of the archbishop of the Greek Latin ehurch, the seat of the senate, the high court of appeal for all the Ionian islands, as well as of the civil, criminal, and commercial courts for the island of Corfu itself. Pop. 17,000, exclusive of the military.

CORHAMPTON, par. Eng. Hants; 2410 ac. Pop. 181.
CORIA [anc. Caurium], a tn. Spain, Estremadura, prov. of, and 34 m. N. by W. Caceres, on a hill which slopes towards the N . It consists of the town proper and the suburbs. The town is surrounded by a good wall, flanked with towers, and is entered by four gates; the suburbs join it on the N.E. and $W$. It is defended by a strong castle, and is, on the whole, well built, having good houses, and spacious, clean, and tolerably well-paved streets. It contains a cathedral, which is a handsome and capacious Gothic structure; three other churehes, an episcopal palace, palace of the Duke of Alba, an hospital, diocesan seminary, and several other schools; and has manufactures of linen and chocolate; and some trade in agricultural produce; a weekly market, and three annual fairs, which lasts three days each. Pop. 2793.

CORIA-del-rio, a tn. Spain, Andalusia, prov. of, and 8 m . S. W. Seville, r. bank, Guadalquiver. It is tolgrably well built, and possesses a parish church, townhall, four sehools, a prison, hospital, storehouse, and cemetery. The people manufacture soap, tiles, bricks, oil, wine, and liquorice. Pop. 3183.

CORIGIIANO, two tns. Naples:-1, [anc. Coriolanum], prov. Calabria Citra, 24 m. N.E. Cosenza, on a hill, near r. bank, Corigliano. It is badly built, and the streets are nar
row, dirty, and crooked. It contains a citadel, customlouse, five churches, six convents, an hospital, and an aqueduct. The neighbourhood produees wine, oranges, olives, and lemons. The ancient Sybaris, of which no vestiges now remain, was situate not far from this town. Pop. 13,204.-2, prov. 'Terradi-()tranto, 14 m . S.N.E. Lecce. Pop. 2460.

CORINALDO, a tm. lapal States, deleg. of, and 24 m. W. Ancona, between the Misa and Cesano. It has six amual fairs. Pop. 5859

CORINGA, a tn. Naples, prov. Calabria Ultra $11 ., 6 \mathrm{~m}$. S. Nieastro. It suffered from an earthquake in 1783. In the vieinity are mines. Pop. 3000 .

CORINGA [Caranga], a considerable scaport, Ilindoostan, prov. N. Cirears, dist. of, and 38 m. S.E. Rajamundry; lat. $16^{\circ} 49^{\prime} \mathrm{N}$. ; lon. $82^{\circ} 19^{\prime} \mathrm{E}$. (R.); near the mouth of the Godavery. With the exception of Blackwood's harbour, Coringa Bay is the only smooth water during the S.W. monsoon, on W. side of the Bay of Bengal, and it possesses the only wet dock on the continent between Calcutta and Bombay. A great number of small vessels are amually built here. Cotton stuffs and teak are exported; and silk, paper, copper, \&c., imported. In 1784 , an inundation of the sea destroyed many lives and much property.

CORINTII, an ancient and celebrated city, Grccee, in the Morea, near the $\mathrm{S} . \mathrm{W}$. extremity of the isthmus of same name, between the gulfs of C'orinth and Eqina, 48 m . W. hys. Athens; lat. $37^{\circ} 58^{\prime} 22^{\prime \prime} \mathrm{N}$. ; lon. $23^{\circ} 28^{\circ} 29^{\prime \prime}$ E. In remote times, Corinth was one of the most flourishing eities of Gireece, being an entrepôt for all merehandise passing from sea to sea, and commanding, at the same time, all the traffic from $N$. to s. (ioods conveyed by sea from the W. were landed at

tionary war in 1822. A few houscs, however, have since been built, and new strects marked out; and although no great progress has been made, it has begm to assume a neat and orderly appearance. The traces of the ancient walls of the city are still diseernible; but the principal and most interesting monuments of antiquity now remaining are the citadel or Acro-Corinthus, and seven Doric columns the remains of a Doric temple, at the S.W. extremity of the town The citadel stands on an elevation 1800 ft . high, on the S . side of the eity, and is considered the sceond strongest fortification in Grecce. The view from this point is singularly magniticent. The columns above mentioned are of the most remote antiquity, but are not remarkable for their beauty or proportions. To the N. of the market-place, there is also a large mass of brick work, supposed to be the remains of a bath or gymmasium. Ancient Corinth was sacked, and nearly destroyed by the Romans, b.c. 146 ; nearly all the treasures of art there aecumulated were carried to Rome. The later city was possessed successively by the western Emperors and the Venctians; from the latter, Mahomet 11. wrested it A.D. 1458 . It was recovered afterwards by the Venetians in 1687 , and retaken by the Turks in 1715 , who held it till 1823. The air of Corinth is unhealthy, particularly in antumn, when the principal inhabitants retire to their country houses. It was on account of this insalubrity, and of the impracticability of forming ports in either of the gulf that, on the establishment of the kingdom of (ireece, after the revolution of 1823 , Athens was chosen as the future capital and place of royal residence, instead of Corinth.

CORINTII (Istimus or), a narrow tract of land, Grcece, conneeting the Morea with N. (ireece, and separating the Gulf of Lepanto or Corinth from the Gulf of Egina. It is ahout 10 m . in length, and from 6 to $4 \frac{1}{2}$ in breadth. Many projects were early set on foot to cut through this isthmus, and to form a communieation between the gulfs above named, by which a long and, as it was then considered, dangerous navigation round the Malea promontory or Cape St. Angelo, and Cape Matapan. might be avoided; and such an attempt was actually made by the Emperor Nero, by whose order an excavation was begun about 200 ft . wide, but very shallow, the traces of which may still be scen for about 1200 yards. The rocky nature of the isthmus, consisting of a limestone ridge, forming the connecting link between two lofty mountain chains, presented obstacles which the engineering skil of those times was unable to overcome. The plan of fortifying it, so as to guard the Morea against hostilities by land, early suggested itself and was actually accomplished. A great wall, tlanked with towers, was built, and may still be traced across through its whole course. On this tract, the celebrated Isthmian games were held.

CORINTH (Gulfof), or Gulf of Lepanto [anc. Corinthiacus Simus], a large arm of the sea, or rather salt water lake, Greece, communicating with the sea by the strait of Lepanto. It forms the principal N. boundary of the Morea, separating it from Livadia; greatest length, W. to E., 75 m. ; greatest breadth, N. to S., nearly acros its centre, 24 m . It is well adapted for com-
the harbour of Lechoum, in the bay of Corinth, about $1 \frac{3}{4} \mathrm{~m}$. N. from the city, and thence carried across the isthmus to the harbour of Kekliries [ane. Cenchrere], in the bay of the same name, gulf of Egina, about 7 m . E. by S . Corinth, where all merchandise from the $\mathbf{E}$. was landed, and, consequently, conveyed to Lechæum for re-shipment, each taking the city on their way. Thus advantageously situated, Corinth became very early renowned for riches, and its appearance then corresponded with its wealth and resources. It was profusely alorued with fomitains, statucs, theatres, and various public buildings, of such peculiar excellence in design, as to give rise to a new order of architecture now known by its name. But no portion of this splendour has existed for centuries; and for ages, the visitor to Corinth has had to climb over masses of masonry, and by ruined walls, to reach the streets of the modern town, now itself no longer in existence, having been destroyed during the late revolu
merce, and its shores were anciently studled over with thriving towns. Few of these now remain, but the traftic is still sutficient to give amimation to one of the most interesting and magnificent scenes of which Europe can hoast. The outline of the coast is infinitely varied by bold promontory, gentle slope, and cultivated level. The back ground, both on the N. and S. sides, is formed by lofty mountain ridges, which are richly clothed with wood, and send down numerous sparkling torrents into the gulf. Each step which the traveller takes along the shore presents some new beanty to the eye, or suggests some glorious recollection to the mind.

CORIO, a tn. Sardinian States, prov. of, and 7 m. N.N.W. Turin, on a hill. Pop. 5298.

CORISCO, a bay aml isl. W. Africa, bight of Biafra. The bay, 32 m . hroad, extends from Cape Esterias on the S. , to Cape St. Johm on the N., and 14 in . inland. It is 8 m . N. the Gaboon, and receives the Moonjee Angra or Danger on

## CORK

CORK siderably; but, excepting on the estates of resident gentlemen, agriculture is not generally in a very advanced state. The principal crop is potatoes; but oats are also grown extensively, and wheat in considerable quantities. The cattle in the S. and S.W. are extremely small, but yield abundance of milk. In the N. parts of the county they are of superior size and form. There are extensive dairies in various parts of the county, especially in the vicinity of Cork city. The mineral productions are chiefly iron (not wrought since the timber of the county was exhausted), copper, manganese, coal, limestone, fullers' earth, and brick clay. In the copper mines at Allahies-the most important in Ireland, and situate at the S . extremity of the mountainous peninsula between Kenmare river and Bantry Bay-1000 hands are employed; and the produce, in 1848 , was 5000 tons. The fishery districts are Youghal, Cove, Kinsale, Skibbereen, and Castleton, comprising 389 m . of coast, and laving, in 1849, 5281 registered fishing vessels, employing 22,908 men and boys. In 1848 there were 325 national schools in operation, attended by 52,813 children, being an increase of 25 over the number at school in 1841. The county returns eight members to Parliament; two for the county, two for Cork city, and one for each of the boroughs of Youghal, Bandon, Mallow, and Kinsale. Pop. (1841) 773,398; (1851) 563,158.
CORK, a city and river-port, Ireland, cap. co. Cork, at the head of the estuary of the Lee, lat. (custom-house) $51^{\circ} 53^{\prime} 48^{\prime \prime}$ E.; lon. $8^{\circ} 27^{\prime} 45^{\prime \prime}$ W.; 138 m. S.W. Dublin. It is the second city of Ireland, as regards population, wealth, and commerce, and is a county in itself, having a jurisdiction separate from that of the county of which it is the capital. It lies in the centre of a valley, surrounded by hills, of various but moderate elevation, and is divided into three unequal partsthe principal portion occupying the flat lands on the S . side of the Lee. It is about 2 m . in extent, and its breadth, E. to W., about 1 m . The general appearance of the city is cheerful and picturesque, although its suburbs, and many of its lanes, present appearances of the most wretched poverty. The principal streets, all of which are on the S. side of the river, are spacious, well paved, and lighted with gas, while most of the houses are large and well built. The Lee is crossed by nine bridges, several of which are modern and elegant structures. The principal public buildings are the county and city courthouse, county jail, city jail, house of correction, female penitentiary, old county courthouse, man-
the N., and the Moondah on the S.-The island, at the mouth of the bay, is 12 m . long, by 6 broad ; lat. $0^{\circ} 54^{\prime} 30^{\prime \prime} \mathrm{N}$.; lon. $9^{\circ} 16^{\prime} \mathrm{E}$. The natives are generally considered to be very treacherous; but ivory, ebony, and other articles may be obtained from them at a moderate rate, in exchange for tobacco, rum, or beads.

CORK, a maritime co. Ireland, prov. Munster, having St. George's Channel S., co. Limerick N., Kerry W., Waterford and Tipperary E. Extreme length, E. to W., 110 m .; extreme breadth, 70 m .-being the largest co. in Ireland, both in extent of surface and arable land; area, 2885 sq . m. $1,846,333$ ac., of which $1,308,882$ are arable, and 465,889 uncultivated. The W. part of the county is mountainous, the N. and E. extremely fertile; in the latter part, lying N. of the Blackwater, is a rich, level tract of country, upwards of 20 m . in length, E. to W., and from 5 to 9 m . in breadth. The coast is in dented with numerous bays and inlets, of which the more important are Bantry, Dunmanus, Clonakilty, Kinsale, Cork harbour, and Youghal; and serrated with headlands and promontories. Off the coast lie the islands of Cape Clear, Whiddy, and several smaller ones. The climate is remarkably mild, though moist, and is without the extremes of heat and cold experienced in the same latitude in England. The county is watered by the Bandon, Lee, and Blackwater, and numerous smaller streams.
sion-house, bank of Ireland (provincial and national), commercial buildings, county clubhouse, chamber of commerce, customhouse, convict depôt, savings bank, N. and S. infirmaries, lunatic asylum, which admits 446 patients; Episcopal

palace of the bishop, diocesan library, and the new Queen's college, opened in November, 1849. The principal churches are St. Finbar's cathedral, in the S.W. part of the town; Christ's church, St. Peter's church, St. Paul's church, St. Nicholas' church, and other two. Besides these, there are two chapels of ease, three R. Catholic parochial chapels, four monasteries, and two nunneries, with a chapel attached to each; two Presbyterian, and seven other dissenting meeting houses. Near the city is a cemetery, after the plan of Pere la Chaise; and on the $W$. of it is a beautiful promenade, of a mile in length, shaded by a double row of elms on either side, called the Mardyke. A park also has been lately enclosed, containing qbout 240 ac . Among the charitable institutions are the house of industry, which maintains upwards of 1200 paupers; the fever hospital, capable of accommodating 300 patients the magdalene asylum, the foundling hospital, two lying-inhospitals, and a number of schools. There are also several establishments for the promotion of science and literature, including a mechanics' institute, and an extensive library and museum of natural history attached. The schools for general education are numerous. The number attending them, in 1841, was-in rudimental schools, males, 5702 ; females, 4817 ; -in superior schools, males, 680 ; females, 468 ;-total, 11,667 . There are two theatres and a circus in the city, and three clubhouses. On a height, above the town, are cavalry and infantry barracks for 2000 men.
The principal manufactures of the city are tanning, distilling, brewing, iron foundries, glass, and gloves; woollen and cotton, formerly carried on to some extent, are now nearly extinct. Besides the works above enumerated, there are also seven distilleries, and several large breweries. The trade of Cork is extensive; chiefly in grain, provisions, butter, and live stock. Bacon and hams also are cured in large quantities for exportation. The customs duties received at Cork, in 1848, was $£ 286,113$. In 1836, the number of vessels registered belonging to the port was 302 ; tonn., 21,514 ; in 1845 , it was 384 ; tonn. 39,378 , besides 14 steamers of 2902 tons; and in 1848, it was 396; tonn. 46,453; and 20 steamers, tonn. 4276. The following table shows the declared value of the exports of Cork from 1839 to 1850 :-

| 1839. | £132,231 | 1845 | 8,129 |
| :---: | :---: | :---: | :---: |
| 1840. | 110,006 | 1846. | 94,3.11 |
| 1841. | 94,190 | 1847. | 74,490 |
| 1842.. | 113,085 | 1848.. | 75,504 |
| 1843.. | 113,148 | 1849.. | 105,752 |
| 1844. | 91,082 | 1850.. | 116,268 |

The foreign and colonial trade is principally with Portugal: the Mediterranean, the Baltic, and Canada; the trade with the W. Indies has declined.

The harbour of Cork is unsurpassed for capacity and safety. It is distinguished by upper and lower; the latter is situate 11 m . below the city, is 3 m . long and 2 m . broad, and completely landlocked. Its entrance is by a channel, 2 m . long and 1 m . broad, defended on each side by forts Camden and Carlisle. The upper portion extends for about 5 m . below the city to Passage, and has been deepened so, that vessels of 600 tons can unload at the quays, where there is a depth of 7 ft. at low water, and dredging machines are kept constantly at work, deepening and clearing the channel. The tide flows $1 \frac{1}{2} \mathrm{~m}$, above the city. Within the harbour are several islands; the principal of which are Great Island-on which is situate the town of Cove, now called Queenstown-Little Island, Foaty Island, Spike Island-on which is a bomb-proof artillery barrack, and a convict depôt, for the reception of criminals under sentence of transportation-Haulbowline Island, on which is an ordnance depôt, and Rocky Island, on which are two powder magazines, excavated in the rock. The principal market days are Wednesdays and Saturdays. The city sends two members to the House of Commons. Cork is connected by railway with Dublin and Limerick, \&c., to the N., and with Bandon Bridge, to the S. Pop. (1841) 80,720; (1851) 85,485.

CORKBEG, par. Ireland, Cork, 2671 ac. Pop. 1603.
CORLEONE, a tn. Sicily, prov. of, and 22 m . S. Palermo, near the source of the Belici. It is well built, has several churches and convents, a prison, royal college, and some other public edifices. The inhabitants are principally engaged in agriculture. There is a mineral spring in the neighbourhood. 1'op. 12,527.

CORLETO, a tn. and com. Naples, prov. Basilicata, dist, of, and 22 m . S.S.E. Potenza, on an acelivity near the Sauro. The district is famous for its fruit, and produces good wine. Pop. 4087.

CORLEY, par. Eng. Warwick; 1280 ac. Pop. 288.
CORMACHITI [anc. Crommyon Promontorium], a lofty proniontory, sometimes called Mount Cormachiti, on the N. of the island of Cyprus, a little N.E. of a small town of same name, and visible at sea, in a clear day, from 12 or 15 m ., lat. $35^{\circ} 23^{\prime} 48^{\prime \prime} \mathrm{N}$. ; lon. $32^{\circ} 55^{\prime} 15^{\prime \prime}$ E. From this point E. the island decreases in height.

CORMAN'T'YN, or Cormantixo:- 1 , vil. Upper Guinea, Ashantee. It is large and populous, lies on a steep hill, and is said by the Negroes to be the oldest in the kingdom of Fantis. From the name of this village, many of the blacks in the W. Indies are called Coromantis.-2, (-Little), near Annamaboe. Previons to the abolition of the slave trade, it was a great resort of Duteh slavers, and has been thoroughly demoralized in consequence. The inhabitants are fishermen, and do some trade, in ivory and other articles, with vessels in Amamaboe roads.

CORMAYEUR, or Courmayeur, a vil. and com. Sardinian States, Piedmont, prov. of, and 18 m . W.N.W. Aosta, in the Val d'Entreves, 1. bank, Dorea Baltea, at the foot of Mont Cormet, not far from Mont Blanc. It is 4211 ft . above the sea, and its position is considered one of the finest in the Alps. It is the common centre from which no less than six routes diverge, and is much resorted to in summer-time, particularly by the Piedmontese, for the sake of its mineral waters, the exquisite treshness of its climate, and other attractions. The village of Cornayeur is large, and contains many good houses. The principal springs in the neighbourhood are those of La Victoire, La Marguerite, and La Saxe. The first two rise from allovium, and are saline; the last rises at the junction of limestone with granite, is sulphureous, and used both for batbs and internally. Pop. 1535.-(Forbes.)

CORME, or Corine, a small port, N.W. coast, Spain, Galicia, prov. of, and 30 m . W. by S. Coruña, on a bay of same name, which receives several streams of excellent water.

CORMONS, a tn. Austrian Illyria, gov. of, and 26 m . N.W. Trieste, in a mountainous district. It is surrounded by an old wall, and defended by a castle; contains a parish church. Silk worms are reared, and some silk is spun. Pop. 3600.

CORNARD, two pars. England, Suffolk:-1, (-Great), 1610 ac. Pop. $938 .-2,(-$ Little $), 1480 \mathrm{ac}$. Pop. 396.

CORNA'TE, or Coronate, a vil. Austrian Italy, prov. of, and 21 m. N.N.E. Milan. It is well built and clean, and contains a Jesuit college, two churches, and some handsome private residences. Pop. 2000,

CORNEGLIANO, two tns. Sardinian States:-1, A small seaport tn ., div. of, and 3 m . W. Genoa. It has manufactures of whitelead and soap; but many of the inhabitants are fishers. Pop. 2035.-2, $\left(-d^{\prime} A l b a\right)$, div. Coni, 27 m . S.S.E. Turin. Much silk is collected here. Pop. 1816.

CORNELLY, par. Eng. Cornwall; 1480 ac. Pop. 119.
CORNER INLET, Australia, New S. Wales, lat. $38^{\circ}$ $47^{\prime}$ S.; lon. $146^{\circ} 20^{\prime}$ E.; behind Wilson's Promontory. At the entrance there is a bar, on which, at low water, there is from 16 to 18 ft . A group of islets, called Direction Isles, lie a few miles outside the bar. Over the N . shore of Corner Inlet is a woody range, the summit of which is 2110 ft . high.

CORNETO [anc. Cornuetum], a tn. Papal States, deleg. of, and 10 m . N. Civita Vecchia, near l. bank, Marta, and about 3 m . from the Mediterranean. It stands on a steep and lofty ridge, evidently of volcanic formation, and is surrounded by ancient walls, flanked with towers, forming a picturesque and imposing object from all parts of the coast. It is irregularly built, and has several narrow streets; but many improvements have recently taken place-old houses have been removed, and several parts of the town begin to assume a modern and elegant appearance. The principal building is the old Gothic cathedral, a venerable structure of the 9 th century, so much injured by lightning, in 1810, as to be no longer used, but still remarkable for its fine dome and portal, and a lofty tower, the only one of four which the light ning spared. The other buildings of note are the palace Vitelleschi, a fine specimen of the domestic Gothic of the 15 th century, but now converted into an inn; the townhouse, adorned with frescoes illustrative of the history of the town, and several private palaces and convents. The trade is in corn and oil. Corneto is the see of a bishop, said to have been founded in the 6th century. About 1 m . from it stood the ancient Tarquinii, on a flat table land, still called Turchina. Nothing of it now remains, except some of the foundations of the walls, built in the massive style of Etruscan masonry; but on the hill, Monte Rossi, opposite to it, is the ancient necropolis, in which hundreds of ancient sepulchres have been found, and, by means of excavations carried on on an extensive and systematic scale, many interesting Etruscan antiquities have been obtained, which now enrich the British museum and other collections. Pop. 4000.

CORNEY, par. and vil. Eng. Cumberland; 3890 ac. Pop. 273.

CORNHILL, a chapelry and vil. England, co. Durham; 4430 ac . The vil. is beautifully and romantically situate, $1 \frac{1}{2} \mathrm{~m}$. E. by N. Coldstream, and 13 m . S.W. Berwick, r. bank, Tweed. Its castle was twice destroyed by the Scots. It has a church; and a fair is held in December. Pop. 823.

CORNIGLIO, a tn. and com. Italy, duchy of, and 25 m . S.S.W. Parma, 15 m . E. by S. Burgotaro on a rising ground at the confluence of the Beatica and Parma rivers. It contains a church, session-house, cavalry barrack, medical and other schools, and manufactories of files, saws, and cutlery. Three cattle fairs are held during the year, in June, July, and September. The vicinity is fertile and well cultivated; the pasturage rich and abundant; and there are fine forests of chestnut and other timber. Pop. 5335.

CORNO (Monte), also called Gran-sasso-m'Italia, a mountain, Naples, the culminating peak of the Apennines; lat. $42^{\circ} 27^{\prime}$ N. ; lon. $13^{\circ} 38^{\prime}$ E.; height, 9519 ft.

CORNUDELLA, a tn. Spain, Catalonia, prov. of, and 24 m . N.W. Tarragona, in a mountainous district. It contains a parish chureh, courthouse, and two primary schools; and has several distilleries of brandy, and numerous flour mills, and some trade in grain. Pop. 1637.

CORNW ALL, a maritime co. England, forming the S.W. extremity of the island of Great Britain, and surrounded by the sea on all sides except the E., where it is bounded by co. Devon. Its figure, though very irregular, bears some resemblance to that of a right-angled triangle, the base, 43 m ., resting on Devon; the perpeudicular, 70 m. . washed by the W. portion of the English Channel; and the hypothenuse, 78 m., washed by the Atlantic Ocean; area, exclusive of the Scilly isles, $1330 \mathrm{sq} . \mathrm{m}$., or 851,200 ac. The coast-line on
the side stretching from N.E. to S.W., is not very much broken, but has been scooped out by the sea into a number of shallow bays, or which that of St. Ives appears to be the principal, while the most prominent headland is that of Trevose Head. The S. coast is much more broken, and is marked, both by bolder promontories and deeper bays. Of the former, proceeding E., the most prominent are St. Michael's Mount, Lizard Head, Pendennis Head, Deadman's Point, Chapel Point, and Black Head. Of the latter, the most extensive and important are, Mount Bay, Falmouth Harbour, Garrans Bay, St. Blazey Bay, and Plymouth Sound. Intermediate between these two coasts is the remarkable promontory bearing the appropriate name of Land's End, and presenting to the sea steep granite cliffs, about 60 ft . high. Nearly contiguous to it is Mount Pertinney, 689 ft ., forming the termination of a clain of hills, to which the name of Devonian Range has been given, from receiving its largest development in co. Devon. The part of it belonging to Cornwall stretches through it in a direction from N.E. te S.W., forming its principal watershed, the land on either side of it sloping down, more or less gradually, towards the coast, though sometimes sending off lateral branches, which, as we have seen, terminate in bold headlands. The nucleus of this range is granite, which occasionally bursts through the surface, and forms huge, insulated masses, but is more generally covered with extensive slate strata, provincially called killas. The granite is generally of a white or whitish grey colour, and, having the property of decomposing rapidly when exposed to the air, has formed valuable beds of kaolin, or porcelain earth, which is largely employed in the potteries in making the finer kinds of ware. The slate, which overlies the granite, is seldom of a quality which enables it to be used for roofing. The most elevated points of the Devonian Range in Cornwall are Brown Willy, 1368 ft ; Caraton Hill, 1208 ft .; Kit Hill, 1067 ft .; and IIensbarrow Beacon, 1034 ft . The rivers of Cornwall are numerous, but short. The largest, the Tamor, forms the boundary between Cornwall and Devon, during the greater part of its course, and more properly belongs to the latter county, from which its principal affluents are derived. Its whole course is 56 m . The other rivers peculiar to the county are the Fowey, Fal, Alan or Camel, Seaton, Looe, Hel or Helford, and the Heyl. As they all flow to the coast, they become accessible to the tide, and thus are of much more navigable importance than their size might seem to indicate; both furnishing a considerable extent of inland navigation, which has been much increased by canals, and forming valuable harbours by their mouths. The climate, owing to the great extent of surface exposed to the sea, and the general elevation of the ground, is both variable and of a lower temperature than that of the inland counties, which are $2^{\circ}$ or $3^{\circ}$ farther N. The soil, too, is generally of very indifferent fertility, consisting of decomposed slate, which, though sufficiently porous to admit of easy drainage, must be heavily manured, in order to raise abundant crops. In many of the more elevated districts, much of the land is almost barren. Little wheat is grown; but barley, particularly a naked kind, called pillez, is extensively cultivated for the fattening of pigs and poultry. The favourite and most abundant crop is potatoes, to the growth of which the soil seems so peculiarly adapted, that two good crops have often been obtained in one season-an early crop in June, and a late crop in October. It is not, however, in its agriculture that Cornwall finds the principal source of its wealth. Its mines of copper and tin still constitute its richest treasures, though the value of the latter has undergone considerable diminution, from the large importations from Banca; and the former will probably be similarly affected by the recent discoveries in Australia. The chief mining district is in the S.W. part of the county, stretching from St. Agnes, on the N.W. coast, by Redruth, to the neighbourhood of Helston and Marazion. The veins of copper and tin usually run E. and W., penetrating both the clay-slate and granite, and sometimes alternating with each other. Tbe depth to which they extend is unknown, as the bottom of a vein has never yet been seen; and hence the only apparent limit to the extent of the mining field, is the imperfection of the machinery by which it is laid dry and ventilated, so as to be rendered workable. The knowledge of this fact has had a wonderful effect in stimulating ingenuity, and hence the art of mining, in all its branches, has
been carried, perhaps, to greater perfection here than in any other part of the world. The Cormish engines are famous for their magnitude, and the wonderful labours which they perform; and the miners are unequalled for the boldness, skill, and perseverance which they manifest in tracing the ore to almost fabulous depths. Instead of a general description, which could only furnish a very vague and imperfect idea of the working, the following sketch of the Botallach Copper Mine places it vividly before the eye. This mine is situated close to Cape Cornwall, a few miles N. of Land's End, on a shore exposed to the full fury of the Atlantic.

botallack copper-mine, cornwall.
The workings are on the very verge of the cliff, and, descending beneath the sea, are carried 480 ft . beyond low water mark. The dashing of the waves is distinctly heard by the miner at his work, and, in stormy weather, the large stones driven towards the beach grate npon cach other with a noise resembling thunder. The average annual produce of tin is about 4000 tons, and that of copper 12,000 tons. The actual produce of fine copper in 1847 and 1848 , was 12,870 tons, obtained from 155,616 tons of ore. Besides these metals, silver, lead, zinc, iron, manganese, antimony, cobalt, and bismuth, are found in comparatively small quantities. There are no manufactures, properly so called, excepting carpets, at Truro, and a few coarse woollens, there and clsewhere. The exports are confined to mineral produce and fish.

At the time of the Roman conquest, Cornwall was occupied chicfly by tribes of Cimbri and Danmonii, and bccame included in the province of Britannia Prima. After the Romans withdrew, the natives regained their independence, and retained it till the time of Athelstane, when they were subdued by the Saxons. Their Celtic origin is fully established, by the abundance of rude monuments spread over the country, and consisting chiefly of unwrought stones placed erect, singly, or in circles, with others laid across.- Their language, also, was a Celtic dialect, and, under the name of Cornish, continued to be partially spoken till the commencement of the present century. The inhabitants were formerly much addicted to gymnastic sports, especially wrestling, the love of which still prevails. Cornwall forms a royal duchy, settled on the eldest son of the sovereign, who accordingly, to his other titles, adds that of Duke of Cornwall. Pop. (1841) 341,279; (1851) 355,553.

CORNWALL, NEW, a name given to a portion of the W. coast of N. America, on the Pacific Ocean, between New Norfolk and New Hanover, extending from lat. $54^{\circ}$ to $57^{\circ} \mathrm{N}$., and from about lon. $130^{\circ}$ to $136^{\circ}$ W., and belonging, partly
to the British, and partly to the Russians. It is traversed in its whele length by a branch of the Rocky Mountains. On the coast are numerous islands, among which are those of the Prince of Wales, and Duke of York. The climate near the sea is mild. Slates are found, and there are several hot springs.

CORNWALL, a co. Van Diemen's Land, dist. Launceston. It contains seven hundreds, and is divided into 25 parishes. It is watered by several streams, the largest of which are the N. and S. Esk. Its principal meuntain is Benlomond, 4200 ft. in height.

CORNWALLIS.-1, An isl. Nova Scotia, N.E. side of Chedabueto Bay, lat. $45^{\circ} \mathrm{N} . ;$ lon. $62^{\circ} \mathrm{W}$.-2, Two isls. N. Pacific, lat. $16^{\circ} 53^{\prime}$ N.; lon. $169^{\circ} 31^{\prime}$ E., surrounded by a reef; diseovered by H.M.S. Cornwallis, December 14, 1807.-3, A port, E. side of the N. Andaman island, lat. $13^{\circ} 18^{\prime}$ N., about 16 m . S. Cape Price. It makes an excellent harbour. stretching about 6 m . into the land in a N.W. direction, and in breadth about 3 m , being land-locked on every side, and surrounded by lofty mountains, covered with impenetrable forests, and is secure from all winds. Its scenery is magnificent.

CORNWELL, par. Eng. Oxford; 820 ac. Pop. 97.
CORNWOOD, par. Eng. Devon; 10,680 ac. P. 1080.
CORNWORTHY, par. Eng. Devon; 2600 ac. P. 554
CORO, a seaport tn . Venezucla, cap. prov. of same name, 144 m. E.N.E. Maracaybe, on El Gelfete, a bay of the Gulf of Maracaybo, $2 \frac{1}{4} \mathrm{~m}$. S.W. from the Caribbean Sea; lat. $11^{\circ}$ $24^{\prime} \mathrm{N} . ;$ lon. $69^{\circ} 46^{\prime} \mathrm{W}$. (r.) The streets are regular, but the houses are mean. It has twe churches, several chapels, a convent, and an hospital. The climate is hot, dry, and healthy, but water has to be brought from a distance on mules. The trade was once considerable with the W. India islands in mules, goats, hides, sheep-skins, cheese, \&c., but is now much fallen off; as is also the town, since 1636 , when the seat of government was transferred from it to Caracas. Pop. 4000.-The Province extends from the Gulf of Maracaybo, on the W., to the Gulf of Triste, on the E., and is bounded, S. by provs. Carabebo and Truxillo. The soil is, in general, dry and sandy, and much of the prov. still remains in an uncultivated state; but, in some places, cacao, coffee, maize, and plantains are produced in abundance. Pop. consisting of Creeles, Indians, Negroes, and mixed races (1846), 72,321.

COROFIN, or Curafin, a tn. Ireland, co. Clare, 8 m . N.N.W. Ennis, on an aeclivity on the Fergus, crossed here by a stone bridge. It has one straight and one crooked street, both badly kept; the houses are mere cabins; it has a parish church, a R. Catholic chapel, and two schools, with a dispensary and poorhouse. Many of the females support themselves by knitting stockings, while the male part of the population are chicfly employed in agriculture. Pop. 900.

COROMANDEL, COAst of, [Cholomandala], a name $n$ nplied to the E. coast of the Indian peninsula. The whole coast, from point Calymere, lat. $10^{\circ} 18^{\prime}$ N., lon. $79^{\circ} 51^{\prime}$ E., (r.), to Balasore, lat. $21^{\circ} 23^{\prime}$ N., lon. $87^{\circ} \mathrm{E}$., (r.), is usually comprehended under this designation; but the name is properly applied only to that part of it S . of the mouth of the Kistna, about lat. $16^{\circ}$, the more N. parts being the coasts of Golconda and Orissa. The Coromandel coast is open, sandy, and has 11 ) secure liarbours; the surf, continually beating on it, renders landing difficult, often dangerous, and is only to be accomplished in native boats, of a peculiar construction. The N.E. monsoen, which sets in about the middle of October, is frequently accompanied with violent hurricanes; ner is serene weather expected till the middle of December The $S$. wind sets in about the iniddle of April. During the continuance of the hot winds, the coast of Coromandel resembles a barren wilderness.

COROMANDEL, a harbour, E. coast, New Ulster, or N. Island, New Zealand, W. side of the peninsula, terminating in Cape Colville, which forms the estuary of the Thames, and the upper or S. part of the Bay of Shouraki, lat. $36^{\circ} 46^{\prime} \mathrm{S}$.; lon. $175^{\circ} 27^{\prime}$ E. (r.)

CORON, or Konon, a seaport tn., Greece, Morea, at the extremity of a point of land at the foot of a gentle sloping mountain, S.W. side of the gulf of same name, 7 m . N. W. Cape Gallo; lat. $36^{\circ} 46^{\prime} 4^{\prime \prime} \mathrm{N} .:$ lon. $22^{\circ} \mathrm{E}$. It has now only an inconsiderable trade in oil and silk, but was formerly a place of considerable importance, having a strong fortress, which, with the town, is little more than heaps of ruins. Upon the summit of the castle hill, which is very steep on all sides, seems
to have stood the acropelis of the ancient city that formerly occupied this site, and of which nothing remains but a few cisterns and walls. The population consists of about 200 Turkish, and 130 Greek families.-(Leake's Morea.)

CORONADA, a tı. Spain, Estremadura, prov. Badajoz, on a rocky plain, near l. bank, Sujar. It is very indifferently built, and the streets are narrow, winding, and ill paved. It contains a parish church, townhouse, prison, and an endowed school, and has some manufactures of linen, and brick and tile works. Pop. 1407.

CORONATA, isl. Adriatic. See Incoronata.
CORONATION GlLLF, an extensive gulf, Arctic Ocean, W. Kent peninsula, and S. W. Victoria Land, between lat. $66^{\circ}$ and $68^{\circ} \mathrm{N} . ;$ lon. $108^{\circ}$ and $116^{\circ} \mathrm{W}$. It receives the Coppermine, and several smaller rivers, and its surface is dotted with innumerable islands.

CORONATION ISLANDS.-1, A small isl. S. Atlantic Ocean, one of the New Orkney group, lat. $60^{\circ} 46^{\prime} \mathrm{S}$. ; lon. $45^{\circ} 53^{\prime}$ W. (r.).-2, A group of islands, N. W. coast Australia, between York Sound and Brunswick Bay, about lat. $14^{\circ} 55^{\prime}$ S.; lon. $124^{\circ} 52^{\prime}$ E.-3, An isl. Russian America; its S. point is in lat. $55^{\circ} 52^{\prime} \mathrm{N}$. ; lon. $134^{\circ} 10^{\prime} \mathrm{W}$. (r.)

CORONIL, a tn. Spain, Andalusia, prov. of, and 28 m . S.S.E. Seville, and 12 m. W.S.W. Moron, on thrce small hills. The houses are, in general, very well built, forming numerous, clean, spacious, and paved streets, and two squares, the principal containing the townhall and promenade. The other public edifices are a parish church, three chapels, three schools, a prison, hespital, storehouse, cemetery, and ancient castle. Manufactures.-Earthenware, linen, woollen, cotton, silken, and hempen fabrics; hardware, wine, oil, vinegar, \&c. Trade.-Grain, cattle, and manufactured goods. Two annual fairs. Pop. 3778.

COROORA, or Corlra, an isl. N. Pacific Ocean, one of the Pellew group, about lat. $7^{\circ} 30^{\prime} \mathrm{N}$. ; lon. $135^{\circ} \mathrm{E}$.

CORPACH, a vil. Scotland, ce. Argyle, E. bank Loch Eil, $2 \frac{1}{2} \mathrm{~m}$. N. Fort-William. It lies at the entrance of the Caledonian Canal, formed by a series of 11 locks, including the sea lock, rising to the level of Loch Lochy. Eight of these are close together, within $1 \frac{1}{4} \mathrm{~m}$. of the sea, and are called ' Neptune's Staircase.' Corpach has a Free church, and a school, and near it is the parish church of Kilmailie. On a hill hard by is a monument to Colonel Cameron, who fell at Quatre Bras, June 15, 1815. The inhabitants are chiefly engaged in agriculture and fishing. Pop. (1851) 1060.

CORPUSTY, par. Eng. Norfolk; 1350 ac . Pop. 449.
CORRAL, several tns. and vils. Spain, of which the principal are:-1, (-de Almaguer), a tn. New Castile, prov. of, and 45 m . E.S.E. Toledo, r. bank, Rianzeres. It is tolerably built, and has a parish church, four schools, a townhall, prison, and convent. The people are engaged in agriculture and weaving. Pop. 3209.-2, (-de Calatrava), a tn. New Castile, prov. of, and $8 \mathrm{~m} . S . S . W$. Ciudad Real, in a large plain. It contains two squares, a parish clureh, three schools, a cemetery, and old tower. Pop. 1315.

CORRALES, several small tns. Spain, particularly a tn. Andalusia, prov. of, and 52 m. E.S.E. Seville, in a plain at the S. base of a hill. It has a square, a eliurch, two schools, townhall, prison, and storehouse. The inhabitants are chiefly employed in tillage and cattle-rearing. In the neighbourhood are several quarries of gypsum. Pop. 1671.

CORREGAUM, a vil. Hindoostan, prov. Bejapoer, on the l. bank, Beemah, 17 m . E.N.E. Poenah, lat. $18^{\circ} 37^{\prime}$ N.; lon. $74^{\circ} 16^{\prime} \mathrm{E}$; remarkable only as having been the scene of a desperate and successful resistance on the part of a handful of British troops to an Indian army of 20,000 herse, and sev cral thousand infantry, on the 31st December, 1817-the former having been commanded by Captain Staunton, and tho latter by Bajerow.

CORREGGIO, a tn. duchy of, and 14 m . N. W. Modena, on a canal that communicates with the Po, by the Nove canal and the Secehia. It is meanly built, and defended by a citadel. The painter, Antonio Allegri, commonly called Corregio, was born here. Pep. 5000.

CORREZE, a river, France, which rises, in the mountains, of Monedieres, in the $N$. of the dep. to which it gives its name, flows S.W., passing Tulle and Brives, and, without leaving the dep., joins 1. bank, Vezère at St. Pantaleon, after a course of about 50 m . No part of which is navigable.

CORRE'ZE, an inland dep. France, between lat. $44^{\circ} 54^{\prime}$ and $43^{\circ} 44^{\prime}$ N., and lon. $1^{\circ} 12^{\prime}$ and $2^{\circ} 29^{\prime}$ E., having N. dep. Creuse ; N.E., Puy-de-Dôme ; E., Cantal ; S., Lot; W., Dordogne ; and N.W., Haute-Vienne. It was formed from part of the former province of Limousin, and derives its name from the river Corrèze, by which it is traversed; area, $2218 \mathrm{sq} . \mathrm{m}$.; cap. Tulle. It belongs almost entirely to the basin of the Garonne, and is watered by the Dordogne and its affluents. Surface mountainous, especially to the N. and E. The N. part is traversed by an offshoot from the mountains of Auvergne, which separates the basins of the Garonne and Loire. The culminating point is Mount Oudouze, 4475 ft . high. Soil far from fertile, except in a few of the valleys. Heaths occupy a great extent of surface, and agriculture is in a very backward state. The produce of grain is insufficient for the consumption, but the deficiency is supplied by the potato and chestnut crops. Vines occupy $59,173 \mathrm{ac}$.; but the wine is of poor quality. Hay is particularly abundant, and large crops of beetroot are grown, besides maize, barley, hemp, flax, \&c., in moderate quantities. Minerals:-iron, coal, slates, mill and grindstones, granite, lime, and pottery clay, but they are little attended to; so that, with the exception of the ironworks, which employ about 100 workmen, the only manufacture of note is that of fire-arms at Tulle, employing about 1000 hands. Water power is abundant, but it is not taken advantage of. The trade is principally in wine, wood, nut-oil, bees-wax, horses, cattle, leather, paper, iron, \&c. The houses of the peasantry are of the worst and meanest description; dirty, unhealthy, and generally filled with smoke. A peculiar custom prevails here, contrary to the general law of France, of endowing the eldest son with a fourth of the paternal property over and above his fractional share, giving rise, as might be anticipated, to innumerable family broils. The people have a great aversion to enter the army; but are said to make good soldiers. The department is divided into 3 arrondissements, 29 cantons, and 286 communes. It forms the diocese of Tulle. Pop. (1846), 317,569.

CORRIB LOCH, a large lake, the second in size in Ireland, co. Galway, about 23 m . in length, and varying froin 2 to 6 m . in breadth, and composed of two expansions, united by a narrow channel, about $\frac{1}{2} \mathrm{~m}$. wide at its narrowest part, across which is a ferry. It is about 3 m . distant from the sea at Galway, where it is only 14 ft . above sea level. It is separated from Loch Mask by a narrow isthmus, through which there is a subterranean channel. It has about 40 m . of navigation, and its numerous islands contain nearly 1000 ac. of land.

CORRIENTES.-1, A cape, S. side, isl. Cuba, 30 m . E. by S. Cape St. Antonio, which it much resembles; lat. $21^{\circ} 45^{\prime} 20^{\prime \prime} \mathrm{N}$. ; lon. $84^{\circ} 31^{\prime} 3^{\prime \prime} \mathrm{W}-2$, A Cape, La Plata, Buenos Ayres, ; lat. (E. summit) $38^{\circ} 5^{\prime}$ 'S.; lon. $57^{\circ} 29^{\prime}$ W. - $\mathbf{W}$ 3, A cape, New Granada; lat. $5^{\circ} 33^{\prime}$ N. ; lon. $77^{\circ} 29^{\prime} 30^{\prime \prime}$ W.- 4, A cape, W. coast, Mexico, $150 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Acapulco; lat. $20^{\circ} 25^{\prime} \mathrm{N}$. ; lon. $105^{\circ} 39^{\prime} \mathrm{W} .-5, \mathrm{~A}$ cape, S. coast, Africa; lat. $24^{\circ} 7^{\prime} 30^{\prime \prime} \mathrm{S}$. ; lon. $35^{\circ} 30^{\prime} 30^{\prime \prime} \mathrm{E}$.

CORRIENTES, a dep. and tn., La Plata. The departMENT, between lat. $27^{\circ}$ and $31^{\circ} \mathrm{S}$. ; lon. $57^{\circ}$ and $60^{\circ} \mathrm{W}$., is bounded E. and S. by Missiones and Entre Rios, W. and N. by the Parana, which separates it from Paraguay. In the $\mathcal{S}$. it is well-wooded and fertile, while in the N . it is inarshy, and contains the remarkable lagoon of Ybera (which see). The natural productions of the soil are similar to those of Brazil, and consist of cotton, tobacco, rice, sugar, indigo, \&c. Pop. (1824), between 35,000 and 40,000 .——The rown, cap. of the dep., is agreeably situate, on elevated ground, l. bank, I'aranà, near its confluence with the Paraguay; lat. $27^{\circ} 28^{\prime}$ S.; lon. $58^{\circ} 44^{\prime}$ W.; 390 m . N. Buenos Ayres. Its houses, chiefly of one story, and all supplied with galleries to protect from sun and rain, form irregular, unpaved streets, many of which have a slope to the river. The line of houses facing the river forms an exception to the general irregularity. There are two squares, one in the middle of the town, in which are the public buildings; and the other outside, used as a market-place. There are four churches; the cabildo, in which the representatives meet, and a college, founded by the Jesuits. Bed-chambers in Corrientes have no furniture, but one or two beds surrounded with coloured curtains; a chair would be a luxury. In the houses of the common people, heated by means of a brazier which blackens everything with
smoke, skins are used for coverlets; and the domestics, without distinction of age or sex, sleep in a common room, a circumstance not a little contributing to foster that libertinism with which this class is charged. Both in town and country morality is low ; and depravity, both in language and manners, great; incest is said to be common. Corrientes is well placed to serve as an entrepôt of goods, between the upper parts of the Paraguay and the Parana, and the seaports at the mouth of the La Plata. Pop. 8000.-(D'Orbigny's Voyage dans l'Amerique Meridionale.)

CORRINGHAM, two pars. Eng.:-1, Essex ; 2590 ac. Pop. 255.-2, Lincoln; 6270 ac. Pop. 564.

CORROBEDO CAPE, a headland, W. coast, Spain, Galicia; lat. $42^{\circ} 35^{\prime}$ N.; lon. $9^{\circ} 7^{\prime}$ W. (R.)

CORROGE, par. Irel. Tipperary; 868 ac. Pop. 520.
CORROPOLI, a tn. and com. Naples, prov. Abruzzo Ultra I., dist of, and 14 m . N.N.E. Teramo. It stands on a gentle slope; contains four churches, and two convents; and has an annual fair. Pop. 2771.

CORRYVRECKAN, a noted gulf and whirlpool, W. coast, Scotland, between the islands of Jura and Scarba, about lat. $56^{\circ} 10^{\prime} \mathrm{N}$. ; and lon. $5^{\circ} 40^{\prime} \mathrm{W}$. The breadth of the gulf is about 1 m ., and at certain times of the tide, and in ligh winds, the water rushes through it with great velocity and noise, and at such times there would be danger in attempting the passage with small vessels; but, in general, it is not at all so perilous as the appalling sights and sounds it presents would indicate, the latter having invested it with terrors which it really does not possess.

CORSCOMBE, par. Eng. Dorset; 4170 ac. Pop. 810.
CORSE, par. Eng. Gloucester; 2190 ac. Pop. 482.
CORSENSIDE, par. Eng. Northumberland; 9710 ac. Pop. 1108

CORSEWALL POINT, a headland, Scotland, N.W. coast of co. Wigton, at the entrance to Loch Ryan; lat $55^{\circ} 0^{\prime} 30^{\prime \prime} \mathrm{N}$.; lon. $5^{\circ} 9^{\prime} 30^{\prime \prime} \mathrm{W}$. (r.) A lighthouse here 92 ft . in height, the lantern 112 ft . above high water exhibits a revolving light visible nearly 15 m . off.

CORSHAM REGIS, a par. and tn. England, co. Wilts; 6710 ac . The town, of great antiquity, is 4 m . S. W. by W Chippenham, and is a station on the Great Western Railway. It is neatly built, and healthy. It has an ancient church, two Independent, and two Baptist chapels; a free school, a British school for boys and girls; and numerous charities. Before the introduction of machinery, the manufacture of woollen cloth was carried on here to a considerable extent, but it is now extinct. Cattle fairs are held in March and September. Pop. (1851), 3200.

CORSICA [French, Corse], an isl. Mediterranean, form ing the French dep. of same name. Bonifacio, its extreme S., is in lat. $41^{\circ} 23^{\prime} 48^{\prime \prime} \mathrm{N}$. , and lon. $9^{\circ} 9^{\prime} 15^{\prime \prime} \mathrm{E}$. (R.) ; and Cape Corso, its extreme N., is in lat. $43^{\circ} 0^{\prime} 35^{\prime \prime}$ N., and lon. $9^{\circ} 23^{\prime} 3^{\prime \prime}$ E. (L.) It is separated from the island of Sardinia, on the S., by the strait of Bonifacio, about 10 m . wide, and its shortest distance from the mainland, nearly from Cape Corso due E. to the coast of Tuscany, is 50 m . Its nearest distance from France is, N.W., about 100 m . It is somewhat irregular in shape, but tolerably compact, except towards the N., where it terminates in a long and narrow tongue of land, about 22 m . long, by about 6 m . broad. Greatest length, N . to $\mathrm{S} ., 110 \mathrm{~m}$.; greatest breadth, near its centre, 53 m .; area, 3377 sq. m. The E. coast is remarkable for its uniformity, presenting a line which is broken in only one or two places by comparatively small indentations. To this the W. coast presents a striking contrast, a number of deep bays following each other in rapid and almost nninterrupted succession. Of these, the most important, procceding N. to S., are the gulfs of St. Fiorenzo, Calvi, Porto, Liscia, Ajaccio, and Valinco. The interior is traversed by a mountain chain, which has its principal direction N. to S., but throws out several lateral branches, particularly to the N.W. The culminating point, Monte Rotondo, near the centre of the island, has a height of 9054 ft ., while several of the other summits considerably exceed 7000 ft ., and the greater part of the year are covered with snow. The mountain masses are chiefly composed of granite and porphyry, and appear to be generally overlaid by extensive beds of limestone. From the E. and W. sides of the chain numerous streams descend to the opposite sides of the coast. They are mere torrents, short and rapid, and altogether unfit
for navigation. The largest, both proceeding from the E. slope, are the Golo and Tavignano. Along with the other torrents which take the same direction, they have accumulated large quantities of debris and alluvium, which, preventing the egress of the waters, have gradually formed, on the E. coast, a long series of lagoons and morasses, and made that part of the island very unhealthy; but, with this exception, the climate is one of the finest in Europe. The heat is sometimes excessive, but the sky is generally clear, and the air bracing. Owing to the mountainous nature of the surface, the greater part of it necessarily remains in a state of nature, covered with primeval forests, or, when not absolutely naked and barren, clothed with herbage well fitted for the rearing of young cattle. Numerous valleys, however, lie between the lofty ridges, and sometimes plains of considerable extent occur, the soil of which is generally fertile, and well adapted for the growth of all the ordinary cereals. Not less than oneseventh of the whole surface is devoted to the culture of grain, and a return of twentyfold is not uncommon. The lower sunny slopes are generally covered with vineyards; lout, owing probably more to mismanagement than to any defect in the soil, none of the wincs produced have, as yet, attained a high name. The olive appears to be indigenous to the island, and is found growing luxuriantly in all parts of it. It also forms an important branch of regular culture, and is understood to yield very profitable returns. The mulberry, orange, and citron, succeed well, particularly in the lower valleys near the coast; and it is thought that indigo, cotton, and sugar, might be cultivated with success. One of the most valuable productions of the more elevated districts is the chestnut, on which, at least dnring the winter months, the porer inhabitants principally subsist. Among domestic animals, the first place seems due to mules and goats. The former are finely formed, sure-footed, and hardy, and are almost the only animals employed for transport; the latter are of a large and handsome breed, and are kept in vast numbers. Both horses and cattle are indifferent; and the sheep, though remarkable for the delicacy of their flesh, are small in size, and yield inferior wool. The principal wild animals are the boar and the fox. The wolf is unknown. Deer are numerous in the forests, and all the smaller game and wildfowl are common. Eagles, vultures, and numerous other birds of prey, frequent the loftier mountain districts. Both in the rivers, in the lagoons, and along the coast, fish abound, and active fisheries are carried on. Corsica is not rich in minerals. Numerous metals exist in small quantities, and iron is worked to some extent; but the economical value of the whole is very limited. At present, the principal source of mineral revenue is derived from quarries of fine granite, porphyry, and marble.

Neither manufactures nor trade have made much progress. The chief exports are wine, brandy, olive oil, chestnuts, fruit, and fish. The Corsicans are of middle size, and of a dark and somewhat bilious complexion. They are generally sober and hospitable, and have repeatedly given proofs of their boldness and love of independence. One of the darkest features in their character is a love of revenge.

From the Phœnicians, its first colonists, the island took the name of Cyrnos; and from the Romans that of Corsica. On the decline of the Roman empire it was seized by the Goths, and passed from them to the Saracens. In 1481, it fell under the dominion of the Genoese, who retained it, with some interruption, till 1755 , when a great part of it was wrested from them, and made independent, by the celebrated General Paoli. France, founding on a pretended cession by the Genoese, obtained forcible possession of it in 1768, after the inhabitants had distinguished themselves by a long and valiant resistance; and it is now so incorporated with France, as to have become one of its departments. For administrative purposes, the department is divided into five arrondissements -Ajaccio (the capital), Bastia, Calvi, Corte, and Sartene; subdivided into 61 cantons, and 355 communes. The most distinguished individuals to whom Corsica has given birth are Paoli and Napoleon. Pop. (1846) 230,271.

CORSICO, a vil. Austrian Italy, prov. of, and 3 m. S.W. Milan, on the Grand Canal. It possesses a church and sessionhouse. Pop. 1319.

CORSLEY, a par. and vil. England, co. Wilts; 2580 ac. The village, situate in a valley, 3 m . W.N. W. Warminster, has a parish church, recently erccted, two chapels, belonging
to Anabaptists and Wesleyans, and a national school. Pop. (agricultural) 1621.

CORSO, an isl., W. coast, Patagonia, and about 8 m . long; lat. (S.W. summit) $49^{\circ} 48^{\prime} \mathrm{S}$. ; lon. $75^{\circ} 34^{\prime} \mathrm{W}$. (R.)

CORSO, or Conse [anc. Promontorium Sacrum], a cape, forming the N. extremity of Corsica; lat. $43^{\circ} 0^{\prime} 35^{\prime \prime} \mathrm{N}$.; Ion. $9^{\circ} 23^{\prime} 3^{\prime \prime}$ E. (L.) It is a headland about 5 m . broad, a moderate height above the shore, but ascending rapidly towards the interior. Separated from it by a narrow channel, in which the depth of water, generally about 8 fathoms, diminishes at one point near the centre to 4 fathoms, is the little island Giraglia, with a watch tower upon it. In the neighbourhood of the cape, variegated marble and jasper are found.

CORSOERR, or KorsöEr, a small seaport tn. Denmark, W. coast, isl. Seeland, on the Great Belt, 62 m . S. W. Copenhagen, lat. $55^{\circ} 20^{\prime} 19^{\prime \prime} \mathrm{N}$.; lon. $11^{\circ} 7^{\prime} 43^{\prime \prime} \mathrm{E}$. (L.) It lies on a narrow spit of land, has a church, a good small harbour, a dockyard, and regular communication across the Belt, both by steam and packet-boat, with Nyborg. Pop. 1600.

CORSTON, par. Eng. Somerset; 1210 ac. Pop. 604.
CORSTORPHINE, par. Scotland, Edinburgh, 4 m. by 2 m . Pop. (1851) 1499.

CORTACHY and CLOVA, par. Scot. Forfar; $23,680 \mathrm{ac}$. Pop. 867.

COR'TAILLOD, a vil. and par. Switzerland, cau. of, on the lake, and $5 \mathrm{~m} . \mathrm{S} . W$. Neufchâtel. It is a well-built place, and has one of the most important cotton factories of Switzerland. The wine of the district bears a strong resemblance to Burgundy. Pop. 1070.

COR'TE, a th. France, dep. and near the middle of isl. Corsica, in its N. half. It lies about 35 m . N.E. Ajaceio, 1 . bank, Tavignano, on the E. slope of a hill overlooking a delicious valley covered with gardens, vineyards, oliveyards, and country seats. The town is defended by a fort, and it is so irregularly built, that it may be said to have no streets. The principal buildings are the old palace, in which the court sits; the house of the heroic Gafforri; the citadel, an old castle built in the 15 th century; and the barracks, capable of holding 1200 men. It has a polytechnic elementary school; and an abundant supply of water is obtained by an aqueduct, 4374 yds. long. There is some trade in the grain and wines of the vicinity. It was the seat of the government of Paoli. Pop. 4164 .

CORTE del Palasio, a vil. and com. Austrian Italy, prov. of, and 4 m. N.E. Lodi. It contains a parish church, oratory, and chapel, and stands in a district which is fruitful in corn and flax, and contains rich pastures. Pop. 1380.

CORTEGANA, a tn. Spain, Andalusia, prov. of, and 40 m. N. Huelva, on an elevated plain. It is commanded by a castle, has tolerably well made strcets, and two squares; a parish church, four schools, town and session houses, a prison, hospital, storehouse, cemetery, and several convents. Linen and woollen fabrics, earthenware, locks, corks, and implements of husbandry, are manufactured; wine and oil expressed; and some trade carried on in cattle, grain, and manufactured goods. Pop. 3295.

CORTEMAGGIORE [anc. Castrum Lauri, or Curia Major], a tn. and com. Italy, duchy Parma, 15 m . E. by S. Piacenza, r. bank, Arda. It is well built, of a quadrangular form, and has two parish churches, a townhall, Hebrew, medical, and clementary schools; an hospital, theatre, markethouse, and cavalry barrack. The surrounding country is flat, and affords good herbage for cattle; but, from want of irrigation, no great quantity of grain is produced. Four fairs are held annually. Pop. 2000; of com. 4597.

CORTEMARCQ, a tn. and com. Belgium, prov. E. Flanders, 11 m . S.W. Bruges. It has some woollen manufactures, two brickworks, a tannery, a dyework, several breweries, and numerous mills. Pop. 4513.

CORTEMIGLIA, a tn. Sardinian States, Piedmont, div. of, and 32 m. N.E. Coni, 31 m. S.W. Alessandria, traversed by the Bormida, which is crossed by a bridge, and divides it into two parts, one of which is defended by a wall, flanked with towers. It contains a ruined castle, the ancient residence of the marquises of Cortemiglia. Pop. 1990.

CORTE OLONA, a tn. Austrian Italy, gov. Milan, prov. of, and 11 m . S.S.E. Pavia, cap. dist. of same name, l. bank, Olona. It is well built, contains a parish church, and has a weekly market. Pop. 1330.

CORTES, several tns. and vils. Spain, particnlarly -1 , (-de la Frontera), a town, Andalusia, prov. of, and 48 m . W. by S. Malaga, at the foot of the sierra de Martin Galgujo. It is tolerably well built, and contains a parish church, two chapels, three schools, a townhall, prison, hospital, and numerous fountains, some of them chalybeate. The inhabitants are engaged in boiling soap, tanning, weaving, expressing oil and wine, and in husbandry. Pop. 3295.-2, (-de Arenoso), a town, Valencia, prov. of, and 28 m . N.W. Castellon-de-laplana, $15 \mathrm{~m} . \mathrm{N}$. Viver, between the rivers Villahermosa and Mijares. It possesses a church, townhall, prison, school, and four convents. The inhabitants are occupied in weaving, dyeing, and husbandry. Pop. 1775.-3, A town, prov. Navarre, 12 m . S.E. Tudela, near r. bank, Ebro, on the confines of Aragon. It contains four squares, a church, townhall, prison, two schools, a handsome and spacious aqueduct, and a magnificent palace of the Duke of Granada. Pop. 960.

CORTETZ, or Cortitz, an isl. Russia, gov. of, and 39 m . S. Ekaterinoslav, formed by the Dnieper. It stands 165 ft . above the level of the river, and is surrounded on all sides by masses of granite, which make it naturally, without the aid of art, almost impregnable. It was early selected by the Zaporog Cossacks as the site of their celebrated Setcha; and on their removal, in 1784, to the banks of the Kuban, by Catherine II., was settled with a colony of Germans, composed entirely of Prussian Mennonites. Cortetz is the most important of 16 villages, which were similarly settled at the same time. The inhabitants are industrious, but too strongly attached to antiquated customs to give ready admission to modern improvements. They have some manufactures of cotton and woollen goods, but live chiefly by agriculture and the rearing of cattle.

COR'TINA, a tn. Austria, duchy Tyrol, l. bank, Botta, here crossed by a fine bridge, 64 m . S.E. Innsbrück, and 34 m. E. by S. Brixen. It has a church, and some trade in wood. Pop. 2700.

CORTON, two pars. Eng.:-1, Suffolk; 1430 ac . Pop. 442.-2, (-Denham), Somerset; 1140 ac. Pop. 480.

CORTONA [anc. Corythus, Cortona], a tn. grand duchy Tuscany, prov. of, and 52 m . E.S.E. Florence. It rises amidst vineyards, on the acclivity of a steep hill, and commands a magnificent prospect of the Thrasimene and Clusian lakes, the mountains of Radicofani, and the wide and variegated vale of Chiana. It is very ancient, having been founded by the Pelasgi, who made it their capital. It was subsequently colonized by the Romans. The original walls of Cortona are still to be seen, serving as foundations to the modern walls, which were built in the 13th century. Cortona being considered the capital of the ancient Etruria, was chosen as the seat of the Etruscan Academy, in 1726. Many interesting antiquities are still preserved in the town. It has six churches and a cathedral, containing some fine pictures and a tomb, said to le that of the Consul Flaminius. It has also a theatre, library, cabinet of natural history, museum of antiquities, \&c. Quarries of very fine marble are worked in the neighbourhood. A small sepulchral chamber, a little below the town, has received the name of the Grotto of Pythagoras. This is a building, however, not an excavation, being formed of large blocks of sandstone, and containing a room about 7 ft . sq., with square recesses, probably for cinerary urns. It is interesting, chiefiy as indicating that the builders were, 'without doubt, acquainted with the principle of the arch, though afraid, perhaps, to confide much to it.' P. (1853), 4277

CORUCHE, a tn. and par. Portagal, prov. Estremadura, 24 m . S.E. Santarem, near the Sorraia. It is well built, contains a church, hospital, and almshouse, and has an annual fair. Pop. 23500.

CORUISHK (Locr), a small lake, Scotland, Isle of Skye, 12 m . S. Portree, 1 to 2 m . in length, by $\frac{1}{2} \mathrm{~m}$. in breadth. It contains a few rocky islets, and many historical incidents are connected with it. The scenery around the lake is exceedingly wild and mountainous.

CORUNA (LA), a prov. Spain, one of the four into which Galicia is divided, occupying the N.W. extremity of the Spanish peninsula, beween lat. $42^{\circ} 21^{\prime}$ and $43^{\circ} 47^{\prime} \mathrm{N}$.; and lon. $7^{\circ} 40^{\prime}$ and $9^{\circ} 14^{\prime} \mathrm{W} . ;$ bounded, N. and W. by the Atlantic Ocean, E. by prov. Lugo, and S. by Pontevedra; area, 4899 sq. m.; cap. same name. It is mountainous, interspersell with plains and fertile valleys; the coast, bold, and rugged, forms some
deep bays and lofty capes. Some of the mountains are capped with snow during the greater portion of the year; their lower slopes are covered with forests of pine, oak, beech, chestnut, and other timber, for ship and domestic building, \&c., abounding with wild boars and wolves, which, in winter, descend into the plains, and commit great depredations amongst the flocks and herds. Some iron, copper, silver, and coal mines are wrought, but to no great extent. The province is watered by several rivers, the chief of which are the Ume, Tambre, Lezaro or Jallas, Mandeo, and Mera. The plains and valleys are, in some places, exceedingly rich; yielding good crops of maize, rye, millet, oats, hemp, flax, beans, pease, grapes, olives, oranges, large quantities of potatoes, and other fruits and vegetables; but little wheat or barley is grown. There are immense tracts of meadow land, on which numerous flocks of sheep, goats, and considerable numbers of horned cattle, depasture ; and pigs find excellent food in the acorns, beech-nuts, chestnuts, \&c., in the forests. Mineral and medicinal springs-feruginous, chalybeate, calcareous, and sul-phureous-are plentiful. In the high lands, the climate is cold, damp, and much exposed; while the valleys are warm in summer, and have scarcely any severe frosts in winter ; heavy rains are frequent at some seasons of the year. Weaving, tanning, making hats, shoes, hardware, earthenware, ropes, and sailcloth, shipbuilding, fishing, preparing bacon, tillage, and cattle-rearing, occupy the inhabitants. Brandy, wine, oil, fish, bacon, fruits, vegetables, iron, copper, lead, soap, and paper, are exported. Glass, sugar, coffee, vinegar, cut lery, perfumery, and other articles imported. The state of education is most deplorable, and the condition of the peasantry wretched in the extreme. Pop. 511,492.

CORUNA (La) [Latin, Coronium; English, Corunna; French, Corogne], a city and seaport, Spain, N.W. coast,Galicia, cap. above prov., on the extremity of a small peninsula at the entrance to the estuary of the Coraña river, $318 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Madrid ; lat. (Castle St. Antonio) $43^{\circ} 22^{\prime} 30^{\prime \prime} \mathrm{N}$. ; lon. $8^{\circ} 22^{\prime} 42^{\prime \prime}$ W. (r.) (For plan of position, \&c., see Ferrol.) It stands partly at the base, and partly on the acclivity of a hill, theso portions being called, respectively, the upper and lower towns, the former is walled round, and defended by a citadel. The streets of the upper division of the city are steep and narrow ; those in the lower are more spacious. Both are extremely filthy, though among the best paved of any town in Spain. It contains plain-looking townhouses, a custom-house, several churches and convents, two hospitals, two barracks, an arsenal, prison, house of correction, and schools of design, mathema tics, and navigation; and two theatres, the old and new, the latter of which is a very elegant edifice. It likewise possesses several literary societies, two small libraries, and several benevolent institutions. Coruña is the residence of a captaingeneral, and a provincial intendant, and of British, French, Danish, and Sardinian consuls; and the seat of the supreme court of justice for Galicia. The harbour is spacious and secure, and protected by two forts; one on an insulated rock at its mouth, called Fort St. Antonio, which has been used as a siate prison ; the other, Fort St. Diego, situated on the main land. The chief objects of interest are the royal arsenal, and the lighthouse, situated on the $\mathbf{N}$. shore of the peninsula, called the Tower of Hercules, 92 ft . in height, and which is seen, in clear weather, from a distance of 60 m. ; it is said to be of Roman construction. The linen manufactures of Coruña, ouce famous in the peninsula, have declined in consequence of forcign competition, and are now nearly extinct. The only manufactures of importance now carried on are glass, soap, starch, some common cottons, iron-founding, oil-cloth, hats, and the salting of provisions. It has also some considerable fisheries, particularly of sardines. The vessels entered and cleared at the port, from 1843 to 1846, were as follows:-

|  | Outward. | Inward. |
| :---: | :---: | :---: |
|  | Vessels. Tons. | Vessels. Tons, |
| 1843 | 531......32,766. | 416......30,401 |
| 1844. | . 1036......45,957 | 1212......53,013 |
| 1845. | 537......32,150. | 576.......34,184 |
| 1816. |  | 89.......14,063 |

In the bay before Coruña, the famons Spanish Armada was refitted during four weeks, May 1588, prior to sailing for England ; and under the walls of the town Sir John Moore fell, in the engagement which took place there with the French, under Marshal Soult, on January 16, 1809. He lies buried at
the extremity of the upper town, in the Campo de San Carlos; a tomb has been erected over his grave at the expense of the British Government, and the ground around it has been planted as a public alameda. Pop. $19,415$.

CORVO, an isl., N. Atlantic, forming the most N.W. of the Azores; lat. (N. point) $39^{\circ} 43^{\prime} 30^{\prime \prime} \mathrm{N} . ;$ lon. $31^{\circ} 7^{\prime} 15^{\prime \prime}$ W. Area, $16 \mathrm{sq} . \mathrm{m}$. Its coasts are high and rocky, but the interior is fertile and well-wooded. It has two small ports, which are seldom visited by strangers. Hogs, wood, and corn are exported to the other islands; and its wheat is esteemed the best of all the Azores. The inhabitants, who are very poor, amount to about 700 .

CORVOEIRO, a cape, N.W. coast, Africa, 40 m . N. Cape Blanco; lat. $21^{\circ} 15^{\prime} \mathrm{N}$. ; lon. $17^{\circ} \mathrm{W}$.

CORWEN, a market tn. and par. N. Wales, co. Merionetl. The rown is beautifully situate on the Dee, in a romantic valley, at the foot of the Berwyn mountains, $8 \frac{1}{2} \mathrm{~m}$. W. Llangollen, and consists of one street, composed of plain stone houses, built on each side of the great Holyhead road. Water abundant. It has an Established church, three dissenting chapels, a school, reading-room, and a union workhouse. The inhabitants are employed in agriculture. Pop. 2129.

CORY'TON, par. Eng. Devon; 1710 ac. Pop. (1851) 311.
CORZOLA, a tn. Dalmatia. See Curzola.
COS, or Kos [now called Stancho], an isl., Asiatic Turkey, in the Grecian archipelago, coast of Anatolia, at the mouth of the gulf of same name; lat. (W. point) $36^{\circ} 43^{\prime} \mathrm{N}$.; lon. $26^{\circ} 49^{\prime} 30^{\prime \prime}$ E. (R.) It is 21 m . long, and about 6 broad; on the $S$. is a lofty range of mountains; and the remainder of the island is a delightful plain, of extraordinary fertility, producing, in abundance, corn, cotton, silk, and wines, all of excellent quality. Orange, lemon, pomegranate, fig, and other fruit trees, abound; especially in the neighbourhood of Cos, the only town of importance in the island. It occupies the site of the ancient city; and in the public square there is an enormous plane tree, probably the largest in the world, supposed to be 1000 years old. It is a miserable place; and the harbour, formerly much resorted to, has now become so filled up, that vessels of the smallest size cannot enter it. The principal commerce of the town and island consists in the exportation of fruits to most of the islands of the archipelago. The Turks inhabit the town, while the Greeks are scattered in villages through the island. Cos gave birth to Hippocrates the plysician, Apelles the painter, and Ariston the philosopher. It became subject to the Roman, Byzan tine, and Ottoman empires in succession. The population of the island, formerly 20,000 , has, notwithstanding the fertility of the soil, and the delightful climate, been for many years gradually declining, and does not now exceed 4000 .The gulf of Cos, called, also, Boodroom [anc. Ceramus], on the coast of Anatolia, is 17 m . wide at its entrance, and extends inland 52 m . It is very deep, being seldom less than 300 ft ., even near the shore. On the S. shore are numerous excellent harbours; but as there are no inhabitants near the coasts, it is with great difficulty that supplies can be obtained. In the summer months, the upper part of the gulf, being unhealthy, is abandoned by the inhabitants.

COSALA, a tn., Mexican confederation, state of Sonora and Cinaloa, 80 m . N.E. Mazatlan. Near it is a gold mine, exceedingly rich, which, however, is not worked. Pop. 6000.

COSBY, par. Eng. Leicester; 2550 ac. Pop. 1013.
COSEL, a tn. Prussia. See Kosel.
COSENZA [anc. Cosentia], a tn. Naples, cap. prov. Calabria Citra, 150 m. S.E. Naples, at the confluence of the Crati and Bussento, in a vallcy surrounded by hills, 11 m . E. from the Mediterranean. The Bussento, which is here crossed by two bridges, divides the town into two parts, and the narshes formed by the river above and below the town are said to render the situation unhealthy. It is fortified, and has a vast citadel. The strects, with one exception, are narrow and crooked. The town contains a handsome cathedral, several churches and convents, a seminary, an hospital, a foundling hospital, a magnificent courthouse or tribunale, one of the finest buildings in the kingdom; a royal college, two academics, and a theatre. It is the seat of an archbishopric. and of the civil and criminal courts of the province, as well as the residence of the civil and military authorities. Cutlery and earthenware are manufactured here; and a considerable trade is carried on in silk, wine, manna, fruits, flax, \&c. The
extensive game forest of Sila is at a short distance from the town. In the 16 th century, a celebrated acadeiny was founded here by Bernardino Telesio, a native of the town.

Cosenza, anciently the capital of the Bruttii, submitted to the Romans, was taken by Hannibal ; from whom the Romans recaptured it soon afterwards. Alaric, the Goth, laid siege to it in 410 , died before its walls, and was interred by his soldiers in the bed of the Bussento. It was afterwards sackel by the Saracens, who were expelled in turn by the Northmen, who, having founded the kingdom of the two Sicilies in 1130 , made Cosenza the capital of Calabria Citra. Pop. 9000.

COSGROVE, par. Eng. Northampton; 1760 ac. Pop. 701.
COSHESTON, par. Wales, Pembroke; 2000 ac. Pop. 513.
COSI, Koose, or Koosa, a river, Hindoostan, rising in two branches in the mountains of Nepaul, not far from Khatmandoo, flowing S.E. to near Chattra, then turning almost due S., and, after a total course of 300 m ., falling into the Ganges, lat. $25^{\circ} 21^{\prime} \mathrm{N}$. ; lon. $87^{\circ} 15^{\prime}$ E.; on the l. bank, by a channel 2 m . wide, which. however, except in the height of the rainy season, is almost completely occupied by islands and sandbanks. Its principal affluent is the Arun, supposed to rise on the N. side of the Himalaya.

COSIHUIRIACHI, a tn., Mexican confederation, state Chihuahua, under the parallel of $28^{\circ} 12^{\prime} \mathrm{N}$. Its population, which formerly amounted to 10,700 , has, in consequence of the falling off in the productiveness of the mines in the neighbourhood, been reduced to 3000 .

CÖSLIN, a tn. and gov. Prussia. Sce Köslin.
COSMOLEDO ISLANDS, a group in the Indian Ocean, at the N.E. cntrance to the Mozanbique Channel, about lat. $9^{\circ} 40^{\prime} \mathrm{S}$. ; lon. $47^{\circ} 42^{\prime} \mathrm{E}$. This group consists of a ring of coral about 30 m . in circumference, inclosing a magnificent lagoon, into which there is no apparent entrance. These isles are sometimes resorted to for fish, and a few blacks are lcft on them, who wait the vessels' return. On the S. side there is a patch of sand, where small vessels may anchor during the N. monsuon.

COSME (St.), a vil. France, dep. Saône-et-Loire, so close on Chalon-sur-Saône, as to be only its suburb. Pop. 1741.

COSNE [anc. Conium], a tn. France, dep. Nièvre, 31 m. N.N.W. Nevers, r. bank, Loire, at its confluence with the Nouain. It is well built, and the streets are clean and straight. The Loire is crossed here by a suspension bridge, and the Nouain or Nohain furnishes water power to numerous works, amongst which are several cutleries, and an anchor manufactory. There is a considerable trade in iron, grain, wine, wood, hemp, and cattle. Under the Romans, Cosne was called Condate. Pop. 5376.

COSI'OOR, or Khaspur, a fortified tn. India, beyond the Brahmapootra, prov. Cachar, of which it is the capital. It is situate on the Madhura, a small stream, celebrated for the clearness of its waters, 61 ml . E. Silhet, in Bengal. It was formerly a flourishing place, and enjoyed almost all the trade between Bengal and the kingdom of Assam.

COSSACKS, the general term employed to designate a military people of Russia, and also part of the territory which is occupied by them. The following article first describes the territory, and then gives a short account of the people:-

Cossacks, Don, a gov. S. Russia; bounded, N. by govs. Saratov and Woronez, W. Woronez and Ekaterinoslav, S. sea of Azof and Caucasus, and E. Saratov and Astrakhan. Greatest length, from N. to S., 330 m .; breadth, from W. to E., varying from 130 m . to 275 m . The government consists, for the most part, of one of those extensive flats called steppes; but there is some hilly land, particularly towards the $S$. which may be regarded as forming one of the last ramifications of the Caucasian chain. The soil is in general so very sandy, as to be scarcely fit for cultivation. Towards the N. there is some tolerably arable land, and along the banks of the rivers even a rich alluvium is found; but the $S$., where not absolutely waste, affords, at the best, an inferior pasture. The whole surface belongs to the basin of the Don, which forms a kind of semicircle around its centre, and, towards the E. of the government, approaches the Volga so near as to be, at one point, not more than 35 m . distant from it. Unfortunately, the land between the rivers is so hilly, as to prevent the formation of a canal, which might unite them. The Don, besides watering the government centrally, receives scveral
important tributaries within it, and, after the confluence of the Manitsch, has a breadth of about 1000 yards. The climate is, on the whole, mild and agreeable; but in winter both intense cold and violent storms occasionally prevail. The chief employment is the rearing of cattle; but, where the soil is suitable, all the ordinary cereals and legumes are cultivated, and yield good crops. Hemp and flax are also grown, and good wine is produced, part of it scarcely inferior to the light French wines, and part resembling Burgundy. From several lakes in the S. large quantities of salt are obtained. Fish, including sturgeon, salmon, and carp, abound, and form a principal article of food. The caviar of the government is in great request, and forms a considerable export.

Cossacks, people.-The people from whom the above government derives its name are not confined to it, but form the principal part of the population of several extensive districts in Russia, where, according to the localities which they occupy, they receive different designations, and are called Don Cossacks, Cossacks of the Black Sea, Kuban, Volga, Ural, Siberian Cossacks, \&c. Their origin is involved in considerable obscurity. Their very name has been the subject of keen dispute, but the prevailing belief now is that it is of Tartar derivation. In general, it may designate any lightarmed trooper; but it is often used in a mere vituperative sense, and applied to any member of a vagrant horde which roams or makes incursions into a district, and lives on the plunder of its inhabitants. Though the Cossacks possess several characteristics by which they are easily distinguished, they do not appear to have sprung from one original stock. There is evidently a mixture of blood among them. They bear a close resemblance to the Russians, but are of a more slender make, and have features which are decidedly more handsome and expressive. They have a quick, keen eye, and an ear which is ever on the alert, and are active, spirited, and brave. Their intellect is good, and they often exhibit a remarkable degree of acuteness. Education, accordingly, has made some progress among them, and their old capital, StaroTcherkassk, contains a gymnasium, in which the proficiency of the Cossack pupils would not suffer by comparison with that of any other town of the Russian empire. Their language is a mixture of Russian, Polish, and Turkish; their religion that of the Greek Church, to which they are strongly attached, and the superstitious practices of which they are particularly careful in observing. In many of their domestic habits they contrast favourably with the Russians. They are much more cleanly, and pay a greater regard to personal appearance. Like them, they often drink to excess, but seem more alive to the degradation which results from it; and, accordingly, when they do indulge in bacchanalian orgies, have generally the sense to keep them private. The martial tendencies of the Cossacks are very decided, and have from time immemorial formed their distinguishing feature. The whole structure of society among them is military. Originally, their government formed a kind of democracy, at the head of which was a chicf or hetman, of their own choice; while, under him, was a long series of officers, with jurisdictions of greater or less extent, partly civil and partly military, all so arranged as to be able, on any emergency, to furnish the largest military array on the shortest notice. The democratical part of the constitution has gradually disappeared under Russian domination. The title of chief hetman is now vested in the heir-apparent to the throne, and all the subordinate hetmans and other officers are appointed by the Crown. Care, however, has been taken not to interfere with any arrangements which fostered the military spirit of the Cossacks; and hence all the subdivisions of the population into pulks and minor sections, with military heads, and of the villages into stanitza, still remain. Throughout the empire, wherever partioular alacrity, vigilance, and rapidity of movement are required, the qualities hy which the Cossack is distinguished mark him out for employment. His proper sphere, undoubtedly, is to act as a light-armed trooper, and to be, as the celebrated Suwarrow emphatically expressed it, 'the eye' of the army, protecting its rear in retreat, or pushing forward in advance, and making it almost impossible for a flying enemy to escape. How admirably the Cossacks are adapted to these purposes, was made known to all Europe during the disastrous retreat of the French from Moscow. The Russian government, however, has found other fields for their exer-
tions. When a frontier is to be guarded, the qualities re. quired very much resemble those which make the Cossack so valuable to an army in the field; and, accordingly, colonies of Cossacks have been planted on all the borders of S. Russia, along the Kuban and the Terek, and form a most effective barrier against sudden incursions by half-civilized tribes. In the Caucasus, however, the Russians have met with a foe of a different stamp; and, instead of having merely to repel sudden incursions, are obliged to fight for every inch of ground on which they plant their feet. In this way they have been constrained to fix upon a series of strong positions, on which they have constructed a kind of forts, called kreposts. The nature of these, the sudden attacks to which they are exposed, and the mode of giving the alarm, so as to call in the

krepost, or cossack post, on the circassian frontier. From Hommaire de Hell, Steppes de la mer Caspienne.
aid of neighbouring posts, are well exhibited in the accompanying illustration. In this service Cossacks chiefly are employed; and, though that remarkable quickness of ear, by which they can catch the slightest sounds, at almost incredible distances, may fit them well for it, it certainly must be a scrvice altogether uncongenial to their nature and habits. The Cossack is almost always on horseback, and is in his element when scouring the open fields. Here he is cooped up within a rarrow space, and dare not venture 100 yards heyond it, without exposing himself to the deadly aim of a Circassian. So monotonous is this mode of life, so different from that which he had been accustomed to lead, that the Cossack often abandons himself to despair, and disappoints the Circassian, by becoming his own murderer.

COSSAL, par. Eng. Notts; 720 ac. Pop. 334.
COSSATO, a tn. Sardinıan States, Piedmont, prov. Biella, 42 m. N.E. Turin, on a hill. It has some trade in wine. Pop. 2500.

COSSE-Le-Vivien [anc. Cossiacum], a tn. France, dep. Mayenne, 11 m . S.S.W. Laval. It has six annual fairs. Pop. 1999.

COSSEY, or Costessy, par. Eng. Norfolk; 3150 ac. Pop. 1074.

COSSEIR, a tn. Egypt. See Kosseir.
COSSIMBAZAR, a tn. Hindoostan, prov. Bengal, dist. of, and 1 m . S. Moorshedabad, l. bank, Bhagirathy, the most sacred branch of the Ganges ; lat. $24^{\circ} 10^{\prime}$ N.; lon. $88^{\circ} 15^{\prime}$ E. It has an extensive traffic, and, during the rainy season, has a great variety and extent of water-carriage; but for two or three months of the year the river is not navigable. The quantity of silk consumed here annually by the natives, in the

## CÖTE-D'OR

manufacture of carpets, satins, silk bonnets, and other stuffs, is very great, while there is also a large exportation to Europe, and to nearly every part of India. Cossimbazar has been long tamous for its cotton stockings, which are wire-knitted, and highly prized. This town is the station of a circuit court, comprehending the adjoining districts of Boglipoor, Dinagepoor, Rungpoor, Purneah, Rajeshahy, and Birbhoom. Formcrly the French and Dutch had factories here. Pop. 25,000.

COSSING'TON, two pars. Eng.:-1, Leicester; 1810 ac. l'op. 310.-2, Somerset ; 1400 ac. Pop. 248.

COSSONAY, a tn. and dist., Switzerland, can. Vaud, $9 \mathrm{~m} . \mathrm{N} . W$. Laussane. It is old, lies on a rising ground, and its houses are generally well built. It has an old church, an hospital, and on a neighbouring height the ruins of a castle. The inhabitants are engaged in agriculture and cattle-rearing, and are mostly in easy circumstances. Pop. of tn. 859 ; dist. about 10,000 .

COSTA RICA, the most S. state of the Republics of Central America; bounded, N. by Nicaragua, from which it is separated N.E. by the river San Juan; E. and N. by the Caribbean Sea; E. and S. by New Granada, from which it is separated E. by the river Escuda, and $S$. by the cordillera de Cabecares; and S. and W. by the Pacific; between lat. $8^{\circ}$ and $11^{\circ} 30^{\prime} \mathrm{N} . ;$ lon. $83^{\circ}$ and $85^{\circ} \mathrm{W}$. Area, about 16,250 sq. m. The country is intersected diagonally by the primary range of the istbmus, which throws off numerous spurs on cither side, giving to the surface a continued alternation of abrupt lieights and sudden depressions. The principal range contains several lofty eminences, and volcanoes, both active and extinct or dormant, including those of Orosi, Votos, and Cartago; from the summit of the last of which, both the Pacific and Atlantic can be distinctly seen. The N.W. districts are more rugged and mountainous than the S.W., but along the coast of the Pacific, especially around the Bay of Nicoya, the country has a most beautitul and picturesque appearance, being diversified by valleys, and intersected by numerous streams. Costa Rica contains some of the richest gold mines in this portion of America, whence the origin of its name; these mines, however, are now not at all, or very little wrought. Silver and copper are also found, but they, in like manuer, rcceive little notice. In all parts of the state, with exception of the sea coasts, the climate is mild and temperate, never subject to excessive heats or colds, and rarely experiencing any other vicissitudes than those from the dry to the rainy season. It is, therefore, extremely well adapted to agricultural purposes, and capable of bringing to maturity many European plants, as well as most of those peculiar to the tropics. The soil is remarkably fertile, especially on the table lands, and in the valleys between the mountains. Among its agricultural productions are coffee, cacao, Indian corn, tobacco, sugar, and a little wheat, which last not being an article of general consumption, is not much attended to. The horses of Costa Rica are of an inferior description; but the mules are greatly estecmed; and cattle, sheep, goats, and hogs are reared in great numbers, and of excellent quality. The wild animals include the cougar, wolf, tapir, wild boar, fallow-deer, hares, sloths, and squirrels. The wooded coasts of the Pacific are much infested by dangerous reptiles, and great devastation is frequently caused by locusts. The birds, which inclitde vultures, pelicans, parrots, pigeons, ducks, quails, tcal, exhibit the gayest and most beautiful plumage.

The woods of Costa Rica are valuable, comprising mahogany, cedar, Brazil, and various other kinds of timber; and on the sea coast of Nicoya, some pearls, and large quantities of mother-of-pearl shells are found. Coffee, however, forms the most important product of the state. Its cultivation, though only introduced about the year 1830 , has increased so rapidly, that 3000 to 4000 tons of the seeds are now exported annually. Tobacco, which is of excellent quality, is a Government monopoly, anl is sent chicfly to Nicaragua, though some of it finds its way to the British market. The other exports are gold, sugar, Brazil wood, and mother-of-pearl. The imports consist chiefly of manufactured goods. Total exports, 1845, $£ 126,340$; imports, $£ 87,600$.

Costa Rica is divided into 3 departments :-the E., the W., and that of Nicoya. Each of these is again subdivided into partidos or districts. The principal cities are San José, the capital; Cartago, Erredia, Estralla, Esparza, and Ujarras. The two established ports of entry are l'unta Arenas, in the

Gulf of Nicoya, and Matina, on the Caribbean Sea. The Government of Costa Rica was established in 1823 , and is accounted the best and most liberal in Central America. It has a representative Legislature, and the executive is intrusted to a supreme chief. The religion is R. Catholic. The annual net revenue of the state averages about $£ 26,400$. The inhabitants are extremely industrious and orderly, and are making rapid strides in wealth and improvement. They were formerly subjected to great poverty, and it is only of late years, and since the cultivation of coffee on an extensive scale began to be encouraged, that they have attained to anything like their present prosperity.

In 1849-50, the Governnic:t granted to Mr. G. Lafond, the French consul-general, a tract of land, from the Gulf of Dulce, on the Pacific, to the Boca del Toro, on the Caribbean Sca, for the purpose of opening a route between the two oceans. The route across the isthmus by the San Juan river, along part of the frontier of Costa Rica, is so far opened, that steamers now ply on the river in connection with others on the lake of Nicaragua. Pop. 150,000 ; of whom 25,000 are Indians. - (Dunlop's Travels in Central America; Bailey's Central America; Bull. Soc. Geo. Paris; Kiepert's Map of the Republics of Central America.)

COSTIGLIOLE, two tns. Sardinian States, Piedmont:1 , (-di Saluzio), div. of, and 12 m. N.N.W. Coni, r. bank, Varacta. It contains a communal college, has iron forges, and silk mills. In the neighbourhood a good muscat wine is made. Pop. 2390.-2, ( $d^{\prime}$ Astı $)$, div. Asti, cap. mandamento, 123 m . W.s. W. Alessandria. Pop. 4500.

COSTOCK, or Cortlingstock, par. Eng. Notts; 1320 ac. Pop. 470.

COSTON, three pars. Eng.:-1, Leicester; 1680 ac. Pop. 147.-2, Norfolk; 300 ac. Pop. 48.-3, (-Hackett), Worcester; 1400 ac. Pop. 211.

COSTROMA, gov. and tn. Russia. See Kostroma.
COTAGAITA, a river and tn., Bolivia. The river rises on the E. slope of the Bolivian Andes, about lat. $21^{\circ}$ S., and after a direct $E$. course of 187 m ., falls into the Pilcomayo, in lat. $20^{\circ} 48^{\circ} \mathrm{S}$. ; lon. $66^{\circ} 28^{\prime} \mathrm{W}$.-The Town is situate, 1. bank of the river, 88 m . S.S.E. Potosi.

CO'TABAMBA, a dist. Peru, intendency of Cuzeo, between the Apurimac and Pachachaca, intersected, S. to N., by the Oropesa, an affluent of the Apurimac. It is 78 m . long, and 50 broad; almost entirely covercd with mountains, which are clad with snow during the greater part of the year. Grain is produced in the valleys. Pop. 19,824; of whom 18,237 are Indians.

CO'TARINGAN, or Cotaringin, Bornco. Sce KotraWaringin.

CÔTE-d.Or, an inland and W. dep., France, cap. Dijon, formerly part of prov. Burgundy, having N. deps. Aube and Haute-Marne; E. Haute-Saône and Jura; S. Saône-et-Loire; W. Nièvre and Yonne, between lat. $46^{\circ} 55^{\prime}$ and $48^{\circ} \mathrm{N}$.; lon. $4^{c} 5^{\prime}$ and $5^{\circ} 35^{\prime} \mathrm{E}$. It derives its name trom a chain of hills, extending S.W. from Dijon, called Côte-d'Or, or hill of gold, on account of the excellence of its wine. Area, 8354 sq. m. - The department belongs to the basins of the Seine, the Loire, and the Rhone; but chiefly to those of the first and last. It is watered, N.W. by the Scine, which has here its source, and its affluents, the Aube, Ource, Armancon, and Serain; E. by the Saône, and its affluents the Vingeane, Tille, Ouche, and Dheune; and S.E. by the Arroux an affluent of the Loire. It is also intersected S.E. to N.W. by the Burgundy Canal. The surface is rather elevated, presenting some plains to the E. and N.W., but generally covered by offsets of the little mountain range of the Côte-d'Or, which traverses the department $N$. to N.; height, 1476 to 1640 ft ; uniting the Cevennes mountains to the plateau of Langres, and forming part of the watershed between the basin of the Mediterranean and that of the ocean. In the S. the soil is rich and fertile, elsewhere it is generally stony. The climate is, in general, mild, and rather dry than moist ; the air pure, clear, and salubrious. Grain of various kinds is generally and successfully cultivated, the produce exceeding the consumption. French beans (haricots), prunes, hemp, rape, and beetroot are raised in considerable quantities. There are extensive forests, chiefly of coppice wood. The vineyards of the E. slopes of the Côte-d'Or, called the Côte-de-Nuits and the Côte-de-Beaune, produce, in abundance, the celebrated
wines of Upper Burgundy, both red and white; among the former may be named Romanée-Conti, Chambertin, Vosne, and Nuits; and among the latter Puligny. Red and white sparkling wines are also made. Excellent horses, good sheep, and cattle, and bees in large numbers, are extensively reared. The iron ore extracted supplies 60 iron-works, containing 43 furnaces, 112 forges, and four steel-works. The produce of pig and bar iron is $12,000,000$ francs $(£ 480,000)$. There are two mines of anthracite, and quarries of lime, gypsum, marble, lithographic stones, millstones, \&c. Large quantities of tiles are made, and earthenware of good quality, paper, cloth, leather, beet sugar, beer, grain spirits, \&c. The trade of the department is much facilitated by the Saône and Burgundy Canal. The principal articles of commerce are wine, brandy, vinegar, wood, mustard, for which Dijon is particularly celebrated; oil, leather, wool, hemp, iron, steel, nails, grindstones, and timber. The department possesses one normal, 19 superior, and 889 elementary schools; with 18 establishments for secondary instruction, one royal, and seven communal colleges; it is divided into four arrondissements, subdivided into 36 cantons, and 728 communes. Pop. (1846), 396,524.

COTE-St.-Andre (La), a tn. France, dep. Isère, 27 m . N.W. Grenoble, agreeably situate at the foot of a hill, on the Frette. It was once fortified, and figured much in the religious wars, during which it suffered severely, and its fortifications were razed. It has manufactures of pyrolignous acid, wax-candles, and tapers, leather, glass, and liqueurs, which, under the name of Eaux-de-la-Côte, are much esteemed. Good white wine is grown in the neighbourhood. Pop. 3009.

COTEAU-des-Prairies, an elevated region or swell in the prairies of N. America, separating the basin of the Mississippi from that of the Missouri. It commences about the parallel of $46^{\circ} \mathrm{N}$. , and between the meridians of $98^{\circ}$ and $99^{\circ}$ W., and extends S.S.E. 200 m ., to the head of the Blue Earth river, where it gradually falls to the level of the surrounding country.

COTTES-du-Nord, a maritime dep., N. coast, France, forming part of ancient Brittany, cap. Brieuc; having N. the English Channel, E. dep. Ile-et-Vilaine, S. Morbihan, W. Finistere. It comprehends several small islands in the channel, the principal of which are Brehat and the Seven Islands. Area, $472,198 \mathrm{ac} . ; 1967 \mathrm{sq} . \mathrm{m}$. To the N . it is watered by a number of small streams, which fall into the English Channel; and to the S. by several which fall into the Vilaine and Aulne. From E. to W. it is traversed by a chain of hills, called the Montagnes Noires, the culminating point of which is Menez Haut, 1112 ft. above sea level. The coast extends about 150 m ., and is much indented. It presents a series of granite cliffs, at the foot of which is a strand of considerable breadth in some localities. There are several tolerable ports at the mouths of the small rivers. The only good land is found in the vicinity of the coast. The rest is inferior, a large portion being sand and stones, and a considerable breadth covered with heath. Agriculture is in a very backward state, but the produce of grain is sufficient for the consumption. Cider is produced in large quantities. Hemp, flax, hay, pease, beetroot, \&c., are extensively grown. One of the main branches of industry is the rearing of cattle and horses; the latter held in high estimation. Sheep are comparatively scarce, and of inferior quality. Bees are very numerous. Excepting iron, which is wrought to a small extent, the minerals of the department are unimportant. There are salt-works, employing 180 workmen ; and granite, of very fine quality is abundant, but not much used. On the coast, the herring, pilchard, and nackerel fishery is pursued with activity. The principal branch of manufacturing industry, and that for which the department is celebrated, is the spinning of flax and hemp, and the weaving of linen and sailcloth, sent principally to the S. Amcrican market. The department contains numerous tanneries, paper-works, manufactures of woollen yarn, common woollen goods, shoes for the troops, beet sugar, earthenware, \&c. The only navigable rivers are the Rance and Blavet; a few of the others, however, are accessible at high water. Two canals, that between Nantes and Brest, and that of the Ille and Rance, traverse the department. The language commonly spoken is the Bas-Breton. The people are rough, rude, passionate, and indolent, but very hospitable, and make excellent soldiers and seamen. The department is
divided into 5 arrondissements, subdivided into 48 cantons, and 376 communes. Pop. (1846), 628,526.

CoTESWOLD, or Cotteswold Hills, a range of hills, England, co. Gloucester, which they traverse N. to S. for upwards of 50 m . ; extreme elevation, near Cheltenham, 1134 ft . They are divided into the Upper and Lower Coteswolds; the waters, which descend from the W. declivity, after a short course, fall into the Severn.

COTHERIDGE, par. Eng. W orcester; 1900 ac. P. 228.
COTI, a territory, tn., and river, Borneo. See Kotr.
COTIGNAC, a tn. France, dep. Var, 9 m. N.N.E. Brignoles. It stands at the base of a steep tufa rock, whose precipices overhang, and seem to threaten the houses beneath, contains a public library of 4000 volumes; and has manufactures of silk and leather; a trade in wine, silk, and figs; and eight annual fairs. In the neighbourhood, on a height, stands the church of Nôtre-Dame de Grace, founded in 1519, and long famous throughout Provence for the pilgrimages which used to be made to it. Pop. 3397.

COTINDIBA, or Cotinguiba, a river, Brazil, which rises in the N. side of Mount Itabaiana, flows almost due E., first in an impetuous torrent over a rocky bed, and afterwards in a wide, but shallow channel. It falls into the Atlantic, near the ruins of the old town of S. Christavão, 18 m . N.N.E. Segripe d'El Rey, after a course of about 90 m . It is navigable for large barges by the help of the tide, but the water over its bar never exceeds from 6 to 8 ft . Its chief affluent is the Poxim.

COTLEIGH, par. Eng. Devon; 1040 ac. Pop. 269.
COTON, par. Eng. Cambridge; 1130 ac. Pop. 307.
COTOPAXI, a volcano, S. America, Ecuador, in the Andes of Quito, about 60 m . N.E. the mountain of Chimborazo, and 30 m . S.E. Quito; lat. $0^{\circ} 43^{\prime} \mathrm{S}$. ; lon. $78^{\circ} 40^{\prime} \mathrm{W}$. It is the loftiest volcano in America that has been active in modern times, being $18,875 \mathrm{ft}$. high, and, though almost under the equator, its top is covered with perpetual snow. In form it is a remarkably regular truncated cone. The scoriæ, lava, and rocky fragments, which are the produce of its eruptions -the most frequent and disastrous that occur on the plateau of Quito-cover an area of some 50 or $60 \mathrm{sq} . \mathrm{m}$., and, if heaped together, would form of themselves a large and lofty mountain. Its first recorded eruption occurred about the time of Pizarro's invasion of S. America, and is said to have facilitated not a little the subjugation of that country, by rousing the superstitious fears of the Peruvians, and paralysing all their efforts at self-protection. In 1698, an eruption destroyed the city of Tacunga. In 1738 , the flames rose 3000 ft . above the brink of the crater; and in 1743 , the fire burst forth from several new apertures near the summit, followed by profuse torrents of water, which flooded and desolated the whole plain below. For three entire days this torrent continued to flow, and then gradually subsided; but flames issued for many days subsequently, accompanied by frequent and loud reports. In the May also of the following year, 1744, the internal fire opened for itself new passages on the mountain-sides, and the explosions were heard at a distance of not less than 500 m . Again, in April, 1768, the smoke and ashes were so dense, and caused such darkness, that many of the inhabitants of the province of Quito, especially in the towns of Hambato and Tacunga, were compelled to go about with lanterns during almost the whole day. In 1803, another eruption occurred, after an apparently complete state of quiescence during 20 years. In the January of that year, the snows began suddenly to melt; and in a single night, the internal fires became so active, that at day-dawn the outer walls of the cone were seen to be quite bare, and of a dark brown hue, like vitrified scoriæ or lava. At the port of Guayaquil, which is 130 m . distant, in a straight line, Humboldt heard, day and night, the roaring and explosions of this volcano, like continued discharges of a battery of artillery; and distinguished these tremendous sounds even when sailing on the Pacific Ocean.

COTRONE [anc. Crotona], a seaport tn., Naples, prov. Calabria Ultra II., on the Ionian Sea, at the nouth of the Esaro, 36 m. E.N.E. from Catanzaro; lat. (mole) $39^{\circ} 7^{\prime} 30^{\prime \prime}$ N.; lon. $17^{\circ} 9^{\prime}$ E. (R.) It is fortified, and defended by a
strong citadel, surrounded by a ditch, and communicating with the town by a drawbridge. The streets are narrow and dismal, and the houses of the poorest description. The harbour is protected by a mole, and by the tongue of land on which the town is built; but it admita only small vessels, and is of little commercial importance. Cotrone is the seat of a bishopric suffragan to Reggio, and contains a cathedral, five other ehurches, two convents, a seminary, an hospital, a military hospital, and several houses of refuge. Corn, wine, oil, turpentine, and silk are produced in the neighbourhood, and form the articles of export. The ancient Crotona, one of the richest and most populous cities of Magna Græcia, is said to have been founded by a colony from Greece seven centuries before the Christian era. It was sacked by Agathocles b.c. 299 , and taken by the Romans b.c. 277. Its in habitants were renowned for their strength and dexterity in wrestling, and 80 great was their superiority, that the last wrestler of Crotona was proverbially said to be the first of the other Greeks. The famous Milo, and many other distinguished athleta, who appeared at the Olympic games, were Crotonians. Pythagoras resided here after leaving Samos, and founded an extensive achool, besides instructing the inhabitants in the precepts of philosophic morality. Pop. 4530.

COTRONEI, a tn. Naples, prov. Calabria Ultra II., 21 m. N.E. Catanzaro. Pop. 1378.

COTTA, a vil. Ceylon, 6 m . E. Colombo, formerly one of the capitals of the Kings of Ceylon. It consists of one long street, bordered on either side by plantations of cocoa-nut, areca, coffee, and jack trees, entwined with pepper and betel vines. There is here a Christian institution, under the church missionaries, in which a number of Singhalese and Mialabar youths receive instruction in the Hebrew, Greek, Latin, and English languages, mathematics, and theology. The building is neat and handsome. There are here also a chapel and a printing-office.-(Ceylon Gaz.)

CO'TTBUS, or Kottrus, a tn. Prussia, prov. Brandenburg, gov. Frankfort, cap. circle of same name, l. bank, Spree, 70 m. S.E. Berlin. It has three suburbs, is surrounded with walls, has four churches, a gymnasium, a library, an orphan asylum, two hospitals, and an old castle, with four towers. It is the seat of the Government for the circle, of a municipal court, and of a board of taxation. It has some manufactories of linen and woollen stuffs, tobacco, leather, and paper. Cottbus is one of the oldest towns in Lusatia. It was ceded to Prussia by the Congress of Vienna, having previously belonged to Saxony. Pop. 8727.-. The circle, area, 255 geo. sq. m., is flat, tolerably fertile, and has a pop. of 50,317 .

COTTENIIAM, a par. and vil. England, co. Cambridge; 7510 ac . The village, situate $6 \frac{1}{2} \mathrm{~m}$. N. Cambridge, has a handsome parish church, with a lofty tower; a Baptist meeting. house, an endowed free school, some almshouses, and several charities. In 1676 , it was nearly destroyed by an accidental fire.- The parish is famed for the excellence of its cheese. Pop. 1833.

COTTERED, par. Eng. Hertford; 1760 ac. Pop. 465.
COTTERSTOCK, par.Eng. Northampton; 690 ac . P. 204.
COTTESBACH, par. Eng. Leicester; 1230 ac. Pop. 82.
COTTESBROOK, par. Eng. Northampton; 38000 ac . Pop. 252.

COTTESFORD, par. Eng. Oxford; 1528 ac. Pop. 187.
COTTESMORE, par. Eng. Rutland; 2420 ac. Pop. 670.
COTTICA, a river, Dutch Guiana, rising near the N.E. extremity of the colony, flowing with a crooked course N.W. and W., and falling into the Commenwyne on the r. bank. Total course, about 40 m .

COTTINGHAM.-1, A par. England, Northampton; 3220 ac. Pop. 1033.-2, $\Lambda$ par. and tn. England, E. Riding, York; 8530 ac. The town, situate on a plain $4 \frac{1}{2} \mathrm{~m}$. N.W. Hull, consists of three principal streets running E. and W.; well huilt of brick; plentifnl supply of good water. It has an Established church, a Methodist, and an Independent chapel, with a school in connection with each of the three. A curious cave runs under the site of old Cottingham castle; but not a vestige of the building now remains. The York and North Midland Railway has a station at Cottingham. Pop. 2618.

COTTON, par. Eng. Suffolk; 1820 ac. Pop. 545.
COTUY, a tn. Hayti, on an affluent of, and near the $r$. bank of the Yuna, towards the E. end of the island, 45 m .
N.W. the town of San Domingo. It is regularly built, and has some trade in beef, tallow and hides. Pop. 1600.

COUBCABIA, a tn. Central Africa, Darfur, 40 m. W. by S . Cobbe; lat. $14^{\circ} \mathrm{N}$. ; lon. $26^{\circ} 30^{\circ} \mathrm{E}$. A market is held here, which bas long been celebrated for a coarse cotton cloth called Tokeas, and for lcather sacks.

COUCKELAERE, a vil. and com. Belgium, prov. W. Flanders, $11 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Bruges, on the Westebeke. It has two breweries, a distillery, and five mills; but the chief occupations are weaving and agriculture. Pop. 4152.

COUDIAC, or Peticodiac, a river, British N. America, New Brunswick, falling into Shepody Bay, at the head of the Bay of Fundy, after a course of about 60 m ., first E., and then S. It is navigable to Dorchester.

COUDOONIA, a river of W. Africa, Soodan, rising in a mountain range between the parallels of $9^{\circ}$ and $10^{\circ} \mathrm{N}$., and after a considerable course, chiefly S.W., falling into the Niger 5 m. N. W. Egga.

COUDRE, an isl. Lower Canada, in the St. Lawrence, 55 m. N.E. Quebec. It is about 6 m . long, and 3 at its greatest breadth. The soil is good, and in a high state of cultivation. Pop. about 300.

COUERON, a tn. France, dep. Loire-Infericure, 19 m . S.E. Savenay, r. bank, Loire, on which there is a port, and accommodation for carcening vessels. It has some bottle and glass works. Pop. 1162.

COUESNON [anc. Cœna Cotuum], a small river, France, which rises near Fleurigné, arrond. Fougéres, dep. Ille-etVilaine, flows first W., then almost due N., enters dep. Manche, and, shortly after passing Antrain, falls into the English Channel near Pontoison, after a course of about 37 m . It is navigable as far as Antrain in high spring tides.

COUGHAM. par. Eng. Norfolk; 3260 ac. Pop. 326.
COUGHTON, par. Eng. Warwick; 3070 ac. Pop. 955.
COULAN, or Quilon, a seaport tn. Hindoostan, prov. Travancore; lat. $8^{\circ} 53^{\prime} \mathrm{N}$.; lon. $76^{\circ} 39^{\prime} \mathrm{F}$. It has a considerable trade in cotton, pepper, ginger, and other spices; there is also abundance of excellent fish, tortoises, rice, bananas, pine-apples, and other fruits. The Bralimins have here a temple dedicated to Siva; and the R. Catholics three churches. It was taken by the British from the Dutch, and its fortifications dismantled.

COULFO, a tn. in N.W. Africa. See Koolfu.
COULL, par. Scot. Aberdeen; 6 m . by 3 m . Pop. 744.
COULMAN, an isl., Antarctic Ocean; lat. $73^{\circ} 36^{\prime} \mathrm{S}$. ; lon. $170^{\circ} 0^{\prime} 2^{\prime \prime}$ E. Discovered by Sir James Ross, on January 17, 1841; it was covered with snow.

COULOMMIERS, a tn. France, dep. Seine-et-Marre, 14 m. S.E. Meanx, r. bank, (irand Morin. It is ill-built, but situate in a picturesque and fertile country. It has a considerable trade in grain, flour, Brie cheese, melons, wool, leather, horses, and cattle; with numerous tannerics, tanmills, and an extensive paper-work. Pop. 3006.

COULSDON, par. Eng. Surrey; 3930 ac. Pop. 1041.
COULSTON (EAST), par. Eng. Wilts; 1080 ac. Pop. 105.
COUNCIL BLUFFS, a military station, U. States, Iowa, r. bank, Missouri, 36 m . above the confluence of the Platte. It rises 150 ft . above the level of the river, and, in a military point of view, is almost impregnable. In April 1847, the Mormons, who had been violently expelled from this place, consisting of 143 men, two women, and two children, took a hitherto nnexplored direction to the N.W., and formed the pioneers of the new Mormon settlement of Utah.

COUND, par. Eng. Salop; 5890 ac. Pop. 808.
COUNTISBURY, par. Eng. Devon; 3290 ac . Pop. 185.
COUPANG, a tn. isl. Timor. See Coopang.
COURBEVOIE, a vil. France, dep. Scine, 5 m . N.W. Paris, l. bank, Seine; having numerous well-built country houses, nearly all supplied with gardens. The barracks, built here by Louis XV. for the Swiss regiment, are the most extensive in the neighbourhood of Paris. It manufactures white lead, printed cottons, brandy, and potato flour; and has an establishment for washing wool; with a trade in wood, wine, brandy, and vinegar. There is a river port on the Seine, and an entrepôt for goods. Pop. 3570.

COURCELLEE, a vil. and com. Belgium, prov. Hainant, 5 m . N.W. Charleroi. Here are some manufactures of linen and nails, a brewers, a flour and a fulling mill. Pop. 4049.

COURNON, a tn. France, dep. Puy-de-Dôme, 6 m. E.S.E. Clermont, near 1. bank, Allier. It has an annual fair, which lasts three days. Pop. 2545.

COURPIERE, a tn. France, dep. Puy-de-Dôme, 22 m . E. Clermont, l. bank, Dore. It manufactures lace, woollen bands, crucibles, glass, pottery, and stoneware. Pop. 1471.

COURRIEREs, a tn. France, dep. Pas-de-Calais, 18 m . E.S.E. Bethune. Pop. 2538.

COURTEENHALL, par. Eng. Northampton; 1510 ac. Pop. 143.

COURTENAY, a tn. France, dep. Loiret, 55 m. E. Orleans, l. bank, Bied. Its old castle was formerly the residence of the Courtenay family, one of whose ancestors was a son of Louis le Gros. It has a trade in wood and charcoal. Pop. 1984.

COURTHESON, a tn. France, dep. Vaucluse, 10 m. N.N.E. Avignon, on a branch of the Ouzeve. It is agreeably situate in a fertile district, near some salt marshes, which were formerly a salt lake. It manufactures madder; and has some silk spinning-mills. Pop. 2553.

COURI」AND, [Slavonic, Kors; German, Kurland], a gov. Russia, bounded, N. by Livonia and the Gulf of Riga, W. the Baltic, S. Wilna, and E. Vitebsk; greatest length, N.W. to S.E., 230 m .; breadth, varying from 150 to 20 m ., and diminishing from W. to E., till it terminates almost in a point ; area, about $11,000 \mathrm{sq} . \mathrm{m}$. In the neighbourhood of Mittau, the capital, the surface is diversified by hills of very moderate height-Huneinberg and Silberberg, the highest, not exceeding 500 ft ., but elsewhere, and particularly towards the coast, it is flat, and contains extensive sandy tracts, often covered with heaths and morasses. About two fifths of the whole government are occupied by wood, and there are no fewer than 300 lakes, mostly of small extent; but Usmeiten, the largest, has a circuit of 24 m ., is in many places 12 fathoms deep, and abounds with fish. The principal rivers are the Aa and the Windau. The latter is above 150 yds . wide at its mouth, and is in course of being connected with the Niemen by a canal, commenced in 1825 . The extent of the surface occupied by swamps and lakes produces frequent mists, rendering the air both damp and cold; but the climate, notwithstanding, is said not to be unhealthy. Agriculture forms the chief occupation of the inhabitants, and is in a more advanced state than in some of the neighbouring governments, though the land is generally of light sandy texture, and requires to be frequently and heavily manured. The best soil is on the frontiers of Livonia, and yields large crops of barley and oats, but very little wheat. In the same neighbourhood a little liemp and flax are grown. The grain produced exceeds the consumption. Fruit trees thrive tolerably well, but the produce is indifferent. Tobacco, too, is grown, but only in patches. The timber of the forests consists of birch, alder, beech, pine, and oak, but is not considered fit for shipbuilding. The horses, cattle, and sheep, are generally of inferior breeds; but attempts have been made to improve the last by the introduction of the merino. The fishing, particularly along the coast, is of an average annual value of about $£ 3000$. The minerals are confined to a little iron, limestone, and amber. The manufactures are insignificant, with exception, perhaps, of tiles, which are made to a considerable extent. Distilleries, also, are numerous. About a half of the inhabitants are Letts. They chiefly occupy the rural districts, and, up to 1820, were divided into peasants and slaves. At present they are free, but do not possess any property. The prevailing religion is Lutheran-the Greek church, notwithstanding the proselytizing attempts of the Russians, barely counting 15,000 adherents. Pop. (1850), 564,000.

COURTLARI, or Courtelari, a market tn. Switzerland, bail. same name, can. of, and 24 m . N.W. Bern. It has an old castle, and a well-frequented market. Nicolas Beguelin, teacher of Frederick the Great, was born here 1714. Pop. 878.-The bailiwick has a pop. of 11,373 .

COURTMACSHERRY, a vil. Ireland, co. of, and 20 m . S.S.W. Cork, on a bay of the same name. It consists of one long street, stretching along the S. side of the bay. It has a small pier; and some fishing trade. It is resorted to for seabathing. Pop. 740.

COURTRAY, or Courtrai [Flemish, Kortryk; Latin, Cortoriacum], a fortified tn. and com. Belgium, prov. W. Flanders, 26 m. S. Bruges, on the Lys. It is well built,
having handsome and spacious streets, and a fine Grande Place, with several other squares. The principal edifices are, the townhall, of Gothic architecture, with nothing remarkable in its exterior, but adorned within by two remarkable sculptured chimney-pieces; the ancient market Halles, with a façade surmounted by five elegant turrets, one of them topped by a flying Mercury of gilded bronze; the church of St. Martin, founded by St. Eloi, about 650, with a majestic portico, from which ascends a graceful tower (one of the loftiest in Belgium), and adorned within by a fine Crucifixion by Vandyke; the church of St. Michael, a large and regular edifice, and containing an image of the Virgin, the object of great veneration and numerous pilgrimages; and Broelen-Torren, two colossal towers, built for defence of the town, in 1413 and 1465 , and with walls above 8 ft . thick. Courtray lias a court of first resort, a court of commerce, a merchants' exchange, and entrepôt for goods. It contains a college, an ecclesiastical seminary, an academy of painting, a mont-depiète, a public library of 12,000 vols., \&c. It is the scat of an extensive manufacture of table linen, in high repute; cottons and muslins; has spinneries of flax and cotton wool; large bleacheries for linens, distinguished as toiles de Courtray, but which are, for the most part, woven at Roulers, and the neighbouring communes. It contains dyeworks and bleacheries, the former famed for the brilliancy of the colours produced. Courtray lace is celebrated, as well as its threadblonde; its cotton cambrics, guingans, and flannels, are largely exported. In August a fair is held in the town for ten days. The first Flemish cloth manufacture was established here, in 1260. The Lys gives Courtray water communication with the principal towns of Flanders and the department Nord of France, while railways connect it with Ghent, Tournay, and the French frontier, towards Lille. Courtray is of early origin; in Roman times it was called Cortoriacum. The Normans took and fortified it in 880 ; the locality was made a countship in 988. The (first) 'battle of the Spurs' was fought close to the town, July 11, 1302, between the Flemings and French, in which the latter were defeated with immense loss, including the 8000 gilt spurs of the killed or vanquished French knights that gave name to the fight. In 1382, the French took and sacked the town, professedly to revenge this signal defeat. In 1385, Count Philip the Hardy erected new fortifications, and strengthened the old, as did the French, in 1647; the latter took the town again in 1793. Courtray, under their republic and empire became chief town of an arrondissement of the department of the Lys. In 1814 it reverted to the Netherlands. Pop. 19,429.

COURUTEE ISLAND, one of the Laccadives, lat. $10^{\circ}$ $31^{\prime}$ N.; lon. $72^{\circ} 43^{\prime}$ E.; $2 \frac{1}{2} \mathrm{~m}$. long and 1 m . broad. It affords good water, and two species of excellent cocoa nuts. A steep coral reef encompasses the S . and W. sides of the island, projecting 2 m . in some parts. The E. side is also steep and rocky. The proper entrance is at the N.E. end of the island, but the boats of the natives pass through other parts of the reef.

COUSCEA, a tn. Africa. See Conseca.
COUSERANS-Le, an anc. dist. France, situate among the Pyrenees, near the frontiers of Spain. It was a dependency of the former province of Gascony, and now forms part of dep. Ariege. It had been a bishopric from 506 to the revolution of 1793 . Its capital was St. Lizier.

COUTANCES [anc. Constancia], a tn. France. dep. Manche, 16 m . W.S.W. St. Lo, at the confluence of the Soulle and Bulsard. It is built on a hill, 4 m . from the sea, with which it communicates by a canal. The streets, formerly crooked and ill laid out, have been improved. On the summit of the hill is the cathedral, one of the finest churches in Normandy, in the early pointed style, with two lofty towers terminating in spires, and serving as a landmark for ships navigating the channel. The church of St. Pièrre is also a fine edifice, of the 15 th century. The valley bounding the town, to the W., is crossed by an ancient aqueduct, consisting of five perfect arches and 15 piers. Coutances is the seat of the assize court for the department, tribunal of first resort, and of commerce; and of a bishopric. It has two seminaries, an academy, and communal college; a prison, theatre, and small public library; marble-works, glass-works, and manufactories of parchment, thread, druggets, muslins, \&c. A considerable trade is carried on in grain and farm produce,
horses, cattle, thread, wool, quills, hemp, \&c. Coutances is an ancient town, and had a bishop in 430 . It was afterwards fortified, and became the capital of the district of Cotentin. The fortifications have almost entirely disappeared. P. 7442.

COUTHUIN-REPPE, a vil. and com. Belgium, prov. Liege, l. bank Meuse, 4 m . W. Huy. Both coal and iron are worked; and there are also limekilns, a brewery, and an establishment for preparing the manure well known by the name of Dutch ashes. Pop. 2499.

COUTRAS, a tn. France, dep. Gironde, 27 m . N. E. Bordeaux, l. bank, Dronne, in a district that produees red wine of fair quality. It has several mills, and a trade in flour, with which it supplies Bordeaux. In 1587, Henry IV., then King of Navarre, defeated the Leaguers before its walls. Pop. 1355.

COUVES, two small isls. Brazil, off the coast of prov. São-Paulo, about 12 m . E. the bay of Ubatuba, lat. $23^{\circ} 25^{\prime}$ $\mathrm{S} . ;$ lon. $44^{\circ} 55^{\prime} \mathrm{W}$. The larger is well supplied with wood and water, and has a commodious bay opposite to the mainland.

COUVET, a large vil. Switzerland, can. of, and $14 \frac{1}{2} \mathrm{~m}$. S.W. Neufchâtel, beautifully situate in the Val de Travers, 1. bank, Reuse. It has many well-built houses, and is the ehief seat of the lace manufacture of the canton.

COUVIN, a eom. and tn. Belgium, prov. of, and 33 m . S.S.W. Namur. It has a ehurch with a fine tower, of early, though unknown date. 'The district possesses extensive iron mines, and is an important seat of iron manufactures, having several blast furnaces, mallcable iron works, steel works, founderies, and steam-engine faetories. Pop. 2338.

COVE, or Cove of Cork, a tı. Ireland. See Queen'stown, its new name.

COVE, two pars. England, Suffolk :-1, (North), 1910 ac. Pop. 219.-2, (South), 1520 ac. Pop. 194.

COVENEY, a par. Eng. Cambridge; 8420 ac. P. 1523.
COVENHAM, two pars. England, Lineoln :-1, (St. Bartholomew), 1340 ac. Pop. 277.-2, (St. Mary), 950 ac. Pop. 169.

COVELONG, a tn. and fort, Hindoostan, Carnatic, on the Coromandel coast, presid. of, and 22 m. S. Madras, lat. $12^{\circ}$ $46^{\prime}$ N.; lon. $80^{\circ} 18^{\prime}$ E. The Imperial East India Company of Ostend had here their ehief faetory. In 1750 it was taken by the Freneh, but in 1752 surrendered to the British, by whom the fortifications were destroyed.

COVENTRY, a city, England, co. Warwiek, 85 m . N.W. London, $9 \frac{1}{2} \mathrm{~m}$. N.N.E. Warwiek, and a station on the London and N.W. Railway. It is situate partly on a gentle eminence rising in a valley, and partly on a hill, falling away tradually on each side-the whole stretehing E. to W. for nearly 2 m. , and bounded on the N.E. by the river Sherbourne and the brook at Radford. The more modern parts of the town are regularly and well built; but a few irregular and narrow streets still remain, lined with houses in the style of the 15 th and 16 th centuries, eomposed of heavy wooden beams, filled in between with brick and plaster, and often having their peaked upper stories projecting far into the strect over the under ones, so as, in many instances, nearly to meet, thereby greatly obseuring the light of the street. Still, lowever unsuited to modern notions, these houses are often highly pieturesque. Several new streets have been formed of late years, a number of new and handsome houses built, and a reat and general improvement effected in the appearanee of the town. The whole is well paved, and lighted with gas; and the inhabitants are abundantly supplied with water, from the corporation water-works. Amongst the more remarkable buildings are St. Miehael's chureh, a masterpice of the lighter Gothic style, and having numerous windows of ancient coloured glass, and a beautiful spire, 363 ft . high; Trinity chureh, with a spire 237 ft . high; St. John's chureh, a plain erueiform structure, of the time of Edward III.; Christ church, a handsome modern building, attaehed to the elegant spire of the Greyfriars' monastery. St. Mary's hall, erected in the time of Menry VI., and esteemed one of the finest specimens of the ornamental arehiteeture of the 15th eentury in England. The interior decorations are of a corresponding magnifieence, rendering the whole an object of the greatest interest. The hall, the roof of whieh is of finely earved oak, is now used for civie purposes, and occasionally for public entertainments. To these buildings may be added
the theatre, a neat and commodious house; the townhall, the drapers' hall, the jail, barracks, and several other handsome public struetures. During the monastic ages, Coventry had a large and magnificent cathedral, which was destroyed at the Reformation. Besides the six churches belonging to the Establishment, it has a handsome Gothic R. Catholie ehapel, and places of worship belonging to Independents, Baptists, Methodists, Unitarians, and the Soeiety of Friends. The charitable institutions are numerous and well endowed, the principal of which are Sir Thomas White's eharity, founded in the reign of Henry VIII., with an annual income of between $£ 2000$ and $£ 3000$; the Bablake men's hospital, income about $£ 1500$; and the Bablake boy's hospital, with an income of about $£ 940$. Besides these, there are various other considerable charitics, and several minor ones. The scholastic foundations are, the free grammar sehool, a richly endowed institution, with exhibitions and fellowships attached; several other eharity schools, a school of design, and a number of well conducted private aeademies. There are also a library, a mechanics' institute, a soeiety for the diffusion of religious and useful knowledge, several dispensaries, an hospital, and a beautifully laid out cemetery, planned by Mr. Paxton.

Coventry was celebrated for its manufactures of eloth eaps and bounets as early as the 16 th century, and also for a kind of blue thread, called 'Coventry true blue.' These were sueceeded by the manufacture of woollen broadcloths of various descriptions, which continued long the staple trade of the town, till superseded, in turn, by weaving, now, together with wateh-making, the staple business of the place. Gauze and ribbons of all descriptions are made, and fringe-making and silk dyeing carried on. Coventry is the greatest emporium for ribbons in England; and watch-making, introduced at a very remote period, has so much inereased, especially within the last 40 or 50 years, that a greater number of watches is now made here than in London, and of equal quality. Coventry was formerly surrounded with lofty walls, in which were 12 gates. Its pageants and processions were of the most magnificent deseription, and Mysteries were here enacted in a style nowhere else equalled. The old predilcetion of the people of Coventry for gorgeous pageantry, is still manifested by the triennial processional show in honour of the Countess Godiva, who unwittingly tempted 'Peeping Tom of Coventry' into the indiscretion whieh obtained for him the soubriquet by which he has been immortalized. This procession, till within the last few years, was eommonly graced by the presence of the mayor and corporation, in their official robes; but since the passing of the Municipal Reform Act, the presence of the eivie body has been discontinued. The origin and meaning of the well-known figurative threat of 'sending to Coventry' has been variously given, but is still uneertain. Coventry sends two members to the House of Commons, and has done so since 1453. Registered electors (1850) 4139. The munieipal govermment is vested in a mayor, 10 aldermen, and 30 councillors. Market days, Wednesdays and Fridays. Various fairs; the principal one held on the first Friday atter Trinity Sunday (lasting eight days), and the others in March, May, August, and November. Pop. (1841) 30,743; (1851) 36,801. -(Local Correspondent.)

COVENTRY, several post townships, U. States:-1, Vermont ; 54 m . N. by E. Montpelier. Pop. 786.-2, New Hampshire; 70 m. N.N.W. Concord. Pop. 413.-3, Conneeticut; 17 m. E. Hartford. Pop. 2018.-4, Pennsylvania; intersected by the Tioga, in which is a vil. of same name. Pop. 2620.-5, Hhode Island; 13 m . S.W. Providence. Pop. 3433.-6, New York; 114 m . S.W. Albany, with vil. of same name. Pop. 1681.

COVERHAM, par. Eng., York (N. Riding); 22,120 ac. Pop. 1254.

COVILHÃ, a tn. Portugal, prov. Beira Baixa, 20 m . S.W. Guarda, in a finely-wooded distriet, at the foot of the Serra de Estrella. It is built on an acelivity, in the form of an amphitheatre; is defended by a fort, contains several churches, two convents, an hospital, and almshouse; and has considerable manufactures of eloth; and thermal springs. Pop. 6951.

COVINGTON, par. Eng. Iluntingdon: 1290 ac. P. 142 .
COVINGTON, a vil. U. States, Kentueky, on the Ohio, at the mouth of Lieking Creek, by which it is separated from Newport, directly opposite to Cineinnati, of which, from the
arrangement of the streets, it appears a continuation. It has six churches, four academies or high schools, and several manufacturing establishments, particularly of tobacco. Pop. 2026.

COVINGTON and Thankerton, par. Scotland, Lanark; 4 m. by $2 \frac{3}{4} . \quad$ Pop. (1851) 548.

COWALL, a peninsular dist. Scotland, co. Argyle, about 30 m . in length, and varying from 10 to 15 m . in breadth, bounded, W. and N.W., by Loch Fyne; E. by Loch Long and the Frith of Clyde; and S. by the Bay and Kyles of Bute. It is hilly, and its coast is indented, partly rugged, and has numerous creeks, arms of the sea, and small harbours. It contains several parishes. Pop. (1841) 9397.

COWARNE, two pars. England, Hereford :-1, (-Much), 2970 ac. Pop. 557.-2, (-Little), 830 ac. Pop. 187.

COWBRIDGE, a parl. bor. market tn. and par. S. Wales, co. Glamorgan. The town, $11 \frac{1}{2} \mathrm{~m}$. W. by S. Cardiff, consists chiefly of one spacious street, containing many well-built and several handsome houses. It has a church, places of worship for Baptists, Wesleyans, and Calvinistic Methodists; a free grammar, and several other schools, with numerous charities; five cattle fairs and two great markets annually Cowbridge is contributory, with Cardiff and Llantrissent, in returning a member to the House of Commons. Several Roman coins have been discovered in the vicinity. P. 1080.

COWB1'T, par. Eng. Lincoln; 4590 ac. Pop. 664.
COWDEN, par. Eng. Kent; 3170 ac. Pop. 695.
COWES, West, a seaport tn. and watering-place, England, co. Southampton, Isle of Wight, N. side, l. bank, Medina, at its mouth, lat. $50^{\circ} 46^{\prime}$ N.; lon. $1^{\circ} 17^{\prime} 45^{\prime \prime}$ W. (r.) The town itself has no great claims on admiration, its streets being narrow and steep, and many of its houses old and inelegant; but, from its fine position on an acclivity, with its buildings rising above each other, from the margin of the river to the summit, it presents an exceedingly agreeable and picturesque appearance, particularly from the roadstead, although a nearer approach by no means lessens its attractions, bringing into view the noble castles of E. and W. Cowes, the Marine Parade, and splendid mansions of E. Cowes Park, with its magnificent trees. It has numerous shops, many of them very handsome, and five places of worship-namely, Cowes chapel, occupying an elevated situation, and surmounted by a majestic tower; Trinity chapel, having also a neat and well-proportioned tower; the Independent chapel, a neat structure; and the Wesleyan and R. Catholic chapels. The only other public structures are, the markethouse, a plain but commodious building; the townhall, containing also a large hall belonging to the Mechanics' Institution; the customhouse, an elegant stone building; the Royal Yacht Clubhouse, a tasteful edifice, situate on the Parade; several handsome hotels; and the castle, which stands at the N. extremity of the Marine Parade-the latter one of the fashionable resorts of the place. A considerable trade is prosecuted here in provisions, and other articles for the supply of the shipping. The principal exports are wheat, flour, malt, barley, wool, and salt, large quantities of which are shipped for France, Spain, Portugal, and the Mediterranean. Shipbuilding is carried on to a pretty large extent; and here some vessels of war, remarkable for their sailing qualities, have been built, and some, also, of the finest boats belonging to the Royal Yacht Squadron. The harbour is finely sheltered, perfectly safe, and the roadstead affords excellent and secure anchorage. On these accounts, they are generally crowded with vessels of all sizes and different nations, both outward and homeward bound. W. Cowes is also the rendezvous of the Royal Yacht Squadron, established June 1, 1815, now (1851) consisting of 163 members, possessing yachts of different sizes, from 30 tons to 451 tons; total tonn. 10,000, employing upwards of 1400 seamen, besides shipwrights, joiners, sailmakers, \&c. The season for the yachts at Cowes is from the middle of May to the 1 st November. A regatta is held here annually, and usually lasts three days. Cowes is much resorted to as a bathing place, being considered one of the finest watering-places in England, with reference to the facility of sea-bathing, the beauty of its situation, and the attractive nature of the scenery by which it is surrounded on all sides. The bathing-machines are stationed on a fine beach in the vicinity; and the accommodation for visitors is ample and of the best description, and public places of resort and
recreation numerous, including assembly-rooms, readingrooms, \&c. Steamers ply between W. Cowes and Southampton, Portsmouth, Yarmouth, \&c. Pop. 5000.
E. Cowes is situated on the r. bank of the Medina, directly opposite W. Cowes, with which it communicates by a ferry. It contains a church, the foundation-stone of which was laid in September, 1831, by her present Majesty, then Princess Victoria; an Independent chapel, and a public botanic garden. At a short distance E. from the town is Osborne House, one of the summer residences of her Majesty, Queen Victoria. It is situated on a spacious lawn, sloping to the sea, and commands a series of the most beautiful and extensive views. -(Brettel's Hundbook to the Isle of Wight.)

COWER, a trading place of N.W. Africa, on the Gambia, about 80 m . from its embouchure, lat. $13^{\circ} 37^{\prime} \mathrm{N}$. ; lon. $14^{\circ}$ $30^{\prime}$ W. Its trade consists principally in the exchange of corn, millet, hides, ivory, wax, \&c., for rum, tobacco, gunpowder, iron-bars, \&c.

COWFOLD, a par. and vil. England, co. Sussex ; 4640 ac. The village, pleasantly situate 5 m. S. by E. Horsham, has a handsome church. A corn market is held every alternate Wednesday. Pop. 943.

COW-Honeybourne, par. England, Gloucester; 1080 ac. Pop. 327.

COWLAM, par. Eng. East York; 1930 ac. Pop. 44.
COWLEY, three pars. England:-1, Gloucester, 1600 ac. Pop. 317.-2, Middlesex ; 300 ac. Pop. 392.-3, Oxford; 940 ac. Pop. 606.

COWLING, par. Eng. Suffolk; 2820 ac. Pop. 882.
COWLITZ, a rapid but navigable river, W. side of Vancouver's Island. On its banks is a settlement of Canadians, and at its mouth the Hudson Bay Company has a store for wheat and other produce.

COWSBY, par. Eng. York (N. Riding); 1220 ac. P. 108. COWTHORP, par. Eng. York (W. Riding) ; 1280 ac. Pop. 115.

COWTON-EAST, par. Eng. York (N. Riding); 3150 ac. Pop. 454.

COX.-1, (-Bazar), tn. and anchorage, Chittagong, India, beyond the Brahmapootra, E. coast, Bay of Bengal, lat. $21^{\circ}$ $25^{\prime} \mathrm{N} . ;$ lon. $91^{\circ} 55^{\prime} \mathrm{E}$. The channel leading to the anchorage has from $1 \frac{1}{2}$ to $3 \frac{1}{2}$ fathoms on the bar, and from 5 to 8 fathoms inside. Excellent spring water is abundant here.2, (-Island), at the mouth of the Hoogly, contiguous to the N. end of Sagor island. It is about 3 m . in length, 2 m . in breadth, and bounds the N.E. side of Sagor road.-3, (-River), river, Ncw S. Wales, which rises in co. Cook, 75 m . N.W. Sydney, flows S. and then E., forming the boundary between cos. Cook and Westmorland, and falls into the Wollondilly; total course about 60 m .

COXIM, a river, Brazil, rising among the mountains, dist. Camapuan, in the S. of prov. Matto-Grosso, flows N.E., till it receives the Camapuan, when it turns N.W., and has a very circuitous course till it joins l. bank, Taquari, in lat. $18^{\circ} 24^{\prime}$ S. Its principal affluents, besides the Camapuan, are, on the right, the Barreiro, Inferno, Sellado, and Jauru; and, on the left, the Paredão, Furado, Orelha-de-Anta, Bicudo, and Ta-quari-Mirim. In the upper part of its course it is very impetuous, and is broken by numerous rapids; but about 120 m . of the lower part are available for canoes, which descend from the confluence of the Camapuan to the Taquari, in 7 or 8 , and ascend the same distance in 25 days.

COXWELL, Great, par. Eng. Berks; 1440 ac. P. 351.
COXWOLD, a par. and vil. England, co. York (N. Riding); $14,590 \mathrm{ac}$. The village, pleasantly situate 17 m . N. by W. York, has an ancient church, supposed to have been erected A. D. 700 ; a free grammar school, an hospital for 10 poor men, and other charities, A large cattle and sheep fair is held here, August 25, and races take place on the Monday after Michaelmas. At Shandy Hall, in the village, Sterne resided for about seven years, during which he wrote Tristram Shandy, and other works. Pop. 1076.

COY INLET, a small bay, on the E. coast of S. America, Patagonia; lat. $50^{\circ} 54^{\prime}$ S.; lon. $69^{\circ} 8^{\prime}$ W. (R.)

COYCHURCH, par. Wales, Glamorgan. Pop. 1254.
COYLE, a river, Hindoostan, which rises in Bahar, flows S.E., crosses Orissa, and falls into the Bay of Bengal, about 10 m . N. Point Palmyras; lat. $20^{\circ} 47^{\prime} \mathrm{N}$.; lon. $85^{\circ} 20^{\prime}$ E. Total course, about 300 m .

COYLTON. par. Scot. Ayr; 11,515 ac. Pop. 1484. COYTY, par. Wales, Glamorgan. Pop. 1930.
COZUMEL, an isl. Caribbean Sea, off the coast of Yue atan, lat. $20^{\circ} 34^{\prime} \mathrm{N}$. ; lon. $86^{\circ} 44^{\prime} \mathrm{W}$. It is 30 m . long, by about 8 m . broad, and is low, flat, and covered with trecs. It is fertile, and abounds in fruit and cattle. Numerous interesting remains of aneient buildings have been discovered on it. When visited, in 1518, by Juan de Grijalva, it contained a numerous population, and was much resorted to, as a place of peculiar sanctity, by the Indians of the neighbouring continent.

CRAB ISLAND. $-1, A_{n}$ isl. 10 m . off W . coast, Malagascar, lat. $21^{\circ} 4^{\prime}$ S. -2 , An isl. British Guiana, lat. $6^{\circ} 21^{\prime}$ N.; lon. $57^{\circ} 33^{\prime}$ W.-3, An isl. W. Indies. See Bieque.

CRACOW, or Krakow [German and Polish, Krakau], formerly a part of the old kingdon of Poland, and more recently an independent republic, lying between lat. $49^{\circ} 52^{\prime}$ and $50^{\circ} 17^{\prime} \mathrm{N}$. and lon. $19^{\circ} 7^{\prime}$ and $20^{\circ} 17^{\prime} \mathrm{E}$.; about 48 m . in length, and 14 m . wide, throughout the broadest portion; area, $500 \mathrm{sq} . \mathrm{m}$. It is now extinct, having been incorporated with the Austrian dominions in 1846. The surface consists of an undulating plain. The elimate is moderate, and the soil rich, producing eorn, pulse, flax, some fruits, and honey. Cattle, sheep, and swine abound, as do also fish and game. The minerals are coal, iron, marble, freestone, elay, \&c. By the Partition treaty of 1795 , Cracow fell to the share of Austria; and in 1809, formed, with Western Galicia, the Grand Duchy of Warsaw. At the Congress of Vienna, in 1815, it was formed into an independent republic by the allies, but was subsequently, as above stated, again incorporated with Austria, and is now included in the government or grand duchy of Cracow, the most W. division of Galicia.

CRACOW, a city, formerly cap. of above republic, and anciently of Poland, now comprised in the Austrian empire, in a beautiful valley, l. bank of the Vistula, 150 m . S.S.W. Warsaw, lat. $50^{\circ} 3^{\prime} 59^{\prime \prime}$ N.; lon. $19^{\circ} 51^{\prime} 50^{\prime \prime} \mathrm{E}$. It has three suburbs, and is surrounded by promenades. It is irregularly built, but elean, and has a spacious square. The houses are in general large, but most of them are in a state of decay, as are also a great number of its churches. It contains many ancient and interesting edifices, the principal of which is the cathedral, where were formerly deposited the Crown jewels

the cathedral, cracow.
and regalia, and where lie the remains of many of the ancient kings of Poland. It was also the place prescribed by the constitution for their coronation. It has 50 altars, and above 20 ehapels. The castle, called the Königsburg, founded abont A.D. 700 , is a spaeious structure. The other remarkable edifices are the episcopal palace and the old townhall. The city contains a university, a college, a school of arts, an academy of painting, a public library, \&c.-the latter having 30,000 printed volumes, and 4500 MSS. This city was
founded in the 13 th century, and is said to founded in the 13th century, and is said to have been at one time very flourishing, having had an extensive commerce and
a large population. The wealthier classes in Cracow are a large population. The wealthier classes in Cracow are
Germans, those in the suburbs mostly Germans, those in the suburbs mostly Jews. Pop. 43,000.

CRACATOA, a small and mountainous isl. Indian Arehipelago, Straits of Sunda, between Sumatra and Java. It has one elevated peak; and on the N . side a convenient watering place, near whieh is a Malay village, where fruits and vegetables may be had.

CRADLEY:-1, A par. England, Hereford; 6460 ac. Pop. 1504. -2 , A vil. and chapelry, England, Worcester. The village, situate 8 m . W. by S. Birminghan, consists of one street, well kept. It has an Established chureh, 4 dissenting chapels, and two national schools. There aro old-established iron works at Cradley, and the manufacture of nails and chains is carried on extensively. Pop. 2686.

CRADOCK, a dist. and $t \mathrm{n}$. in the E. part of Cape Colony. The district lies N. of that of Somerset, area about $5000 \mathrm{sq} \cdot \mathrm{m}$. ; but as no regular survey has yet been made of it, it is impossible to state its precise extent. Its principal streans are the Great Fish, the Brak, and the Tarka rivers. In some parts this district is encumbered with bush, while in others there is scarcely a bush to be seen, and it is altogether destitute of timber. The soil, however, is in general very fertile, suitable alike for grain and for the production of all the various fruits peculiar to other parts of the colony. Many of the inhabitants are in opulent circumstances, possessing large herds of cattle and flocks of sheep. They have also a breed of hardy valuable horses. The farm-buildings are generally extensive and commodious; the roads, for the most part, tolerably good, and in some parts excellent.-The tows, cap. of the district, occupies a narrow valley, 1. bank, Great Fish river, about 430 m . N.N.E. Cape Town, lat. $32^{\circ} 20^{\prime} \mathrm{S}$. ; lon. $25^{\circ} 35^{\prime} \mathrm{E}$. The main street, towards the river, is planted with various fruit trees. It has a church, several chapels belonging to Independents and Wesleyans, several good schools, and a number of substantial stores, well stocked with British manufactures. In the immediate vicinity of the town are cold and tepid chalybeate springs. Pop. dist. estimated at 7557 .

CRADOO, a tn. of S.W. Africa. coast of Guinea, Bight of Benin, kingdom Jaboo, at the junction of the Palmar river, with the lake or lagoon of Cradoo, lat. $6^{\circ} 38^{\prime}$ N.; lon. $3^{\circ} 56^{\prime}$ E. It is a well-known mart for the Jaboo eloths, which are to be had here in great abundance and of fine quality. The lake of Cradoo, on the N. bank of which the town is situate, is of a erescent form, about 50 m . in length, and 6 m . breadth in the centre. It communicates with the sea by a narrow channel, at its $W$. end, called Lagos River. By this outlet the lake or lagoon pours out, about half-ebb, such a volume of surtace seum, of a deep brown tint and of a sickening odour, as to spread over a sweep of 3 m ., the edge of which is marked by a well-defined margin, as it rolls forward on the deep blue water of the offing.-(Sailing Directions.)

CRAIG. mar. Scotland, Forfar; 6 m . by 2 m . Pop. 1945.

CRAIGIE, par. Scot. Ayr; 7 m . by $1 \frac{1}{2} \mathrm{~m}$. Pop. 779.

CRAIGNISH, par. Scot. Argyle. Pop. (1851), 756.

CRAIKE, par. Eng. Durham; 3300 ac. Pop. 579.

CRAIL, an ancient royal bor. and par. Scotland, co. Fife. The town, $8 \frac{1}{2} \mathrm{~m}$. S.E. St. Andrews, consists principally of two parallel streets extending along the shore. Many of the houses are large and of a dignified appearance, indicating the former importance of the place-Crail having been a town of some note as early as the 9th century. The
streets are spacious, well lighted, and kept streets are spacious, well lighted, and kept elean. On an elevation within the town are some vestiges of what was anciently a royal residence, which had been inhabited by several Scottish monarelis successively, one of whom was David I. It has Established, Free, and U. Presbyterian churehes. Crail was once a great herring fishing station; but the herring having alnost deserted the coast, this branch of business is not now so flourishing as it formerly was. It used also to send large quautities of lobsters to the London market, but the number now sent is comparatively limited. The harbonr is small, unsafe, and difficult of access.—The PAR1su, 7 m . by 3 m .
in extent, contains the promontory of Fife Ness, commonly called the 'East Neuk o' Fife.' Pop. bor. (1851), 1242; par. including bor. 1898.

CRAILING, par. Scot. Roxburgh; 4 sq. m. Pop. 667.
CRAILSHEIM, a tn. Würtemberg, circle Jaxt, cap. dist. of same name, r. bank, Jaxt, 13 m . N. Ellwangen. It contains an old Gothic palace, now used as a courthouse; a deanery, and another church; a large townhouse, a well-endowed hospital; and has manufactures of cotton, leather, delftware, and tobacco; a printficld, a powder, and several other mills; an annual general and cattle markct. In the neighbourhood is a mineral spring, with a bathing establishment. P. 3037. Area of dist. 138 geo. sq. m. P. 23,557.

CRAMBE, par. Eng. York (N. Riding); 3710 ac. P. 610.
CRAMOND, par. Scot. Edinburgh; 6 m . by 2 m . Pop. (1851) 2236.

CRANBORNE, par. and market tn. England, co. Dorset; 13,730 ac. The town, pleasantly situate in an open country, 27 m. N.E. Dorchester, is irregularly built, but has a fine old church, with a Gothic tower. It has several small charities. The weaving of ribbons was formerly carried on here, but is now nearly extinct. The town is surrounded by a chase, famous in ancient times for the sport it afforded, and still tenanted by large herds of deer. This parish is alleged to have been the scene of the battle between the British, under Boadicea, and the Romans; and the discovery of numerous bones and urns, and the remains of a circular fortification of great extent, would seem to favour the supposition. Pop. 2551.

CRANBROOK, a par. and market tn. England, co. Kent; $10,460 \mathrm{ac}$. The town, 40 m. S.E. London, on a brook ealled the Crane, is neatly built, and partially paved, and lighted with gas. It has a beautiful chureh, near the centre of the town, various disenting chapels, and a grammar school, endowed by Queen Elizabeth. The first woollen mauufactory attempted in England was established here by the Flemings, in the reign of Edward 11I. This trade, however, has long since disappeared, and traffic in hops has become the chicf business. Pop. 3996.-(Local Correspondent.)

CRANFIELD:-1, par. Irel. Antrim; 3526 ac. P. 367. -2 , par. Eng. Bedford: 3500 ac. Pop. 1371.

CRANFORD, three pars. Eng.:-1, Middlesex ; 790 ac. Pop. 370.-2, (St. Andrew), Northampton; 2420 ac. Pop. 257.-3, (St. John), Northampton; 2420 ac. Pop. 341.

CRANGANORE [Corangalur], a tn. Hindoostan, presid. Madras, Malabar coast, on the N. margin of a small bay, $16 \mathrm{~m} . \mathrm{N}$. Cochin, lat. $10^{\circ} 12^{\prime} \mathrm{N}$. ; lon. $76^{\circ} 15^{\prime} \mathrm{E}$. It is the residence of a 1 . Catholic bishop, in whose diocese most of the inland churches, formerly belonging to the Nestorian community, are included.

CRANHAM, two pars. Eng.:-1, Gloucester; 1970 ac. Pop. 428.-2, Essex ; 1880 ac. Pop. 280.

CRANLEY, par. Eng. Surrey; 7420 ac Pop. 1357.
CRANMORE, two pars. Eng. Somerset:-1, (East) ; 980 ac. Pop. 66.-2, (West); 2160 ac. Pop. 319.

CRANOE, par. Eng. Leicester; 990 ac. Pop. 137.
CRANSFORD, par. Eng. Suffolk; 2180 ac. Pop. 303.
CRANSHAWS, par. Scot. Berwick; 7 m . by 4 m. P. 120.
CRANSLEY, par. Eng. Northampton; 2510 ac. P. 319.
CRANSTON, par. Scotland, Edinburgh; 4778 ac. Pop. (1851), 1235.

CRANTOCK, par. Eng. Cornwall; 2480 ac. Pop. 450.
CRANWELL, par. Eng. Lincoln; 2480 ac. Pop. 230.
CRANWICK, par. Eng. Norfolk; 1550 ac. Pop. 108.
CRANWORTH, par. Eng. Norfolk; 1100 ac. Pop. 340.
CRAON, a tn. France, dep Mayenne, 19 m . S. by W. Laval, l. bank, Oudon. It was formerly a place of some importance, and was several times besieged during the wars of religion. It has a fine modern château. Coarse woollen goods are manufactured here, and there is a considerable trade in grain, flax, yarn, linen, \&c. Pop. 3153.

CRAPONNE, a tn. France, dep. Haute-Loire, 20 m . N. Le Puy. It was once surrounded by walls, of which only a single square tower now remains; contains an ancient church; has manufactures of lace and blonde; and three annual fairs. Pop. 2260.

CRATFIELD, par. Eng. Suffolk; 1930 ac. Pop. 720.
CRATHIE and Lraemar, par. Scotland, Aberdeen; 199,658 ac. Pop. 1712.

CRATI, a river, Naples, prov. Calabria Citra. It rises in the forest of Sila, and flows N. past Cosenza, then E., and enters the Gulf of Taranto, after a course of about 40 m ., and receiving several affluents, the chief of which are Coscile and Busento.

CRATO, (Villa de), a tn. Brazil, prov. Ceara, 270 m . W. by N. Pernambuco, lat. $6^{\circ} 20^{\prime} \mathrm{S}$. ; lon. $38^{\circ} 40^{\prime} \mathrm{W}$. It is a small, miserable, irregularly-built town, with two ehurches, one of which has never been finished. It has a jail, in a ruinous condition; a townhouse, a Latin, and two primary schools. The inhabitants are either Indians or their mixed descendants, with a few Brazilians, who for the most part are shopkeepers. The state of morality in the place is very low -card-playing being the principal oecupation of all classes during the daytime. Very few of the better classes live with their wives; ' a few years after their marriage, they generally turn them out to live separately, and replace them by young women.' In this species of immorality the people seem to follow the example of their pricsts, who openly live with mistresses that are sometimes marricd women. In the vicinity of Crato, rapadura (coarse sugar) is manufactured, and the sugar cane, mandioca, rice, and tobacco, are eultivated; and all the usual tropical fruits are plentiful. Pop. 3000. The dist. which is extensive, has a population of 10,000.-(Gardner's Travels in Brazil, 1836-41; Dicio. de Imp. Brazil.)

CRATO [anc. Isento], a tn. and par. Portugal, prov. Alemtejo, 11 m. W.N.W. Portalegre, on a height near the Erdoval. It is surrounded by walls, was defended by a citadel, now in ruins; and contains a collegiate chureh, convent, almshouse, and hospital. The grand prior of the Knights of Malta resided here. Pop. 1260.

CRAU (La). See Bouches-du-Rhone.
CRAUGHWELL, a post tn. Ireland, co. of, and 14 m . E.S.E. Galway, containing a ehurch and a R. Catholic chapel. l'etty scssions are held every Monday. Pop. 274.

CRA WFORD, par. Scotland, Lanark; 75,500 ac. Pop. (1851), 1696.

CRAWHORDJOIIN, par. Scotland, Lanark; 11 m . by 9 m . Pop. (1851), 1111.

CRA WFORDSVILLE, a vil. U. States, Indiana, on the S. side of Sugar Creek, 45 m . W.N.W. Indianopolis. It has a court-house, a U. States land-office; is the seat of Wabash college, and has two academies. Pop. 1327.

CRAWLEY, three pars. England:-1, Southampton 4170 ac. Pop. $483 .-2$, Sussex; 820 ac. Pop. $449 .-3$, (North), Bueks; 4060 ac. Pop. 865.

CRAWTHORNE, par. and vil. England, York (W Riding); 2460 ac Pop. 294.

CRAY, four pars. England, Kent:-1, (Foot's), 620 ac. Pop. 358.-2, (North), 1160 ac . Pop. 517.-3, (St. Mary's), 2220 ac. Pop. $997 .-1$, (St. Paul's), 630 ac. Pop. 564.

CRAYFORD, a par. and tn. England, co. Kent; 2380 ac. The town, 11 m . by S . London, situate on the Cray, where was onee a ford, eonsists prineipally of one long street. It has a handsome church of modern ereetion, on an eminence at the upper end of the town, chapels for Baptists and $R$. Catholics, and a national and an infant school. Here are two extensive works for printing articles of dress, as shawls, cravats, handkercliefs, \&c. In the parish are numerons caverns of uncertain origin, some of them ncarly 100 ft . in depth, and containing rooms supported by pillars of chalk. Near Crayford was fought the battle between Hengist and Vortigern, which ended in the defeat of the Britons. Pop. 2408.-(Local Correspondent.)

CREACOMBE, par. Eng. Devon; 3190 ac. Pop. 58.
CREAGII, two pars. Irel.:-1, Cork; 5802 ac. Pop. 6415.-2, Roscommon ; 8868 ac. Pop. 2888.

CREAKE, two pars. Eng. Norfolk:-1, (North), 3460 ac. Pop. 648.-2, (Suuth), 3820 ac. Pop. 940.

CRECORA, par. Irel. Limerick; 3013 ac. Pop. 1284.
CRECRIN, par. Irel. Carlow and Wicklow; 2471 ac. Pop. 732.

CRECY, or Cressy, a small tn. France, dep. Somme, 12 m . N. Abbeville, on the Maic, whieh empties itsclf into the estuary of the Somme. Crecy is an ancient place, and had a royal pleasure house in the seventh century. It has some manufactures of soap ; and trade in wood. It is, how ever, chiefly remarkable for the signal defeat by the English, under Edward III., August 26, 1346, of a large French army
ander Philippe de Valois, when 30,000 French were slain. Pop. 1640.

CRECY-sur-Serre, a tn. France, dep. Aisne, $9 \mathrm{~m} . \mathrm{N}$. Laon. It was once defended by a strong castle, and suffered much during the early French wars. It has a trade in horses and cattle ; a monthly, and two annual fairs. Pop. 2044.

CREATON (Great), par. and vil. Eng. Northampton; 790 ac. Pop. 505.

CREDENIIILL, a par. Eugland, Hereford; 1170 ac. Pop. 192.

CREDITON, a par. and tn. England, co. Devon; 11,440ac. The town, near the Crecdy, 8 m . N.W. Exeter, is about 1 m . in length, and is formed chiefly of one broad street, between two hills, and consists of two parts, the E. and W. towns; the latter of which was twice destroyed by fire in the last century. It has a church, in the later pointed style, with a noble tower rising from the intersection of the nave; several dissenting chapels, 12 schools, including the free grammar-school founded by Edward VI. ; two ancient almshouses, and several minor charities. There were formerly extensive serge and woollen manufactories here, but the trade has now fallen into decay. Near the town is a pretty large flax-mill, and some large flourmills. Pop. of tn. and par. (1851) 6000.

CREE, a river, Scotland, forming the boundary between the cos. of Kirkcudbright and Wigton. It rises in the S. of Ayrshire, flows S. by E., forms Loch Cree, an expansion of the river, about 3 m . long, passes Newton Stewart, and falls into Wigton Bay at Crectown. Total course about 20 m .

CREECII (St. Michael), a par. and vil. England, co. Somerset; 2150 ac . The village, 3 m . E.N.E. Taunton, on the Tone, consists of one principal strect, which is also the high road between Taunton and Bridgwater. It has a handsome parish church, of the time of Charles I.; and a small Baptist chapel. Agriculture is the chief employment. The Chard and Bridgwater Canal, as also the Bristol and Exeter Railway, pass through the village. Pop. 1296.

CREED, par. Eng. Cornwall; 2710 ac. Pop. (1851) 291.
CREEKS, a tribe of N. American Indians, formerly occupying a large portion of Georgia and Alabama, but now inhabiting a part of the territory W. of the Mississippi, assigned to the Indian nations by treaty with the U. States Government. Their country is bounded, N. and E., by that of the Cherokees, and S. by the Canadian river, which separates it from the country of the Choctaws and Chickasaws. They are industrious, and have supplied themselves with comfortable houses, with many of the necessaries, and several of the connforts, of life. They have good gardens and orchards; but Indian corn is their principal crop. They are making considcrable progress in the arts of civilized life, and fonr nissionary stations have been occupied among them by different Christian bodies. Their number is estimated at about 25,000.

CREEKSEA, or Crixetif, par. Eng. Essex; 690 ac. Pop. 199.

CREFS, a tribe of Iudians. See British Amprica.
CREETING, four pars. Eng. Suffolk:-1, (All Saints) 1780 ac. Pop. 286.-2, (St. Mary) ; 1040 ac. Pop. 196.3, (St. Olave); 1040 ac. Pop. 30.-4, (St. Peter, or West). Pop. 213.

CREETON, par. Eng. Lincoln; 490 ac. Pop. 64.
CREETOWN, a burgh of barony and port, Scotland, co. Kirkcudbright, 4 m . N.E. Wigton, beautifully situate, 1. bank, Cree, at its mouth. Its streets are irregular, but the houses are well built; and it has a town-house and small prison. It has manufactures of carpets, and some iron founding; but its principal trade is in shipping granite for Liverpool, though there is a small coasting trade, and foreign vessels sometimes deliver cargocs of timber and tar. There is no harbour. Pop. 984.

CREEVE, par. Irel. Roscommon; 3574 ac. Pop. 2086.
CREFELD, a in. Prussia. See Krefeld.
CREGGAN, par. Irel. Armagh and Louth; 24,764 ac. Pop. 15,502.

CREGLINGEN, a tn. Würtemberg, circle Jaxt, l. bank, Tauber, 44 m. N.E. Heilbronn. It contains a church, in the Gothic style, with a fine high altar. Pop. 1376.

CREGRINA, par. Wales, Radnor; $1595 \mathrm{ac} . \quad$ Pop. 112.
CREHELP, par. Ircl. Wicklow; 2215 ac. Pop. 665.
CREICH, par. Scot Fife; 3 m . by $1 \frac{1}{2} \mathrm{~m}$ Pop. 386.

CREIL [anc. Credilium Bellovacorum], a tn. France, dep. Oise, 5 m . N.W. Senlis, agreeably situate, 1. bank, Oise, here crossed by a remarkable bridge. It was formerly defended by a strong castle, of which only a few vestiges remain; contains a parish church, with a handsome spire; and has important manufactures of porcelain and stoneware; a trade in flour, coal, and cattle; and an annual fair. Pop. 2151.

CREMA, a city, Austrian Italy, deleg. Lodi and Crema, ${ }^{\text {on a }}$ a beautiful plain, r. bank, Serio, 25 m . E.S.E. Milan. It is well built, and is surrounded by a brick wall and a ditch. It has an old castle, a cathedral, and a number of other churches, a picture gallery, a gymnasium, two hospitals, two theatres, and a mont-de-piété, with several other public edifices. It has manufactures of silk, hats, lace, and linen ; and carries on a considerable trade in wax, fish, honey, \&c. The adjoining country is fertile, producing wine, grain, and flax, the latter of superior quality. Numbers of cattle are reared in the vicinity of the town. Crema was founded by some Longobards, who fled from the cruelties of Alboin, the first Lombard King of Italy. During the wars of the Guelphs and Ghibellines, it took the part of the former, and was destroyed by Frederick I. in 1160, but was soon after rebuilt. In 1797, it was taken by the French. Pop. 9200.

CREMIEUX [anc. Cremiaeum], a tn. France, dep. Isère, 15 m. N. by W. La Tour-du-Pin. It was anciently the residence of the Dauphins of Vienne, who had here a castle, of which some vestiges still remain; and has a trade in coarse linen and poultry, some silk mills, and numerous fairs. Pop. 1985.

CREMNITZ, a city, IIungary. See Kremnitz.
CREMONA, a deleg. Austrian Italy; bounded, N. by the Oglio, which separates it from Brescia; S. by the Po, which separates it from the duchy of Parma; W. deleg. Lodi; and E. Bergamo; area, 453 gco. sq. m. It is divided into 9 districts, and 198 parishes. The surface is, throughout, a rich alluvial flat, watered, besides the Po and Oglio, already mentioned, by the Adda and Serio. It is very little wooded, but produces in abundance, far beyond its own consumption, corn, rice, wine, and hay. Excellent flax also is grown, and numerous plantations of mulberries rear great numbers of silkworms. The dairy is much attended to, and excellent Parmesan chceses are made. There are manufactures of cotton and flax in many places, but none of them to any great extent. Pop. 180,000.

CREMONA, a city, Austrian Italy, cap. deleg. of same name, on a plain, l. bank, Po, 47 m . S.E. by E. Milan, and 26 m. N.W. Parma ; it is regularly built, but extremely dull, and contains few objects of interest. It is surrounded by walls and wet ditches, and defended by a citadel, and is connected with the opposite bank of the river by a bridge, defended by a fort. The most remarkable edifice is the cathedral, begun in 1107, and completed about 1491. It exhibits little harmony of parts, but has a venerable and imposing appearauce, and its interior decorations are of the most costly description. Close by, aud connected with the cathedral, is the Torazzo, the loftiest and most beautiful tower in Italy; it is built of brick, 372 ft . high, having 490 steps to the bell story. There are other 45 churches, but none of them remarkable, though many of them contain good paintings. They are mostly built of dark red brick, and usually Gothic. Some of the ancient palaces of Cremona are beautiful specimens ot architecture. Therc were formerly many convents here, but most of them are now demolished.

Cremona is the seat of a bishopric, and has civil, criminal, and commercial tribunals. It has a lyceum, gymnasium, a public library, several institutions for the education of poor children, some collections of objects of art, various charitable institutions, two theatres, a barrack, a bridewell, and a mont-de-piété. It has considerable manufactures of linen, silk, earthenware, colours, and mustard, the latter of which is much esteemed in Italy. It was at one time celebrated for its violins, but its reputation for these instruments has now much declined. Their manufacture was almost wholly confined, for nearly 100 years, to a family of the name of Amati. The first of this family who distinguished himself as a violinmaker, was Hieronymus Amati, who became famous about the beginning of the 17th century. Antonius Straduarius, and Joseph Guarnerius, were also celebrated violin-makers of Cremona. The former was a contemperary of the last two

Amatis; the latter flourished at the commencement of the 18th century. Instruments by these makers are now scarce, and bring a high price.

Cremona was colonized by the Romans, and became a populous and flourishing town. In the war between Vitellius and Vespasian, it was plundered and burnt by the troops of the latter, but was subsequently rebuilt by Vespasian. After the fall of the empire, it shared the fate of the other cities of Lombardy, and eventually fell under the dominion of the Visconti of Milan, since which time it has continued to form a part of the Milanese state. In 1796. it was taken possession of by the French. Vida, bishop of Alba, the celebratcd Latin poet. was born here in 1490 . Pop. (1846), 28,325.

CRENDON (Long), par. Eng. Bucks; 3120 ac. Pop. 1656.
CREPY, or Crespy-en-Valois, a tn. France. dep. Oise, 4 m. E. by S. Beauvais. It was formerly the capital of the province of Valois, and had two castles, five monasteries, five churches, and considerable fortifications; of the latter, some ruined walls only, and of the churches but one exist. The town is surrounded by promenades planted with trees; has a good square; manufactures of cotton, and agricultural implements; and a considerable trade in grain, wood, coarse linen, and thread. Pop. 2607.

CRERAN LOCH, an inlet of the sea, W. coast, Scotland, co. Argyle, opposite Lismore, and extending S.E. from Loch Linnhe.

CRESCENT, an isl., S. Pacific, in the low archipelago; lat. (S. point) $23^{\circ} 20^{\circ} 30^{\prime \prime} \mathrm{S}$.; lon. $134^{\circ} 35^{\prime}$ W. (R.)

CRESCENTINO, a tu. Sardinian States, prov. Vercelli, 22 m. N.E. Turin, near the confluence of the Dora-Baltea with the Po, in a marshy and unhealthy district. It has an abbey, founded in the eighth century. Pop. 4300.

CRESLOW, par. Eng. Bucks; 620 ac. Pop. 7.

CRESPANO, a tn. Anstrian Italy, gov. Venice, prov. of, and about 22 m. N.W. Tre viso. It lies at the foot of a liill, contains a parish and five auxiliary churches; and has manufactures of linen, flannel, and broad cloth. Pop. 2023.

CRESPINO, a tn. Austrian Italy, 1. bank, Po, gov. of, and 40 m . S.W. Venice, cap. dist. of same name. It has an active trade in linen, silk, bricks, firewood, and in the agricultural produce of the vicinity. Pop. 4000.

CRESSING, par. Eng. Essex ; 2960 ac. Pop. 560.
CRESSINGHAM, two pars. Eng. Norfolk:-1, (Great); 2490 ac. Pop. 476.-2, (Little) ; 1690 ac. Pop. 244.

CRESSY, a tn. France. See Crecy.
CREST, a tn. France, dep. Drôme, 15 m . S.E. Valence, r. bank, Drôme. It is commanded by an old castle, which defended the passage of the river, and rendered Crest one of the strongest places in the Valentinois. Of this castle, a large tower is all that remains in a habitable state. It was formerly a state prison, but now serves as a house of correction. There are here manufactures of cloth, serges, cotton goods, blankets, handkerchiefs, and turnery-ware. It has also several silk, cotton, and fulling mills, paper-works, dyeworks, sugar refineries, tanneries, potteries, tile-works, and limekilns. A considerable trade is carried on in cloth, cottons, silk, and silk goods, \&c. Truffles are abundant, and form a considerable article of commerce. Pop. 3897.

CRETE, or Candia [French, Candie; anc. Creta], an isl., Mediterranean, the largest and most S. of the Grecian archipelago, and belonging to Turkey. It lies about 65 m . S.E. Cape Malea or San Angelo, in the Morea, and 110 m . S.W. Cape Crio, in Anatola or Asia Minor, between lat. $35^{\circ}$ and $36^{\circ} \mathrm{N}$. , and lon. $23^{\circ}$ and $27^{\circ}$ E. Length, E. to W., about 158 m .; breadth, varying from 8 to 38 m . It is extremely mountainous, being traversed throughout its wholc length by a lofty range running close to, and parallel with the S. coast. There are other ranges dispersed over, and nearly covering the whole island. In the centre of the island is Mount Psiloriti [anc. Ida], 7690 ft . high; the other loftiest summits are towards the W., in the Sphakian or White Mountains, so called from their summits being covered with snow
for eight or nine months in the year. The highest elevations attained here are about 5000 ft . The greater part of these mountains are clothed with forests of olive, chestnut, walnut, and pine trees, oaks, and cypresses. They contain a number of remarkable caverns and grottos, including the famous labyrinth of antiquity, an extensive and intricate natural excavation at the foot of Mount Ida. The N. coast, with numerous indentations, forms, W. to E., the Capes of Buso, Spada, Meleka, Retimo, Sasso, St. John, Sidero, and the Bays or Gulfs of Kisamos, Canea or Khania, Suda, Armyro, Retimo, and Mirabel. The S. coast is lofty, bordered by mountains, presenting few indentations, so that only one marked promontory is formed, Cape Matala or Theodia, and an extensive bay, that of Messara, W. of that promontory. About 6 m . E., however, of Cape Matala, are some small bays, the most interesting of which is that in which the vessel bearing the Apostle Paul to Rome took refuge, on her way to Malta or Melita, and still called by the Greeks Fair Havens, on our

the fair havens crete.-From Smith's Vogage of St. Paul.
maps Calolimunia [from Greek, $x \omega \lambda_{0} ; \lambda_{i} \mu \eta y$ ], and described, in old sailing directions as a 'fair bay, with good anchorage.' There are few plains, and no rivers or lakes of any importance. The climate is, in general, mild and lealthy, the heats of summer being tempered by a N. wind, called by the natives enbat, which blows throughout the greater part of the day. Rains occur generally in the spring and autumn, very little falling in summer, when the want is supplied by heavy dews. Unfortunately, some of the most fertile valleys are the most unhealthy, especially those that have rivnlete running through them, fevers being prevalent in these from June to the end of September. There are no mines in the island, though many ancient writers assert that iron was first discovered here. The only useful minerals known to exist, are gypsum, lime, slate, and whetstone. Vegetation is extremely luxuriant in favourable situations, although a great portion of the soil is dry and stony, and not well adapted for the production of grain. In many places, however, frnits and vegetables grow spontaneously; myrtles and rose-laurels cover the banks of the rivulets, and the plains and pastures are enamelled with the most beautiful and fragrant flowers. The fig, pomegranate, almond, and orange grow spontaneously, and Cistus Creticus, producing gum ladanum, is found; but the tragacanth plant does not grow here. Lint, cotton, and tobacco are cultivated; but the staple productions of the country are wine, oil, and fruits, amongst the latter, the Malvoise raisins, which are much esteemed. Silk is produced, but in small quantities. Of carobs, about 2000 tons are produced annually in the pro vinces of Candia and Retimo. Sufficient corn, barley, oats, beans, \&c., are grown to supply eight or nine months' consumption; the deficiency is imported from Egypt and Barca. The wheat and barley are of superior quality. Of horned cattle there are about 50,000 , used principally for ploughing; but no improvements whatever have been made in agriculture for centuries. Almost every peasant has his own farm, and
the few who have not, cultivate those of the Agas, who furnish the farm-house, the seed, and all the necessaries of husbandry. The produce, after deducting the seventh paid to Government, and the seed furnished by the Aga, is divided in equal proportions between him and the cultivator. Olive trees are not included in this arrangement. Sheep and goats are fed on the mountains; their milk is made into cheese, a prejudice existing against cow's milk.

The manufactures of the island are inconsiderable. Soap is the principal article, there being, in all, 23 manufactories of that commodity ; nine at Candia, six at Retimo, and eight at Canea, which produce, together, about 6000 tons of soap annually. The quality is highly esteened all through the Levant, especially that made at Candia, which obtains the highest price of the market. The peasantry generally manufacture their own clothing, which, on working days, usually consists of coarse white cotton or linen cloth, manufactured from the raw material by their wives and children, who also manufacture wool into cloaks, coverlets, and sacks; the latter for containing the soap exported from the island. The principal articles of export are oil, soap, honey, wax, almonds, oranges, lemons, linseed, chestnuts, carobs, and raisins. The principal imports are cotton, manufactured goods, hides, leather, planks, and building timber, salted fish, soda, wheat, beans, and rice. The exports go mostly to Egypt, Turkey, and Greece ; the imports, with exception of the cotton manufactured goods, which, as already stated, are from England, are chiefly from the two last mentioned places and Austria. The following Table exhibits the state of the commerce of Crete, as indicated by the shipping and exports and imports of the three principal ports of the island, for the years 1843 to 1847 :-
holidays in the year, including Sundays. Their food consists of barley bread, cheese, and olives, also beans, pulse, and vegetables, cooked with abundance of oil, of which the poorest family consumes about 40 gallons a year.

Crete, the cradle of the civilisation brought to Europe by the Phœenecians and Egyptians, received its name from Cres, the first of its monarchs, of whom, and his successors, however, little is known, and that little is so intermingled with fable, as to be of hardly any historical value. Among the monarehs were two of the name of Jupiter, and two of the name of Minos, one of whom was esteemed the wisest legislator of antiquity. His laws were engraven on tablets of brass, and were adopted by the Greeks. In the time of Homer, Crete was crowded with inhabitants, and contained a great number of flourishing cities. The original or true Cretans, were called Eteocretes, to distinguish them from the foreign settlers, and inhabited the S. division of the island. The last King of Crete was Idomeneous, whose exploits are recorded by Homer. For 10 centuries, Crete repelled all foreign aggression, but was at length subdued by the Romans, who subsequently ceded it to the Marquis of Montferrat, by whom it was sold to the Venetians in 1204, when it obtained the name of Candia. It was afterwards taken by the Turks, in whose possession it remained till 1830, when it was ceded to Mehemet Ali, Viceroy of Egypt, who, in turn, was obliged in 1841 to restore it to Turkey. Besides the classical interest which attaches to Crete, from its heroic and mythological associations, and from its having been a chosen seat of the arts and sciences, is the higher interest which arises from its having been one of the first places in the world favoured with the light of the gospel. The Christian faith was introduced into the island by St. Paul, whose disciple, Titus, became first bishop of Crete. Pop. about 153,000; of these 100,000 are Greeks, 27,000 Turks, and the remainder foreigners and black slaves.

CRETINGHAM, par. Eng. Suffolk; 1700 ac. Pop. 411.

CREUSE [Latin, Crausia], a river, Franee, which rises at Mas-d'Artigues,

The coin of the country is the same as that of Constantinople, but a good deal of foreign coin also circulates, principally English sovereigns, and Spanish and imperial dollars.

Besides the three principal ports above named, there are other three good ports, Suda, the best harbour in the island; Spinalonga, and, a little S. of it, the small port Ayio Nicolo, all on the N . side of the island.

Except in the immediate neighbourhood of the three cities, Candia, Retimo, and Canea, the roads are in the most wretched condition. In many places only mules and asses can venture; and, although very sure footed, it is dangerous to remain on their backs. When they descend the hills, the peasants almost invariably alight. The bridges are, most of them, broken down, so that the torrents, caused by the winter rains, frequently detain travellers two or three days on the banks of what are, during the summer, insignificant rivulets.

Crete, with the adjacent islands of Gozzo, Anti-Gozzo, Standia, \&c., forms a pashalic of Turkey in Europe, and is divided into the three sanjaks of Candia, Retimo, and Canea. The capital is Candia.

The island contains eight bishoprics, and 30 monasteries, the latter possessing immense landed property. The patriarch of Constantinople receives annually from the island 250,000 piastres, or about $£ 2500$. The majority of the clergy are wholly uneducated, many of them being unable to write; and the peasantry, generally, are in the lowest state of ignorance. There are but few schools, and in most of these the system of tuition is extremely bad.

The native male population are tall, well proportioned, and muscular, but are neither so intelligent nor so active as the Greeks of the other islands. They are frugal and hospitable, and much attached to their children; their principal vices are lying and stealing; in the former respect, still preserving the character given them by the Apostle Paul, Tit. i. 12, 'The Cretians are alway liars.' Their amusements are attending the fètes of the different villages and monasteries, where they dance and play upon a small instrument resembling a guitar, which they accompany with their voice. They have about 100

Vol. I.
on the $s$. frontier of dep. Creuse; flows centrally, in a N.N.W. direction, throngh that departnient, to which it gives its name; enters dep. Indre, and still maintains the same direction till it passes Argenton, when it proceeds, first, almost due W., then N. N. W., forming the boundary between deps. Vienne and Indre-et-Loire, and joins r. bank, Vienne a little above Porte-de-Pites. Total course, about 130 m ., of which only about 4 m . are navigable. The principal towns which it passes are, Aubusson, Argenton, Le Blanc, and La Haye; its principal affluents are, r. bank, the Petite Creuse, Roseille, Bonzane, and Claise; and, 1. bank, the Sedelle and Gartempe, of which the first is the only one admitting even of flotation.

CREUSE, an inland dep. France, having N. deps. Indre and Cher, E. Allier and Puy-de-Dôme, S. Correze, and W. Haute-Vienne, bet ween lat. $45^{\circ} 40^{\prime}$ and $46^{\circ} 25^{\prime} \mathrm{N}$.; and lon. $1^{\circ} 22^{\prime}$ and $2^{\circ} 32^{\prime} \mathrm{E}$. It was formed, in 1790 , from parts of the provinces of Poitou, Marche, Bourbonnais, Limousin, and Berry, and derives its name from the river Crease. Area, $2133 \mathrm{sq} . \mathrm{m}$.; cap. Gueret. Creuse is traversed by several mountain ranges connected with those of Auvergne; they lie generally S.E. to N.W., though some offsets, in the N.E. of the department, do not follow this direction. There are few plains of any extent, but numerous valleys, through which flow many streams, of which the principal are the Creuse, Cher, Thorion, Gartempe, \&c., none of which are navigable within the department. Granite, coal, gypsum, and potter's-clay, are wrought to a limited extent. The higher slopes of the hills are generally planted with chestnut trees; the lower slopes are meadows-the low lands alone being tilled. The climate is variable, cold and damp, with frequent storms of wind and heavy rain. Snow remains on the mountains during several months. Soil in general poor, light, and unproductive. The only good land is found towards the N.E. Agriculture is in a backward state, and the quantity of grain produced is insufficient for the consumption. Rape and hemp are grown to a large extent. Fruit is abund-ant-almost all the fruit trees that grow in central France ${ }_{\text {being cultivated }}$ with success. The shecp are small, and
furnish good mutton; but the wool is inferior. The cattle are of a good kind, and easily fattened. Bees are reared, thrive well, and furnish excellent honey. The minerals are unimportant. The only manufactures of importance are of carpets and tapestry, at Aubusson and Felletin, which rank after the manufactures of the Gobelins and Beauvais. Some coarse woollen goods, leather, a few cottons, paper, glass, and porcelain, are also made. The exports consist of fat cattle and pigs, wool, carpets and tapestry, honey, wax, and hemp; the imports of wine, wheat, iron, salt, colonial produce, silk, \&c. The inhabitants are generally intelligent, industrious, and persevering. From 20,000 to 24,000 emigrate during nine months of the year, from March to Christmas, in search of work. They are principally masons, paviors, sawyers, tilers, hemp and wool combers. They travel in small bands, under a master, who undertakes jobs, and settles with the men. The proceeds of their labour are generally laid out on land on their return. Hugo says that a good deal of the labour falls upon the women, ' who are sought by the young men, neither for their beauty nor personal attractions, but because they are good strong workers, and careful in the management of the house.' Creuse is divided into four arrondissements, subdivided into 25 cantons, and 262 communes. Pop. (1846), 285,680.

CREUSE (Cabo DE), the most E. point of Spain, forming a rugged, but not very lofty promontory, N.E. coast of Catalonia; lat. $42^{\circ} 19^{\prime} 12^{\prime \prime}$ N.; lon. $3^{\circ} 20^{\prime}$ E. (R.); crowned by a watch tower, which forms a very conspicuous object. The lofty mountains rising behind it may be seen 25 m . or 30 m . off at sea. It is the W. entrance to the Gulf of Lyons, and lying in the line of navigation, requires a good berth to be given it, as a reef runs out from its $S$. end.

CREVECGEUR, two places, France :-1, Crèvecœur [anc. Crapicordium], a tn. dep. Nord, 7 m. S. Cambray, r. bank, Scheldt. It is famous for a battle fought in 717, in which Chilperic II. was defeated by Charles Martel; and has manufactures of plate-glass, brickworks, limekilns, and an annual fair. Pop. 1875.-Crèvecœur-le-Grand, a tn. dep. Oise, $22 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Clermont. It contains a parish church, gnd a huge castle, built of brick and flanked with towers, with a tine park and gardens attached; and has manufactures of woollen and silk stuffs, called alépines, merinoes, mousselines de laine, woollen bosiery, and cashmeres. Pop. 2125.

CREVECGEUR, fort, Holland, prov. N. Brabant, l. bank, Maas, $4 \frac{1}{2} \mathrm{~m}$. N. Hertogenbosch. This fort having been destroyed by the French, in 1672 , was left in ruins until 1735, when the Dutch government restored and made it stronger than ever. The Dieze, which flowed past the W. side, was then made to pass through the fortress, so that, by damming it when necessary, the whole country may be laid under water. There is a church within the fort for the inhabitants, who are almost all Reformed.

CREVILLENTE, a tn. Spain, Valencia, prov. of, and 18 m. S.W. by S. Alicante, at the E. base of the hills which form the boundary of prov. Mureia. It possesses a parish church, two chapels, townhall, prison, five schools, and a cemetery. The inhabitants are chiefly engaged in weavincr, agriculture, the preparation of esparto, and expressing oil and wine. P. 7226.

CREWE, a market tn. England, co. Chester; 32 m. S.E. Liverpool, and a central point from which diverge various branches of the London and N.W. Railway, including the main line from Birmingham to Warrington, the branch to Manchester, and that to Chester; and also the junction of the N. Stafford Railway. The town, which has sprung into existence within these few years, is chiefly inhabited by persons connected with the railway lines. The houses are remarkably neat, and all have gardens. There are a church, R. Catholic chapel, newsroom, assembly-room, library, and baths. Besides the large number engaged in the varions duties connected with this extensive railway station, and the numerous trains constantly arriving and departing, many are employed in the coach-building, iron-forges, and general repairing works erected here in connection with the London and N.W. Railway. Pop. (1841), 396; (1851), estimated at 5000.

CREWKERNE, a tn. and par. England, co. Somerset. The town, 16 m . S.E. Taunton, is pleasantly situate in a fertile vale, well wooded, and surrounded by cultivated eminences. The streets are well paved, lighted with gas, and
present altogether a neat and cleanly appearance. 'The clurch is a large cruciform structure, with a lofty and richly-ornamented tower. The Baptists and Presbyterians have places of worship here. There are a free grammar-school, founded in 1499 , with four exhibitions to any college in Oxford, and six other daily schools. There are two almshouses, and several other minor charities. Serges were woven here to a great extent, at one time. but the trade is now wholly extinct, and its place supplied by the manufacture of sailcloth, dowlas, and stockings. Area of par. 5810 ac. Pop. par. 4414 ; tn. 3673.

CRICCIETH, a par. and bor. N. Wales, co. Caernarvon. The town, on Cardigan Bay, 15 m . S. Caernarvon, has a spacious church, several dissenting chapels, and a free dayschool. The coast here is very dangerous, and only a few fisling-boats belong to the place. Criccieth is contributory to Caernarvon in returning a member to the House of Commons. The remains of the ancient castle occupy the summit of a precipitous rock overlooking the bay. Pop. 811.

CRICH, a par. and vil. England, co. Derby; 6180 ac. The village, 4 ml . W. by S. Alfreton, has a handsome church, on a commanding eminence, with a tower and a spire, places of worship for General Baptists and Wesleyans, and a national school. The mining of lead, and the quarrying and burning of limestone, employ the most of the inhabitants, though a few manufacture stockings, spin candle-wicks, and turn bob bins. Area of par. 6180 ac. Pop. 3698.

CRICHTON, par. Scotland, Edinburgh; $5 \frac{1}{2} \mathrm{~m}$. by $4 \frac{1}{2} \mathrm{~m}$. Pop. (1851), 1384.

CRICK, par. Eng. Northampton; 3930 ac. Pop. 1006.
CRICKADARN, a par. and vil. S. Wales, co. Brecknock. The village, $8 \frac{1}{2} \mathrm{~m}$. W. by N. Hay, has an ancient church, two dissenting cliapels, and several small charities. Pop. 441.

CRICKET, two pars. England, Somerset:-1, (-Malherbie), 350 ac. Pop. 36.-2, (-S't. Thomas), 540 ac. Pop. 78.

CRICKHOWELL [Welsh, Crug-Hywell], a market tn. and par. S. Wales, Brecknockshire. The town, beautifully situate, 12 m . S.E. Brecknock, on a declivity, l. bank, Usk, here crossed by a bridge, consists of six principal streets, irregularly built, but well kept; houses chiefly of stone; supply of water abundant. Besides the parish church-a fine old cruciform structure-there are places of worship belonging to Calvinists, Wesleyans, Welsh Methodists, Primitive Methodists, and Baptists. There are also two national schools and an infant school, and several benefit societies. The people are chiefly employed as labourers and mechanics. Pop. 1257. -(Local Correspondent.)

CRICKLADE, a parl. bor. England, co. Wilts, 42 m . N. Salisbury, r. bank, Isis. It is meanly built, and not lighted. Comprehends two parishes, St. Mary and St. Sampson. The church of the former is small; that of the latter a spacious cruciform building, with a lofty and highly-ornamented tower. It has places of worship for Independents and Wesleyan Methodists, several schools, and some minor charities. Pop. of pars. 2128.

CRICKSTOWN, par. Irel. Meath; 1432 ac. Pop. 195.
CRIECH, par. Scot. Sutherland. Yop. 2582.
CRIEFF, a th. and par. Scotland, co. Perth. The town is beautifully situate, $16 \frac{1}{2} \mathrm{~m}$. W. by S. Perth, on a slope above the Earn, backed by lofty hills and crags. It consists of one principal strcet, in the centre of which is a handsome square; and of several other well-built streets, one of which leads to a bridge over the Earn. The inhabitants are amply supplied with water from springs in the vicinity, collected in a re servoir, in St. James Square, which, being surrounded with some fine lime trees, forms an elegant ornament to the town. Crieff is also well lighted with gas. Nearly in the centre of the High Street stands the ancient cross, curiously carved in front. It is of great antiquity; but nothing more is known of its history, than that it is not the original cross of the town, but was brought from a farm in the vicinity, where it had stood for centuries. There are five places of worshipone Established, one Free Church, two U. Presbyterians, and one Episcopal. The only other buildings of any consideration are, the masons' and weavers' hall-the former a handsome structure. A subscription library has been established, and is well supported; there are also a circulating library and two reading rooms, maintained by subscription. The principal manufacture is hand-loom weaving, in which it is
estimated that about 500 persona are engaged. There are also some pretty extensive tanneries, distilleries, and malting establishments. The environs of Crieff are singularly beantifal, and its climate remarkably salubrious. The par. is 4 m. by 3 m . Pop. (1851), 4504.

CRILLON CAPE, the most S. point of the Japanese isl. Tarakai, or Sagalin, Strait of La Perouse, lat. $45^{\circ} 54^{\prime} 12^{\prime \prime}$ N.; lon. $141^{\circ} 58^{\prime}$ E. (r.)

CRIMEA, or Crim Tartary [anc. Chersonesus Taurica], a peninsular territory of S. Russia in Europe, between lat. $44^{\circ} 21^{\prime}$ and $46^{\circ} \mathrm{N}$.; lon. $32^{\circ} 30^{\circ}$ and $36^{\circ} 38^{\prime} \mathrm{E}$., forming a large portion of the Russian gov. prov. of Taurida (which see).

CRIMMITSCHAU, a tn . Saxony, circle Zwickau, 37 m . S. Leipzig, on the railway thence to Hof, and on 1 . bank Pleisse. It contains a pretty townhouse, with a tower, two churches, and three schools. This is a busy manufacturing town, and has nearly doubled its population since 1834. Needle and button-making, turning, glue-making, but, above all, the spinning of woollen yarn, with the weaving of both woollen and cotton fabrics, including cassimeres, merinoes, vestings, \&c., are carried on; besides dyeing and fulling, and some minor branches of ..anufacturc. It has a weekly and three annual woollen markets. Pop. (1849), 7068.

CRIMOND, par. Scot. Aberdeen; 9 sq. m. Pop. 767.
CRIMPEN, a tn. Holland. See Krimpen.
CRIMPLESHAM, par. Eng. Norfolk; 1680 ac. P. 358.
CRINAN (Loch), a small arm of the sea, Scotland, W. coast, co. Argyle, about 5 m . E. the N. end of the island of Jura, from the sound of which it diverges S.E. into N. Knapdale, for about $2 \frac{1}{m}$. At the head of the loch is the entrance to the Crinan Canal, which is about 9 m . long, has 15 locks, and leads across the peninsula to Loch Gilp, into which it opens at Ardrishaig. By means of this canal, which is only suitable for small vessels, the long passage from the $W$. coast, round the Mull of Kintyre, to the Firth of Clyde is a voided.

CRINGLEFORD, par. Eng. Norfolk; 1080 ac. P. 191.
CRINOW, par. Wales, l'embroke. Pop. 53.
CRIO CAPE.-1, The extreme point of the peninsula which forms the S. side of the Gulf of Cos, S.W., coast, Asia Minor, lat. $36^{\circ} 41^{\prime}$ N.; lon. $27^{\circ} 23^{\prime} 5^{\prime \prime}$ E. (к.) ; near it are the ruins of ancient Cnidus.-2, The most S.W. point of the isl. of Candia, lat. $35^{\circ} 16^{\prime} \mathrm{N}$.; lon. $23^{\circ} 31^{\prime} \mathrm{E}$.

CRITCHILL, two pars. England, Dorset:-1. (-Long), 2310 ac. Pop. 120.-2, (-More), 2020 ac .1 l'op. 316.

CRIWITZ, or KRIWitz, a tn. Mecklenburg-Schwerin, circle Mecklenburg, cap. bail. of same name, on a small lake, 11 m. F.S.E. Schwerin. It has walls, with two gates, and contains an old Gothic church, with a fine altar-piece, and a courthouse. Pop. 2357.-Area of bailiwick, 78 geo. sq. m. Pop. 4454.

CRIXA.-1, A m . Brazil, prov. Goyaz, 10 m . W. I. bank river of the same name, $116 \mathrm{~m} . \mathrm{N}$. by W. Goyaz, or Villa Boa. It owes its existence to the discovery of gold mines in its neighbourhood, which induced a company to settle, form an establishment, and build three churches. The working of the mines having ceased to be profitable, has been almost entirely abandoned, and the inhabitants are chiefly employed in cultivating the ground and rearing cattle. -2 , A river, Brazil, which rises in the mountains, prov. of, and N. the town of Goyaz, flows N.W., and joins. r. bank, Araguaia. Its whole course is about 200 m. , and partly navigable. Near its mouth are extensive salines, which might be, but are not turned to profit.

CROA, the rame of five small islands in the embouchure of the Amazon, S.W. of the isle of Bailica, or Penitencia. They are not inhabited, but are frequently visited by the inhabitants of Villa Nova, who salt the fisl which they eatch in the neighbourhood on their slores.

CROAGH, a par. and vil. Irel. co. Limerick; 7221 ac. l'op. 3185.

CROAGII Patrick, or Reek, a mountain, Ireland, co. Mayo, 8 m . S.W. Newport, S. side Clew bay, of which it commands a nine view. It rises towards the top in the form of a cone, 2510 ft . above the sea. A well on its top is one of the most celebrated places of pilgrimage in Ireland, and at certain seasons greatly resorted to. At its base, close on the shore, are the ruins of Murrish Abbey.

CROATIA [called by the natives, Horvath; Austrian, Orszog; German, Kroatien], an extensive prov. Austrian diminions, formerly incorporated with Hungary, now in kingdom Dalmatia, divided into Civil and Military Croatia, bounded, N. by Styria and Hungary-proper, E. Sclavonia and Turkey, S. Dalmatia, and W. the Adriatic Sea and Illyria; arca, 2760 geo. sq. m. It is naturally divided into two parts by the Save, which traverses it in an E. direction. The $\mathbf{S}$. and larger part is generally covered with lofty mountains, forming a continuation of the Julian Alps, and taking the general name of the monntains of Velebich. They consist of two principal chains, called Great and Little Capella, and have heights varying from 3500 to 4300 ft . The culminating point, Velika Viozochicza, is 4400 feet. The N. part, thongh much less mountainous, is traversed by a branch of the Carnian Alps, constituting the watershed between the Drave and the Save. A characteristic feature in the mountains of Croatia is the number of deep ravines and subterranean caverns and channels which they contain. In the latter, the waters of important streams are often lost, and, after pursuing a mysterious course, reappear. The whole country belongs to the basins of the Save and the Drave-the former draining a considerable portion of it directly, and a still larger portion by its important tributaries, the Kulpa and the Unna; and the latter, which forms its N. boundary, receiving the comparatively limited amount of waters which flow down the N . slde of the watershed already mentioned. The lakes are not, individually, of great extent, but are numerous, particularly in the S . The climate varies much in different localities. In the S . the air is often piercingly cold, and a boisterous wind, called Bora, blows, almost without intermission, from September to May. The violence of this wind is said to make some of the regions most exposed to it almost uninhabitable. The temperature is mildest towards the shores of the Adriatic. The valleys and plains which extend between the mountain ridges are, in the N ., of considerable fertility, but are often so much broken by rocks and abrupt precipices, as to be altogether unfit for the plough. The soil along the banks of the rivers is usually a rich alluvium, from which large crops might be obtained, did not frequent extensive inundations defeat the hopes of the husbandman, and present almost insuperable obstacles to successful cultivation, converting large tracts into mere morasses. On the low and sunny slopes of the $\mathbf{N}$. the vine is successfully cultivated; and on the coasts the olive, mulberry, and fig thrive well. The S. portion of Croatia is generally of very indifferent fertility, and many parts of it may be considered as absolutely sterile. The soil is not well adapted for wheat, and the principal crops are barley and oats. Hemp and flax are grown merely for domestic use. The rearing of stock attracts far less attention than might be expected, from the extent of surface which is necessarily devoted to pasture. Both cattle and horses are of inferior breeds; but great numbers of swine are reared on the mast of the forests. The rivers are well stocked with fish. Manufactures can scarcely be said to have an existence; and the little trade which is carried on is nearly confined to wood and wine. The iulabitants belong generally to the $\mathbf{R}$. Catholic church, though a considerable proportion make use, not of the Latin, but the Greek ritual. They are very ignorant; and so bigoted, that it is not long since Protestants were permitted to enjoy even a nominal toleration. Civil Croatia is wholly situated N . of the Save, and comprehends the counties of Agram, Köros, and Warasdin; Military Croatia is chiefly S. of the Save, but partly also N., and comprehends three military divisions, which bear the name of the Karlstadt, Banat, and Warasdin Grenze or frontier. These divisions are subdivided into eight regimental districts. Military Croatia forms part of the extensive military frontier which stretches along the N. of Turkey, from the Adriatic eastward to Moldavia, and owes its name to the strictly feudal and military tenure by which the inhabitauts hold their landa. Instead of the ordinary payment of rent, they render military service, according to arrangements which were fixed in 1807.
Croatia was anciently inhabited by the Pannonians, who were subdued by the Romans, under Augustus. In A. D. 489 it was taken possession of by the Goths, and in A.d. 640 the Croatians, a tribe from Bohemia, settled in it, and gave their name to the country. In the 10th century its princes assumed the title of kings of Croatia, which they subsequently
changed into that of kings of Dalmatia. About the end of the 12th century, it was incorporated with Hungary, and thenceforth sent representatives to the Diet, but retained, and still retains, many of its peculiar political rights and privileges. By the new arrangement of provinces, according to the constitution of March 4, 1849, it was withdrawn from Hungary, and incorporated with the kingdom of Dalmatia. Pop. (1842), 506,500.

CROATIA ('TuRKISH), an extensive territory, forming the N.W. extremity of the Turkish dominions in Europe, and properly included in the general sandjak of Bosnia, though usually considered separately. It lies N.W. of Bosnia, and is bounded, on the N. and W., by Austrian Croatia, and on the S. by Dalmatia and Herzegovinia. Its surface is very mountainous-the chains, both of Austrian Croatia and of Bosnia being continucd into it from opposite directions till they meet. It belongs entirely to the basin of the Danube, whose tributary, the Save, forming its N.E. boundary, drains part of it directly, and almost the whole of the remainder by the Verbas and Unna. Its leading featurcs are the same as those of Bosnia.

CROCE, Santa, several small places, Italy and Sicily; particularly-1, A tn. Tuscany, prov. of, and about 21 m . W.S.W. Florence, in the lower valley and r. bank, Arno. It has a convent, and some manufactures of woollen and silk stuffs. Pop. 3000.-2, (-di Magliano), a tn. and com. Naples, prov. Sannio, dist. of, and 8 m . S.E. Larino. It stands in a beautiful plain, is walled, and contains a handsome church; and has two annual fairs. Pop. 3781.-3, (-di Morcone), a tn. and com. Naples, prov. Sannio, dist. of, and 12 m . S.S.E. Campobasso. It contains two churches and a convent, and in its neighbourlood is a sulphureous spring. Pop. 5903 . $-4, \mathrm{~A} \mathrm{nn}$. and com. Sicily, prov. of, and $45 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Syracuse, and about 3 m . from the S . coast. It has a small port; and in its neighbourhood the ruins of the ancient Caucana are still visible. Pop. 2093.-5, A cape on the E. coast of Sicily, 14 m . N. Syracuse, lat. $37^{\circ} 15^{\prime} \mathrm{N}$. ; lon. $15^{\circ} 15^{\prime}$ E. (r.) It is a bold promontory, crowned with the little convent of St. Helena. There are a fcw rocks about it, and a reef runs off the point.

CROCODILE ISLANDS, Australia, N. coast, Castlereagh Bay, lat. $11^{\circ} 43^{\prime} \mathrm{S}$.; lon. $135^{\circ} 18^{\prime}$ E.

CROFT, four pars. England:-1, Hereford; 1980 ac. Pop. 144.-2, Leicester; 1010 ac. Pop. 321.-3, Lincoln, 5840 ac. Pop. 649.-4, York (N. Kiding); 7060 ac. Pop. 744.

CROFTON, par. Eng. York (W. Riding); 970 ac. P. 389 .
CROGHAN, par. Irel. King's Co.; 5794 ac. Pop. 915.
CROGLIN, par. Eng. Cumberland; 9180 ac. Pop. 336.
CROHANE, par. Irel. Tipperary; 5434 ac. Pop. 1817.
CROIA, Croja, or Ak-Hissar, a town, Turkey in Europe, Upper Albania, pash. of, and 42 m . S.S.E. Scutari, cap. sandjak of same name. It stands on a lofty mountainspur, about 500 ft . above the plain, and is defended by a strong castle. The celebrated Scanderbeg was born here. Pop. about 5000 .- The sandJak is bounded, N. by sandjaks Scutari and Jakova, E. Prisrendi and Ochrida, S. also by Ochrida, and W. by Tyranna and Scutari; length, N. to S., about 50 m .; mean breadth, E. to W., 39 m . It is covered by mountains, several of which, to the S.E. of the town of Croia, have heights varying from 2500 to 3000 ft Its general slope is towards the E. and N.E.-its rivers, which are numerous, and consist of the Maffi or Matt and its tributaries, and the Izmo, all flowing in that direction. The mountains are well wooded, and the valleys of great fertility. The inhabitants are a mixture of Albanians, Servians, and Bulgarians.

CROISIC (Le) [anc. Crociliacum], a seaport tn. France, dep. Loire Inferieure, 27 m . W. Savenay, on the extremity of a tongue of land which projects into the Bay of Biscay, and forms one side of a finely-sheltered roadstead. It is situate in the neighbourhood of extensive salt marshes, has a dull gloomy look-the houses being generally mean, and the strects ill paved-contains a capacious parish charch, with an elegant and lofty spire, which serves as a landmark to vessels entering the Loire; and has building-yards, at which a considerable number of vessels are bnilt; an active fishery of herrings, mackerel, and sardines; a trade in salt, wine, brandy, and cattle, and an annual fair, which lasts eight days. Pop. 2196.

CROIX (St.), an island, W. Indies. See Cruz, Santa.
CROIX (St.), a river U. States, N. America, rising in the N.W. territory, in the ridge which separates Lake Superior from the Mississippi, pursuing a tortuous S. course, during which it receives numerous tributaries, passing through St. Croix lake, and falling into the Mississippi a little below the Falls of St. Anthony.-2, Or Chiputnecticook, or Passamaquoddy, a river, N. America, forming the S.E. boundary between Maine and New Brunswick. It rises in the latter, near the parallel of $45^{\circ} 15^{\prime} \mathrm{N}$. ; and, after a tortuous course, chiefly S. by E., of nearly 80 m ., including sinuosities, falls into Passamaquoddy Bay. It is easily navigable for about 30 m. , and in the upper part of its course expands into a serics of lakes.

CROIX (Sainte), two places, France:-1, A tn. dep. Sarthe, so close to Le Mans, as to be properly its suburb. Pop. 2366.-2, (-aux Mines, or Heilig-Kreutz-Leberthal), a vil. dep. Haut-Rhin, 14 m. N.W. Colmar. It contains a handsome parish church, and has manufactures of cotton cloth and hosiery, worsted, and cotton yarns. There are mines of lead and copper in the neighbourhood. Pop. 1254.

CROIX-Rousse, a tn. France, dep. Rhone, properly only a suburb of Lyons, r. bank, Rhone. It has fortifications, forming part of the defence of that city; manufactures of silks, dye-works, and printed goods. Pop. 18,933.

CROKER.-1, [native name, Heraiki], one of the Low Islands, S. Pacific Ocean, lat. N. point, $17^{\circ} 26^{\prime}$ S.; lon. $143^{\circ} 26^{\prime} \mathrm{W}$. (r.); sometimes called Tuscan Island.- 2 , An isl. N. coast, Australia, off Coburg peninsula. Its N. point, Cape Croker, is in lat. $10^{\circ} 58^{\prime} \mathrm{S}$.; lon. $132^{\circ} 38^{\prime} \mathrm{E}$. (r.); at the entrance to Mountnorris bay. About 7 m . N. of this cape there is a dangerous shoal, on which several vessels have struck. There is a channel between it and the latter, but its soundings are not yet known. The inhabitants are of the Yaako tribe, small in stature, ill-formed, with a forbidding disagreeable countenance, and coarse, bushy hair. The beards and whiskers of the men are thick and curly, while the entire body is often covered with short crisp hair, which, about the breast and shoulders, is sometimes so thick as to conceal the skin. The eyes are small, and what should be white has a dull muddy appearance. Their aspect altogether is more forbidding than that of Australian aborigines generally, nor are their dispositions of the most amiable description.

CROMA (La), more properly Lacroma, a small isl. Adriatic Sea, off the coast of Dalmatia, about 1 m . S. Ragusa. A fort was built by the French; and Richard Cœur de Lion landed here on his return from the Holy Land.

CROMARTY, a co. Scotland, consisting of 14 detached portions scattered over co. Ross, and distant, several of them, nearly 10 m . from each other. Total area, 220,800 ac. This singularly awkward county was formed at the request of a former Earl of Cromarty, who desired that one county might contain all his lands, wherever situate. See Ross and Cromarty.

CROMARTY, a seaport tn. and par. Scotland, co. Cromarty. The town stands on a low point of land, forming the N.E. extremity of the peninsula which separates the Murray or Moray, from the Cromarty Firth, 16 m . N.E. Inverness, lat. $57^{\circ} 41^{\prime} \mathrm{N}$. ; lon. $4^{\circ} 2^{\prime} \mathrm{W}$. (R.) It is irregularly built, and many of the houses, in the more ancient streets, have an antique appearance; but the general aspect of the town is that of a neat and cheerful place. The principal buildings are a parish church, a Free church, a Gaelic chapel; and a townhouse, surmounted by a clock-tower. Besides the churches named, there is a place of worship for U. Presbyterians. There are here a manufactory for bagging, one or two timber-yards, several cooperages, a brewery, and a depôt for pickled salmon, and for the other produce of the country. A considerable trade also is carried on in pork, of which there is cured annually to the value of between $£ 5000$ and $£ 10,000$. The herring fishery was formerly prosecuted here with great success-not less than 20,000 barrels having been annually shipped from the port; but of late years it has almost wholly ceased, in consequence of the herrings, as is not unusual with that fish, having deserted this part of the coast. Some slipbuilding is carried on. The pier, which is commodious, is accessible to vessels of 400 tons. On the point on which the town stands there is a lighthouse, elevated 50 feet above sea level-light fixed, and of a red colour.-The paisisu of

Cromarty is 6 m . in length, by 2 m . in hreadth. Pop. (1851), 2689 ; of which in tn. 1952.--The Firth of Cromarty is a long narrow inlet of the sea, about 18 m . in length, N.E. and S.W., and averaging from 2 m . to 5 m . in breadth. Its entrance is nearly a mile wide, with 30 to 40 fathoms water, and its shores, exeept the S. point, are clean. Being completely landlocked, it affords excellent shelter for shipping, and is often erowded in stormy weather, to the great advantage of the town, which then becomes a stirring place.

CROMDALE and Inverallan, par. Scotland, Inverness; 27 m . by 9 m . Pop. (1851), 3395.

CROMER, a par. and nuaritime tn. England, co. Norfolk; 800 ac. The town, on a plain, commanding a fine view of the Bay of Cromer, and sheltered on three sides by wellwooded hills, is 21 m . N. Norwich, and about 30 m . N.W. Yarmouth. It is mueh frequented by sea-bathers, on account of its beautiful beaeh, and picturesque scenery. It has a number of neat houses, a library, a news-room, and fine jetty 70 yds. long, forming a favourite promenade; a handsome chureh, in the later Gothie style, with a tower 159 ft . high; a Methodist chapel, several schools, including a free grammarschool, founded by Sir Bartholomew Read in 1502. The inhabitants are chiefly fishermen. A trifling coasting trade is carried on, but there is no harbour. Exports, chiefly eorn; imports coals, tiles, and oil-cake. The bay is so dangerous, as to have obtained from sailors the name of the Devil's Throat. Life-boats are always kept in readiness on the beach. Robert Baeon, a mariner of Cromer, discovered Iceland in the reign of 1Ienry IV. Pop. 1240.-(Local Correspondent.)

CROMFORD, a tn. England, co. of, and $12 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Derby, on the Derwent, and a station on the railway to Matlock. The rown owes its rise to the extensive cotton works established here by Sir Richard Arkwright. There are here, also, a paper-mill, and hat manufactory. In the vicinity are lead mines, smelting works, and a red lead work. There are an Episcopal ehapel, founded by Sir R. Arkwright; a Wesleyan Methodist chapel, and almshouses. Pop. 1407.

CROMHALL-Abbots, par. Eng. Gloucester; 2810 ae. 1’op. 732.

CROMWELL, par. Eng. Notts; 1170 ac. Pop. 203.
CRONDALL, par. Eng. Southampton; 9540 ac. P. 2199.
CRONENBERG, or Cronberg, a tn. Nassau, 14 m. N.E. Wiesbaden. It contains two parish churches, a Protestant, and R. Catholic, and a castle. Pop. 2133.

CRONSTAD'T, or Kronstadt, a seaport tn., Russia, gov. of, and 20 m . W. from St. Petersburg, on the long, flat, and arid island of Kotlin, near the E. extremity of the Gulf of Finland; lat. (Cathedral) $59^{\circ} 59^{\prime} 42^{\prime \prime} \mathrm{W}$. ; lon. $29^{\circ} 46^{\prime} 30^{\prime \prime}$ E. (r.) The Town is built in the form of an irregular triangle, on the S.E. extremity of the isle, opposite the mouth of the Neva, and is strongly fortified on all sides. On the S. side of Kotlin, is the narrow channel, through which only one vessel can pass at a time, from the gulf to the capital, and scores of gans could here be brought to bear on an enemy, by means of a fortress erected on a detaehed islet; or, if arriving on the opposite side, by the batteries of Riesbank, and the citadel of Cronslot. The appearance of Cronstadt is respectable. It is regularly built, and contains many straight and well-paved streets, and several squares. The houses, however, are all low, being generally of one story, with those singular red and green painted roofs common in Russia; and are mostly of wood, with exception of those belonging to Government, which number nearly 200, and are nearly all built of stone. The town is entered by three gates, and is divided into two sections, the Commandant's division, and the Admiralty; each of which is subdivided iuto two districts. It is also intersected by two canals, which have their sides of granite, and are both deep and wide enough to admit the largest vessels. The one, Peter's Canal, is used as a repairing dock; and the other, Catherine's Canal, for commercial purposes. Cronstadt contains three Greek churches-that of the Transfiguration, a large wooden edifice, built by Peter the Great, and covered with images ; Trinity church, and St. Andrew's chureh, in the Byzantine style, with a handsome cupola. There are also two Greek chapels, and three other churehes, one each for I,utherans, English, and R. Catholics. Between the two canals stands a handsome palaee, built by Prince Menshikof, now oecnpied as a naval school, and attended by 300 pupils. The other public buildings deserving
of notice are the marime hospital, fitted up with 2500 beds the exchange, custom-house, admiralty, arsenal, barraeks, canon foundry, \&c., and the small palaee in which Peter the Great resided, and in the gardens of which are several oaks planted by his own hand. The shady alleys of the gardens form the prineipal promenade. The harbour lies to the $S$. of the town, and consists of three sections; the military or outer harbour, which is the great naval station of Russia, and is capable of containing 35 ships of the line; the middle harbour properly intended for the fitting out and repairing of vessels and the innermost harbour, running parallel with the last, and used only by merehant vessels, of which 1000 might lie in it. Two-thirds of the external commeree of Russia pass through Cronstadt, although the depth of water at the bar is scarcely 9 ft ., and ice blocks up the harbour nearly five months in the ycar; the shipping season continuing only from May to November. In 1849, the number of vessels that entered the port was 1611 , of which 940 were British; the departures were 1550 , of which 860 were British. For the trade of the port, see St. Petersburg. Cronstadt has constant communica tion with the opposite shores, and steamers now ply regularly between it and the capital. Pop. in winter, not above 6000 , exclusive of the garrison and marine; but including these in summer, not less than 40,000 .

CRONSTAD'T, a gov. and tn. Transylvania. See Kron stadt.

CROOKE, par. Irel. Waterford; 1935 ac. Pop. 814.
CROOKED ISLANDS, an isl. group, N. Atlantic, 23 m E. Long Island, in the Bahamas. It eonsists of Crooked Island, Acklin, and Fortune Islands, and Castle Island, with a number of islets; lat. (S. point Castle Island) $22^{\circ} 7^{\prime} \mathrm{N}$. lon. $74^{\circ} 21^{\prime} \mathrm{W}$. Croked Island is the principal one of the group, and at its W. point has a town called Pitt's Town. It also contains an extensive salt water lake. Pitt's Town has a custom house, and post-office, where the Bahama mail is left, and taken up by the Jamaica packet. Supplies are scarce and dear; but a stock of turtle is at all times kept in ponds.

CROOKED LAKE.-1, A small lake, N. America, on the boundary between the U. States and Upper Canada; lat $48^{\circ} 7^{\prime} \mathrm{N}$. ; lon. $91^{\circ} 50^{\prime} \mathrm{W} .-2$, A lake of the U. States, New York, 175 m . W. Albany. It is 18 m . long, and from 1 to $1 \frac{1}{2} \mathrm{~m}$ broad, and is connected with Seneca lake by a canal 6 m . long.

CROOKHAVEN, a maritime vil. Ireland, co. of, and $60 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Cork. It has a parish chureh, and several schools; and exports some wheat, oats, pork, and butter. Pop. 395.

CROOM, a post tn . and par. Ireland, co. of, and 11 m S.W. Limerick. The town, on l. bank, Maig, over which is a handsome bridge of six arches, consists of two principal streets, with smaller ones branching off. It has a parish church, a R. Catholic ehapel, a school, and private academy. Inhabitants chiefly engaged in agriculture. Area of par 13,437 яе. Pop. 7097; of tn. 1470.

CROOME, three pars. Eng. Woreester:-1, ( $d^{\prime}$ 'Abitot $)$ 1510 ac. Pop. 119.-2, (Earls); 1650 ac. Pop. 194.-3, $(-$ Hill $) ; 840$ ac. Pop. 201.

CROPREDY, par. Eng. Oxford; 7820 ac. Pop. 2727.
CROPTHORN, par. Eng. Worcester; 3520 ac. Pop. 732.
CROPWELL Bishop, par.Eng. Notts; 1380 ac. Pop. 533
CROSBY, three pars. Eng. :-1, (Garret), Westmorland; 4580 ac. Pop. 274.-2, (-Ravensworth), Westmorland 15,460 ac. Pop. $909 .-3,(-u p o n-E d e n)$, Cumberland; 3590 ac Pop. 403.

CROSCOMBE, par. Eng. Somerset; 1420 ae. Pop. S04.
CROSS, or La Crosse, a lake, British N. America. It receives the Beaver, and is about 20 m . long N. to S . Fort la Crosse is situate on its W . side, in lat. $55^{\circ} 25^{\prime} \mathrm{N}$.; lon. $108^{\circ} \mathrm{W}$.

CROSS, a river, W. Africa, Upper Guinea, which falls into the estuary of the Old Calabar river, in the Gulf of Biafra.

CROSS and Burness, par. Seot. Orkney; 2500 ac. P. 983.
CROSS CAI'E, two headlands :-1, On the coast of liussian America; lat. $57^{\circ} 56^{\prime}$ N.; lon. $136^{\circ} 27^{\prime}$ W. (r.) 2, W. coast, Africa; lat. $21^{\circ} 50^{\prime}$ S.; lon. $13^{\circ} 57^{\prime}$ E. (r.)

CROSS SOUND, a strait on the coast of Russian A merica, which separates on the N. the archipelago of King George 1II. from the continent ; lat. $58^{\circ} 11^{\prime} \mathrm{N} . ;$ lon. $136^{\circ} \mathrm{W}$. It is about 60 m . long, and 20 broad, and is entered on the $W$. between Cape Spencer on the N., and Cape Cross on the S. It was discovered by Cook in 1778.

CROSSAKEEL, a post tn . Ireland, co. Meath, 6 m . S.W. by W. Kells; containing a handsome parish church, a school, and dispensary. Pop. 316.

CROSSBOYNE, par. Irel. Mayo; $16,234 \mathrm{ac}$. Pop. 6702.
CROSSERLOUGH, par.Irel.Cavan; 16,437 ac. P.10,466.
CROSSHAVEN, a vil. and harbour, Ireland, co. of, and 10 m . S.E. Cork, in Cork harbour. The honses are small, but well built. Fishing, once the staple trade, has of late years declined greatly. Pop. 549.

CROSSMAGLEN, a vil. Ireland, co. Armagh, $10 \frac{1}{2} \mathrm{~m}$. S.W. Newry. It contains a handsome R. Catholic chapel, and a dispensary ; is a constabularly police station; has a weekly market for provisions; and fairs for cattle, horsea, sheep, and pigs. Pop. 546.

CROSSMICHAEL, par. Scot. Kirkcudbrigbt; 41 m . by $3 \frac{1}{2} \mathrm{~m}$. Pop. 1321.

CROSSMOLINA, a par, and market tn., lreland, co. Mayo. The town, 7 m. W. by S. Ballina, on the Deel, over which is a stone bridge, consists of one principal, and two minor streets, and contains a chureh, and Methodist chapel. Near the former are the remains of an old castle. Area of par. $67,201 \mathrm{ac}$. Pop. 12,221; of tn. 1672.

CROSSPATRICK, par. Irel. Wexford and Wicklow; 4648 ac. Pop. 1506.

CROSTHWAITE. par. Eng. Cumberland ; 58,330 ac. Pop. 4750.

CROSTON, a par. and vil. England, co. Lancaster; $11,030 \mathrm{ac}$. The village, on the Yarrow, $6 \frac{1}{2} \mathrm{~m}$. W. Chorley, consists, for the most part, of indifferent brick houses. It has a fine old parish church, two Wesleyan chapels, a free grammarschool, a school of industry for girls, and a dame's school. People chiefly employed in agriculture, and in hand-loom weaving. Pop. 3939.

CROSTWICK, par. Fing. Norfolk; 550 ac. Pop. 147.
CROSTWIGHT, par. Eng. Norfolk; 710 ac. Pop. 69.
CROTON, a river, U. States, from which the city of New York obtains its supply of water, by an aqueduct commencing 5 m . above its mouth. It rises in the state of New York, on the borders of Connecticut, and, after a winding S.W. course of 36 m ., falls into the Hudson 40 m . above the city of New York.

CROUCH, a navigable river, England, co. Essex, which rises near Bellericay, flows from W. to E., and falls into the German Ocean N. the island of Foulness, after a course of about 24 m . At its mouth are productive oyster beds.

CROUGHTON, par. Eng. Northampton; 2620ac. P.472.
CROULIN ISLES, an isl. group, Scotland, co. Ross, off its W. coast, and at the month of Loch Carron. affording some pasturage. They are-Cronlin More, the largest; 1 in . long; Cronlin Beg, St. Rufus, and Namba, or the Cow.

CROWAN, par. Eng. Cornwall; 7340 ac . Pop. 4638.
CROWCOMBE, par. Eng. Somerset; 3220 ac. Pop. 673.
CROWELL, par. Eng. Oxford; 1160 ac. Pop. 169.
CROWHURST, two pars. Eng.:-1, Surrey; 2250 ac. Pop. 350.-2, Sussex; 2180 ac . Pop. 326.

CROWLAND, or Croyland, a par. and tn. England, co Lincoln; $12,780 \mathrm{ac}$. The town, $8 \frac{1}{2} \mathrm{~m}$. N. Peterborough, consists principally of four streets, connected by a curiously constructed ancient bridge, one of the most singular architectural relics of antiquity in the kingdom, and known as the triangular bridge. On one of the wings is a statue of Alfred, ur, as has been affirmed, of Ethelbald, King of Mercia, supposed to be of the ninth century, now much dilapidated. The streets are straight, and kept in good order; houses pretty well built, of brick and stone; well supplied with water. Here are the interesting ruins of an old abbey, part of which is now used as the parish church. It is partly Norman, and partly Gothic, was founded by Ethelbald, frequently destroyed, and as frequently rebuilt, each time with greater splendour than before. There are also places of worship for W'eslegans and Latter-day Saints; several day schools for boys; and a steam flour-mill. The inhabitants are principally occupied in dairy hasbandry, in rearing geese, and in fowling and fishing. Pop. (1851), 3178.-(Local Correspondent.)

CROWLE, par. Eng. Woreester; 1640 ac. Pop. 526.
CROWLE, a par. and tn. England, co. Lincoln; 7350 ac. The town, 28 m . N.N.W. Lincoln, stands on a plain, nearly surrounded by moorland, which has undergone the fertilizing process of warping from the Trent and Ouse. It consists of
six principal streets, well kept, and well built of brick; supply of water abundant. The town, which is rapidly increasing, has, in many respects, greatly improved within the last few years; and has a church, of the time of Henry I.; four dissenting chapels, three private schools, and an endowed school for poor children. Flax is extensively manufactured, and gives employment to a great proportion of the people. Pop. 2544.-(Local Correspondent.)

CROWMARSH-Gifforn, par. Eng. Oxford; 480 ac. Pop. 330.

CROWNTHORPE. par. Eng.Norfolk; 520 ac. Pop. 111.
CROXBY, par. Eng. Lincoln; 1690 ac. Pop. 106.
CROXDEN-with great-Yate, par. England, Stafiord; 2400 ac. Pop. 293.

CROXHALL, or Croxall, a par. and vil. Eng. Derby ; 3160 ac. Pop. 258.

CROXTON, five pars. Eng.:-1, Cambridge; 1901 ac. Pop. 264.-2, Lincoln; 1630 ac. Pop. 105.-3, Norfolk; 3450 ac. Pop. 330.-4, (-Keyrial), Leicester; 3900. Pop. 650.- 5 , (South), Leicester; 1760 ac. Pop. 297.

CROY and DALCROSS, par. Scot. Inverness; 44,800 ac. Pop. (1851), 1038.

CROYDON-cum-Clapton, par. Eng.Cambridge; 2655 ac. Pop. 441.

CROYDON, a tn. and par. England, co. Surrey, both pleasantly situate on the border of Banstead Downs. The Town, which is $9 \frac{1}{2} \mathrm{~m}$. S. London, consists of one long street, and several smaller. The houses are mostly substantial and well built, and many of the more modern bandsome. The streets are paved, lighted with gas, and the supply of water is ample. In the immediate vicinity are several mansions, with parks and pleasure-grounds, numerous detached residences, and ranges of neat dwellings. The church, an aucient building, is spacious and elegant, built of freestone and flint, in the later English style, having a lofty embattled tower, with crocketed pinnacles. It contains many fine and interesting monuments. Two additional churches were erected in 1827-9, one of which is a handsome edifice, also in the later English style. There are places of worship, besides, for Baptists, Independents, Wesleyans, and the Society of Friends. The educational institutions comprise a free school, a British and foreign sehool, a school of industry for girls, a national, and Society of Friends schools. The charities are-an hospital, several almshouses, and a charity school. The public buildings, exclusive of the churehes, are the townhall, a handsome structure, surmounted by a cupola; a commodious barrack, a jail, and a markethouse for butter and poultry. The principal trade of the place is in corn; there are also several breweries, and some calico-printing and bleaching; but these latter branches of business have greatly declined of late years. One of the most interesting objects in Croydon, is the remains of the ancient archiepiscopal palace, for a long time the chief residence of the archbishops of Canterbury. It was originally built of timber, but no part of the present structure is older than the 14th century. Queen Elizabeth and her court were more than once entertained here in great splendour, by the archbishops of the time. The salubrity of the air, and the convenient distance from the metropolis, renders Croydon a favourite retreat for merchants and retired tradesmen. It is one of the stations on the London and Brighton Railway, at the junction with the latter of a branch line to Epsom. Area of par. 9840 ac. Pop. 16,712; of which the town contains about 10,000.

CROYLAND, a th. Lincolushire. See Chowland.
CROZET ISLANDS, a group of four small islands, in the S. Indian Ocean, between Kerguelen and Prince Edward islands. They are ranged in the form of a crescent, at short, and nearly equal, distances from each other. The most E. called East Island, is placed by Sir James Ross in lat. $46^{\circ} 27^{\prime}$ S.; lon. $52^{\circ} 14^{\prime}$ E., which is considerably N.E. of its present position on our maps, where it is represented as in lat. $47^{\circ} \mathrm{S}$.; lon. $48^{\circ}$ E. On this subject, Sir James says. 'Although arrived near the position on our charts of Crozet's group of islands, we could see nothing of them, and I should have lost much time in the scarch, had I not, fortunately, before leaving the Cape of Good Ilope, obtained a more accurate account of their situation from a merchant of Cape Town.' The islands are called, respectively, Penguin or Inaccessible Island, Pig Island, Possession Island, and East Island. They are all of
volcanic origin, and present, generally, the peculiar characteristics of such formation, being composed chiefly of lofty, black precipitous rocks, exhibiting in some instances basaltic columns, and the appearance of extinct craters. Possession Island, the largest and most a vailable of the group, is believed to be about 20 m . long, and 10 broad, with three bays on its E. side, in which ships may anchor. The W. side is un approachable, on account of the heavy swell that constantly rolls in upon its shores. The three bays above alluded to, are called, respectively, America Bay, Lively Bay, and Ship Bay. All of them afford protection from the prevailing winds; but in the case of an E. wind, the latter two must be immedately evacuated, as in the first only is there room for a ship to beat out, while to attempt to ride out an E. gale in any of them is all but certain destruction. America Bay is a favourite station with sealers, parties of whom frequently reside there for months together, subsisting on a species of small rock fish, albatross eggs, which are above a pound in weight, and said to be excellent eating; young albatross, also described as delicious food; wild ducks, goat flesh, and the tongue and flippers of the sea elephant (Macrorhinus proboscideus), all of which are to be had in great abundance, and with little tronble. Though presenting from the sea the appearance of a perfect mountain mass of volcanic land, Possession Island has some patches of good soil, in which the sealers, whom Sir James Ross found there, had no doubt potatocs and vcgetables would thrive well, the temperature never being very low. Penguin Island, so called from the countless multitude of birds of that name with which it is covered. is a mere rock, without any appearance of vegetation; its shores are inaccessible, no point on which a landing could be effected being visible: and its summits terminate in curiously shaped pinnacles. Pig's Island, the most W. of the group, presents a more attractive appearance. In 1834, Captain Distance left some pigs on this island, which have so increased, that, according to the sealers, it is difficult to land for them, they having completely overrun the island, whence its name. Great numbers are every year killed by the sealers, not only for present subsistence, but salted down for supplies on their voyages to and from the Cape of Good Hope. East Island is about 3 or 4 m . in diameter, and of great height, its loftiest pinnacles attaining an elevation of at least 4000 ft ., and the precipices of its shores in some places rise several hundred feet perpendicular from the sea.-(Capt. Sir James C. Ross's Voyage to the Southern and Antarctic Regions in 1839-43.)

CROZON, a com. and maritime tn., France, dep. Finistère, 9 m . S. Brest, on the S. coast of the peninsula that separates the Bay of Douarnenez from the roadstcad of Brest. It has a smail port, and the inhabitants engage in the pilchard fishery. One of the outer ports. intended to defend the approaches to Brest, is situate on the territory of that town. On the coast are some remarkable caves, inlabited by cormorants and sea fowl. Pop 8576.

CRUAGH, par. Ircl. Dublin; 4460 ac. Pop. 979.
CRUCES, a tn. New Granada, Isthmus of Panama, 1. bank, Chagres, and nearly equidistant from the Atlantic and Pacific. In 1670, it was sacked and burned by Morgan, the English pirate.

CRUDEN, par. Scot. Aberdeen; 11 m. by 7 m. Pop. 2349.
CRUDWELL, par. Eng. Wilts; 4820 ac. 1'op. 681.
CRUICETOWN, par. Irel. Meath; 1863 ac. Pop. 432.
CRUIT ISLAND, an isl. Ireland, co. Donegal, off the N.W. coast, from which it is separated by a narrow strait; lat. (S. point) $55^{\circ} \mathrm{N}$. ; lon. $8^{\circ} 23^{\prime} \mathrm{W} \quad$ It is about 3 m . N. to S., by 1 to $1 \frac{1}{2} \mathrm{~m}$. broad.

CRUMLIN, par. and tn. Irel. Dublin; 1817 ac. Pop. 102 \&.
CRUMLIN, $a \mathrm{tn}$. Ireland, co. of, and 7 m . S. by E . Antrim, pictrresquely situate, 1. bank, Camlin, about $2 \frac{1}{2} \mathrm{~m}$ from its mouth, in Lough Neagh. It consists of two streets, at right angles to each other, one of them long and wide, and both kept in excellent condition; houses generally substantially built of stone; abundant supply of excellent water. It has two Presbyterian charches, one of which is a handsome structure, in the Mediæval style; two numerously attended schools, a dispensary, and a literary and scientific institution. In the neighbourhood are extensive flour and oatmeal mills; but the town las little trade of any kind. The poorer class work as labourers, and many of the females are employed at sewed muslin work. Pop. 641.-(Local Correspondent.)

CRUMMOCK WATER, a small lake, England, co. Cumberland, 8 m . W.S.W. Crosthwaite, 3 m . long by $\frac{1}{2} \mathrm{~m}$. broad.

CRUNDALE, par. Eng. Kent; 1530 ac. Pop. 278.
CRUNWEAR, par. Wales, Pembroke; 2000 ac. P. 282.
CRUW Ys-Morchard, par. Eng. Devon; 6290 ac. P. 670. CRUX-Easton, par. Eng. Hants; 950 ac. Pop. 102.
CRUYBEKE, a vil. and com. Belgium, prov. E. Flanders, 14 m. N.E. Dendermonde. The church, a Gothic structure, is surmounted by a very lofty tower, and adorned within with sculptures, rich ornaments, and some good pictures. In the neighbourhood is a fine Gothic château. The chief manufacture is wooden shoes, of which 130,000 pairs are annually made. The trade in corn and other agricultural produce is considerable. Pop. 2811.

CRU YSHAUTEM, a vil. and com. Belgium, prov. E. Flanders, 12 m . S.W. Ghent. Linen weaving employs about 600 looms in this commune; and there are also a gin distillery, a brewery, and numerous mills. Besides a weekly market, there is an annual fair for horses. Near the centre of the commune is an ancient castle, flanked by four towers. Pop. 6769.

CRUZ (Santa) or Saint Choix, the largest and most S. of the Virgin islands, W. Indies, forming, with St. Thomas and St. John, the Danish government of the W. Indies. It lies 65 m . E.S.E. Porto Rico, lat. (E. point), $17^{\circ} 45^{\prime} 30^{\prime \prime}$ N.; lon. $64^{\circ} 34^{\prime} \mathrm{W}$. (r.); and is about 20 m . E. to W., by about 5 m .

broad; area, $110 \mathrm{sq} . \mathrm{m}$. It is generally flat-though a range of low heights follow the line of its N . shore-well watered and fertile; climate at times unhealthy, and temperature varying from $54^{\circ}$ to $72^{\circ}$. Earthquakes and horricanes are frequent. Two-fifths of the island are in sugar-cane plantations, and about one-half is occupied with general crops, only a small portion remaining uncultivated. Some cattle are reared. The capital, and residence of the governor, is Christianstadt; and in the island is another small town, called Frederikstadt. Santa Cruz was discovered by Columbus, on his second voyage; and was, by turns, under the sway of the Dutch, British, Spaniards, and French, who ceded it to Denmark. It was taken by the British, in 1807, and restored to the Danes by the treaty of Paris. The prevailing language is English. Pop. 25,600.

CRUZ (Santa) a tn. Brazil, prov. Goyaz, near l. bank, Pari, 140 m . S.E. Goyaz. It owes its existence to the discovery of gold mines in its neighbourhood, and was settled at an early period-its church being one of the oldest in the provincc. It had at one time acquired considerable importance, but has fallen into decay, and does not now count more than 3000 souls in the whole district, though very extensive. In the vicinity are thermal springs, said to be very efficacious in cutaneous and other affections.

CRUZ (Santa), two tns. Azores islands:-1, Cap. isl. Graciosa. It has no harbour worthy of the name, but merely an exposed roadstead, with a rocky bottom. Pop. 3000.-2, Cap. isl. Flores, E. coast of the island. It lies low, with a hill rising abruptly behind it, and consists chiefly of three streets, running parallel to each other from the sea; houses substantially built of stone, and generally two storics high. The church, a magnificent and spacious structure, through neglect, is fast hastening to decay. There are also a Franciscan monastery, and an old dilapidated fort. Pop. 3000.

CRUZ (Santa), several islands, \&c.:-1, An isl. off the N. coast of Cuba, 30 m . N.E. Matanzas.-2, An isl. Gulf of California, lat. $25^{\circ} 22^{\prime} \mathrm{N}$. ; lon. $110^{\circ} 49^{\prime} \mathrm{W} .-3$, An isl. of the N. Pacific, separated from the mainland of Upper California, by the channel of Santa Barbara, lat. (W. point), $34^{\circ} 10^{\prime}$ N.; lon. $118^{\circ} 47^{\prime}$ W.-4, An isl. S. Pacific, the largest of the Queen Charlotte's archipelago, lat. $10^{\circ} 45^{\prime}$ S.; lon. $163^{\circ}$ $40^{\prime} \mathrm{E}$. Length, $24 \mathrm{~m} . ;$ breadth, 12 . It is of volcanic origin, and has an extremely fertile soil, the principal productions of which are cocoa-nuts, bread fruit, yams, bananas, and plantains. -5 , A group of isls. S.E. coast of Africa, Algoa Bay, lat. $33^{\circ} 50^{\prime}$ S.; lon. $25^{\circ} 40^{\prime}$ E.-6, A cluster of islets, Soloo archipelago, between Basilan and the S.W. point of Mindanao. -7. A tn. and port Philippines, Island Luzon, on bay of same name, 105 m . W. Manilla. Only small vessels can enter.-8, A river, Patagonia, after a rapid E. course, falling into the Atlantic in lat. $50^{\circ} \mathrm{S}$.; lon. $68^{\circ} 30^{\prime} \mathrm{W}$.

CRUZ (Santa) -de-Mudela, a tn. Spain, New Castile, prov. of, and 26 m. S.E. Ciudad-Real, on the E. declivity of Mount St. Roque. The houses, in general, are tolerably well built, and compose wide, clean, and paved streets, and a large square, containing the meat-market and townhouse-the last adorned with a handsome portico. The town also has a capacious parish church, three chapels, five schools, a convent, prison, hospital, storehouse, and cemetery. The male portion of the inhabitants are principally occupied in husbandry, and the females in weaving. A small trade is prose cuted in cattle, grain, wine, oil, fruits, salt fish, \&c. P. 4950.

CRUZ (SANTA) De la Sierra, a dep. Bolivia, bounded, N. by the rivers Beni, Mamore, Itenez, and the Brazilian province, Mato-Grosso; S. by the Pilcomayo and the desert of Grand Chaco; E. by the River Paraguay and the Brazilian possessions; and $W$. by the departments of Cochabamba and Chuquisaca. It lies between the parallels of $12^{\circ}$ and $23^{\circ} \mathrm{S}$., and the meridians of $61^{\circ} 20^{\prime}$ and $72^{\circ} 50^{\circ} \mathrm{W}$., and comprehends the provinces of Santa Cruz, Valle Grande, Cordillera, and Chiquitos. Althongh it reaches the Andes on the W., and includes the mountains of the Chiquitos, this vast territory is, for the most part, a level plain, having an area of $250,000 \mathrm{sq}$. m., or half as large again as that of France. The rivers above named are all navigable, yet this spacious and fertile region lies at present an almost unprofitable waste, owing to its secluded position and distance from the sea. It is divided into four provinces-namely, Santa Cruz, Chiquitos, Valle Grande, and Cordillera, and contains a population of about 190,000 . - The province of Santa Cruz de la Sierra is situate at the E. foot of the Andes, and on the W. side of the department of the same name. It is, throughont, a plain of diluvial sand, free from marshes, though abundantly watered by the Rio Grande, the Piray, and numerous small rivers. All the fruits cultivated in Bolivia, except the orange, grow wild here. In the absence of manufacturing industry, the whole population, which, in 1835, amounted to 15,000 , is engaged in, or dependent on, agriculture. Their exports, chiefly to their neighbours on the west, consist of rice, and other grains; sugar, molasses, tobacco, beef fat, dried meat, and wax, which is gathered in the forests by the Indians. They receive in return hardware, French and English cloths, Indian goods, and maté, or Paraguay tea. The mercantile business of the country is transacted wholly by itincrant traders, chiefly from Chuquisaca and Cochabamba.

CRUZ (Santa) de la Sierra, a to. Bolivia, cap. prov. and dep. of same name, lat. $17^{\circ} 24^{\prime} \mathrm{S}$. ; lon. $62^{\circ} 20^{\prime} \mathrm{W}$. ; r. hank, Piray [Pira-y, in Quichua-Fish-river], which here presents, in the dry season, a bed of sand, two miles wide, with a small stream winding through it. The city is in the midst of forests, 300 m . E. Cochabamba, and 250 W . the nearest mission of the Chiquitos. The houses are bnt one story high, built partly of timber and partly of earth, with large balconies, and uneven roofs, made of the Carondai palm. The windows are not glazed; the streets, unpaved, are filled knee deep with fine sand. Neither within the houses nor without does there seem to be any attention paid to comfort. Even the simplicity of the ladies' costume is, to European eyes, uncomfortable. The original site of Santa Cruz is $3^{\circ} \mathrm{E}$. of the present city, at the foot of the sierra de la Barranca, near the mission of San José. When its inhabitants migrated westwards, at the end of the 16th century, to the village of San Lorenzo de la Frontera, they carried with them the name
of their old dwelling-place; hence the modern Santa Cruz, though far from the mountains, is still entitled 'de la Sierra.' Owing to the absence of the men at distant cattle stations, the women form two-thirds of the resident population, which amounts to about 5000 .

CRUZ (Santa) de Teneriffe, the cap. city, and chief commercial port of the Canary Islands, N.E. coast of isl. Teneriffe, near where the Spaniards first landed, lat. $28^{\circ} 28^{\prime}$ $12^{\prime \prime}$ N.; lon. $16^{\circ} 14^{\prime} 48^{\prime \prime}$ W. (R.) Many of the houses are handsome, and of one and two stories high; but the majority are low. However, as they are white-washed or painted, they present a gay appearance, and give evidence of the neatness and cleanliness of those who inhabit them. The streets are well paved, and provided with footpaths and lamps; and there is a square, surrounded with good edifices, adorned with a colossal statuary group, representing the apparition of the Virgin of Candelaria to the Guanches, the original inhabitants; and having at the extremity, facing the sea, the principal fort, that of San Cristobal. Besides the customhouse and the military hospital, there are scarcely any public buildings, such as usually characterize a capital; and almost all the public bodies hold their meetings in the old Franciscan convent. There are a prison, a poor's-house, two public, and two private primary schools, a drawing-school, and one for navigation; one or two promenades, possessing little attraction, and not much frequented ; several fountains; two parish churches, one of them a magnificent edifice; three hermitages and two cemeteries-one for R. Catholics and the other for Protestants; but the town is almost destitute of artistic ornaments. The harbour, which is very secure, and can easily contain 10 or 12 vessels of war, has a magnificent mole, of modern construction, which juts out far into the sea, and the coast is commanded by four forts and various redoubts. Be sides the construction of boats for fishing, and unloading large vessels that arrive in the harbour, there is no other branch of industry of any consequence, except the making of chairs, tables, and other articles of household furniture, for the home market. Wine, brandy, almonds, and cochineal, are the only articles exported; and the imports consist of English, French, Spanish, and Genoese manufactures. On an average of the two years, 1844 and 1845, the numbers of vessels entering and leaving this port were as follows:-Entered, 242 ; tonn. 17,273;-cleared, 223; tonn. 13,961. Pop. 8070.

CRUZ (Santa)-del-retamar, a tn. Spain, New Castile, prov. of, and $20 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Toledo, on a declivity facing the S.W. It has badly-made and stcep streets, a small square, parish church, four schools, a chapel, townhall, prison, cemetery, and several convents. Charcoal, hats, wine and oil, are manufactured; and some little trade is carried on in cattle and grain. Pop. 1642.

CRUZ (Santa) -de la-Zarza, a tn. Spain, New Castile, prov. of, and 43 m. E. by N. Toledo, between two hills. It possesses a spacious square, two parish churches, a chapel, several convents, two schools, a prison, theatre, and storehouse. The people are mostly engaged in weaving, dyeing, expressing wine and oil, and in husbandry. Pop. 3371.

CSABA [pronounced $T s a b a$ ], a vil. Hungary, the largest in Europe, co. Békéser, on the Körös, 63 m . S.S.W. Debreczin. It contains a R. Catholic and Protestant church, and has a considerable trade in grain, wine, hemp, cattle, \&c. The wine produced in the vicinity is of inferior quality. Pop. 24,600.

CSACZA, or Csattcza, a market tn. Hungary, circle Hither Danube, co. of, and 54 m . N.E. Trentschin, on the S. slope of Mount Jablunka, and r. bank, Kiszucza. It contains a parish church. Pop. 4540.

CSAIKISTEN-Bataillons-District, a dist. Hungary, Military Sclavonia, on the angle formed by the Danube and the Theiss-the former river separating it, on the S., from the military district of Peterwardein, and the latter, on the E., from co. Torontil, while co. Bacs bounds it on the N. and W.; arca, 64 geo. sq. m. It contains a market town and 13 villages. Pop. 30,600 .

CsAKathurdi, Csakovez, or Tsaktornya, a tn. Hungary, co. Szalad, 7 m . N.N.E. Warasdin, on a tongue of land formed by the Tarnova. It contains a R. Catholic church, originally built by the Franciscans, and an old castle, which has recently been thoroughly repaired. Pop. 1680.

CSAKOVA, a tn. Hungary, circle Thither Theiss, co. Temes, 1. bank, Temes, 18 m . S. Temeswar. It contains a Greek and a Protestant church. Pop. 4250.

CSAKVAR, a tn. and lordship, Hungary, circle Thither Danube, co. Stuhlweissenburg, 27 m . W.S.W. Buda. It contains a castle, and a R. Catholic and a Protestant church. Pop. 4840.

CSANAD, two tns. Hungary :-1, A tn. co. same name, on the Marös, 7 m . S.E. Mako. It has a R. Catholic and Greek church, and contains the ruins of the former palace of the bishops-the latter not now residing here-together with those of other old buildings. It was formerly a place of some importance, but has now fallen into decay. A small trade yet remains in honey, wax, fish, \&c. Pop. about 5000 . -2, A tn. co. Torontal, also on the Marös, with a castle, and a R. Catholic and Greek church. Pop. 8000.

CSAN'TAVER, a vil. Hungary, circle Hither Danube, co. Bacs, near Magyar Kanisa. It contains a R. Catholic parish church. Pop. 3186.

CSANY, or Tsany, a vil. Hungary, circle Mither Theiss, co. Heves, not far from Arok-Szallas, and 3 m . from Hatvan. It contains a handsome parish church. Pop. 2175.

CSASZAR, a vil. Hungary, circle Hither Danube, co. Comorn, 8 m . from Tata. It contains a Protestant and a R. Catholic church. Pop. 2388.

CSAT, Csath, or Csatt, a market tn. Hungary, circle Hither Theiss, co. Borsod, 13 m . from Miskolcz. It contains a Protestant parish church. Pop. 5740.

CSEB, a vil. Hungary, circle Hither Danube, co. Bacs, 3 m . from Palanka. It contains a parish church. Pop. 2043.

CSEGLED, or Czegled, a market tn. Hungary, circle Hither Danube, co. Pesth, dist. of, and near Ketskemet. It contains a Protestant and a R. Catholic church; and has a trade in corn and wine. Pop. 12,940.

CSEPEL, or Tsepel, a river island, Hungary, co. of, and immediately S . of Pesth, formed by the Danube; greatest length, N. to $S ., 25 \mathrm{~m} . ;$ average breadth, 4 m . It abounds with game, particularly hares, and hence sometimes bears the name of Haseninsel, or Hare 1sland. It used to form part of the domain settled on the Queen of Hungary at marriage.

CSEI'REGH, or Tschapring, a market tn. Hungary, co. of, and 20 m . S. by E. Ödenburg, on the Repeze. It contains a castle, two churches, a Protestant gymnasium, and a printing press; and has an annual fair. The district around is covered with vineyards. Pop. 1813.

CSEREVICS, a market tn. Ilungarian Slavonia, dist. Syrmia, 11 m . W.S.W. Peterwardein, r. bank, Danube, a bridge over which here gives a communication with co. Bacs. It contains a Greek and a R. Catholic church. Pop. 2010.

CSERNATFALU, or Sent Mimaly, a vil. Hungary, Transylvania, about 5 m . from Kronstadt, on the frontiers of Wallachia. It contains a Protestant, and a Greek non-united church. Pop. 2460.

CSERVENKA, a tu. Mungary, circle Hither Danube, co. Bacs, on the Franzens Canal, about 10 m . from Zombor. It contains a Lutheran and Reformed church. The inhabitants are all Germans. Pop. 2791.

CSETNEK, a tn. and lordship, Hungary, circle Thither Tbeiss, co. Gomor, on the Csetnek, 9 m . W. Rosenau. It contains two parish churches, two schools, and a poorhonse. In the neighbourhood both iron and antimony are worked. Pop. 2500.

CSIKER-Stuhl, a dist. Transylvania, Szekler country, on the borders of Moldavia, and hence forming part of the Military Land. The only town of the least consequence in it is Csik Szereda, the population of which is only 574. The Stuhl, area 960 geo. sq. m., is rich in romantic beauty, but cannot boast of its soil. There is almost no wheat, and even oats and rye will scarcely ripen, the whole district being traversed and broken by ramifications of the Carpathians. Cattle and horses, of inferior breeds, are reared in considerable numbers, and a good deal of timber is floated down by the Marös. Pop. 30,000.

CSIKLOVA-Nemet, or Tschiklowa, a market tn. Hungary, circle Thither Theiss, co. Krasse, in a mountainous district, famous for its copper mines, about 2 m . S.E. Oravicza. It contains a R. Catholic parish church. The inhabitants are chiefly Germans. Pop. 2040.

Vol. 1.

CSOKA, a market tu. Inngary, circle Thither Theiss, co. Torontal, dist. of, and about 5 m . from Torok-Kanisa, on the Theiss, over which there is here a ferry. It contains a chapel. The inhabitants are chiefly Raitzen. Pop. 2640.

CSOKONYA, a market tn. Hungary, circle Thither Danube, co. Sumegh, dist. of, and 6 m . S.W. Babocsa. It contains a Protestant and a R. Catholic parish church. A good deal of flax is grown herc. Pop. 1530.

CSONGRAD, a market tn. Hungary, circle Hither Theiss, 72 m . S.E. Pesth, cap. co. of same name, at the junction of the Theiss with the Körös. The houses are built chiefly of mud, and thatehed. The inhabitants live mainly by rearing cattle, and by their vineyards. Pop. 13,686.-The county is bounded, N., by cos. Heves, great Kumania, and Bekes; W. Bekes Torontal; S. ©sanada, and E. Bekes and Csanada; area, 1008 geo. sq. m. There is scarcely a hill throughout the county, which is so uniformly flat, that a steeple of moderate height commands a view of the whole surface. The principal rivers are the Theiss, Körös, and Marös. The soil is remarkably fertile, and produces in abundance wheat, maize, hemp, tobacco, and fruit, including grapes, apples, pears, and water-melons. The meadows and pastures also are excellent, and depasture great numbers of horses, cattle, sheep, and swine. Land tortoises, game, and fish abound. The inhabitants are chiefly Magyars, with some Servians, Germans, and Russians. Pop. 137,000.

CSORNA, a market tn . Hungary, co. of, and 32 m . E. Ödenburg. It contains a Premonstratensian abbey, founded in 1181, richly endowed, and surrounded with fine gardens. Pop. 3990.

CSURGO, a tn. Hungary, circle Thither Danube, co. Sumegh, at a short distance from the Drave, 27 m . S.S.W. Martzali. It contains a Protestant and a R. Catholic parish church, a gymnasium, and a castle. Much wine is produced in the district.

CUB (North and South), two isls. N. America, James's Bay. The N. in lat. $54^{\circ} 25^{\prime}$ N.; lon. $80^{\circ} 50^{\circ}$ W.;-the S. in lat. $53^{\circ} 42^{\prime} \mathrm{N}$; ; lon. $80^{\circ} 30^{\prime} \mathrm{W}$.

CUBA, an isl. belonging to Spain, the largest of the Antilles or West Indian group, at the mouth of the Gulf of Mexico. It is about 130 m . S. from Florida, from which it is separated by the Bahama Channel; E., it is separated from Hayti by the windward passage, about 48 m . wide; S., from Jamaica, by a portion of the Caribbean Sea, 95 m . across; and W., from Yucatan, by the Yucatan Channel, about 130 m . wide; and is, probably, about a third larger than Hayti, and nearly five times the size of Jamaica. It extends from lon. $74^{\circ}$ to $84^{\circ} \mathrm{W}$., and is about 750 m . in length from E. to W .; greatest breadth, at Cape de Cruz, 120 m ; average width, from 50 to 60 in , while towards its W. extremity it does not exceed 30 m . The extreme E. end of the island, Point de Maysi, is in lat. $20^{\circ} 15^{\prime}$ N. ; lon. $74^{\circ} 7^{\prime}$ W. (k.) ; the W., San Antonio, in lat. $21^{\circ} 15^{\prime} \mathrm{N}$. ; lon. $84^{\circ} 57^{\prime} 12^{\prime \prime}$ (R.); and S. to N., it extends from lat. $19^{\circ} 50^{\prime}$ to $23^{\circ} 10^{\prime} \mathrm{N}$. Area, 43,000 sq. m ., of which it is supposed abont one-seventh is under cultivation and in pasture. Coast line, exclusive of minuter sinuosities, about 1600 m .

General Description.-The island is intersected longitudinally by a range of mountains, diminishing in height from E. to W. At the E. end, where they are diffused over nearly the entire surface, they attain their greatest elevation, abont 8000 ft . From the bases of these high lands, the country opens into extensive meadows, or beautiful plains and savannas, with occasionally some low swampy tracts. Owing to the cavernous structure of the limestone deposits, the great inclination of their strata, the small breadth of the island, and the frequency and nakedness of the plains, there are very few rivers of any magnitude, and a large portion of the territory is subject to severe droughts. Yet the undnlating surface of the country, the continually renewed verdure, and the distribution of vegetable forms, give rise to the most varied and beautiful landscapes. Everywhere, however, the eye falls only upon a mass of luxuriant vegetation; and nowhere is the structure of the country to be seen, except on scarped, treeless mountain slopes. The largest river in Cuba is the Cauto, at the E. end of the island, having its sources in the sierra del Cobre or Copper Mountains, and falling into the Bay of Buena Esperanza, after a course altogether of about 90 m . None of the streams are navigable, excepting by small boats, and for
but a few miles inland. The coasts of Cuba are in general exceedingly foul, presenting reefs and shallows, which extend from 2 to $2 \frac{1}{2} \mathrm{~m}$. into the sea, and make the approach to the land both difficult and dangerous. Within these reefs there is often a good sandy beach, but for the greater part of the circumference of the island, there is a belt or zone of low land very little raised above the level of the sea, subject to floods and inundations, and so wet at all seasons of the year, as to be constantly in a state approaching to mud, rendering the access to the coast, and the ordinary communication between the interior and the sea, next to impossible in the rainy season, and not very easy during any month in the year. There are, however, a considerable number of harbours, ports, and bays, on all the coasts, including the Havanna, one of the finest larbours in the West Indics. Many of the others are also excellent, such as Guantanamo, Santiago, Manzanillo, and Jagua on the S. coast, Bahia Honda, and Puerto de Cabanos on the N.W. coast, and Baracoa harbour, port Naranjo, Puerto del Padre, and Matanzas on the N. and N.E. coasts.
Geology and Mineralogy.-Geologically, the island of Cuba may be shortly described as composed of granite, gneiss, syenite, and euphotide, overlain by secondary and tertiary formations, chiefly calcareous, containing numerous fossils, and through which the primitive rocks are often protruded. The mountains of the S.E. part of the island appear to have a submarine connection with the heights of Hayti and Jamaica; and in this part of the island earthquakes are frequently felt, though they rarely extend to the W. part. In some localities the limestone is exceedingly porous and cavernons, absorbing rapidly the tropical rains, and even engulfing considerable rivers. The latest calcareous formation is entirely coraliferous, and goes on at present accumulating on all the coasts, and contains numerous animal remains. No traces of volcanic cruption, properly so called, have hitherto been discovered.
The mineral riches of Cuba have not yet been fully explored, but it is known to be not deficient in this respect. The precious metals have been found in it, but not in sufficient quantity to repay the cost and labour of working. Copper is more abundant, there being several extensive mines of this metal in active operation in the sierra del Cobre. The average produce of these mines is about 27 per cent., but some specimens have yielded as high as 53 per cent. They were wrought by the Spaniards at an early period, but had been abandoned for upwards of a century, when they were re-opened about 1828. Mines of alum and copperas were also at one time worked in the mountains of Juragua, but were speedily abandoned. Coal has recently been discovered near Havanna. A variegated serpentine marble, chalcedony, magnesia, iron pyrites, quartz, and feldspar slates and schists have been found in various places. The schistose formation shows itself most conspicuously at the base of the mountains of San Juan and Trinidad, where great masses of slate are to be found, of a dark blue colour, and of a pyritous and bituminons quality. In the quarries near the Havanna, a thick slate is found, fit for floors and pavements. The mineral bitumen spoken of, exhibits itself under a variety of aspects, sometimes in a liquid state, like naphtha, issuing from the fissures of the rocks; sometimes soft, like wax, or half melted resin. There are several mineral springs in different parts of the island, and on the N. coast are extensive lagoons, which, in dry years, produce immense quantities of marine salt.

Climate, Soil, Vegetable Productions, \&e. -The climate is hot and dry during the greater part of the year, but is, on the whole, more temperate than that of some other islands in the same latitude. The mean temperature is $78^{\circ} 3^{\prime}$, but in the interior only $73^{\circ} 4^{\prime}$. The hottest months, July and August, do not give a greater average than $83^{\circ} 8^{\prime}$; and the coldest, December and January, present the mean of $69^{\circ} 8^{\prime}$. In summer, the thermometer does not rise above $82^{\circ}$ or $86^{\prime}$, and its depression in winter so low as $50^{\circ}$ or $53^{\circ} 5^{\prime}$ is rare. Rain often descends in torrents, from July to September, and occasional showers fall for a month or two before and after these periods. In December and January, the air is much cooled by the N. winds. No snow is known ever to fall on the lighest mountains ; but frost occurs occasionally, forming ice of several lines in thickness. Hail storms are rare, and hurricanes much less frequent than in the other Antilles. The vegetation of Cuba is exceedingly luxuriant. Forests of malogany, ebony, cedar, fustic, and other useful woods,
abound; and the fields are covered with flowers and odoriferous plants. The principal cereal cultivated is the indigenous maize, or Indian corn. Two crops of it are obtained in the year. Rice is also produced in considerable quantities in many distriets; but the principal crops are sugar, coffee, and tobacco, also a little cotton, cocoa, and indigo. A considerable extent of country is appropriated also to cattlebreeding farms, of which there are 7339 in the island, and to potreros, farms on which vegetables are raised, maize, mallochia grass, cassava. onions, garlic, poultry, wax, and honey.
The principal fruits of the island are the pine or ananas, oranges, shaddocks, plantains, bananas, melons, lemons, and sweet limes; figs and strawberries are also to be had.
Animals.-The most valuable domestic animals are the ox, horse, and pig, which form a large proportion of the wealth of the island; the sheep, goat, and mule, are inferior in quality and numbers. Jackasses and rabbits have been recently introduced, and dogs and cats are numerous. The domestic fowls comprise the cocks and hens of Europe, geese, turkeys, pigeons, and peacocks. The sylvan birds are numerous, and in great variety; but birds of prey few; the principal is the bald-headed vulture, or turkey buzzard. Sand crabs swarm in some places. The only indigenous quadruped ever known in Cuba is the huitia, which resembles a large rat, about 18 inches long, without the tail. Snakes and reptiles are not very numerous. The most remarkable are the maja, 12 or 14 ft . in length, and 18 or 20 inches in circumference; and the juba, about 6 ft . in length; the latter is considered more dangerous than the former, and is also more common. Phosphorescent insects abound, as do also those of a noxious description, including jiggers, ants, mosquitoes, and a singularly disgustinglooking spider, with a poisonous sting. There are also centipedes and scorpions. The shores abound with turtle, and in the deep gulfs and bays the crocodile and cayman are found, the latter more especially where the water is stagnant. The manati is met with in the deep pools of fresh water, and the iguana, a sort of lizard, on the banks of streams, bays, and lagoons. Fish are said to be abundant, particularly on the N. coast, but no fishery of any note has been yet established.

Agriculture, \&cc.-As elsewhere mentioned, sugar, coffee, and tobacco form the principal objects of cultivation, but of these the first is by far the most important. The quantity of sugar produced in Cuba, per acre, is estimated at a little more than 2000 lbs., being somewhat better than Jamaica, but greatly short of Barbadoes. The coffee plantations are confined almost solely to the N . side of the island, the only part where the precise degree of heat most favourable to the growth of the plant is to be found. The best season for planting the trees is in the iniddle of the month of May; the gathering commences in August; but November and December are the most active and important montlis of the harvest. The buildings on a coffee estate in Cuba are generally of a very humble description, and the circumstances of the pro prietor, in most instances, inferior to those of the sugar grower. The export of coffee from Cuba, unlike that of sugar, is on the decline. The best tobacco is grown in the district of Vuelta de Abajo, a little W. of the Havanna, about 84 m. in length, and 21 in breadth, and here the mildest and finest flavoured is produced on the banks of the San Sebastian, most of whieh is made into cigars, celebrated under the name of Havanna cigars, reckoned the best made anywhere. Previously to 1820, the cultivation and sale of tobacco were subjected to the same sort of monopoly in Cuba as in Mexieo; but, at the period referred to, the trade was thrown open. The cattle-breeding farms of Cuba are said to be by no means in a prosperoue condition. They are generally let with the stock upon them, at the rate of two or three dollars a head. for a term of five years, with an obligation to leave the property in good condition, and to account for the stock which was on it when let; all the increase during the term belonging to the tenant. The number of these farms, as elsewhere stated, is 7339 .

Manufactures, Commerce, \&c.-The manufactures of Cuba are confined to the naking of sugar, molasses, and cigars, bleaching wax, and the preparation of coffee. The cigars the lower orders smoke-and in Cuba every one smokes, man, woman, and child-cost about four dollars or $16 s$. per 1000. From the same quality of tobacco the first, second, and third class of cigars are made. When the cigars are twisted, and
before they are sorted, they are said to be 'en revolucion.' They are now sorted and picked, and about 25 per cent. of the whole are chosen, and these are called of the first class; the rest are divided into seconds and thirds, and the prices vary from 8 to 15 dollars per 1000 . The commerce of Cuba cannot be said to be at present in a flourishing condition, the exports of both coffee and tobacco having greatly declined of late years, although sugar appears to be on the increase. The chief imports are grain and flour, salted meats, salted fish, cheese, brandy, vinegar, wines, spices, fruits, and cotton, linen, and woollen manufactures, of which, to the value of $£ 273,923$ were imported from the United Kingdom, in the year ending March 22, 1848. The exports are sugar, coffec, molasses, tobaeeo, mahogany, cedar, fustic, and other valuable timbers, fruits, and the precious metals. From 1841 to 1848, both inclusive, there has been, with exception of the years 1842 and 1845 -the latter a year of great drought-a steady increase in the quantity of sugar exported from the two principal ports, Havanna and Matanzas. 'The other licensed ports are Cardenas, Mariel, Trinidad, Cienfuegos, Neuvitas, Santa Cruz, San Juan de los Remedios, Sancti Spiritu, Sagua la Grande, Santiago, Gibarra, Manzanilla, and Barracoa.

The gold coins are the doubloon or ounce and its subdivisions. The doubloon is worth about 10 dollars or $\mathfrak{£} 3,10 \mathrm{~s} .10 \mathrm{~d}$., but varies in price according to weight, and sometimes demand. The principal weights and measures are the pound, equal to about 1 lb .4 oz . avoirdupois, making 100 lbs . or libras, equal to 101 lbs .7 oz . avoirdupois. The vara is equal to 33,384 inches, or 108 varas $=100$ yards. The fanega is equal to three bushels nearly, or 200 lbs . Spanish. The arroba, of liquid measure, is equal to 4245 gallons.

The roads in Cuba, formerly in a most wretched condition, have latterly been much improved; and the internal traffic of the island is now facilitated by the laying of railways, of which no fewer than 10 have been opened in the course of as many years. The first, from Havanna to Guines, a distance of 46 m . by railway, was opened in 1837 . Steam vessels also ply between Havannah and other parts of the coast. No foreigner can land on the island without procuring the security of a native of responsibility for his good behaviour.

Slave Trade, \&c.-It has been a general impression that the slave trade of Cuba, notwithstanding the treaty with Spain for its abolition, has been not only connived at, but protected by the Spanish government. It is at any rate certain, that the degree of encouragement it meets with depends much, if not entirely, on the disposition of the captaingeneral of the island for the time being. The slave trade papers, for $\mathbf{1 8 4 6}$, report that the Cuban slave trade was almost annihilated under the honourable administration of Captaingeneral Valdez. But it soon after revived under another governor, and ultimately attained a height which it liad never reached before, carried on prineipally under the American flag. In 1844 , no fewer than 10,000 slaves were introduced into Cuba, and this was under the governorship of General Valdez; previous to that period, and since then, this number has been more than doubled. At present, the number of slaves in Cuba is estimated at about 500,000 ; although, there can be no doubt that a large portion of them are wrongfully held in bondage, there being a Spanish law to the effect that every negro brought into Cuba, after a specified date, should be ipso facto free. The Spaniards have obtained credit for treating their slaves with extraordinary humanity and kindness; but of this credit, both Mr. Turnbull, who visited Cuba in 1838, and Mr. Madden, who did the same thing about ten years later, would deprive them-both declaring, in very nearly the same words, that it is a gross mistake, as regards, at any rate, the field negro, whom they allege to be treated with the utmost cruelty, and generally with a rigour unsurpassed, if not unequalled, in any other slave-holding country, their kindness being reserved wholly for the domestic slaves, who bear but a small proportion to those employed in out-door work. It is very possible that the accounts of both Mr. Turnbull and Mr Madden, of the severity with which the field negroes of Cuba are treated, may be exaggerated; but even after every reasonable deduction is made on this score, sufficient will be left to render the vaunted

The whole amount of sugar produced in the island for 1847 , was estimated at 265,000 tons; and for 1848 , at 280,000 . The export of coffee from Cuba has, as already mentioned, greatly fallen off. In 1837 it amounted to 476,309 cwts., which, iis 1848 , was reduced to 158,145 cwts. In 1847 , there were exported from Havanna 860,430 tons of leaf tobacco, which was less than half the quantity exported in 1846 . But in 1848 , the quantity fell to 600 tons. Of cigars, in 1847, there were exported 198,268 bundles of 1000 eaeh, which fell, in 1848 , to 150,729 bundles, with the prospect of this depression continuing. Money accounts are kept in dollars, reals, and maravedis, respectively worth about $4 \mathrm{~s} .2 \mathrm{~d} ., 6 \frac{1}{4} \mathrm{~d}$., and 0.47 d .; the dollar being divided into 8 hard reals or 34 maravedis.

[^0]humanity of the Spaniard to his slave exceedingly questionable The slaves of Cuba, like nearly all other negroes, are remarkably addicted to their dances, and fond of dress. Their cottages are thatehed with palm-leaves, with walls of poles, and mud plastered thickly on them to fill up the interstices, the floors being of the latter material, and often not higher than the ground without. They contain little furniture-a table, one or two stools, a cot, and a few plates or jugs, compose all the household articles; while women, dressed often in a single gown, half open, and half off their shoulders, and squalid, dirty, naked children, form the family group. The hut, however, is tastefully shaded by groups of eocoas or other trees, and surrounded by plantains, and orange and lemon trees.

Education, Religion, \&cc.-The sehools of Cuba are generally under the iuspection and eontrol of the patriotic and economic societies, the superiors of convents, and some public bodies.

## CUBA

780
CUDDALORE

The total number of persons empleyed in giving primary instruction in the island, is estimated at about 417; and pupils, 8442 . In 1827, the white and coloured children were estimated to amount to 119,519 , of whom 104,440 were believed to be destitute ot primary instruction. In writing, the Roman character is generally in use. In the country parts, the most profound ignorance reigns; the master and the servant, the agricultural people of all sorts, are equally in ignorance of the first elements of instruction. Neither religion nor morals are in a better condition. The R. Catholic is, nominally, the prevailing religion, though Mr. Glanville Taylor declares that he never knew an instance of men going to any church at all in Cuba, and that no reverence whatever was exhibited for churches, padres, images, or saints. Cuba would thus appear to have, in fact, no religion at all. The same author represents the inhabitants as being sufficiently peaceable, but devoted to gambling and cock fighting.

Territorial Divisions, Government, \&c.-Cuba, with the Spanish islands dependent on it, forms the captain-generalcy or military government of La Havana; the captain-general, being also civil governor, is assisted in his duties by a subgovernor, and a colonial junta of seven members. The division of the island is fivefold-ecclesiastical, civil, military, fiscal, and marine. Ecclesiastically, it is divided into two, the E. end presided over by an archbishop, who has his seat at Santiago; and the W. end by a bishop, resident at La Havana. The civil divisions are also two, called provinces, but not conterminous with the ecclesiastical division. Each province contains several smaller subdivisions, and has its distinct governor, that of the W. or La Havana being the captain general, and that of the E. end or Cuba being a separate governor, independent of the former in civil and political matters. The two principal civil tribunals are the audiencias of La Havana, and of Puerto Principe, and of which the captain-general is president ex officio. The military division is into three departments-eastern, central, and western, over each of which is a commandant-general. This division corresponds nearly with the fiscal division, into three intendancies, each having its requisite governor and court. The fifth or marine division is into five provinces-Havana, Trinidad, San Juan de los Remedios, Nuevitas, and Santiago de Cuba, having each for its capital a town of same name, being the principal towns of the island. The first is subdivided into five districts, the second into four, and each of the others into three.

Revenue.-The revenue is derived from export and import customs duties, taxcs on the consumption of butcher's meat, stamped paper, sales of indulgences, cock-fights, lotteries, deductions from official salaries, vacant tithes, deposits, confiscations, \&c. The total revenue of the island for 1847, was $£ 2,561,642$, of which $£ 300,000$ are applied to the civil service, including the ministers and consuls of Spain in N. and S. America; $£ 900,000$ to the military, $£ 250,000$ for the marine, and the remainder remitted to Spain.

Population.-Half a century after the discovery of Cuba, the indigenous population, said by the first navigators to have been numerous, had entirely disappeared, having been exterminated by the Spaniards. The present population consists of whites, the descendants of the Spaniards and other Europeans ; of mulattoes, called Pardos, and negroes. The increase has been rapid; in 1791, the total population was 272,140 ; in 1817, 551,998 ; in 1827, 704,867; and in 1841, 1,007,624, of whom 88,054 were free pardos, and 10,974 slave pardos; 64,784 free negroes, and 452,521 slave negroes; showing the total number of slaves to be 540,575 , in the proportion, it is alleged, of $4 \frac{1}{2}$ males to 1 female. Pop. (1849,) $1,000,000$.

History.-Cuba was first discovered by Columbus, on October 28, 1492, who revisited it in 1494, and again in 1502. In 1511, the Spaniards formed the first settlement on the island, and have retained possession of it ever since. In 1762, Havanna was taken possession of by the British, but was restored to the Spaniards in the following year. From this period, the history of Cuba presents nothing more interesting than a catalogue of captains-general and bishops, down to the years 1809-1811, when the ports were opened to the ships and trade of foreign countries; during which period, 54 or 56 captains-general have in turn ruled the island. The next events of importance in its history are the piratical attempts, made in May 1850, and again in August 1851, by a band of $U$. States adventurers, under the command of a

Spaniard, named Narcisso Lopez, to seize upon the island. Both expeditions sigually failed, in consequence of the dotermined front shown by the Cubans to the invaders. The whole 450 men who landed were either slain in fight or taken prisoners; of the latter, 50 were shot; and shortly thereafter Lopez himself was garotted. -(Turnbull's Cuba; Madden's Cuba (1849) ; Ramon de la Sagra; Histoire Physique et Politique de l'Ile de Cuba; Parliamentary Papers.)

CUBA, a tn. and par. Portugal, prov. Algarve, 14 m. N.N.E. Beja. It contains a church and a convent. Pop. 2410.

CUBAGUA, an isl. Caribbean Sea, belonging to Venezuela, dep. Maturin, between Margaretta and Point Araya; lat. $10^{\circ} 42^{\prime} \mathrm{N} . ;$ lon. $64^{\circ} \mathrm{W}$. It was formerly noted for its pearl fishery; at present it is uninhabited, and only occasionally resortcd to by fishermen. Vessels bound for the N . shores of S . America usually pass between this island and Margaretta.

CUBBINGTON, par. Eng. Warwick; 1780 ac. P. 830.
CUBCABEA, a tn. Darfur, 35 m. S. W. Cobbe; lat. $14^{\circ} \mathrm{N}$.; lon. $26^{\circ} 30^{\prime} \mathrm{E}$. It is of considerable size, and is the depôt of all the merchandise brought from the W. A market is held here twice a week; and for articles of small value, the common medium of exchange is salt. This market is famous for the great quantities of leather, and of cotton cloths, called tokeas, which are exhibited for sale. The population are a singular mixture of Arabs, and of various tribes of Africans. -(Browne's Travels.)

CUBERT, or CUThbert, par. Eng. Cornwall; 2320 ac. Pop. 368.

CUBLEY, par. Eng. Derby; 2410 ac. Pop. 425.
CUBLING'TON, par. Eng. Bucks; 1290 ac. Pop. 290.
CUBY, par. Eng. Cornwall; 2340 ac. Pop. 161.
CUCUISAS (Las), a tn. Venezuela, prov. of, and 28 m . S.W. Caracas. It lies in the beautiful valley of Aragua, and, properly speaking, it is composed of three towns, near each other. Sugar, cacao, and cotton are grown in the vicinity, which is very fertile. Pop. 5000.

CUCKFIELD, a par. and market tn. England, co. Sussex; 10,500 ac. The Town is pleasantly situate on an eminence, $34 \mathrm{~m} . \mathrm{S}$. by E. London, and within 1 m . of the railway from London to Brighton. It is well kept, has pathways formed of a durable red brick, an ancient spacious church, with a tower and spire, two dissenting chapels, and a national school. Petty sessions are held fortnightly by the county magistrates. Pop. 3444.

CUCKLINGTON, par. Eng. Somerset; 1780 ac. P. 339.
CUCKNEY-Norton, par. Eng. Notts; 5510 ac. P. 1697.
CUCURRON [anc. Cucuro], a tn. France, dep. Vaucluse, 7 m. S.S.E. Apt. The inhabitants are much employed in rearing silkworms, and a good ordinary red wine is produced in the district. There are four annual fairs. Pop. 1568.

CUCU'TA, a tn. New Granada. See Rosario-de-Cucuta.
CUCUTA, a valley, New Granada, prov. Pampluna, on the Venezuelan frontier; lat. $7^{\circ} 30^{\prime} \mathrm{N}$.; lon. $72^{\circ} 10^{\prime} \mathrm{W}$.; between the cities of Pamplona and San Christoval, remarkable for its fertility and excellent breed of mules. Cacao, of the finest quality, is raised in the greatest abundance. This valley was discovered by Juan de San Martin, in 1534.

CUDDALORE, a maritime tn. Hindoostan, Carnatic, and one of the largest and most populons in the S. of India, 17 m. S. by W. Pondicherry, r. bank, Trivadi, at its embouchure in the Bay of Bengal ; lat. $11^{\circ} 43^{\prime} 30^{\prime \prime} \mathrm{N}$. ; lon. $79^{\circ} 45^{\prime} 45^{\prime \prime} \mathrm{E}$. (R). It has a court-house, a custom-house, and some trade, particularly in exporting to Madras the cottons produced in this part of the peninsula. It is one of the principal stations for soldiers who have been invalided, or who choose to remain in India after having obtained their discharge. This place has been the scene of many contests, and has frequently changed masters. It was captured from the French by the British army under Colonel Coote, in 1760, and continued under the dominion of the Nabob of Arcot until 1782, when it was taken by the Rajah of Mysore, with the assistance of some French troops. In June 1783, the town was attacked by a body of British troops under General Stuart, which sustained heavy loss, and was repeatedly defeated in attempting to carry the place by assault. In 1795, Cuddalore, with the remainder of the province, was consigned by treaty to the East India Company, who have ever since retained it.-(Fontanier, Voyage dans l'Inde.)

CUDDAPAH, a collectorate and tm . Hindoostan, presid. Madras. The collectorate forms the E. division of Balaghaut district, stretching from the borders of Bellary to the Bay of Bengal, and from lat. $13^{\circ} 15^{\prime}$ to $16^{\circ} 20^{\circ} \mathrm{N}$. ; area, $12,753 \mathrm{sq} . \mathrm{m}$. It is traversed, N. to S.. by the E. Ghauts, and watered by the Pennar and its affluents, the Gondegam, and other smaller streams. Though the district be considerably elevated above the sea, the heat in April and May is intense; and the water during the hot season is brackish, but during the rains it is sweet and good. Soda is found in the hills to the S.W. of the town of Cuddapah, and is used by the natives in place of soap. Salt and saltpetre likewise abound, and are easily procurable. On the banks of the Pennar, about 7 m . N.E. the town of Cuddapah, are diamond mines, which have been wrought for several hundred years, and in which, at times, gems of considerable value are found. Nearly a fifth of the district is under grain cultivation. Cotton is likewise pretty extensively grown.-The town lies on a small river of same name, an affluent of the Pennar, 145 m . N.W. Madras; lat. $14^{\circ} 32^{\prime}$ N.; lon. $78^{\circ} 55^{\prime}$ E. It contains a residence of the Rajah, now converted into a court-house and prison, and was formerly the capital of an independent Patan state.

CUDDESDEN, par. Eng. Oxford; 2700 ac. Pop. 1483.
CUDDINGTON, two pars. Eng.:-1, Bucks; 980 ac. Pop. 626.-2, Surrey; 1850 ac. Pop. 158.

CUDHAM, par. Eng. Kent; 5930 ac. Pop. 776.
CUDillero, or Oleiro, a tn. and seaport, Spain, Asturias, prov. of, and 22 m. N.W. Ovieao, on the Bay of Biscay. It has two small squares, a parish chnreh, town and session houses, four schools, a prison, several fountains, storehouses, and a custom-house, near which, on the sea side, is also a wharf for loading and discharging vessels. Weaving, fishing, and curing fish, constitute the chief occupation of the people; the latter branch has greatly decreased of late, owing to the high price of salt. A few small vessels frequent the port. Pop. 2210.

CUDWOR'TH, par. Eng. Somerset; 1070 ac. Pop. 155.
CUELLAR, a tn . Spain, in Old Castile, prov. of, and 30 m. N. Segovia; on the slope of a hill, surmounted by a large and strong castle. It is tolerably built, partly surrounded by walls, and entered by four gates. The streets are numerous, wide, and paved, though irregular and steep. The town also possesses one principal and several smaller squares, three parish churches, a townhall, female orphans college, Latin and some primary schools, spacious hospital, prison, storehouse, several convents, in the church of one of which are the splended sepulchres of the Dukes of Alberquerque. There are two public gardens. The inhabitants are employed in weaving, agriculture, cattle rearing, and grinding madder, which is exported to England and elsewhere. Pop. 3148.

CUENCA, a prov. Spain, New Castile, between lat. $39^{\circ} 20^{\prime}$ and $40^{\circ} 47^{\prime}$ N.; lon. $1^{\circ} 5^{\prime}$ and $3^{\circ} \mathrm{W}$. ; bounded, N. by prov. Guadalajara, E. by Teruel and Valencia, S. by Albacete, W. and S.W. by Ciudad• Real and Toledo; area, 12,177 sq. m. It is mountainous, more especially its central and E. portion, which is formed into numerous longitudinal valleys, having a direction generally N. to S., and watered by streams flowing into the Jucar. The N.W. part of the province is comparatively flat, and belongs to the basin of the Tagus; while the waters of the S.W. part flow into the Guadiana. The mountains yield excellent timber, exquisite honey, and some minerals, including copper, silver, iron, coal, alum, and depasture numerous flocks of sheep; the N. part of the province produces chiefly oil, fruit, and honey; and the S.W. part, called La Mancha, which is of a dry soil, yields grain and wine. It is, however, as a whole, well watered, the principal streams being the Tagus, Jucar, Gabriel, Rianzares, Giguela, \&c. There are several inedicinal springs, and some salt lakes in Cuenca. The woollen manufactures, at one time considerable, and also mnch esteemed, are now, along with every semblance of commerce, extinct. The people are said to be honourable labourers, and sober, and about five in the 100 attend school. The province is divided into nine partidos. Pop. 252,723.

CULNCA, a city, Spain, cap. above prov., 85 m . E.S.E. Madrid, romantically sitnate, about 3400 ft . abuvo sea level, between the heights San Cristobal and Socorro, at the confluence of the Inescar and Jucar. It is a Moorish town, with
streets steep, narrow, and tortuous, the houses rising in terraces, roof above roof, to the plaza and cathedral. It is surrounded by high old walls, which, with its towere, and houses hanging over the precipices, give it a singularly striking and picturesque appearance. Cuenca is a bishop's see, and one of the cities which sent deputies to the old cortes of Castile. It has six gates, six bridges over the Huescar, and two over the Jucar; that of San Pablo over the former, connecting the town with the Dominican convent, is a remarkably fine structure, built in 1523. It is reared on colossal piers, the arches are of great solidity, and rise to a height of 150 ft ., rivalling the arches of Segovia and Alcantara. The cathedral, a simple Gothic edifice, one of the finest structures of the kind in Spain, is profusely adorned with jasper and other precious stones, its painted windows are superb, and it contains some good sculptures and paintings; it was founded about the middle of the 12 th century. Near the cathedral is the bishop's palace, with a portal of mixed Gothic, and a fine saloon inside. The city contains, besides, a number of churches, two hospitals, and one for foundlings, three colleges, and a clerical seminary; and before the suppression of the religious houses, it had seven convents of monks, and six of nuns.
Cuenca was at one time celebrated for its literature, its arts, and manufactories; as regards the two first, it has nothing now to beast of, and the latter is confined to the manufacture, on a small scale, of paper, woollen stuffs, linen, and soap. The scenery in the vicinity is beautiful, presenting an alternation of lofty rocks and fertile valleys. Pop. 6037.

CUENCA, or Rambae, a th. Ecuador, cap. prov. of same name, 64 m . S.E. Guayaquil; lat. $2^{\circ} 55^{\prime} 3^{\prime \prime}$ S. ; lon. $79^{\circ} 13^{\circ} 15^{\prime \prime}$ W. (L.); in the fine valley of Yunquilla. 8179 ft . above sea level. The streets are broad and straight, but the houses, built of rough unbaked bricks, are low, and mean in appearance; and, notwithstanding the town is supplied with water, the streets are dirty. It is the sce of a bishop, erected in 1786. Besides the cathedral, which is poor, and ill decorated, it contains two parish churches, four convents, two numueries, an hospital, a chamber of finance, and other edifices. There are here extensive sugar refineries, and manufactures of confectionary, cotton3, hats, and cheese resembling Parmesan. Shells are worked with much taste. The chief trade is in grain, Peruvian bark, and other products of the neighbourhood. A little to the S . is the mountain of Tarqui, which Condamine, and other French astronomers, selected for their meridian in 1742. Pop. 20,000.-The province, bounded N. by prov. Riobamba, E. Quixos and Macas, S. by Jacn-deBracamoros, and W. by Guayaquil, is intersected by mountans and valleys, and watered by several rivers. It has an agreeable climate, and produces grain, sugar, and cotton in abundance. The cochineal insect also exists; and thero are gold, silver, copper, mercury, and sulphur mines. It is famed for its cotton fabrics and tapestries, which form the principal articles ot its commerce.

CUERNAVACA, a tn . Mexican confederation, state of, and 35 m. S. Mexico, on the S. declivity of the Cordillera of Guchilaque, in a temperate and delightful climate.

CUELis [anc. Castram de Corcis], a tn. France, dep. Var, 1 c m . N.E. Toulon-sur-Mer. It stands at the foot of a hill, covered with vineyards, oliveyards, and orchards, and enjoys a clear sky and delightful climate. It has some trade in oil and wine, and several annual fairs. Pop. 1568.

CUEVAS, several tns. Spain; the most important are1, (-de Vera), a tu. Andalusia, prov. of, and 40 m . N.E. Almeria, in a plain, r. bank, Almanzora. Its streets are, in general, regular, pavell, and lined with well-constructed houses; and it has two squares, the principal of which contains the town and session houses, and an extensive Moorish castle. The other public buildings comprise a handsome Doric parish clurch, two chapels of ease, a convent, college, several schools, a prison, hospital, storehonse, and cemetery. The inhabitants manufacture eartlenware, hardware, esparto fabrics, wine, and oil. The mines and smelting works of the reighbouring sierra de Almagro occupy great numbers, not only of the natives, but of foreigners, whom mining speculations have drawn hither. Some trade is carried on in cattle, grain, wool, and timber. Pop. 10,000.-2, (-de-San-Marcos, or Altas), a tn . Andalusia, prov. of, and $38 \mathrm{~m} . \mathrm{N}$. Malaga, on a declivity. It las well-made streets, and possesses a parish church, two schools, and a cemetery. Some trade is carried on in grain,

## CULMULLIN

brandy, and wine. Pop. 3711.-3, (de-Vinroma), a tn. Valencia, prov. of, and 26 m . N.N.E. Castellon-de-la-Plana, r. bank, Seco. Most of the streets are well constructed, and the town possesses a church, town-house, two schools, a prison, and two fine fonntains. Pop. 2600.

CUGA''-del-Valles (SAN), a tn. Spain, Catalonia, prov. of, and 9 m . N. Barcelona, on a plain between two streams. The houses, in general, are well built, and the town possesses two squares, a parish church, school, cemetery, and several fountains, some of which are feruginous. The people are engaged in distilling brandy, expressing oil and wine, and tillage. Pop. 2079.

CUGGIONO, a tn. Austrian Italy, prov. of, and 16 m . W. by N. Milan. It is regularly built, and possesses a church, town and court houses, an hospital, and some handsome mansions. Silk is manufactured. Pop. 3629.

CUGLIERI, a tn., isl. Sardinia, division Sassari, 17 m . N.E. Oristano, cap. prov. It is situated in a healthy, fertile district, which yiclds oil, esteemed the best in the island. Pop. 2405.

CUlABA.-1, A tn. Brazil, cap. prov. Matto Grosso, lat. $15^{\circ} 36^{\prime} \mathrm{S}$.; lon. $56^{\circ} 10^{\prime} \mathrm{W}$; ; on a river of same name. It is very indifferently built, the houses being generally of earth or clay, and the streets, though paved, very irregular It contains four churches, an hospital, lazaretto, a furnace for smelting gold, a Latin school, school of philosophy, and primary school for boys and girls. It is a bishop's see, and the seat of the provincial assembly, and civil and military provincial gevernment. Its trade consists in iron tools, and various articles of European manufacture, which are exchanged for gold. Pop. of tn. 3000.-2, A river, Brazil, prov. Matto Grosso. It rises in the district of Diamantino, in lat. $13^{\circ} 12^{\prime} \mathrm{S} .$, to the E. of the source of the Paraguay, in the mountain chain of Parecis. It flows circuitously, but, on the whole, almost due S., and joins the Porrudos or SãoLourenço, on its r. bank, in lat. $17^{\circ} 20^{\prime} \mathrm{S}$., and Ion. $56^{\circ} 40^{\prime} \mathrm{W}$. Above the town of Cuiaba it is navigable for canoes, but is much broken by rapids, and even for 60 m . below the town, its course is very impetuous. It is, however, an important channel of communication, particularly to the town of Cuiaba and the provinces of Matto-Grosso, in the trade which they carry on with prov. São-Paulo. Its principal affluents are the Tutêz, Guaxu, and Caranda.

CULBONE, par. Eng. Somerset; 1560 ac. Pop. 34.
CULDAFF, par. and vil. Irel.Donegal; 20,089 ac. P. 2982.
CULEBRA.-1, A harbour, Central America, Nicaragua, on the Pacific; lat. $10^{\circ} 28^{\prime} \mathrm{N}$.; lon. $85^{\circ} 35^{\prime} \mathrm{W}$. It is one of the finest ports on this part of the coast, and affords safe anchorage for ships of any burden. The sides of the harbour, as well as of the outer bay, are covered with a great variety of timber. On the N . side of the bay is found a sandstone containing organic remains; in the W., basalt and bornblendo are met with; and on the E., shells inclosed in solid rock, formed by a concretion of magnetic-iron sand. -2 , (or Passage Island), a small isl., W. Indies, belonging to the Virgin group off the E. coast of Porto Rico; lat. (S. point) $18^{\circ} 17^{\prime} \mathrm{N}$.; lon. $65^{\circ} 17^{\prime} \mathrm{W}$. (R.) It is about 7 m . long, and 3 broad, lies low, and is covered with timber; and at its S.E. end has a commodious and secure harbour. Here an abundant supply of wood, water, and fish can be obtained.-3, An islet, in the Pacific. belonging to the Philippines; lat. $11^{\circ} 18^{\prime} \mathrm{N}$.; lon. $123^{\circ} 3^{\prime} \mathrm{E}$. (n.)

CULFREIGH'TRIN, par. Irel. Antrim; 26,338 ac. Pop. 4577.

CULHIAM, par. Eng. Oxford; 1680 ac. Pop. 404.
CULIACAN, a tn. Mexican confederation, state Sonora and Cinaloa, $640 \mathrm{~m} . \mathrm{N} . W$. Mexico, l. bank, Culiacan; lat. $25^{\circ} 10^{\prime} \mathrm{N}$.; lon. $107^{\circ} 59^{\prime} \mathrm{W}$. It is the centre of a transit trade to and from Guaymas, on the Gulf of California. The country around is well watered, and productive. Pop. (1841), 7000.-The River flows W., describing a course somewhat in the form of a catenarian arch, in all, about 200 m . long. It falls into the Gulf of California, about lat. $24^{\circ} 50^{\prime} \mathrm{N}$.

CULLA, a tn. Spain, Valencia, prov. of, and $26 \mathrm{~m} . \mathrm{N}$. by W. Castellon-de-la-Plana, near the Seco, on a hill, crowned by a Moorish castle. It contains a parish church, courthouse, prison, and endowed school; and has manufactures of linen, and several flour-mills. Pop. 1405.

CULLAR-de-Baza, a tn. Spain, Andalusia, prov. of, and 68 m . E.N.E. Granada, commanded by a fortress. It contains a square, a parish church, several chapels, a town-house, two schools, a prison, cemetery, and several fountains. There is a large manufactory of saltpetre. The vicinity produces grain, fruits, and vegetables; and an annnal cattle fair is held in August. Pop. 5509.

CULLEEN, or Cullin, a lough, Ireland. See Conn.
CULLEN, a maritime tn. and parl. bor., Scotland, co. of, and $11 \frac{1}{2} \mathrm{~m}$. W. Banff. The position of the town is singularly attractive, beautifully situated on the bay of same name. It is regularly built, and, besides a large square or open market-place, consists of five principal streets, all of which are straight, and remarkably well kept. The houses are all substantially built of stone, and lighted with gas; supply of water ample. It has a Free church, an Independent chapel, and seven schools; and on the E. side of the market-place is a bandsome building, containing a court-room, a council chamber, and assembly hall. Fish constitute the principal trade of the town; but the white and herring fisheries, forinerly carried on here to a considerable extent, have of late years greatly fallen off. A considerable salmon fishery, however, is carried on in the bay. Ship and boat building are also prosecuted with some autivity, and rope-making is carried on to a small extent. Cullen unites with Banff, Inverury, Kintore, and Peterhead in returning a member to the House of Commons. Registercd elcetors (1851), 49. Pop. 1423. - (Local Correspondent.)

CULLEN, several pars. Irel.:-1, A par. and to. Tipperary; 1986 ac. Pcp. 1013.-2, Cork; 4250 ac. Pop. 1330.-3, Cork; 13,674 ac. Pop. 5490.

CULLENWAINE, par. Irel. King's Co. and Tipperary; 4745 ac. Pop. 2327.

CULLERA, a tn. and port, Spain, prov. of, and $2 \overline{5} \mathrm{~m} . \mathrm{S}$. by E. Valencia, near the mouth of the Jucar, on the S. base of Mount Zorras, which is crowned by an ancient and strong castle. The town is well fortified, aud has level, clean, but irregularly built streets, and three small squares, a parish church, two chapels of ease, four schools, a town and chapter house, hospital, prison, barracks, cemetery, and several convents. The bulk of the inhabitants are occupied in agriculture, cattle-rearing, fishing, and expressing oil and wine. It exports grain, wine, fruits, vegetables, paper, salt fish, to an average annual value of $£ 101,482$; and imports brandy, oil, timber, linens, cottons, silks, esparto, rice, maize, sardines, \&c., to an amount of $£ 54,880$. Cullera has always, from its natural position, been esteemed a place of great military importance; the wall, towers, and fortifications have been repeatedly dismantled, and as often repaired and rebuilt. Its defences were greatly strengthened and extended, especially on the river side, against the anticipated attacks of the Carlists, and have since remained in an efficient state. Pop. 7821.

CULLOMPTON, a par. and market tn. England, co. Devon; 5790 ac. The Town pleasantly situate, 11 m . N.E. Exeter, is a station on the railway from Bristol to Exeter. It consists principally of one roughly-paved street, from which several smaller ones diverge. It has a large and elegant church, in the later English style, with a lofty tower, and fine internal decorations ; and chapels for Baptists, Wesleyans, Bryanites, Independents, Unitarians, and the Society of Friends. The manufacture of broad and narrow woollen cloth, kerseymere, and serge is carried on; and there are several tanneries, and other manufacturing establishments, including flour, paper, and spinning mills. In July 1839, a destructive fire broke out, which destroyed upwards of 100 houses and cottages. Pop. (1851), 3655.

CULM, a th. and circle, Prussia. See Kulm.
CULMBACH, or Kulmbach, $a \operatorname{tn}$. Bavaria, on the White Main, 48 m. N.E. Nürnberg, cap. dist. of same name. It is well built, has three churches, and hospitals, and Latin school; with manufactures of potash, earthenware, tiles, \&c. In the vicinity is the old castle of Plassenburg, now converted into a prison. Coal is found in the neighbourhood. The railway between Hof and Nürnberg passes through the town. Pop. 4000 .-The district, area, 96 sq . m., has a population of 23,000 .

CULMINGTON, par. Eng. Salop; 3160 ac. Pop. 541.
CULMSTOCK, par. Eng. Devon; 4530 ac. Pop. 1446.
CULMULLIN, par. Irel. Meath; 5560 ac. Pop. 1010.

CULNA, or Khalana, a tn. Hindoostan, prov. Bengal, r. bank, Hooghly, 48 m . N.N.W. Calcutta. There is here a circular area, composed of two concentric circles, the outer one of which contains 108 temples, and the inner 35 . Here also is a flourishing school and mission station, in connection with the Free church of Scotland. It is one of the principal ports on the Hooghly for the Burdwan district. and carries on a thriving trade. Pep. 40,000 .

CULNAI, a vil. Peru, in the Andes, dist. Canta, about lat. $11^{\circ} 10^{\prime} \mathrm{S}$., remarkable only for its great elevation, being about $10,000 \mathrm{ft}$ above sea level. But great as this height is, it is far below that of many other towns, villages, and port stations in Peru and Bolivia. The highest of the latter, Rumihuasi, in Peru, being $15,542 \mathrm{ft}$. above sea level; the highest town or city, Potosi, in Bolivia, 13,330 ft. ; and the highest village, Tacora, Peru, $14,250 \mathrm{ft}$. At Culnai cultivation ceases, ending with the potato, troprolum, oxalis, and basella. The second region of plants also terminates here, and thercafter ensues the 'Paramera,' or pasture regions of the Andes, avoided by the inhabitants of the lower districts on account of the cold.

CULPA, a river, Creatia. See Kulpa.
CULPEE, a tn. Hindoostan, prov. Bengal. 1. bank, Hooghly, $36 \mathrm{~m} . \mathrm{S}$. by W. Calcutta; lat. $22^{\circ} 6^{\prime}$ N.; lon. $88^{\circ} 25^{\prime}$ E. Its situation is extremely unhealthy, the shores of the river here being a bed of mad, thickly covered with trees and jungle.

CULPHO, par. Eng. Suffolk; 1620 ac. l'op. 70.
CULROSS, an anc. royal burgh and river port, scotland, co. Perth, 18 m . W. by N. Edinburgh, l. bank, Forth. It has a town-house, an Established and a Free church. and some schools. Its only manufacture is a little damask weaving for Dunfermline merchants. Culross was erected into is royal burgh in 1588 by James VI., at which time it had a considerable trade in salt and coal, the latter being exported in large quantities to Holland; but no coal is now wrought in the parish. It was formerly celebrated for its girdles, thin circular plates of iron, on which oatmeal cakes were toasted; the exclusive right of making which was secured to the girdlesmiths of Culross, by patents from James VI. and Charles II., but was set aside by the Court of Session in 1727; they have long since ceased to be made. In the vicinity are the remains of a nonastery, founded in 1217 It occupied a commanding situation at the upper part of the town; but scarcely any part of it now exists, except a picturesque old arch, and the chapel, which, having undergone extensive repairs, now forms the parish church. At the E. end of the town are the remains of St. Munge's chapel, in which tradition asserts that saint to lave been born. Culross unites with Queensferry, Inverkeithing, Dunfermine, and Stirling in sending a member to the House of Commons. Pop., burgh, 603; par. ( 4 m . by 4 m .), 144.-(Local Correspondent.)

CULTS, par. Scot. File; $3 \frac{1}{2}$ sq. m. Pop. (1851), 915.
CULWORTH, par. Eng. Northampton; 2060 ac . P. 713.
CUMA [anc. Cuma], a fortress, kingdom and prov. Naples, 4 m. N.W. Pozzuoli, near the Mediterranean, on the site of the ancient and celebrated city of Cumx, of which the only existing remains are ruins of some walls, temples, aqueducts, and a triumphal arch.

CUMANA, a city, Venezuela, cap. prov. of same name, gov. of, and 186 m. E. Caracas, near the mouth of the Gulf of Cariaco, about 1 m . from the sea, on an arid, sandy plain; lat. (Fort Boca), $10^{\circ} 27^{\prime} 36^{\prime \prime} \mathrm{N}$. ; lon. $64^{\circ} 11^{\prime} \mathrm{W}$. (к.) The fortress of St. Antonio, built on a calcareous hill, commands the town, and forms the only defence of the place. On the S.W. slope of the same rock are the ruins of the castle of st. Mary. The town has no remarkable buildings, and the frequency of earthquakes forbids all embellishments. The houses are, for the same reason, low and lightly built. The suburbs are nearly as populous as the town itself, and are three in number-Serritos, St. Francis, and Guayquerias. The port of Cumana is capable of receiving all the navics of Europe, and the whole of the Gulf of Cariaco, which is 42 m . long, and from 7 to 9 m . broad, affords excellent anchorage; still the number of vessels frequenting the port is small -in 1847, only 10 , tonn. 682 entered, and 6, tonn. 658,
cleared. The chicf trade is in mules, cattle, smoked meat, salted fish, cacao, \&c.; provisions and wines here are plentiful and very cheap. The climate is excessively hot-the temperature, from June to October, reaching $90^{\circ}$ or $95^{\circ}$, Fahr., during the day; and seldom falling below $80^{\circ}$ during the night. The inhabitants are described as being very polite, and of active business habits. Cumana is the oldest European city of the New Continent, having been founded by Governor Diego Castellon, in 1523. It has suffered severely from two earthquakes; by that of 21 st October, 1766, it was entirely destroyed in the space of a few minutes. On 14th Decenber, 1797, more than four-fifths of the city were again completely demolished. Before the revolution of 1823, its population was upwards of 30,000 , now it is about 12,000 . - The provisce is bounded, N. by the Caribbean Sea, E. by the Gulf of Paria and the Atlantic, S. by the Orinoco, and W. by province Barcelona. The sierra of Venezuela intersects its N . part, parallel to the sea, and sends numerons offsets over the more S. parts of the provinces. All the hills are of a moderate height, steep, and covered with impenetrable forests. It is watered by numerous streams, of which the chief are Cari, Mamo, Limones, and Guarace, affluents of the Orinoco; the Guarapichi. which falls into the gulf of Paria; and the Manzanares and Cariaco, affluents of the Caribbean Sea. Along the Orinoco are numerous lakes. In the valleys, and along the rivers, are fertile plains and excellent pastures. Cattle are extensively reared, and fishing is carried on; and dried fish, cacao, tobacco, hides, cotton, salted meat, and medicinal plants, are exported. There are 37 schools in the province, attended by 1003 scholars. Pop. (1846), 75,828 .

CUMANACOA, a tn . Venezuela, prov. of, and 21 m . S.E. Cumana, on the brow of a high hill, situate in the fertile valley of its own name, r. bank, Manzanares. It is a small, ill-built place, with houses mostly of wood. Tobacco is grown in the neighbourbood, the fruits are uncommonly fine, and there are some mineral springs. Pop. 2800.

CUMBER, two pars. Ireland:-1, (Upper), Londonderry and Tyrone, 26,329 ac. Pop. 7052.-2, (Lower), Lendonderry, 14,783 ac. Pop. 4510.

CUMBERLAND, one of the N. counties England, bounded, N. by Scotland and the Solway Firth, W. and S. by the Irish Sea and river Duddon, E. by parts of Lancashire, Westmorland, Durham, and Northumberland; greatest length, N. and S., 75 m. ; breadth, E. and W., 45 m. ; area, $974,720 \mathrm{ac}$. The surface of this county, particularly in the E. and S. parts, is rugged and mountainous, and, in many places, remarkable for magnificent scenery. Lofty summits, many of them of the most imposing forms, beautiful lakes, and far-stretching woodlands, combine to render this district one of the most romantic and picturesque in the United Kingdom. Its principal mountains exceed 3000 ft . in height, while there are many that fall but little short of that elevation. It contains also a number of lakes, more remarkable, however, for their beauty than extent. The largest, Ullswater, is 9 m . in length, and 1 m . in breadth; none of the rest, with one exception, exceed 3 m . in length. Its rivers and waterfalls also form conspicuous and highly-picturesque features in the landscape-several of the latter having falls varying from 60 to 190 ft . Both the lakes and tarns are abundantly stocked with fish, particularly trout, pike, and perch. The geological features of Cumberland comprise granite, clay-slate, trap, limestone, red sandstone, and coal. The minerals are silver, copper, lead, iron, plumbago, and limestone, many of which are wrought to a great extent, and with success. The climate is in general moist and variable -cold and piercing on the high grounds, and mild and temperate on the lower, but universally healthy. The lower lands of E. Cumberland chiefly rest on the red sandstone formation, and the upper district on mountain limestone. In the plains, along the banks of the rivers and streams, the soil is generally a fertile alluvial loam; on the low-lying ridges, which divide the several plains, it varies from a strong retentive soil to good friable turnip-land ; and near the Scottish berder there is an annually diminishing extent of unimproved bogs, or pcat inoss. The extreme moisture of the climate, which here often ruins the hopes of the farmer, suggests a preference for stock-rearing over corn-farming, and the former is now, in consequence, becoming more general than the latter. On one of the largest estates in the county, comprising 30,000
acres of land, the farms are let on lease, at money rents, for a period of 14 years, free of all manner of tithes. The rents vary considerably-from 20 s . to 26 s . being about the average for arable land. The highest rent for the best land is 36 s. an acre. The tenants of E. Cumberland are an industrions, hard-working, and economical class of men. In W. Cumberland the soil is generally of a very impervious character, rendering extensive and effective systems of drainage essentially necessary. The great proportion of the arable lands here is held in farms of from 50 to 150 ac . A considerable number occupy from 200 to 300 ac., and a few as much as 400 ac . Some hold on leases of 14 years, or more; but verbal contracts, from year to year, is the more general practice, without any stipulation as to the mode of farming. The chief excellence in the farming of W. Cumberland is the successful management of the Swedish turnip crop, for which the soil and climate seem to be peculiarly suitable. The stock principally kept in the arable parts of this county is the improved short-horns, and the sheep preferred the pure Cheviots. The butter produced at the dairy-farms of Cumberland, particularly in the S.E. and S. divisions, is of wellknown excellence. The farmers generally are a plain, industrious, and intelligent race, who bring up their families in habits of industry and economy. The principal manufactures are of cotton, coarse linens, checks, woollens, \&c.; there are also extensive calico printing establishments. These manufactures are carried on principally at Carlisle-long celebrated for its ginghams-at Penrith, and several other towns. The principal towns are Carlisle the capital, Whitehaven, Workington, and Cockermouth. Cumberland is divided into five wards, and 104 parishes. It now sends nine members to the House of Commons, instead of six, as formerly. Pop. (1851), 195,492.

CUMBERLAND.-1, A peninsula, British N. America, having N.E. Davis' Strait, and S.W. Northumberland Inlet, between the parallels of $64^{\circ} 40^{\prime}$ and $67^{\circ} 30^{\prime}$ N.-2, (-House), a station of the Hudson Bay Company, British N. America, on the W. side of Pine Island Lake, in lat. $54^{\circ}$ N.; lon. $102^{\circ}$ $40^{\prime} \mathrm{W}$. The soil of the surrounding country is fertile, and generally well wooded. The beaver, black and red bears, and foxes of different colours, are found in the district.-3, (-Mountains), a mountain range, U. States, one of the ridges of the Alleghannies, commencing in the S.W. part of Pennsylvania, passing into Virginia, where it takes the name of Laurel Mountain, passing through the S.E. part of Kentucky, and terminating in Tennessee, 80 m . S.E. Nashville. In these mountains are found burr millstones and marble in great variety. They also contain numerous singular limestone caves, and abound in organic remains, both animal and vegetable.-4, A river, U. States, rising in the Cumberland Mountains, on the S.E. side of Kentucky, and, after a tortuous W. course, through the S.E. part of Kentucky, the N. part of Tennessec, and the E. part of Kentucky, falling into the Ohio, a little before the junction of the Temnessee. It is the most important afflucnt of the Ohio, with the exception of the Tennessee-its whole course being about 600 m ., and the territory drained by it $17,500 \mathrm{sq} . \mathrm{m}$. It is navigable for steamers and large vessels to Nashville, 203 m .; and for boats 300 m . farther. -5 , (-Harbour), Cuba. See Guantan-amo.-6, A maritime co. New S . Wales, 60 m . in length, N . to $S$. , and 34 m . in breadth; area, 914,800 acres, chiefly undulating plain. It is the metropolitan county of New S. Wales, and returns five members to the Legislative Council. It is divided into 13 hundreds and 56 parishes. The principal town is Syduey. Pop. co. 73,538.-7, A co. Van Diemen's Land, in Clyde district. It contains a number of bcautiful lakes. Its principal town is Bothwell.- 8 , A bay, N. side, isl. Juan Fernandez, off the coast of Chili, lat. $33^{\circ}$ $37^{\prime} 6^{\prime \prime}$ S. ; lon. $78^{\circ} 53^{\prime}$ W. (R.)

CUMBERLAND ISLES.-1, A group of small islands, Australia, N.E. coast, extending from lat. $20^{\circ}$ to $21^{\circ} 6^{\prime}$ S., and so called by Captain Cook, in 1770 , in honour of the Duke of Cumberland. They consist generally of elevated rocky islands, and are all abundantly wooded, particularly with pines, which grow to a large size. - 2 , An isl. U. States, Georgia, lat. (N. point), $30^{\circ} 56^{\prime} \mathrm{N}$. ; lon. $81^{\circ} 34^{\prime}$ W. (R.) ; 15 m . long, and from 1 m . to 5 m . broad.-3, An isl. S. Pacific Ocean, between the Low Archipelago and Society lslands, lat. (S.E. moint', $19^{\circ} 18^{\prime} \mathrm{S}$. ; lon. $141^{\circ} 11^{\prime}$ W. (R.)

CUMBERNAULD, a par. and manufacturing tn. Scotland, co. Dumbarton; 11,520 ac. The town, constituted a burgh of barony in 1649 , stands on an acclivity, with heights on the N.E. and S., 13 m . N.E. Glasgow. The principal street, which is almost straight, is wide, and well kept; and the houses are, in general, substantially built of stone. The principal shops, workshops, and dwellings, are lighted with gas, and the inhabitants are well supplied with water; but the town is rather in a declining state, and property has lately fallen greatly in value. It has Established, Free, and U. Presbyterian churches, three schools, a literary institution, a freemason, and several friendly and provident societies. Handloom weaving is the chief employment, though some tambouring and muslin sewing is done; and a few are occupied in the lime and coal works of the vicinity. The Hon. Mountstuart Elphinstone was born in Cumbernauld. Traces of Agricola's Wall are to be met with in the parish. Pop. entire par. 4501 ; of tn. 2227.-(Local Correspondent.)

CUMBERWOITH, par. Eng. Lincoln; 950 ac. P. 183.
CUMBRAY (Great and Little), two isls. Scotland, forming a par. co. Bute, at the entrance to the Firth of Clyde, lying nearly midway between the Island of Bute and the coast of Ayr. The larger island is about $3 \frac{1}{2} \mathrm{~m}$. long, by $1 \frac{1}{2}$ or 2 m . broad; circumference, 10 m .; area, 5120 ac., of which about 3000 ac . are arable. It is billy, and some of its elevations command beautiful views of the coast. It produces grain and green crops of all kinds, and has a considerable extent of pasturage. The shores and bays abound with fish of various sorts. On the $S$. side is the village of Millport, a pleasantly situated and thriving little place, much resorted to in the summer season by citizens of Glasgow. Permaneut pop. about 1413.-Lititle Cumbray, the smaller island, lies about $1 \mathrm{~m} . S$. by W. from the former. It is about 1 m . long, and $\frac{1}{2} \mathrm{ml}$. broad; area, 700 ac .; and has an elevation of 600 ft . above the sea. It is composed entirely of trap-rock, resting on the sandstone formation of the opposite coast. On the W. side of the island there is a lighthouse, in lat. $55^{\circ} 46^{\prime}$ N.; lon. $4^{\circ} 58^{\prime} \mathrm{W}$. (r.) There are the remains of several ancient structures in different parts of the island. Pop. 8.

CUMBRE, an elevated pass, Chilian Andes, prov. Santiago, lat. $32^{\circ} 52^{\prime} \mathrm{S}$; height, $12,450 \mathrm{ft}$. The ascent is gradual, but long and tedious, owing to its numerous turnings. From the end of May to the end of October-generally, but not always-the Cumbre, and great part of the valleys leading to it on each side, can be passed on foot only. The N. side of the ascent is covered with a loose red soil; but in many parts of the mountain side are shelves of rocks, inclined or vertical. The descent, on the S. side, is more broken into gulleys, less earthy, and more stony. Miers relates that he has met with considerable patches of red snow in the pass of Cumbre, and, more rarely, green.

CUMBRE (La), a tn. Spain, Estremadura, prov. of, and 20 m . E.S.E. Caceres, in an extensive plain. It is badly built, and has a square, church, townhall, prison, school, and cemetery. The inhabitants are engaged in weaving and agriculture. Pop. 2081.

CUMBRES Altas, or Mayores, a tn. Spain, Andalusia, prov. of, and 56 m . N. Huelva, on a declivity facing the S . The streets are tolerably well made, and gencrally paved; and the town comprises two public squares, a parish church, school, townhouse, and prison. Pop. 2052.

CUMBRIA, an ancient British principality, comprising, with part of Cumberland, the Scotch districts-Galloway, Kyle, Carrick, Cunningham, and Strathclyde. It was given to Malcolm, prince of Scotland, early in the 11 th century, to be held as a fief of the Crown of England.

CUMBRIAN MOUNTAINS, a range of hills, England, occupying part of the counties of Cumberland, Westmorland, and N. Lancashire, extending from Fell Top, in Cumberland, to the slate quarries near Ulverston, in Lancashire, about 37 $\mathrm{m} . \mathrm{N}$. to S., and 35 m . E. to W. The mountains rise with steep acclivities, inclosing, in some parts, narrow, but wellcultivated valleys, with numerous picturesque lakes. Limestone, slate, and granite are found in several parts of these mountains.

CUMBRIE, an African tribe, to be met with chiefly in the kingdom of Yaouri, in Houssa, and in the towns and villages on the banks of the Niger, in the central parts of Soudan, towards the S. They are a mild, harmless, and in-
dustrious race. but much oppressed and persecuted by their inore fortunate and powerful neighbours. Being of a timid and peaceful nature, they fall an easy prey to all who choose to molest them, and bow their necks to the yoke of slavery without a murmur. They are generally considered good agriculturists and expert fishermen, and raise abundance of corn and onions. Their sleeping huts, about 7 or 8 ft . wide, of circular form, made of clay and thatched with palm leaves, are elevated above the gronnd, to sceure the inmates from ants, snakes, and alligators, and to keep clear of the wet ground. The doorway, which is the only opening they have, is closed by a mat suspended inside. They have no steps to enter by, but scramble into it as well as they can.

CUMIANA, a th. Sardinian States, Piedmont, prov. of, and 8 m . N. Pignerol, near the r. bank, Cisola. Pop. 4500.

CUMLY, or Camala, a maritime tn. Hindoostan, presid. Madras, dist. Canara, 20 m. S. by E. Mangalore. It stands on a peninsula, projecting into a salt-water lake.

CUMMER, par. Irel. Galway; 9315 ac. Pop. 1889.
CUMMERTREES, par. Scot. Dumfries; 7 m . by 4 m . Pop. 1277.

CUMMUMET, a tn. Hindoostan, l. bank of a tributary of the Kistna, 110 m. E. Hyderabad, lat. $17^{\circ} 16^{\prime} \mathrm{N}$. ; lon. $80^{\circ} 11^{\prime} \mathrm{E}$. It is the cap. of a district of the same name, of which little more is known than that it is inhabited by a lawless and disorderly race.

CUMNER, par. Eng. Berks; 7730 ac. Pop. 1058.
CUMNOCK, New, par. Scotland, Ayr; 12 m . by 9 m . Pop. 2382.

CUMNOOCK, Oln, a vil. Scotland, co. of, and 11 m. E. Ayr, and a station on the Scottish S.W. Railway, beautifully situate at the confluence of the Glassnock and Lugar. It consists of three pretty long streets, and several narrow lanes; the former, regularly built, consist of good houses-the latter, irregular, consist of inferior buildings. Altogether, the village is cleanly and chcerful, and the vicinity exceedingly picturesque. There are a Free church, a gas-work, and two libraries. Cumnock is noted for the manufacture of wooden snuff-boxes, made of planctree, and often beautifully painted. lt has also some celebrity for its brown potteryware, and yet more for its thrashing machines and checse presses-those mannfactured here being held in high repute throughout the W. of Scotland. Pop, about 1200 . The par. is 10 m . by 2 m. Pop. 2836.

CUMREW, par. Eng. Cumberland ; 2760 ac. Pop. 183.
CUMWHITTON, par. England, Cumberland; 5670 ac. 1’op. 533.

CUNDAII, or Kundah, a tn. IIndoostan, Holcar's dominions, 100 m . S.E. Oojein, lat. $21^{\circ} 53^{\prime}$ N.; lon. $76^{\circ} 25^{\prime}$ E.; on an open plain, surrounded by a good mud wall, about 15 ft. high. Pop. between 4000 and 5000 .

CUNDALL, a par. England, York (N. Riding); 3480 ac. Pop. 378.

CUNDEEGURREE, a vil. IIndoostan, prov. Orissa, 25 m . from Cuttack. Here are three hills, which are perforated in every direction with caves of all dimensions-many being the dwellings of devotees and priests of the Jain worship. The Hindoos say these caves are the works of demons. Above the entrance to several are long inscriptions, in a forgotten tongue. Several tanks also have been excavated in the rock. The palace of the ancient rajahs, like all the rest, is hollowed out of the solid stone, and consists of two stories; the lower comprises a good-sized square court, surronnded on all sides by large excavated chambers. Into this yard you are obliged to descend from above.-(Rev. C. Acland.)

CUNDINAMARCA, a central dep. New Granada, comprising the provinces of Antioquia, Mariqnita, Neyva, and Bogota, and the valleys of the Lower Cauca and the Upper Magdalena. Its population consists of whites, Indians, and mixed races, in almost equal proportions.

CUNENE, a river, S.W. Africa, Benguela, flowing circuitously along the S.E. extremity of the kingdom, and, after receiving several affluents, falling into the Atlantic, under the name of Nourses, in lat. $17^{\circ} 15^{\prime} \mathrm{S}$.

CUNHA, a tn. Brazil, prov. of, and 120 m. E. N. E. São-Paulo, and nearly same distance, W. by S., Rio Janeiro, on Mount Falcão, ncar the small river Jacuhi. It contains a parish cluurch; and, owing to its elevated position and proximity to the sea, has a cooler and more salubrious climate

Vol. $I$.
than almost any other place within the tropics, in Brazil. All the inhabitants are employed in cultivation, or cattlerearing. Pop. 3000.

CUNLHAT, a tn. France, dep. Puy-do-Dôme, 10 m . N.W. Ambert. It has manufactures of linen, bombazine, and calico; a trade in cattle, and three annual fairs. Fragments of Roman mosaic have been found in the neighbourhood. Pop. 1098.

CUNNINGHAM, a dist. Scotland, co. Ayr, about 20 m . in length, and varying from 9 m . to 12 m . in breadth. It is the most N. of the three districts of Ayrshire-Cunningham, Kyle, and Carrick-and in that portion of the county N. of the water of Irvine. See Ayr.

CUNNINGHAM ISLAND, a fertile and populous isl. N. America, in the W. part of Lake Erie, a little N. the entrance into Sandusky Bay.

CUNHINGA, a river, W. Africa, Angola, rising in lat. $11^{\circ} 10^{\prime} \mathrm{S} . ;$ lon. $20^{\circ} 20^{\prime} \mathrm{E} . ;$ and, after a N.W. course of 130 in., entering the Coanzo, on the l., 180 m . E. Fort Pedras.

## CUNNERSDORF. See Kunnersdorf.

CUNTIS, a tn. Spain, Galicia, prov. of, and 15 m . N. Pontevedra, on a rising ground, l. bank, of a small river. Near it are mineral baths, the waters of which contain sulphuric acid, sulphureted hydrogen, and chlorate of sodium, and vary in temperature from $100^{\circ}$ to $154^{\circ}$ Fahr. The baths are much frequented in their scason.

CUPAR-Angus, a burgh of barony, Scotland, partly co. Perth, and partly in that of Forfar, 14 m . N.E. Perth, a station on the railway from Perth to Aberdeen. It contains many good houses, is well built, well paved, and well lighted with gas; it has a townhouse, jail, a handsome parish church, a Free and a U. Presbyterian church, and a Congregational chapel. It has a tannery, some extensive bleachfields, and carries on a considerable business in weaving some of the coarser kind of linen fabrics. The vestiges of a Roman camp are still visible here. It was an equilateral quadrangle of 400 yards, and fortified by two strong ramparts and large ditches, comprised 24 ac ., and guarded an important pass. Pop. 1868.-The Par. is 5 m . by 2 m . Pop. 2745.

CUPAR Fife, a royal burgh, and cap. co. Fife, Scotland, 27 m. N.E. Edinburgh, and a station on the Edinburgh and Northern Railway. It is a place of considerable antiquity, having been erected into a royal burgh by David II., in 1363 The streets are wide, well built, well lighted with gas, and partially paved. It contains several flax, thread, corn, barley, and flour mills; and a snuff mill, a washing or fulling mill glue manufactory, three breweries, two tanneries-one for hides, another for sheepskins-and some brick and tile works. The principal modern structures are the town and county halls-the latter a handsome range of buildings. It has a law library, a public subscription library, containing 4000 volumes, two reading-rooms, a literary and antiquarian socicty, a medico-clirurgical society, and an agricultural and horticultural society. Being the seat of the county courts, it contains a large body of legal practitioners. Cupar was once celebrated for its typographical productions-several editions of the Latin classics, of great excellence, having been printed here. On a mound at the E. end of the town, on which stood an ancient castle of the family of Macduff, was acted, in 1555 the witty and powerfully-sarcastic drama of The Thrce Estates written by Sir David Lindsay of the Mount, and which, there is no doubt, tended to hasten the Reformation. Cupar is associated with St. Andrews, E. and W. Anstruther, Crail Kilrenny, and Pittenweem, in returning a member to the House of Commons. Pop. burgli and par. (1851), 7426.

CUPICA, a vil. and scaport, New Granada, on a bay of same name, near the entrance to the bay of Panama, lat. $6^{\circ} 40^{\prime} \mathrm{N} . ;$ lon. $77^{\circ} 50^{\prime} \mathrm{W}$. The bay of Cupica will proba bly one day be the W. termination of a ship canal across the isthmus of Darien; as the course from the gulf of Darien, ul the river Atrato, thence up its affluent the Naipi, and overland to this bay, would appear to be the route offering greater probabilities of success for such an undertaking than any other on the American continent. Native boats at present ascend these streams, and disembark their goods at a point on the Naipi, about 17 m . distant from the bay of Cupica, the remainder of the journey being completed overland.

CURA (SAN Luis de), a tn. Venezuela, prov. of, and 50 m. S.W. Caracas. The clinate is warm and dry, and the $\mathrm{m} . \mathrm{S} . \mathrm{W}$. Caracas. The climate is warm and $\begin{array}{r}\mathrm{dry} \\ 99\end{array}$
soil yields excellent pastare. There is here a church of some celebrity. Pop. 4000.

CURAÇAO, an isl. Dutch W. Indies, Caribbean Sea, 46 m . N. the coast of Venezuela, between lat. $12^{\circ} 3^{\prime}$ and $12^{\circ} 24^{\prime}$ N., and lon. $68^{\circ} 47^{\prime}$ and $69^{\circ} 16^{\prime}$ W., stretching N.W. to S.E.; 36 m . long and 8 m . broad; cap. Wilhelmstad. It rises wild, bare, and abrupt, and consists of two ridges of greenstone, connected by a limestone dyke, $1 \frac{1}{2} \mathrm{~m}$. thick. Iron and copper occur, but are not wrought. Both soil and atmosphere are dry, and the heat tempered by the sea breezes; yet yellow fever re-appears every sixth or seventh year. The inhabitants often suffer from long and severe droughts, and, even in favourable seasons, they and the shipping depend on deep wells for water. Indigo, cotton, and the cacao, once cultivated, are now abandoned. The opuntia, among other cactuses, grows on the island; yet cochineal has been cultivated carefully, only of late. The tamarind adorns the gardens; the cocoa palm, banana, and several other useful trees, are reared-among which are three varieties of the orange-and the lime, from which the far-famed Curaçao liqueur is made. Sea-parsley abounds, as do also water-melons, pumpkins, cucumbers, and various other vegetables. The great and small maize are cultivated, as food for the slaves. The small proprietors live mainly by rearing horses, asses, horned cattle, sheep, and goats-all originally from Europe or Barbary; but heavy losses are often sustained in herds and flocks from drought. The horses, which are small, but flcet and vigorous, are used only for riding-oxen and cows being employed for draught. The sheep are small, and have hairy wool; the goats are large and handsome. Sea and land turtle, including a few of the tortoise-shell species, abound; together with land birds, sea fowl, and insects, including three kinds of scorpion and very large centipedes. There are several varieties of lizard. The shores teem with magnificent lobsters, crabs, and shell-fish; and the seas furnish plenty of exccllent fish. The staple of the island, however, is salt, obtained by natural evaporation, and of the finest quality. The salt exported in 1847 was 108,347 barrels-that produced 250,000 . The amount of cochineal produced in 1848 was 18,050 lbs. In 1847, 662 vessels, tonn. 36,212 , entered the port of Curaçao. The islands of Curaça, Bonaire, Oruba (or Aruba), and Little Caraçao, form a Datch government, the residence of the governor being at Wilhelmstad. Curaçao was settled by the Spaniards, early in the 16th century; it was taken, in 1632, by the Dutch; and was captured by the British, in 1798, but restored at the peace of Amiens. It was taken again by the British in 1806, and finally ceded to Holland at the general peace, in 1814. Pop. $15,000$.

CURAÇAO (Litties), a small isl. Caribbean Sea, about 6 m. S.E. Curaçao, lat. $12^{\circ} 2^{\prime}$ N.; lon. $68^{\circ} 38^{\prime} \mathrm{W}$. It is low, cannot be seen till very close upon it, and only yields some grass; is uninhabited, but sometimes used as a retreat by fishermen in fine weather.

CURARAY, a river, Ecuador, rising in the Andes, on the N. side of the Llanganate Mountain, 65 m . S.S.E. Quito, and, after a direct course of $385 \mathrm{~m} .$, W.N.W. to E.S.E., through a flat country, inhabited by several Indian tribes, falling into the Napo, 87 m . below San Miguel, lat. $2^{\circ} 42^{\prime} \mathrm{S}$.; lon. $73^{\circ} 18^{\prime} \mathrm{W}$. The Veleno is the only affluent which it receives on the r.; but it is joined by the Sotuno, Nocsino, Turibuno, and Santo, on the 1.

CURDWORTH, par. Eng. Warwick; 3170 ac. P. 693.
CURE, a river, France, rising in dep. Nièvre, near Gien, arrond. of Château-Chinon, flowing ${ }_{\text {® }}$ N.W. into dep. Yonne; and, after receiving several tributaries, falling into the Yonne, after a course of 66 m ., for 32 of which it admits of flotation.

CUREN, or Grenne, a miserable tn. N. Africa, regency of, and 555 m . E. Tripoli, on the plâteau of Barca, occupying the place of the ancient Cyrene, 1800 ft . above sea level, lat. $32^{\circ}$ $50^{\prime} \mathrm{N} . ;$ long. $21^{\circ} 47^{\prime} \mathrm{E}$. Numerous interesting remains of antiquity have been discovered here, including a bath, two temples (aupposed to be of the Roman period), and a magnificent necropolis, containing grottoes, façades, and monuments of various kinds. In one of the grottoes are several curious paintings. Cyrene was the birthplace of Aristippus, Eratosthenes, and Callimachus. It was founded in the year 632 B.c., by a colony of Greeks, from a small island in the Ægean rea, and became the capital of a district, to which it gave itz
name, extending from the Great Syrtis to the Gulf of Platea (Bomba). This conntry continued for 180 ycars under a monarchical form of government, then became republican. It became tributary to Egypt under Ptolemy Soter, and, along with Crete, was ultimately formed into a Roman province. From an early period it was inhabited by numerous Jews.

CURIA-MURIA, or Kooria-Mooria, a group of isls. and a bay, S.E. coast Arabia. The bay extends from Ras-Morebat, on the S.W.-lat. $16^{\circ} 58^{\prime \prime} \mathrm{N}$.; lon. $54^{\circ} 42^{\prime}$ E.-to RasGarwow, on the N.E., lat. $17^{\circ} 50^{\prime}$ N.; lon. $56^{\circ} 15^{\prime}$ E. These two headlands, which form the extreme points of the bay, are greatly dreaded by Arabian seamen, on account of the violent squalls often experienced off them, especially from the end of October to the beginning of March. The islands, five in number, are situate near the entrance of the bay. Of these, Hellaniyah, the largest, is in lat. $17^{\circ} 33^{\prime} \mathrm{N}$. ; lon. $56^{\circ} 6^{\prime} \mathrm{E}$. It has a remarkably barren appearance, is completely destitute of trees, and yields only a scanty subsistence to a few wild goats. Its human inhabitants, about 23 in number, subsist entirely on fish, and are, in other respects, in the most abject poverty. The other islands of the group are barren, uninhabited rocks.

CURICO.-1, A dist. Chili, having N. Colchagua, S. Moule, E. the Andes, and W. the Pacific. It contains a rich mine, where gold and copper are found in equal parts.-2, A tn . cap. of dist., $115 \mathrm{~m} . \mathrm{S}$. Santiago, S . the Teno, on a pleasant plain, at the foot of a hill, lat. $35^{\circ} \mathrm{S}$.; lon. $70^{\circ} 50^{\prime} \mathrm{W}$. Pop. 3000.

CURISCHES, or Kuriscirs Haff, an extensive lagoon, E. Prussia, S.E. shore of the Baltic, from which it is separated by a narrow belt of sand, and with which it communicates, at Memel, by a flood-gate. It is somewhat of a triangular shape, widest in the $\mathbf{S}$., and gradually narrowing to a point in the N., at its outlet. Its greatest length is about 54 m ., and its breadth, from E. to W., near its centre, 14 m . It receives the Memel or Niemen, and several other smaller streams. On the belt of land which separates it from the sea, and is called the Curische Nehrung, the sand is gradually rising. Vegetation is thus destroyed, and many small places have been already buried. The inhabitants who originally dwelt along the lagoon were called Kuren, and hence its name.

CURIT1BA.-1, A m . Brazil, prov. of, and 250 m. S.W. São-Paulo. It is situate among the Cordillcras of Cubatão, near a river of its name, here crossed by a bridge, and is a place of some antiquity, having been founded in 1654 . It is tolerably well built; the streets are paved, and the houses are usually of brick, and occasionally of stone. It contains a handsome parish and two other churches, and a Latin school; and has manufactures of covers and other articles of wool, which are extensively sold in this and the neighbouring provinces. The district is of large extent, and the inhabitants are chiefly employed in cultivation, and in rearing cattle and horses, and large numbers of swine. Pop. of dist. 12,000.2, A river, Brazil, which rises in the $W$. side of the mountains of Cubatão, in the S.E. of prov. São-Paulo, follows a circuitous course towards the S., passes the town of same name, after receiving the São José, turns W., and precipitates itself over the cataract of Cayacunga. Its course beyond this is not well known; but it ultimately joins the Iguaçu, which sometimes is considered as a continuation of the Curitiba, and bears its name.

CURLAND, par. Eng. Somerset; 1160 ac. Pop. 228.
CURNOUL, a tn. Hindoostan. See Kurnoui.
CURRACLONE, par. Irel. Queen's County; 3645 ac. Pop. 749.

CURRAH, a tn . Hindoostan, prov. of, and 40 m . N.W. Allahabad, lat $25^{\circ} 41^{\prime} \mathrm{N}$. ; lon. $81^{\circ} 16^{\prime} \mathrm{E}$; ; on the S.W. side of the Ganges. It is now in a ruinous condition, and is enclosed between steep precipices of conka, or indurated clay, and presents, from the river, nothing but dilapidated houses, and a few ruined mosques and ghauts. At some distance inland are also numerous ruins. It is celebrated in Indian history as the site of a great battle, between the Hindoos and their Mussulman conquerors. Sheikh Cumaul, a celebrated Mahometan saint, his son, and several of his disciples, are buried here.

CURRANS, par. and tn. Irel. Kerry; 5945 ac. P. 2067.
CURRIE, par. Scotland, Edinburgh; 8 m . by $4 \frac{1}{2} \mathrm{~m}$. Pop. (1851), 2190.

## CUTCH

CURRENT ISLANDS. - 1 , An island, N. E. coast, Celebes, Molucca Passage, lat. $0^{\circ} 27^{\prime}$ N.; lon. $124^{\circ} 43^{\prime}$ E. (r.) - 2 , An isl. N. Pacific Ocean, bstween Papua and the Pelew islands, lat. $4^{\circ} 38^{\prime}$ N.; lon. $132^{\circ} 3^{\prime}$ E. (R.) This island is sometimes called Anna, or Pulo Anna. It is only about half a mile in extent, covered with trees, and, although very small and low, is inhabited. It may be seen from the deck at a distance of 12 m . A reef is said to project from its N . and S . extremities.

CURRIGLASS, a vil. Ireland, co. of, and 23 m . N.E. Cork, in the fertile valley of the Bride. At its E. end is the parish church, and a male and female school. Pop. 262.

CURRIN, par. Irel. Monaghan; 11,372 ac. Pop. 6928.
CURRITUCK, an isl. U. States, off the N.E. coast of N. Carolina. It is 30 m . long, and 2 m . broad, and encloses the Sound of same name.

CURRODE, a tn. Hindoostan, presid. Bombay, l. bank, Nerbudda, dist. of, and 30 m . E.N.E. Surat.

CURRY, two vils. and three pars. England, Somerset:1, (-Mallet), par.; 1700 ac. Pop. 630.-2, (North), par. and vil.; 6020 ac . The village, situate in a valley, between the Mendip and Quantock hills, $6 \frac{1}{2} \mathrm{~m}$. E. by N. Taunton, is increasing, and consists of two principal streets, well built, and kept in good order; abundantly supplied with excellent water. It has a parish church, a fine old Norman structure, and a Wesleyan and a Baptist chapel; and a school, cstablished in 1847. Pop. agricultural, 2028.-3, (-Rivell), a par. and vil.; 3870 ac . The village, on a hill side, consists of one somewhat irregular strect; the houses, built of blue lias, have a neat and respectable appearance; water abundant. It has a fine Gothic church and an Independent chapel, and several schools. Quarries of blue and white limestone are extensively worked in the parish, but the people are chiefly agricultural. Pop. 1660.-(Local Corespondent.)

CURRYKIPPANE, par. Irel. Cork; 2709 ac. P. 990.
CURSATO, a mountain chain, British Guiana, intersected by the parallel of $2^{\circ} 47^{\prime} \mathrm{N}$. These mountains, which are densely wooded, extend about 5 m . from N. to S., and the highest suminit rises about 3000 ft . above the Takutu.

CUR'TATONE, a vil. and com., Austrian Italy, gov. Milan, prov. of, and 3 m . from Mantua, on the Lago Superiore of Mantua, and the high road from Cremona to Milan. It contains a parish church. The district around has rich pastures, and also raises much corn, flax, and hemp. Pop. 5306.

CURTIS ISLANDS.-1, An isl. Bass Strait, S.S.E. Wilson's Promontory, 1060 ft . high, in lat. $39^{\circ} 28^{\prime} \mathrm{S}$. ; lon. $146^{\circ} 40^{\prime}$ E. (r.) - 2, An isl. (dry sand) between the N.W. coast, Australia, and the Island of Timor; lat. $12^{\circ} 27^{\prime} \mathrm{S}$. ; lon. $123^{\circ} 55^{\prime}$ E. (R.)-3, A group of small isls., S. Pacific Ocean, about 590 m. N.N.E. from the N. end of the most N. of the New Zealand islands; lat. $30^{\circ} 36^{\prime}$ S.; lon. $179^{\circ} 14^{\prime}$ W. (r.)

CURVELLO, a tn. Brazil, prov. Minas-Geraes, between the Vellas and the São Francisco, about 150 m . N.N.W. Villa Riea. It contains a parish church, and is surrounded by a district of remarkable fertility. All the inhabitants are engaged in cultivation, or in rearing cattle. Pop. 1500.

CURY, par. Eng. Cornwall, 3420 ac. Pop. 541.
CURZOLA, or Coraola [anc. Corcyra-Nigra; Slavonic, Korzul], an isl. Adriatic, the most beautiful of all the islands of Dalmatia; lat. (Fort Biaggio) $42^{\circ} 57^{\prime} 24^{\prime \prime}$ N.; lon. $17^{\circ} 8^{\prime}$ E. (r.) ; separated by a narrow strait from the peninsula of Sabioncelle; greatest length, W to E.. about 25 m. ; average breadth, about 4 m .; area. $68 \mathrm{sq} . \mathrm{m}$. It is hilly, and abounds in trees and brushwood, which grow down to the water's edge, particularly on the S . coast. In the interior the pine attains a great size, and yiclds excellent timber for shipbuilding, for which the natives of the island have long been famous. Vegetation being exceedingly rapid, the cut timber is soon replaced by a new growth. The climate is mild, and well suited to the cultivation of the olive and vine, which is extensively carried on ; little grain is grown. Water is deficient. Many of the inhabitants are engaged in the fisheries, which are very productive. Pop. 6500.

CURZOLA, a th. Austria, cap. of above isl., and situate near its N.E. extremity, on the strait betwixt the island and the peninsula of Sabioncello. It rises from the water's edge in a triangular form, is surrounded by massive walls, defended by huge old towers, built in 1420 . A fort commands the strait. The town is regularly built, the streets running at
right angles to each other, and at the higlest part is the piazza, on the one side of which is a church, formerly the cathedral, with its campanile, forming the apex of the triangle. On the other side is the palace of the Venetian governors. The suburb is kept alive by shipbuilding, Curzola being still famous for its boats. All the vessels of the Austrian Lloyd's company are built here. Pop. 1846.

CUSANO, a tn. Naples, prov. Terra-di-Lavoro, 20 m . N.N.E. Caserta. It is surrounded by mountains, and has three churches, an hospital, and several manufactories of coarse cloth. Pop. 4430.

CUSHENDALL, or Nemtown-Glenns, a ti. Ireland, co. Antrim, 31 m. N.N.W. Belfast, beautifully situate on the slope near the sea, and the mouth of the Glenagan, which runs through it. The rown consists of four principal streets, at right angles to each other, straight, and tolerably kept; houses of stone, generally small, but neat structures, of two stories. In the centre of the town is a curious square; and there are an Episcopal church, and a R. Catholic chapel, both large handsome buildings; and three schools. The women are chiefly employed in knitting and crotchet work; and the men are engaged in fishing or in tillage. Pop. 481.-(Local Correspondent.)

CUSHENDEEN, a vil. Ireland, co. of, and 36 m . N.N.W. Antrim, on a small bay of same name. It is a coast guard station, and has a small church, and two schools. The harbour is a place of shelter for small craft.-(Local Correspondent.)

CUSHINSTOWN, par. Irel. Meath; 1200 ac . Pop. 366. CUSOP, par. Eng. Hereford; 2570 ac. Pop. 223.
CUSSET, a tn. France, dep. Allier, 32 m . S. by E. Moulins, agreeably situate at the extremity of a double valley, formed by the rivers Sichon and Iolan. The surrounding hill-slopes are covered with vines. There are here manufactures of blankets and cotton coverlets, silk edging, cord, and laces, cotton yarn, leather, and chemical stuffs. It has also a paper, and some extensive flour mills. It was formerly surrounded by high walls, flanked with enormous towers, but these have almost entirely disappeared. Pop. 3856.

CÜSTRIN, a tn. Prussia. See Küstrin.
CUTCH, a prov. of W. Hindoostan, between lat. $22^{\circ} 45^{\prime}$ and $24^{\circ} 40^{\prime} \mathrm{N}$. ; and lon. $68^{\circ} 40^{\prime}$ and $71^{\circ} 20^{\prime}$ E.; having the Gulf of Cutch S., Scinde N., with the vast salt morass, called the lunn, intervening, the Arabian Sea W., and provs. Marwar and Mewar E. Length, E. to W., about 160 m. ; breadth, N. to S., 110 m. ; both measurements including the liunn, which is considered to be within the district. During the rainy season, Cutch is wholly insulated by water; and during the dry season, by a desert space from 4 to 60 m . in breadth. Almost the whole surface of the country, near the hills, is covered with volcanic matter; tlie rocks appear to have been split by the action of fire, and their vicinity abounds with specimens of metallic scoria-all proving it to have been in times past, as it was very recently, the scene of violent convulsions. A range of low, rocky, barren hills, rising here and there into rugged and volcanic cones, intersects the province, E. to W., dividing it nearly into two equal parts. It has no wood, and no rivers with perennial streams, but many torrents during the rainy season. The arable portion consists mostly of valleys, the general soil of which is a light clay, covered with a coarse sand, by no means fertile, the whole province not producing sufficient grain for the subsistence of its inhabitants; while, with exception of dates, which are good, fruits are reared with difficulty. Cotton, however, is grown in considerable quantity, and exported to Scinde, and other provinces, in exchange for grain. The horses of Cutch are much esteemed by Europeans in India. Camels and goats also thrive; but the cattle are of an inferior description. Wild asses are met with on the salt wastes, and their flesh is said to be good eating. They are larger and stronger than the domestic ass, and are remarkably swift, but fierce, and untameable. The natives are represented as addicted to every kind of vice, and treacherons to a proverb. They are, however, adventurous mariners, presenting in this a remarkable contrast to the timid navigators of the East ; they also excel in naval architecture. A violent earthquake occurred at Cutch on June 16, 1819, when the principal town, Bhooj, was converted inte a heap of ruins, and the E., and almost deserted channel of the Indus, which bounds Cutch, was greatly changed. This estuary, or inlet of the sca, was, before the earthquake,
fordable at Sukput at half and ebb tide. Since the shock, it has had 18 ft . at low water, and by this, and other remarkable changes of level, a part of the inland navigation of that country, which had been closed for centuries, became again practicable.

The Runn of Cutch is a flat region, of a very peculiar character, having an area of about 7000 sq. m., and is apparently the dried up bed of an inland sea. For a great part of every year it is dry, but during the monsoons, when the sea runs high, the salt water driven up from the Gulf of Cutch, and the creeks at Sukput, with both of which it communicates, overflows a large portion of the Runn, especially after rains, when the soaked ground permits the sea water to spread rapidly. The surface is sometimes encrusted with salt about an inch in depth, in consequence of the evaporation of sea water. Islands rise up in some parts of the waste, and the boundary lands form bays and promontories. The former are a favourite resort of the wild asses.-The Gulf of Cutch is an arm of the sea, running N.N.E. between Cutch and the peninsula of Gujerat, about 25 m . wide at its entrance, and upwards of 110 m . in length. Its entrance is about lat. $22^{\circ} 40^{\prime} \mathrm{N}$.; lon. $69^{\circ} 30^{\prime} \mathrm{E}$. The danger of navigating this gulf has been greatly exaggerated. The eddies and dirty appearance of the sea, which boils up and bubbles in an extraordinary manner, present a frightful aspect to a stranger, but the natives traverse it at all seasons without fear. It is tolerably free from rocks, and the Cutch shore is sandy, with little surf.-(Lyell's Geology; Oriental Interpreter; Mrs. Sommerville's Physical Geography; Hamilton's East India Gaz. ; Burnes' Bokhara.)

CUTCH GUNDAVA, a division or prov., Beloochistan, occupying a N.E. projection of that country, from which it is, in a manner, separated by the Hala range of mountains that stretch along its W. frontier, and in which is the celebrated Bolan Pass. It lies between lat. $27^{\circ} 40^{\prime}$ and $29^{\circ} 50^{\prime} \mathrm{N}$. ; and lon. $67^{\circ} 20^{\prime}$ and $69^{\circ} 17^{\prime}$ E.; bounded, N. and N.E. by Afghanistan, E. and S.S.E. by Scinde, and W. by the Belooche districts of Jhalawan and Sarawan. It is about 160 m . in length, N. to S., and 130 broad, E. to W. Area, estimated at 10,000 sq. m. The principal characteristics of this province are its large extent of level surface, its excessively sultry climate, which has become proverbial, its scarcity of water for agricultural purposes, which restricts its cultivation, both as to quantity and variety, its large population, and great number of towns and villages. In the N.E. is a hilly tract running along the S. frontier of Sewestan, being a continuation of the Harrand and Dajil mountains. In the S.E., the desert of Shikarpoor stretches for a distance of 40 m ., described as a boundless level plain of indurated clay, of a dull, dry, earthy colour, and showing signs of being sometimes under water. The aspect of this district is dreary and repulsive in the extreme, the only vegetation to be met with in its dismal wastes being a few saline plants (Euphorbia salina), and stunted bushes. No water is here to be found to supply the necessities of the traveller, and when any is precipitated into it, at certain seasons, from the higher parts of the province, it is instantly absorbed by the parched soil. The Nari river flows nearly through the centre of Cutch Gundava. It rises in the hills near Toba, in Afghanistan, enters the province near Dadur, and loses itself in the desert of Shikarpoor. Its banks are thickly dotted with villages. The climate of Cutch Gundava is so oppressive from April to Angust, that communication is nearly suspended, and travelling is attended with great risk from the hot winds, which sweep over the parched and arid plains with fatal violence. No less terrific are the radiations from the heated surface of the soil. The winters, however, are extremely mild. The natural vegetation of the province is very limited, consisting of a few of the saline plants already mentioned, and some stunted mimosas, and ber trees, the last being met with of more stately growth in the vicinities of towns and villages, where also are gardens, in which orange, lime, and mango trees thrive; and in the N. provinces, groves of date trees are seen enlivening the towns, and skirting the hills. Notwithstanding the general barrenness and obstinacy of the soil, there are yet favoured tracts which, with due irrigation and manuring, are rendered extremely fertile, producing cotton, sugar-cane, madder, dates, oranges, limes, and pomegranates. The grains most extensively cultivated are jowary or Indian millet (Holcus soryhum), and bajra (Holcus spicatus), which are adapted to a dry soil. Cutch Gundava is inhabited
by three very distinctly marked races: the Jets, Rinds, and Brahuis. The first are the primitive inhabitants, the others are more recent settlers. All these classes are Mahometans, generally of the Sunni persuasion. There are also a few Hindoos, who live in towns, and principally conduct the commercial affairs of the country. The principal towns are Gundava, the capital, Dadur, Bhag, Lehree, and Kotree. Pop. estimated at 100,000 .

CU'TCOMBE, par. Eng. Somerset; 7760 ac. Pop. 843.
CUTHBERT (ST.), several pars. Eng. :-1, Cumberland; 8740 ac. Pop. 10,965.-2, Norfolk; 4040 ac. Pop. 1543. -3 , Somerset; 14,100 ac. Pop. 3563.

CUTIGLIANO, a tn. and com. Tuscany, prov. of, and 33 m. N. W. Florence, l. bank, Lima, here crossed by a handsome bridge. It is well built, and contains a church and an old castle. Pop. 1151.

CUTTACK, a maritime dist. Hindoostan, presid. Bengal, prov. Orissa ; bounded, E. by the Bay of Bengal; N.E. by prov. Bengal; W. by various petty native states, formerly tributary to the Nagpoor Mahrattas; and S.W by the N. circars; extreme length, N.E. to S.W., 180 m. ; extreme breadth, 110 m. ; area, $7104 \mathrm{sq} . \mathrm{m}$. It is well watered, being intersected by the Mahanuddy, Braminy, Coyle, and smaller streams, all abounding with fish. During the dry season the minor streams dry up; but in the rainy season they swell to large rivers. A range of hills running parallel to, and at some distance from the coast, produces teak, and other timber, which are floated down to the sea during the rainy season. The forests being extremely unhealthy, can only be explored during April and May, when the noxious exhalations somewhat abate. Botl the plains and hilly districts are infested with every species of wild animals, and a vast number of snakes and veะemous reptiles. Rice, pulse, sugar, spices, and dyestuffs are grown along the coast, which is low and marshy, and wheat and maize in the hilly regions. On the coast is extensively manufactured the best and whitest salt made in India. The chief towns are Cuttack the capital, Balasore, and Juggernauth. Pop. 1,984,600.

CUTTACK [Catak, a royal residence], a tn. Iindoostan, cap. above dist., r. bank, Mahanuddy, 60 m . from its embouchure, and 230 S.S.W. Calcutta. It is straggling, but contains a number of good bouses of hewn stone and brick, but mostly in very indifferent repair, from the poverty of their inmates. The largest dwelling-houses are those of the former amils and governors, but they also are all fast falling to the ground. The principal building is the Kuddum Russool in the suburbs; it has no pretensions to elegance of design, but contains a number of sacred relics, and the ground around it is chiefly used as the common burial place for the Moslem inhabitants. The only other building worthy of notice is the Jumma musjid, situated in the principal street; it is also a clumsy building, and is used both as a school and place of prayer. The Hindoo temples, with exception of an unfinished one, are all small and inelegant, and none are of any antiquity. The town has little trade; its chief manufactures are brass cooking utensils and shoes, for which the place is famous. Cuttack is protected from inundation by vast embankments faced with stone. The river during the rainy season is $1 \frac{1}{2} \mathrm{~m}$. broad, and 38 or 40 ft . deep; but during the dry season it is narrow, with a depth of only 3 ft . Cuttack is the most S . station in the Bengal presidency, and is esteemed exceedingly healthy, from being near the sea, and the absence of vegetation around it. About 1 m . N.W. from Cuttack is the fort of Barahbattee, now falling into decay, the stones being taken from it for various public works. It was of the form of a parallelogram, and was originally defended by high square bastion towers, projecting at different distances. It was surrounded by a broad and deep moat, faced with stone. On being taken possession of by the British in 1803, the ditch was drained, and great numbers of the alligators, with which it was filled, were either destroyed, or made their escape to the river. Pop. 40,000.-(Journal of the Asiatic Society of Bengal; Pegg's Orissa, \&c.)

CUTTUB, a small tn. Hindoostan, prov. of, and 13 m . S. Delhi. Near it is the remarkable and beautiful pillar called Cuttub Minar, or Cutleb Minar. It is built of very fine, hard, red sandstone, elegantly fluted, with balconies occurring at intervals. It is 62 ft . in diameter at the base, and rises, gradually tapering, to the height of 265 ft ; the whole
being crowned by a small dome, supported by eight square pillars. A winding staircase, of 383 steps, conducts to the summit of the column, from which one of the most magnificent views conceivable is obtained.

CUTTVP, a tn. of N.W. Africa, state of, and $75 \mathrm{~m} . \mathrm{N}$. by W. Jacoba ; lat. $9^{\circ} 12^{\prime} \mathrm{N}$. ; lon. $10^{\circ} 8^{\prime} \mathrm{E}$. It consists of an limmense number of hamlets, almost adjoining each other, occupying an extensive and beautiful plain, adorned with a variety of elegant and flourishing trees, and exhibiting a delightful appearance of rural comfort and simplicity. It is the seat of a considerable traffic in slaves and cattle; and also in goora nuts, rice, honey, and other natural productions of the country; and in cutlery, rings, needles, and various other articles of manufacture; these diflerent commodities attracting purchasers from an immense distance.-(Landers' Records.)

CU'TWAII, a tn. Hindoostan, prov. Bengal, 80 m . N.N.W. Calcutta; lat. $23^{\circ} 37^{\prime} \mathrm{N}$. ; lon. $88^{\circ} 10^{\prime}$ E. It has some manufactures of brass vessels, and is one of the ports on the Hoogly for the exportation of the produce of Burdwan. An action took place here with the troops of Cossim Ali in 1763.

CUVO, a river, S.W. Africa, S. Guirea, Benguela, rises in a hilly district, near a place called Zambo; lat. $12^{\circ} 52^{\prime} \mathrm{S}$. ; lon. $17^{\circ} \mathrm{E}$. From this point it flows N.W. to lat. $11^{\circ} 10^{\prime} \mathrm{S}$. ; lon. $15^{\circ}$ E., when it turns nearly due W., and falls into the sea at Gunza, from 15 to 20 m . N. Novo Redondo, lat. $11^{\circ} 28^{\prime}$ S. Its whole length is about 220 or 230 m .

CUSHAM, par. Eng. Oxford; 520 ac. Pop. 222.
CUXHAVEN. a seaport th. Germany, belonging to IIamburg, bail. Ritzeluittel, at the mouth of the Elbe, on its S.W. side. It is 58 m . N.W. Ilamburg; lat. $53^{\circ} 53^{\prime} 42^{\prime \prime}$ N.; lon. $8^{\circ} 43^{\prime}$ E. (r.) The harbour is spacious and deep, and furnished with a lighthouse, and is a quarantine station. Vessels lie at anchor off this place waiting for favourable winds, and when going up the Elbe call here for pilots. In winter, when the river is frozen, passengers going to and from England to Hamburg, cmbark and land at Cuxhaven. It is much frequented in the summer season by sea bathers, particularly from Hamburg. The chief magistracy is always vested in a senator of that city. Packets ply regularly between it and London, Havre, and Rotterdam. The inhabitants are mostly fishermen and pilots. Pop. 1200.

CUXTON, par. Eng. Kent; 1330 ac. Pop. 376.
CUXWOLD, par. Eng. Lincoln; 1370 ac. Pop. 62.
CUYABA, a tn. Brazil. See Cuiaba.
CUYAIIOGA, a co., tn., and river, U. States, Ohio. The county lies along the S . shores of Lake Erie, about 38 m . in length E. to W., and about 6 in breadth. Principal town, Cleveland, on Lake Erie, at the mouth of the Cuyahoga.The rown, finely situate on the same river, about 128 m . N.E. Columbus, has extensive paper and other manufactures, and is rapidly rising in importance.--The niver, a very considerable stream, rises in about lat. $41^{\circ} 48^{\prime} \mathrm{N}$., whence it tlows S.W. for upwards of 45 m ., when it benas round to the N. W., and falls into Lake Eric at Clevcland, lat. $41^{\circ} 30^{\prime} \mathrm{N}$. It bas some fine falls, and is extensively applied to hydraulic purposes.

## CUYK, a tn. Holland. See Kuik.

CUYOS LSLANDS, a group of small isls., Philippines, Mindoro Sea, between Palawan and Panay. The largest of them, Great Cuyo, is in lat. $10^{\circ} 52^{\prime} \mathrm{N}$.; lon. $121^{\circ} 15^{\prime} \mathrm{E}$. (R.) They are mostly high and rocky, but afford provisions of all kinds, and vessels may here water. The inhabitants are laborious, affable, and courageous; and trade with the neighloouring islands. They are also distinguished from the people of the islands around by their clcarer colour, their habits, language, and more advanced civilization. Cuyo is defended by a fort, aud has a small port on the N.W. side.

CUYUNI, a river, British Guiana, which joins the Essequibo from the W., after receiving the Masscroony, in lat. $6^{\circ} 26^{\prime}$ N.; lon. $58^{\circ} 45^{\prime} \mathrm{W}$. It is greatly obstrncted by rapids and falls. The territory it traverses is extremely fertile, and yields cotton of a superior quality.

CUZCO, an anc. city and dep., Peru. The c1ty, cap. of the dcp., is situate in a wide valley abont $11,300 \mathrm{ft}$. above sea level, between the rivers Apurimac and Urubamba; lat. $13^{\circ} 30^{\prime} 55^{\prime} \mathrm{s} . ; \operatorname{lon} .72^{\circ} 4^{\prime} 10^{\prime \prime} \mathrm{W}$. The houses are built of stone, covered with red tiles, and are of fine proportions, being many of them, of the era of the Incas, and partaking of the peculiar and striking style of architecture practised by the

Peruvians of that period. Amongst the principal architectural remains of its ancient grandeur, are the fortress, the cathedral and the convents of St. Augustine and La Merced, the latter three large buildings, and in design and workmanship inferior to few in the old world. The fortress, which was erected by the Incas for the protection of their capital, the ruins of which stand upon a hill a little $N$. from the city, is a stupendous specimen of Cyclopean architecture, many of the stones employed in the structure being of the weight of 150 tons, and though of irregular shape, so nicely adjusted to each other, that no mortar was required. It is, and has always been, a source of perplexity to conceive how these enormous masses of stone were placed in their positions, as it is not known that the Pcruvians had any machinery of power sufficient to accomplish this feat. Other objects of interest are the baths, the one of warm, and the other of cold water; the ruins of a large stone-way, which was built by order of the Incas, and which, it is said, reached as far as where Lima now stands, a distance 400 m. ; the vestiges of some subterraneous passages which led to the fortress from the houses or palaces of the Inca, and in which passages the walls were cut very crooked, admitting for a certain space one person only to pass at a time, when shortly afterwards two might pass abreast. Cuzco bas still a number of churches and convents, with several monasteries, collegiate schools, and a university. The inhabitants manufacture cotton and woollen goods, leather, and parchment, and excel in embroidery, furniture carving, painting, and senlpture.

Cuzco is the most amcient of the Peruvian citics, and was at one time the cajital of the empire of the Incas. It was founded, according to the common tradition, in 1043, by Nanca Capac, the first Inca of Peru. In 1534, it was taken by Pizarro, who was surprised with the grandeur and magnifieence it exhibited. Its streets were then large, wide, and straight; and its churches, palaces, and temples, the latter including the famous temple of the Sun, richly adorned with ornaments of gold and silver, which glittered on the walls. While still in possession of Pizarro, it was besieged by the whole Peruvian force, and a great part of it destroyed. Pop. estimated at 47,000 .

The department lies chiefly between the parallels of $13^{\circ}$ and $15^{\circ} \mathrm{S}$., and the meridians $70^{\circ}$ and $73^{\circ} \mathrm{W}$., and comprchends all the countries drained by the affluents of the Pilcamayo, and the upper course of the Apurimac. It consists of 1 I provinces, and has an area of $44,900 \mathrm{sq} . \mathrm{m}$. Nearly ninetenths of the population are Indians; the mines are not much worked, and the principal objects of trade are the woollen, cotton stuffs, and leather, which are manufactured by the inlabitants. Pop. 263,924.

CWM, par. Wales, Flint. Pop. 527.
CWM-Toypdwe, par. Wales, Radnor. Pop. 883.
CWMCARVAN, a par. England, Monmouth; 2830 ac. Pop. 315.

CWMDU, a hamlet, S. Wales, co. Glamorgan, $8 \frac{1}{4} \mathrm{~m}$. N. by W. Eridgend, picturesquely situate in a valley, through which flows a tributary of the Llynvi. The district, which is mountainous, prodnces iron ore and coal, both of which are wrought. Pop. 2880.

CWMYOX, par. Eng. Hereford; 9870 ac. Pop. 718 :
CYCLADES, or KYklades, the name given to the principal group of isls. in the Grecian Archipelago, belonging to the kingdom of Greece, and now formed into a separate nomos, subdivided into five eparchs or dioceses-Tenos, Naxos, Seros or Mermapolis, Melos, and Thera or Santorin, these being the most important islands of the group. They are situatel between lat. $36^{\circ}$ and $38^{\circ}$ N., and lon. $24^{\circ}$ and $26^{\circ} 30^{\prime}$ E. They are generally mountainous, and cvidently of volcanic formation. In several of them the soil, formed of decomposed lava, is of remarkable fertility, producing much barley, wine, olive oil. and silk; in others the surface is almost sterile, and the principal products are sulphur and alum. The inhabitants are mach addicted to a seafaring life, and have often distinguished themselves by their maritime prowess. United pop. estimated at 18,908 .

CYFFIE, par. Wales, Carmarthen. Pop. 486.
CYPRIEN (St.), a tn. France, dep. Dordogne, 8 m . W. Sarlat, at the foot of a rugged hill, r. bank, Dordogne. It has several fairs, and in the neighbourhcod is tho mineral spring of Panasson. Pop. 1680.

CYPRUS [Turkish, Kibris; Greek, Kurpss; French, Chypre; German, Cypern; Italian, Cipro], an isl. of Turkey in Asia, and the most E. in the Mediterranean, near the mouth of the bay or gulf of Iskenderoon. It is 44 m . S. Cape Anamour, in Anatolia, and 76 m. W. Latakia, in Syria; Cape St. Andrea, its N.E. extremity, is in lat. $35^{\circ} 41^{\prime} 42^{\prime \prime}$ N.; lon. $34^{\circ} 35^{\prime} 30^{\prime \prime} \mathrm{E}$. (r.); and Baffa, near its S.W. extremity, is in lat. $34^{\circ} 47^{\prime} 18^{\prime \prime} \mathrm{N}$. ; lon. $32^{\circ} 24^{\prime} 30^{\prime \prime}$ E. (r.); and it stretches from Cape Gatto, lat. $34^{\circ} 29^{\prime} 18^{\prime \prime}$ to lat. $35^{\circ} 41^{\prime} 42^{\prime \prime}$ N., or Cape St. Andrea. It lies S.W. and N.E., and is about 148 m . long, with a width, for 100 m. W. to E., of about $40 \mathrm{~m} . ;$ but its N.E. extremity narrows greatly, and terminates in a long, narrow peninsula, about 40 m . long, and not over 15 m . broad, The whole island is occupied by a range of mountains stretching N.E. to S.W., known in heathen mythology as the third range of Olympus, and whose culminating points, Santa Croce (Olympus), and Thrados, are 7000 ft . high. On the N.E. side of the island the slopes of these mountains are beld and rugged; and one of the clevated valleys contains Nicosia, the modern capital of the island. On the S. side the hill-slopes are even bolder, presenting a deeply scrrated outline, with thickly wooded sides, furrowed by deep valleys. The prevailing formation of the mountain-range, in its N.E. division, is limestone, which assumes many abrupt and remarkable forms-an example of which may be seen in the accompanying view of Youz Bir Euv, or the Hundred and One Houses being a portion of a scarped mountain between

YOUZ BIR EUV, OR THE HUNDRED AND ONE HOUSES, CYPRUS From Cassas, Voyage Pittoresque de la Syrie de la Phoenicie, \&c.

Nicosia and the coast-town of Cerina. The S.W. portion of the mountains is of crystalline formation, and yields excellent asbestos; also talc, red jasper, copper in abundance, gold, silver, cmeralds, and the Paphian diamond; but the only minerals wrought are the first three named.

Cyprus is deficient in water; its streams being chiefly mountain torrents, which dry up in summer, the only permanent river of importance being the Pedia [anc. Pedceus], which waters the valley of Nicosia, flows $E$. and falls into the sea at Famagosta. The climate is in general healthy, excepting in some points on the $S$. coast during the heats of summer, much increased by the burning winds from the Arabian and African deserts, which, causing a rapid evaporation, give rise to a dangerous malaria. Temporary blindness is sometimes occasioned by the sun's reflection from the white chalky soil; and to avoid sun-stroke, the natives wrap their heads in thick shawls. On the N. side of the
island the climate is mere temperate; and on the elevated grounds severe colds are experienced in winter, the summits of the mountains being covered with snow during several months of the year. There are no large wild quadrupeds; but foxes, hares, small game, and several species of serpents, abound; and bees constitute an article of riches. Clouds of locusts sometimes destroy the harvest.

The mountains of Cyprus are covered with vast forests of excellent building timber, and the island is esteemed the richest and mest fertile in the Levant; yet it has few level tracts of country, those around Nicosia, Famagosta, Larnica, Limasol, and Baffa being the chief. Agriculture, however, is in a very backward state, caused, in a great measure, by the oppressive exactions of the Turkish Government, and of the Greek priesthood. The cultivable surface of the island is estimated at about $2,500,000$ acres, of which not much over $130,000 \mathrm{ac}$. are actually under tillage. Fertile spots in the neighbourhood of the village are cultivated, but the more distant tracts are neglected. Of the vegetable products, cotton may be esteemed the most important; it is sent chiefly to Marseilles and Leghorn; excellent wheat and barley are raised, the surplus of which is exported to Syria; tobacce of good quality is grown in the S.W. of the island, and is on the increase; madder, after that from Smyrna, the best in the Levant, is raised in numerous lecalities, and in quantity augments ycarly. Silk is produced abundantly in the vicinity of Baffa, and in other quarters; and only needs a better process of winding to be adopted, to make it fetch a higher price, and be more sought for in the markets of Lyons and Liverpool. Carobs are extensively grown and exported, chiefly to Odessa, to be eaten by the Russian peasantry, during lent. Olive oil might be largely produced, but is much neglected. Wine is the most noted production of the island. It is of five qualities: the first twe are black and red common wines, heady, and with a strong taste of tar, from being kept in tarred casks; they are exported to some extent to Alexandria, but never to Europe. Commanderie is the wine most sought after. It is grown near Limassol, near the site of the ancient commandery of the Knights of the Temple and of Malta. At first topaz-colourcd, it becomes black when many years old, and is viscous, thick, strong, and an excellent stomachic. The other two sorts are muscat and morocanella, both also excellent wines. Other vegetable products are sugar, flax, sesamum, poppies, liquorice, exquisite fruits - including the orange, citron, date, fig, pistachio nuts, caper, \&e.
Manufacturing establishments there are none. Salt, in large quantities, is obtained from salines, at Limassol, and Larnica. The Greek females of some of the towns and vil lages do beautiful embroidery, and make silk net, which will stand comparison with the finest European lace. The females also weave some common cotton, woollen, and linen fabricsthe last chiefly sacking. Good morocco leather is made at Nicosia; and calicoes, imported from Britain, are here dyed in brilliant colours, and exported to Syria, Smyrna, and Constantinople. Pottery, sufficient for home consumption, is made; and, on the W. side of the island, the peasantry distil rose, orange, and lavender water, and myrtle and ladanum oil.

The Cyprian ladies, so famous in antiquity, are handsomer, taller, and more stately than those of any other Grecian island. Their features are regular and dignified, exhibiting that elevated cast of countenance which is so universally admired in the works of Grecian artists.

The island forms a pashalic, of which the capital is Nicosia. The principal ports, as well as the principal towns, are Cerina, Famagosta, Larnica, Limassol, and Baffa. The pasha, who has supreme power, has under him 12 lieutenants, one over each of the twelve districts of the island, whose affairs they administer in conjunction with an officer, called demogeronte, chosen by the Greeks of the district. The pasha is assisted in levying taxes, \&c., by a divan, or council, of eight members, consisting of the mufti, the mollah-who is the judge of Nicosia-the commandant of the forces, the principal Turkish agas, the Greek archbishop, and one of the demogerontes. For ecclesiastical affairs the island is divided into the four dioceses of Nicosia, Larnica, Cerina and Baffa and Limassol-the first being administered by an archbishop, appointed by the sultan.

Originally peopled by the Phonicians, and afterwards colon-
ized by the Greeks, Cyprus was, by the latter people, dedicated to Venus, whose most notorious temple was at I'aphos, now Baffa. It belonged successively to the kings of Persia, of Egypt, and to the Romans; and to the Greeks of the lower empire. It was one of the first places, out of Palestine, that received the gospel-preached at first, however, to Jews only —and it was visited by Paul and Barnabas, on their missionary tour. In the time of the Crusades it was taken from the Saracens, by Richard I. of England, and given by him to the princes of the Lusignan family, who held it till the ycar 1570, when it was taken by the Turks, who, for nearly two centurics and a half, exercised on the miserable inhabitants every species of tyranny and oppression-seizing their crops, when they ventured to raise them, and reducing them to the utmost poverty and wretchedness, by exorbitant taxes and iniquitous exactions. In 1830 it was taken by the Viceroy of Egypt, but was retaken, in 1840, by the Turks, who have introduced various changes into the government of the island, tending much to the advantage of the inhabitants. It is in consequence of the clain made by the house of Savoy to the heirship of the Lusignan family, that the King of Sardinia still bears the title of King of Cyprus and Sardinia. Pop. (1841) estimated at 100,095 ; of which 70,000 were Greeks, 30.000 Turks, and the remainder R. Catholies, Maronites, and Armenians.- (Bulletin de la Soc. Geo., 1847; Chesney's Euphrates Expedition; Kitto's Billical Cyclopredia.)

CYR (St.), a vil. France, dep. Scine-ct-Oise, $2 \frac{1}{2} \mathrm{~m}$. W. Versailles. A seminary was founded here for the education of the daughters of poor nobles, by Lous XIV., at the persuasion of Madame de Maintenon, where 250 noble ladies were educated, free of expense, till they had attained their 20th year. After the great revolution, the institution was first made a branch military hospital, and was finally converted, by Napoleon, into a military school for the education of officers. The number of pupils is 300 , of whom about 140 leave annually, and are appointed to regiments in which there may happen to be vacancies. Pop. of vil. 1718. There are $\mathbf{1 4}$ other villages in France named St. Cyr.

CYRENE, an anc. city, Africa. See Curen.
CYRUS(St.), par. Scot. Kincardine; 5 m. by 3 m. P. 1600 ,
CYSOING, a tn. France, dep. Nord, 8 m . S.E. Lille. It has manufactories of calico, beet-root sugar, and saltpetre; and several tanneries and oil mills. Pop. 1716.

CYZICUS, a peninsula, formerly an isl. of Asia-Minor, Anatolia, stretching into the sea of Marmara, $60 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Constantinople, and connected with the mainland by a narrow isthmus It is $18 \mathrm{~m} .$, E. to W., by $9 \mathrm{~m} .$, N. to S., and is remarkable for its bcautiful and picturesque appearance. Of the ancient town of Cyzicus, which was built on its $S$. extremity, there are some remains, the most important of which are those of a fine amphitheatre.

CZARNIKOW, a tn. Prussia, gov. of, and $45 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Bromberg, cap. circle of same name, on the Netz. It has two R. Catholic churches, and a Protestant oratory; some linen weaving, ard seven general horse and cattle markets. Pop. 2900 . The circle-area, 447 geo. sq. m.- is watered hy the Netz, Drag, and Ralnach, besides several lakes. Theie is a good deal of forest land, but the greater part of the surface is swampy and sandy, and the soil by no means fertile. 'op. 40,554.

CZASLAU, a tn. and circle, Bohemia. The town, on a fertile plain, 45 m . E.S.E. Prague, contains a parish and a deanery church-the latter surmounted by the highest steeple of Bohemia, and remarkable as the burial place of the celebrated Hussite leader, John of Zisca. The Austrians were here defeated by Frederick the Great, in 1742 . Pop. 3400 .The circle is bounded, N.E. by circle Chrudim, N.W. Kaurzim, S. Tabor, and S.E. Moravia, area, 1242 sq. in. In the S.E. it is mountainous, being traversed by several lofty ridges from Moravia, in which its chief rivers, the Dobrawa and Sarawa, take their rise, and procced N.W. in the direction of the general slope of the country. The circle is well wooded and fertile, yielding excellent crops of corn and flax. Both game and fish abound. The minerals include silver, iron, nitre, garnets, and other precions stones; fron, in particular, is extensively mined and manufactured. The other manufactures are glass, paper, and cotton goods. The principal employment, however, is agriculture and catle rearing. Pop. 234,000.

CZEBE, or Tscireben, a vil. Muugary, co. Zarand, on the ligh road towards, and atout 18 m . from Deva. It contains a Greek non-united church. Coal is worked in the neighbourhood; and there are gold mincs in the hills of Magura. Pop. 1576.

CZECZE, a vil. IIungary, circle Thither Danmbe, co. Stuhlweissenburg, on the Sarviz, over which there is here a ferry, about 9 m . from Fuldvar. It contains a Protestant and a R. Catholic church. Pop. 2190.

CZEGLED, a large market tn. IIngary, co. Pesth, circle Ketskemet, on a plain, between the Danube and Theiss, 39 m. S.E. Pesth. It has a R. Catholic and Protestant church, and contains several handsome buildings. There are some considerable brewerics here. The land in the vicinity is well cultivated, and produces large quantitics of grain and common red wine. Pop. 16,650, mostly Protestant.

CZEIKOWI'TZ, a market th. Moravia, circle of, and 24 m. S.E. Brünn. It contains a church and a castle, and has a trade in wool, and two annual fairs. Pop. 1670.

CZENS'OCHAU, a tn. Russian Poland, woiwood Kalisch, 128 m . S.S.W. Warsaw. It is divided into two towns, the old and new, not contiguous, but separated by Mount Klarenberg, the summit of which is crowned by a convent, which is fortified, and has stood several sieges. The old town, on 1. bank, Warta, was almost reduced to ashes in 1771. In the church of the convent of St. Paul, already mentioned, there is an image of the Virgin, which is visited by vast numbers of pilgrims. In $166 \overline{5}$ a bloody battle was fought here, between the army of the King of Poland and that of Prince Lubomirski. Pop. 3500.

CZEINNA, a river, Austria, falling into the Danube on its left bank, at Orsova, after a S.S.W. course of 50 to 60 m . from its source in Grataman hill, in the E. Carpathians, and on the S.W. frontier of Transylvania. During part of its course it forms the boundary between the Banat and Walachia.

CZERNIGOV, or Tschernigoff, gov. Iussia, bounded, N. by Smolensk, N.E. Orel, E. Komsk, S. Poltawa, W. Kiew and Minsk, and N.W. Mohilew, between lat. $50^{\circ} 22^{\prime}$ and $51^{\circ}$ $12^{\prime}$ N.; lon. $30^{\circ} 20^{\prime}$ and $34^{\circ} 40^{\prime}$ E.; greatest length, N.E. to S.W., 240 m. ; greatest breadth, from W. to E., $180 \mathrm{~m} . ;$ area, 15,936 geo. sq.m. The surface, with exception of a hilly district along the Dnieper, is a continuons flat, and the soil is almost unusually fertile. It is watered by numerous streams, the Dnieper flowing along at its W. frontier, and the Desna, with its chief affluents, passing almost through its centre. It has also numerous lakes, though none are of great extent. All kinds of grain grow in abundance, but the crops often suffer greatly from hosts of locusts. Hemp, flax, tobacco, and the opium poppy grow well, and the gardens, in addition to the ordinary vegetables, produce hops, melons, \&c. There is no deficiency of wood, cither for timber or fuel. The horses of the government are of the Ukraine breed, small, but active, and capable of enduring any fatigue. Great quantities of cattle, sheep, and swine are reared. The oxen, in particular, are of a large size, and become remarkably fat. Hunting and fishing yield little produce; but much honey and wax are obtained from bees. The chief mineral produce is saltpetre, porcelain earth, chalk, and a little iron. Manufactures were long insignificant, but have made considerable progress during the last 30 years. The distilling of brandy is carried on to a very great extent, and the inhabitants, unfortunately, are too much disposed to drink it. The intcrior trade is almost confined to the four annual fairs, which are held at Niejin; the chicf exports are cattle, corn, brandy, honey, wax, and potash. Pop., almost all belonging to the Greek church, $1,500,000$.

CZERNIGOV, or Tsciernigoff, a tn. Russia, eap. of above gov., r. bank Desna, 80 m . N.N.E. Kiew. It is a place of great antiquity, and contains numerous buildings of antiquarian interest. Its ramparts have been converted iuto pleasing promenades. It is the seat of an ar chbishop, and has eight churches-one of them, St. Sophia, supposed to have been founded in 1024-three monasteries, a gymnasium, and an orphan hospital. Three important annual fairs are held here. Pop. (1849), 6011.

CZERNOWITY, or Tsciernowitz, a city of Austrian Galicia, cap. circle of same name, now the duchy of Bukowina, $138 \mathrm{~m} . S . E$. Lemberg, sitnate on the slope of a hill, $r$. bank, Pruth, lat. $45^{\circ} 25^{\prime} 40^{\prime \prime}$ N.; lon. $25^{\circ} 59^{\prime} 23^{\prime \prime}$ E.(L.) lt contains several Greek churehes, a Greek cathedral, a R. Catho-
lic church, a gymnasium, a philosophical academy, a head district school, a seminary, and an hospital. It is the seat of a Greek bishop, a Greek consistory, and of a court of justice. It has a considerable trade with Wallachia, Germany, \&c., and has manufactures of clocks, silver-plate, carriages, toys, \&c. Pop. 9750, of which about a sixth are Jews.

CZORTKOW, a circle, Austrian Galicia, bounded, N. by Tarnapol, E. Russia, S. circle Czernowitz, and E. Koloma and Stanislau; area, 1040 geo. sq. m. It is remarkably well watered, being traversed centrally by the Dniester, and skirted, on the S., by the Pruth; the Podhorce, a tributary of the Dniester, forms its boundary on the E.; and the Sered,
another tributary of the Dniester, flows through it from the N . The soil in general is remarkably fertile, and produces abundance of corn and other field crops. Wood also occupies a considerable extent of surface. Cattle are of inferior breeds, and not much attended to. An important branch of rural economy is the rearing of bees. The chief manufactures are linen and cotton. The inhabitants are, for the most part, Russniaks. Pop. 150,500.

CZORTKOW, a tn. Austrian Gallicia, cap. circle of same name, on the Seret, 97 m . S.E. Lemberg. It contains a castle and a parish church, and lias an extensive tobacco factory. Pop. 2300.

## D.

## For Names commencing with $D j$, and not found here, look.$T$.

DABBLING, a vil. Tibet, l. bank, Sutlej, 920 ft. above the level of the sea, lat. $31^{\circ} 45^{\prime} \mathrm{N} . ;$ lon. $78^{\circ} 37^{\prime} \mathrm{E}$.

DABER, a tn . Prussia, gov. Stettin, N.W. end of lake of same name, 19 m. N.N.E. Stargard. It stands in the midst of marshes, is surrounded by ruined walls, and entered by three gates; contains a church and hospital, and has some trade in cattle, and five annual fairs, The Templars had once an establishment here. Pop. 1433.-The Lake is about 6 m . long, by $1 \frac{1}{2}$ to 2 broad.

DABO, Dagsbourg, or Daschbourg, a tn. France, dep. Meurthe, 13 m . from Sarrebourg, in the midst of the Vosges forests. Here is a ruin, said to be the remains of a castle, built by King Dagobert, in which Pope Leo XI. was born. Articles of turnery are made, and much timber is sawn up. Pop. 1226.

DACCA, and Dacica Jelalpoor, two dists. of Hindoostan, prov. Bengal, between lat. $23^{\circ}$ and $24^{\circ} \mathrm{N}$., and lon. $89^{\circ}$ $30^{\prime}$ and $91^{\circ}$ E.; bounded, N., by the district of Mymunsingh, E. by Tiperah, S. by Tiperah and Backergunge, and W. by Rajeshahy and Jessore. It was formerly of much greater extent than now-stretching to the sea, or from about 80 to 90 m. further S., and to the Garrow Mountains, about 120 m . further N. A new arrangement, which took place in 1800, reduced it to its present limits. It is one of the richest districts in India; and, although containing more jungle and unoccupied land than any other district in the province, produces such quantities of rice, as to be called the granary of Bengal. The surface is an uninterrupted flat, and is intersected by two of the largest rivers in the world-the Ganges and Brahma-pootra-from whose periodical inundations its extraordinary fertility arises. Tho principal agricultural productions are rice, betel-nut, cotton, hemp, and sugar, which are grown most largely, in the S. and E. districts一the N. and S. being overrun with jungle, in which clephants, tigers, and other wild animals so abound, as to prevent the extension of cultivation, by the terror they inspire and the damage they do to the crops. In some parts of these districts, however, a marked and rapid improvement is in progress -villages and cultivated fields are now met with, in tracts formerly covered with

NAJAR NUTTOO SING'S MHOUT, \&e., DACCA, - trom lanurama ef Dacen. brush-wood and rank vegeta- tion. Dacca was, at one time, as celebrated for its manufactures as for its fertility, particularly for its muslins, which were of singular delicacy and beauty. This branch of industry, however, has been wholly extin-guished-500,000 weavers in these provinces having been
composed of brick, thatch, and mud, have a very mean appearance, and are so combustible, 'that they are usually burned down once or twice a-year-the owners looking on with the greatest apathy; mats, thatch, znd bamboos being
cheap, the expenditure of a few rupees restores their edifice to all its original splendour.'-(Hamilton.) Along the river front, however, are many elegant buildings, among which is distinguished Najar Nuttoo Sing's mhoot, and the residences of other Indian notabilities. Still, in this part of the town, also, houses composed of mud and straw are of frequent occurrence, forming a strange contrast to their more stately neighbours. The pagodas are few and small. The European houses are of limited size and mean, compared with those of Calcutta, and those out of the town are surrounded with jungle and with ruins, and have thus a dreary, desolate appearance. Besides the natives, there are many respectable Greek, Arinenian, and Portuguese merchants resident here. The Armenians have a church, with two priests; and the English have also a church here-a neat Gothic edifice. Dacea is a station of the Serampore Mission, the missionaries of which conduct religious services in English, Hindoostanee, and Bengalee, and superintend an extensive circle of schools. The city was formerly much more extensive than it is at present, and exhibited a degree of splendour to which it has now no pretensions-as the magnificent ruins of bridges, causeways, caravansaries, palaces, gardens, \&c., within its ancient limits, sufficiently prove. These remains are now surrounded with jungle, and overrun with rank vegetation. The trade of Dacca, which consisted chiefly in the manufacture and exportation of its beautiful muslins-[see Bengal province]-is nearly extinct, the fabrics of England being preferred, even by the natives, on account of their greater cheapness. Dacca is considered one of the healthiest and most pleasant stations in Bengal, being free from the violent heats experienced in other parts of the province, in consequence, it is believed, of the ground being covered with verdure during the hot months. In this city is one of the four hospitals for the insane, under the Beugal presidency; and a college, maintained at the public expense, in which there were, in 1845,342 studeuts, of which 301 were Hindoos and 24 Mahometans. The expense of this establishment, in 1843 , was $£ 21,043,13 \mathrm{~s} .8 \mathrm{~d}$. The inhabitants are represented as quiet and orderly, and desirous of acquiring the English language, and adopting the English customs. The population has been stated at 200,000 ; but the Missionary Register for February, 1828, rates it at only 150,000-one-half Mahometans, the other half Hindoos.

DACHAU, a tn. Upper Bavaria, cap. dist. of same name, on the Ammer, here crossed by a bridge, 12 m . N.W. Munich. It contains a parish church, old castle, hospital, and infirmary ; and has an extensive brewery, and oil, saw, and other mills. Pop. of tn. 1450; of dist. 18,296.

DACIA, a former country of S.E. Europe, bounded, N. by the Carpathian mountains, E. by the Dniester and the llack Sea, S. by the Danube, and W. by the Theiss; and corresponding with the Banat, the Hungarian circle of Thither Theiss, the duchy of Bukowina and Transylvania in the Austrian dominions, and the principalities of Walachia and Moldavia; and the Russian government of Bessarabia.

DACRE, a par. and vil. Eng. co. Cumberland; 8130 ac. 1'op. 975.

DADARAH, a large vil. Scinde, 2 m . from r. bank, Indus, on the route from Larkhana to Schwan, and 32 m . S.W. from the former; lat. $27^{\circ} 3^{\prime} \mathrm{N}$. ; long. $68^{\circ} \mathrm{E}$.

DADI, a vil. Greece, nome, Attike and Viotia, and 24 m . N.W. Livadia. It faces the plain of the Cephissus, and is built on terraces, in the form of an amphitheatre. On a hill beyond the village are ancient walls, of Cyclopean architecture, which are supposed by some to be the walls of Amphiclea.

DADUR, a tn. Beloochistan, prov. Cutch Gundava, near the base of the Hala range, and 5 m . E. from the entrance of the Bolan Pass; lat. $29^{\circ} 6^{\prime}$ N.; lon. $67^{\circ} 41^{\prime}$ E. It is a place of considerable size, is inclosed by a wall, and contains many well-built houses. The heat here is so intense, as to have, according to the inhabitants, reddened the unburnt bricks of the old tombs. It is probably the hottest place on earth in the same parallel of latitude, and certainly one of the hottest in the globe-the thermometer rising, in tents, to $130^{\circ}$.

DADVOLA, a vil. Scinde, 40 m . S.W. Subzulcote, on the route to Shikarpoor, 4 m . from 1 . bank, Indus, in a populous and well-cultivated country; lat. $28^{\circ} 2^{\prime} \mathrm{N}$.; lon. $69^{\circ} 8^{\prime} \mathrm{E}$.

DaENY, or Danie Island, Persian Gulf, Great Pearl Bank; lat. $24^{\circ} 57^{\prime} 30^{\prime \prime} \mathrm{N}$.; lon. $52^{\circ} 25^{\prime}$ E., about $1 \frac{1}{2} \mathrm{~m}$. in length; narrow, low, and nearly level with the sea. The Vol. I.
colour of the sand, in hazy weather, renders it difficult to be distinguished when at a distance.

DAET, a tn. Philippines, isl. Luzon, cap. prov. Camar-ines-Nord, 140 m. S.E., Manilla, or a small stream that flows into the ocean, near the entrance to the bay of San Miguel. Some of the houses are built of stone, and some of nipa palm.

DAFAR, a prov. and tn. Arabia. See Dhofar.
DAGANA, a tn. of W. Africa, Senegambia, country of Wallo, l. bank, Senegal, lat. $16^{\circ} 28^{\prime} \mathrm{N} . ;$ lon. $15^{\circ} 30^{\prime} \mathrm{W}$. It is a small but flourishing place, deriving much of its consequence from containing a French fortified trading station, which fronts the river, and is a kind of rude edifice, surrounded by a wall, mounted with 10 camon. This post is kept by a captain and about 30 black soldiers. The natives manufacture different kinds of pottery, particularly vessels called canari, and pipes, which are much used. They are subject, one portion, to the prince of Wallo; the other to the amany of the Foutas, whose representative here is a marabout. In the environs is a productive marigot, or fish-pool. Pop. about 1200.-(Raffinel's Afrique Occidentale.)

DAGELE'T, an isl. Sea of Japan, between isl. Niphon and the peninsula of Corea; lat. (N.E. point) $37^{\circ} 25^{\prime} \mathrm{N}$. ; lon. $130^{\circ} 56^{\prime}$ E. (r.); so named by La Perouse, who visited it in 1787. It is about 9 m . in circumference, and the shore is environed by a perpendicular wall of rock. It is covered up to the summits of its highest elevations with wood.

DAGENHAM, par. Eng. Essex; 4550 ac. Pop. 2291.
DAGHESTAN [Tartar, Tagh stan, mountainous country], a prov. Russia, stretching along the Caspian Sea, W. side, between lat. $40^{\circ} 30^{\prime}$ and $43^{\circ} 18^{\prime}$ N., and, in breadth, between lon. $46^{\circ}$ and $49^{\circ}$ E., having Cape Agrakhan at its N.W. extremity, and Cape Apsheron at the S.E. Its whole length is thus about 200 m. ; breadth, 40 m .; area, about $5996 \mathrm{sq} . \mathrm{m}$. It consists partly of plains, but, as its name implies, chiefly of mountains, offsets from the Caucasus, which separate deep valleys as they traverse the province, S E., towards the plains lying along the Caspian Sea. They are chiefly of limestone. In the $S$. parts of the province there are numerous bituminous springs, some of which are worked, and afford, in addition to petroleum, an inexhaustible supply of black and white naptha, while others have for ages emitted a burning stream, known by the name of Indian fire. Notwithstanding the generally mountainous character of Daghestan, it comprises many valleys and level tracts of great fertility. Its climate is various-on the plains it is warm and unwholesome; on the slopes of the mountains it is more temperate and healthy; but still more dccidedly so on the higher elevations. Agriculture is carefully attended to, and good crops of grain are produced; also silk, cotton, madder, flax, saffiron, and tobacco. The vegetables and domestic animals are nearly the same with those of Europe. The wild animals are tigers, panthers, camels, and buffaloes. The population is composed chiefly of Tartars, or of races of Tartar descent, and of various Caucasian tribes. Those occupying the towns and plains are of middle size, strong, and active; those inhabiting the mountains are a taller race. They are brave and hospitable; but revengeful, given to falseliood, theft, and intrigue, and noisy and boisterous in their convivialities. They are careful agriculturists, and industrious fishermen, taking sturgeon and turtle in such quantities, as to form a considerable export trade to Persia and Russia. Their religion is Mahometan, and their language dialects of the Tartar tongue, mixed with Armenian, Persian, and Hebrew. Chief towns-Derbend, Tarku, Nizabad, and Kuba. Pop. estimated at 250,000 .

DAGLINGWOR'TH, par. Eng. Gloucester; 1700 ac. Pop. 302.

DAGMERSELLEN, or Dammersellen, a vil. and par. Switzerland, can. of, and 18 m . N.W. Luzern, r. bank, Wigger. It contains a large new church, and a handsome parsonage and school ; and has a considerable transit trade, and important annual fairs. Pop. 1828.

DAGOE, or Dagden, an isl. in the Baltic, belonging to Russia, gov. Revel, or Esthonia, S.W. the entrance of the Gulf of Finland, and opposite to the island of Öesel, from which it is separated by the Sele Sund, between lat. $58^{\circ} 41^{\prime}$ and $59^{\circ} 6^{\prime}$ N., and lon. $22^{\circ} 10^{\prime}$ and $23^{\circ} \mathrm{E}$; greatest length, E. to W., $34 \mathrm{~m} . ;$ greatest breadth, 15 m . The soil, chiefly sand and chalk, is not fertile; and the cattle, thongh the pasture seems good, are of an inferior, stunted breed. There is a

## DAHOMEY

considerable extent of forest, in which game abounds; and the fishing, including that of seals, is productive. Pop., almost all Swedes, about 10,000

DAHA, a market tn. Bavaria, circle Pfalz, l. bank, Lauter, 20 m . S. Kaiserslautern. It contains two châteaux, and the ruins of an old castle; and has three mills. P. 1300.

DAHAB, or Mersa Dahab (Golden Port), Arabia, peninsula of Sinai, on W. coast of the Gulf of Akaba, lat. $28^{\circ} 28^{\prime}$ N.; lon. $34^{\circ} 37^{\prime}$ E. There is here an extensive date grove, which is inhabited during the fruit season.

DAHHI, a large vil. Arabia, Yemen, 50 m . S.S.E. Loheia; contains a mosque, and the tombe of a Saint. The inhabitants make bricks, tan leather, and manufacture indigo-blue being a favourite colour throughout Yemen.

DAHLEN, two places, Germany:-1, A tn. Prussia, gov. of, and 19 m. W.S.W. Dissseldorf. It contains a R. Catholic parish chureh; and has manufactures of silk velvet and linen, a trade in linen and flax, and three annual fairs. Pop. 1327. -2, A tn. Saxony, circle of, and 24 m . E. Leipzig, on the Dahlenwasser, over which there is an old bridge. It contains a castle, and an hospital ; and has a bleachfield, several mills, and three annual fairs. Dahlen is a station on the railway from Leipzig to Dresden. Pop. (1849), 2497.

DAHME, a tn. Prussia, gov. Potsdam, 44 m. S. Berlin, on a river of same name. It is surrounded by a wall and fosse, is the seat of a proviucial and town court, contains a castle and church, and has manufactures of woollen and linen cloth, a tobacco factory, a trade in cattle, and four annual fairs. Pop. 3517.

DAHOMEY, a kingdom of W. Africa, on the coast of Guinea (cap. Abomey). Its boundaries are not well ascertained, being liable to extension or abridgment with the power or weakness of its sovereign. At present it appears to occupy the space between $6^{\circ}$ and $8^{\circ} 50^{\prime} \mathrm{N}$. lat., and $1^{\circ}$ and $3^{\circ}$ E. lon. This, however, ineludes, northerly, the Mahee territory, recently conquered by the King of Dahomey, and now annexed to his dominions. Formerly, the authority of its kings seems to have been limited, northerly, by the river Zoa, or Lagos, about lat. $8^{\circ} 10^{\prime} \mathrm{N}$.; but the present sovereign (1846) appears to have extended his influence and power considerably beyond this point-the first distinet manifestations experienced by Mr. Duncan, the late African traveller, of the cessation of his authority occurring at Zafoora, in lat. $8^{\circ} 58^{\prime}$ N., where he found himself in the dominions of another, and less friendly, potentatc.

The country appears to be in general extremely fertile, and, what is not a little surprising, is well cultivated, especially in the neighbourlood of the towns and villages. On the coast, particularly in the neighbourhood of Whydah, the principal port of the kingdom, there are many farms in a high state of cultivation, the houses clean and comfortable, and the scenery singularly beautiful. These farms, however, are mostly in the hands of persons returned from the Brazils, and who had, doubtless, benefited by their agrieultural experienees in that country; although Mr. Duncan, as will be more particularly mentioned afterwards, found an equal degree of skill exhibited many hundred miles in the interior. Another class of colonists here are emancipated slaves from Sierra Leone; but these are greatly inferior as farmers to the former, and make little progress, notwithstanding that every encouragement is given them by the present King of Dahomey, whose general character and disposition stand in favourable contrast to those of his predecessors. The prineipal crops raised here are Indian corn, yams, and the manioc-root, which is ground into meal, and forms a principal artiele of food. Two crops of corn are obtained in the year; and of a smaller sort of red corn four may be obtained. Manuring, draining, and the drilling sys tem are all understood and practised at remote places in the interior. Inland, the country loses none of the beanty and fertility by which it is distinguished on the coast. Extensive and noble woods, alternating with large expanses of grassy levels and fields of corm, form the leading features of the interior, enlivened by the frequent occurrence of towns and villages, picturesquely ornamented with the beautiful acacia. 'After leaving the town of Abomey' (about 90 m . from the coast), says Mr. Duncan, 'the path passes through beautifully cultivated fields of corn, of various sorts, as well as many kinds of beans and peas. Many sorts of ground beans are also cultivated here, some of the size and shape of a large
marble, and of a delicious flavour, commonly used by the natives in soups and stews, as well as separately. This scene was truly beautiful-the corn full six feet high, with beautiful white and red flowers about a foot in height, so numerous, that, at a little distance, the ground appeared a continuous bed of flowers.'

Dahomey, though generally level, or but slightly and gradually rising from the coast, has yet several pretty extensive mountain ranges and hilly tracts, formed, it is believed, by offsets of the Kong Mountains. About 10 or 14 m . N. of Abomey-in lat. $7^{\circ} 55^{\prime} \mathrm{N} . ;$ lon. $2^{\circ} 5^{\prime} \mathrm{E}$.-a low range of hills runs S. W. to N.E.; and here the country is broken up into romantic glens and valleys, overhung with trees, and resounding with the musie of waterfalls. Beyond this, ' mountains richly wooded broke upon the view, bearing E.N.E., and about 800 ft . high, with here and there immense blocks of granite, showing their crowns above some of the tallest trees.' -(Duncan.) Other ranges of mountains were seen by Mr . Duncan, at various points. Soon after leaving the town of Setta-lat. $8^{\circ} 15^{\prime} \mathrm{N} . ;$ lon. $2^{\circ} 12^{\prime}$ E.-he saw high lands, bearing from the N. side of the town, at the distance of about 12 m ., called the Zafidah Mountains, forming the extremity of a range, running as far to the $E$. as the eye can reach. These were succeeded by the Davity Mountains, extending, from E. to W ., for about 12 m ., and separated by a narrow plain from another range, distant about 2 m . From the point of the river Zoa, or Lagos, laid down at the beginning of this article, up to lat. $9^{\circ}$, the country is covered with mountains of singular form and character, one of the most remarkable of which is called Mount Gbowelly, lat. $8^{\circ} 19^{\prime} \mathrm{N}$.; lon. $2^{\circ} 28^{\prime}$ E. Most of these mountains rise abruptly from the plain, and are very steep, being on some sides nearly perpendicular. They are much infested with wild beasts-especially a range called the Dassa Mountains, in the form of a crescent, which abounds with lions, hyænas, and panthers, by whom great depredations are often committed. The last range of mountains in the Dahoman kingdom, on the N., are the Dabadab Mountains, situated on the confines of the Maheo territory, and so called from their resemblance in shape to a kind of dumpling, made from the Indian corn meal of that name. Although, however, the loftier ranges terminate with the 9 th degree of N. lat., heights of less magnitude, and of the table form, are met with, at intervals, as far as the 13 th.

Although springs and rivulets are numerous in the interior, and the country, on the whole, well watered, there are no rivers of any magnitude. One of the largest is the Zoa, which is only 40 yds . wide, and 7 ft . deep, at the point where Mr. Duncan crossed it, about lat. $8^{\circ} 18^{\prime} \mathrm{N}$. ; and this was in the rainy season, when it had, of course, attained its greatest volume. The banks, however, are extremely deep ( 30 ft .), and wooded with trees of gigantic size. This river discharges itself into the Bight of Benin, in about lat. $6^{\circ} 26^{\prime} \mathrm{N} . ;$ lon. $3^{\circ}$ $26^{\prime} \mathrm{E}$; and may be considered as bounding the kingdom on the E., as the Volta does on the W. Between the river Zoa, or Lagos, and lat. $9^{\circ}$ N., Mr. Duncan has laid down some 8 or 10 different rivers or streams, all, apparently, flowing N.W. to S.E.; but has given no particular account of them, except in one or two instances. Small marshes are of frequent occurrence throughout the country, and, occasionally, extensive swamps are met with-some of them many miles in breadth, and impassable in the wet season.

The abundance and luxuriance of the vegetable productions of Dahomey afford evidence of the singular fertility of the soil. Its forest trees attain the most magnificent dimensions, and are interspersed with fruit trees of various kinds, including the tamarind, of which there are two different speeies, a yellow fig and damson, both of pleasant flavour, casliew, kolla, and ground nuts, the shea butter-tree, from the nuts of which an unctuous substance, resembling butter, is extracted. Green grapes are also plentiful. The cocoa tree, and palms of various kinds, abound on the coast. The rocks and trees are festooned with beautiful parasitical plants, and the climatis and jessamine fill the air with their delightful odour.

The wild animals of Dahomey are of the same kind as those met with throughout W. Africa, consisting of lions, hyænas, panthers, deer, \&e.-the last of a large size, the former all of the most formidable description, being extremely fierce and powerful. Monkeys also abound; and elephants
are met with in the vicinity of the swamps in the interior. Alligators and hippopotami are numerous in the rivers, towards the coast. Snakes are also numerous, especially about Whydah, as are also lizards of various kinds. Boa-constrictors, of enormous size, are met with in the interior. Insects, in great variety, abound-amongst them a description of ant, about the dimensions of a wasp, which emits an intolerably offensive smell. Swarms of locusts are also met with. Bats are numerous and large-the Whydah vampire-bat measuring from 33 to 36 in . between the tips of the wings; they roost on trees, hanging by the hinder claws, with their head downwards. Birds of beautiful plumage are met with in great numbers; as are also Guinca fowl, the common and Muscovy duck, crows, and pigeons. The crows are very large, with white breasts; the pigeons are finely variegated with green, yellow, and blue. Vultures and eagles also abound; as do likewise partridges, and other game, cranes, and pelicans.

The domestic animals are oxen, generally of small size, sheep, goats, and swine-the last of a superior description. Ilorses are not bred here, and few of the natives ever saw one. A few have been sent to the king as presents. They are approached with timidity, and the rider is invariably held on the animal's back by two men, who walk on either side.

The rivers abound with fish, and the banks with land tortoises, both of which are taken in great numbers by the natives. The sea coast is so crowded with sharks, as to render it almost certain destruction to go into the water.

The general condition of the people under the present King of Dahomey, who seems to have effected an extensive and beneficial reform, moral, social, and political, in his king dom, appears to be prosperous and happy. The towns and villages, many of them large and popnlous, are crowded with a busy and cheerful population. Their markets are abnndantly supplied with provisions, fruits, and vegetables, and the surrounding districts yield copious harvests, with very little labour, and where this little is required, it does not seem wanting, nor the necessary skill in its application. At a great distance inland, Mr. Duncan found the land 'beautifully cultivated along the foot of the mountains, and the drilling system in operation with all sorts of grain, as well as with the sweet potato.' Many of the more wealthy natives own numerous herds of cattle, which they keep in folds or pens, preserving their dung for manure. 'They are excellent farmers,' says Mr. Duncan, 'even in this remote part' (Paweea, about lat. $8^{\circ} 20^{\prime} \mathrm{N}$. ; lon. $2^{\circ} 30^{\prime}$ E.), ' where they never can have had intercourse with any civilized being.' Their agricultural implements, too, are well adapted to their purposes, and much superior to those manufactured nearer the coast. The Dahomans mannfacture a very good cotton cloth, though by a tedious process, the thread being spun by the distaff, and the loom being of a very simple construction, though on the same principle as the linen looms of England. Instead of using the shuttle, of which they have no knowledge, in putting in the weft, they merely hand the reel through the shed from one side to the other. The web seldom exceeds 6 inches in breadth, and is variously coloured in stripes. In many places iron is wrought with considerable dexterity and skill into various useful articles. Almost every town and village has a market-place, generally an open space shaded with trees, in which, on certain days of the week, besides provisions, cloths, both native and foreign, the latter including Finglish kerchiefs, are exposed for sale.

The people of Dahomey, both males and females, are generally tall, well-formed, and intelligent, and, although a disposition to theft forms a prominent feature of the African character, singularly honest. It is, however, not unworthy of remark, that the Dahoman character improves with increase of distance from the coast; in other words, from the inflnences of civilization. Although it may be asserted, and perhaps with truth, that this civilization is of the most corrnpt and impure kind, its only result being to deprive the African of his native simplicity, and to put a vicious knowledge in its stead.

The females are remarkable for chastity, although polygamy is permitted to any extent. The Dahomans are all Pagans, and worship fetish, but do not seem to be at all rigid as to religious faiths, there being a number of Mahometans in their armies, whose religious opinions are in no way interfered with. They are generally temperate; are excellent cooks, and, ac-
cording to Mr. Duncan, make a number of very savoury dishes.

The sovereign power is absolute, extending to an entiro control over the lives and properties of the people, who invest their king with the attributes of deity, believing him to be superior to all human wants and infirmities. Thus, when he drinks in public, his attendants hold handkerchiefs before him, that none may witness such act of mortal imperfection. In place of resisting his decrees, however sanguinary, his subjects rejoice in their execution, and feel themselves eminently favoured by being called upon, or permitted to sacrifice their lives to his pleasurc. The possession of this extraordinary power and influence by a barbarous prince, combined with the gross ignorance and superstition of his people, led to the perpetration of the most fearful atrocities, wholesale murders forming the principal and most acceptable part of all state and religious ceremonies. The numbers sacrificed on these occasions is now greatly diminished, there having been 32 only put to death in 1849 , and there is reason to believe that most of these, if not all, were criminals. Formerly many hundreds used to be sacrificed at the Customs, as such celebrations were called, and all guiltless of any offence. The present sovereign has also revised and ameliorated the criminal and petty laws of his kingdom, has cstablished a court of appeal at Abomey, where he chiefly resides, in which the sentences of provincial authorities are reconsidered at the desire of the condemned party, and it often happens that persons who have been doomed to death, under unjust accusations, have been acquitted on this second trial, at which the king himself always presides as judge. In all cases of putting to death, the sovereign's sanction is necessary; while formerly, the chief provincial authorities could inflict that punishment withont either his knowledge or concurrence. Even in war his humanity and justice, and, it may be added, his policy, are conspicuous. When a town surrenders without resistance, he allows the inhabitants to pursue their callings unmolested, and reduces the duties on their goods to the Dahoman scale. Having secured his authority, he, after a time, furnishes their soldiers with arms, and, by his justice and liberality, converts them from enemies into faithful allies.

The King of Dahomey commands the whole of the European trade from the coast, and a principal part of his revenue is derived from duties on the palm oil and ivory exported, and on the slaves shipped from his kingdom. He also levies a capitation tax, which is regulated in amount by the rank and income of the party taxed, and on all goods exposed to sale in the market a heavy custom is exigible; the headman, or chief constable, making the round of the market-place daily to collect it.

One of the most extraordinary manifestations of barbarian spirit and sentiment in this country is exhibited in the king's female army, consisting of from 5000 to 8000 women, formed into regiments, and armed with long Danish muskets, short swords, and clubs. Their clothing consists of a blne and white striped cotton surtout, the stripes about $1 \frac{1}{2}$ inches wide, of stont, native manufacture, without sleeves, leaving freedom for the arms. The skirt or tunic reaches as low as the kilt of the IIighlanders. A pair of short trousers is worn underneath, reaching 2 inches velow the knee. They are commanded by female officers, the most distingushed of whom, at the time of Mr. Duncan's visit, was called Adadimo, whose warlike exploits had recommended her to the special favour of the king. 'She was,' says the African traveller, ' a tall, thin woman, about 22 years of age, good-looking for a black, and mild and unassuming in appearance.' These Amazons use their musket with perfect ease, fire singly with great precision, and go through their evolutions, such as they are, with much energy and alacrity; but know nothing of the compact and simultaneous movements of disciplined troops. 'They attack like a pack of hounds, and would be useless against disciplined troops, if at all approaching to the same numbers. Still their appcarance is more martial than the generality of the men; and if undertaking a campaign, I should prefer the female to the male soldiers of this country.- (Duncan.)

The King of Dahomey has always expressed the utmost anxiety to form friendly alliances with the British Government; but it has been found impossible to prevail upon him to abandon the slave trade, from which he derives a large and immediate revcnue, 9000 being annually shipped from his
kingdom. Pop. estimated (1850) at 200,000 ; of which not more than 20,000 are free.-(Duncan's Travels in Western Africa in 1845-6; Forbes' Dahomey and the Dahomans, 1851; Parl. Papers.)

DAILLY, par. Scot. Ayr; 7 m . by 6 m . Pop. 2272.
DAimAN, or Arangua, a river, Banda Oriental, an affluent of the Uruguay, rises in a mountainous district in the centre of the state, and, flowing nearly due W., falls into the Uruguay at lat. $31^{\circ} 25^{\prime}$ S.; its whole course being about 110 m .

DAIMIEL, a tn. Spain, New Castile, prov. of, and 20 m . E.N.E. Ciudad-Real, l. bank, Azuer. The majority of the houses are tolerably well built, and form numerous streets, of which many are wide and clean, though unpaved; but others are mean, narrow, and dirty. The town has four squares, the principal of which is lined with substantial edifices, adorned with porticos and balconies; the remaining three are small, and irregularly constructed, but two of them are planted with white poplars. It has two parish churches, Santa Maria and San Pedro; the former, a spacious Gothic structure, possesses three naves and a lofty tower; the latter is in the Doric style, with one nave, and a square tower of stone; its interior is highly decorated, and contains a magnificent retablo. Its other public buildings comprise four chapels, two convents, several schools, a townhall, prison, hospital, and cemetery. In the environs are a variety of agreeable public walks and gardens. Linen and woollen fabrics, blonde lace, wine, and oil are manufactured ; and considerable trade in grain, cattle, wine, wool, and colonial produce is carried on with Madrid and Valencia. The commercial importance and population of Daimiel have been greatly augmented during the last few years. Pop. 12,355.-(Madoz.)

DAINA, or Dana, a vil. Syria, pash. of, and 20 m. W. Aleppo; supposed to be the ancient Emma or Imma. It appears to have been a place of some consideration, from the antiquities remaining; many sepulchral grottoes are cut into the rock, among which is a very fine monument, with some Christian Greek inseriptions on it, although the style of its architecture would indicate a higher antiquity than the date of Christianity.

DAIR-el-Kamar, a tn. Turkey in Asia, Syria, and cap. of the Druses, on a slope of Mount Lebanon, 12 m . S.E. Beyrout. It is inaccessible, except by two narrow paths; and is composed of two distinct quarters, the Druse and the Christian. It contains a Maronite convent, several churches, and a mosque; and is the seat of an American Protestant mission, and school. The only remarkable public buildings are the kaiserieh, a large khan, and the old serai of the Emir of Lebanon, a palace with several court-yards. The handsomest houses in the town are those which were once inhabited by the Greek Catholics, dispersed abroad by the recent troubles of the country. The place was once flourishing, and the seat of some manufactures; among others, that of gold and scarlet cloth, but it exists no longer. Pop. estimated at 30,000 .(Bowring's Reports; Consular Reports; Paton's Modern Syrians.)

DAIRSIE, par. Scot. Fife; 2 m . by $1 \frac{1}{2} \mathrm{~m}$. P. (1851), 708.
DAJEL, a tn. Punjab, S.W. extremity, 15 m . N.E. Harrand; lat. $29^{\circ} 37^{\prime}$ N.; lon. $70^{\circ} 28^{\prime}$ E. It is small, but flourishing.

DAL-Elf, a river, Sweden, or rather two rivers which take the names of Easter Dal-Elf and Wester Dal-Elf. The former rises in Mount Salkjallet, on the confines of Norway, and proceeding in a S.E. direction, through a chain of smaller lakes, falls into the large lake of Siljan, in co. Falu. The river, which issues from the S.E. extremity of the lake, still bears its name, and, proceeding circuitously S.E., joins the Wester Dal-Elf about 18 m . S.W. Falun. The Wester DalElf, formed by the junction of the Loren and Falu, proceeds first S.S.E., then almost due E., till it receives the Easter Dal-Elf, when the united stream, retaining the common name of Dal-Elf, pursues a S.E., but very circuitons, course, till it reaches Avesta, when, turning E.N.E., it expands into a series of lakes, and falls into a bay in the Gulf of Bothnia, about 10 m. E.S.E. Gefle.

DALAI-Noor, or Kouloun, a lake, Mongolia, near the Russian frontier ; lat. (N. end) $49^{\prime \prime} 17^{\prime} \mathrm{N}$; lon. $116^{\circ} 35^{\prime} \mathrm{E}$. It is about 180 m . in circumference, is entered on the S.W. by the Kheroulun, which leaves it on the N.E., under the name of the Argoun.

DALARÖ, a market tn . Sweden, län of, and 20 m . S.F. Stockholm. It stands on a tongue of land which, being separated from the mainland by a narrow channel, takes the name of the island of Dalarö. It has a good harbour, and its inhabitants, about 600 , are almost all fishermen. About 1 m . from the town is a fort, erected on a height near the mouth of the entrance leading up to Stockholm. Vessels on their passage np, call and pay toll here.

DALBEAT'TIE, a vil. Scotland, co. Kirkcudbright, $3 \frac{1}{2} \mathrm{~m}$. S.E. Castle-Douglas, on the Dalbeattie burn ; containing a R. Catholic chapel, a Free church, and a paper factory. Pop. 1430.

DALBURY and Lees, par. Eng. Derby; 1600 ac. P. 221.
DALBY, five pars. Eng.:-1, Lincoln; 1020 ac. Pop. 106.-2, York, N. Riding; 1480 ac. Pop. 141.-3, (Little), Leicester ; 2180 ac. Pop. 184.-4, ( - Magna), Leicester; 3080 ac. Pop. 479.-5, (on-the-Wolds), Leicester; 3430 ac. Pop. 410.

DALDERBY, par. Eng. Lincoln; 550 ac. Pop. 37.
DALE, par. Wales, Pembroke. Pop. 392.
DALECARLIA, or Dalarne, a former prov. Sweden, now included in the län or co. of Falu. The name, meaning Valley-Land, is still frequently used, and is kept alive in the minds of the inhabitants by the noble struggles which the Dalecarlians, its inhabitants, made to establish and maintain the independence of the country.

DALEM, a vil. Holland, prov. Gelderland, and on its W. frontier, within 1 m . of Gorinchem or Gorcum; with a small neat Reformed church, and a school. Pop. 100.

DALEN, a vil. Holland, prov. Drenthe, 3 m . N. Koevorden; with a church and school. In 1813, the inhabitants, assisted by their neighbours and a few Cossacks, gallantly repelled three successive attacks from the French, then lying at Koevorden, and endeavouring to plunder the country in all directions. Pop. 1300.

DALFSEN, or DALFEn, a vil. Holland, prov. Overijssel, 6 m. E. Zwolle, r. bank, Vecht. A populous and thriving village, with a Reformed church, one of the largest and handsomest in the province; and two schools. A bridge was built over the Vecht in 1836, and a power-loom manufactory established in 1339, employing 50 children. But the place is best known by certain cakes, called Dalfser moppen, and exported to all quarters. Pop. 1200.

DALHAM, par. Eng. Suffolk; 1840 ac. Pop. 598.
DALHOUSIE, a small vil. Scotland, co. of, and 8 m . S.E. Edinburgh, a station on the North British Railway. Near it is Dalhousie castle. Pop. 99.

DALGETY, par. Scot. Fife; 4 m. by 1. P. (1851), 1533.
DALGINROSS, a vil. Scotland, co. of, and 22 m . W. Perth, in the vicinity of Earn water, and on the road from Crieff to Lochearnhead. Cotton weaving is carried on. P. 317.

DALIAS, a tn. Spain, Andalusia, prov. of, and 20 m. W.S.W. Almeria, 4 m . from the Mediterranean. Its streets are generally irregular, badly constructed, and, with one exception, unpaved; it has three squares, one containing the town and court houses, two fountains, and the foundations of a long-contemplated new church. Up to 1804, there were here two parish churches, one in the town, the other in the hamlet of Cenin; both, however, were nearly destroyed by an earthquake in that year; and although the first stones of the above named new church were laid in 1817, no superstructure has yet been erected upon them. The other public buildings comprise four chapels, two schools, a prison, two storehouses, and an extramural cemetery. The main employment of the working classes is mining and smelting the metals, chiefly lead and antimony, produced in the sierra de Gador, and other neighbouring mountains. The remaining inhabitants are occupied in husbandry and fishing. Near the town, on the sea-side, are some mineral baths, much frequented in the season. Pop. 9000.-(Madoz.)

DALINTOBER, a vil. Scotland, co. Argyle, dist. Kintyre, about $1 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Campbelton, of which it is a suburb. The inhabitants are chiefly employcd in the fisheries. P. 1762.

DALKEITH, a tn. Scotland, co. of, and 6 m . S.S.E. Edinburgh, a station on the Edinburgh and Hawick branch of the N. British Railway. It is beautifully situate on an acclivity between the N. and S. Esks, the banks of which are covered with wood, and adorned with numerous elegant mansions, occupied by families of rank. It has one principal
etreet, about two-thirds of a mile long, E. to W., straight, wide, and well paved ; and several other smaller streets, also respectable and well kept; houses in general regular and handsome, built of stone; ample supply of excellent water; well lighted with gas. Within the last few years, considerable improvement has been made on the town, which is rapidly extending W., along the line of the N. British Railway. The old parish church is a venerable Gothic structure of the 16 th century, with a spire of more modern date, 96 ft . high. Attached to its E. end are the remains of an old edifice, dating, it is said, from the 8th century, and now used as the interment vault of the Buccleuch fanily. The new parish church is an elegant building, also in the Gothic style, with a spire about 170 ft . high. It was erected in 1840 by the Duke of Buccleuch, but has never been used, except as a Sabbath school. A beautiful Episcopal chapel was erected by the Duchess of Buccleuch in 1845. There are also a Free, and three U. Presbyterian churches, a Congregational, and a Weslejan Methodist. Dalkeith has a grammar school, an academy in connection with the Free and other dissenting congregations, with a female and infant school attached ; a Sessional, an Episcopal, and the Buccleuch school, with an infant school attached; with several private educational establishments. It has two public libraries, several scientific and literary associations, numerous friendly and charitable societies, a large handsome workhouse, a court-house, where a justice of the peace court is held weekly; four branch banks, and a savings bank. In the town and vicinity there are three flour and corn mills, a woollen factory, a brewery, a snuff mill, three candle-works, three iron foundries, two tanneries, several very extensive collieries, \&c. But the prosperity of Dalkeith depends almost entirely on its grain market, hell every Thursday, and considered the most important in Scotland. There is also an extensive meal market every Monday; and two annual fairs are held in May and October, for horses and cattle. In the neighbourhood are Dalkeith palace, the residence of the Duke of Buccleuch; Newbattle abbey, \&c. Area of par., 5 sq . m. Pop. (1851), 6521.

DALKEY, a vil. and ancient seaport, Ireland, co. of, and 8 m . S.E. Dublin, beautifully situate at the foot of a hill, 474 ft . high, from the summit of which a fine view of Dublin bay is obtained. It is irregularly built, and consists of cabins and villas intermingled. It was a place of considerable importance in the 14th century, having had a charter of incorporation at that period from Edward III. In the 15th century fairs and markets were established here, for the encouragement of foreigners, who frequented the place in great numbers, and carried on an extensive trade with the inhabitants. Seven strong castles were erected for the protection of the port, the remains of three of which are still in existence. Towards the close of the 17 th century the trade of Dalkey began to fall off, and continued to decline till it became the insignificant village it now is. Opposite the village is Dalkey Island, separated from the mainland by a channel, between 200 and 300 yds. wide, called Dalkey Sound, which formed the principal anchorage-ground in former times for the vessels frequenting the port. The island contains about 30 ac . Its only inhabitants are a few artillerymen, in charge of a small battery. Previous to the year 1798, it was the scene annually of certain singular convivialities. In the month of June of each year a mock king of Dalkey, with various officers of state, was chosen, and the proceedings duly recorded in a newspaper, called the Dalkey Gazette. Thousands of people from Dublin used to repair to the island to witness the ceremonies on these occasions. Dalkey is connected with Dnblin, through Kingston, by railway, the portion to Kingston being the only atmospheric railway in the United Kingdom. Area of par. $467 \mathrm{ac} . \quad$ Pop. 2232.

DALLA, a tn. Burmah, prov. of Pegu, on a river of same name, 50 m. S.W. Rangeon. The inhabitants are chiefly employed in the manufacture of salt and the salting of fish, which they send into the interior of the empire.

DALLAN, a tn. Baden, circle Unterrhein. It contains two parish churches, and a small castle; and has tile-works and several mills. Pop. 1157.

DALLAS, par. Scot. Elgin; 50 sq. m. Pop. (1851), 1226.
DALLY, a vil. and par. Sweden, län of, and 15 m . E. N.E. Malmö. It contains a royal residence, formerly a menastery, and was once the see of a bishop. The church,
which is ancient, has a crypt; and in the churchyard the Danish king, Harald Hein, is buried.

DALLYA, or Dalga, a market town, Austria, Sclavonia, co. Verocz, on the Danube, 13 m. E.S.E. Eszek. It contains a R. Catholic, and two Greek non-united churches. The district around is fertile, raising much corn, and rearing many cattle; but the chief employment is fishing, including that of the sturgeon. Pop. 3430.

DALMACHERRY, a tn. S. Hindoostan, prov. Mysore, $100 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Madras; lat. $13^{\circ} 43^{\prime}$ N.; lon. $79^{\circ} 5^{\prime}$ E. It gives its name to a well-known pass in the adjoining mountains.

DALMALLY, a vil. Scotland, co. Argyle, 16 m. N.E. Inverary, picturesquely situate on the Orchy, near the N. end of Loch Awe. A little $E$. of it is the fanous well of St. Conan.

DALMATlA (Kinadom of), [German, Königreich Dalmatien], a prov. of Austria, comprising the ancient kingdom of Dalmatia, Croatia, Sclavonia, and the town and territory of Fiume-the latter three of which were formerly comprised in the kingdom of Hungary, from which they were disjoined by the constitution of March 4, 1849. The following article refers only to the first division; the others will be found noticed under their respective heads.

The kingdom of Dalmatia is a maritime province, and the most S. portion of the Austrian dominions. It consists of a long narrow tract of mountainous country, and a number of large islands, along the N.E. coast of the Adriatic Sea, and bounded, N. by Croatia, and N.E. by Turkey. It extends from about lat. $42^{\circ} 9^{\prime} \mathrm{N}$. , or 23 m . S.E. Cattaro, to lat. $44^{\circ}$ $25^{\prime}$ N., abont 19 m. N. Zara, the cap., where it is joined by Croatia. In breadth it is very limited, not exceeding 40 m . in any part; and at the narrowest, near Ragusa, about 2 m. ; its whole area, 3718 geo. sq. m . The surface is much varied: a ridge of limestone mountains separates the N. portion from Turkey, and another runs nearly parallel with the coast, sterile, and destitute of soil. The highest peaks are-Orien, 6332 ft . Dinara, 6040 ft ; and Partovo, 5929 ft ; and the largest and loftiest part of the N. range is that of Velebich, to the N.E. of Zara, which is 5439 ft . On the coast range occur the peaks of Mount Mossor, 4464 ft ; and, S.E., Mount Biocovo, 5899 ft . The inland parts of Dalmatia are diversified by undulatory ground, hills, and high mountains-many of the latter having the same rugged barren aspect as those of the coast; others, again, are partially covered with low wood. There are also several extensive and unwholesome marshes in various parts of the country, causing deadly fevers in hot weather. The soil, though not rich, is good, and the produce, as a whole, suffices for the limited population of the country; but, altogether, it cannot be otherwise considered than as a poor, unproductive territory, though not without some rich and beautiful valleys; but these are gencrally very narrow. It has few rivers, and all with short courses. The principal are-the Narenta, in the S., having a depth of water sufficient to admit large steamers; the Zerınagna, Kerka, and Cettina. On some of these rivers the scenery is singularly wild and picturesque. The Kerka has several magniticent cascades; and on the Cettina there are two, from 90 ft . to upwards of 100 ft . high. There are also numerous small lakes; but most of them become dry in hot weather. The waters of many of the Dalmatian streams have a petrifying quality, and cover the rocks over which they flow with a coarse stalagmitic deposit. The country is not rich in metals, although, in ancient times, it produced large quantities of gold; but iron and coal are wrought-the latter in the district of Dernis, where there are several mines, but is not used so extensively as it ought to be. The quality is said to be inferior.

The coast is indented with numerous harbours and bays, the principal of which are Cattaro, Sebenico, and Ragusa. A vast number of islands, also, of all dimensions, stretch along, and parallel to, it shores. The largest are Arbe, Pago, Isola Grossa, Brazza, Lesina, Curzola, Lissa, Meleda, \&c. Most of these islands are mountainous, and present the same general aspect as continental Dalmatia; but are valuable for their productions, such as timber, wine, oil, cheese, honey, salt, and asphalt; and in several of them shipbuilding is carried on to a considerable extent. In summer the prevalent wind on the coast is the mistral, or N.W. wind, which moderates the excessive heat of the season. The climate of Dalmatia, generally,
is warmer than in any other part of the Austrian dominions; and in spring the African scirocco is occasionally felt, but not to the same extent as in Sicily or Greece. Frost and snow rarely occur in the lower districts, and are of but short duration in the mountains. Timber is exceedingly scarce in the country, nor is firewood abundant; but some of the islands produce pines and bruslıwood in great quantities-particularly Curzola, which, in former times, furnished the Venetian arsenal with 1 mber, and has still the greatest quantity of wood in this part of the Adriatic.

Agriculture is in an extremely backward state; but it is said that the peasantry require only proper instructions in directing their labour to remedy this evil. At present, the greatest proportion of available land is in pasture, the next in wood, and then arable land and vineyards. The following are some of these proportions:-

| A | 275,895 | Olives................. ${ }_{\text {aces }}^{\text {acres. }} 1,940$ |
| :---: | :---: | :---: |
| Meadows | 17,502 | Pastures.....................1,034,677 |
| Gardens. | 5,781 | Wood .................... 696,079 |
| Vineyards. | 11,987 |  |

The principal agricultural productions are Indian corn, rye, barley, figs, olives, and vines; but sufficient grain is not produced to supply the wants of the country-the deficiency being imported from Turkey and Hungary. Various fruits are also grown, including apples, pears, plums, almonds, peaches, apricots, lemons, oranges, carobs, and pomegranates. The Dalmatian wines are strong and full-bodied; but most of them have the fault of being sweet, owing to the grapes remaining too long upon the vines before they are gathered for pressing. Neglect, too, in choosing the fruit is another fault of the Dalmatians, in their process of making wine. Comparatively few sheep or cattle are reared; horses are rare, and of very diminutive size. Fish abound on the coast; but fishing is as little attended to as agriculture.

Dalmatia has hardly any manufactures worthy of the name. A kind of coarse cloth, called Rascia, used by the peasants, is made, but both the quality and dye is of the worst description. Nor is the production of silk sufficiently encouraged, though the soil is well suited to the growth of the mulberry tree. Neither the Dalmatians of Italian origin, nor those of Sclavonic race, are noted for any skill, excepting the shipbuilders of Curzola, the manufacturers of liqueurs at Zara, and the venders of oil and wine throughout the country. The trades common in all parts of the world are found in the towns; and thread, a few cotton and linen stuffs, twine and ropes, leather, felt, the cloth called Rascia (already mentioned), coarse blankets, and some of the most ordinary productions of the hand, compose the principal articles made in Dalmatia-the shops being supplied with cutlery, and all manufactured goods, from abroad, and principally from Trieste. A few silk handkerchiefs are made at Ragusa.

The Dalmatians of the coast, and the principal families in the large towns of the interior, are mostly of Venetian extraction; and those who are of Hungarian origin have adopted the customs and language of the Italians. The latter is spoken in all the seaports; but the language of the country is a dialect of the Sclavonic, which alone is used by the peasants in the interior.

The Dalmatians are, according to Mr. Wilkinson, a tall, muscular, and vigorous race, and extremely hospitablecheerfully sabmitting to any inconvenience to accommodate their guests; but Mr. Paton accuses them of being lazy, vin. dictive, and dissipated. They are wretchedly poor, and will execute-the women, at any rate-the most laborious tasks for the merest trifle. The dress of the peasant is very picturesque, resembling the Turkish costume. On his head he wears a Fez cap, and in his belt a brace of huge pistols. In some parts, the dress of the women is very graceful, consisting of a short cloth pelisse-generally red, green, or bluefastened at the waist by a gold clasp; and their hair is bound round the head in two large plaits, interwoven with a red ribbon. The garb of the male inhabitants of the coast consists in blue tight pantaloons, a blue waistcoat, and, in winter, a spencer, with a coarse brown cloak.

The whole of Dalmatia is divided into four circles or de-partments-Zara, Spalatro, Ragusa, and Cattaro-which are again subdivided into districts, of which there are in all 26. Each circle is governed by a capo, or capitano circolare, who superintends the police and all the civil administration, and
resides at the capital of the department. Somewhat less than a fifth of the people of Dalmatia are Greek Catholics; the rest, with the exception of a few Jews and Calvinists, are all R. Catholics. Education is very generally diffused by the system of national schools. Principal towns-Zara the capital; Spalatro, and Ragusa. Dalnatia was conquered by the Romans in the time of Augustus. In the 7th century it was taken by the Slaves, who founded there a kingdom that lasted till 1050 , when the greater part of it was united to Hungary, and the remainder passed under the protection of Venice. In 1797, the Venetian portion, along with the city of Venice, was ceded to Austria; but in 1805, by the treaty of Pressburg, it fell into the hands of Napoleon, who first united it to the kingdom of Italy, and subsequently, in 1810, to the kingdom of Illyria. The events of 1814 brought Dalmatia again under Austrian rule. Pop. (1844) 403,421. -(Wilkinson's Dalmatia and Mfontenegro ; Paton's Highlands and Islands of the Adriatic ; Jour. Roy. Geo. Soc., \&cc.)

DALMELLINGTON, a vil. and par. Scotland, co. Ayr; $30 \mathrm{sq} . \mathrm{m}$. The village, 13 m . S.E. Ayr, is pleasantly situate in a vale, surrounded by hills, near the N. end of Loch Doon. It contains a church, school, library, and reading-room; two woollen mills and a thread mill. In the vicinity coal is wrought. Pop. 1119.

DALMENY, par. Scotland, Linlithgow; 4 m . by $2 \frac{1}{2} \mathrm{~m}$. Pop. 1393.

DALMY, an isl. Persian Gulf, on the Great Pearl Bank, S. end in lat. $24^{\circ} 28^{\prime} \mathrm{N}$. ; lon. $52^{\circ} 27^{\prime} \mathrm{E}$., about 5 m . long N. to S., and 3 m . broad. On its N. part is a round hill, below which the boundary is bluff, but not ligh. To the S.E. it is nearly of equal height, with two or three hummocks above a very low, narrow sandy point, extending N. to S., and terminating the S. extremity.

DALLINGHOO, par. Eng. Suffolk; 1110 ac. Pop. 346.
DALLINGTON, two pars. Eng.:-1, Northampton; 1520 ac. Pop. 519.-2, Sussex ; 3890 ac. Pop. 612.

DALRY, a par. and vil. Scotland, co. Kirkcudbright; 32,902 ac. The village, 15 m . N.N.W. Castle Douglas, is pleasantly situate on a bend of the Ken. Pop. 1215.

DALRY, a vil. and par. Scotland, co. Ayr. The vilLage, 19 m . S.W. Glasgow, on the Scottish South-Western Railway, which has a station hard by, is beautifully situate on an eminence, r. bank, Garnock, consists of five principal streets somewhat irregularly laid out and indifferently kept, and contains a number of substantially built houses. It is rapidly increasing, and improving in the character of its buildings. Though it has a gas work the streets are not lighted, being sufficiently illuminated by the glare of the adjoining iron-furnaces; and the supply of water is obtained from wells or from the running streams by which the village is nearly surrounded. It has a parish church, a dark, gloomy, and uncomfortable edifice; and Free and United Presbyterian churches, and a new R. Catholic chapel, four schools, also several Friendly Societies, and a small public library, and two branch banks. Until within the last few years, the principal occupation of the inhabitants of the village was silk and cotton hand-loom weaving for Glasgow and Paisley manufacturers, but the greater number are now more remuneratively employed in the numcrous coal and iron mines in the vicinity; those wrought by the Blair, Glengarnock, and Eglinton Iron Companies being principally within this parish ; and in an extensive mill for carding and spining wool, at the $\mathbf{E}$. end of the village, and at the Blair iron works in the immediate vicinity. That kind of silk and cotton embroidery known as 'Ayrshire ncedle-work,' affords employment to the female population. The curing of pork is carried on to a considerable extent, the average annual quantity amounting to about 300 tons; and there is an active trade in agricultural produce, especially in cheese and rye grass seed. The parish contains $29 \mathrm{sq} . \mathrm{m}$., and consists principally of a beautiful and fertile valley, intersected lengthways by the river Garnock. Pop. (1841), 4791 ; (1851), 8867.

DALKYMPLE.- 1 , A par. and vil. Scotland, co. Ayr ; $12 \mathrm{sq} . \mathrm{m}$. The village, 6 m. S.E. Ayr, is pleasantly situate on the Doon, and has a woollen manufactory. Pop. 909. 2, A bay, isl. Madagascar, lat. (entrance) $13^{\circ} 30^{\prime}$ S.; lon. $48^{\circ} 2^{\prime}$ E., situate near the N. extremity of the peninsula on the W. side of the great bay, Passandava. It has from 8 to 12 fathoms in the entrance, which is half a mile wide between
the reefs; it is safe and commodious for wooding, watering, and refitting ships.-3, An isl. Torres Strait, between Australia and Papua, and called by the natives Damood. It is in lat. $9^{\circ} 37^{\prime}$ S.; lon. $143^{\circ} 21^{\prime}$ E. (r.), and consists chiefly of coral ; but is tolcrably-well peopled, and produces cocoa nuts, yams, some leguminous plants, \&c. The huts of the natives are constructed with remarkable ncatness.-4, A port, Van Dieman's Land, mouth of the Tamar River; lat. $41^{\circ} 5^{\prime} \mathrm{S} . ;$ lon. $146^{\circ} 45^{\prime} \mathrm{E}$.

DALSERF, a par. and vil. Scotland, co. Lanark; 7219 ac. The village, 15 m. S.E. Glasgow, is beautifully situate on the Clyde, and surrounded with orchards. It has a neat and clean and most picturesque appearance, and contains the parish churel and a school. Pop. (1851), 3578.

DALS'TON, par. Eng. Cumberland; 10,890. Pop. 2874.
DALTON, par. Scot. Dumfries ; 6 m . by 3 m . Pop. 638.
DALTON, two pars. Eng. E. Yark:-1, (North), 3890. ac. Pop. 450.-2, (South), 1730 ac. Pop. 269.

DALTON, a small market tn. England, co. of, and 16 m . W.N.W. Lancaster, pleasantly situate on a gentle acclivity. It consists principally of one street, at the extremity of which is a spacious market placc. It has communication with the sea by a canal $3 \frac{1}{2} \mathrm{~m}$. in length, capable of bringing vessels of considerable size up to the town. The staple trade of the place is malting grain. There are also extensive iron works in the vicinity. At a short distance from the town are the ruins of the magnificent abbey of Furness, founded in 1127, by Stephen, afterwards King of England, for monks of the Cistertian order. Fairs are held here on June 6, for horned cattle, and October 23, for cattle, horses, and pedlary. Market on Saturday. Romney, the celebrated painter, was born here in 1734. The Furness Railway has a station at Dalton. Pop. 800.

DALTON-in-Furness, par. Eng. Lancaster; 16,210 ac. Pop. 3231.

DALTON-le-Dale, a par. and vil. England, co. Durham; 3940 ac. The village, 9 m . E.N.E. Durham, lies in a deep narrow valley, and about $1 \frac{1}{2} \mathrm{~m}$. from the sea. Agriculture, mining, and quarrying, employ the inhabitants. Pop. 2709.

DALUPIRI, one of the Philippine Islands, N. of Luzon, about 30 m . in circumference ; lat. (N.W. point) $19^{\circ} 13^{\prime} 30^{\prime \prime} \mathrm{N}$.; lon. $121^{\circ} 10^{\prime}$ E. (B.)

DALZELL, or Dalziel, par. Scot. Lanark; 4 m . by 3 m . Pop. (1851), 2263.

IAM (LEN), name by which Appingedam is generally known among the country people of Friesland. See Appingeinam.

## DAMACON BAY, W. Africa. See Kanyabac.

## DAMAK, a tn. Java. See Demak.

DAMALA, a vil. Greece, in the Morea, near the Gulf of Egina, and 38 m. S.W. Athens. It contains between 40 and 50 houses. The water is bad, and the climate very unhealthy, In the environs are numerous ruins, supposed by d'Anville to be those of Troczenc.

DAMANHUR, or Damanhoor, a tn. Lower Egypt, 16 m. E. the Lake Mareotis, and 37 m . E. by S. Alexandria; lat. $31^{\circ} 2^{\prime}$ N.; lon. $30^{\circ} 31^{\prime} \mathrm{E}$. It is large, but ill built, and although it carries on a considerable trade in cotton is a very poor place.

DAMAR, or Demar, a tn. Arabia, Yemen, 120 m N. by W. Aden, agreeably situate on a mount. It has a castle where the Governor resides; a college for the sect of Zeïtes, attended by several hundred students. It was once the seat of the Himyarites, and has about 5000 well built houses.

DAMARAN, or Dumaran, one of the Philippine isls., off the N.E. coast of Palawan. It is of a triangular form, and about 45 m . in circumference; lat. $10^{\circ} 30^{\prime} \mathrm{N}$. ; lon. $120^{\circ} \mathrm{E}$.

DAMARAS, a coast country of S.W. Africa, lying between lat. $21^{\circ}$ and $24^{\circ} \mathrm{S}$., and of which nothing was known except by report till visited by Captain Alexander in 1836 . The country, so far as it was seen by that traveller, is described as being very beautiful; consisting of wide plains covered with herbage, broad and grassy slopes at the foot of hills, and mountains rising to an elevation of some thousand feet, some of a tabular shape, and others with remarkably sharp and rugged profiles. Copper would appear to abound, the natives manufacturing it into rings. The temperature of the climate is exceedingly various and fluctuating, the thermometer being at $40^{\circ}$ in the morning, and generally rising to
$60^{\circ}$ at noon. Wild beasts are numerous, including lions, rhinoceroses white and black, and zebras. On the plains vast herds of cattle are reared. The natives are divided into two great and distinct nations, the Damaras of the plains, and the Damaras of the hills, the former rear cattle, the latter subsist by hunting and on roots. Both are of the negro race, being black, with woolly hair, small round noses, and thickish lips. The Damaras of the plains, from their superior living, are much more robust than those of the hills; they are circumcised, and extract the two front teeth of the lower jaw ; they are almost entirely naked, men and women wearing only a sort of skin kilt about the waist and reaching to the knees; their arms are bows and arrows, a club and a stabbing assegai, or javelin, composed entirely of iron-shaft and blade; they speak a language peculiar to themselves. The huts of the Damaras of the plains are of a conical form, the stakes wattled, plastered with clay, and covered with hides. The Damaras of the hills generally wear a short mantle of deer skin on their shoulders, and about their waste many flaps of leather bchind and before, that belind containing a large pocket for roots; they are armed with bow, arrow, and assegai, and speak the clicking Namaqua language. The Damaras carry on an extensive trade in cattle with the Americans, chicfly at Walvisch Bay, on the coast of Damaras.

DAMASCUS, a large pash. Asiatic Turkey, comprehending nearly the whole of the E. part of Syria. It is bounded, N. by pashalic Aleppo, E. by the Euphrates, S. by Arabia, and W. by pashalics Tripoli and Acre. Its surface is various, as are also its soil and productions. The first presents a series of mountains, valleys, and plains, in alternate succession. Some of the plains are extremely fertile, producing wheat, barley, Indian millet, sesamam, cotton, hemp, flax, madder, tobacco, \&c., while the high grounds are generally appropriated to the olive, mulberry, and other fruit trees. It is divided into 20 districts or governorships, and has eight cities and towns, with 1522 villages. It is considered the most important pashalic in the Turkish empire, and its Pasba one of the principal dignitaries of the Ottoman court. Pop. 526,812.

DAMASCUS [Arab. Demesk], a celebrated city, Asiatic Turkey. Syria, cap. above pash., beautifully situate on a plain, at the E. base of the Anti-Libanus range, about 180 m . S. by W. Aleppo, lat. $33^{\circ} 27^{\prime}$ N.; lon. $36^{\circ} 25^{\prime}$ E.; supposed to be the most ancient city in the world. It is 6 m . in circumference, and is surrounded by a dilapidated wall. Its appearance, when it first opens on the view, has been spoken of by all travellers, in all ages, in the most rapturous terms. It is said of Mahomet, that, when he looked to it, he exclaimed, that as man could have but one Paradise below, he would not enter it, lest he should have none above. Strabo, also, speaks of it in the most eulogistic terms; and Julian calls it the great and sacred Damascus, surpassing every city, both in the beauty of its temples and the magnitude of its shrines, as well as the timeliness of its seasons, the limpidness of its fountains, the volume of its waters, and the richness of its soil. Addison describes the view of the city as 'one of the most magnificent prospects in the world.' Lamartine speaks of it in the same enthusiastic language; and Lord Lindsay likens it, with its picturesque minarets, to 'a fleet sailing through a sea of verdure.' The plain on which the city stands is of great extent and extraordinary fertility, and covered with the most beautiful gardens and orchards, irrigated by the limpid waters of the Barrada, forming a waving grove, of more than 50 m . in circuit, rich in the most luxuriant foliage and the finest fruits, including oranges, lemons, citrons, pomegranates, mulberries, figs, plums, walnuts, pears, apples, and a variety of others. As, bowever, is the case in nearly all eastern cities, the interior of Damascus by no means corresponds with the exquisite beauty of its environs. The streets are narrow, and have, many of them, a gloomy and dilapidated appearance; they are paved with basalt, generally in three divisions-that in the middle devoted to cattle and riders being the lowest, and of the same size as the other two. In the Armenian quarter the honses are built with mud, and pierced, towards the street, by a very few small grated windows, with red painted shutters. They are low, with flat arched doors, resembling those of stables, while a dunghill and pool of putrid water almost invariably stand before each door. In many of them, however, a singular contrast is presented between the dull, prison-like outer walls
of gray mud, and the richness within. Interiorly, they are of a quadrangular form, enclosing a court paved with marble, ornamented with beautiful trees and flowering bushes, and having copious fountains playing in the centre. The lower rooms on each side of the court are raised above its area, and open in front-their roofs and walls highly ornamented with figures of flowers and inscriptions, and a variety of arabesque levices. The furniture, also, is of the most splendid description, consisting of superb Persian or Bagdad carpets, which entirely covef the marble or cedar floor, and of numerous cushions and matresses spread in the middle of the saloon, for the members of the family to sit upon or lean against. The ornaments alone of many of these saloons are said to cost $£ 1000$ sterling.

The best and wealthiest part of the city is what is called the Moslem quarter, where the streets are wider and cleaner, the houses higher and better built, and the supply of water much more abundant than in any other part of the town. The Christian and Jewish quarters are the most miserable. Amongst the places most worthy of notice in Damascus are the bazaars. They are merely long streets-the principal one about $1 \frac{1}{2} \mathrm{~m}$. in length-covered in with high wood-work, and lined with shops, stalls, magazines, and cafés. The shops are narrow, and go only a short way back; and the merchant is oftener sitting than standing when he supplies his customer, which, in the former case, he does by a long stretch of the hand, without making any attempt to rise. There is a separate bazaar for almost every commodity exposed to sale, and all of them are patrolled by multitudes of confectioners, and dealers in ices and cooled sherbet. In the midst of the bazars stands the Great Khan, said to be one of the most magnificent structures of this kind in the East. It is an immense cupola, supported on granite pillars, and built, in part, of alternate layers of black and white marble. Its gate is one of the finest specimens of Moorish architecture to be seen in the world. This khan is frequented daily by the various merchants; and in this building, and in 30 inferior khans, purchases and sales are conducted by the merchants, who have their counting-houses near them. The principal mosque is also a fine edifice, and was originally a Christian cathedral. There are three Latin monasteries in Damascus-those of the Franciscans, Capuchins, and Lazarists. The first of these has an extensive library, containing a large number of works in Arabic and Syriac, in print and in manuscript, and a considerable number of grammars and dictionaries in various tongues. There is also a school for boys attached to the Franciscan convent, in which the former are instructed in Arabic and Italian. The principal R. Catholic churches form part of the monastic buildings; there are, besides, a number of detached churches belonging to different sects in various parts of the city. Besides the more remarkable architectural objects mentioned, there are an extensive citadel, and a serai or palace, in which the pasha resides. The most interesting locality in the city is, perhaps, what is called 'Straight Street,' mentioned in connection with the conversion of the Apostle Paul, in the 9th chapter of the Acts of the Apostles. It is the most important and capacious street in Damascus, and one of its busiest scenes; it is about 1 m . in length, and runs from E. to W. The house of Judas, also, to which Ananias went, is still pointed out, as well as that of Ananias himself. 'How much credulity may have had to do in fixing on and perpetuating the recollection of these localities,' says Kitto, 'it is probably easier to suspect than to ascertain.'

Damascus continues to be the most thoroughly oriental city in all its features and characteristics, in its buildings, and in the habits, manners, and appearance of its people, of any city in existence. 'How strange, how oriental, how unlike Europe, is everything here,' says Mr. Graham; 'no broad streets, nor wheeled carriages, nor tempting shops, nor glass windows, relieve and gratify the eyes. But see, there is a moslem lord, with his black slaves, carrying his pipes, and doing obeisance to their master; there goes the Persian with his pointed pyramidal cap, to remind you at once of Cyrus, Greek history, and your school-boy days. See the bronzed Arab, the child of the desert, the crafty Greek, the mercantile Armenian, the degraded Egyptian, the lordly Turk, the crouching Syrian, men from the ends of the earth-the hat, the turban, and the fez cap, and not only of all kinds, but of
all degrees, meet here, and mingle in strange confusion.' The costume of the men on the streets is rich and varied. It is, however, almost all Syrian or Arabian, few Turkish habiliments being seen. The green turban shows the nobility of the E., the descendants of the prophet. When they intend to get intoxicated with wine, or violate any of the commands of their prophet, they reverently lay the turban aside till the debauch is ended. The rich yellow turban marks the Moslems generally; and, until lately, no other was permitted to wear them. The Jewish ladies of Damascus are remarkable for the grace and dignity of their manner and deportment, the delicacy and softness of their features, and the fine symmetry of their forms. They dress richly, and are profusely adorned with ornaments of gold and pearl. Wilson, in describing the interior of a wealthy Jew's residence in Damascus, and the every-day life of its inmates, says, 'The ladies themselves made a busy scene of it, trudging along on their high pattens, or calling to one another from one side of the quadrangles to the other. They seemed, however, to cultivate great kindness, as well as volubility of address, when summoning the attention of their companions. The simple names of Sarah, Rebekah, Miriam, and Esther, fell like music on our ears; and in the persons of those who bore them, we saw the forms which our imagination associates with the Hebrew mothers and daughters on whom they were first bestowed.'

Damascus is the chief emporium of the trade in European manufactures with Bagdad, Bassora, Persia, and the neighbouring countries; it is also a place of great manufacturing industry. Traders and merchants arrive and depart with the caravans to and from Mecca once a year ; to and from Bagdad, Mesopotamia, and Persia, two or three times a year; to and from Aleppo twice a month; to and from Beyrout weekly. It is one of the holy cities, and here the pilgrims assemble on their journey to, and separate on their return from Mecca. The business classes in the city consist of Mahometan, Christian, and Hebrew merchants; the last are considered the most wealthy. The traders are the retailers of British goods; and also the shopkeepers, grocers, and druggists. There are, also, a number of manufacturers of silk, damasks, cotton, and other fabrics; the looms for working, which amount to 4000 . There are, besides, numerous cotton printing, and dyeing establishments, tobacco factories, copper and iron foundries, glass works, soaperies, \&c. The manufacture of Damascus blades, for which the city was once so celebrated, no longer exists. Saddles and bridles, rich and highly-finished, fine cabinet work, and elegant jewellery, are amongst the manufactures of Damascus. Until a very recent period, no Christian could walk the streets of that city without incurring the risk of being insulted, and probably maltreated, by its bigoted and fanatical population. This intense hatred of the Frank, however, is now considerably abated; although an obtrusive display on the streets of nationality in costume, might still be attended with unpleasant consequences.

Of the origin of Damascus, nothing certain is known. The building of it has been ascribed both to Abraham and to his steward, Eliezer of Damascus. There is, however, abundant evidence of its great antiquity, being mentioned in Gen. xiv. 15, as existing 1913 years b.c., and appearing even then to have been a place of note. At subsequent periods, it fell successively under the power of the Persiais, Greeks, and Romans, attaining great eminence under the last. In 1516, it fell into the hands of the Turks, who retained it till 1832 , when it was taken by Ibrahim Pasha, but reverted again to the Turks, when the Pasha of Egypt was compelled to evacuate Syria. It is the native place of the geographer and historian Abulfeda. Beyrout, distant about 58 m . N. W., is the seaport of Damascus. Pop. 111,552; of which 11,772 are Christians, and 5000 Jews. -(Chesney's Euphrates Expedition; Jour. Roy. Geo. Soc.; Kitto's Biblical Cyclopcedia; Wilson's Lands of the Bible, \&c.)

DAMAUN, a seaport tn. Hindoostan, prov. Gujerat, at the mouth of the Gulf of Cambay, 100 m . N. Bombay; lat. $20^{\circ} 25^{\prime} \mathrm{N}$, ; lon. $72^{\circ} 58^{\prime} \mathrm{E}$. It belongs to the Portuguese, who conquered it in 1531 , and have kept possession of it ever since. The town has a prepossessing appearance from the sea, the houses being generally whitened, but the streets are narrow and dirty. It has several churches and convents. Three miles off the shore there is anchorage in 8 fathoms, but small vessels find a secure harbour in the river. The commerce of the place is rapidly declining; but shipbuilding is still carried

## DAMIETTA

on to a considerable extent, timber being obtained from the adjoining teak forests. l'op. about 6000.

DAMAUN, or DAman, a dist. formerly in Afghanistan, now included within the territory of the Punjab, comprehending the tract of country between the Salt range on the N., the Sooliman Mountains on the W., the Indus on the E., and Sungur, in Upper Scinde, on the S.; abont 220 m . N. to S., ly an average breadth of 60 m . It consists chiefly of bare arid plains, destitute of all vegetation, excepting a few dwarfish bushes, widely scattered, and occasional trees, of about 20 ft . in height, beyond which they rarely rise. Where duly irrigated, however, these parched plains become very productive, as is seen in the district called Derajat, on the W. bank of the Indus, which is extremely fertile. Other portions of the country, again, consist of tracts of loose, irreclaimable sand. In the S. parts are extensive jungles, the resort of numerous wild animals. In the immediate vicinity of the villages the land is cultivated and rendered fruitful, and many of them are surrounded with groves of date trees. The heat in summer is excessive, both by day and night, while, in winter, the thermometer is often some degrees below the freezing point. The people of Damaun are chiefly Juts and Beloochees, dark complexioned and ill-formed, who live in a state of continual hostility with each other.

DA MBACH, a tn. France, dep. Bas-Rhin, 6 m . N. Schélestat. It was once defended by a castle, called the Chateau of Pernstein, on a height just above it. It is still begirt with a dilapidated wall, and is entered by three gates. The houses are generally mean, and the streets badly paved. Near the path leading to the castle is a chapel of St. Sebastian, which has a curious altar of wood, with fine carvings. Dambach has some linen weaving and vinegar-works. 1'3485.

DAMBAKANEH, a vil. of W. Africa, on the Senegai, in the Damga country: lat. $15^{\circ} 8^{\prime} \mathrm{N}$.; lon. $13^{\circ} 30^{\prime} \mathrm{W}$. It is inhabited by Sarracolex negroes-a spirited race, who hold their own against predatory Moors.

DAMBELING (LAKE), a large salt-water lake of W. Australia, about 100 m. S.S.E. Beverley, probably about lat. $33^{\circ} 25^{\prime} \mathrm{S}$.; lon. $117^{\circ} 30^{\prime} \mathrm{E}$. It is the largest of several lakes in this territory, about 15 m . long, by 7 or 8 m . broad, shallow, with many low islands, of various and beautiful form. On the N. and E. shores there is a good grassy country, down to the lake, ending in precipitous banks, and extending over the hills 2 or 3 m . distance from it. The water is salt, and the shores flat and muddy.

DAMBOOL, or Dambolo, a vil. isl. Ceylon, $45 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. Kandy, and 70 m . N.E. Colombo. It lies at the junction of four lines of road, leading respectively to Aripo and Manaar, to Trincomalee, to Kandy, and to Kurneyalle and Ambapusse; and has a commodious rest-house, and carries on some little traffic. It receives its name from a large mass of rock, situated about a mile from the village, and named Damboollagalla, which rises about 550 ft . above the level of the surrounding plain, is of primitive formation, being chiefly composed of gneiss and mica-schist, and is, in many places, rapidly allvancing to disintegration. The rock is shaped somewhat in the form of the hinder portion of a gigantic human skull, and is, for the most part, destitute of vegetation. On the S. side, and about 100 ft . from the summit, are some remarkable cave-temples, devoted to the worship of Buldha, partly natural, and partly artificial. The caves, which are reached by an easy ascent, are five in number, and vary from 10 to 30 ft . in height, and stretch into the heart of the rock various distances, from 15 to 150 ft .-the largest being 170 ft . long, by 75 ft . broad. In one of these caves is a long and interesting inscription, throwing considerable light on the state of the government of Ceylon, in the 12th century, and showing it to have then been in a condition far from contemptible. In another cave there is a colossal statue of Buddha, in a recumbent position, hewn out of the rock; and similar figures, though smaller, are in some of the other caves. In all of them there are numerous carvings and images. These caves,

Vol. I.
a hundred years before the Christian era, served as a place of refuge, from invading Malabars, to the Ceylontse monarch Walagainbahu, who, in gratitude for the protection thus received, ordered them to be enlarged, placed in them images of Buddha, appointed priests to take charge of them, and dedicated certain lands for their support. Notwithstanding all the changes that have taken place since that period, the priests of Buddha still take charge of, and officiate at the cave-temples of Dambool.-(W. Knighton in Journal of Asiatic Society of Dengal, 1847.)

DAMBORITZ, or Damborschitz, a market tn. Austria, Moravia, circle Brünn. It contains a parish church, school, and synagogue, and has a potash work, four mills, and two annual fairs. Pop. 2048.

DAMEH, one of the Amboises islands (which see).
DAMER, or Av Damer, a tn. Nubia, cap. of a small independent state, r. bank, Nile, near the junction of the Atbara; lat. $17^{\circ} 40^{\prime} \mathrm{N}$. ; lon. $34^{\circ} 5^{\prime} \mathrm{E} ; 175 \mathrm{~m}$. N.E. Khartoom. It is regularly built, and consists of about 500 houses. It contains a beautiful mosque, and one of the most celebrated seminaries of education in E. Africa. It carries on a considerable trade on the Nile, and is the seat of a numerous and influential priesthood, without whose consent no enterprise dare be undertaken. The inhabitants are Arabs.

DAMERHAM (South), par. Eng. Wilts; 4310 ac. P. 728.
DAMGHAN, a tn. Persia, Khorassan, cap. dist. of same name, 50 m. S. Astrabad. It is now in a state of utter ruin and decay, not a quarter of the space within its walls being occupied by habitable buildings.

DAMIANO-d'Asti, (Santo,) a tn. Sardinian States, Piedmont, 8 m . W. Asti, on the Borbo. It is partially fortified. Silk is raised here. Pop. 6100.

DAMlANO, (Santo,) a tn. Sardinia, Piedmont, div. of, and 14 m . W. Coni, cap. mandamento of same name, l. bank, Maira. Pop. 1500.

DAMIETTA, a th. Lower Egypt, r. bank of one of the principal branches of the Nile, and about 6 m . from its mouth; 100 m . N.N.E. Cairo; lat. $31^{\circ} 25^{\prime}$ N.; lon. $31^{\circ} 5^{\prime}$ E. It is irregularly built, but many of the houses are tolerably good, though inferior, generally, to those of Rosetta; while many of them, again, are of the most wretched description. It contains, however, some fine mosques, bazaars, and marble baths. Damietta was at one time a very important place, $-$

and carried on an extensive foreign trade, but is now eclipsed by Alexandria. It still, however, enjoys a considerable trade with the interior, in fish and rice-the former the produce of the fisheries on Lake Mensaleh, in the neighbourhood -and exports some coffee, beans, and linen. A bar at the mouth of the Nile prevents large vessels from reaching the town, compelling them to anchor outside, and to load and unload by means of small craft, of from 30 to 60 tons burthen. Damietta was at one time famous for its manufacture of leather and striped cloths; which last, when imported into Europe, are supposed to have received from it the name of dimity. $\Lambda$ military school and cotton factory were established here by Mehemet Ali. The ancient town of Damietta (Tameúthin).
101
stood about 5 m . nearer the sea, or further N . It was considered the bulwark of Egypt, on this side, in the time of the Crusaders; and its capture was always looked upon as the most important object in their expeditions against that country. The danger to which it was exposed, however, from its position on the shores, induced the Egyptian caliphs to change its position, and to remove it to where the modern town now stands, about the year 1251. The present town contains many antique columns and blocks, supposed to have been brought from the old city. It was taken by the Pasha of Egypt in 1833. Pop. 28,000.

DAMM, a vil. Bavaria, Lower Franconia, on the Aschaff, here crossed by a bridge. It contains a parish church, and has manufactures of earthenware and potash, two paper, and several other mills. Pop. 1609.

DAMM, or Alt Damm, a tn. Prussia, gov. of, and 4 m . E. Stettin, on both sides of the Plöne, where it falls into the S. extremity of the lake of Damm; and on the Stettin and Stargard railway. It consists of the town proper, which is walled, and otherwise fortified, and of two suburbs; contains a chureh, two schools, poorhouse, and hospital; has manufactures of woollen and cotton goods, a trade in cattle and fish, and three annual fairs. Pop. 2419.

DAMME, a vil. duchy Oldenburg, 43 m. S. the city of Oldenburg, cap. bail. of same name. It contains a church, and has manufactures of quills and musical instruments, a trade in horses and cattle, and four annual fairs. Pop. of vil. 1153; of bail. 10,430 .

DAMME, isl. Indian Archipelago, Banda Sea, between Ceram and Timor; lat. $7^{\circ} 10^{\prime}$ S.; lon. $128^{\circ} 40^{\prime}$ E.; about 12 m . sq. It is very mountainous, and has a lofty active volcano, in its N.E. part, where there are also hot springs. Its vegetation is magnificent, particularly in timber trees. The canari and nutmeg trees abound in it. It possesses some rare, and hitherto undescribed animals. The Dutch, who had formerly a residency and spice plantations on the N. side of the island, at Wilhelm Bay, after long neglect, lately sent a deputation to the inhabitants, which was kindly received, and found some families still professing Christianity. On the E. side of the island is a bay, called Kulewatte Bay, which extends about 4 m . into the land; it has high and precipitous shores, and is, in many parts, unfathomable, but Wilhelm Bay is much exposed, and has bad anchoring ground.

DAMMER ISLANDS, a group, Indian Archipelago, off the S. extremity of Gillolo, at the entrance of Gillolo Passage; lat. $1^{\circ} \mathrm{S}$. ; Ion. $128^{\circ} 15^{\prime}$ E.

DAMMGARTEN, a tn. Prussia, gov. of, and 27 m . W. by S. Stralsund, near the head of the Binnensee. It is defended by a fort, and has manufactures of ordinary linen and damask. Pop. 1220.

DAMMSCHE-SEe, a lake, Prussia, gov. of, and 2 m . N.E. Stettin. It is properly only the expansion and embouchure of the Oder, one branch of which communicates with its S., and another with its N. extremity, while the lake itself communicates with the Stettiner-haff. It is about 10 m . long, N. to S ., and nowhere more than 2 m . broad. It receives the waters of the Ihna and Plöne, in addition to those of the Oder, and is navigable throughout.

DAMOO, a tn . Tibet, 40 m . N.N.E. the Niti Pass; lat. $31^{\circ} 26^{\prime}$ N. ; lon. $79^{\circ} 53^{\prime} \mathrm{E}$. Gold mines are reported by the natives to be wrought in the neighbourhood.

DAMPIER ARCHIPELAGO, N. coast, Australia, extending from lat. $20^{\circ} 19^{\prime}$ to $20^{\circ} 30^{\prime} \mathrm{S}$.; lon. $116^{\circ}$ to $117^{\circ} 7^{\prime}$ E. It consists of a great number of small islands, the principal of which is Rosemary Island, where Dampier anchored, in 1699.

DAMPIER STRAIT, and Island, Indian Archipelago, The strait lies between the N. W. end of Papua and the island of Battanta, on the S., and the island of Waygiou, on the N., about 70 m . in length; but the only dangerous part of the strait about 33 m . in length, lies to the N. of Battanta.-The island is on the N. coast of Papua, or New Guinea, in lat. $4^{\circ} 40^{\prime} \mathrm{S} . ;$ lon. $145^{\circ} 50^{\prime}$ E.

DAMPOOR, a tn. Hindoostan, prov. Delhi, dist. of, and 38 m. N.W. Moradabad. It contains several mosques, and has a tolerably large and well supplied bazaar.

DAMSAY, an islet, Scotland, Orkney, off Mainland, in the bay, and forming part of the parish of Firth. It is about 1 m . in circumference.

DAMUGGOO, a tn. Africa, Guinea, l. bank, Niger; lat. $7^{\circ}$ N.; lon. $7^{\circ} 50^{\prime}$ E. It is large and populous, but extremely dirty. The huts are circular, built of mud and loam, strengthened and supported by props and ribs of wood. The town, altogether, has a poor, mean, and extremely wretched appearance. Those of the inhabitants who are not engaged in trading employ themselves in cultivating the soil. Yams and Indian corn form the principal vegetable food of the poorer classes. Their domestic animals are the dog, sheep, goat, and common fowl. The last two are plentiful, and fish abound in the river.

DAN, a river, U. States, N. Carolina and Virginia, rising in the former state, in the Alleghany Mountains, but flowing mostly in the latter, with an E. course. It unites with Stanton river, to form the Roanoke, lat. $36^{\circ} 38^{\prime} \mathrm{N}$.; lon. $78^{\circ} 30^{\prime}$ W. It has falls of 23 ft . at Danville; but, by a canal round them, is navigable for 100 m . from its mouth.

DANA, a vil. Syria, 21 m . W. Aleppo. It contains two ruined churches, and a pretty little circular temple; and is situate near the middle of a remarkably fertile plain of the same name, which produces abundant crops of maize, cotton, \&c.

DANBURY, a tn. U. States, Connecticut, 52 m. N.E. New York. The town contains fully 200 houses, has six places of worship, several schools, an academy, and a courthouse, and was founded in 1696. Still river, a branch of the Housatonic, passes through it. Pop. 4504.

DANBURY, par. Eng. Essex ; 3670 ac. Pop. 1189.
DANBY, par. England, York (N. Riding); 13,860 ac. Pop. 1273.

DANBY-Wiske, a par. and vil. England, co. York (N. Riding) ; 4350 ac. The village, 3 m . N.W. Northallerton, is pleasantly situate on the W. bank of the Wiske, $\frac{1}{4} \mathrm{~m}$. distant from the York and Neweastle Railway. Pop. 546.

DANDA, or Dande, a vil. and river of W. Africa, Angola. The village is situate on the r. bank of the streani, not far from its mouth, which is in lat. $8^{\circ} 30^{\prime} \mathrm{S}$. There is also a point or headland here of the same name; high, barren land, with steep cliffs near the shore, variegated with white and red patches.

DANEMORA, a vil. Sweden, län of, and 24 m . N.N.E. Upsala, celebrated for the iron mines in its vicinity, which have been worked, without interruption, from the 15 th century, and produce the finest iron in the world, much of it being exported to England, where it brings a much higher price than any other iron, and is extensively manufactured into steel. The entrance to the chief mine is by an adit of considerable width, and 200 yds . in length, within the sides of which pits are dug to the seam below, which is of great thickness, and is worked by blasting. The deepest pit is 500 ft . The smelting furnaces are about 1 m . distant, at Österby, in the midst of very picturesque scenery. The fuel used is charcoal.

DANESFORT, par. Irel. Kilkenny; 5063 ac. P. 1177.
DANESTOWN, par. Irel. Meath; 1642 ac. Pop. 254.
DANGANDARGAN, par. Ireland, Tipperary; 1087 ac. Pop. 361.

DANGANDONOVAN, par. Ireland, Cork; 2929 ac. Pop. 1113.

DANGER ISLAND, Chagos Archipelago, on the W. edge of the Great Chagos Bank; lat. $6^{\circ} 23^{\prime}$ S. ; lon. $71^{\circ} 18^{\prime} 30^{\prime \prime}$ E. It is nearly $1 \frac{1}{2} \mathrm{~m}$. in extent, low, and covered with trees. Said to abound in wild poultry. S. by W. from the island, distant from 2 to 3 m ., a dangerous reef extends, on which the sea breaks at times.

DANGER RIVER (Rio D'Angra), a river of W. Africa, which falls into the Bight of Biafra, forming a considerable bay at its mouth. Of the country in its vicinity little is known. Its embouchure is in about lat. $1^{\circ} \mathrm{N}$.

DANGEROUS ARCHIPELAGO, a group of coral islets, S. Pacific Ocean, lying E. from the Society Islands, in lat. $21^{\circ} \mathrm{S}$. ; lon. $140^{\circ} \mathrm{W} . ;$ forming one of the most remarkable assemblages of atols in the Pacific Ocean. They are 80 in number, generally in a circular form, surrounding very deep lagoons, and separated from each other by profound depths. The reefs or rings are about $\frac{1}{2} \mathrm{~m}$. wide, and seldom rise more than 10 ft . above the edge of the surf, which beats upon them with such violence that it may be heard at tho distance of 8 m . They present a serious obstruction to navi-
gation, while currents and strong squalls add to the risk. Singular interruptions to the trade-winds are eaused by these low lagoon islands; not only do the former often fail among them, but heavy squalls come from the opposite direction, and more frequently by night than by day. Many of the islets are inhabited.

DANHOLM, formerly Strale, a small island, Prussia, in the Baltic, opposite the port of Stralsund, in the narrow strait between Riagen and the mainland. It has only 10 inhabitants.

DANIEL (Pont), a bay, Lower Canada, on the S. side of the dist. of Gaspé, near the entrance of Chaleur Bay. It is a good harbour, but open to E. winds. At the head of the bay is a river, which can be entered by boats only at high water. The country around is rocky and barren.

DANIELE (SAN), a to. Austrian Italy, gov. Venice, prov. of, and 12 m. N.W. Udine. It is surrounded by walls, and lias a castle, belonging to the counts of Concina; and an active trade in grain. On the 11th May, 1809, the Austrians, under Archduke Charles, were defeated here by the French. Pop. 3600.

DANILOW, a tn. Russia, gov. of, and 41 m . N. Yaroslav, chief place dist. of same name, on the Pelenda. It contains a wooden church; and has manufactures of wax and tallow candles, dyeworks, some trade in corn and provisions, and an annual fair. Pop. (1842), 3024.——The district, which is of considerable extent, has an undulating surface, is watered by the Volga, Pelerda, and Kaft, and contains numerous lakes; but is not well wooded, and only indifferently fertile. I'op. 64.052.

DANKALI (Kingdom or), formerly a province of Abyssinia, now an independent state, bounded, N. E. by the Red Sea, and S.W. by a range of mountains, running nearly parallel to the coast, S.E. to N.W., and forming a frontier line towards Tigré and the Galla country. It is about 250 m . in length, by about 56 in width, at the broadest part, and extends from about lat. $13^{\circ}$ to $15^{\circ} 30^{\prime}$ N. It is, in general, low, sandy, dry, and unproductive, although said to have been formerly a rich country. The heat is often excessive, the thermometer rising frequently to $110^{\circ}$. In the dry season it is almost destitute of water. Serpents are numerous. Its population is composed of various Arab tribes, known under the general name of Dankali or Danakils, and described by all travellers as being an unprin cipled and ferocious race, and the most treacherous and cruel of all the inhabitants of Africa. Major Harris speaks of them as inheriting all the worst passions and vices of the semi-barbarian, and being, many of them, the most scowling, illfavoured, and hideous-looking savages in the universe. 'Reprisal and revenge form the guiding maxim of all. Monsters, not men, their savage propensities are portrayed in a dark and baleful eye, and the avenger of blood is closely dogging the footsteps of onehalf of the population.' Johnstone gives them a similar character, calling them 'the most cold-blooded assassins he ever met with or read of. By their own showing,' he says, 'not one of them that wore a sniall tuft of hair upon the boss of his shield but had killed and murdered 10 or 12 individuals, which, if only understood as two or three, the men surrounding me must have caused the death of, at least, a score of their fellow-beings; and the delight and evident zest with which they spoke of, or listened to the several struggles in which they had been engaged, told the fierce and crucl character of these demons in human shape. The companion of the day, and the sharer of your food, will, under cover of night, strike, without remorse, his knife into your throat.' The common instrument of murder is a short sword, or rather large knife, called a creese, the blade of which is about 2 ft . long, and 3 inches broad, with a crook in the centre. With

this formidable instrument the Danakil builds his house, cuts his meat at table, pares his nails, shaves lis beard, slays his beef and mutton, and cuts the throat of his enemy, or disembowels him-a still more favourite mode of dispatching him, which is performed by a peculiar ripping motion, accompanied by a fiendish howl of satisfaction. The spear is also a very common weapon; it is 7 ft . in length, topped by a blade from 10 to 15 inches long. Filthy habits, dirtinese of person, and indolence and a sordid avarice, complete the character of this savage people. The chief employment of the women is plaiting mats and baskets, for salt and corn, from the branches of the palm tree. They dress very slovenly, and frequently wear nothing but a piece of cloth, of a gray, blue, or variegated colours, fastened round the waist, and reaching to the knee. The people distinguished by the name of Dankali are not confined to the territory so called, but extend over the adjoining districts, S. and S.W. The Danakil population of this portion of Africa is estimated at 70,000. - (Harris's Highlands of Ethiopia ; Johnstone's Travels in Abyssinia.)

DANKARA, or Dinkira, formerly an independent kingdom, Upper Guinea, now incorporated in the Ashantee territory, to which it was added, by conquest, in the beginning of the 18 th century. Its former capital, Dankara, is 50 m . S.S.W. Coomassie, the capital of Ashantee.

DANNAWAN, or Dannavan, a small isl. Sooloo Archipelago, off the N.E. coast of Borneo; lat. $4^{\circ} 20^{\prime}$ N.; lon. $118^{\circ} 51^{\prime}$ E.

DANNENBERG, a tr. Hanover, gov. of, and 32 m . E.S.E. Luineburg, on the Jetze, which, branching off, divides it into three parts. It consists of a long principal street, and several others which open into it, contains an old Gothic church and two chapels, and has manufactures of linen and tobacco, breweries, and distilleries, a trade in yarn, linen, and hops, and eight annual cattle markets. Pop. 1609.

DANNOWITZ (Unter), or Dolny Dunagowice, a market town, Moravia, circle of, and 23 m . S. Brünn. It contains a parish church and school, and has tile works, and two annual fairs. Pop. 2556.

DANTUMWOUDE, or Damwoude, a vil. Holland, prov. Friesland, 11 m . N.E. Leeuwarden, in a cultivated and wooded district. It has a Reformed church, with a tower; a Baptist church, and a school. The canal from Dockum to Groningen passes this place, near which, also, much chicory, rye, and buckwheat are raised. Pop. 700.

DANUBE [anc. Danubius; German, Donau; Hungarian, Duna], a celebrated river of Europe, originates in two small

Donaueschingen. Its general course is from W. to E., falling into the Black Sea by four different outlets, called respectively the Kilia, Stambool, Sulineh, and the Edrillis or St. George's Mouths. The Sulina mouth or channel, the deepest, is in lat. $45^{\circ} 9^{\prime} 18^{\prime \prime} \mathrm{N}$.; lon. $29^{\circ} 40^{\prime} 30^{\prime} \mathrm{E}$. (r.) The extent of the basin of the Danube is estimated at $269,189 \mathrm{~m}$., the direct distance, from source to mouth, upwards of 1000 m ., and its development-of course, including windings- 2423 m . From its source the Danube flows N.E. to Regensberg (Ratis. bon), in Bavaria, lat. $49^{\circ} 1^{\prime}$ N.; lon. $12^{\circ} 5^{\prime} 52^{\prime \prime}$ E. (L.); when it takes a S.E. by S. direction, to Waitzen, in Hungary, lat. $47^{\circ} 30^{\prime}$ N., previously passing Vienna and Presburg. At Waitzen it suddenly bends round, and flows nearly due S. to the point where it is joined by the Drave, near Esseg, in Sclavonia, lat. $45^{\circ} 30^{\prime}$ N.; thence it runs S.S.E. to Belgrave, on the N. confines of the Turkish province, Servia, of which it subsequently forms the boundary, separating it from Hungary, continuing its general E. course, though not without some narked deviations, to the point where it is joined by the small river, Bereska, lat. $44^{\circ} 28^{\prime}$ N.; lon. $22^{\circ} 12^{\prime}$ E.; it abruptly turns to the N.E., and continues in this direction to Orsova, a distance of about 25 m ., when, by suddenly taking a S.E. course, it fairly enters the Turkish European provinces, forming the boundary line between Wallachia and Bulgaria. At Rassova, on the S.E. extremity of the former province, lat. $44^{\circ} 18^{\prime}$ N., lon. $27^{\circ} 37^{\prime}$ E., it takes a direction nearly due N . to Galatz, lat. $45^{\circ} 22^{\prime}$ N., lon. $28^{\circ} 2^{\prime} 58^{\prime \prime}$ E., when it bends round to the S.E., and, after a further course of about 80 m ., falls into the Black Sea, by the several mouths above enumerated. During its progress from its source, in Baden, to its embouchure, the Danube passes through Würtemberg, Bavaria, the archduchies of Austria, and Hungary, and forms the boundary between the Hungarian Banat on the N., and the Turkish provinces of Servia on the S.; and between the Turkish province of Bulgaria on the S., and the Danubian principalities Wallachia and Moldavia, and the Russian province of Bessarabia, on the N.
The great basin of the Danube has been divided into four minor basins. The first consists of a vast plateau of a pentagonal form, 1640 ft . above sea level, 150 m . in length, and 125 m . broad, surrounded by mountains, and comprising a portion of the principality of Hohenzollern, part of the kingdom of Würtemberg, and the greater part of the kingdom of Bavaria. This tract is, by far, the most fertile and most populous through which the Danube passes during its entire career. The principal affluents within this space are the Iser and Lech, both from the right, or S.-those from the left, or N., being trifling. During this part of its course the Danube flows through deep and difficult valleys, and is closely hemmed in, upon both banks, by abrupt and wooded slopes, but expands as it reaches Ulm, about 85 m . from its source, to about 328 ft . in width, having an extensive and rich plain on its r . bank. After leaving Ulm, where it becomes navigable, it continues to widen, but has little depth, and is covered with wooded islands-its $\mathbf{r}$. bank consisting wholly of extensive plains and marshes.
The second basin belongs to the empire of Austria, having Vienna nearly in its centre, and comprising the archduchy of Austria, Hungary as far E. as Waitzen, and Styria. It is very irregular, and is bounded, on all sides, by very high mountains. Generally, it is well peopled, well cultivated, and the inhabitants industrious. The soil is rich in mineral products, and the climate one of the best in Europe. The principal affluents in this basin are the March, or Morawa, and the Ens-the former from the left, and the latter from the right. The Danube bere passes through a succession of the most picturesque scenery, till it passes Vienna. Below Pressburg it runs with great velocity, is crowded with islands, and flows between banks alternately covered with reeds, willows, and poplars, and varied occasionally by forest trees and patches of sand. In this portion of its course, also, it sends off numerous arms, enclosing large tracts of country, thus forming islands. Of these, the most important are the Great and Little Schütt, very fertile districts, formerly called the ' Golden Gardens.' They are well peopled, the inhabitants being gathered in villages near the centre, to avoid the sudden inundations to which the islands are subject.

The third basin of the Danube comprises Hungary, E. of Waitzen, and the principality of Transylvania, and consista of
an immense plain, almost without undulations of any kind, and only 394 ft . above the sea level. It is intersected by large rivers, with marshy banks, and interspersed with stagnant pools, saline and sandy wastes; rich, however, in mineral products, in flocks and herds, and in wines. It comprises about one half of the entire basin of the Danube. The climate is bad, especially in the vicinity of the marshes, which cover a space of $3053 \mathrm{sq} . \mathrm{m}$. The principal affluents in this basin are the Save, the Drave, and the Morava. From Pestl to Belgrade, the river passes through an immense plain, covered with sand and alluvium, through which it is con stantly forming new channels, and sanding up the former ones; sometimes sweeping away towns, and at others leaving such as were built on its banks some miles fron them. Below Belgrade the river wends its way, now between slight undulations, and now through a cultivated plain; at one tino separating into two or more branches, at another forming only one vast stream. Below Moldava it passes, for 60 m ., through a succession of rapids and shallows, interspersed with rocks and sandbanks, where it has cut a passage for itself through the cross chain of hills which connect the Carpathian Mountains with the Alps; and between Drenkova, in Hungary, and Scala Kladova, in Servia, the navigation is effectually interrupted by three great rapids, the principal, or last and lowest, of which is the famous cataract called the Iron Gate, where the stream rushes through a narrow channel, between stupendous rocks, with great rapidity, and a noise so overpowering as to drown every other sound, ending with a series of whirlpools, eddies, and smaller falls. It is said, however, that the terrors and impracticabilities of these rapids have been somewhat exaggerated. They are passed, without fear or danger, by heavy Turkish boats; and it is believed to be possible so far to ameliorate them, as to allow of a free navigation for large vessels. A canal, as one expedient, has been proposed to obviate the difficulty, but has not yet been attempted.

The fourth basin comprises Wallachia, Moldavia, a portion of Bessarabia, and Bulgaria. This tract is flat, inundated, and marshy along the banks of the river; dry, mountainous, and difficult on the borders of the basin. It is fertile in products of every kind, yet badly cultivated; thinly peopled. with miserable roads and wretched villages. The principal affluents in this basin are the Aluta, Sereth, and Pruth. In its progress through Turkey the Danube gradually increases in width, from 1400 to 2100 yds ; and below Hirsova, in Bulgaria, it forms an expanse of water like a sea, and is studded with islands. Excepting between Drenkova and Kladova, the Danube may be said to be navigable for steamvessels from Ulm to the sea, although, in some places, rendered difficult by the occurrence of shallows and sandbanks, intersected by narrow and intricate channels. The outlets of the Danube are separated from each other by several low islands, covered with reeds and trees. The greater part of the ships bound up the river enter it by the Sulina mouth, it being the deepest. The Danube receives 60 navigable tributaries, and its volume of water is nearly equal to that of all the rivers that empty themselves into the Black Sea taken together. Its rapidity is, in many places above Orsova, so great, as to render any navigation, except that of steam, impossible; but below that point its current is gentle and equable. A number of steam-vessels now ply on the river, between its principal towns. Before steam navigation was introduced into the Danube, the boats which descended it were very rarely, if ever taken back, but were broken up at the end of their voyage. The principal towns on the banks of the Danube are Ulm, in Würtemburg; Regensberg (Ratisbon) and Passau, in Bavaria; Linz and Vienna, in Austria; Pressburg, Buda, Peterwardein, and Orsova, in Hungary ; Belgrade, Widin, Nikopol or Nicopolis, Rustchuck, Silistria, Hirsova, and Brahilov, in Turkey.-(Lavallée's Military Topography; Paget's Hungary and Transylvania, \&c.)

DANUBE, Hither, and Danube, Thither [Germ. Diesseits der Donau, and Jenseits der Donau; or, this side the Danube, and beyond the Danube], two of the four principal divisions of Hungary, comprehending all the W. portion of the country, and called, also, Nieder or Lower Hungary; Thither Danube, sub-divided into 11 counties, comprehends generally the whole of the kingdom situated on the r. bank, and W. of the Danube; and Hither Danube, sub-divided into 13 counties, comprehends a considerable portion of the N. and
W. part of the kingdem N. and E. of the Danube, and W. of the Theiss.

DANUBE (Circle of), one of the four circles of Würtemberg, comprehending the S.E. part of the kindom, and bounded, N. by Jaxt circle, E. by Bavaria, S. by Bavaria and Lake Constanz, and W. by Baden, Hohenzollern, and the circles of Schwarzwald [Black Forest] and Neckar area, 1760 geo. sq. m. It is watered by the Danube and some of its affluents, and by some afluents of Lake Constanz, and is divided into 18 bailiwicks. Pop. 376,594.

DANUBE (Upper and Lower), [Ober and Unter Donau], two former circles, Bavaria, now called Swabia, and Lower Bavaria.

DANVILLE, numerous places, U. States, particularly : -1, A vil. Virginia, pleasantly situate on a small river, 164 m . S.W. by W. Richmond. It has two banking-houses, a printing-office, numerous stores, an iron foundry, and two tobaceo warehouses. Pop. 1200.-2, A vil. Kentucky 41 m. S. by W. Frankfort. It has four churches, two academies, one school, and is, besides, the seat of Centre college, and of the Kentucky society for the deaf and dumb. Pop. 1223.-3, A vil. Pennsylvania, 71 m . N. by E. Harrisburg; with two churches, an academy, and numerous stores. Pop. 1000.

DANZIG, a gov., prov. W. Prussia, bounded, N. by the Baltic, E. gov. Königsberg, S. Marienwerder, and W. Kiist rin; area, 2436 geo.sq. m. It consists of an extensive flat breken only in one part by some low heights, which nowhere rise more than 500 ft . above the sea. It is well watered, both by rivers and lakes. Of the former, the principal are the Vistula, which here divides into two arms, the one retaining its own name, and the other taking that of the Nogat; the Elbing, Thiene, Great and Little Schwente, Mottlau, Rhede, and Ferse. The principal lakes are the Drausensee, Isarnow itzersee, and Radaunensce. The lowest grounds consist of a rich alluvium, often rendered marshy from its liability to inundation. Wherever the ground rises to any height, sand begins to prevail. The crops, particularly of barley and oats, are very abundant; and a considerable extent of surface is occupied by flax and tobacco. On the higher grounds there are several extensive forest3. Considerable attention is paid to the rearing of stock; and there are excellent breeds of horses, cattle, and swine, found in several distriets, though, in others, very inferior brceds are still allowed to remain. Game is not very abundant, but there are ample supplies of fish. Manufactures and trade have made considerable progress. Pop. (1846), 405,850.

DANZIG, a tn. and port, Prussia, cap. prov. W. Prussia; lat. (observatory) $54^{\circ} 21^{\prime} 18^{\prime \prime} \mathrm{N}$. ; lon. $18^{\circ} 41^{\prime} 12^{\prime \prime}$ E. (к.), 253 m. N.E. Berlin ; l. bank, W. arm of Vistula, about 3 m . above its mouth in the Baltic, and at the confluence of the Mottlan and Radaune which both traverse the town; one of the most important seaports in the Prussian monarchy as well as one of its chief commercial entrepôts. It is nearly of a circular form, and ranks as a fortress of the first class, being both surrounded by walls and bastions, defended by a citadel and several outworks, and provided with the means of laying a considerable part of the surrounding country under water. It is entered by four gates, has nine suburbs, and is divided into five parts-the Old, New, and Low town, the Speicher [granaries], an island, and Langgarten. The last is the more modern part of the town, and is both regularly and well built. In the other parts the houses are gencrally old and indifferent, and the streets narrow and winding. The principal edifice is the Dom or cathedral, begun in 1343, but not finished till 1503 . It is 360 ft . long by 142 ft . broad, and its vaulted roof, 98 ft . above the pavement, is supported by 26 slender brick pillars. It possesses a fine brass font and a curious astronomical clock which has long ceased to move, but its chief attraction is a painting of the Last Judgment, attributed to John Van Eyck, and well known under the name of the Danzig picture. The other buildings and institutions deserving of notice are the townhouse, the church of St. Catherine, the oldest in Danzig, and 11 other Protestant and five R. Catholic churches; three monasterics, a numnery, two synagogucs, the exchange, an imposing gothic edifice built in 1379; the arsenal, gymnasium, navigation school, school of arts, townhouse, theatre, foundling and orphan hospitals, poorhouse, and workhouse; also, a lunatic asylum, seven
hospitals for the sick, a respectable arsenal, an observatory, and a picture gallery. It is the seat of the provincial government, and contains the various offices connected therevith; and is also the residence of several foreign consuls. Tho

manufactures are numerous, but none of them are of mue. importance, excepting tobacco, starch, beer, and brandy. The last two employ 39 breweries, and 25 distilleries, to which must be added 80 establishments for that well known liqueur which in commerce bears the name of Danziges Goldwasser, or Eau de Vie de Danzig. Some sugar-refining, and various manufactures of metal are likewise carried on; also clothweaving, the making of potash, and the baking of ship biscuit. But the prosperity of the town is founded on its trade, which is mostly all transit. The staple article is grain, particularly wheat, for the warehousing of which there are inmense granaries on the island of Speicher, capable of containing hali a million of quarters, and secured against ife by a strict prohibition which allows no lights to be used on the island. The wheat, which is chiefly Folish, though small in the grain, is remarkable for the thinness of its skin, and both the quantity and quality of the flour which it yields, and is well known in the Euglish market, where it commands the highest price.
The following are the quantities of the various kinds of grain exported in the years 1841-49:-

| Yeare. | Wheat | Rye. | Barley. | Oats. | Pease. |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Qro. | Qrs. | Qrs. | Qrs. | Qrs |
| 1811 | 453,499 | 56,002 | 14.108 | 11 | 43,638 |
| 1812 | 464,715 | 95,670 | 19,237 | 1,181 | 33,604 |
| 1843 | 339,876 | 191,182 | 7,279 | 4,860 | 15,446 |
| 1844 | 518,186 | 196,632 | 16,481 | 56 | 10,024 |
| 1845 | 383,692 | 20,305 | 1,125 |  | 7,593 |
| 1846 | 278,640 | 9,720 | 101 | 169 | 11,981 |
| 1847 | 4300,442 | 5,107 | 1,665 | 5,850 | 10,946 |
| 1848 | 331,6"8 | 22,972 | 16,535 | 506 | 16,369 |
| 1819 | 319,466 | 22,484 | 32,614 | 1,125 | 14,738 |

After grain, the chief article of export is timber, of which in 1852, there were 501 cargoes despatched from the port. Other articles of export arc ashes, beer, amber, liqueurs, starch, chicory, sugar, lead, copper, iron, pitch, tallow, hemp, flax, salt, saltpetre, woollen and linen cloth. The annual ex ports amount to $£ 900,000$, the imports to $£ 300,000$. The proper port of Danzig is Neufahrwasser, at the mouth of the Vistula the sandbanks which encumber the river immediately above seriously obstructing the navigation. Now, however, by means of a canal about 150 ft . wide by 15 ft . deep, the worst of the obstructions are avoided and vessels of large size come np close to the town. The history of Danzig reaches back to the times of historical obscurity. As early as 970 , there was a town here. In 1271 it was taken by Mestwin, and in 1294 by the Poles. In the 1 th century it fell into the hands of
the Teatonic Knights, under whose sway the town increased, and its commerce was extended. Left by the Teutonic Knights, it again, in 1454, fell into the hands of the Poles, who grantcd it important privileges. After enduring many vicissitudes of tortune, on the second partition of Poland in 1793, it fell to the lot of Prussia. It was besieged, bombarded, and taken by the French in 1807, and retaken by the Prussians in 1814. Since that time Prussia has done much for the town ; but its commerce has never regained its former importance and extent. Pop. (1846), 66,827.

DAOUDNAGUR, a tn. Hindoostan, presid. Bengal, prov. Bahar, r. bank, Sone; lat. $25^{\circ} 6^{\prime}$ N.; lon. $84^{\circ} 27^{\prime}$ E. It is a large place, and contains a cloth factory. It was built by Daoud Khan, the last King of Bengal, about the middle of the 16 th century.

DAOURIA, a country, Asia, now included, partly in the Chinese territory of Manchooria, and the Russian gov. Irkutsk. It is traversed, from N.E. to S.W. by ridges of mountains, offsets of the Yablonoi Krebit, and forming the Daourian Mountains. They lie E. of Lake Baikal, and are rich in minerals. The country is traversed by the Shilka, one of the head streams of the Amoor.

DAR-el-Beida, a tn. Marocco, near a cape of the same name, and which is in lat. $33^{\circ} 37^{\prime} \mathrm{N}$.; lon. $1^{\circ} 47^{\prime} 24^{\prime \prime} \mathrm{W}$. It is about half a mile square, standing on the beach, and on a point projecting N.N.E. balf a mile, forming a small bay $\frac{3}{4} \mathrm{~m}$. long; a roadstead well sheltered from W. winds, and protected by a fortress. The town, which was long in the possession of the Portuguese, was built for the exportation of corn and wool, in which its trade is increasing. It contains several mosques, and several good Europeanbuilt houses; many palm trees and numerous gardens surround the town. The country in the vicinity is said to be excecdingly fertile. Pop. about 700.

DARA, a ruined tn. Asiatic Turkey, pash. Bagdad, 20 m.S.S.E. Mardin; lat. $37^{\circ} 8^{\prime}$ N.; lon. $40^{\circ} 44^{\prime}$ E. Vast granaries, remarkable tombs, and beautiful reservoirs, are amongst the ancient remains that indicate the former greatness of Dara. It contains now only 100 Mussulmen, and 30 Armenian families.

DARA, a vil. of W. Africa, Bondou country, about 12 m . W. from l. bank, Falemé; lat. $14^{\circ} 40^{\prime} \mathrm{N}$. ; lon. $12^{\circ} 16^{\prime} \mathrm{W}$. It is a large and populous place, built on a plateau commanding a view over an undulated and well-wooded country.

DARABJERD, or Darabgimerd, commonly called Darab, a tn. Persia, prov. Farsis$\tan , 140 \mathrm{~m}$. S.E. Shiraz; lat. $29^{\circ} 0^{\prime}$ N.; lon. $54^{\circ} 57^{\prime}$ E.; pleasantly situate on a small river in an extensive plain, and surrounded with groves of dates, oranges, and lemons, the latter in such abundance that the juice is exported to all parts of Persia. The tobacco that grows in the neighbourhood is celebrated for its mildness, and held in great esteem, not only throughout Persia, but in India and Arabia. Darabjerd was formerly of much greater extent and importance than it is now, as its numerous ruins indicate. About 3 to 4 m . S. of the town are some remarkable remnants of antiquity, consisting of excavations and sculptured rocks. Pop. 15,000 to 20,000 .

DARAH, or Draha, a country of N.W. Africa, bounded, N. and W. by the Great Atlas, which separates it from Marocco; E. by Tafilelt, and S. by the Sahara. It is traversed by the great caravan route from Fez to Timbuctoo. The chief produce is dates. A superior breed of goats is reared in the district, and in the mountains which border it, copper, iron, and antimony are found. Darah is intersected by a large river of the same name, which rises on the S . side of the Great Atlas range, and, after a S. course of upwards of 200 m ., divides into several branches, which are absorbed by the sands of the desert.

DARAJEE, a small th. Scinde, l. bank, Buggaur, or great W. branch of the Indus, in the delta of that river. Darajee was formerly one of the principal ports of Scinde, but as the Buggaur has now for many years ccased to be

current in the channel, running S., the volume and velocity of which is much increased by the prevailing winds, which blow in the same direction with the stream for at least 10 months in the year. There are shoals in some places, but deep water is always to be found in some part of the channel. The Asiatic side presents the most beautiful scenery, and is seen in proceeding up the strait, gradually rising from the sea upwards to the range of Mount Ida, and exhibiting the appearance of a fine and fertile country. The European side is in general steep and rugged, but in many parts densely peopled and highly cultivated; while its various inlets form secure harbours for vessels of every size, and well sheltered from N. gales, to which, as already noticed, these parts are subject. On both shores there are numerous forts and batteries, for the purpose of preventing any vessel in case of war from passing through the channel. Of these there are eight upon the European side, mounting in all 340 guns, some of which are calculated to throw stone shot of enormous size; and on the Asiatic side seven, mounting 383 guns, 34 of which throw stone shot. These guns, as well as some of the others, having no carriages, cannot be pointed, and can fire with effect only when a ship covers them. The guns for discharging stone shot require a charge of 320 lbs. of powder The modern name of this strait is derived from the castles,
called the Dardanelles, built on its banks, at its S.W. entrance; its ancient name, Hellespont, from Helle, daughter of Athanas, King of Thebes, who was drowned in it. It is also memorable as the scene of the death of Leander, who used to swim across at Abydos, the narrowest part of the strait, but yet about a mile in brealth, to visit Hero; a feat also performed by Lord Byron, who achieved it in one hour and 10 minutes.

DARDESHEIM, a tn. Prussia, gov. of, and 37 m. s.W. Magdeburg. It is surrounded by an old wall, and entered by three gates, and contains a church, townhouse, and hospital; and has six mills. Pop. 1611.

DARENT, a river, England, co. Kent, rising about 5 m . W. the Seven Oaks, and, after a course chiefly N.E. of about 20 m ., falling into the Thames near Erith. It is navigable to Dartford, the only important place which it passes. Numerous mills are situate along its banks.

DARENTH, par. Eng. Kent; 2080 ac. Pop. 698.
DARFIELD, a par. and vil. England, co. York (W. Riding); 11,740 ac. The village, 20 m . S. by E. Leeds, between the Dearne and one of its tributaries, and near the N. Midland Railway, is well built. The linen manufacture is carried on in it to some extent. Pop. 7519.

DARFO, a vil. and com. Austrian Italy, gov. Milan, prov. of, and 30 m . N.E. Bergamo, l. bank, Ollio. It contains a handsome parish church of modern construction, with fine paintings; and has a silk and several saw mills; three blast furnaces, and other iron-works. Much corn, wine, and silk are produced in the district. Pop. 1711.

DARFUR, Darfour, or Dar-el-Fur, a country, Africa, of E. Soudan, whose boundaries are but imperfectly known, but which may be represented, generally, as lying between lat. $11^{\circ}$ and $15^{\circ} \mathrm{N} .$, and lon. $26^{\circ}$ and $29^{\circ} \mathrm{E}$. It lies W. from Kordofan, from which it is separated by a strip of country inhabited by wandering Arab tribes, rich in cattle and horses. S. it is bounded by the vast country named Fertyt, possessed by similar tribes, from whom, as well as from those between Darfur and Kordofan, the Sultan of the former country raises a yearly impost, payment of which, however, is frequently refused. W. it is bounded by Waday, and N. by a desert country, part of the Great Sahara. Darfur is said to be 50 days' journey in length, N. to S., and about 15 days E . to W. ; and it is traversed longitudinally by a ridge of mountains named Marrah, from whose sides, E. to W., descend numerous streams, none of which are of any size. The largest river in the country is the Barre or Misselât, flowing along the W. side of the mountains, but whither it goes is not known. There are no lakes. The heat in Darfur is excessive, and there are, properly speaking, only three seasons in the year-spring, in December, January, and February; summer, in March, April, May, and June; and autumn, in July, Angust, and September; followed by a winter which can scarcely be distinguished from it. The spring and summers are about three months in advance of the same seasons in Egypt, but the autumn only two. Autumn in Darfur is the season of the rains, which continue 75 days, during which time four or five rainbows inay often be seen at once. During summer, mirage prevails on the plains.

The crops chiefly cultivated are millet, rice, maize, sesamum, for its seed, not for its oil ; and legumes. Holes are dug in the field, into which the seed is thrown, and then covered up with the foot. The grain, after being thrashed out, is dried in the sun, and laid up in holes made in the earth. lined with chaff. Water melons abound in the wet season. Among the fruit trees are the tamarind and date; but the latter are not of good quality. Tobacco, both wild and cultivated, abounds, and is much used by the natives in all its forms, including that of snuff. Besides these, numerous plants used in medicine, and producing dyes, abound; among the former, the dagarals is alleged to be an instantaneous remedy for inflammation in the eyes. Cattle form the principal wealth of the inhabitants, and the number of milk cows kept is so great, that milk is said to be almost of no value. Camels are numerous, and their flesh is eaten; goats are common, and a few hardy horses and sheep are kept, the flesh of the latter being poor, and the wool, or rather hair, unfit for manufaeture. The wild animals are the lion, leopard, hyana, wolf, jackal, the elephant, rhinoceros, girafie, hippopotamus, crocodile, and wild buffalo. The elephants are of a small size. They go in herds of several hundreds, and are
taken in great numbers by the natives, who find them $n$ valuable source of gain; their tusks bringing a high price, and their flesh and fat being in great demand, the former con stituting a favourite article of food, and the latter being manufactured into an unguent, mueh in use. Antelopes, ostriches, and civet-cats are also met with. Vultures, guineafowl, turtle-doves, chameleons, and all kinds of lizards abound. Wild bees, having no hives, and yielding a dark, unpleasant honey; white ants, the cochineal insect, searabaei, mosquitoes, and locusts are numerous, the last being frequently roasted and eaten.

The inhabitants are a mixture of Arabs and negroes, though many individuals of beth races still retain their peculiar physical characteristics, the latter being quite black, with short and woolly hair; the former continuing to exhibit their distinctive features, colour, and language. They are brutal and passionate, especially when drunk, a varicions to excess, and inhospitable; still they are lively, energetic, and extremely fond of dancing. They are filthy in their habits and their victuals; eating of whatever has the appearance of food, even although bitter or decayed; indeed, sometimes bitter and decayed food is preferred. Men and women work together on all occasions; war being the only employment in which the services of the latter are dispensed with. Polygamy is practised, and the intercourse between the sexes is remarkably free and indiscriminate, many practices being in vogue sufficiently strange to those habituated to civilized life, and evidencing that the inhabitants of Darfur, in some respects, are only a degrec elevated above the level of their own cattle. Consequently, syphilis is common; leprosy and elephantiasis also prevail. Circumcision is practised on both sexes, and by all classes; the ceremony on the occasion always terminating with a feast. The houses are generally huts constructed of reeds, and of a circular form; on account of the heat of the climate, few garments are worn, but these are usually of a brilliant white, and extremely clean. Education is little attended to, and is confined to learning to read the Koran, and that by the male ehildren only. The religion is Mahometanism, but the precepts of the prophet are observed with little strictness. As a result of its position, the commerce of Darfur is all inland; but this is very considerable, owing to its centrical situation, which also in some measure compensates for its want of means to carry on a reciprocal trade, having little to offer in exchange for the produce of other countries. Its principal intercourse is with Egypt, which is carricd on by caravans which traverse the desert, carrying away slaves, camels, i vory, horns of the rhinoceros, teeth of the hippopotamus, ostrich feathers, gum, pimento, tamarinds, and leather sacks for water, paroquets, monkeys, and guinca hens, and a little copper; and bringing in return trinkets, cotton cloth, sword blades, small looking-glasses, fire-arms, coffee, silk unwrought, glass beads, copper culinary utensils, fezes or red caps of Barbary, French cluth, and some silk stuffs of Damascus, Aleppo, \&c., shoes of red leather, pepper, writing paper, and Syrian soap. There is also a considerable trade with Mecca, combined with religious objects. The commerce of Darfur is conducted wholly by barter. Little is known of the nature of its trade with the countries further inland, beyond the fact of its drawing from these the greater part of the ivory and rhinoceros horn which it sends to Egypt.

Darfur is governed by a Sultan, who is completely despotic, and always surrounded by a numerous corps of privileged old women, who assist in various ceremonies. The Sultan seldom or never speaks to either rich or poor, except through the medium of an interpreter; the advantage thus gained when in the seat of public justice, is that he never makes the least mistake in his language; all faults being of course chargeable on the interpreter. When the Sultan spits, his spittle is gathered up by the bands of his attendants; when he coughs or sneezes, every one present, out of politeness, must do the same; thus at times producing the most amusing scenes. When in council, the Sultan is fanned with a fan of ostrich feathers; and during the chase, he is shaded by a parasol carried by one of his nobles; should his horse stumble, and the monarch be unscated, every one present must perform the same evolution, nuder pain of summary ehastisement, administered on the spot. The Sultan has private possessions in land, which are sown for him cvery year after the rains. The prince, on such occasions, goes out surrounded
by upwards of a hundred young women selected from amongst the beauties of his harem, carrying on their heads vessels filled with the greatest dainties. They march behind the Sultan's horse, along with young male slaves, armed with lances, and a troop of flute players, song accompanying the instruments. When arrived at the fields, the prince dismounts, and throws a few seeds upon a place where a slave has stirred up the carth ; whereupon all the nobles, viziers, and officers of the court commence to dig, and in a short time the whole of the fields are sown. When the labour is ended, the viands are set out and eaten. A custom this in every way similar to the imperial ceremony annually gone through at Pekin. The royal revenues are derived chiefly from a heavy duty on imported merchandise, fines, presents, and tribute from neighbouring states and tribes. The latter is paid principally in ivory, rhinoceros horns, white copper, gold, and slaves, but so unwillingly that detachments of troops are constantly engaged in collecting it throughout the various districts. The army is composed of irregular troops, armed with shield and spear, and a few with bows and arrows. The cavalry are armed with double-edged sabres, obtained from Germany, and are, in part, clad like the old Numidian horse in shirts of mail.

In 1794, when Browne was in Darfur, Cobbe, lat. $14^{\circ} 11^{\prime}$ N. ; lon. $28^{\circ} 8^{\prime}$ E., was the capital ; the royal residence, however, is now believed to be Tendelty, about 20 m . S.S.E. the former. Several other towns are named, but very little is known of them, even their position being uncertain; those, however, best known, are Suweineh, near the N. frontier, on the direct road to Egypt, and Cubabea or Kubabeah, about 25 m. N.W. Cobbe, where are considerable manufactures of leather and coarse cotton cloth. The population, according to Browne, is about 200,000 ; but by the estimate made by Mohammed Ebn-Omar-el-Tounsy, who resided in the country from 1803 to 1820 , and enjoyed most ample opportunities of investigation, the number is raised to three or four millions, all speaking a dialect of the Arabic. The works of the two travellers above named, are the only reliable sources of information respecting this country.- (Browne's Travels in Africa, Egypt, und Syria, 1792-98; Voyage au Darfour par Mohammed Ebn-Omar-el-Tounsy, 1803-20, traduit de l'Arabe et Publié en 1845.)

DARGUN, a market tn. Mecklenburg-Schwerin, circle Wendisch, chief place, bail. of same name, on the Klostersee, 27 m. E.N.E. Gustrow. It consists of three distinct parts, contains a parish church, and a castle in the form of a square, with a tower at each angle; and has a distillery, a dyework, and two annual fairs. Pop. of tn. 1817; of bail. 5947.

DARIEL, a fortress, Circassia, on the Terek, 80 m. N. Tiflis. It stands on a nearly isolated rock, in a narrow pass of the Caucasus, in a most commanding position, and might easily be defended against any force that could be made to bear upon it. It is, however, in a very dilapidated state, consisting merely of a strong square tower, and a walled space around it, capable of garrisoning several hundred soldiers.

DARIEN (Gulf of), or Uraba, an extensive gulf, $\mathbf{S}$. America, New Granada, Caribbean Sea, between the isthmus of Panamaa and the mainland, S. of $10^{\circ} \mathrm{N}$. lat., and between lon. $75^{\circ} 40^{\prime}$ and $78^{\circ} 30^{\prime} \mathrm{W}$. But some anthorities limit the gulf to the S. portion of the indentation, called also the Bay of Choco, having Point Arenas on the E., and the Bolenderas islands on the W. All the E. and S. coasts, to the Bay of Candelaria, near the head of the gulf, offer safe anchorage at all times of the year; but the remainder, to Cape Tiburon, is very wild at certain seasons, and without any shelter, excepting for small vessels. Several rivers empty themselves into this gulf, the largest of which is the Atrato or San Juan. It was while governor of the Spanish colony of Darien, on the W. shore of this gulf, that Vasco Nuñez de Balboa discovered the Pacific Ocean, Sept. 26, 1513.

## DARIEN (Isthmus of). See Panama.

DARJILING, or Darjeeling, a British sanatory station for H. Majesty's troops in India, in the Sikkim territory; lat. $27^{\circ} 3^{\prime} 9^{\prime \prime}$ N.; lon. $88^{\circ} 28^{\prime}$ E.; about 318 m . N. Calcutta, and though little more than 36 m . from the plains of Bengal, at an elevation of 7400 ft . above sea level, 16 m . W. from r. bank, Teesta. 'From the station of Darjiling, the view in every direction overlooks mountain-ranges, covered with
dense forests, except in a few spots, where partial clearances have been made for cultivation. No bare grassy mountains meet the eye, no rocks or precipices afford any relief from the prevailing uniformity, which, but for the magnificence of the snowy mountains behind, would be undoubtedly monotonous and fatiguing.'-(Dr. Thomson.) The atmosphere is humid and moist, and the annual fall of rain 120 inches.

DARKEHMEN, a tn. Prussia, prov. E. Prussia, gov. of, and 14 m. S.S.W. Gumbinnen, cap. circle of same name, on the Angerap. It is the seat of several courts and offices for the circle, and has manufactures of woollens and leather; a trade in cattle, corn, and linen; and five annual fairs. Pop. 2300.-TThe circle, area, 224 geo. sq. m., is flat, and watered by the Angerap and several lakes. Pop. 30,781.

DARKHAN, a mountain, Mongolia, prov. of Khalkha; lat. $47^{\circ} 36^{\prime}$ N.; lon. $110^{\circ} 10^{\prime}$ E. It extends N. to S., and its lofty ridge is composed of steep rocks of red granite. From the summit E. are seen eight salt lakes, and the blue mountains of Kherroulun; while W. the view extends over an immense extent of country covered with pointed eminences. The Mongolians associate with this mountain the memory of Genghis-Khan.-(Timkovski.)

DARLASTON, a tn . and par. England, co. of, and 17 m . S. hy E. Stafford. The rown stands on a slight acclivity, and consists of a number of straggling and irregular streets, which, however, are well kept; houses in general small and badly built of brick; water deficient; shops lighted with gas; and the town rapidly increasing, and gradnally improving. It has a clıurch and chapel of ease, two Wesleyan chapels, a Primitive Methodist, and an Independent; several schools, a mechanics' institution, and library. The principal manufacture is that of iron, which is here made of all descriptions, and of excellent quality. Articles of iron are also manufactured to a great extent, such as gun-locks, bolts, bars, screws, door latches, bullet moulds, castings, \&c. The coal and iron mines in the par. are also extensively worked. Area of par. 770 ac. Pop. 8244.-(Local Correspondent.)

DARLEY, par. Eng. Derby; 7860 ac. Pop. 1929.
DARLING DOWNS, a dist. of New S. Wales, between lat. $27^{\circ}$ and $28^{\circ} 15^{\prime}$ S.; its limits, however, are not precisely defined. A considerable portion of the $S$. part of the district consists of low level land, heavily timbered. The downs occupy the E. portion of the district. The principal river is the Condamine.

DARLING MOUNTAINS, a range of mountains, of W. Australia, commencing in co. Twiss, or about lat. $31^{\circ} \mathrm{S}$., and terminating at Point D'Entrecasteaux, lat. $34^{\circ} 53^{\prime}$ S. It runs parallel to the coast, and generally at a distance from it of from 10 to 15 m ., excepting towards the $S$., where the distance is about 50 m . The entire length of the range is about 250 m .; the highest summit, 3500 ft . above sea level.

DARLING RIVER, a river of New S. Wales, supposed to be formed by the junction of numerous streams, in about lat. $30^{\circ} \mathrm{S}$. After pursuing a $\mathrm{S} . \mathrm{W}$. course of upwards of 400 m . it falls into the river Murray, at lat. $34^{\circ} 10^{\circ} \mathrm{S}$.; lon. $141^{\circ} 50^{\prime}$ E. It was discovered by Captain Sturt in 1829.

DARLINGTON, par. Eng. Durham; 7630 ac. P. 11,887.
DARLINGTON, a tn. England, co. of, and $17 \frac{1}{2} \mathrm{~m}$. S. Durham, on the side of a hill that slopes to the river Skerne, over which is a bridge of three arches. It is built in the form of a square, with streets diverging from a central mar-ket-place ; is plentifully supplied with water, and lighted with gas; houses in general well built, chiefly of brick. The townhall and central hall are handsome structures, in the Grecian style; but the principal architectural ornament of the town is St. Cuthbert's church, an ancient Gothic building, with a lofty spire, founded in 1160 . There are, besides, two other churches, and places of worship for Baptists, Independents, Friends, R. Catholics, and Methodists. The educational institutions include a free grammar-school, an academy founded by the Society of Friends, a national school, and several Sunday schools. There are also a dispensary, savingsbank, mechanics' institution, and public library. The principal manufactures of the place are carpets and flax, and worsted spinning. There are also breweries, tanncries, roperies, and brass and iron foundries. The burgh is governed by a bailiff, appointed by the Bishop of Durham. Petty sessions are held every alternate Monday in the townhall, with which a house of correction is connected. The weekly
market is held on Monday; there is a large market for sheep and cattle every alternate Monday; and numerous fairs are held for horses, cattle, sheep, hogs, and merchandise. There is a station here on the York, Newcastle, and Berwiek Railway; and on the Stockton and Darlington Railway, which latter was the first line in England on which locomotive steam engines were cmployed. Darlington gives the title of Earl to the Duke of Cleveland. Pop. (1841), 11,033.-(Local Correspondent.)

DARLTON, par. Eng. Nottingham; 1530 ac. Pop. 203.
DARMABAH, an isl. Red Sea, eoast of Africa, Assab Bay; lat. $12^{\circ} 15^{\prime} \mathrm{N}$. ; lon. $42^{\circ} 55^{\prime}$ E.; nearly 20 m . in circumference, very low, and partly covered with jungle.

DARMS'TADT, a tn. Germany, cap. grand duchy HesseDarmstadt, in a sandy plain, on the Darmbach, $15 \mathrm{~m} . \mathrm{S}$. Frankfort. It is surrounded by walls and ditches, and consists of au old and a new town. The former is very poorly built ; the houses are old, and the strects narrow and gloomy. The new town has a much more agreeable appearance, and is laid out with great regularity. Two principal streets, the Rheinstrasse and the Neekarstrasse, traverse it from E. to W. and N. to S . respectively, and are lined by houses of landsome appearance. Inmediately off the Rheinstrasse is the finest public square, the Louisenplatz. In its centre is a Doric column, surmounted by a statue of Duke Louis I., the pedestal adorned with bas-reliefs; and around it are a number of lolty and elegant mansions, among others the new palace, the residence of the Grand Duke, built at the commencement of the present century, but though sufficiently commodious, not of much architectural merit. Other buildings deserving of notice are the old palace, a large pile of mixed architecture, now fitted up as a residence for the hereditary Grand Duke, surrounded by an old dry ditch which has been converted into a shrubbery and garden, and containing a pieture gallery, with some fine paintings; a musenm of natural history, particularly rich in the remarkable fossils which have been dug up in the neighbourhood of the Rhine, and a library of 200,000 volumes; the theatre, with a portal of six Corinthian columns, and, till lately, in possession of one of the finest orchestras in Germany; the Estates' house, with a fine hall, in the form of a semicirele; the government offices, the R. Catholic church built by Moller, a native architect, externally of brick, and internally in the form of a rotunda, surrounded by pillars 50 ft . high; the Protestant town ehurch, an ill-situated and somewhat unsightly building; the Exerzierhaus or drilling house, originally intended for drilling the garrison under cover in wet weather, but now used as an arsenal, and remarkable for the large size and ingenious construction of its roof, the work, it is said,
shaped area, surrounded by old houses, of which the townhall [Rathhaus], built in 1580, is the most gloomy looking Darmstadt depends more upon the residence of the court than upon either trade or manufactures. Of the latter, however, may be mentioned carpets, playing cards, carriages, matches, tobacco, philosophical instruments, and machinery. As the seat of Government, Darmstadt possesses the usual appendages of a capital, and has important eivil and criminal courts, and public offices, and a number of establishmenits-benevolent, educational, literary, and scientific. It is also provided with various sources of amusement at public plaees of resort, and with several fine promenadcs. Of these the best are the palace gardens, which are well laid out, but very indifferently kept. Darmstadt is a station on the Frankfort and Heidelberg Railway, and, though on the whole somewhat dull as a town, has much to attract the tourist in the picturesque scenery of its environs. A. C. Schleiermacher, and Liebig, the eelebrated chemist, were born here. Pop. including garrison, 30,000.

DARNETAL, a tn. France, dep. Seine-Infériêure, on the Robee and Aubette, $2 \frac{1}{2} \mathrm{~m}$. E. Rouen. The town is charmingly situate at the top of a narrow valley, is well built, and its principal buildings are two churches, one, called the Longpaon, a large Gothic edifice; and the other, a parish church of modern construction, with exeeption of a square Gothic tower, of great antiquity. It contains several busy factories, the works of which are moved, in whole or in part, by the two streams which run through the town, for the manufacture of eloth, and other woollen stuffs; spinning and dyeing, \&c. Pop. 5850.

DARNICK, a vil. Scotland, co. Roxburgl, 1 in . W. by N. Melrose, pleasantly situate near r. bank, Tweed. It contains a school, and an ancient tower, built during the 15th century. Pop. 280.

DARNLEY, or Eroob, an isl., Torres Strait ; lat. $9^{\circ} 35^{\prime} 18^{\prime \prime} \mathrm{S}$. ; lon. $143^{\circ} 49^{\prime}$ E. (k.) ; about 15 m . in circumference, of beautiful appearance, varied with hills and plains, and covered with rich vegetation. The inhabitants are of large stature, and are somewhat more advanced than those of the neighbouring islands; they live in conical huts, disposed in villages.

DAROCA, a th. Spain, Aragon, prov. of, and 56 m . S.W. Saragossa, picturesquely situate in a deep valley, surrounded by hills, r. bank, Jiloca. It is surrounded by an old wall, flanked with towers; consists of houses generally of two stories, irregularly built, and many of them in a ruinous condition; and has several good squares, and one spacious well-paved street. It contains several churches, one of them a fine Gothic structure; a townhouse, and large prison. The district around is fertile, and the inliabitants are chiefly employed in agriculture. Pop. 2216.

DA ROCZ, two places, Hungary:-1, (-Kiruly), a market tn., Thither Theiss, co. Szathmar, on the Kraszua, 50 m . E. by N. Debreczin. It contains a Protestant, a R. Catholie, and a Greek united church. Pop. 2212.-2, (-Tibold), a vil., Ilither Theiss, co. Borsod, in a valley on the Karsi Pataka, about 9 m . from Erlau. It contains a R. Catholic parish ehureh, and produces a good deal of wine. Pop. 1763.

DAROWEN, a par. Wales, Montgomery; 9000 ac. Pop. 1041.

DARRAGH, par. Irel. Limerick; 6713 ac. Pop. 2088.

DARRINGTON, par. Eng. York (W. Riding); 4590 ac. Pop. 668.

DARSHAM, par. Eng. Suffolk; 1700 ac. Pop. 528.

DAR'T, a river, England, co. Devon, rising in Dartmoor, and, after a $S$. E. course of about 35 m ., falling into the English Channel, by an estuary which forms the harbour of Vartmouth. Totness and Ashburton are the only other places of importance on its banks.
I)ARTFORD, a market tn. and par. England, co. Kent. The Town, 15 m . S.E. London, a of a common earpenter, after professed architects had failed the prison, the infantry barraeks, and the military lazaret. Besides the Louisenplatz above referred to, there are several other squares, among which is the market-place, an irregularlyVol. I.
station on the North Kent Railway, is pleasantly situate in a narrow valley, at a ford on the river Darent. It consists chiefly of one wide street, lighted with gas, and of late years greatly improved. The chureh is an ancient and spacious
edifice, with an embattled tower; and there are, besides, places of worship for Independents, Wesleyans, Baptists, and Lady Huntingdon's connection; with several schools, and an almshouse, formerly an hospital for lepers. On the river are gunpowder, paper, and oil mills, two large corn mills, and an extensive iron foundry, and manufactory of steam engines. In the neighbourhood are also calico and silk-printing establishments. Chalk, agricultural produce, and manufactured articles, are exported; and coal and timber for the surrounding district are imported. Dartford was the first place in Britain at which a paper mill was erected, and the first mill in England for rolling and slitting iron was established in the neighbourhood. Edward III. founded a nunnery here, of which some remains still exist. The insurrection, headed by Wat Tyler, in the reign of Richard II., began at Dartford, where Tyler lived, and followed the occupation of blacksmith. Area of par. 4150 ac. Pop. (1841), 5619.

DARTINGTON, par. Eng. Devon; 2910 ac. Pop. 603.
DARTMOOR, an elevated tract, England, co. Devon, 10 m . N.E. Tavistock. It extends nearly 22 m. N. to S. ; area, 200,000 or $300,000 \mathrm{ac}$. of rock, heath, and bog. It is of an irregular form, broken into numerous knolls, on many of which are groups of granite rocks, provincially termed tors, and is intersected by numerous rapid streams. Its highest point rises 2050 ft . above sea level; but there are several other summits nearly as high. It is the principal metaliferous district of Devon, and is remarkable for the number of British remains which exist in it.

DARTMOUTH, a municipal and parl. bor., seaport, and market tn., England, co. Devon, beautifully situate on the W. shore of the bay formed by the Dart, near its embouchure in the English Channel, $26 \mathrm{~m} . \mathrm{S}$. by W. Exeter; lat, $50^{\circ} 21^{\prime}$ N. ; lon. $3^{\circ} 33^{\prime}$ W. (R.) The streets rise one over the other on the face of the steep rock, on which the town is built, and are connected by flights of steps. They are lighted with gas, but are narrow, irregular, dirty, and ill paved. Some of the houses are very old, having projecting upper stories, and presenting fine specimens of wood carving. It has three parish churches, and places of worship for Wesleyans, Baptists, and Independents; national and other schools, and two sets of almshouses, one of which is for decayed mariners. The harbour is capable of containing several hundred vessels of large size, and is perfectly safe, being so completely landlocked that few winds can reach it. The entrance is narrow, and is protected by a battery on the W. side. The chief exports are woollen goods, cider, and barley; and the principal imports are wine, oil, salt, and fruit. The Newfoundland fishery, formerly extensively carried on, has now much fallen off, and with it much of the commercial importance and prosperity of the town. Shipbuilding, rope-making, and paper manufacturing are carried on to a considerable extent; and in the vicinity are slate and limestone quarries. The jurisdiction of the port, which is also one of the quarantine ports of the channel, extends from the Teign to the Erne, a distance of 40 m ., and to Totness, about 8 m . up the Dart, to which place it is navigable for vessels of 150 tons burthen. Its municipal government is vested in a mayor, four aldermen, and 12 councillors. Newcomen, the improver of the steam engine, was a native of this place, which likewise gives the title of Earl to the Legge family. It returns a member to the House of Commons. Constituency, 312. Pop. (1841), 4417.

DARTMOUTH, a seaport and township, U. States, Massachnsetts, co. Bristol, $65 \mathrm{~m} . \mathrm{S}$. Boston. It is favourably situated, contains numerous schools, and has several vessels in the whaling and coasting trades; and also saltpans, build-ing-yards, tanneries, and mills. Pop. 4135.

DARTMOUTH, ARtemont, or Onglahy, a river, Madagascar, which, rising in the mountains in the centre of the S. part of the island, flows nearly due W., and falls into the Bay of St. Augustine, under the Tropic of Capricorn. Its entire course may be about 150 m .

DARTON, a vil. and par. England, co. York (W. Riding). The village, 15 m . S. Leeds, is pleasantly situate in a valley near the confluence of two branches of the Dearne. Area of par. 4510 ac. Pop. 3583.

DARUVAR, Podborje, or Illigye, a market tn. Austria, Sclavonia, co. of, and 33 m . N.W. Posega, in a valley surrounded by lofty heights. It contains an elegant château, a Protestant and a Greek non-united church, and a normal
school; and has a mineral spring, with a much frequented bathing establishment, and a marble quarry. Pop. 3200.

DARVAS, a vii. Hungary, Thither Theiss, co. Bihar, about 15 m . from Grosswardein. It contains a Greek nonunited parish church. Pop. 2931.

DARVEL, a vil. Scotland, co. of, and 15 m . N.E. Ayr, on the Irvine water, containing a place of worship for the Reformed Presbyterians, and a school. Handloom weaving is the principal occupation of the inhabitants. In the vicinity are the ruins of an ancient castle. Pop. 1362.

DARVER, par. Irel. Louth; 1992 ac. Pop. 720.
DARWAR, a tn. and fortress, Hindoostan, in the Deccan, prov. Bejapoor, cap. of a dist. of same name ; lat. $15^{\circ} 28^{\prime} \mathrm{N}$.; lon. $75^{\circ} 8^{\prime}$ E. The town is situated to the $S$. of the fort, and is surrounded by a wall and ditch capable of protecting it against sudden incursions.--The FORT, although not regularly planned, is naturally strong, and is well guarded by ditches. This place has undergone many vicissitudes, having been taken and retaken many times, both by native princes and by the British.-The district or collectorate of Darwar lies between lat. $18^{\circ}$ and $19^{\circ} \mathrm{N}$.; area, 9122 sq. m. The soil and climate are well adapted to the cultivation of cotton, and considerable quantities of that article, raised in the district, have been disposed of in the Bombay and Manchester markets. Since 1818, when it came into pessession of the British, it has undergone a considerable amount of improvement, but is still in a very unsatisfactory state. Pop. about $1,000,000$.

DARWEN (Over), a tn. England, co. Lancaster, $3 \frac{1}{4}$ m. S. Blackburn. It lies in a valley surrounded by moorish hills, and is well, though irregularly, built of freestone; well supplied with water, lighted with gas, and rapidly increasing and improving. The most conspicuous public buildings are the market-house, Trinity Church, in the gothic style, occupying an elevated and central site; a chapel of ease, two Independent chapels, one of them a magnificent structure, in the ornamented Gothic style; and places of worship belonging to Primitive Methodists, Wesleyans, and Association Methodists. There are national, British, and other schools; also a mechanics' institution. The cotton manufacture is carried on to a great extent, no fewer than 3800 looms, with 63,000 spindles, being now at work, with the prospect of an increase. Paper manufacturing and staining, and handloom silk weaving, are also carried on extensively; while the carpet manufacturing is just commencing. Three fairs are held annually. There is a station here on the Bolton, Blackburn, Clitheroe and West Yorkshire Railway. Pop. (1841), 9348.-(Local Correspondent.)

DARWIN MOUNT, a mountain, S. coast of E. Tierra-del-Fuego, rising 6800 ft . above the level of the sea; lat. $54^{\circ} 42^{\prime}$ S.; lon. $69^{\circ} 25^{\prime} \mathrm{W}$.

DARWIN SOUND, a channel, S.W. coast, Tierra-delFuego, between York Minster and Sandwich rocks; lat. $55^{\circ}$ S.; lon. $70^{\circ} 10^{\prime} \mathrm{W}$.

DASCHITZ, a tn. Bohemia, circle of, and 7 m . N.N.E. Chrudim, on the Muntnerbach. It contains a parish church, chapel, and courthouse; and has a trade in cattle, and six annual fairs. Pop. 1492.

DASCHKOWA, a market tn . Russia, gov. of, and 12 m . S. Moghilev, r. bank, Dnieper. A severe struggle took place here, in 1812, between the French and the Russians, when the former were defeated. Pop. 1000.

DASSAU, or DASsow, a markettn. Mecklenburg-Schwerin, at the influx of the Stepnitz into the Binnersee, 26 m. N.W. Schwerin. It contains an old church, and two mills; and has an annual fair. Pop. 1045.

DASSEL, a tn. Hanover, gov. Hildesheim, pleasantly situate in the valley of the Sollen, 23 m . N.N.W. Göttingen. It is an old place, entered by two gates; contains a Protestant and a R. Catholic church; and has manufactures of linen and numerous articles of ironmongery, several mills, and a blastfurnace. Pop. 1811.

DASSEN, Coney, or Badger's Island, an isl. off the coast of S. Africa, Cape Colony, 6 m . from the mainland, and about equidistant from Table Bay and Saldanha Bay; lat. $33^{\circ} 26^{\prime} 12^{\prime \prime} \mathrm{S}$. ; lon. $18^{\circ} 6^{\prime} 45^{\prime \prime} \mathrm{E}$. (R.) It is $1 \frac{1}{2} \mathrm{~m}$. long, by 1 m . broad; consists of rugged masses of barren granite rock, and is completely destitute of fresh water; but it yields to its proprietor, who resides at the Cape, a handsome revenue in
the eggs of penguins and gulls, as many as 24,000 of these being collected every fortnight, and sold at the Cape.

DASSET-A von, par. Eng. Warwick; 1580 ac. Pop. 287.
DATCHE'F, par. Eng. Bucks; 1630 ac. Pop. 922.
DATCHWORTH, par. Eng. IIertford; 1930 ac. P. 581.
DATE ISLAND, a small isl. E. coast, Anam; lat. $13^{\circ} 30^{\prime} \mathrm{N}$. ; lon. $103^{\circ} 15^{\prime}$ E.; about $1 \frac{1}{2} \mathrm{~m}$. from the main, of a round form, covered with trees. The coast here is steep and mountainous, forming a considerable bight, called Cambir Bay.

DATSCHITZ, or Daczicze, a tn. Austria, Moravia, circle Iglau, lordship of same name, r. bank, Taya, 53 m . W.S.W. Brünn. It consists of the town proper, and three suburbs, contains two castles, a courthouse, townhouse, a large parish church, with a lofty Gothic tower; and a Franciscan monastery; and has manufactures of woollen cloth, a liqueur and rosoglio factory, a distillery, sugar factory, and five annual fairs. Pop. of tn. 2020 ; of lordship, 8480.

DA'TTOLO, a group of islets, off the N. coast of Sicily, belonging to the Lipari Islands, about 9 m . S.W. Stromboli. They are supposed to have once formed a single island. The largest, and most northerly, is Basiluzza. Its coasts are steep, but its surface is flat, and partially cultivated-the few inhabitants who live upon it raising corn, flax, and vegctables. It abounds with rabbits. There are many vestiges of ancient buildings upon it. Abont $1 \frac{1}{4} \mathrm{~m}$. E. Panaria, in the same locality, is another Dattolo, a remarkably steep white rock of lava, in a state of decomposition. It contains numerous cavities, in which the inhabitants of Panaria keep bee-hives. The channel between it and Panaria is only 6 fathoms deep.

DAUBA, or Duba, a tn . Bohemia, circle of, and 17 m . N. W. Bunzlau, not far from Mount Eichberg. It contains an old church, and an hospital; and has a weekly market, and five annual fairs. Pop. 1254.

DAUDLEB, or Daudleby, a vil. Bohemia, circle Königgrätz, cap. dist. of same name, on the Adler. It contains a castle and a synagogue; and has tile-works, a rosoglio factory, aud some manufactures of lace. Pop. vil. 1008; dist. 5441.

DAULE, a large navigable river, Ecuador. It riscs near San Miguel, prov. Pichincha; lat. $0^{\circ} 35^{\prime}$ S.; lon. $80^{\circ} 38^{\prime}$ W.; from which point it flows S., with a slight detour to the W., to Guayaquil, where it joins the river of that name. Its hanks are occupied by cultivated estates and gardens, the latter producing abundance of fruits in great variety, and of excellent quality.

DAUN, a tn. Prussia, gov. of, and 35 m . N.N.E. Treves, cap. circle of same name, on a height belonging to the Eifcl hills. It contains a R. Catholic parish church, and an old castle; and has three mineral springs. Pop. 600.-The orrcle, area, 181 geo. sq. m., lies high and cold, among the ridges of the Eifel, and is not at all adapted for agriculture. The inlabitants live chiefly by rearing cattle, and hewing wood. Pop. 23,904.

DAUN'TSEY, par. Eng. Wilts; 2940 ac. Pop. 576.
DAUPHIN, an isl., U. States, Gulf of Mexico, off the coast of Alabama, at the entrance of Mobile Bay, and 30 m . S. Mobile. It is about 12 m . long, but very narrow; and barren, producing trees only on the E. side. The French formerly attempted a settlement here.

DAUPHINE, or DAUPHINy, an anc. prov. France, the cap. of which was Grenoble; now included in the departments Hautes-Alpes, Isère, and Drôme.

DAUREE, a vil. Hindoostan, prov. Malwa, r. bank, Nerbudda; lat. $22^{\circ} 12^{\prime}$ N.; lon. $76^{\circ} 23^{\prime}$ E. At this spot the navigation of the Nerbudda is impeded by a fall of 30 ft . in height.

DAUSS, an isl. Persian Gulf, S. point in lat. $25^{\circ} 9^{\prime}$ N.; lon. $53^{\circ} 1^{\prime}$ E.; about $1 \frac{1}{2} \mathrm{~m}$. in length, N. and S., high at the N. end, but low at the S. It appears to be volcanic, and is destitute of trees; the S.W. extremity terminates in a low rocky point.

DAU'JOVA, a vil. Hungary, Hither Danube, co. Bacs, 1. bank, Danube, 9 m . from Baja. It contains a R. Catholic parish church. Pop. 2369.

DAVENIIAM, par. Eng. Chester; 9440 ac. Pop. 5355.
DA VENPORT, a tn., U. States, Iowa, situate at the foot of the npper rapids of the Mississippi, near Rock Island. It is built mostly of brick. The public buildings comprise seven churches, a college, two seminaries, three public, and five
private schools. Here also are four steam-mills, and waterpower unsurpassed in the U. States. The first house was erected in 1836. Pop. 2500. - (New York Daily Tribune, March 5, 1851.)

DAVENTRY [provincially called Daintree], a municipal bor. market tn. and par. England, co. Northampton. The Tows, agreeably situate on a gentle eminence, 11 m . W. by N. Northamptom, consists of two principal and several subordinate streets, paved, and lighted with gas; in general well built, and having altogether a clean and respectable appearance. It has a gaol and house of correction, a modern church, chapel of ease, places of worship for Wesleyans and Independents, national and British schools, and a savings-bank. Whip-making is carried on to a considerable extent; but the staple manufacture of the place is shoes for exportation, in which 1000 persons are employed. It has a weekly market on Wednesday, and numerous fairs, chiefly for horses and cattle. The municipal government is vested in a mayor, four aldermen, and 12 councillors. In the vicinity of the town are numerous interesting Roman remains. During the great civil war between Charles I. and the Parliament. Daventry was the scene of several skirmishes. It gives the inferior title of Baron to the Earl of Winchelsea. Area of par. 4090. Pop. including the hamlet of Drayton, 4565.

DAVEY (PoRT), Van Diemen's land, S.W. coast; lat. $43^{\circ} 18^{\prime}$ S.; lon. $146^{\circ}$ E., to the S.E. of Point St. Vincent, and about 21 to 23 m. N.W. by N. South West Cape. It is an excellent harbour, separated into two branches, and extending several miles inland. The principal branch extends N. having moderate depths of water, from 12 to 14 fathoms at the entrance, decreasing to 4 fathoms about 3 m . up, abreast of a bay or lagoon, which there branches off W.S.W. The other branch, called Bathurst harbour, extends about 9 m . E., having several islets in it, with coves or indentations on either side. The shores of this harbour abound with excellent pine, and it las the advantage of a fresh water river. The land on each side the entrance of this port is rugged and barren.

DAVID CLA KK ISLA ND, S. Pacific Ocean, Low Archipelago; lat. $17^{\circ} 19^{\prime} \mathrm{S}$.; lon. $138^{\circ} 30^{\prime} \mathrm{W}$. It is about 20 m . in circumference, low and dangeroias.

DAVID (St.)-1, par. Eng. Devon. Pop. 3508.-2, par. Wales, Brecon. Pop. 1422.

DAVID'S (St.) [the Menevia of the Romans], a city, and par. Wales, co. Pembroke, near the promontory called St. David's Head, about 1 m . from the N.W. shore of St. Bride's Bay. It consisted formerly of five streets, but is now reduced to a mere village. It was anciently the seat of the metropolitan see, or archbishopric of S. Wales, and still exhibits many evidences of its former grandeur. Within a space 1200 yards in circuit, once cnclosed by a lofty embattled wall, only small portions of which now remain, are the venerable cathedral, the episcopal palace, the ruins of St. Mary's college, the houses of some of the dignitaries, and the ruins of several other buildings. The entrance is said to have been by four gateways, the principal of which, the only one now remaining, called the Tower Gate, consists of a large octagonal tower 60 ft . in height, with a richly moulded doorway. The cathedral, which is cruciform, is 307 ft . long within the walls, and contains the tomb of St. David, the patron saint of Wales. The general style of the building is the Transition Norman, of the latter part of the 12 th century, but it contains also considerable portions of early English and the later styles. The roodloft is a particularly fine example of decorated work. The nave and choir are in repair, and are used for Divine service, but the aisles of the choir, the Lady Chapel, and other chapels at the E. end, are in ruins. The bishop's palace, built by bishop Gower, about 1330 to 1340 , occupies a square area on the W. side of the small river Alan; it is a ruin of great extent and magnificence, in the decorated style of gothic architecture. The great hall is 96 ft . by 33 ft ., and is lighted by lofty side windows. 'The fame of this celebrated sanctuary was so extraordinary, that princes came barefooted to its shrine; its riches were so great, and the offerings to it so abundant, that the monks are said to have divided them every week. Nor was the sanctity of St. David's confined to the limits of the city, but the whole parish was thickly strewed with chapels, crosses, or sainted wells.' - (Nicholson's Cambrian Guide).

The modern ecclesiastical establishment of St. David's con-
sists of the bishop, six residentiary canons, four archdeacons, and several minor canons. The residence of the present bishop is at Abergwilly near Carmarthen. There is little or no trade in the town; the principal inhabitants of which consist of a few clergy connected with the cathedral, and some holders of land in the vicinity. The parish is almost entirely destitute of trees, and the fields are divided by banks of earth and stones; this, with the detached projecting rocks, gives it a dreary and desolate appearance, but the land produces good crops of corn, especially barley, and considerable quantities of butter are sent to the London market, and the land in general lets at a high rent. Pop. of par. (1841), 2413, of which the city contained about 1000 .

DAVID (St.), or Freewill Islands, an isl. group, N. Pacific Ocean, N. the N.W. extremity of Papua or New Guinea, centre in lat. $0^{\circ} 55^{\prime} \mathrm{N} . ;$ lon. $134^{\circ} 21^{\prime} 30^{\prime \prime}$ E. They are four in number, lie close together in a circle, and are called, respectively, N., S., E., and W. Islands, with an islet between N. and E. islands. S. island is 3 or 4 m . in length, but narrow, and lying in an E. and W. direction; they all appear as one island in some views. They have a level appearance, are covered with tall cocoa-nut trees, may be seen from a distance of 15 m ., and, although small, are well inhabited. These people subsist chiefly on fish and cocoanuts.

DAVID'S HEAD (St.), a promontory, Wales, co. Pembrcke, St. George's channel; lat. $51^{\circ} 50^{\prime} \mathrm{N}$. ; lon. $5^{\circ} 17^{\prime} \mathrm{W}$.

DAVIDSTOW, par. Eng. Cornwall ; 6260 ac. Pop. 408.
DAVIDSTOWN, par. Irel. Kildare; 3906 ac. P. 1068.
DAVILICAN, a bay, Philippines, isl. Luzon, E. coast; lat. $16^{\circ} 40^{\prime} \mathrm{N}$. This and Casiguran bay, about 70 m . further S., are the only places on the E. coast of this island affording anchorage, or tolerable shelter from N.E. winds.

DAVINGTON, par. Erig. Kent; 540 ac. Pop. 143.
DAVIO'T, par. Scot. Aberdeen, 3 m . by 2 m . Pop. 643.
DAVIO'T and Dunlichity, par. Scot. Inverness, 23 m . by 5 m . Pop. 1681.

DAVIS ISLAND, Bay of Bengal, Mergui archipelago, lying 4 m . W.S.W. the S . point, isl. St. Mattlew. It is abont 10 m . in circumference, and may be seen from a distance of from 20 to 25 m. ; lat. $9^{\circ} 40^{\prime} \mathrm{N} . ;$ lon. $97^{\circ} 50^{\prime}$ E.

DAVIS S'TRAIT, a vast arm or inlet of the N. Atlantic Ocean, stretching N. and S. and terminating N. in Baffin's Bay; having Greenland on the E., and Cumberland island, British N. America, with adjoining parts, on the W. Its precise limits cannot well be determined, but navigators commonly understand it to extend from abont lat. $60^{\circ}$ to $70^{\circ} \mathrm{N}$., or, taking the Greenland coast from Cape Farewell to the N. W. extremity of Disco island, a distance of about 750 m . These limits on the E. coast correspond with those of Capes Chudleigh and Aston on the W. side. The narrowest part of the strait is precisely at the point where it is intersected by the Aretic circle, being there 220 m . broad, the widest being probably about 600 m . The E. coast is thickly strewed throughont its whole length with rocks and islets, and serrated with numerons narrow inlets, which penetrate a good way into the land. The W. coast has fewer, but larger indentations, the most extensive being Hudson's Strait, and Northumberland Inlet.

Davis Strait is the principal resort of whalers, the fish being more numerous here than in other seas near the pole. But the immense icebergs, which even in summer line the $W$. coast of the strait, and which rise some hundreds of feet above the level of the sea, and the violence of the currents, render these voyages very dangerous. The countries on botll sides of the strait rise in rocky mountains to a considerable elevation, and exhibit a very scanty vegetation. They are inhabited by the Esquimaux. This strait was discovered in 1585 , by the celebrated navigator John Davis.

DAVIS INLET, a bay formed by the Atlantic on the E. coast of Labrador, 80 m. S.E. Nain ; lat. $55^{\circ} 37^{\prime}$ N.; lon. $60^{\circ} 20^{\prime} \mathrm{W}$. It extends 57 m . inland, with a mean breadth of 6 m . In the neighbourhood of this bay, to the N.W., is a Moravian missionary station.

DAVLIA [anc. Daulis], a vil. Greece, prov. or nome, Attiké and Viotia, 8 m . N.W. Livadia, beantifully situate among groves of pomegranate, at the foot of Mount Parnassus. On a hill above the village are the remains of the walls and towers of the ancient Acropolis.

DAVOLI, a tn. Naples, prov. Calabria Ulterior II., 18 m . S.S.W. Catanzaro. It has three churches, and an annual fair. Cotton and silk are grown in the environs. Pop. 3000.

DAW, or DaAuw, isl. Indian archipelago. See Douw.
DAWLEY-MAGNa, par. Eng. Salop; 2990 ac. Pop. 8641.
DAWLISH, a vil. and par. England, co. Devon. The village, $2 \frac{1}{2} \mathrm{~m}$. N.N.E. Teignmouth, formerly consisting only of a few cottages inhabited by fishermen, has now rapidly increased ; its healthful position rendering it a desirable resort for invalids. It is beautifully situate in a valley extending to the shore, and watered by the Dawlish. The houses are well built, of respectable appearance, and the town possesses an assembly and billiard rooms, reading rooms, and baths. Area of par. 4710 ac Pop. 3132.

DAWSON ISLAND, a considerable isl. Tierra-delFuego, in the middle of Magalhaens' Strait; intersected by the parallel of $54^{\circ} \mathrm{S}$., and by the meridiar of $70^{\circ} 30^{\prime} \mathrm{W}$.

DAX [anc. Aquce Augustae Tarbellicce], a tn. France, dep. Landes, 30 m . S.W. Mont-de-Marsan, in a fertile plain, 1. bank, Adour, over which is a bridge connecting it with its suburb Sablar. Here are a court of first resort, an agricultural society, a communal college, a normal, and other schools. The town, surrounded by ditches and old ramparts of Roman construction, is entered by three gates. The houses are generally good, and the streets well laid out. The chief edifices are the castle, the high church, once a cathedral; the old bishop's palace, now occupied by the Sous Prefecture and municipality; the courthonse, \&c. Dax has manufactures of delft-ware and liqueurs ; and trade in wine, liqueurs, hams, corn, onions for preserves, timber, resinous stnffs, honey, wax, \&c. It is also an entrepôt for the merchandise forwarded into Spain. The chief attraction of D.ıx, to its many visitors, are its thermal, saline, and other mineral springs. Their repute was great among the Roman colonists of the place, and is still well maintained. Their temperatures vary from $86^{\circ}$ to $166^{\circ}$ Fah. They are used for the cure of rheumatic pains, \&c. The bathing establishment is handsome and complete. The environs of Dax are productive in wines, resinous woods, fine hams, wax, honey, \&c. The mathematician Borda was born here, and Vincent de Paula was born at a village in the neighbourhood. Pop. 5238.

DAXLANDER, a vil. Baden, circle Middle Rline, dist. of, and 4 m . W. Carlsruhe, on the Rhine. It contains a parish church. Pop. 1470.

DAXWEILER, a vil. Prussia, gov. of, and 28 m . S. Coblenz. It contains a R. Catholic parish church, and has salammoniac works, blast furnace, and other iron works. P. 605.

DAY (St.), a tn. England, co. Cornwall, on an eminence 7 m . W. Truro, and consisting of two principal streets, well kept; the honses, though generally small, are well built of granite or slate. It is badly supplied with water, the mines in the neighbourhood having drained the springs. It has an Established church, a Baptist, and two Methodist chapels. There are also two schools. The people are chiefly employed as miners. Pop. abont 2700.- (Local Correspondent.)

DA MLESFORD, par. Eng. Worcester; 540 ac. Pop. 81.
DAYTON, a tn., U. States, Ohio, on the great Miami, 68 m. W. by S. Columbus. It has 10 chnrches, 2 academies, 6 schools, a courthouse and county offices, a jail, a bank, several distilleries, with flour and saw mills, and various other manufactories; as also three printing-offices, and numer ous stores. The Miami Canal, which passes through the place, connects it with Cincinnati. Pop. 6067.

DEABELIASCA, a vil. Hungary, Banat, dist. Temesvar, 5 m . from Neudorf. It contains a Protestant parish church, and has several mills. Pop. 2261.

DEAD SEA [Latin, Lacus Asphaltites; Arabic, Birket Lut or Bahr Lut-' the Sea of Lot;' French, Mer-morte; German, Todtes-meere], called in Scripture 'Salt Sea,' 'Sea of the Plains,' and 'East Sea,' a celebrated lake, Asiatic Turkey, near the S. extremity of Palestine, pash. Damascus, N. extremity, 25 m . E. Jerusalem, and 10 m . S.E. Jericho; centre in about lat. $31^{\circ} 30^{\prime} \mathrm{N}$.; lon. $35^{\circ} 45^{\prime}$ E.; length, N . to S., about 41 m .; breadth at the widest part, $9 \frac{1}{2} \mathrm{~m}$.; average about $8 \frac{1}{2} \mathrm{~m}$. The general form of the lake is that of an elongated oval, interrupted towards its $S$. extremity by a peninsular projection, formed of loose calcareons marl, with an incrustation of salt, which runs out from the E. shore towards
the opposite coast till it has reached the centre of the lake, when it suddenly takes a N. direction, and finally terminates in a narrow point, called Point Costigan; its S. extremity, formed by a small isthınus, is named Point Molyneux. This projection narrows the breadth of the lake at this point to about 2 m ., and forms almost a small separate lake of the S. portion, measuring $9 \frac{1}{2} \mathrm{~m}$. N. to S ., with an average breadth of about 8 m .; whose $S$. shore is a mud-flat backed by hills. The basin or hollow in which the Dead sca reposes, forms the S . termination of the great depression through which the Jordan flows, that river entering it at its N. extremity. The surface of the lake is 1312 ft . below the level of the Mediterranean, and 984 ft . below lake Tiberias, from which the $J$ ordan issues. It lies dceply imbedded between lofty eliffs of naked limestone, its shores presenting a scene of indescribable desolation and solitude, encompassed by desert sands, and bleak, stony, salt hills; excepting where there are fresh-water streams, in which localities the shores are fertile. Lofty mountains, exhibiting frightful precipices, rise on the E. shore to the height of 2000 and 2500 ft . above the water, and on the W. the rocky barriers attain an elevation of 1500 ft . Reposing in its deep basin, like 'a lake of melten lead in a large caldron,' upwards of 1300 ft . below the level of the Mediterranean, and far below the general surface of the earth, this dismal sea lies exposed, for seven or eight months in the year, to the unclouded beams of a burning sun, surrounded by sterility and solitude. Its waters are intensely salt, bitter, and acrid, thick, and heavy, and so singularly buoyant, from the quantity of salt held in solution, that a person bathing in them floats without effort, like a block of wood, and is so slightly immersed, as to be hardly able to obtain sufficient purchase in the water to enable him to propel himself forward. 'On coming out of the sea,' says Dr. Wilson, 'we observed that our bodies appeared as if we had been bathing in oil; and our skin had something of a leathery stiffuess when dried; our hair, teo, was quite clotted.' Lieutenant Molyneux thus describes the effects resulting from a boating excursion on the Dead Sea :' Everything in the boat was covered with a nasty slimy substance ; iron was mnch corroded, and looked as if covered in patches with coal tar; and the effect of the salt spray on ourselves, by lying upon the skin, and getting into the eyes, nose, and mouth, produced constant thirst and drowsiness, and took away all appetite.' The general colour of the waters of the lake is of a very dark blue, theugh in some places, near the shore, it assumes that of a dark bottle green. Its component parts are muriate of lime, magnesia, and soda, and sulphate of lime. It was formerly believed that no bird could attempt to fly across the lake without being killed by the pestiferous vapours which were supposed to exhale from its surface, but this is now known to be untrue, birds abounding on and about the lake, Lieutenant Molyneux having killed some which were actually standing in the water; and having seen, while in the very centre of the sea, several ducks or other fowl fly past him. Various other travellers corroborate this statement, leaving the point no longer in deubt. There is, however, no evidence of there being any fish in the lake; the Arabs say there are none, and no signs of any have been seen, nor of any other living thing, although shells are numerous on the beach; all those found by Dr. Wilson were of fresh-water species, and were supposed by him to have been carried into the sea by the Jordan, where he had himself picked up their congeners. Although the waters do not appear to emit any noxious exhalations, their deleterious nature is further evinced by the absence of aquatic plantson the margin; still the inhabitants of the banks of the lake, which always have been peopled, do not appear to suffer, though subject to fevers, which, however, can scarcely with propriety be attributed to the vicinity of the lake. On the borders of the lake, picces of sulphur, as large as wahuts, are found in great quantities, also the black hituminous limestone, of which so many trinkets are máde at Bethlehem and Jerusalem, including rosaries, of which great numbers are sold to the pilgrims who visit the saered places. The asphaltum or bitumen, from which the lake takes one of its names, is not very abundant on the shores, and large masses are found after earthquakes only. Soundings have been taken at different points by various travellers. Those by Mr. Lynch give 218 fathoms as the greatest depth, although 300 fathoms are said by other authorities to have been obtained. The N. and of the lake seems to be by far the decpest; the soundings
at the $S$. end, or $S$. of the promentory above-mentioned, give 2 or 3 fathoms only. It has no visible outlet, although it receives six streams besides the Jordan, its surplus waters being carried off by evaporation. It was long assumed that this lake did not exist before the destruction of Sodom, and the other 'cities of the plain,' and that, previously to that time, the present bed of the lake was a fertile plain, in which these cities stood, and was then merely traversed by the Jordan, which, in accordance with this theory, was supposed to hold on its course to the Red Sea, flowing through El-Arabah, by a channel, now dry, called Wadi el Gharandel; but the fact of the Dead Sea being far below the level both of the Red Sea, and the intervening tract El-Arabah, renders this assumption a physical impossibility, while the idea that any convulsion of the earth had occurred at the period of the eatastrophe alluded to, sufficient to form the vast cavity in which the lake is situated, is very satisfactorily shown by Dr. Wilson to have been highly improbable. In such case, he remarks, how should Lot have been safe in Zoar, within two or three miles of the centre of action; and how should Abraham, living near Hebron, within 15 m . of it, have been unconscious of its oceurrence? Some eminent critics, including Professor Robinson and Dr. Wilson of Boinbay, are of opinion that the cities of the plain may probably have stood on the part of the lake S . of the promentory-the lake, by this supposition, receiving an extension merely when these cities were destroyed. A circumstance, however, brought to light by the survey of the sea in 1848 by Mr . Lynch, would seem to mili tate strongly against this hypothesis, namely, the extreme shallewness of the water in this locality; the soundings nowhere exceeding $2 \frac{1}{2}$ fathoms, or fifteen feet, a depth which must be regarded as wholly insufficient to submerge the cities of the plain, unless it be supposed that they are buried in the soft mud evergwhere found on the bottom in this part of the lake. -(Robinson's Researches in Palestine; Wilson's Lands of the Bible; Kitto's Diblical Cyclopedia; London Geog. Journal, Lynch's Expedition to the Dead Sea.)

DEAKOVAR, a tn. Austria, Sclavenia, co. Veröz, cap. dist. of same name, 36 m . E. by S. Posega. It is poorly built, but is the sce of a bishop; contains a cathedral and episcopal palace, both handsome edifices, a parish church, eourthouse, Franciscan monastery, and cavalry barracks. Pop. 3000.

DEAKY, or Deakovecz, a vil. Hungary, co. Press burg. about 18 m . from Tyrnau. It contains a handsome parish church. Pop. 1524.

DEAL, a municipal and parl. ber., seaport, market tn. and par. England, co. Kent, on the coast between the N. and S. Forelands, 72 m . E. by S. London, and a station on the South-Eastern Railway; lat. $51^{\circ} 13^{\prime} \mathrm{N}$. ; lon. $1^{\circ} 24^{\prime} \mathrm{E}$. It is divided into Upper and Lower Deal ; the latter consisting of three streets running parallel with the shore, and oceupied by the bulk of the population; the former composed chiefly of detached houses, ocenpied by the wealthier classes. The Town, well paved and lighted with gas, has a spacious and handsome esplanade, a public library, reading-room, and baths; and is much frequented as a watering place. There are two parish churches, a chapel of ease, and places of worship for Baptists, Independents, and Wesleyans; and national, nautical, and infant sehools. Deal has a large navy yard, including an extensive naval storehouse ; this establishment originated in Deal castle, built by Henry Vill. as a coast defence. There are also a custom-house, and a jail ; and at Walmer, a detached suburb to the $\delta$., is the royal and naval military hospital, now used as a coast-guard station. At the N. end of the town is another coast-guard station, formerly the castle of Sandown. There are also commodious barracks. Deal is a great pilot station, 56 of the licensed or branch pilots of the cinque ports being attached to it. Boatbuilding, for which the town is famous, is extensively carried on, and likewisя sail-making; but the greater part of the inhabitants are engaged in maritime pursuits, as fishermen, boatmen, and pilots. The Deal boatmen have long been celebrated for their skill and intrepidity, unhesitatingly hazarding their lives in saring their fellow-creatures from the numerous shipwrecks that take place on the neighbouring Goodwin Sands. There is no harbour, but a spacious roadstead-the well-known Downs, bounded seaward by the equally famous Goodwin Sandsaffords geod anchorage, and was much frequented during tho
war by merchant vessels waiting for convoy. Much of the trade of the place is still derived from the supply of the shipping which take refuge here during contrary winds, as many as 500 sail being frequently congregated at one time. Deal is a member of the cinque port of Sandwich; and Walmer Castle, the official residence of the warden of the cinque ports, is about half a mile from the town. It contributes with Sandwich to return two members to the House of Commons. Its municipal government is vested in a mayor, six aldermen. and eighteen conncillors. Weekly market, Saturday; two fairs annually. Area of par. 1120 ac. Pop. 6688.

DEAN.-1, A river, Scotland, co. Forfar, issuing from Forfar Loch, and, after a S.W. course of about 12 m ., falling into the Isla, 1 m . N. Meigle. This stream is famed for the excellence of its trout.-2, (or Deen), A river, England, rising in co. Leicester, and falling into the Trent at Newark, co. Nottingham.

DEAN, several pars. England:-1, Cumberland; 6360 ac. Pop. 876.-2, (East), Hants; 640 ac. Pop. 228.-3, (East), Sussex; 4670 ac. Pop. 433.-4, (East), Sussex ; 2510 ac. Pop. 360.-5, (Little), Gloucester ; 780 ac. Pop. 828.-6, (Nether and Upper), Bedford; 2370 ac. Pop. 541.-7, (-Prior), Devon; 3760 ac. Pop. 552.-8, (-Priors), Hants; 1290 ac. Pop. 163.-9, (Vernham), Hants ; 2840 ac. Pop. 707.-10, (West). Sussex; 1840 ac. Pop. 129.-11, (West), Sussex; 4480 ac. Pop. 657.-12, (West), Wilts; 2780 ac. Pop. 426.

DEANE, two pars. England:-1, Lancaster; 19,340 ac. Pop. 26,217.-2, Hants ; 1350 ac. Pop. 164.

DEAN FOREST, England. co. Gloucester, 5 m. S.W. Newnham, formerly comprised the greater part of the county W. the Severn, but is now reduced to $22,000 \mathrm{ac}$., about a half of which is enclosed for the growth of navy timber. It is the property of the Crown, and its inhabitants, besides being exempted from county rates, enjoy other ancient privileges. It is divided into six extra-parochial districts, called Denbywalk, Herbert's-walk, Little Dean-walk, Speech House-walk, York-walk, and Worcester-walk. It contains extensive plantations of oak and beech, and, from the numerous orchards, cider of excellent quality is produced. The inhabitants are principally employed in the iron and coal mines with which the forest and neighbourhood abound. The forest is intersected by numerous railways, communicating between the various mines and the rivers Severn and Wye. Pop. 10,692.

DEAN MITCHELL, a par. and market tn. England, co. Gloucester; 680 ac . The Town, situate in a valley, 11 m . W. Gloucester, consists of one principal street, irregularly constructed and badly kept; houses roughly built of stone, and roofed with stone tiles and Welsh slates; water abundant and good. It has an established church and several dissenting chapels, and a parochial school. The people are chiefly employed in agriculture. Pop. 665.-(Local Correspondent.)

DEAN'S ISLAND, a lagoon isl. S. Pacific Ocean, between the Low Islands and Society Islands; lat. $15^{\circ} 5^{\prime} \mathrm{S}$. ; lon. $148^{\circ}$ W. (R.)

DEANSTON, a vil. Scotland, co. of, and 30 m. S.W. Perth, r. bank, Teith, about 1 m . W. Doune, consisting of one principal street; houses exclusively occupied by the workers (and their families) employed in the Deanston cotton factories, established on the l. bank of the river, and driven by water power. Pop. 982.

DEARHAM, a par. England, Cumberland; 3870 ac. Pop. 1803.

DEASE, a river, British N. America, rising in the Coppermine Mountains, and flowing into the N. side of Great Bear Lake.

DEASE INLET, a small bay in the Arctic Ocean, Russian America; lat. $71^{\circ} 13^{\prime} \mathrm{N}$. ; lon. $155^{\circ} 10^{\circ} \mathrm{W}$. It is so called after one of the persons who first explored it, in 1837, by order of the Hudson's Bay Company ; is about 5 m . broad, and has two fathoms water, with a muddy bottom. The coast which lines it is flat and desolate, with frozen banks of mud from 10 to 12 ft . high.

DEASE STRAIT, a channel in the Arctic Ocean, between Victoria land on the N., and Kent peninsula on the S., communicating on the W. with Coronation Gulf, and having Melbourne Island at its E. extremity; intersected by the parallel of $69^{\circ} \mathrm{N}$. , and lying between lon. $105^{\circ}$ and $110^{\circ} \mathrm{W}$. It is about 120 m . long, and 23 m . average breadth, and at its widest part is considerably obstructed by islands.

DEBA, or Drapa, a tn. Tibet, cap. of the division of Undes, 50 m . S.W. Garoo; lat. $31^{\circ} 10^{\prime}$ N.; lon. $79^{\circ} 57^{\prime}$ E.; $14,924 \mathrm{ft}$. above sea-level. It is sitnated on a succession of hills, forming the side of a ravine, and descending to the Tiltil, and is divided into three parts-the college or monastery, the residence of the lama and his priests; the nunnery; and the town properly so ealled, the residence of the governor and the other inhabitants. The houses, which are of stone, and two stories high, are whitened externally, but inside are very filthy. In the middle of the town is a temple of Vishnn, a very irregular building, the door of which is covered with gilded bronze, and ornamented witl grotesque figures. In the town are also numerous other temples, tombs, and vast granaries. A plant, called awa, from which a fine kind of meal is ohtained, is cultivated extensively in the neighbourhood.

DEBACI, par. Eng. Suffolk; 580 ac. Pop. 121.
DFBAI, a maritime tn. Arabia, Persian Gulf, S.E. side; lat. $25^{\circ} 16^{\prime} \mathrm{N}$. ; lon. $55^{\circ} 25^{\prime} \mathrm{E}$. It may be considered the termination of the Pirate Coast, as the natives to the S.W. have been generally less addicted to predatory habits, and inclined to be fricndly to the English. It consists of an assemblage of mud hovels, surrounded by a low mud wall, laving several breaches, and defended by three round towers, and a square castellated building with a tower at one angle, much dilapidated, in which are several old rusty guns. The W. tower, situated on a small cliff over the creek, is in moderate repair, with three or four guns mounted. The inhabitants are of the Beni Yas tribe, amounting to between 1000 and 1200 ; and the Sheikh is subject to the Imaum of Muscat, who keeps 150 negroes here, as soldiers, to guard the town. The inhabitants collect shark-fins, and send about 90 boats to the pearl fishery, which is their chief support, the yearly returns amounting to between $£ 4500$ and $£ 6250$. The country around is very barren.

DEBDEN, a par. and vil. England, co. Essex ; 5040 ac. The village, 4 m . N.N.W. Thaxted, is pleasantly situate on an eminence, and has a church in the early English style. Pop. 979.

DEBENHAM, a par. and market tn. England, co. Suf folk; 1920 ac. The town, 12 m . N. Ipswich, on the Deben, contains a church, built on a hill-top in the centre of the town; a place of worship for Independents, and a school. The streets are always dry and clean. The inhabitants are chiefly engaged in agriculture. Friday is market-day, and fairs are held twice annually. Pop. 1667.

DEBI, a vil. Senegambia, l. bank, Senegal, about 20 m . from its mouth, and 7 m . E. from the Atlantic Ocean. It is built on a low, sandy hill, and has a trade in fish and fish oils. The fish are taken in a stream which passes through the place.

DEBU, or Dibbie Lake, Central Africa, 160 m. S.S.W. Timbuctoo; lat. $15^{\circ} 30^{\circ} \mathrm{N}$. ; lon. $5^{\circ} \mathrm{W}$. It is about 60 m in length, E. to W., and 20 m . in breadth; with a depth, in the deepest parts, of 20 fathoms. Several streams flow into and from it, and the Niger passes through it. Shores low and swampy.

DEBOU, a vil. W. Africa, Bondou, 1. bank, Falemé; lat. $14^{\circ} 20^{\prime} \mathrm{N}$. ; lon. $12^{\circ} 14^{\prime} \mathrm{W}$. It is situate on a cliff over hanging the river, and has the appearance of a considerable village, with clean, well-built huts. It has a large tata, of solid construction, on the highest point of the river bank. The people are chiefly occupied in fishing, and show some ingenuity in the contrivances which they employ. A mile or two lower down is another village, on the same side, called Senou-Debou; and between the two a rocky bar obstructs the course of the navigation.-(Raffenel.)

DEBRECZIN, or Debretzen, a tn. Hungary, cap. circle Thither Theiss, co. Bihar, on the border of the great central plain of Hungary, 113 m . E. Pesth. Though the second place in Hungary in respect of population, it has more the appearance of a collection of villages than of a single town. lts houses are almost all of one story; and its streets, though wide, are unpaved, becoming in wet weather a liquid mass of mud. It, however, contains several handsome edifices, which contrast somewhat oddly with the mere huts in their vicinity, The most important of these are the Reformed church and college, with a library of 20,000 volumes; the R. Catholic church, the Piarist college and gymnasium, the R. Catholic high school, an orphan, and three other hospitals, and two infirmaries. The manufactures are extensive, and consist

## DEE

chiefly of coarse woollens, leather, soap, tobacco pipes, pearl wreath3, casks, and other articles of cooperage, combs, \&c. The trade. at present important, and expected to be greatly increased by the completion of the railway, embraces a great part of the produce of the N. and E. of Hungary-cattle, horses, bacon, tobacco, wine, wax, honey, flax, various kind, of oils, leather, hides, wool, potash, soda, ewe milk cheese, horse hair, \&c. Here, too, the traders from Transylvania supply themselves with colonial produce, and the showy fineries of Vienna. There are also four large annual fairs, and the largest swine market in the kingdom. Debreczin may be considered as the capital of the Magyars, and the capital also of IIungarian Protestantism. More than twothirds of the inhabitants are Protestants; and their college here, founded in 1792, has been pronounced the best educational establishment of which Hungary can boast. Pop. 63,000.-(Paget's Hungary and Transylvania; Raffelsperger, Lex. Öst. Staaten.)

DEBTLING, par. Eng. Kent; 1430 ac. Pop. 318.
DECATUR, numerous places, U. States, particularly:1, A vil. Georgia, 90 m . N.W. Milledgeville, agreeably situate on elevated ground, and having a jail, courthouse, three churches, and an academy.-2, A vil. Alabama, 139 m . N.N.E. Tuscaloosa, I. bank, Tennessee.-3, A vil. Mississippi, 76 m. E. Jackson, on the head waters of the Chickasawha.4, A vil. Illinois, on the Sangamon, in the midst of a fertile country, 40 m . E. Springfield.

DECAZEVille, or Lasalle, a tn. France, dep. Aveyron, about 18 m . from Villetranche. It dates only from 1830, and owes its existence to the erection of blast furnaces and other ironworks, said to be the largest and most complete of their kind in France. The town takes its name from Duke Decaze, by whom it was founded ; and the minerals are worked by a joint-stock company, who have a capital of $£ 288,000$, and employ about 1500 hands. Pop. 4290.

DECCAN [Sanscrit, Dacshina-the South], a term formerly applied to the whole of peninsular Hindoostan S. of the Nerbudda, and of a line drawn from the sources of that river E. to the mouth of the Hoogly. It is now limited to the territory lying between the Nerbudda and the Kistna, or between the parallels of $16^{\circ}$ and $23^{\circ}$ N., and the Arabian Sea on the W., and the Bay of Bengal on the E.; greatest length, from E. to W., 900 m. ; greatest breadth, from N. to S., 490 m . It comprises the provinces Candeish, Gundwana, Orissa, Berar, the Northern Circars, Beeder, Aurungabad, Hyderabad. Bejapore, together with the dominions of the Nizam, the rajahs of Berar and Sattarah, the Guicowar and Gwalior sovereigns. What is known as the British Deccan, comprises the collectorates of Candeish, Ahmednuggur, Poona, and Darwar, under the Presidency of Bombay ; and the Balaghaut ceded districts on the Nerbudda, under the Presidency of Bengal.

DECCAN, or Dukrinshafabazpoor Island, Bay of Bengal, at the mouth of the Megan or Brahmapootra, from the sediment of which it is formed. It is 30 m . long, and from 10 to 13 m . average breadth; very low, and at spring tides, during the rains, is almost submerged. Salt of excellent quality is manufactured here, on Government account.

DECEPTION ISLAND, one of the New Shetland Isles, S. Atlantic Ocean; lat. $62^{\circ} 55^{\prime} 6^{\prime \prime}$ S.; lon. $60^{\circ} 35^{\prime} \mathrm{W}$. Seen from a distance, it has a singular and striking resemblance to a vessel, whence its name. The principal part of the island is composed of alternate layers of ashes and ice, as if the snow of each winter, during a series of years, had been prevented from melting, in the following summer, by the ejection of cinders and ashes from its volcanic vents. On the E. side of the island is an opening of abont 600 ft . wide, which affords an entrance to a kind of lake or internal sea, of a nearly circular form, 5 m . in diameter, and 97 fathoms deep. As this lake occupies the entire centre of the island, the land forms merely a kind of ring around it, similar to the atol islands. It abounds with hot springs; affording the extraordinary spectacle of water, at the temperature of $140^{\circ}$, issuing from peneath the snow with which the ground is covered. The hills, whose height is about 1800 ft ., are principally tuffa, scorim, and a red brick-like substance. The cliffs on the N. side of the entrance to the lagoon or internal sea, rise perpendicularly to the height of 800 ft , and appear to be of older formation than the rest of the island. The only sign of vege-
tation is a lichen, growing in small tufts around the mouth of several small craters, of 3 or 4 ft . in diameter, from which a heated vapour is constantly issuing, accompanied by much noise. In February 1842, Capt. Smiley saw the whole S . side of the island apparently on fire, and counted 13 volcanoes in action. The island swarms with penguins. Port Egmont hens, pintados, and various kinds of petrels also abound, and sea leopards are numerous.-(U. States Exploring Expedition; Lieut. Kendal's Journal, \&c.)

DECIMOMANNU, a vil. isl. Sardinia, div. of, and 7 m . N.W. Cagliari, at the confluence of the Santatiana and Mannu. It has an annual fair of eight days, which is numerously attended. Good wine is grown in the neighbourhood.

DECIZE (anc. Decetia), a tn. France, dep. Nièvre, 17 nI . S.E. Nevers, picturesquely situated on a rocky islet of the Loire, at the confluence of the Aron and the commencement of the canal of Nivernais, which gives a communication between the Loire and Yonne. The islet is connected with one bank of the river by a stone, and with the other by a suspension bridge, and its highest summit is crowned by an old castle of the Dukes of Nevers. Decize possesses several blast furnaces, and other ironworks. The coal mines, extensively wrought, in the neighbourhood are about the richest in France, and furnish the town with the staple of its trade; which, however, includes also grinding and mill stones, charcoal, and ship timber. The glass-works of Charbonnière. about 1 m . distant, make about 100,000 bottles monthly. Pop. 2828.

DECS, a vil. Hangary, Thither Danube, co. Tolna, 3 m . from Szexard. It contains a Protestant church. P. 1666.

DECUMAN (St.), par. Eng. Somerset; 3250 ac. P. 2660.
DED-Nemes, a vil. IIungary, Thither Danube, co. Schumeg, about 2 m . from Vid. It contains a Protestant and a R. Catholie church. Pop. 1173.

DEDDINGTON, a par. and tn. England, co. Oxford; 3990 ac . The rown, pleasantly situate on an emineuce, $15 \frac{1}{2} \mathrm{~m}$. N. by W. Oxford, consists of one principal street, straight, and tolerably well kept. The market-square, which is remarkably large, contains the townhall, an insignificant building, and a capacious reservoir for water, of which there is a plentiful supply. The houses are plainly, but substantially built of stone. There are a parish church, a handsome Gothic building of the 13th century, with a massive tower, erected in the reign of Charles I.; and two plain chapels, belonging to Independents and Wesleyans; and national schools for boys and girls. A castle formerly stood here, in which Piers Gaveston, the favourite of Edward II., was confined for a night, on his way to Warwick to be beheaded. There are two mineral springs in the neighbourhood, and, at a short distance from the town, a station on the Oxford and Rugby branch of the Great Western Railway. The inhabitants are chiefly employed in agriculture. Pop. 2025.-(Local Correspondent.)

DEDELEBEN (Gross and Kleiv), two adjacent vils. Prussia, gov. Magdeburg, near Oschersleben. Each village has a parish church, and the two contain several mills. Pop. 1323.

DEDHAM, a par. and vil. England, co. Essex ; 2260 ac. The village, 6 m . N N.E. Colchester, in a picturesque valley on the Stour, over which is a good bridge, consists principally of one street. Pop. 1787.

DEE.-1, A river, England, which has its source in a mountainous dist. of Merionethshire, N. Wales. It pursues a N.E. course, traverses the vale of Llangollen, and, approaching Cheshire, near Shocklach, forms the boundary between Cheshire and Denbighshire, till it approaches Aldford, whence it flows on to Chester, the walls of which it nearly encircles, and where it is 100 yards wide. From Chester it is conveyed by an artificial channel into the broad estuary which unites it with the Irish Sea.-2, Two rivers, Scotland, one in Aberdeenshire, the other in Kirkcudbrightshire. The former rises in the S.W. extremity of the shire, and, after a course of 70 or 80 m ., falls into the German Ocean at the harbour of Aberdeen. It is not navigable, but its salmon fisherics are valuable, and the scenery on its banks romantic. The latter, formed by the junction of the Dee water and the Ken, after a course of 40 m ., enters Kirkcudbright Bay. It is navigable by vessels of 200 tons for 2 m . above the town of Kirkeudbright. It has valuable salmon fisheries also.-3, A river,

Ireland, cos. Meath and Louth. It rises near Drumeourath, passes through the rich vale of Ardee, is joined by the White River near Poe's Court, and, after a course chiefly E. of about 21 m ., falls into Dundalk Bay, by a common embouchure with the Glyde, 43 m . W. by N. Dunany Point.-4, A river, Van Diemen's Land, co. Cumberland; it is a branch of the river Derwent.

DEEG, a tn. and fortress, IIindoostan, presid. Bengal, prov. of, and 57 m . N.W. Agra; lat. $27^{\circ} 30^{\prime} \mathrm{N}$. ; lon. $77^{\circ} 12^{\prime}$ E. To preserve this town from the violence of the torrents that pour from the hills during the rains, it is necessary to keep large embankments in repair. There are here the ruins of seven remarkably fine palaces. It was thought to be impregnable by the people of India, till it was taken by storm by Lord Lake in 1805.

DEEL.-1, A river, Ireland, chicfly in co. Limerick. It rises in the Orrery mountains, co. Cork, and, after a circuitous course, S. to N., of about 25 m ., flows into the Shannon, 16 m . below Limerick. It is navigable to Askeaton.-2, A rivulet, Ireland, co. Mayo, flowing into Lough Conn.

DEENE, par. Eng. Northamptou; 2950 ac. Pop. 516.
DEEPING, several places, England, co. Lincoln :-1, (-Market), a market tn. and par.; area, 1290 ac. The town, $38 \mathrm{~m} . \mathrm{S} . \mathrm{S} . \mathrm{E}$. Lincoln. and 2 m . W. the Peakirk station of the Great Northern Railway, has a fine old church, an Independent chapel, an endowed school, a well attended weekly market on Wednesday. and several annual fairs. Pop. 1219.-2, (East, or St. James), a vil. and par.; area, 6470 ac. The village, $\frac{8}{4} \mathrm{~m}$. S.E. Market Deeping, of which it is a suburb, is situate on the Welland, which is here navigable for small craft. It has one main street, badly paved, but well drained; is plentifully supplied with water, and kept remarkably clean. The houses, though somewhat irregular, are well built, principally of stone; but the only imposing structure is a recently erected townhall. It has a spacious ancient parish church, two dissenting chapels, two public schools, two private academies, a mechanics' institution, and several local charities; and at its E. end a chalybeate spring. The people are chiefly employed in agriculture. Pop. 1733.-3, (West), a vil. and par.; area, 1170 ac. The village, 2 m . W.S.W. Market Deeping, is compact and well built, and contains a handsome parish church. Pop. 306.

DEER (NEW), a par. and vil. Scotland, co. Aberdeen; $29,020 \mathrm{ac}$. The village, situate on the ridge of a hill, 25 m . N. by W. Aberdeen, consists of one street. Fairs are held several times annually, for cattle, sheep, horses, and agricul tural produce. Field-Marshal Keith, who fell at the battle of Hochkirchen, October 14, 1758, was a native of the parish; and Robert Arbuthnot, grandfather of the celebrated Dr. Arbuthnot, who was physician to Queen Anne, and the friend of Dean Swift, is buried in the churchyard. Pop. 3756.

DEER (OLD), a vil. and par. Scotland, co. Aberdeen, the former 26 m . N. the city of Aberdeen, and $10 \frac{1}{2} \mathrm{~m}$. W. Peterhead. It is populous and thriving, and contains an Episcopal chapel.-The PARISH comprises about 25,000 ac. Pop. ( 1841 ), 4453 ; of which about 200 are in the village.

DEER ISLAND.-1, An. isl. Ireland, co. Clare, W. shore of the estuary of the Fergas, $3 \frac{1}{2}$ m. N.E. Kildysert. It is about 1 m . long, with a medium breadth of about onethird of a mile.-2, An isl., U. States, Maine, S.E. shore of Penobscot Bay, and separated from the mainland by a very narrow channel. It is about 18 m . in circumference; with several adjacent islands it forms a township; has a fertile soil, and contains several good harbours, conveniently situated for the fisheries. Pop. 2841.-3, An isl. New Brunswick, in Passamaquoddy Bay, near its entrance on the S.W. side; about 7 m . long, and 3 broad; irregular in form, and inhabited chiefly by fishermen.

DEER ISLANDS, two small isls. Indian Archipelago, Macassar Strait, off the extreme S.W. coast of Celebes, and directly opposite the town of Macassar ; lat. $5^{\circ} 9^{\prime} \mathrm{S}$. ; lon. $119^{\circ} 14^{\prime}$ E. (R.)

DEERFIELD, numerous places, U. States, among the most important of which are:-1, A township, Massachusetts, 95 m. W. by N. Boston. It has a pleasantly situated village, and contains a Congregational church, an academy, and several schools. Tanning and rope-making are carried on, and there are several grist and saw mills. Pop. 1912.-2, A wwiship. New York, 4 m . N. Utica. Pop. 3120.-3, A
township, New Jersey. It contains four churches, thrce academies, 11 schools, several stores, various factories, and a printing-office. Pop. 2621.

DEERHURST, par. Eng. Gloucester; 2930 ac. P. 937.
DEERNESS, par. Scot. Orkney; $4 \frac{1}{2} \mathrm{~m}$. by 3 m . P. 777.
DEES, or Deesch [Lat. Desium], a market tn. Austria, Transylvania, co. Szolnok, agreeably and advantageously situate at the confluence of the Great and Little Szamos, 30 m. N.N.E. Klausenburg. It is well built, contains a Protestant, a R. Catholic, and two Greek churches, two Franciscan convents, and a gymnasium; and has a considerable trade in salt. In the neighbourhood are the ruins of the old castle of Deesvar. This district is said to be the first in Transylvania the inhabitants of which embraced Christianity. Pop. 5300.

DEESA, a tn. Hindoostan, prov. Goojerat, l. bank, Bunas, 12 m . W. Palhanpoor ; lat. $24^{\circ} 9^{\prime}$ N. ; lon. $72^{\circ} 8^{\prime} \mathrm{E}$. It is the most advanced military station of the British on the Goojerat frontier.

DEGERANDO (Cape), Van Diemen's Land, forming the S . extremity of Freycinet's peninsula; lat. $42^{\circ} 22^{\prime} \mathrm{S}$. ; lon. $148^{\circ} 22^{\prime}$ E.

DEGERLOCH, a vil. Würtemberg, circle Neckar, 3 m . S. Stuttgart, to whose citizens it is a great holiday resort. A good red wine is produced in its vicinity. Pop. 1313.

DEGGENDORF, or Deckendorf, a tin. Lower Bavaria, cap. dist. of same name, at the junction of the Kolbach and Danube, over which there is here a bridge, 29 m . N.W. Passau. It is well built, contains five churches, to one of which numerous pilgrimages are made; a deanery and Latin school; and has manufactures of linen and sicves, wax refineries, some shipping trade, an iron and several other inills. Pop. of tn. 3800 ; of dist. 15,764 .

DEGGINGEN, a vil. Würtemberg, circle Danube, bail. of, and near Geisslingen. It contains a parish church; and has several fairs. Pop. 1767.

UEGO, a tn. Sardinian States, Piedmont, div. of, and 27 m. S.S.W. Alessandria, chief place mandamento of same name, l. bank, Bormida. The Austrians were here defeated by the Frencb, in 1796.

DEH-r-Hajee, a walled th. Afghanistan, on the route from the Khojuk Pass to Kandahar, $20 \mathrm{~m} . \mathrm{S} . \mathrm{E}$. the latter; lat. $31^{\circ} 23^{\prime} \mathrm{N}$.; lon. $65^{\circ} 44^{\prime} \mathrm{E}$. The houses, which are from 20 to 30 ft . ligh, are built of sun-dried bricks, with domeshaped roofs constructed of the same material. Pop. about 2000.

DEHRUNG, a dist. Assam, on the N. side of the Brahmapootra, about 30 m . sq. It is an elevated tract, not subject to inundation, but very fertile, and well cultivated.

DEIDESHEIM, a tn. Bavaria, circle Pfalz, dist. of, and 13 m. W.N.W. Spires. It contains the ruins of an old castle; and has manufactures of fire-arms, tile works, and two mills. Excellent wine is produced in the neighbourhood. Pop. 2227.

DEIGH'TON-KIRK, par. Eng. York, (W. Riding); 2470 ac. Pop. 539.

DEINUM, a vil. Holland, prov. Friesland, 3 m . W. Leeuwarden, on the canal thence to Franeker. It is pleasantly situate, is surrounded by a dyke, and has a Reformed church and a school. Pop. 400.

DEIR, or El Der, a tn. Asiatic Turkey, pash. Damascus, r. bank, Euphrates ; lat. $35^{\circ} 21^{\prime}$ N.; lon. $40^{\circ} 13^{\prime}$ E.; 70 m. S.E. Rakka. Alexander the Great had a dock here tor building vessels.

DEiR-el-Kammer. See Dair-el-Kammer.
DEIROUT, or Delroot, a tn. Lower Egypt, l. bank of the Rosetta branch of the Nile, 14 m . S. by E. Rosetta.

DEISSLINGEN, a vil. Würtemberg, circle Schwarzwald, bail. of, and 4 m . S . Rottweil, on the Neckar. It is a place of considerable antiquity, and contains a parish chureh.

DEJ'TAR, a vil. Hungary, Hither Danube, co. Neograd, near the Ipoly, 5 m . from Balassa-Gyarmath. It contains a R. Catholic church. Pop. 1297.

DEL REY (R10), a river, W. Africa, has its sources in the Cameroon mointains, and falls into an open shallow bay in the Bight of Biafra.

DELAGOA BAY, in S.E. Africa; lat. $26^{\circ} 4^{\prime}$ S.; lon. $33^{\circ} 1^{\prime}$ E.; formed by a narrow slip of land, projecting from the mainland, and parallel to it, called the peninsula of Inyack. The bay stretches $N$. and S. upwards of 40 m ., with a breadth of from 16 to 20 m . Though crossed at its entrance by a
bar, on which, during the S.E. monsoon, the sea breaks with great fury, it is accessible to vessels of the largest class, and is the most considerable bay on the E. coast of Africa, both on account of its extent, and of the deep and large rivers that discharge themselves into it, the principal of which are the Mapoota, English River, and the Manice. But the great deposit ejected by these streams has created shoals, banks, and flats, which have rendered the navigation of the bay somewhat intricate. Its shores are generally low and swampy, and lined with mangroves; and at high tides are in part over. flowed. There is here a Portuguese fort, on the 1. bank of English River, about 3 m . from its mouth; lat. $25^{\circ} 58^{\prime} \mathrm{S}$.; lon. $32^{\circ} 32^{\prime}$ E.; the southernmost establishment of that nation on the E. coast of Africa, although they claim a territorial dominion as far as Point Natal. The natives here are perfectly black, tall, muscular, and well set; with short thick neek, and small head. The women are mostly of small stature, and, although not positively handsome, have agreeable countenances. Several acts of treachery towards Europeans are recorded against the natives, with more particular reference to those inhabiting the country for some distance up the rivers. Delagoa Bay was originally called Lorenzo Marques, after its first discoverer, who was amongst the carliest of the Portuguese voyagers.

DELAMERE, two pars. Eng.:-1, Chester : 8770 ac. Pop. 914.-2, (-Tedstone), Hereford; 1800 ac. Pop. 207.

DELAWARE, one of the U. States of N. America, and, next to the state of Rhode Island, the smallest in the Union. It is bounded, N. by Pennsylvania, E. by the Delaware River and Bay, S. and W. by Maryland; between lat. $38^{\circ} 29^{\prime}$ and $39^{\circ} 47^{\prime} \mathrm{N} . ;$ lon. $74^{\circ} 56^{\prime}$ and $75^{\circ} 40^{\prime} \mathrm{W}$. ; length, 92 m . ; breadth, 23 m .; area, $2120 \mathrm{sq} . \mathrm{m}$. With the exception of a small rounded expanse in the N., it has the form of a rightangled triangle, with its base on the S., its perpendicular on the W., and its hypothenuse stretching from N.W. to S.E. along the bay. Delaware belongs geologically to the secondary formation intervening between the carboniferous and the cretaceous series. In the S., and towards the coast, the surface is very level; but the N. part is rather hilly. An elevated swainpy table land, towards the W., traverses the state, forming the water shed between the Bay of Chesapeake and the Delaware. The soil on this plateau is indifferent, but about the Delaware it is rich, and productive. In the $S$. the soil is sandy, but there is some fine grazing land. A cypress swamp on Indian River, 12 m . long, by 6 m . broad, yields large quantities of timher. The chief crops are wheat, which, made into flour, forms the principal article of export; Indian corn, rye, barley, oats, flax, buckwheat, and potatoes. The climate is generally temperate and salubrious; but winter is occasionally severe. The rivers of Delaware are small, and the sea coast, though of considerable extent, has no good natural harbours. Wilmington, the largest and most commercial town in the state, is accessible by vessels drawing 14 ft . The capital is Dover. By the present constitution, adopted in 1831, the governor is chosen for four years, and is ineligible ever after. The state is divided into three counties, and the senate consists of three members from cach county, elected for four years; the representatives are seven from each county, chosen for two years. Every male citizen above 22 years of age, after a year's residence, has the right of suffrage. The present income is $£ 6660$, and exceeds the expenditure by $£ 985$. There is no state debt. Delaware was first settled by Swedes and Finns, under the patronage of Gustarns Adolphus, and received the name of New Sweden. Pop. ( 1850 ), 91,535 , of which 2289 were slaves.

DELAWARE, a river and bay, U. States. The mver rises in two principal branches, $W$. side of the Catakill mountains of New York, pursues a winding S. course, forms the boundary between New York and Pennsylvania, then between Pennsylvania and New Jersey, and finally between New Jersey and Delaware, until it expands into Delaware Bay. Its length is about 300 m . Its principal tributaries are the Lchigh, which it receives at Easton from the W., and the Schuylkill, which joins it 6 m . below Philadelphia. It is navigable for vessels of the largest burthen 40 m . to Philadelphia, and for sloops 35 m . further to Trenton. It is conneeted by canals with the Hudson, and with Chesapeake Bay. The principal towns situated on the Delaware are Philadelphia, Burlington, Trenton, and Easton.--The bay, at the mouth

Vol. I.
of the preceling, of which it forms the estuary, is a large inlet of the sea, between the states of Dclaware and New Jersey, extending 65 m . inland ; and is 18 m . across at its entrance, between Cape May on the N., and Cape Henlopen on the S. As this bay has no safe natural harbour, the U. States Government have cansed a magnificent artificial one to be formed within Cape Henlopen. The anchorage is in lat. $36^{\circ} 47^{\prime} \mathrm{N}$.; lon. $75^{\circ} 6^{\prime} \mathrm{W}$.

DELA WARES, a tribe of N. American Indians, occupying a portion of the U. States territory assigned to the Indians, W. of the Missouri, and N. of the Shawnees. They are industrious and frugal, and devoted to agricultural pursnits, and to the rearing of cattle and horses. Baptist and Methodist missions have been established among them. They were formerly numerous and powerful, occupying part of New York, Pennsylvania, and New Jersey ; their present number is about 826 .

DELBRUCK, a tn. Prussia, prov. Westphalia. gov. of, and $40 \mathrm{~m} . \mathrm{S} . \mathrm{S} . \mathrm{W}$. Minden, on the Haustenbach. It contains a R. Catholic parish church; and has manufactures of linen and tobacco; a trade in cattle, and four annual fairs. P. 1027.

DELDEN, a tn. Holland, prov. Overijssel, 31 m . S.E. Zwolle, on the road from Deventer to the Hanoverian frontier. It consists mainly of a single badly-paved street, and has a Reformed and a R. Catholic church and a school; with a branch of the public utility society. Pop. 1200.

DELEMONT [German, Delsberg], a tn. Switzerland, can. Berne, cap. bail. of same name, in a fertile valley, l. bank, Sorne, 18 m . S.S.W. Basel. The houses are well built, and the streets broad and straight, and adorned with fountains. The church, courthouse, and school, are all handsome buildings. An old palace, now belonging to the parish, was the summer residence of the old bishops of Basel. Delemont has a college with three professors, and a principal. One of the chief employments is bleaching. In the vicinity the remains of Roman baths have been discovered. John Prevot, a celebrated professor of Padua, was born, and died here. Pop. 1422; all R. Catholics.

DELFSHAVEN, a tn. Holland, prov. S. Jolland, $2 \frac{1}{4} \mathrm{~m}$. below Rotterdam, r. bank, Maas, the seaport of Delft, with which it is connected by a canal. It is strongly defended from the inundations, to which it is much exposed, by dykes, flood gates, and other engineering contrivances, aud presents ample conveniences for shipping. It has a Reformed church, with a crowned berring for the stceple vane, in token of the town's obligations to the herring trade; and a neat $R$. Catholic church: also a courthonse, a royal navy provision store, formerly the East India Company's warehouse; a town's school for various branches of education, the deaconship school, a handsome new huilding; and a magnificent boarding school for girls, including day classes for the citizens' daughters. Pop. 2800.

DELFT [original name, Neduntivoe, or Long Island], a small isl. off the N.W. coast, Ceylon, about 8 m . long, by 3 broad, and entirely surrounded by coral reefs. It possesses no natural harbours; but a small and secure one has been formed on the N. side. Water is scarce. This island was appropriated by the British for the breeding of horses; and, till lately, an extensive stud was kept up. Cattle, of a good description, are reared here in great numbers. Pop. 2947.-(Ceylon Gaz.)

DELFT, formerly Delf, a tn. Holland, prov. S. Holland, 8 m. N.W. Rotterdam, supposed to be one of the oldest towns in the Netherlands. It stands on a dead flat, and is intersected in all directions by canals, which are crossed by 69 bridges, mostly of stone. These canals make the great mar-ket-place, with its public buildings, an island, approached by 9 bridges. The counterscarps of the old ramparts are now planted with trees, and form public walks, such as are greatly prized by the Dutch. The town-hall [Stadhuis], in the great market-place, was repaired and improved in 1838, with an anxious desire to retain the original style of its architecture. It is a large, solid-looking building, with a heavy square tower rising from its roof. The Prinsen-hof, once the occasional residence of William I. of Orange, and the scene of his assas sination, is now a military barrack. There are three Reformed churches. The old contains the monuments of Admirals Tromp and Hein; the famous naturalist Lecuwenhoek, and other worthies. The magnificent mausoleum of 'Father
103

## DELHI

William,' and the burying-place of the Orange family, are in the New; and from the top of its huge square tower, the town and neighbourhood are from time to time regaled with the richest music from a chime of three octaves; the new church
fertile, in consequence of its being irrigated by numerous streams from the Kumaon hills, the waters of which are collected in reservoirs; the climate also is genial. The W. parts of the province, especially the Bhatty and Huriana countries, suffer greatly from want of water, the inhabitants being obliged, in the hot season, to dig from 120 to 200 ft . deep for it; and even then, what is obtained is brackish. The appearance of the country, however, wonderfully improves after the rainy season; grounds formerly parched and burnt up, are then covered with a rich verdure, produced by temporary streams, and by the overflowing of rivers. The principal rivers are the Ganges, Jumna, Caggur, and Chittung. The Sereswati, in the N.W. part of the province, was formerly another important stream, but is now nearly extinct. The people of this province are remarkable for their quiet and orderly habits, and easy circumstances. This territory has frequently changed masters. For a long period it was under the Patan or Afghan monarchs. In 1525, the Mogul dynasty was founded by Babir, who had slain the last of the Afghan monarchs in battle. The empire continued in the possession of this sovereign and his descendants, until the establish-
contains also the tomb of Hugo Grotius. The third is called the Hospital Church. The Belgian Reformed, the Evangelical Lutherans, and the Jansenists, have each a church, and the R. Catholics two. Delft has long been the seat of an arsenal, for which its central position fits it. The old Armentorium Ordinum Hollandiee et Frisice, as the inscription runs, is now a store for small arms and artillery, and the Constructiewinkel has machinery for casting and boring, and for everything required by the ordnance and commissariat departments. The old Laboratorium is now an ammunition store, and the Old East India House has become the clothing and tent store, and the saddle-maker's shop. To these have been added, since 1830 , a large iron-foundry. There are a gymnasium and 17 other schools, several associations for promoting the fine and useful arts, and science and literature; an infirmary, and several benevolent institutions. In 1654 the powder magazine exploded accidentally, when not a single house entirely escaped, and many persons were killed or maimed. From 1790 to 1815, the popnlation fell off; but since 1815 it has increased, and in 1840 it was 17,514 .

DELFZIJL [Latin, Castrum Delfsilianum], a maritime tn. and fortress, Holland, prov. of, and 16 m . E.N.E. Groningen, at the mouth of the old Delf or Damsterdiep, and on the estuary of the Eems. It is well fortified, has three gates, and a roomy haven-not, however, so deep as once it was; a barrack, arsenal, magazine, a Calvinistic and R. Catholic church, a school, and a marine college. Agriculture, fishing, shipping, and trade, employ the inhabitants. Pop. 1704.

DELGADO, a low. rocky cape, Mozambique Channel, N. entrance; lat. $10^{\circ} 41^{\prime} 12^{\prime \prime} \mathrm{S} . ;$ lon. $40^{\circ} 39^{\prime} 45^{\prime \prime}$ E. (R.)

DELHI, formerly an extensive prov. Hindoostan, cap. same name, situate principally between lat. $28^{\circ}$ and $31^{\circ} \mathrm{N}$., and lon. $75^{\circ}$ and $80^{\circ}$ E., bounded N. by Lahore, S. by Agra and Ajmeer, E. by Oude, and W. by Ajmeer and Lahore. It ex tended E. to W. about 240 m. , and N. to S. about 200 m . The province is generally level, and the soil arid and unproductive, except on the banks of the rivers. Much pains, however, have been taken by the British government to irrigate the land, by restoring the ancient canals with which the country was intersected, and by constructing new ones. Many thousand pounds have been already expended on these meritorious works, with the best results; extensive tracts of sterile and waste lands having been fertilized by the waters, and rendered capable of the highest cultivation. Wheat, barley, and other kinds of grain are produced in the district lying between the Jumna and the Sutlej, and wheat and sugar in that between the E. bank of the Ganges and the kingdom of Oude, called the Rohilla district; the soil here being extremely
ment of the British in India. Shaw Allum II. signalized the commencement of his reign by an unsuccessful attack upon the Englisl; and on his defeat, by an unconditional surrender of himself. From this period, the territories of the Mogul gradually decreased, and in a short time he possessed little more than a nominal sovereignty. The Rohillas became masters of the capital in 1788, whereupon Shah Allum transferred the remains of his empire to Maha Raja, and bccame a prisoner to the Maharattas. Matters continued in this state till 1803, when Lord Lake, after defeating Dowlub Row Scindia, took possession of the country, and appropriated a portion of it for the support of the Mogul, thenceforth entitled king of Delhi.

Delhi is now one of the six administrative divisions of the North-western provinces, and comprehends but a small portion of the N. W. of the ancient province. It is divided into five districts, the names of which, with their area and population, \&c., are as follows:-

|  | No. of Townships. | $\begin{gathered} \text { A rea in } \\ \text { geo.sq m. } \end{gathered}$ | Area in $\begin{gathered}\text { Ares. } \\ \text { Acres. }\end{gathered}$ | $\left\lvert\, \begin{gathered} \text { Land } \\ \text { Revenue in } \\ 1846-7 . \end{gathered}\right.$ | Total Pop. | $\begin{aligned} & \text { No. of } \\ & \text { persons } \\ & \text { to each } \\ & \text { geo. m. } \end{aligned}$ |

DELHI [Sanscrit, Indraprast'ha], a city, Hindoostan, presid. Bengal, cap. above prov., and anciently of the Patan and Mogul empires, lat. $28^{\circ} 40^{\prime}$ N.; lon. $77^{\circ} 16^{\prime}$ E. About 700 m. N. E. Bombay, and about 790 m . N. W. Calcutta, and now the residence of the King of Delhi. It was at one time the largest city in Hindoostan, covering a space of $20 \mathrm{sq} . \mathrm{m}$., and having a pop. of two millions. It is now reduced to a circumference of 7 m ., and its pop. to about 250,000 . A vast tract covered with the ruins of palaces, pavilions, baths, gardens, and mausoleums, mark the extent of the ancient metropolis of the Mogul empire. The present city, built on two rocky eminences, is surrounded by walls of red sandstone, 30 ft . high, and from 3 to 5 ft . thick, with a moat 20 ft . broad. There are seven colossal arched gates, defended by round bulwarks, and all built of freestone. The streets are all narrow, excepting two, which are, or rather were, of the breadths respectively of 30 and 40 yards, but now narrowed, and otherwise disfigured by the intrusion of new buildings; one of them divides the city E. to W., and is intersected by a canal or aqueduct.

The houses here are of sandstone and brick, and are of two and three stories in height. The bazaars have a very attractive appearance, being filled with rich and showy goods, displayed to the best advantage, and thronged with busy crowds. The palace or residence of the Great Mogul, built by Shah
in. S. of the city is the tomb of the Emperor IIoomaioon, the largest and handsomest of the sepulchral monuments of Delhi. It is built also of red sandstone and white marble, and is two stories ligh, with a large, lofty vaulted hall, in the centre of which are the beautifully sculptured white marble sarcophagi of the emperor and his consort. The exterior of this splendid structure is adorned with domes, supported by square pillars, with arabesques and sculptures. At the distance of a few hundred paces are the tombs of several saints; the most remarkable of which is that of the celebrated Mussulman saint, Nizam-udDeen, distinguished by its elegant arabesques and filagree work, executed in beautiful white marble. There is here a college for the promotion of education amongst the natives of British India, the funds for the support of which are supplied chiefly by the Indian Government. In 1845, the college was attended by 460 students, of whom 299 were Hindoos, and 146 Mahometans. The salaries and other expenses for 1843, amounted to $£ 39,050,4 s .10 \mathrm{~d}$. This college or madressa, was originally built by Ghazi-ud-Deen. It is an elegant structure, and stands near the Ajmeer-gate. The famous obscrvatory of Jye Singh, rajah of Jyepoor, at the S.W. extremity of the city, has been much dilapidated, and its astronomical instruments nearly

Jehan, commenced in 1631, and finished in ten years, is by far the most interesting building in Delhi, from its being the most magnificent structure of the kind in India. It is situated on the bank of the Jumna, or rather a branch of it only, and is about a mile and a half in circuit, being enclosed by an embattled wall of reddish sandstone, nearly 60 ft . high, with round towers at intervals; the whole perforated with loop holes, and surrounded by a broad moat, which is separated from the streets of the city by a wide road or esplanade, rendering the palace a regular fortress, impregnable against an army not provided with a battering train. There are two principal entrances-the Delhi and Lahore gates ; both the most splendid buildings of the kind, particularly the former, which is probably not surpassed by any similar structure in the world. The lofty embattled walls, the stupendous towers, surmounted by elegant pavilions, the marble domes and gilded minarets, form altogether an unequalled assemblage of taste and magnificence, and give one a ligh idea of the former splendour of the emperors of Delhi. The main gateway is flanked by two massy angular towers, embattled to corresjond with the top of the adjacent wall, and surmounted by two elegant octagon pavilions. with marble domes; the central portion of the building is considerably raised above the towers, in the form of an elaborately carved screen, supported on a double row of slender columns, with minarets at the ends; and over all, seven small marble domes, with gilt spires. Just above the great gateway, which is somewhat concealed by the wall of the court that surrounds it, is a covered gallery, with low balustrades in front, which might contain a considerable number of people. The interior of the palace corresponds with the noble entrance, and sufficient yet remains to show that in the days of the meridian glory of the empire, it was a place worthy to be seen on account of the richness of its decorations, and the splendour of the court. In many places the walls only remain, and these, from want of repair, are tumbling down and threatening ruin to the inmates. One of the most remarkable objects in the city is the Jamma mosque, a magnificent structure in the Byzantine-Arabic style, and considered by the Mahometans the wonder of the world. It stands upon an equilateral foundation, and is built of white marble and red sandstone, inlaid like mosaic, in lines and arabesques; at the two extreme corners rise minarets 150 ft . high, and between them two lofty domes. This imposing edifice was built by the emperor Shah Jehan, in the 17 th century, and took several thousand men for six successive years (1631 to 1637) to complete it. A splendid view of the city and adjoining country is obtained from the summits of the minarets, which are ascended by winding staircases within. There are no fewer than forty other mosques in different parts of the city, many of them having lofty minarets and gilded domes. Five
all destroyed or carried off. The principal manufactures of the town are cotton cloths, indigo, finely embroidered shawls, and jewelry, for which, as well as for delicately carved ivory, Delli is somewhat noted. The chief imports are by the northern caravans, which bring from Cashmere and Cabool shawls, fruit, and horses. Precious stones of good quality are to be had at Delhi, particularly the large red and black carnelians. In the vicinity, wheat, rice, millet, and indigo are grown.

Delhi, or as it was anciently called, Indraprastha, is mentioned by the Mahometan historians as early as A.D. 1008, when it was the residence of the Hindoo rajahs. It has at various times undergone great vicissitudes, having been frequently taken by hostile powers, and subjected to all the miseries of such events. In the begimning of the present century, the prosperity of the city and country around was almost entirely annililated, and the Mogul Emperor and royal family reduced to the utmost poverty and distress, by the Maharattas, who took possession of his capital, of his gardens and houses, and used his name to oppress and impoverish the people by fraud and extortion. From this miserable state of desolation and ruin, the city was rescued by the British in 1803 ; when it was entered and taken possession of by Lord Lake, after he had defeated the army of Dowlub Row Scinda in the neighbourhood. Peace and order were now restored tc the city and territory, and a handsome annual allowance made to the Emperor and family. Pop. 250,000, of whom the Mahometans are to the Hindoos in the proportion of two to seven.-(Government Returns; Journal Statistical Society, \&cc.)

DELI-Baba, a vil. Asiatic Turkey, pash. of, and 48 m . E. S. E. Erzeroom. It is inhabited solely by Armenians, of whom there are about thirty-five families, apparently in circumstances of tolerable comfort, thongh loud in their complaints of oppression. The only building of note is a large Turkish tomb, to which the village owes its name, but its history is unknown.

DELIA, or Deglia, a vil. and com. Sicily, div. of, and 12 m. S.S.W. Caltanisetta. Pop. 2260 .

DELICETTO, a tn. Naples, prov. Capitanata, 19 m . S. S. W. Foggia, on a hill. Ifere are a convent, with a large collegiate church, and several charitable foundations. Pop. 4269.

DELITZSCH, a tn. Prussia, prov. Saxony, gov. Merseburg, cap. circle same name, r. bank Lober, 14 m . N. by W. Leipzig. It is old but well built, contains a castle, three churches, and an hospital ; and has manufactures of woollen cloth, hosiery, and tobacco, and several important annual fairs. Pop. 4534. The circle, area 255 geo. sq. m., is for the most part flat, being only occasionally diversified by a few low hills; is watered by the Mulde, Leine, Lober, and other streams.
and is of considerable fertility, producing much corn and fruit. Pop. 47,809.

DELLI, a tn. and small state N.E. coast, isl. Sumatra. The rown is situate at the mouth of a river of the same name; lat. $3^{\circ} 46^{\prime} \mathrm{N}$.; lon. $98^{\circ} 42^{\prime} \mathrm{E}$. It is a mere assemblage of mean dirty huts, on both sides of the stream, which is navigable for canoes one day's journey inland. -The state yields gold, camphor, benzoin, and pepper; the inhabitants are Malays and mostly pirates.

DELLIBLAT, a vil. Hungary, dist. Temeswar, about 10 m . from Neudorf. It contains three Greek non-united churches, and has numerous mills. The inhabitants are Wallachians. Pop. 3986

DELLNICZE, a vil. Austria, Croatia, co. Agram, about 12 m . from Fussina. It is the seat of a court of justice, and contains a parish church. Pop. 1679.

DELLYS.- 1 , a seaport tn . Algeria, 49 m . E. Algiers; lat. $36^{\circ} 55^{\prime} 30^{\prime \prime}$ N.; lon. $3^{\circ} 55^{\prime} 12^{\prime \prime}$ E. (r.) It is a small place, partly at the foot, and partly on the declivity of a high mountain, built out of the ruins of an ancient city, supposed to be the Rusucurium of Pliny. The inhabitants carry on a brisk trade with Algiers, the great mart for their agricultural productions, and with which they lave regular steam communication. Pop. (1819), 1389.-2, A cape about 20 m . E. the port.

DELMENHORST, a tn . Oldenburg, cap. circle of same name, on the Delme, $16 \frac{1}{2} \mathrm{~m}$. E.S.E. Oldenburg. It is an old place, entered by two gates, and has recently been considerably improved. It is the seat of a court of justice and several public offices, contains a church and high schools, and has a considerable trade in fir-wood, cattle, and horses, and four annual fairs. Pop. 1777.--The circle has an area of 231 geo. sq. m. Pop. 32,977.

DELORAINE, a tn. Van Diemen's land, cos. Devon and Westmorland, 32 m . from Launceston.

DELOS, Dilf, or SDili, two small and barren islands, Grecian archipelago, between Mycone, Syra, and Paras; lat. $37^{\circ} 26^{\prime}$ N.; lon. $25^{\circ} 15^{\prime}$ E. The larger of the two was called Rhenea; but little Delos was the more important, from its being a chosen seat of Pagan superstition. Here may be still seen remains of a famous temple of Apollo, built at the joint expense of all the communities of ancient Greece. Early in the 18th century, the greater Delos furnished scanty pasture to the people of Mycone. It is still inhabited by a few shepherds with their herds.

DELOW, or Dalle, a tn . of W. Soudan, 20 m . S.E. Boussa ; lat. $9^{\circ} 55^{\prime}$ N.; lon. $5^{\circ} 15^{\prime}$ E. Pop. 10,000 . It was formerly the capital of Mandara.

DELPHI, or Castri, a tn. Grecce, dist. Phocis, S. side of a mountain range which terminates in Parnassns, 7 m . E. Salona. It is built on terraces of masonry, which rise in regular gradation, and have all the appearance of great antiquity, but with this exception there is little in the modern Castri to remind us of the ancient Delphi, so famous throughout Greece for its oracle of Apollo, and the series of temples and other splendid edifices with which it was adorned. The Castalian spring, rising at the foot of twin peaks, celebrated (Giffard says not correctly) as those of Parnassus, is still shown ; and though the walls of the vast amphitheatre are no longer visible, its seats, hewn ont of the solid rock, are stiil almost perfect. Pop. about 500 .

DELTING, par. Scot. Shetland. Pop. 2019.
DELUWI, a large vil. Persia, prov. Khorassan, 140 m . S. Mushed. It has a ruinous castle, about 100 houses, and numerous gardens, well supplied with water by subterranean water-pipes. Pop. 300, of Arab race.

DELVINO, or Delbino, a tn. European Turkey, prov. Albania, 44 m . W.N.W. Janina ; lat. $39^{\circ} 55^{\prime}$ N.; lon. $20^{\circ} 10^{\prime}$ E., beautifully situated, and the seat of a Greek bishop. It is fortified, and the chief place of a sanjak. The women here wear a white wrapper, covering them from head to feet, with two half sleeves, into which the elbows are stuck, and thrust out at right angles. They look like rough hewn marble crosses. The wrapper opens at the face, to exhibit a black mask, with two holes for the eyes. There are great plantations of olives in the district, and the town has some trade in oil, and other local produce. Pop. about 10,000 .

DEMAK, or Damak, a tn., dist. and river, N. coast, isl. Java, prov. Samarang. The rown, 15 m. E.N.E. Samarang, on the river of same name, is populous and was formerly
capital of the kingdom of Demak.-The district is flat and fertile, producing considerable quantities of European grain, also legumes and fruits. Salt is likewise obtained in varions localities. The district is watered by numerous streams, the Demak being the most important. It rises in the mountains of the province of Soorakarta, flows in a very winding course N.E., and falls into the Java Sea about 5 m .
W.N.W. the town of Demak, after a course of about 70 m .

DEMARCATION POINT, a cape on the Arctic coast of N. America; lat. $69^{\circ} 45^{\prime} \mathrm{N}$. ; lon. $141^{\circ} \mathrm{W}$., marking the boundary between the British and Russian N. American possessions.

DEMAVEND. - 1, A lofty volcanic peak or mourtain, Persia, $14,695 \mathrm{ft}$. high, on the borders of Irak-Ajemi and Mazenderan; lat. $35^{\circ} 50^{\prime} \mathrm{N}$.; lon. $52^{\circ} \mathrm{E}$. The cone, for about 100 ft . from the top, is entirely composed of a soft rock, from which pure sulphur is dug.-2, A large vil. about 25 m . S.S.W. the above peak, on the banks of two beautiful streams that flow in a serpentine course through an extensive basin, surrounded by lofty mountains.

DEMBEA, Zana, or Tzana, a large and beantiful lake, Abyssinia, kingdom of Amhara, intersected nearly at its centre by the parallel $12^{\circ} \mathrm{N}$. It is of somewhat irregular form, and from 140 to 150 m . in circumference, situated in a spacious plain, considered from its fertility, the granary of the country, and at a height above the sea so great ( 6000 ft .) that spring is perpetual, though within the tropics. It contains a number of islands, some of them of considerable size and all inhabited. This lake is the receptacle of numerous streams, which flow into it from all sides. It is also traversed at its S. extremity by the Abai, the Nile of Bruce, the current of which is distinctly visible as it crosses the lake.

DEMBIA RIVER, W. Africa, Sierra Leone, supposed to rise in the mountainous district on the S.E. of Senegambia, flows in a S.W. direction, and falls into the Atlantic at lat. $9^{\circ} 45^{\prime} \mathrm{N}$.

DEMBLEBY, par. Eng. Lincoln; 1000 ac. Pop. 58.
DEMED, a vil. Algerian Sahara, 174 m . S. by E. Algiers. The houses, which are low and ill constructed, are surrounded with gardens containing fruit trees, pulse, and grapes of excellent quality. The powder manufactured here is highly valued in the desert. Woollen stuffs for garments are spun by the women. Pop. about 200.-(Daumas' Sahara Algerien.)

DEMER, a river, Belgium, which rises about 2 m . N.E. Tongres, prov. Limburg, proceeds circuitously in a N.W. direction through that province, passing Bilsen, Hasselt, and Haelen, enters province Brabant, proceeds circuitously but almost directly W., passing Diest and Aerschot, and joins r. bank, Dyle, 6 m . N. Louvain. Its whole course is about 45 m ., of which 18 m . beginning at Diest are navigable.

DEMERARA, a considerable river, British Guiana, rises in the interior of the country, about lat. $5^{\circ} 15^{\prime} \mathrm{N}$. ; lon. $58^{\circ} 40^{\prime} \mathrm{W}$., from which, with exception of a short run E., it flows nearly due N. parallel with the Essiquibo, and falls into the Atlantic at George Town ; lat. $6^{\circ} 48^{\prime}$ N.; lon. $58^{\circ} 12^{\prime}$ W., after a course of about 120 m . Its affluents are small but numerous, flowing both from the right and left. It is navigable for ships of considerable burden for ncarly 100 m ., when the navigation is interrupted by cataracts. At its mouth it is about 2 m . broad, but inland does not exceed $1 \frac{1}{2} \mathrm{~m}$. It affords an excellent and spacious harbour at its embouchure, but is obstructed by a bar. Cultivation extends 25 m . up the river.

DEMERARA, a colony. See British Guiana.
DEMETRIUS (Cape), Gulf of Salonica, Thessaly; lat. $39^{\prime} 18^{\prime}$ N.; lon. $23^{\circ} 20^{\prime}$ E.

DEMIANKA, a river, Siberia, which rises in Lake Ougansk6e, gov. Tobolsk, flows E., and, after a course of about 200 m. , joins r. bank, Irtish, at Demiansk, 95 m . N.N.E. Tobolsk. Its chief affluents are the Sargat, Besloukaiar, and Khioul.

DEMIANSK, a vil. Siberia, gov. and 95 m . N.N.E. Tobolsk, at the confluence of the Demianka with the Irtish. It consists of only about 100 houses, occupied by Russian shepherds.

DEMIR-H1ssar [Iron Castle], a fortified tn. Turkey, supposed to be built on the site of the ancient Heraclea; 288 m . W. by N. Constantinople ; lat. $41^{\circ} 20^{\prime}$ N.; lon. $23^{\circ} 28^{\prime}$ E. It stands at the foot of a high hill, this being crowned with an old fort, from which it takes its modern name. The houses
are built on a mill stream, which is a tributary of the Kara-Su. It has several mosques, and a Greek church. Pop. 7000.

DEMMIN, a tn. Prussia, prov. Brandenburg, gov. of, and 70 m . W.N.W. Stettin, on the frontiers of Mecklenburg schwerin, on a valley surrounded by hills on a height above the Peene, which is here navigable, and receives the Tollense and Trebel. It consists of the town proper, surrounded by walls with three gates, and of three suburbs, contains four public squares, a townhouse, and hospital, is the seat of a law court, has manufactures of woollen and linen cloth, hats, leather, shoes, hosiery, and tobacco, and carries on a trade in corn, malt, and wood. It is a place of considerable antiquity, having been both walled and fortified during the 12 th century. It suffered much during the Thirty Years' War, previous to which it was a place of much more consequence than at present. Pop. 5938.-The circle, area, 282 geo. sq. m., is well watered both by streams and lakes, is only tolerably fertile, but raises a great many cattle. Pop. 41,719.

DEMONTE, a tm. Sardinian States, on the Stura, 14 m . S. W. Coni. It has a communal college, three churches, and an hospital. The town is commanded by a fort, built on a neighbouring height. Pop. about 6000.

DEMO'TICOS, Demotica, or Dimotika, a th. Turkey, prov. Roumelia, $20 \mathrm{~m} . \mathrm{S}$. Adrianople; lat. $41^{\circ} 20^{\prime} \mathrm{N}$. ; lon. $26^{\circ} 30^{\prime}$ E., r. bank, Maritza, here navigable for small vessels. The town is defended by a citadel, containing a palace once dwelt in by several sultans, before the Turks gained Constantinople. It is the seat of a Greek bishop; and in the environs silks, woollens, and pottery are manufactured. Charles Xll. of Sweden found a retreat here, for some time, after his discomfiture at Pultowa. Pop. about 8000 .

DENAIN, a tn. France, dep. du Nord, 6 m . from Valen ciennes, l. bank, scheldt, which is here navigable. It stands in the centre of a coal field, and has rapidly risen into import ance, four fifths of the houses being of recent construction. both coal and iron are extensively raised, and supply several blast furnaces and other iron works on the spot. Denain had once a celebrated abbey, founded in 764. Two battles-one in 1079 , and another in 1712 , the latter gained by the Freneh over the Anglo-German allics-were fought here. Pop. (1826), about 900 ; (1846), 6648.

DENARDISTON, or Denston, par. Eng. Suffolk; 1230 ac. Pop. 339.

DENBIGH, a maritime co. N. Wales, bounded, N. by the Irish Sea, E. by Flint, Chester, and Salop, W. by Caernarvon, S. by Montgomery and Merioneth; greatesi length, $49 \mathrm{~m} . ;$ greatest breadth, about 28 m. ; area, $633 \mathrm{sq} . \mathrm{m}$., or 405,120 ae. Its surface is much diversified. Towards the $N$. there are some level tracts, but its general character is that of a rugged and mountainons character, redeemed by several beautiful and fertile vales; amongst the more celebrated of which are the vales of Llangollen, Clwyd, Conway, and Valle Crucis. The E. part of the county is enclosed by a range of rugged hills, commencing near St. Asaph's, the loftiest summit of which is 1845 ft . above the sea; another range encloses the county on the $\mathrm{S} . W$., attaining an elevation of 1660 ft . Heath and ling is the general covering of these hills, whose dreary wastes are interspersed with numerous small lakes and streams. Black eattle, sheep, and goats are reared in great numbers in the hilly districts. Barley, oats, and potatoes are grown on the uplands; and, in the rich valleys, wheat, beans, and pease. In the S. and E. parts of the country, dairy husbandry is carried on to a considerable extent, and cheese produced equal to that of Cheshire. The climate is salubrious, but in districts exposed to the $N$. winds somewhat rigorons, although in the valleys it is sufficiently mild. The minerals consist of lead, iron, coal, freestone, slate, and millstone. In the hilly districts there are immense quantities of peat, so close-grained as to exhibit a polished surface when dry, and cut with a sharp iustrument. Flannels, coarse cloths, and stockings are manufactured to a considerable extent. The principal river is the Clwyd. The Dee crosses the county in a N.E. direction, and the Conway separates it from Caernarvon. These three rivers are the ehief channels through which its surplus waters are drained; but it has no river navigation, nor any seaport. The projeeting point or headland called Great Ormes Head, at the entrance into the Menai Strait, is in this county. The Chester and Holyhead Railway passes through it, in a line parallel with, and close to the sea coast. The county is divided into
six cantrefs or hundreds, and 57 parishes. It returns threo members to Parliament ; two for the county, and one for the borough of Denbigh. Pop. (1841), 88,866; (1851), 92,583.

DENBIGH, a tn. and parl. bor., N. Wales, cap. above co., near the centre of the vale of Clywd, 22 m . W. Chester, and 180 m. N.W. London, picturesquely situated on a rocky eminence, the summit of which is crowned by the ruins of al ancient castle. The town, which consists of one principal, and several subordinate streets, extends down the slope of the hill and some way round its base, and is well paved and lighted with gas, but scantily supplied with water. It has two churches; and chapels belonging to Calvinistic Methodists, Wesleyans, Independents, and Baptists. The new market-hall is a spacious building, in the Elizabethan style. There are here a free grammar-school, founded in 1727; a national school, several Sunday schools, a blue-coat charity school, a reading room, a Welsh literary society, mechanics' institution, agricultural society, dispensary for the poor, and a splendid lunatie asylum, capable of accommodating 200 patients. Tanning and shoemaking are carried on to a great extent, the latter being the principal trade in the town, and occupying between 400 and 500 hands. Woollen plaids, linsey-woolseys, and waistcoat pieces are also manufactured in considerable quantities. There are two weekly markets, Wednesday and saturday; and six annual fairs, one of which is the most important held in N. Wales. Denbigh was made a borough in the time of Edwarl I. It sends one member to Parliament, in conjunction with Holt, Ruthin, and Wrexham. Denbigh, in the reigns of the Edwards, was, with its fortress, bestowed on various individuals, at different times, as a special mark of royal favour. In 1646 , it was taken and dismantle by the Parlianentary troops; and, after the Restoration, it was blown np with gunpoyder, and rendered completely untenable. Pop. (1841), 5238.-(Local Correspondent.)

DENBURY, par. Eng. Devon; 1270 ae. Pop. 470.
DENBY, par. Eng. Derby ; 2380 ac. Pop. 1338.
DENCHWORTH, par. Eng. Berks; 1060 ac. Pop. 246.
DENDER, or Dendre, a river, Belgium, which rises in the province of Hainaut, from two sources, the waters of which conjoin below Ath, where it becomes navigable. It flows N., enter3 E. Flanders, and passes through or near Lessines, Grammont, Ninove, Alost, whence it is canalized to its mouth in the Scheldt, at Dendermonde or Termonde. Total course, about 30 m .

DENDER, a river, Abyssinia and Nubia, having its rise in the former, but nearly the whole of its subsequent course in the latter. It rises in a mountain range W. of Lake Dembea, in about lat. $12^{\circ} 40^{\prime} \mathrm{N}$. ; lon. $36^{\circ} 7^{\prime}$ E., from which point it flows N. W., skirting Abyssinia for about 95 m. , when it fairly enters Nubia, and, running parallel with the Rahad on the E., and the Bahr el Azrek on the W., joins the latter about lat. $14^{\circ} 10^{\prime}$ N., being itself joined previously by the Gologo, precisely at the point where it enters Nubia, or in lat. $12^{\circ} 40^{\prime} \mathrm{N} . ;$ lon. $35^{\circ} 7^{\prime} \mathrm{E}$. Total course about 260 m .

DENDERAH [the Tentyra of the Greeks and Romans], a ruined $t \mathrm{t}$. of Upper Egypt, l. bank, Nile; lat. $26^{\circ} 10^{\prime} \mathrm{N}$. lon. $32^{\circ} 40^{\prime}$ E.; celebrated for its temple, the most magnifieent, and best preserved, of any of the remains of antiquity in Egypt. The town stands on a plain, surrounded by mountains, and beautified by palm trees. Nbout the distance of $1 \frac{1}{2} \mathrm{~m}$. E., are the ruins of the temple of Isis. They are nearly all enclosed within a square wall, built of sun dried bricks. This wall is, on either side, 1000 ft . in length, in some parts 35 ft . high, and 15 ft . thick. The gateway which leads to the temple is a singularly beantiful specimen of Egyptian arehiteeture and seuppture; it is 42 ft . in height, 33 ft . in width, and 17 ft . in depth, and is covered with hieroglyphs and ornaments, elegantly designed and exquisitely cut. The portico of the temple consists of 24 colnmins, in three rows; cach above 22 ft . in circumference, 32 ft . high, and covered with hieroglyphs. The interior consists of several apartments, all the walls and ceilings of which are covered with religions and astronomical representations, including the figure of Isis, the presiding deity of the place, which is very frequently repeated. The roofs are flat, and are formed of oblong masses of stone resting on the side walls, or on rows of columns carried down the middle of the apartment, and whose eapitals are richly ornamented with the budding lotus. The only light admitted to the interior was by small perpen-
dicular holes cut in the ceiling, or by oblique apertures in the sides. It was thus exceedingly dark and gloomy, but well calculated for the mysterious religious rites of which it was the scene. The most remarkable object, however, belonging to the temple, and that which has excited the greatest interest, is a mythological table, resembling a celestial planisphere or zodiac, sculptured on a kind of sandstone, and forming the ceiling of one of the upper chambers. It occupied the central space of three concentric circles, and appeared as if supported by 12 figures, four of which are females. These are standing, while the eight male figures, who have hawks' heads, are represented kneeling. The zodiac, as it is called, was carefully removed from its original place in 1822 , and conveyed to France, and is now in the museum at Paris. It has formed a fertile source of discussion among antiquaries, great differences of opinion existing as to what it is, and how old it is.

DENDERMONDE, a tn. Belgium. See Termonde.
DENEKAMP, a vil. Holland, prov. Overijssel, 39 m . E.S.E. Zwolle, near the Hanoverian frontier. It has a Reformed and a R. Catholic church, and a school. The inhabitants are chiefly engaged in agriculture. Pop. 560.

DENFORD, par. Eng. Northampton; 1940 ac. Pop. 329.
DENGELEG, or Gongilag, a vil. Hungary, Thither Theiss, co. Szathmar, about 5 m . from Piskolt. It contains a Protestant and a Greek united church. Pop. 1328.

DENGIE, par. Eng. Essex ; 1750 ac. Pop. 219.
DENHAM.-1, A par. and vil. Eng. Bucks; 4850 ac. Pop. 1264.-2, A par. Eng. Suffolk; 1990 ac. Pop. 182.3, A par. Eng. Suffolk; 2300 ac. Pop. 313.

DENHOLM, a vil. Scotland, co. Roxburgh, 40 m . S.E. Edinburgh, pleasantly situated on a rivulet that falls into the Teviot. It contains a chapel, belonging to the Independents, and a subscription library. The inhabitants are chiefly employed in stocking weaving for the stocking manufacturers of IIawick. Dr. John Leyden, the poet and linguist, was born in this village in September 1775. Pop. (1851), 766.
DENIA [anc. Dianium], a city and port, Spain, Valencia, prov. of, and 58 m . N.E. Alicante, at the base of Mount Mongo; lat. $38^{\circ} 52^{\prime} \mathrm{N}$. ; lon. $0^{\circ} 5^{\prime} 15^{\prime \prime} \mathrm{E}$. (c.) It is enclosed by ancient walls, defended by several batteries, and overlooked by a ruinous castle. Except a few of modern construction, the houses are, in general, poorly built, and most of the streets, though paved and clean, are irregalar. The square is spacious, and contains the parish church, prison, and townhouse-all large and handsome buildings. Here are, besides, several convents, three schools, an orphan asylum, hospital, some capacious storehouses, a cemetery, and several pleasant promenades. The city is supplied with water, from a spring five miles distant, by means of an aqueduct. Its chief exports are fruits, potatoes, honey, and timber; it imports grain, lime, esparto, iron, salt fish, and colonial produce. The vessels entering and sailing from Denia average annually 404 , tonn. 47,499 ; but the land is gaining on the sea, to the prejudice of the port. This city was bombarded by the French, in 1813, when most of its fortifications and public buildings were demolished, and, though since partially restored, it has never recovered its former consequence. Pop. 2619 (Madoz).

DENIO, par. and vil. Wales, co. Caernarvon. P. 2367.
DENIS (St.), a tn. France, dep. Seine, on the rivulets Croud and Rouillon, near r. bank, Seine, 6 m . N. Paris, and a station on the Great N. of France Railway. It is the seat of a sub-prefecture, and a place of some importance, and of great bistorical interest. It is well built, and its streets are spacious and clean; while its proximity to Paris causing a constant intercourse, gives it a lusy, stirring look. Its chief ornament is the abbey church, once the mausoleum of the kings of France, from Dagobert downwards, and still containing several of their monuments. This antique edifice, which has lately been splendidly restored with great care and cost, is one of the finest gothic buildings in France. Its original foundation was anterior to 638 ; additions were made in 775 ; and an entire reconstruction of the building took place in the 12 th and 13 th centuries. It was for many ages the conventual chnrch of an abbey of Benedictines, founded by Dagobert; within its walls his remains were interred, and there his monument is still to be seen. In 1793, the revolutionists, after rooting out the monks, devastated their church, and turned it into a market for horses, beeves, and heavy merchandize;
previously to which the bones of three dynasties of French kings, accumulated during nearly twelve centuries, were thrown into ditches prepared for them outside. The abbey buildings still exist, and are occupied as a national asylum, for the maintenance and education of 500 young ladies, daughters of members of the Legion of Honour. St. Denis once had important fairs; that of St. Laudit (amongst the oldest in France) still exists, with a yearly sale of nearly 100,000 sbeep. In the town and environs are several flourmills, dye-works, printfields, bleacheries of woollens, chemical works, caoutchouc manufactories, \&c. The locality is also the seat of an active inland trade, which is much favoured by the neighbouring Seine and the Canal St. Denis, connecting that river with the Canal de l'Oureq. Pop. 9166.

DENIS (St.), a tn., cap. isl. Bourbon, on its N. coast. It has a high tribunal, a court of first resort, a college, which had 16 professors and 157 pupils, in 1837; a public library, and botanic gardens. It is the seat of a busy trade, has a bank, founded in 1826, a chamber of commerce, and a Government entrepôt. There is no port for ships, but a neighbouring roadstead, the best in the island, supplies the want, during eight months of the year (April till December). Pop. 12,000, including negroes.

DENIS, or Orixa Island, the most N. E. isl. of the Seychelle Archipelago; lat. $3^{\circ} 49^{\prime}$ S.; lon. $55^{\circ} 44^{\prime}$ E. It is about $2 \frac{1}{2}$ or 3 m . in extent, N. to S., with several thatched habitations on its N. side; it is very low, covered with trees, and may be seen from a distance of 12 m .

DENIZLI, a tn. Asiatic Turkey, pash. Anadolia, 125 m . S.W. Smyrna; lat. $37^{\circ} 50^{\prime} \mathrm{N}$. ; lon. $29^{\circ} 15^{\prime} \mathrm{E}$.; on a low hill, towards the S. E. part of a spacious plain. It was destroyed, about 1715 , by an earthquake, in which 12,000 people perished. It now consists of about 1200 Turkish, 120 Greek, and 35 Armenian houses; but the town consists chiefly of bazaars and market places, most of the inhabitants residing in villas in the environs. Tanning and dyeing leather, chiefly red and yellow, and the making of a kind of morocco, from sheep and goat skins, form the main occupations. Around the town there are many vineyards, the produce of which is partly converted to raisins, and partly into a kind of syrup, extensively employed as a substitute for sugar.

DENKENDORF, a vil. Würtemberg, circle Neckar bail. of, and 4 m. S. Esslingen, r. bank, Kersch. It contains a parish church, originally belonging to a monastery whicl once existed here, and was richly endowed. Pop. 1459.

DENMARK [Latin, Dania; Danish, Danmark; German, Dänemark; Dutch, Deenemerken; French, Danemark], a northern kingdom of Europe (cap. Copenhagen), between lat. $53^{\circ} 22^{\prime} 42^{\prime \prime}$ and $57^{\circ} 44^{\prime} 52^{\prime \prime}$ N., and lon. $7^{\circ} 34^{\prime} 45^{\prime \prime}$ and $12^{\circ} 17^{\prime} 20^{\prime \prime}$ E. It is composed of a peninsular portion, and an extensive archipelago, lying $E$. of it, with a few scattered islands on its W. side; and is bounded, N. by the Skager Rack, which separates it from Norway; N.E. and E. by the Kattegat and Sound, which separate it from Sweden; E. by the Baltic, and the grand duchy of Mecklenburg; S. by Hamburg and the river Elbe, which separate it from Hanover; and W. by the German Ocean, or North Sea. The peninsular portion is composed of N. Jutland, followed in order, S., by the duchy of Schleswig, formerly called S. Jutland; the duchy of Holstein, the duchy of Lauenburg, and the town of Altona; and measures, N. to S., 322 m ., with a breadth varging from 30 m . to 108 m .-its broadest part being from Fornas point, lat. $56^{\circ} 26^{\prime} 42^{\prime \prime}$ N., on E. coast, to Nissum Fiord, on the W. coast. The numerous islands lying E. of Jutland are mainly comprised in two groups:-First, that of Seeland or Zealand, including, besides the large island of that name, the small adjoining islands E. of the Great Belt, the principal of which are Amager, Langöe, Taröe, Masnedöe, Agersöe, Lolland or Lalland, Falster, Möen, \&c.; and, second, the Funen group, comprising, besides the large island of that name, the neighbouring islands W. of the Great Belt, including Langeland, Fanöe, Taasinge, \&c. Besides these, there are the outlying islands of Lessöe and Anholt, in the Kattegat, and Bornholm, in the Baltic. These islands, with the province of N. Jutland, comprise Denmark proper, the remaining sections are called the Ducbies. The principal islands belonging to Schleswig are Alsen and Aeröe, in the Littlu Belt; Femern, in the Baltic; and Rom, Sylt, Fora, Pellworm, and Nordstrand, \&c., in the German Ocean.

Besides these territories, Denmark possesses the Färoe Islands and Iceland, in N. Atlantic Ocean ; Greenland, in the Arctic regions; the islands of Santa Cruz or St. Croix, St. Thomas, and St. Juan, in the W. Indies; and the Nicobar Islands, in the Bay of Bengal. She also formerly had some establishments on the coasts of Guinea, in Africa, and of Coromandel, in India; but these have been sold to Great Britain.
For administrative purposes, both Denmark proper and the Duchies are divided into bailiwicks. The following tables exhibit these divisions, with their area and population, as well as the total area and population of the whole monarehy:-

Geology and General Aspect.-All Denmark, with exception of the island of Bornholm, lies in the great northern European plain, which, bounded on the S. by the Wesergebirge and the Harz Mountains, stretches W. to the Atlantic, and N. to the Baltic, N. Sea, and Euglish Channel, and, towards the E., merges insensibly into the great plain of Russia. In the N., this plain lies so low as to be, in some parts, below the level of the sea, from which it is only defended by high and stroug embankments. Holland and E. Friesland, on the N. of IIanover, are the countries to which this remark principally applies; but part of Denmark-namely, the W. side of Holstein and Schleswig-are included. Farther eastward, the plain gradually loses its monotonous flatness, acquires first an undulating, and finally assumes a hilly appearance. To the surface so characterized, all Denmark, with the exception of the flat already mentioned, belongs; the greatest height being attained on the E. side of the peninsula, though, even there, it never exceeds 1200 ft . In respect of geological structure, all the rocks belong to the upper series of the secondary, and to the tertiary formation, and have been deposited from water, in regular strata, with the exception of the remarkable hill of Gipsberg, near Segeberg, which is crystalline, and evidently volcanic, and appears to be the effect of a single burst from some unfathomable depth below, since it has nowhere else succeeded in penetrating the surface. The rock most fully developed is chalk, of which several distinct species have been recognized, particularly the white chalk, sometimes called Saltholm limestone, whicli, commencing in that island, is developed largely in Secland, and more partially in Jutland and Holstein; the coral chalk, or Färoe limestone, which generally occurs in comparatively thin beds, of a sandy texture, but is rich in fossils; and the blue chalk, a fine limestone, in thicker beds than the coral chalk formation, but apparently belonging to the same period. Above the chalk is an extensive boulder formation, which stretches over a considerable part of the country, and contains some seams of lignite. Immediately above it, and sometimes intermixed with it, are thick beds of clay and marl. Where it prevails, as in Seeland, Schleswig, Holstein, and the E. of Jutland, the soil is generally fertile; but in the other parts of the country, ard especially in the N., and along the W. coast of Jutland, where it is supplanted or overlain by deep beds of sand, the country has an extremely desolate aspect, presenting little else than alternations of sand and heath, while its whole $W$. coast is rendered almost uninhabitable by the drift-sand, which has formed an almost uninterrupted line of sterile downs, called Klitten, extending from Cape Skaggen to Blaavands Hook, a distance of nearly 200 m . Along the W. coasts of Holstein, Schleswig, and parts of that of Jutland, are extensive flats or plains, which have been wrested from the sea, and which are protected from its encroachments by huge dykes, as in Holland. Woods of considerable extent yet exist on the E. side of Jutland and Schleswig, both of which countries were, at one time, covered with forests of oak and birch. The coasts are deeply indented with bays and inlets, and, in some places, are steep and bold, though generally flat and sandy. The larger islands, Seeland, Lalland, und Funen, are fertile and well cultivated, their soils consisting chiefly of clay, mixed with sand and lime. Woods of beech and oak occur in these islands, with partial tracts of moor and heath. Besides the minerals already noted, salt and fuller's earth are obtained in moderate quantities; and on the Hitse, a bank on the W. coast of Jutland, amber, both of the white and yellow kind, is found. The annual quantity of
amber collected varies from 1650 to 2200 lbs ., and the largest pieces ever found weighed 14 and $18 \frac{1}{2} \mathrm{oz}$.

Rivers, Lakes, Sea-arms, Ports, \&ec.-Denmark has no large rivers; the principal is the Eyder, which flows from an inland sheet of water in Holstein, and falls into the N. Sea at Tonningen, at the S.W. extremity of Schleswig, where it is 800 ft . wide. It forms the boundary line between the duchies of IIolstein and Schleswig, and formerly separated Germany from Denmark Proper. It is navigable throughout nearly the whole of its course, and, by means of the Schleswig-Holstein canal, which connects it with the Kiel Fiord, water-communication is effected across the peninsula, from the N. Sea to the Baltic. The rivers next to the Eyder are the Guden and Trave, both also navigable. All the others are insignificant streams. There are no rivers in any of the islands, but brooks and streamlets abound. The Elbe flows along the S. frontier of the kingdom, for about 80 m . There are a number of lakes, particularly in Jutland and Holstein, and several in the larger islands; but they are all small, none of them exceeding $5 \frac{1}{2} \mathrm{~m}$. in length, by about $1_{\frac{1}{2}} \mathrm{~m}$. broad, and few of them being of more than half that extent. There are four canals, two on the mainland, and one on each of the islands Seeland and Funen. The most remarkable of the physical features of Denmark are its lagoons or fiords, winding inlets of the sea, that penetrate far into the land. The largest of these is the Lymfiord, or Liim Fiord, in Jutland, which, entering the land in the Kattegat, near lat. $57^{\circ}$ N., winds its way nearly through the peninsula, and is separated from the N. Sea merely by a narrow strip of land, which storms have ruptured in one or two places. It expands here and there in its course into large bays, studded with islands, and throws off branches in all directions-the whole forming a series of the most fantastic ramifications. The other more remarkable fiords are Ringkjöbing and Nissim, on the W. coast of Jutland, and Mariager and Rander's Fiord, on the E. coast. Most of the streams, lakes, and coasts of the kingdom are well stockel with fish. Besides these inland seas, the Great Belt separates the large islands of Seeland and Funen, and the Little Belt flows between the latter and the coast of Jutland and Schleswig. Intercourse between the various islands and parts of the kingdom separated from each other by water is necessarily kept up by means of water communication, regular ferries being established at numerous points. Denmark is well supplied with excellent seaports, the most important being Copenhagen, Altona, Glückstadt, Kiel, Flensburg, Aalborg, Aarluus, and Randers.

Climate.-The prevailing characteristic of the climate of Denmark is humidity; it is also remarkably temperate for so northerly a region; both the result of the lowness of the land, and of its proximity to the sea on all sides. The winters are seldom severe, though instances of extreme rigour have occurred, as in 1659 , when the Swedes marched an army on the ice across the Sound; but the cold is not generally very intense, except in the N . of Jutland, where it is greatest. On the other hand, the heats of summer are great, sometimes excessive. The mean temperature of the year is $47^{\circ}$; the mean from November to March ranges from $25^{\circ}$ to $7^{\circ}$, and the extreme cold in January and February reaches $22^{\circ}$ below zero. The mean temperature of $J$ une to the middle of August ranges from $59^{\circ}$ to $73^{\circ}$, and the extreme heat reaches $89^{\circ}$. The shortest day is about $6 \frac{1}{2}$ hours, the longest $17 \frac{1}{2}$. Thunder storms are rare, and of short duration. They occur generally in June and August. Violent winds are frequent, and rains and fogs prevalent; but the climate is, on the whole, favourable to vegetation. A failure of the crops from want of moisture seldom occurs, the loamy soils enduring its absence for a long while without injury, while those of a sandy nature rarely want it for any length of time.

Animal and Vegetable Products.-Horses and cattle are reared in great numbers, and both are excellent. Large flocks of sheep are kept; but rather for the flesh than the wool, which is coarse and short. Swine are also reared to a great extent. Goats and asses are rare. Deer, stags, roes, hares, and a variety of other game, are met with in the royal and other forests, but do not abound anywhere else. Wild fowl-including the eider duck, so famous for its down-are numerous, especially on the islands along the Schleswig coast. Poultry of all kinds are raised, particularly geese. Potatoes, harley, oats, rye, beans, pease, tares, flax, hemp, madder, and
tobaceo are raised; wheat in Lalland and Holstein, and buck wheat in Funen. Among the garden fruits are apples, plums, cherries, pears, and nuts. Few of the great forests with which the country was once covered now remain, having disappeared from want of care, and from wasteful consuinption, Denmark is, in consequence, dependent for her supplies of timber on Norway, Prussia, Russia, and other countries. Government, however, has of late years paid some attention to this source of national wealth, and has taken measures for the protection and better management of the forests. The larger forests are now confined to the E. side of Jutland, to Seeland, and Lauenburg. The principal tree is the beech tree, constituting, perhaps, about four-fifths of all the growing timl er, which consists chiefly of clm and lime. Oak, though once the most abundant kind of tree, now forms but a small portion of the forests of Denmark; and woods entirely of oak are rarely met with. Birch occurs, in single trees only, in the N.E. parts of Seeland, and in Jutland. The alder tree abounds in marshy places, called alder plots; the elm, ash, willow, and aspen are met with only in small numbers, or singly. Pine forests have been lately planted in the N. of Seeland, and in some parts of Jutland. Hazel, hawthorn, and blackthorn grow in the dry districts; and alders, waterelders, and willows of different kinds, in the marshy countries.

Agriculture, Cattle Breeding, \&c.-Although not particularly favoured by nature, Denmark is yet pre-eminently an agricultural country; but improvement is greatly retarded by want of capital, and, in no small degree, by want of energy and industry also, on the part of the cultivators of the soil, by an extremely minute subdivision of property, by oppressive dues and services, and, lastly, by bad roads. Of late years, however, considerable advances have been made in agricultural skill and management, notwithstanding these very serious impediments, particularly in Holstein and Schleswig. The kinds of grain most largely cultivated are barley, rye, wheat, and oats. Barley, the oldest cereal of the nortli, is grown chiefly in Seeland, and in some parts of Jutland, and on the islands of Samsöe and Bornholm. It is largely used in brewing beer, the common beverage of the country, and is manufactured into flour and groats. Rye, the principal product of the soil, is grown throughout the whole peuinsula, in Hoistein and Lauenburg, and in the islands of Funen and Seeland, and some of the islands on the W. coast. From this grain the greater part of the bread used in Denmark is made. Wheat is grown chiefly on the marshes on the E. coasts of Schleswig and Holstein, on the islands of Lalland and Langeland, and on large estates in other quarters of the kingdom. Oats are raised in almost every part of the country; but the best are produced in Jutland. Large quantities of all these grains are exported annually. Buckwheat is cultivated in Jutland, in the central part of the duchies, and in the island of Funen. The quantity produced is sufficient for the demands of the country; but little remains for exportation. The cultivation of rapeseed, which has been found to be a profitable crop, has been greatly improved and extended of late years, especially in the east parts of the duchies. Potatoes, which were introduced into Denmark early in the present century, are now very generally cultivated, the annual produce being estimated a $5,040,000$ tons. Red and white tnrnips are also grown, and various kinds of vegetables in considerable quantity; but horticulture is, on the whole, still in a backward state, especially in Jutland and Seeland. It is otherwise, however, with herbage plants and grasses, which are now carefully cultivated. Beans, pease, and tares are also extensively cultivated through out the whole country, and form an important article of food, little being left for exportation. Flax, hemp, hops, tobacco madder, lavender, and mustard-seed, are grown, but not in suffi cient quantities to supply the home demand; the deficiency being imported from other countries. The places most remarkable for the production of fruit are the islands of Funen and Alsen But cattle-breeding, grazing, and the dairy, engage the greatest share of the farmer's attention in Denmark; 28,000 oxen 7000 cows, and 10,000 calves, besides immense quantities of pork, and smoked or hung beef, being annually exported from the country. A great increase has of late years taken place also in dairy produce, particularly butter, of which 45,584 tons are made annually. Of this quantity, 8624 tons are ex ported. Nearly the half of the butter exported is produced in Holstein; the remainder is supplied by Schleswig and Jut-

DENMARK
and. Considerable quantities of cheese are also exported, chicfly from Holstein and Schleswig. The rearing of horses is on the decline, in consequence, principally, of the greater inducement to cultivate the dairy. The Danish horses have long been famous for their strength, symmetry, docility, and bottom; and are especially adapted for cavalry. The old Danish breed are found chiefly in Jutland. Those from the islands are said to be of Tartar descent, and are small, but strong and active. Private societies have lately been formed for the improvement, or rather restoration, of the Danish lorse, which had been rapidly deteriorating. About 10,000 are exported annually from the mainland, and about 1000 from the islands; the greater part from Funen. Sheep rearing is also on the decline in Denmark, although considerable improvement has of late taken place in this branch of husbandry, particularly as regards the quality of the wool. The rearing of hogs is much attended to; the greatest number are reared in the vicinity of the woods in E. Jutland, and afterwards fattened on the farms of the duchies. About 12,000 are annually exported to Hamburg, while the export of lard amounts to 3087 tons; of which article Jutland produces nearly as much as the duchies. The rearing of bees occupies a large share of attention, particularly in the duchies, and in the island of Funen, and the production of honey and wax is rapidly increasing; of the latter, $88,000 \mathrm{lbs}$. are now exported annually, while, formerly, both honey and wax were imported into the country.

Fisheries.-The fisheries were formerly a more important branch of national industry than now. Two causes liave contributed to this result-the extension of agricultural pursuits, and the decay of the herring fishing, which has fallen off greatly within the last 20 years. In 1828, the cured herrings exported amounted to above 126.000 tons; which, in 1845 , had If windled down to 7560 tons. The quantity now taken hardly suffices for the consumption of the country. The principal fishing ground is between the mouth of the Schlei and the peninsula of Arnis; those of the Liimfiord, and N. parts of the E. coast, being now unimportant. Next to the herring, the turbot, torsk, and salmon are the most abundant sorts of fish. Oyster banksoccur on the E. coast of Jutland, nearits N. extremity, and near the island of Lessöe. Fish ponds were at one time very general over the country, and were profitable, but are now chicfly confined to Holstein. The seal fisheries of Denmark are considerable, the principal station being the island of Anholt.
Manufucturcs.-These are comparatively insignificant, and do not comprise any peculiar or national manufacture. The people themselves have an objection to this species of industry, more particularly to the introduction of new manufactures, in which they cannot be got to engage with the cordiality and energy necessary to the success of such undertakings. Still some advance has been made of late years in the quantity of goods manufactured; but from the inexpertness

market. Almost all other kinds of trade manufactures are confined to the towns. These consist cliefly of furniture, the principal seat of which is Copenhagen ; of tin articles, brassware, combs, saddlery, firearms, needles, and articles of turnery in wood and ivory. There are a considerable number of iron foundries in Dennark, 12 of which are in Copenbagen, some of them extensive establishments. The carding of old woollen rags forms a considerable branch of industry in several towns in Jutland, giving employment to a number of people. The wool thus obtained is mingled with pure wool; and the cloth manufactured from the mixed material finds, on account of its low price, a ready sale in foreign markets. The manufacture of paper is also pretty extensive, and has of late years been greatly improved and extended. Carriages, musical instruments, tobacco, candles, hoth wax and tallow, and soap, are amongst the principal manufactures of Denmark. There are also a number of thriving sugar refineries in Jutland, Schleswig, and Holstein. Glass is manufactured to some extent, but the finer wares in that material are inporled. There are some extensive tanneries, some brandy distilleries, chiefly confined to the towns, and some inconsiderable manufactures of carpets, hats, oil cloth, watches, philosophical instruments, paper-hangings, \&c. Amongst the artistic trades are typecasting, wood-cutting, die-sinking, copperplate-engraving, and printing. The people of Denmark bake their own bread, brew their own beer, and spin the greatest portion of the woollen yarn, afterwards knitted into stockings or woven into cloth by the village weaver. The women make up their own dresses, and frequently those of their husbands; the latter make the wooden shoes and slippers, and manufacture the greater part of the house furniture and farming utensils. Several of the manufacturing establishments of Denmark belong to the Government, and are carried on on its account ; but, as might be expected, with so little success that they are being abandoned one after another. Amongst these establishments are a royal porcelain manufactory in Copenhagen, and a royal cloth manufactory in Irsseröd, which supplies cloth for the army.

Trade and Commerce.-The chief imports are iron, timber, coals, wine, salt, tobacco, coffec, tea, and sugar. What is exported, and in what quantities, with the total value of the exports and imports, may be seen in the following tables:- of the workmen, and other causes, the Danes are unable to compete in lowness of price with the foreign manufacturer, though they can equal him, in some instances, in point of quality. Although, as already mentioned, Denmark has no peculiar manufactures, there are one or two articles which have attained a considerable reputation; these are the woollens and earthenwares of Jutland, the former a domestic manufacture; the wooden clocks of Bornholm, and a superior kind of stove made in Copenhagen. Randers in Jutland, and Odensee in the island of Funen, were formerly celebrated for the manufacture of gloves; but the peculiar kind of leather from which they were made, and in which their excellence consisted, is now prepared in other countries. The domestic manufactures of Denmark include yarns, knitted and woven woollen goods, linen fabrics, earthenwares, wooden shoes, \&c. The knitted woollen jackets of Jutland were sent in great quantities to Copenhagen, whence they were exported to various countries, particularly to the States of America. until the operation of a new tariff excluded them from that

Canals and Railroads.-There are altogether four canals in Denmark, two on the mainland, and one in each of the islands of Seeland and Funen. The Schleswig and Holstein Canal is between Kiel Fiord, at a point 3 m . N. of the town of that name, and Rendsburg, on the Eyder, where it joins that river, and thus communicates with the North Sea. It is 10 ft .
deep, 100 ft . broad at the surface, 44 at the bottom, and is about 18 m . long. About 2500 vessels pass through this canal annually, of which one-half are under foreign flags. The Steckenitz Canal, one of the oldest in Europe, connects the Elbe with the Trave, joining the former above Lauenburg, and the latter above Liibeck. Its general breadth is about 17 yards, but so shallow that it will not carry vessels drawing more than 4 or 5 ft . water, and so inadequately supplied with water, that it is navigable only twice or thrice a week. The canal in Funen connects Odensee with the sea, and that in Seeland forms a communication between the lake Bavelse and the Baltic. There are two railroads; one on the mainland, from Altona to Kiel, with branches to Glücktadt and Rendsburg; and one on the island of Seeland, from Copenhagen to Roeskilde, to be continued to the Great Belt.

Monies, Weights, \&c.-The current money of Denmark consists of the specie dollar $=4 \mathrm{~s} .6 \mathrm{~d} . ;$ the Rigsbank dollar $=2 s .3 d$. ; the mark $=4 \frac{1}{2} d$.; the skilling $=$ about $\frac{1}{4} \mathrm{~d}$. Accounts are kept in the last three, one Rigsbank dollar being equal to six marks, and one mark equal to sixteen skillings. Paper dollars are in extensive use. The commercial pound weight is heavier than the English weight of that denomination, 100 lbs . Danish being equal to $110 \frac{1}{4} \mathrm{lbs}$. avoirdupois. The principal measure used throughout Denmark for corn is the barrel or toende, which contains 7776 Danish cubic inches or 8488 English cubic inches, and consequently is equal to nearly 4 bushels. The viertel, used for wine and liquor, is equal to 2.041 English gallons. The long measure is the Rhineland foot, which equals 12-356 English inches. The Danish mile is 4.684 English miles. Sixteen Danish sq. ft. are nearly equal to 17 English sq. ft. A tonne or toende of hard corn is as much land as can be sown with one toende of rye, one of barley, or two of oats.

People, Ranks of Society, Manners, \&c.-The population of Denmark is composed of Danes, Germans, Frises, and Angles, with some 70,000 or 80,000 Jews, Negroes, Hindoos, and Esquimaux. The Danes occupy the islands, Jutland, and a small part of Schleswig. They have regular and well formed features, fair or brownish hair, and blue eyes, with muscular frames; they are kind-hearted, honest, and simple-minded, and continue to maintain their ancient reputation of being bold and hardy seamen; the vast number of islands of which the kingdom consists, and the numerous sea-arms intersecting its continental portion, necessitating a certain amount of acquaintance with seafaring in a large proportion of the agriculturists, tends materially to keep up the maritime spirit. The German population is settled in Holstein, Lauenburg, and the greater part of Schleswig. The Frises and Angles, two German tribes, inhabit the W. coast of Schleswig and the islands of the German Ocean. The Jews, who are of German descent, are confined to Copenhagen, Altona, and a few other towns. The inhabitants of Denmark have been divided into five classes-the nobility, who have privileged fiefs in the kingdom, from which they derive their nobility; the titular nobility, which includes the orders of knighthood of the Elephant and of Dannebrog, counts, barons, and the higher officers of state; the inferior clergy, lawyers, and students; the merchants and citizens of great towns; the seamen and population engaged in agriculture. The nobility and gentry are addicted to display in their style of living, and are remarkable for their hospitality, which is, indeed, a characteristic of the nation. The food of the lower classes consists chiefly of oat-cakes, rye-bread, fish, and cheese; but the tables of the wealthier classes are spread with all kinds of lnxuries. The language is Danish, a mixed Scandinavia and Teutonic dialect, spoken by two-thirds of the inhabitants, and almost exclusively in the islands and in Jutland; German spoken by the remaining third of the inhabitants, and over Schleswig, Holstein and Lauenburg. In some of the S. localities Frisian is spoken.

Government, Laws, Religion, de.-The government of Denmark was originally an elective monarchy, the right of election being vested in the three estates, the nobles, the clergy, and the commons. But in this arrangement the nobles retained and exercised a power prejudicial to the interests of the state, and offensive to the people. Taking advantage of the popular discontent thus occasioned, the partisans of the Crown succeeded, in 1660, in prevailing on the deputies of the clergy and commons to make the crown hereditary, and thus circum-
scribe the influence of the nobles. This proceeding was followed, in 1661, by the Act of Sovereignty, which conferred absolute power on the monarch. The power thus conferred had long been used with singular moderation ; but in 1848, when, consequent on the sudden changes in France, almost the whole continent of Europe was convulsed, the Danish constitution was greatly modified, and now belongs to the class of hereditary constitutional monarchies. By a charter finally adopted by the King and diet, June 5, 1849, it is declared that the executive power is in the King alone; the legislative, in the King and diet jointly. The person of the King is inviolable, but he rules by a responsible ministry. He must be a member of the evangelical Lutheran church, which is declared to be the religion of the state. The diet consists of the Landesthing and the Volksthing-the former a kind of senate or upper house, and the latter a house of commons. To the Landesthing any male subject is eligible who is 41 years of age, does not labour under mental incapacity, and either pays 200 rixdollars ( $£ 22,148.2 d$. ) of direct taxes, or enjoys a yearly income of 1200 rixdollars ( $£ 136,5 \mathrm{~s}$.) To the Volksthing any male householder, 25 years of age, is eligible, provided he does not labour under any incapacity which would deprive him of the right of voting. This right is the same in regard both to the Landesthing and the Volksthing, and belongs to every householder who has reached his 30th year, who is not in the actual receipt of public charity, or who, if he has at any former time been in the receipt of it, has repaid the sums so received, and who does not labour under mental incapacity. The members of the Landesthing hold their seats for eight, and those of the Volksthing for three years. The diets meet annually on the first Monday of October, provided the King does not summon them on an earlier day. The duchies of Schleswig and Holstein have reserved their own separate institutions and laws; and several districts and towns have their own peculiar provincial laws. The laws of Denmark are equitable, brief, and explicit, and their administration prompt and effective. In 1795, tribunals of conciliation were established, with the view, as the name implies, of reconciling parties by amicable arrangement, without going into court, and in the great majority of cases the mediation is successful.

The Lutheran is the established religion, but unlimited toleration is extended to every sect, including the Jews, who, by a decree of March 29,1814 , were admitted to an eqnal participation of civil rights, in regard to the exercise of trades, \&c., with the other subjects of the state; but, though electors, they cannot themselves be elected as representatives of any class. The bishops are nominated by the Crown. The subordinate clergy amount in number to between 1500 and 1600 .

Education, Literature, Art, and Science. - Few countries in proportion to their size have done so much for education, literature, and art, as Denmark. At the head of the edncational institutions stand the university of Copenhagen, and the Holberg academy at Soröe. In the 64 provincial towns, are 20 schools , in which the learned languages are taught, and 130 town, free, and upper general schools, besides a number of private establishments; in the country are 2504 common schools or Volks-schulen. For the formation of teachers their are five normal schools. Education is very generally diffused, and the fondness for reading which prevails, is attested not only by the great number of parochial and other associations for the purpose of procuring works in the various branches of literature, and lending them out among the members, but also by the number of books which individuals in the humblest walks of life, both in town and country, manage to collect for their own private use. The literature of Denmark is not much known in the other countries of Europe, but contains the names of several writers of eminence. Among others may be mentioned Oehlenschläger, whose reputation, as a dramatic writer, stands high not only in Denmark, but also in Germany; Ingemann, who has had considerable success as a novelist; Baggesen, who has written voluminously and well, both in Danish and German ; and Hans Christian Andersen, whose delightful tales are well known in this country through the medium of translations. In science, Denmark early attained considerable eminence in the person of Tycho Brahe, and still continus to maintain a high reputation in various departments of scientific inquiry. In art, Thorswaldsen has given her a first place, and taken the most
cffectual as well as patriotic means of enabling her to keep it, by the bequest of his works, by the study of which a succession of worthy followers is in course of being trained.

Army and Navy.-The land force of Denmark, in time of peace, consists of $25,000 \mathrm{men}$, in time of war increased to 75,169 . The army is recruited by conscription. The period of service is eight years, commencing with the 20 th year of the recruit's age, four years in the line, and four in the reserve. After this period, they serve for other eight years in the class called Festmannen, similar to the Prussian Landwehr, and are subsequently enrolled in the reserve force, in which they remain till the termination of their 45 th year. The regular troops in the W. India colonies amount to about 300 men. The navy consista of six ships of the line, of 84 guns each, and one of 66 guns; seven frigates of 40 and 48 guns, four corvettes of 20 and 28 guns, five brigs of from 12 to 16 guns, with several smaller vessels, and a number of bomb-boats.

Finances. - The revenue of the kingdom amounted, in 1846 , to $£ 1,800,950$, and the expenditure to $£ 1,792,693$, leaving a balance in tavour of the former of $£ 33,110$. The national debt amounted, on Jan. 1, 1844, to $£ 12,513,222$, being less than it was some years formerly; but in 1850 it amounted to $£ 12,600,000$. The principal branches of revenue are the land tax, and the customs and excise. Next to these are the woods and forests, and other Crown property, house tax, lotteries, and tax upon rank and salaries, \&c. The annual cost of maintaining the army and navy is $£ 441,555$.

History.-The three kingdoms of Denmark, Sweden, and Norway, were anciently called Scandinavia. At this remote period, Denmark was divided inte a number of petty states, inlabited by a fierce and warlike people, whose principal occupation was piracy. On the decline of the Romans, the Danes, Swedes, and Norwegians, under the general name of Normans, began to make themselves known to and dreaded by the more southern nations, whose territories they invaded and plundered. In 832, they landed in England, and there established two kingdoms. Two centuries afterwards, Canute, King of Denmark, completed the conquest of England, and subducd a part of scotland. He also introduced the Christian religion into his dominions, and thus effected a great change in the general character of his people. Canute died in 1036, leaving a powerful kingdom to his successors. After the extinction of the princes of the family of Skiold, the Danes elected Christian I., Count of Oldenburg, in 1448. This Christian was the founder of the royal Danish liamily, which has ever since kept posscssion of the throne, and from which, in modern times, Kussia, Sweden, and Oldenburg, have received their rulers. He connected Norway, Schleswig, and Holstein, with the crown of Denmark. In 1726, Denmark united with the crown the county of Rantzau; in 1761, Hol-stein-Plön; and, in 1773, Holstein-Gottorp. In return for the latter, by a treaty with Russia, it ceded the counties of Oldenburg and Dehmenhorst, which were acquired in 1667. Denmark, siding with Napoleon during the continental war, had her capital bombarded by the British in 1807, and her territory occupied after the battle of Leipzig, in 1813, by the Northern powers, who were united against France. She now concluded a peace with England and Sweden, January 14, 1814, at Kiel; entered into an alliance against France, and contributed a body of troops to the allied forces. She was obliged to cede Heligoland to Great Britain (receiving in exchange the W. India Islands), and Norway to Sweden (for which she was compensated by Swedish Pomerania and Rï. gen). A peace was concluded with Russia in February, 1814. January 14, 1815, Denmark ceded Swedish Poinerania and Rügen to Prussia, and received for them Lauenburg and a pecuniary compensation. June 8, 1815, the king entered into the German confederacy with Holsteln and Lauenburg, and reccived in it the tenth place, and three votes in the general assembly (the plenum); after which, by the appointment of a decemviral commission, preliminary measures were taken to introduce a representative government into Molstein. In March 1848, the duchies of Schleswig and Holstein revolted from Denmark, ostensibly in consequence of its having been proposed in a new constitution submitted by the King, dated January 28,1848 , that the representatives of the duchies should act with the representatives of Denmark, the people, mostly German in their language and predilections, being
desirous rather of joining the new German empire; but the real question at issue was one of succession, the King of Prussia and several of the powers composing part of the Germanic Confederation alleging that the duchies of Schleswig and Holstein, which had hitherto been regarded as important portions of the kingdom of Denmark, were 'male fiefs' and did not admit of the succession of 'females.' On this plea, which had for its ultimate object the separation of the duchies from Denmark, by preventing the former from descending along with the latter to a queen, the powers above named invaded Denmark, and a series of hostilities was the result, highly ereditable to Danish skill and prowess, though often of a very sanguinary character. But, in July 1849, a treaty of peace was signed by the King of Prussia and the Germanic Confederation on the one part, and the King of Denmark on the other, which terminated the interference of the former in the quarrel. The duchies, however, continued the contest on their own account, until defeated at the battle of Idstedt, fought on July 25,1850 , when they finally submitted to the authority of their Soverign, the King of Denmark. - (Baggesen's Dänische Staat; Journal of the Statistical Society; Foreign Quarterly; Macgregor's Commercial Statistics, \&c.)

DENN, par. Irel. Cavan; 11,600 ac. Pop. 6696.
DENNENI'T'Z, a vil. Prussia, gov. Potsdam, dist. of, and 4 m . W. Jiiterbok. It contains a church, and is memorable for the victory gained here, in 1813, by the Prussians, Swedes, and Russians, under King Bernadotte, over the French, under Marshail Ney. A monument marks the spot. 1'op. 220.

DENNINGT(ON, par. Eng. Suffolk ; 2840 ac. Pop. 979.
DENNIS (St.), par. Eng. Cornwall; 3370 ac. Pop. (1851), 888.

DENNY, a par. and small tn. Scotland, co. Stirling. The PARISH, which presents great variety of soil, is nearly 6 m . long, by 4 m . broad; area about 9000 ac.-The Town, situate 7 m. S. Stirling, r. bank, Carron, near the Scottish Central Railway, is somewhat irregularly built; but the houses, mostly of two stories, have a substantial and respectable appearance. It has an Established, a Free, and a United Presbyterian church ; a parochial school, and library, and a number of benevolent societies. It is a thriving place, being surrounded by irills and manufactories of various descriptions, including oat-meal and barley mills, paper-mills, one for crushing dye-staffs, and several for spinning wool. The wool len manufacture is extensivaly carried on for Glasgow houses, the principal articles being fancy shawls, linsey-woolseys, and tartans. In the vicinity are also several bleachfields, and printworks. The traffic of the town is considerable, and it has two fairs annually. Pop. (1851), 4753.

DEN'T, a vil. and parochial chapelry, England co. York, (W. Riding), the former 60 m . N.W. York. It has an ancient chapel with a tower, places of worship for Primitive, and Wesleyan Methodists; a meeting house for the Society of Friends, a free grammar school, and a national school. The manufacture of woollen stockings was formerly carried on here to a great extent, but has of late years entircly disap. peared. Cattle fairs are held fortnightly, from February 13, to May 12. Pop. 1857.

DEN'TA, or Gyentya, a market tn. Hungary, Thither Danube, co. of, and $30 \mathrm{~m} . \mathrm{S}$. Temesvar, on the Bezava. It contains a Greek non-united church, and las a weekly market and several annual fairs. Rice is grown in the district. Pop. 5110.

DENTILLA, a small state, Senegambia, between the rivers Gambia and Falemé, and S. of Bondou. It is extremely mountainous, and abounds in iron.

DENTON, a vil. and chapelry, England, co. Lancaster, 5 m . S.E. Manchester. The manufacture of hats is carried on on a large scale. l'op. 3440.

DENTON, several pars. Eng.:-1, IIuntingdon ; 890 ac. Pop. 97.-2, Kent; 1160 ac. Pop. 208.-3, Kent; 660 ac. Pop. 148. -4, Lincoln ; 2730 ac. Pop. 626.-5, Norfolk; 2370 ac. Pop. 625.-6, Northampton; 1970 ac. Pop. 557. -7, Snssex ; 890 ac. Pop. 120.-8, (-Nether), Cumberland; 4530 ac. Pop. 280.-9, (-Upper) Cumberland; 860 ac. Pop. 127.

D'ENTRECASTEAUX.-1, A channel formed between the S.E. cape of Van Diemen's Land, and Bruny Island. It is about 40 m . in length, in a N.E. and N. N.E. direction, having
several bays and harbours on the E. side, and two on the W. Mussel bay, and Recherche bay, wherc ships may be sheltered from nearly all winds. The strait affords anchorage in many places, in from 20 to 8 or 6 fathoms. There are several isles in it, but not many hidden daugers.-2, D'Entrecasteaux isles, S.S.W. Papua, in about lat. $10^{\circ} \mathrm{S} . ;$ and lon. $150^{\circ} 30^{\prime}$ E. They are yet but little known.- 3, A point, W. Australia, co. Lanark; lat. $34^{\circ} 43^{\prime}$ S.; lon. $116^{\circ}$ E. Heavy breakers here and all along this coast for a considerable distance E. and W. of this point.

DENVER, par. Eng. Norfolk; 2610 ac. Pop. 910.
DENZLINGEN, a vil. Baden, circle, Upper Rhine, bail. of, and 4 m . S. Emmendingen. It is a long straggling place, and hence sometimes takes the name of Langendenzlingen [Long Denzlingen]. It contains a parish church, and two chapels, and has several mills. Pop. 1461.

DEOGHUR, a place of great sanctity, Hindoostan, at the N.W. extremity of Bengal, dist. Beerbhoom; lat. $24^{\circ} 32^{\prime}$ N.; lon. $86^{\circ} 40^{\prime} \mathrm{E}$. At a particular season of the year it is thronged by pilgrims of both sexes, upon each of whom a small tax is levied by the Government.

DEOLS, or Boura-Dieu [anc. Dolum], a tn. France, dep. Indre, $1 \frac{1}{2} \mathrm{~m}$. N.N.E. Châteauroux, on a kind of peninsula formed by the Indre and Angolin. The town is said to be of Roman origin, and even its present dilapidation attests its former extent and importance. A ruincd castle, still to be seen, was long the chief stronghold. Deols has some trade in wool. Pop. 2180.

DEOPHAM, par. Eng. Norfolk; 1520 ac. Pop. 525.
DEOTSUH, an elevated table land, Little Tibet, S. of the valley of Iskardo; lat. $34^{\circ} 30^{\prime} \mathrm{N}$.; lon. $75^{\circ} 20^{\prime} \mathrm{E}$. It is about 30 m . long, and 15 m . broad; $12,000 \mathrm{ft}$. above sea level, and uninhabitable in winter on account of the excessive cold.

DEPDEN, par. Eng. Suffolk; 2000 ac. Pop. 345.
DEPEYSTER ISLANDS, a group of about 17 isls. S. Pacific Ocean; lat. $8^{\circ} 4^{\prime} \mathrm{S}$.; lon. $178^{\circ} 29^{\prime}$ E. (R.) One of them is of considerable size, the others are small and low. Few of the natives are above the middle size; their skin is rough and coarse to the touch; they are tattooed, and wear mats made of the pandanus leaf, the fringes of which are all dyed of various colours, while the mat itself is ornamented with large coloured patterns, some in squares, others in diamond forms, producing at a little distance a pretty effect. In all, the lobe of the ear is bored, and distended to the size of an inch in diameter; around the orifice small rings of tortoise shell are inserted, so neatly made that the place where they are joined cannot be discerned. One female only was seen by commander Wilks, who describes her as being prepossessing in her appearance, with a pleasing expression of countenance, and a modest demeanour, her arms beautifully tattooed.

DEPTFORD, a tn. and naval arsenal, England, cos. Kent and Surrey, r. bank, Thames, 4 m . E. London, at the mouth of the Ravensbourne. It is irregularly built, but paved and lighted with gas, and well supplied with water. It has two parish churches and several dissenting chapels; also two free schools, a dispensary, a savings'-bank, a mechanics' institute, and two hospitals belonging to the Trinity House corporation, one of which was founded in the time of Henry VIII. The pensioners in both these hospitals consist of decayed pilots and masters of ships, or their widows. The dockyards, for which Deptford is so celebrated, were established by Henry VIII. They comprise a space of 31 ac., within which are large workshops of all descriptions requisite for fitting out ships of war, several ranges of storehouses, and the victualling office. The manufactures include anchors and steam engines for the merchant service, pottery, ropes, and soap. Deptford unites with Greenwich, Woolwich, Chorlton, and Plumstead, in returning two members to the House of Commons. In Sayes Court, the mansion of the Evelyns, the Czar, Peter the Great, resided, while studying naval architecture in the dockyard. Pop. 23,165.

DEPTFORD (St. Paul). par. Eng. Surrey; 640 ac. Pop. 18,626.

DEPUCH, an isl., N.W. coast, Australia ; lat. $20^{\circ} 38^{\prime} 24^{\prime \prime}$ S.; lon. $117^{\circ} 46^{\prime}$ E. (R.); of a circular form, nearly 8 m . in circumference, its most elevated summit 514 ft . above sea-level. It is composed of a vast pile of large blocks of greenstone, beaped up in rugged and irregular masses, with small inter-
vals covered with a slight sprinkling of soil, that nourishes a few stunted gum trees, shrubs, and a coarse, wiry grass. On the N.E. side of the island, there is a very good and wellsheltered anchorage off the sandy beach. The flat surfaces of the rocks of this island are covered with representations of animals, birds, \&c., executed by the natives, who would appear to have been in the practice of exercising this art in this particular place from time immemorial. The method pursued in tracing the different subjects, appears to be by cutting the surface of the rock with sharp-pointed pieces of the same stone; and, as the exterior of all parts of it is of a dark red-dish-brown colour, the contrast becomes great when that is removed, and the natural colour of the greenstone exposed. Many of these representations exhibit more talent and observation than is usually allowed to be possessed by the natives of Australia.

DERA FATI KHAN, a tn. Afghanistan, Damaun, near r. bank, Indus; lat. $31^{\circ} 7^{\prime} \mathrm{N}$. ; lon. $70^{\circ} 52^{\prime} \mathbf{E}$. It is clean, has a well-supplied bazaar, and is altogether a thriving place. The vicinity produces cotton, grain of various kinds, indigo, and some sugar and opium. Pop. 5000.

DERA GHAZEE KHAN, an inland $t n$. Afghanistan, in a low, alluvial tract, r. bank, Indus, and at the distance of about 4 m . from that river; lat. $30^{\circ} 5^{\prime} \mathrm{N}$. ; lon. $70^{\circ} 48^{\prime} \mathrm{E}$.; 40 m . S.W. from the city of Mooltan. It is a large, populous, and commercial place, though ill built and dirty. The bazaar contains 1600 shops, a great portion of the inmates of which are engaged in weaving and selling cloth. There are here manufactures of silk, cotton, and mixed fabrics of silk and cotton, called loongees, also coarse cutlery. The entire value of all these manufactures is estimated at 200,000 rupees $(£ 20,000)$ annually. The town contains numerous ruins of mosques. The surrounding country is unhealthy during the hot season, but fertile, producing excellent fruits in great abundance, also sugar, cotton, and indigo. Pop. about 25,000, of which nearly one-half are Hindoos, the rest Mahometans.

DERA ISMAEL KHAN, an inland tn . Afghanistan, r. bank, Indus, 128 m . N. from Dera Ghazee Khan; lat. $31^{\circ} 50^{\prime} \mathrm{N}$. ; lon. $70^{\circ} 58^{\prime} \mathrm{E}$. It is well laid out, but ill bailt of unburnt brick. It has an extensive trade in white cotton cloth, grain, and salt. Pop. 8000.

DERABUND, or Drabund, a small tn. Afghanistan, Damaun, 30 m. S.W. Dera Ismael Khan ; lat. $31^{\circ} 45^{\prime} \mathrm{N}$.; lon. $70^{\circ} 32^{\prime}$ E.; the place of rendezvous of the Lohani and other caravans. It contains some large old houses and a small bazaar ; the former are deserted by their Hindoo owners, and are now in a state of decay. The neighbourhood is agreeable, but the heat is very great.

DERAH, or Derahi, a large vil. Persia, Khorassan, 7 m . S.S.E. Beerjoon, on the S. base of a bare limestone hill, surmounted by a ruinous fort, with a few gardens and corn fields; but the chief produce of the vicinity, though but scanty, is cotton and turnips, which last forms the principal article of food of the inhabitants for many months. There is a great abundance of large game in the neighbourhood, especially wild asses. Asafoctida grows in considerable quantities both on the hills and in the plain.

DERBEND, or Derbent, an anc. and decayed city, Russia, the most important in Daghestan, W. shore of the Caspian Sea ; lat. $41^{\circ} 52^{\prime}$ N.; lon. $48^{\circ} 58^{\prime} \mathrm{E}$. It is in the form of a parallelogram, about 3 m . long by $\frac{1}{2} \mathrm{~m}$. broad, pleasantly situated on a declivity, rising gradually from the margin of the sea. It is surrounded by strong walls, built of large square stones, some of them cubes of 6 ft . The streets are very narrow, and the houses almost universally of one story, with a terraced roof. On the suminit of the hill, on the declivity of which the city stands, there is a fort or citadel, of a triangular figure. Little trade is carried on here, owing to the poverty of the surrounding countries, and the shallow harbour, but a great quantity of saffron is grown in the vicinity, in which there are also many fine gardens; and the inhabitants prepare rose-water, opium, and manufacture copper and iron vessels, and sell woollen stuffs. Derbend was for many centuries considered the key of the Persian empire in this quarter. The inhabitants consist of Georgians, Armenians, and Jews. Pop. (1842), 10,713.

DERBY, a central co. England, having N. York, E. Nottingham, S. Warwick and Leicester, and W. Stafford and Chester: greatest length, N. to S., 55 m. ; breadth, generally
from 15 to 20 and 25 m .; area, $1028 \mathrm{sq} . \mathrm{m} .$, or 657,920 ac. 'The S. and S.E. parts of the county are level or slightly undulating, and are for the most part fertile and well cultivated. N. of Belper commences a range of hills which pervades all the N. portion of the county, and forms the commencement of the great central range, which continues $N$. to the borders of Scotland. Thongh presenting no remarkable elevations, the highest not much exceeding 1800 ft ., the hilly part of the county, called the High Peak, is remarkable for the romantic beauty of its scenery. Some of the higher regions here have a bleak and barren appearance, but the dales and valleys are singularly beautiful, presenting the pleasing combinations of clear streams, verdant meadows, and luxuriant foliage, enclosed by roeky heights, which improve the general effect by force of contrast. The principal rivers are the Derwent, the Trent, and the Dove; the latter remarkable for the beauty of its scenery, and for the clear blue tint of its waters. The other lesser streams are the Wye, the Erwash, and the Rother. The climate is, on the whole, healthful, though somewhat cold and bleak in the higher districts. In the $\mathbf{S}$. and E. parts most kinds of grain are grown, particularly wheat and barley; beans also are raised in considerable quantities. Oats are the principal crop in the N. and hilly districts, but the land there is mostly in pasture ; and, both in the N. and S., dairy husbandry is carried on to a large extent, upwards of 2000 tons of cheese being annually sold out of the county. In the High Peak considerable numbers of sheep are reared, of a small size. The horses of the N. parts are of a different breed from those of the S.; the latter being strong and heavy, while the former are light and slender, and are much employed in the Peak for carrying limestone, their agility in ascending and descending the steep mountains being remarkable.

Derbyshiro is singularly rich in minerals ; coal, lead, iron, gypsum, and marble are wrought to a great extent. Zine and copper are also found, but in comparatively small quantity. The coal field is calculated to extend to $190,000 \mathrm{ac}$. In various parts of both the Iligh and Low Peak, a beautiful calcareous marble, black and variously coloured, is obtained. The fluor spar, for which the county is so famous, abounds most in the neighbourhood of Castleton, a locality also noted for its caverns. It is found suspended round the sides and tops of the limestone caverns, in a variety of fantastic forms, and is fashioned into numerous ornamental articles. Small detached crystals, called Derbyshire dianonds, specimens of chalcedony, jasper, terra-vert are found, and more rarely onyxes. In the mountainous districts, tepid mineral springs are numerous; the most celebrated are those of Matlock, Buxton, and Bakewell. There are also caleareous springs, which incrust wood and other substances immersed in them. The manufactures of Derbyshire are very considerable, especially of silk and cotton; the chief seat of the latter being the parish of Glossop, in which are more than half the mills in the county. There are numerous factories for the weaving and printing of calico, some bleaching grounds, and factories for weaving cambric, fustian, muslin, and tape, and for making candle wieks. Machinery, stocking frames, and acricultural implements, are also largely manufactured. There are also numerous tanyards and paper-mills in different parts of the county. Ifats are made for exportation, and a superior poreelain is manufactured at Derby. The county is intersected by numerous canals and railways; the principal of the former is the Trent and Mersey Canal, the latter comprise the Birmingham and Derby Grand Junction Railway, the North Midland Railway, and the Midland Counties Railway.

Derbyshire is divided into six hundreds and 134 parishes, and returns six members to Parliament-four for the county, and two for the borough. Constituency for the county ( 1851 ), N. division, 5393 ; S. division, 6969 ; total, 12,362. Pop. (1841), 272,217; (1851), 296,084.

DERBY, an anc. bor. and market tn. England, cap. above co., r. bark, Derwent, here crossed by an elegant bridge of tliree arches, 110 m . N.N.W. London, and 60 m . S.S.E. Manchester. It is pleasantly situated in a wide and fertile valley, open to the S., and, where modern, is well and regularly built; but in the older quarters the strects are narrow and winding. All of them, however, are clean, well paved, and well lighted; and to the old market, a rew one communieating with it, and very commodions, has recently been added. Most of the private houses are of red brick; the public edifices are of
stone. Of these the most important are the church of All Saints, on the E. side of the town, near the river, a large and handsome edifice, in Roman Doric, light and airy in the interior, which contains some interesting monuments, and has a beautiful screen of rich open ironwork, and surmounted by a beautiful pinnacled tower, erected in the latest style of gothic about the time of Henry VIII., and nearly 180 ft . high; the church of St. Alkınund, of florid gothic, with a tower at the W. end, terminating in a beautiful spire 207 ft . high; the church of St . Werburgh, consisting of a nave, chancel, and aisles in the Tuscan style, with a fine gothic tower, and good organ; the chureh of St. John's, an ancient gothic structure, with square embattled tower; four other handsome Established churches, the R. Catholic church, one of the most imposing structures of the town, erected in 1838 at a cost of $£ 7000$; the townhall, a handsome edifice, with a bell tower; the county hall, assembly rooms, theatre, the infirmary, and jail, the last well arranged, and provided with every convenience for classifying the prisoners. In addition to the churches already named, the Wesleyan Methodists have three, the Primitive Methodists two, the Independents two, and the New Connexion Methodists, Baptists, General Baptists, Quakers, Unitarians, and New Jcrusalemites, one each. The principal educational establishments are-the free gram-mar-school, one of the oldest endowments in the kingdom, and having 10 exhibitions to Emmanuel college, Oxford; six national, and several British schools, a diocesan, a Wesleyan Methodist, and two infant schools. A handsome building has been recently erected for a normal female school. There is also a town and county library. The benevolent institutions include a number of almshouses and hospitals. One of the most valuable possessions of Derby is its arboretum, which it owes to the munificence of its citizen, Joseph Strutt. It originally covered 11 acres of ground, to which 5 additional acres have since been added, and has been tastefully laid out in walks, and planted with trees and shrubs, so as to combine instruction with amusement. Free access is secured to the public at least twice a week, and to the subscribers of a small amount at all times. Derby is well situated both for manufactures and trade. The Markeaton, a small stream which traverses the town, and is crossed by numerous bridges, furnishes valuable water power; a canal, recently opened, gives a navigable communication with the Trent and Mersey; and three important railways, the Derby and Birmingham, the Midland Counties, and North Midland, have here a common station, which is one of the most extensive in the kingdom.

The principal manufactures of Derby are silk, poreelain, carriages, jewellery, and ornamental articles made of the various kinds of spar found in the county, particularly of the fluor spar called 'blue John,' red and white lead, lead pipe, sheet lead, cast iron, ribbed stockings, bobbin-net, and other lace. There are also several printing and publishing establishments. Silk throwing, introduced into Derby at the beginning of last century by a mechanic named Lombe, who brought the art from Italy, is still carried on here to a great extent. Tho weaving of piece-goods in silk was introduced about 1823 or 1824. Since then, sarsanets, gros-de-naples, and other rich silks of superior quality, continue to be manufactured to such an extent, that silk tissues have become the staple of the town. The working of lace by machinery is also a thriving business. A few years since there were 200 lace-machines at work in the town, and 17 silk mills. The porcelain or china manufacture was introduced about the year 1750 , and has since attained a degree of excellence unsurpassed anywhere else, either as to fineness of material or brillancy of colouring. It is now, however, in a somewhat declining state. The spar mannfactories are curious and interesting. There are also a patent shot manufactory, some extensive foundries, and iron and tin forges, where malleable iron bars, sheet-plates, tinplates, \&c., are formed and manufactured into steam-boilers, gasometers, \&c. The materials for the lead works are brought from the Peak hills. Derby has four weekly markets and nine annual fairs; is the seat both of county and borough courts, and possesses a philosophical and agricultural society, a mechanies' institute, athenæum, \&c. It is one of the oldest towns in the kingdom, and is supposed to owe its origin to a Roman station, Derventio, situated at Little Chester, on the opposite side of the river, where the foundations of a Roman bridge still exist, and various coins and other antiquities have
been found. In the time of the Saxons it was called Nor worthige, and under the Danes took that of Deoraby, which, with a slight change, it still retains. Among its natives are Dr. Linacre, by whom the London College of Physicians was founded; William Hutton, the antiquarian and topographer; and Richardson, the novelist. Parker, who afterwards rose to be Lord Chancellor and first Earl of Macclesfield, commenced life here as an attorney. Derby returns two members to parliament ; constituency (1850), 2194. P. (1841), 32,741.

DERBY HAVEN, a vil. England, Isle of Man, $2 \frac{1}{2} \mathrm{~m}$. N.E. Castleton. It has an excellent and commodious harbour.

DERECSKE, several places, Hungary, particularly:-1, A market tn., co. Bihar. It contains a Protestant and a R. Catholic church. In the neighbourhood are four lakes, from which, by the evaporation of the water in summer, a good deal of soda is obtained; and another lake called Fingoto, celebrated from the earliest times for its baths. In the same locality pearls are found, which, though small, are equal in beauty to those of the East. Pop. 5320.-2, A vil. Hither Theiss, co. Heves, about 15 m. W.N.W. Erlau. It was fonnded by a colony of Bohemians, and contains an elegant chateau. Pop. 1067.

DEREHAM (EASt), a market tn. and par. England, co. Norfolk. The town, beautifully situated on a rivulet, nearly in the centre of the county, $16 \mathrm{~m} . \mathrm{N}$. W. Norwich, is now considered one of the handsomest market towns in Norfolk, although at one time one of the dirtiest, and still very indifferently drained. It consists chiefly of a spacious marketplace, and three long, straight, and well-kept streets, lined with handsome houses and shops; well paved, lighted with gas, and amply supplied with water. It has assembly rooms, and a neat little theatre. In the church, which is an ancient structure, in the collegiate style, with a tower in the centre, the remains of Cowper the poet were buried in 1800. There are, besides, places of worship for Independents, Wesleyans, and Baptists; a national, British, and other schools; and several friendly and benevolent societies. There are several brewers and maltsters, a sack manufactory, and two ironfoundries. The making of mill machinery, agricultural implements, and carriage building are also amongst the trades of the place; while a brisk traffic is carried on in cattle, pigs, and corn, especially on market days. Market day, Friday; fairs in July and September. There is a station here on the Eastern Counties Railway. Derehain was nearly destroyed by fire in July 1581, and again in the reign of Charles II.-The PARISH contains 5550 ac . of fertile and highly cultivated land. Pop. (1841), 3834.-(Local Correspondent.)

DEREHAM (West), par. Eng. Norfolk; 3440 ac. P. 544.
DERENBURG, a tn. Prussia, prov. Saxony, gov. of, and 32 m . S.W. Magdeburg, on the Holtemme. It is surrounded by an old wall with three gates, contains a church, chapel, townhouse, and hospital, and has a distillery, a paper, and numerous other mills. In the neighbourhood is the strong castle of Regenstein. Pop. 2375.

DERENDAH, a small tn. and castle, Asiatic Turkey, pash. Room and Sivas, 56 m . E. Sivas. The town stands on a platform of the rock, on the summit of whieh the castle is situated. It contains only about 40 houses, and is abandoned in summer by its inhabitants, who then retire to the gardens lower down the valley. The rock on which the castle stands is nummulitic limestone, forming cliffs of from 50 to 100 ft . in height, and rising 300 ft . above the river's bed. It is approachable only in one direction.

DERETSKE, a market tn . Hungary, Thither Theiss, co. Bihar, about $13 \mathrm{~m} . \mathrm{S}$. Debreczin. It contains a Protestant and a R. Catholic church. Pop. 5307.

DEKG (Louar), a lake, Ireland, co. of, and $7 \frac{1}{2} \mathrm{~m}$. E. by S. Donegal, about 3 m . long, and $2 \frac{1}{2} \mathrm{~m}$. broad at the broadest part. The shores are steep, and the general scenery around wild, dreary, and desolate. The lake is studded with islands, one of which, called Station Island, is famous as the scene of a R. Catholic pilgrimage. From the 1st to the 15th of Angust it is thronged with devotees from all parts of Ireland, between 10,000 and 15,000 visiting the island annually. It lies within $\frac{1}{2} \mathrm{~m}$. of the S.E. shores, and is about the extent of an acre. There are two small chapels on it, one of which is appropriated to the penitents; a house for the officiating priests, and a few cabins. The pilgrims remain on the island from three to
nine days, and their only food during that time is bread and water.

DERIABI, one of the Kartan Islands, S.E. coast of Arabia, at the entrance of the bay of Curia Muria; lat. $17^{\circ} 35^{\prime}$ N . ; lon. $55^{\circ} 55^{\prime} \mathrm{E}$.

DERMBACH, a tn . Saxe-Weimar, chicf place bail. of same name, near the Fulda, 60 m . S.W. Weimar. It contains a Protestant and a R. Catholic church, a castle, and savings'bank; and has several mills, and four annual fairs. A great number of wooden bowl pipes are made in the neighbourhood. Pop. of tn., 1080 ; of bail., 6400.

DERNAH, a seaport tn . Tripoli, at the mouth of a large ravine, about 1 m . from the coast, 450 m . W.N.W. Alexandria, and 550 m . E. Tripoli ; lat. $33^{\circ} 46^{\prime} \mathrm{N}$. ; lon. $22^{\circ} 40^{\prime} 45^{\prime \prime}$ E. (r.) The town is built in four separate quarters, on both sides of the ravine, backed by lofty rocks. The streets are tolerably regular, but dirty ; the houses low and small, and, being built of pebbles, cemented with clay, and ill put together, have a very mean appearance. They are, however, surrounded with gardens producing abundance of dates, grapes, melons, figs, bananas, oranges, pluns, and other fruits, and are well sheltered by thick groves of date trees. The town is abundantly supplied with water from a copious stream that gushes from the rocks above it, and which, after passing through several streets, irrigates the gardens and corn n̂elds in the neiglibourhood. In the centre of the town is a ruined fortress, and a handsome mosque, built by one of the former Beys, a native of Egypt. The harbour is extremely insecure, but there is a good roadstead $1 \frac{1}{2} \mathrm{~m}$. off shore, as well as some shelter for small craft close in shoro, with the wind from N.N.W. to S.E. The town is wholly undefended both by sea and land. It has some small export trade in corn, and wool, the produce of the inland country. Dernal has greatly fallen off since it ceased to be the seat of the Government of Tripoli, and its prosperity has likewise been much injured by visitations of the plague. Pop. 6000.

DERNIS, a market tn . Dalmatia, circle of, and 51 m . S.E. Zara. cap. dist. of same name, agreeably situated r. bank, Cicola. It contains a parish church, which was once a Turkish mosque, and the ruins of a castle, picturesquely seated on a lofty and rugged precipice, on three sides almost inaccessible. It was formerly a large Turkish town, with 10,000 to 15,000 inhabitants; it is now a mere village. Pop. 1010.

DERNYE, a tn. Austria, Croatia, belonging to the regimental dist. of Warasdiu, on the Drave, over which there is here a ferry, about 4 m . from Neudorf. It contains a R. Catholic parish church, and has 6 mills. Pop. 1699.

DERR, or Dehr, a tn. Nubia, and the modern capital of that country, r. bank Nile, about 70 m. N. E. Ipsambool, lat. $23^{\circ} 30^{\prime \prime} \mathrm{N}$.; lon. $22^{\circ} 30^{\prime \prime} \mathrm{E}$. It is a mere assemblage of mud cottages, surrounded by a thick palm-grove. Dates of superior quality are grown in the vicinity. Pop. 3000.

DERREYEH (El), or DERAyEf, a fortified tn. Arabia, cap. Nejd, dist. El Khardj, on the caravan line between the Red Sea and the Persian Gulf, 464 m. N. E. Mecca; lat. $25^{\circ} 15^{\prime} \mathrm{N} . ;$ lon. $46^{\circ} 36^{\prime} \mathrm{E}$. This town is situated at the base of Mount Khour, in a fertile valley, and was once tho centre of Wahabite power; but, in 1819, was taken, and almost destroyed, by lbrahim Pasha. Pop. about 13,000.

DERRINISH. two isls. Irel.:-1, Co. of, and $10 \mathrm{~m} . \mathrm{N}$. Sligo, near the entrance to Milkhaven, containing about 76 ac. of land.-2, Co. Mayo, in Clew Bay, containing about 52 ac .

DERRY, co. and city, Ireland. See Londonderry.
DERRY, a rivulet, Ireland, cos. Wicklow, Carlow, and Wexford, rising 2 m . S. E. Hacketstown, and after a circuitous S. W. course of about 15 m ., falling into the Slaney, 17 in. below Clonegall.

DERRY, with an affix, numerous pars. Irel. :-1, (-Aghy), Antrim ; 12,480 ac. Pop. 5396.-2, (-Brusk), Fermanagh; 4657 ac. Pop. 1437.-3, (-Galvin), Limerick; 1719 ac. Pop. 718-4, (-Grath), Tipperary; 3777 ac. Pop. 1329.5, (-Keighan), Antrim; 7634 ac. Pop. 3167.-6, (-Loran), Londonderry and Tyrone; 12,100 ac. Pop. 8480.-7, (-Lossary), Wicklow ; 45,966 ac. Pop. 4895.-8, (-Nahinch), Kilkenny; 8340 ac. Pop. 2352.-9, (-Noose), Armagh; 45,966 ac. Pop. 4897.-10, (-Patrick), Meath ; 1951 ac. l'op. 399.-11, (-Villane), Cork; 1828 ac. Pop. 826.-12, (-Vullan), Fermanagh; 23,646 ac. Pop. 826.

DESENZANO

DERSINGHAM, par. Eng. Norfolk; 3340 ac. Pop. 676.
DERTINGEN, three places, Germany:-1, A market tn. Baden, circle Lower Rhine, bail. of, and 6 m . E. Wertheim. It contains a parish church, and has two mills. Pop. 950. -2, (Ober and Unter), two contiguous vils. Wïrtemburg, circle Danube, bail. of, and not far from Biberach. They contain a parish church. Pop. 618.-3, (Ober), A tn. Würtemburg, Neckar circle, bail. Manlbronn, ncar the Baden frontier. It has a church. Pop. 1320.

DERVENICI, an islet, Adriatic Sca, ncar the coast of Dalmatia, dist. of, and 12 m. S.W. Trau, and immediately W. of the island of Zirona. It is inhabited by a few fishermen.

DERVOCK, a post tn . Ireland, co. of, and 31 m . N.N.W. Antrim, consisting of two strects, one on each side of the Bush. Near the town is the parish church, a handsome structure, as also a R. Catholic chapel, and Presbyterian meeting-house. On the banks of the Bush are extensive corn and flour mills. Pop. 545.

DERWEN, par. Wales, Denbigh. Pop. 569.
DERWENT, several rivers, Eng. :-1, co. Cumberland, rising at the head of Borrowdale, flowing N. through the lakes of Derwentwater and Bassenthwaite-water, and thence pursuing a W. S. W. direction to the Irish Sea, which it enters near Workington. Its principal affluents are the Greta and Cocker, and the town of Cockermouth is situated on its 1 . bank. The waters of this river are remarkably limpid, and its banks are throughout adorned with scenery of the greatest beauty.-2, co. Derby, rising in the high peak, towards the N. extremity of the county, and after a course chiefly S. E., of about 50 m . past Chatsworth, Matlock, Belper, and Derby, falling into the Trent, on the confines of Leicestershire. Its upper vale is very much admired for its picturesque beanty. The Wye is its principal affluent.- 3 , co. York (E. Riding), rising in the wolds, near Harwood dale, and after a circuitous course chiefly $S$., of about 60 m ., falling into the Ouse at Barmby, whence it is navigable to Malton, a distance of 27 m .

DERWENT, a river, Van Diemen'a Land, rises in an unexplered region N. W. of the co. of Norfolk, probably in about lat. $42^{\circ} 30^{\prime} \mathrm{S}$. On entering the county just named, it pursues a tortuous S.E. courae, and latterly expands into a spacious eatuary, opening to the S. Pacific Ocean. At its entrance, between Cape Piersau on the W., and Cape Direction on the $E$., it is about 4 m . wide, and continues to retain this width for 6 or 8 m ., when it diminishes to about $2 \frac{1}{2} \mathrm{~m}$., and latterly, to somewhat less than a mile, with exception of the indentation near the head of the estuary called Prince of Wales Bay, where it again expands to a width of about 2 m . Seven miles from the entrance, an opening to the E. occurs, which conducts to a pretty extensive expanse called Ralph's Ray. The tide in Derwent river is irregular, rising at times 7 or 8 feet, but usually only 4 or 5 feet; the stream is generally weak, seldom more than half a knot. In the npper part, where the water is fresh, flocks of black swans formerly used to feed among the long grass which grew on the mud banks. A lighthouse, elevated 70 feet above the sea, has been erected on Iron Pot Island, at the entrance of the Derwent, exhibiting a fixed light, which may be seen from 12 to 15 m . distant from a ship's deck. The estuary separates the districts of Richmond and Hobart Town.

DERWENT-WATER, or Keswick Lake, a beautiful and picturesque lake, England, co. Cumberland, forming an expansion of the Derwent, and having the town of Keswick on its N. W. shore. It is about $3 \frac{1}{2} \mathrm{~m}$. long, and $1 \frac{1}{2}$ broad; has rocky and precipitous banks, and is adorned with several richly wooded islands, and a singular mass of soft land, which occasionally floats upon the anrface; and at other times sinks below it. The waters of this lake are aometimes liable to an unaccountable agitation, and frequently, even in the calmest weather, continue in this state for hours together. Near the N.E. corner of the lake is the celebrated cascade of Lodore.

DES MOINES, a riv., U. States, Iowa, rising in the Coteau des Prairies, and after a S.E. course falling into the Mississippi, at the foot of the Des Moines rapids, near the confines of Missouri. In the rainy season it is navigable for steamboats 100 m .

DESAGUADERO.-1, A vast depression or inter-alpine valley, in Bolivia and Peru, between two huge ridges of the Andes, into which the great chain divides, near the well-known city of Potosi, lat. $19^{\circ} 35^{\prime} \mathrm{S}$.; and again unites at the peak of

Vilcañota, lat. $14^{\circ} 30^{\circ} \mathrm{S}$. ; lon. $78^{\circ} 50^{\circ} \mathrm{W}$. The westernmost of the longitudinal ridges which bound the valley in that direction, and form part of the boundary line between Peru and Bolivia, runs parallel with the shores of the Pacific Ocean, and is called the Cordillera of the coast; whilst the eastern ridge is known by the general name Cordillera, or, properly speaking, Bolivian Cordillera; and its N. prolongation, Cordillera Real, comprising the snowy ranges Carabaya and Apolobambo, the highest peak of the latter having an elevation of $17,930 \mathrm{ft}$. The great valley or table-land occupying the intermediate space between the limits above defined, is about 400 m . in length, with a breadth varying from 30 to 80 m . It comprises an area of $150,000 \mathrm{sq} . \mathrm{m}$., and includes the great lake Titicaca, $12,850 \mathrm{ft}$. above sea level, and the smaller lake Aullagas or Uros. 570 ft . below the level of the former, and which receives the superfluous waters of Titicaca by the river Desaguadero, its only outlet. The river is of considerable depth, but its velocity is scarcely 2 m . an hour. Its whole length, from the village Desaguadero, at the S. extremity of Titicaca, to the N . end of lake Aullagas, is about 180 m .; where it emerges from lake Titicaca it is crossed by a bridge, built by the fifth Inca of Pern, for the passage of his army. The average elevation of the valley or table-land of Desaguadero above the level of the sea is about $12,900 \mathrm{ft}$. From its great elevation the heat here is never great, nor is the cold very sensible, except during the nights from May to November. This season, which is the winter, is extremely dry, the sky is cloudless, and neither rain nor snow are known to fall. But the latter precedes and follows the rainy season, which begins at the end of November, and continues to the beginuing of April. There are no trees in the valley, but the lower districts are covered with the most beautiful green turf. Cultivation is extremely limited; wheat, barley, and rye are sown, but they do not ripen, and are cut green as fodder for the llamas. There are, however, extensive plantations of quinoa (Chenopodium quinoa, Linn.), and of potatoes, which are found growing wild in some of the more elevated places. There are here no peculiar seasons for sowing or reaping, both these operations going on simultaneously throughout the whole year. Numerous herds of llamas feed on the coarse grass with which the higher ridges in the valley are covered. Guanacos, alpacas, and vicuñas are also met with, but no other wild animals, excepting a peculiar kind of hare, and a small animal of the family Rodentia, which in some places has so burrowed the soil as to render travelling on horseback unsafe. The conder is frequently seen on the surrounding mountams. -2, A lake in the S. of Chili, in Auracana, somewhat of the form of a boot, the limb of which is 35 m . long, and the foot about 12; its breadth nowhere exceeding 5 m . At its S.E. end is the volcano of Osorno, and from its N. W. extremity issues the river of that name, which falls into the Pacific.

DESBOROUGH, a vil. and par. Eng., co. of, and 14 m N. N. E. Northampton, on a sandstone rock. The weaving of silk, ahag, and worsted, employe a portion of the inhabitants; and a number of females are engaged in the making of lace and winding cotton. Area of par. 2410 ac. Pop. 1388.

DESCHKIN, a tu. Russia, gov. of, and 34 m . N.N.E. Orel, l. bank Oka. It contains a chapel; and has some trade in salt, but the inhabitants live chicfly by agriculture. Pop. 1000.

DESEADA, one of the Leeward isls. belonging to the French, Caribbean Sea, E. from Guadaloupe, lat. (N. point) $16^{\circ} 20^{\prime} \mathrm{N}$. ; lon. $61^{\circ} 12^{\prime} \mathrm{W}$. (R.) It is about 10 m . long, and hardly 5 broad, rises with a steep ascent, and then extends in a table land, which consists of limestone rocks, in which many caverns occur; but it is withont water. The soil is in some places of a deep black, and fertile, in others it is sandy and unproductive. This island was the first of the Caribbee islands seen by Columbus on his second voyage in 1494.

DESEMBOQUE, a tn. Brazil, prov. Minas Geraes, r. bank, Velbas, about $400 \mathrm{~m} . \mathrm{S}$. W. Goyaz. It contains a parish church, and a primary school. Some of the inhabitants are employed in making cloth or in spinning wool and cotton, others in agricultural labours, including the making of cheese and rearing of cattle. In the neighbourhood are mineral springs, considered very efficacious in cutaneons affections. Pop., town and district, 5000 .

DESENZANO, a tn. and port, Austrian Italy, gov. Milan, prov. of, and 16 m . E.S.E. Brescia, at the S.W. extremity of
lake Garda, at the foot of a hill crowned with an ancient castle. It is well built, with wide and clean streets, and possesses several churches, a convent, hospital, a philosophical society. a gymnasium, and clerical seminary. The port has considerable traffic in grain, wine, oil, silk, and fish. Four well attended fairs are held during the year for cattle and gencral merchandize. Pop. 3427.

DESERET, a name sometimes given to the newly organized Mormon territory in the U. States of N. America. See Utah.

DESERT, several pars. Irel.:-1, Cork; 725 ac. Pop. 774.-2, (-Creat), Tyrone; 14,399ac. Pop.7675.-3. (-Egny), Donegal ; 7577 ac. Pop. 1802.-4, $(-L y n)$, Londonderry; 5561 ac. Pop. 3255.-5, (-Martyn), Londonderry; 9580 ac. Pop. 5023.-6, (-More), Cork; 3943 ac. Pop. 1196.-7, (-Oghill), Londonderry ; 11,469 ac. Pop. 4901.-8, (-Serges), Cork; 15,730 ac. Pop. 6327.

DESERTAS (THE), three rocky isls. Atlantic ocean, S.E. Madeira, lat. (S. or Agulha Point), $32^{\circ} 31^{\prime} 18^{\prime \prime}$ N.; lon. $16^{\circ} 30^{\prime} 45^{\prime \prime}$ W. (r.) The northern is called Chão, the centre one Deserta Grande, and the S. one Bugio. They have no permanent inhabitants, but are occasionally visited from Madeira by fishermen, herdsmen with goats, sheep, and cattle, and by parties in quest of archil. Chão is nine-tenths of a mile in length, and one-fourth of a mile in breadth at its N . end; but at the $S$. it terminates in a very narrow point. It is a table-land, surrounded by high rocky cliffs. The E. shore runs nearly in a straight line; the W. is more indented, and on this side the best landing-place is met with. The soil is light; mingled with rocks and stones, and covered with long, coarse, dry grass, and some wild herbs. Its most elevated summit is 336 ft . above sea level. The Deserta Grande is the largest and most elevated of the three islands; its shores are generally steep and rocky, and high bold cliffs of rock characterize the greater part of them. It is upwards of 6 m . in length, and about 1 m . in breadth; its most elevated peak is 610 ft . above sea level. The Bugio is about a mile in length, and the same in breadth; its highest peak, which is on the N. part of the island, is 1349 ft . above sea level.

DESFORD, par. Eng., Leicester, 3830 ac. Pop. 1006.
DESFUL, or DIzFUl, a city, Persia, prov. Khazistan, 30 m . N.W. Shuster, lat. $32^{\circ} 5^{\prime}$ N.; lon. $48^{\circ} 11^{\prime}$ E., l. bank, river same name, here crossed by a handsome bridge of 20 arches; the foundations of which are of stone, and very ancient, the upper portions of brick of a more recent date. It is the principal market of Khuzistan, although in many respects inferior to the larger town of Shuster, its bazaar being less commodious, its houses not so well built, and its streets narrower. In the vicinity are numerous interesting remains of antiquity, including the beds of large canals, supposed to be of Sasanian origin. The neighbourhood is well inhabited, and abounds in villages. Here the indigo which is manufactured in Khuzistan is raised, and orange and lemon trees find a favourable soil. The local governor of Arabistan generally resides here. Pop. 14,000 or 15,000 .-The River on which the city stands lias its source in the mountains to the N. W. of Booroogird, prov. Irak-Ajemi, lat. $33^{\circ} 50^{\prime} \mathrm{N}$. ; lon. $48^{\circ} 40^{\prime}$ E., and after a S. and S.S.E. course of 150 m ., falls into the Karoon, lat. $31^{\circ} 38^{\prime}$ N.; lon. $48^{\circ} 58^{\circ}$ E., 22 m . S. Shuster.

DESHTI PYAZ, a large vil. Persia, Khorassan, 150 m . S. Mushed. It is surronnded by one continued garden of mulberry and fruit trees. The products of the vicinity are fruit, silk, a little cotton, and opium. It contains about 100 families of Kizzil-bashes.

DESIMA, or Dezima, an artificial fan-slaped isl. Japan, close to the town of Nangasaki. In the years 1635 and 1636, the Japanese, being desirous of assigning a fixed residence to the Portuguese, who still remained in their country, in spite of the cruel persecutions to which they were then subjected, compelled them to construct this island at their own expense. Its favourable position in front of Nangasaki, whence it derives its name, which signifies 'Fore Island, and the excellent arrangement of its storehouses, soon became of great importance to the prosperity of the mercantile relations of the Portuguese with Japan, and the loss of liberty which they sustained was considerably alleviated by the spur thus given to their commerce. This prosperity, however, did not long continue, for in 1639 a general sentence of banishment was issued against the Portuguese ; and the Dutch, who had already, from
a spirit of rivalry, longed to locate themselves at Nangasaki, instead of Firando (to which their own factories and those of the Portuguese had hitherto been confined), availed themselves of this opportunity to effect their purpose, and in 1641 we find them settled at Desima. This artificial island was constructed from the earth of a hill in the neighbourhood. A wall of basaltic rock, 6 ft . above high-water mark, protects it from the encroachments of the sea; and a gate shut at night separates the inhabitants from those of the town of Nangasaki, which see.

DESIO [anc. Desimum], a tn. Austrian Italy, prov. of, and $10 \mathrm{~m} . \mathrm{N}$. Milan. Its houses are well built, and it has a handsome church, hospital, almshouse, and elementary school. In the vicinity are delightful gardens and vineyards, with fine trees and fountains. The inhabitants are chiefly employed in agriculture, and rearing domestic cattle. Pop. 4384.-(Dizio, del' Italia.)

DESIRE (Pont), a harbour, Patagonia, E. coast, lat. $47^{\circ} 45^{\prime} 0^{\prime \prime} \mathrm{S}$. ; lon. $65^{\circ} 55^{\prime} 30^{\prime \prime} \mathrm{W}$. (R.), formed by a river of the same name. It is of difficult entrance, from its narrowness and the strength of the tide, but there is good anchorage off the mouth. The country around is a parched barren desert, with some straggling tufts of brown grass, and a few stunted bushes. Of edible vegetables there are few or none; but wild fowl, fish, and shell-fish are plentiful. The natives are hostile to strangers, and spare no white man who is so unfortunate as to fall into their hands, in consequence of the treatment they have received from the Spaniards and their descendants. The river was examined by Captain King for 16 m ., but is believed to be navigable to a much greater distance.-(Fitzroy's Sailing Directions for S. America; King's Sailing Directions for E. and W. Patagonia.)

DESKFORD, par. Scot. Banff, 5 m . by 3 m . Pop. 860.
DESNA, a riv. Russia, which rises in gov. of, and about 50 m . E. of the town of Smolensk, flows S.E. through that gov. and gov. Orel, till it reaches Briansk, where it suddenly turns S.S.W., and continues that direction into gov. Tchernigov, which it traverses circuitously, first S. W., and then W. to Tchernigov. It now resumes its S.S. W. course, and on reaching the frontiers of gov. Kiev, joins l.bank Duieper nearly opposite the town of Kiev. It is navigable nearly throughout its whole course, which exceeds 500 m . Its principal affluents are on the r., the Souda and Snov; and on the 1. the Snopot, Vetma, Bolva, Navlia, Nerusa, Ivot, Seim, and Oster. It has been proposed to unite the Oka with the Desna, and thereby give a continuous water communication between the Caspian, the Black Sea, and the Baltic.

DESOLATION (Cape), a promontory, W. Greenland, Davis's Strait, forming the S.W. extremity of the isl. NunarSoak; lat. $60^{\circ} 58^{\prime} \mathrm{N}$. ; lon. $49^{\circ} 36^{\prime} \mathrm{W}$. (r.)-2, A headland of Tierra del Fuego, on an isl. on its W. coast; lat. $54^{\circ} 46^{\prime}$ S.; lon. $71^{\circ} 37^{\prime}$ W. (r.)

DESSAU, a tn. Germany, cap. duchy, Anhalt-Dessau, in a beautiful valley, l. bank, Mulde, which is here crossed by a bridge, and joins the Elbe about 3 m . below, 35 m . N. Leipzig, on the railway between Berlin, Köthen, and Leipzig. It consists of the town proper, surrounded by walls, with six gates, and of four suburbs, and is generally well built, containing several spacious squares, and a number of well-formed and well-lighted streets. The principal building is the ducal palace close on the Mulde, originally built in 1470 , but reconstructed at a much later period, not possessed of great architectural merit, but surrounded with fine gardens, and containing both a picture gallery and a library, in which are numerous MSS. of Luther. The other note-worthy buildings are the palace of the duchess dowager, the townhouse, the palace church [Schlosskirche], with a curious painting of the Last Supper by Cranach; town church, St. George's church, St. John's church, the R. Catholic church, the synagogue, theatre, library, normal and other schools, the musical academy, the poorhouse, house of correction, and several hospitals. The manufactures consist of woollen and linen cloth, hats, leather, tobacco, musical and other instruments, and there is an extensive worsted as well as several other mills, and an important corn market. The ground around Dessau, originally a sandy waste, has been completely re claimed, and is now covered with beautiful gardens, forming the chief attraction of the place. The celebrated Mendelsohn was born here. Pop. 12,000.

DESTERRO, a tn. Brazil, cap. prov. Santa Catharina, near the centre of the W. coast of the island, which gives that province its name. It stands on a tongue of land which projects W. into the bay, and is defended by two forts. Its situation is unhealthy, and it is very poorly built-the streets being very irregular, and badly paved. Scarcely any of the buildings deserve notice; but among others may be mentioned the governor's palace, courthouse, arsenal, parish church, and hospital. In 1838, a dreadful thunderstorm destroyed part of the town, and committed great ravages, both on the island and the mainland. Pop., tn. and dist., 6000.

DESVRES, a tn. France, dep. Pas-de-Calais, 12 m . S.E. Boulogne. It is agreeably situate in a well-watered district, in the neighbourhood of an extensive forest. It was formerly a place of some importance, surrounded by fortifications, and defended by a strong castle, but is now comparatively insignificant. It has some manufactures of coarse woollens, leather, dclft, and other earthenware. The possession of Desvres was keenly contested during the Anglo-Norman wars. Pop. 2816.

DETHWICK-LEA, a vil. and chapelry, England, co. of, and 14 m. N. by W. Derby. The village, situate in a valley, has a furnace for smelting lead-ore, and a mill, on a large scale, for spinning worsted and cotton. The Cromford and High-Peak Railway passes within a quarter of a mile. Pop. 488.

DETMOLD, a tn. Germany, cap. Lippe-Detmold, l. bank, Werra, $50 \mathrm{~m} . \mathrm{S} . W$. Hanover. It is entered by three gates, is divided into the old and new town, the former very poorly and the latter regularly built; contains a palace, a fine old castellated building, with four wings and a vast round tower or donjon, surrounded by well-arranged gardens; three churches, a gymnasium, normal, industrial, and other schools, an orphan hospital, infirmary, and house of correction. The manufactures consist of woollen and limen cloth, and leather, and there are both marble and gypsum quarries. A few breeding studs are kept here. In the neighbourhood, on the Grotenberg, the culminating point of the Teutoberger Wald, a colossal statue of hammered copper, 45 ft . high, placed on a circular pedestal of solid sandstonc, 90 ft . high, has been erected, by subscription, among the princes of Germany, to the Hermann or Arminius, by whom Varus and his Roman legion were destroyed. Pop. 4716.

DETOUR Point, a headland, U. States, N. shore of Lake Michigan, opposite the W. extremity of Manitoulin or Drummond Island; lat. $45^{\circ} 57^{\prime} \mathrm{N} . ;$ lon. $84^{\circ} 4^{\prime} \mathrm{W}$.

DE'TROI'T, a tn., U. States, cap. of Michigan, r. bank of a river or strait of the same name, here about $\frac{3}{4} \mathrm{~m}$. wide, 7 m . below the outlet of Lake St. Clair, and 20 m . above the N.W. end of Lake Erie; lat. $42^{\circ} 20^{\prime}$ N.; lon. $83^{\circ} 10^{\prime}$ W. It stretches about 1 m . along the river; and for $\frac{1}{4} \mathrm{~m}$. backward is of a rectangular form. Thereafter, eiglit avenues, 200 ft . wide, divide it into triangular portions, and terminate in a large open area, called the Grand Circus. It has several public squares, the chief of which is called the Campus Martius. The public edifices deserving of notice are the statehouse, the city hall, and the bank of Michigan. There are 23 churches, several markets, four banks, a theatre, museum public garden, mechanics' hall, state penitentiary, several religious and beneficent societies, including two orphan asylums; also several literary and scientific associations. It has extensive manufactures of machinery, stoves, ploughs, \&e., and about $10,000,000 \mathrm{ft}$. of lumber are sawn up annually. Detroit is well situated for trade; its navigation, by river and lake, is open for eight months yearly; and, by the Michigan Central Kailway, it has extensive inland communication. In 1852 the registered shipping of the port was 43,925 tons. The exports coastwise amount to about $£ 800,000$, and the imports to above $£ 3,100,000$ annually. Detroit was founded by the French Canadians in 1683, and was incorporated as an American city in 1815. Pop. (1853), 34,436.

DE'TROIT River, a river, N. America, forming the communication between Lakes St. Clair and Erie, and part of the boundary between Upper Canada and the U. States. It is 28 m . long, $\frac{3}{4} \mathrm{~m}$. wide at Detroit, but gradually becomes wider as it descends towards the S . Anong the isles formed by it are Grosse and Fighting Islands, situated near its mouth. It is navigable for ships of any burthen. Its banks are chiefly inhabited by French Canadians, whose houses, surrounded
with fruit trees, present a pleasant spectacle in passing through the strait.

DETS, a vil. Hungary, co. Tolna, near the Danube, 6 m . S.E. Szexard. It contains a Protestant church; and has good fishing in the Danube. Much wine is produced in the district. Pop. 1666.

DE'T'A, or Gyedu, a market tn. Hungary, Thither Theiss, co. of, and 23 m. S. by E. Temesvar, on the Berzava. It contains a R. Catholic parish church. Rice is grown in the district. Pop. 1480.

DETTELBACFI, a tn. Bavaria, Lower Franconia, cap. dist. of same name, r. bank, Main, over which there is here a ferry, 9 m . E.N.E. Würzburg. It contains two churchesone of them attached to a Franciscan monastery, and the object of numerous pilgrimages; an hospital, and poorhouse; and has considerable manufactures of cloth, a trade in wine and agricultural produce, numerous mills, a weekly market, and five annual fairs. Pop. of tn., 2445; of dist., 10,267.

DET'IINGEN, several places, Würtemberg, particu-larly:-1, A vil. circle, Danube, dist. of, and 3 m . S. Kirchheim. It contains a parish church, and has a cotton mill. Both wine and fruit are produced to some extent in the vicinity. Pop. 2283.-2, (-an der Erms), a vil. circle, Schwarz wald, dist. Urach, 10 m . E. Tübingen, l. bank, Erms. It contains a parish church and a small castle; and has a large carriage and waggon factory, a polishing, a saw, and on iron mill. Much wine and fruit are produced here. Pop. 2851. -3 , A vil. circle Jaxt, dist. of, and 6 m . S.S.W. Heidenheim. It contains a parish church. Pop. 1437.-4, (-bei Rottenberg), a vil. circle Schwarzwald, cap. dist. of same name. It contains a parish church. Pop. 920.

DETTINGEN, a vil. Bavaria, Lower Franconia, dist. of, and 9 m . N.W. Aschaffenburg, r. bank, Main. It contains a parish chnrch, and lias a granite quarry; but only deserves notice on account of the victory gained here, in 1748, by the English and Austrians over the French. Pop. 602.

DETTIINGEN-Gross, a vil. and par. Switzerland, can. of, and 16 m. N.N.E. Aarau, r. bank, Aar. It stands in a beautiful district, contains a parish ehurch, and has some manufactures of linen, and a bleachfield. Pop. 870.

DE'TTVA, a vil. Hungary, Hither Danube, co. Sohl, in a lofty mountain valley, 6 m . from Veghlesz. It contains a handsome parish church. The inhabitants are Slowaks. Pop. 7240.

DETTWILLER [German, Dettweiler], a vil. Franee, dep. Bas-Rhin, 4. m. E. N. E. Saverne, r. bank, Zorn. It has manufactures of cotton and woollen stuffs, and some cotton mills.

DEURNE, a very old vil. Holland, prov. N. Brabant, $26 \mathrm{~m} . \mathrm{S} . E$. Hertogenbosch. It has a beautiful IR. Catholic and a Reformed church, and a school. Its inhabitants are chiefly engaged in agriculture and turf-selling. Pop. 1750.

DEUSEHILL, par. England, Salop; 470 ac. Pop. 45.
DEUTICHEM, a tn. Iolland. See Doetinchem.
DEUTSCHBROD, a royal free tn. Bohemia, circle of, and 23 m. S.S.E. Czaslau, on the Sazawa. It has two suburbs, five churches, a gymnasium, barrack, hospital, a paper mill, vinegar factory, and some manufactures of cloth; and four annual fairs. Pop. 2443.

DEUTSCIIENDORF, or Poprad, a tn. Hungary, Thither Danube, co. Zips, in a plain, r. bank, Poprad, here crossed by a stone bridge, $72 \mathrm{~m} . \mathrm{S}$. by E. Cracow. It contains a Protestant and two R. Catholic churches; and has manufactures of linen, paper, and copper-wire, several distilleries, a weekly market, and an annual fair. Pop. 1370.

DEUTSCIIIAAUSE [Moravian, Husowa], a tn. Moravia, circle of, and 16 m . N.N.E. Olmütz, in a mountainous district on the high road to Austrian Silesia. It contains a parish church; and has a weekly market and four annual fairs. Pop. 1602.

DEU'T'SCHKRONE, Arentskrone, or Walcz, a th. Prussia, prov. W. Prussia, gov. Marienwerder, cap. circle of same name, 72 m . N.N.W. Posen, between the lakes of Arins and Radau. It is the seat of several courts and public offices, contains a progymnasium and synagogue, and has manufactures of woollens, tile-works, dye-works, a trade in horses and cattle, and eight annual fairs. Pop. 3000.—The circle, area 624 geo. sq. m., is flat and sandy, watered by the Küddow, Plietnitz, Pilow, and Dïberitz, contains numerous lakes, and rears many cattle. Pop. 44,505 .

## DEUTsCHLAND. See Germany.

DEUTZ, a tn. Prussia, gov. of, and r. bank, Rhine, opposite the city of Cologne, with which it communicates by a bridge of boats, 1400 ft . long. It is strongly fortified, as part of the defences of Cologne-forming, in fact, a tête-dupont. It contains a R. Catholic parish and another church, the ruins of an old Benedictine abbey, a large barrack with magazines of artillery, and two swimming establishments; and has important manufactures of porcelain, velvet, ribbons, soap, and playing cards. The harbour is good, and contains numerous shipping, particularly in winter. Deutz is a very ancient place, and is said to owe its origin to a castle built on its site by Constantine the Great. The finest view of Cologne, with its ranges of buildings stretching 3 m . along the river, is obtained from the extremity of the bridge on this side. For plan of town, see Cologne. Pop. 2850.

DEUX-PONTS, a tn. Bavaria. See Zwelbrücken.
DEVA.-1, A small tn. and port, Spain, Biscay, prov. Guipuzcoa, 23 m . E.N.E. Bilbao, r. bank, Deva, near its mouth. It has tolerably well-made streets, two squares, a large and magnificent church, townhall, two schools, an hospital, prison, and convent. Iron is wrought in the vicinity to some extent, but the inhabitants are principally occupied in agriculture and fishing. Its trade consists in the export of fish, brandy, vegetables, fruits, iron, grain, \&c.; and the import of oil, wine, sugar, tobacco, coffee, soap, earthenware, hardware, apparel, \&c. Pop. 3536.-2, A small river in Santander, which falls into the Atlantic, after a course of about 30 m .

DEVA [Latin, Decapolis; German, Diemrich, or Schlossberg], a market tn. Austria, Transylvania, co. Hunyad, r. bank, Maros, $58 \mathrm{~m} . W$. Hermannstadt. It contains two castles, one of them a mere ruin, picturesquely seated on a rocky eminence, and supposed to be of Roman origin; a Protestant, R. Catholic, and Greek church. The district is famed for its peaches. Many Romari coins of Augustus, and a later date, have been found here; and here, in 1550, Jolm Török defeated the Turks. Pop. 4000.

DEVAPRAYAGA, a tn. of N. Hindoostan, in Gurhwal, 12 m . W. Sirenuggur; lat. $30^{\circ} 9^{\prime}$ N.; lon. $78^{\circ} 33^{\prime}$ E.; at the junction of the two rivers Bhagirathi, or true Ganges, and the Alacananda, the muion of which forms that part of the Ganges held most sacred by the Hindoos, by bathing in which they suppose themselves purified from all their former sins. The town is built on the scarp of a mountain, about 100 ft . above the water, the mountain rising about 800 ft . higher. The honses, gencrally two stories high, are built of large stones, cemented with coarse lime, and covered with shingles. In the upper part of the town stands a temple, sacred to Ramachandra, constructed of large blocks of cut stone, piled up, without mortar, to the height of 60 ft . The image is of black stone, and about 6 ft . high.

DEVENISH.-1, An isl. Ireland, co. Fermanagh, in Lough Erne, 2 m. N. N. W. Enniskillen; area about 113 ac., and containing some interesting remains of ancient religious establishments.-2, A par. E. of the above; 32,243 ac. Pop. 8381.

DEVENTER, a tn. Holland, prov. Overijssel, 8 m . N. Zutphen, r. bank, Ijssel, where it reccives the Schipbeck. The streets of this ancient fortificd city are generally narrow, but the market places large and wide. Successive changes in the fortifications have reduced the gates to seven. An extensive prospect is enjoyed from the ramparts; but the favourite promenale is the Worp, on the farther side of the Ijssel, whose fine old linden trees were destroyed by the French, in 1813, but it is now laid out with great taste in the English garden style. The townhouse is of great size; in it the athenæum has its library. The courthouse and prison are handsome structures; as is also the weighhouse, a large, old, isolated building. The Reformed have two churches, the Lutherans one, the Mennonites one, and the R. Catholics onc. The Jews have a small synagoguc. $A$ great resort to the town on market days makes it then a very bustling place. Though no longer the third commercial city of IIolland, it still derives great advantages from its harbour on the Ijssel. It exports $600,000 \mathrm{lbs}$. of butter, and 365,000 Deventer cakes, annually; has a royal Turkey carpet manufactory, an iron foundry, a stocking manufactory, and various other industrial establishments. Among its public institutions are the great hospital for old people, a burgher orphan louse, St. Eliza-
beth's hospital for the insane, and four other hospitals, including a military one. The athenæum comprises a drawing school and a lecture room, and a hall for the chemical and physical society. The Latin school has six classes, under four masters. There is also an industrial school, with 500 scholars, a fine arts society, a natural history and chemical society, a department of the public utility society, and of that for the encouragement of industry, and 8 other schools, with 2200 scholars. Pop. (1850), 14,378; of whom 10,650 are Protestants, 3000 R. Catholies, and 280 Jews.-(Van der Aa.)

DEVEREAUX (St.), par. England, Hereford; 1600 ac. Pop. 191.

DEVERILL, two pars. England, co. Wilts:-1, (Long bridge), 4230 ac. P. 1352.-2, (Monkton), 1320 ac . P. 207.

DEVERON, or Dovers, a river, Scotland, cos. Aberdeen and Banff. It rises in the parish of Cabrach, W. coast, Aberdeenshire, flows in a winding course N.E. past Huntly and Drumblade, and enters the N. sea at Banff, after a course of more than 40 m . It abounds with salmon and trout; and lead ore has been observed on its banks. It has many small afluents, the chief of which are the Bogie and Isla.

DEVETSER, or Devecser, a market tn. Hungary, Thither Danube, co. of, and $23 \mathrm{~m} . W$. Vesprim, cap. dist. of same name, $81 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Pesth. It contains a parish church. Pop. 2800.

DEVICOTTA, a fort and seaport tn. of S. Hindoostan, Carnatic, dist. Tanjore; lat. $11^{\circ} 27^{\prime} \mathrm{N}$. ; lon. $79^{\circ} 47^{\prime}$ E. (r.); on the Coromandel coast, at the mouth of the Coleroon. The fort is situated on a small island. The approach to the port is very dangerous, owing to an extensive shoal (Coleroon Shoal) which projects 4 or 5 m . from the entrance to the river.

DEVIL'S, with various affixes, a name applied to a great variety of places in different quarters of the world, including: -1 , (-Basin), a harbour on the S. side of Tierra del Fuego, in Christmas Sound; lat. $55^{\circ} 16^{\prime} \mathrm{S} . ;$ lon. $70^{\circ} \mathrm{W}$. ; so named by Cook, in 1774, on account of its gloomy appearance. It is surrounded by high and savage rocks, which deprive it of the rays of the sun. -2 , An isl. off the coast of French Guiana. lat. $5^{\circ} 16^{\prime}$ N.; lon. $52^{\circ} 34^{\prime}$ W. (R.)-3, (-Dit Mountains), A mountain rarge, Ireland, co. Tipperary, and partly on the confines of King's co., rising to the height of 2084 ft . They extend S.W. to N.E. for about 24 m ., and separate the basin of the Suir from that of the Shamon.- $1,(-$ Punch Bow $)$, A small lake, Ireland, co. Kerry, near the summt of Mangerton Mountain, at an elevation of between 2000 and 3000 ft . above sea level. It is about $\frac{1}{2} \mathrm{~m}$. long, and fully one third broad, and in the centre is upwards of 150 ft . decp. - $-5,(-P e a k)$, A mountain, S. Africa, Cape Colony; lat. $33^{\circ} 57^{\prime} 12^{\prime \prime} \mathrm{S}$.; lon $18^{\circ} 31^{\prime} 45^{\prime \prime} \mathrm{E}$. (k.); having a height of 3315 ft .

DEVILLE-Les-Rouens, a vil. France, dep. Scine-Infericure, about $3 \mathrm{~m} . \mathrm{N} . W$. Rouen, in a rich valley, watered by the Cailly. It is an active, stirring place, with mannfactures of plain and printed cottons, chemical products, and paper, dye-works, with numerous cotton and other mills. P. 3610.

DEVIZES, a parl. bor. and market th. England, co. Wilts, finely situate on a commanding eminence, 82 m . W. by S. London. It consista of several streets, diverging from a spacious market place, well paved, and lighted with gas. Some of the houses have an antique appearance, being built of timber and plaster, but most of the others are handsome modern buildings. It has two handsome parish churches and places of worship for Ireslyterians, Baptists, Independ ents, Wesleyans, and the Society of Friends; a townhall, house of correction, and county bridewell. In the market place is a handsome cross, erected in 1815. It has a British school, and several charity schools, one of which, called the Bear Club Charity, was established in 1760, and is liberally supported; several almshouses, a dispensary, and a mendicity society. The woollon manufactures, once very considerable here, have been extinct for several ycars. Three silk manufactories have been recently established, and there is a factory for silk throwing, about half a mile from the town. Weaving of crape and sarsanet is on the increase, but malting is carried on less extensively than formerly. A large snuff manufactory has been long established. Markets, Monday and Thursday; six fairs annually - the largest on the 20th April. The borough returns two members to the House of Commons; constituency, 358 . Its municipal government is vested in
a mayor, six aldermen, and eighteen councillors. Devizes is supposed to owe its rise to a castle built here in the reign of Henry I., and dismantled in the reign of Edward IIF., and lardly any trace of which now remains. In the reign of Henry VIII. it was celebrated for its market, which is still the largest in the W. of England. Pop. (1841), 4631.(Local Correspondent.)

DEVON, a maritime co. England, bounded, W. by Cornwall, E. by Somerset and Dorset, N. by the Bristol Channel, and S. by the English Channel. Greatest length, N. to S., 72 m. ; extreme breadth, 67 m ; area, $2585 \mathrm{sq} . \mathrm{m}$., or $1,654,400 \mathrm{ac}$. It is the third largest county in England, and the fourth as regards population. It is in general hilly, and a large portion of it is occupied by the barren region of Dart-moor-an elevated tract, partly covered with masses of seattered granite, and partly consisting of heath and bog. This waste, which is upwards of 20 m . long, and from 10 to 15 m . broad, supports only a few thousand sheep and cattle, and some wild dwarf colts. The Vale of Exeter, comprising from 120,000 to 130,000 aeres, presents it remarkable contrast to this sterile tract, being one of the most beautilul and fertile districts in England. The S. extremity of the county, limited interiorly by a line drawn from Torbay to Plymouth Sound, called South Hams, comprising about 240 sq . 1 m ., is also extremely fertile, being so rich and productive as to be distingnished by the name of the garden of Devonshire. Following the sinuosities of its bays and inlets, Devonshire has about 212 m. of sea coast- 72 on the N., or Bristol Channel, and about 140 on the S., or English Chamnel. The former is, for the most part, steep and rocky, the latter is lined with eliffs throughout its whole extent. The principal bays are Bideford Bay, on the N. eoast, and Tor Bay, on the S. coast. The mineral productions of Devonshire, considered as objects of trade and manufacture, are principally tin and copper, which are wrought to a considerable extent. Granite, frcestone, limestone, and slate are abundant; and many thousand tons of porcelain clay are annually shipped for the Staffordshire potteries, and other places.

The elimate of Devonshire is remarkably mild in the $S$. part of the county, on which account it is much resorted to by invalids having pulmonary or inflammatory complaints; but it is bleak and piercing in the higher regions of Dartmoor. In the N. and N.E. parts it is somewhat colder than in the S., and it is there only that winter assumes any degree of severity. The rivers are numerous, and some of them of considerable size; the principal are the Axe or Exe, Teign, Dart, Plym, falling into the English Channel; and the Tawe and Torridge, falling into the Bristol Chanmel.

Notwithstanding the general fertility of the soil, and the mildness of the climate, agriculture is still in a very backward state in this county, attributable, in part, no doubt, to the general preference given to dairy husbandry, to which, indeed, it is best adapted, from the extent and richness of its grass lands. The principal productions of the arable lands are wheat, barley, beans, pease, potatoes, and a little flax. Butter, cheese, and live stock are the staple products of the county; nor must that peculiar delicacy of its dairies, the ' elotted ' eream of Devonshire, be overlooked. The butter is of excellent quality, and brings a high price in London, where most of it is sent; but the cheese is in general poor, being made mostly from skimmed milk. The cows used for the dairy are mostly of the breed of the county, and of a red colour. They are handsomely shaped, but have too great a tendency to fatten to be good milkers; but their beef is of superior quality. A great many oxen are reared and ex. ported annually from the county, espeeially from the $N$. distriets; they are famed for their docility and activity at work, and their aptitude to fatten. The breeds of sheep are excellent, both as regards tlesh and wool; they are reared mostly on the hills and more elevated districts-the low, moist lands not being favourable to them, although they fatten rapidly on thicir rich herbage. The whole stock has been estimated at 630,000 , and the annual prodnce of wool at 15,500 packs. In some districts considerable numbers of pigs are reared, not inferior in quality to any in England. 'The farms in this county are generally small; 150 to 200 acres, of which the greater part is in pasture, being considered a large farm. The cider orehard is another source of income to the Devonshire farmer; but its value has deereased nearly a half within
the last few years, owing, it is said, to the great age of the trees. An orehard produces 10 to 15 hogsheads an aere, which generally sells at 25 s . to 30 s . a hogshead, the cost of preparing it being from $3 s$. to $5 s$. A large portion of the cider produced is consumed by the farm labourers. The people are generally frugal and industrious, as is strikingly exemplified in the number of depositors in savings-banks, who are four times more numerous in Devonshire, in proportion to its population, than in Lancashire, although in the former a farm labourer receives but $9 s$. per week, while in the latter there is a larger amount of wages in circulation, in proportion to the population, than in any other part of the world.
The prineipal manufactures of the county are coarse woollen goods-druggets, serges. long ells, \&e.-exported mostly to foreign countries. The trade has declined much of late years, but is still considerable. Broad and narrow eloths are made in some parts, but not to such an extent as formerly. Carpets, in imitation of Turkish and Persian, are manufactured at Axminster, beautiful cushion laces at Honiton, and, in several towns, large quantities of shoes are made for the Newfoundland market. Linen is manufactured at Crediton and Plymouth.

Devonshire returns 22 members to Parliament-four for the county, two for the city of Exeter, two each for seven boroughs, and one each for those of Ashburton and Dart month. 1'op. (1851), 567,098.

DEVON.-1, A river, Scotland, eos. Perth and Clackmannan, rising in the Ochill hills, parish of Blackford, and, after a course of nearly 30 m ., suecessively E., S.E., S. W. by W., and S., falling into the Forth a little above Alloa. The Devon is not navigable; but it has been celebrated for the beauty of its scenery, and for the remarkable falls at Crook of Devon.-2, A co. Van Diemen's Land. It eomprises three hundreds and twelve parishes. It eontains three towns-Exeter, York, and Ilfracombe.

DEVON, North, a dist. of Aretic America, on the N. side of Barrow's Strait and Laneaster Sound, having W. Wellington Channel, and E. Baffin's Bay; intersected by the parallel of $75^{\circ} \mathrm{N}$., and between the meridians of $78^{\circ}$ and $92^{\circ} 30^{\prime} \mathrm{W}$.

DEVONPORT, a maritime, fortified, and naval arsenal, England, co. Devon, S. division, on the E. shore of the estuary of the Tamar, upon tinat part of it ealled the Hamoaze, which forms the harbour, 218 m . W. by S. London, and $1 \frac{1}{2} \mathrm{~m}$. W. Plymouth ; lat. $50^{\circ} 24^{\prime} \mathrm{N}$. ; lon. $4^{\circ} 12^{\prime} \mathrm{W}$. ; finely situated on an acclivity, commanding an extensive and beautiful view of the sea and surrounding country. It is of an oblong form, principal streets straight and well kept, paved, and lighted with gas; houses of stone, and generally well built. The footpaths are of marble obtained in the neighbourhood, and have a very beautiful appearance when washed by a shower. Water is obtained from Dartmoor. A wall 12 ft . high defends the town on the N., E., and S. sides, while the sea entrance is protected by heavy batteries. Outside the wall is a line or breastwork. with a fosse excavated in the solid rock from 12 to 20 ft . in depth. The principal publie buildings, exclu sive of the churches, are the guildhall, decorated with a noble Dorie portico; public library, ornamented with an Egyptian façade; meehanics' institute, temperance hall, royal British female orphan asylum, and the post office. Near the gnildhall there is a handsome fluted column, of the Doric order, ereeted to commemorate the naming of the town anew, ascended by a flight of 140 steps , and from the summit of which a magnificent view is obtained. There are six churehes, two chapels, and a licensed room for Divine service in the town, besides two Baptist ehapels, three Calvinist, two Independent, one Bible Christian, one Moravian, one Providence, one Tabernacle, one Unitarian, four Wesleyan, and one Mormonite. The educational institutions comprise 12 prineipal sehools, of various descriptions, for boys, including a national, and a naval and military free school, and five principal sehools for young ladies. The literary and scientifie institutions are a mechanies' institute, young men's society, the Christian young men's society, and working men's society ; charitable and benevolent associations, the royal British orphan asylum, royal dock-yard orphan asylum, provident society, public dispensary, and several other minor but not less useful charities. It is, however, as a naval arsenal, the largest by far in Great Britain, that Devonport
gttracts attention, and from which it derives its chief characteristics. The national works of one kind and another constructed for Government purposes, cover not less than 358 ac ., comprising one of the finest dock-yards in the world, and which will be equalled in magnitude by another now (1851) in process of formation, for the equipment of men-of-war steamers. The two dock-yards will comprehend an area of about 150 ac . An additional space of 10 ac . is occupied by the works of the Board of Ordnance, including a spacious gunwharf, and a barrack capable of accommodating upwards of 1000 troops. Devonport has no manufactures worthy of notice, but is almost wholly dependent on the royal arsenal, a large proportion of its inhabitants being dock-yard artizans and labourers. The remainder is composed chiefly of sailors' wives and children, shoemakers, small shopkeepers, and pensioners from the army and navy. The moral condition of Devonport is represented as very bad, and the density of its population greater than that of any other place in England; there being no fewer than 26,000 persons living on one-fifth part of a square mile, giving 10 individuals to each house; the proportion in Liverpool bcing seven, and in Manchester but six.

Down to the year 1824, Devonport was known as Plymouth dock, but in that year it obtained the name it now bears. The christening, or new naming the town, was performed with great ceremony. To commemorate this event, a fluted column, of the Doric order, elsewhere mentioned, was erected. The harbour of Hamoaze is about 4 m . long, and half a mile broad; its greatest depth, at high water, is between 18 and 20 fathoms; at low water, about 15 ; it is a magnificent repository for ships of war of all classes, and is capable of accommodating the entire Britisll navy at once. It returns two members to the House of Commons. Registered electors (1850), 2410. Pop. (1841) of bor. 43,532, of which 27,000 reside within the fortifications.

DEVRA-TABOUR, or Debra-Tabour, a populous tn . Abyssinia, 35 m. E. Lake Dembea; lat. $11^{\circ} 55^{\prime} \mathrm{N}$. ; lon. $37^{\circ} 45^{\prime}$ E. It is built on a plain of irregular surface, and occupies a large space, the houses being very much scattered, and greatly resembling ruined windmills. Its churches are numerous, and tolerably elegant, and it is inhabited exclusively by soldiers and females of easy virtue. The environs are infested with hyænas and tigers, and abound with game. (Combe et Tamisier's Voy. en Abyssinia.)

DEV Y NOCK, a vil. and par. Wales, co. of, and 7 m . W. Brecknock. The village is pleasantly situate at the extremity of the vale of Senny. Pop. 1927.

DEWCHURCH, two pars. England, Hereford:-1, (Little), 1640 ac. Pop. 330.-2, (Much), 4890 ac. P. 579.

DEWGHUR, a harbour and isl. Hindoostan, Malabar coast, in the Concan, lat. $16^{\circ} 23^{\prime} \mathrm{N}$. The harbour is formed close under the N.E. point of the island, at the mouth of a small river, and has three or four fathoms water, where a ship may lie sheltered from the S.W. monsoon.--The ISLAND, on which there is a fort, is situated on the S. side of the entrance of the river, and appears as part of the main, being nearly joined to it.

DEWLISH, par. Eng. Dorset; 3480 ac. Pop. 389
DEWSAH, a considerable tn. Hindoostan, prov. Ajmeer, 36 m . E. Jeypoor; lat. $26^{\circ} 50^{\prime} \mathrm{N}$. ; lon. $76^{\circ} 12^{\prime}$ E.; on the declivity of a hill, the summit of which is crowned with an extensive forest. It is surrounded by a ruined wall, and presents other evidences of antiquity and of former importance. It is a kind of second-rate place of pilgrimage, where a IIindoo fair and festival is occasionally held.

DEWSALL, par. England, Hereford; 500 ac . Pop. 40.
DEWSBURY, a market tn. and par. England, co. York, W. Riding. The town, $30 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. York, is situate at the base of a hill, rising from the Calder, and presents a very striking and somewhat interesting appearance, when approached by the Wakefield road, which runs to a considerable height above the level of the town. It has several good, but irregularly formed streets; is well lighted with gas, but very indifferently supplied with water. It has an ancient parish church, and four other places of worship connceted with the Establishment, all of recent erection; and chapels belonging to Independents, Wesleyans, Primitive and New Connection Methodists, Baptists, R. Catholics, and the Society of Friends. To most of these places of worship are attached a burying-
ground, and week-day and Sunday schools, for the children of both sexes; two charity schools-one of them, the Wheelwrights' Charity, was founded in 1727, for the instruction of 100 boys and 100 girls. There are also a mechanics' institution, library, and reading-room; a parochial library, and newsroom. Of late years, Dewsbury has been rising into importance as a manufacturing town, and has now several extensive and thriving establishments for the manufacture of blankets, woollen cloths, carpets, \&c. One of its principal manufactures is shoddy, a cloth made from old woollen rags, which, having been again reduced to wool by the aid of machinery, is re-spun, with the addition of a little fresh material, rewoven, re-dyed, and ultimately re-produced in the market as an entirely new fabric. Great improvements have recently been effected in this singular manufacture, from which many useful, and even elegant articles are now made. Upwards of 3000 persons-men, women, and boys-are employed in the manufactories of the town. Numerous good roads, excellent inland navigation by river and canal, and communication by railway with Manchester, Leeds, York, \&c., afford Dewsbury great facilities for trade. There is an clegant station here on the London and N.W. Railway, and a neat building, recently erected, for the county court. At Kirklees, in the parish of Dewsbury, is shown the tomb of the renowned freebooter, Robin Hood, who occasionally resided, and is generally believed to have died there. Area of par. 9620 ac . Pop. (1841), 23,806 ; of township, 10,600 ; tn. (1851), 14,050.-(Local Correspondent.)

DE WI'T'S'S LAND, the tract of country, W. coast, Australia, lying between the Tropic of Capricorn and lat. $21^{\circ} \mathrm{S}$. It was discovered by De Witt, in the ship Vianen, in 1628 , and called after him.

DE WITT'S ISLANDS, off the S. coast of Van Dicmen's Land, between S. Cape and S.W. Cape. The nearcst is about 6 m . from the mainland, the most remote about 10 m . They lie between lon. $146^{\circ} 20^{\prime}$ and $146^{\circ} 28^{\prime}$ E.

DEYNZE, or Deynse [anc. Donza], a tn. Belgium, prov. E. Flanders, 9 m . S.W. Ghent, on the Lys, and near the railway between Ghent and Courtray. It has two cluurches, the chief of which, Nôtre Dame, is an antique gothic edifice; several primary schools and benevolent institutions; manufactures of starch and tobacco, large gin distilleries and several breweries, dye-works, tanneries, \&c. The trade in linen, grain, and cattle, is important. Pop. 3600.

DEYRAH, a tn., N. Hindoostan, prov. Guhrwal, plea santly situate in the centre of the valley of Deyrah Doon; lat. $30^{\circ} 19^{\prime} \mathrm{N}$. ; lon. $77^{\circ} 45^{\prime} \mathrm{E}$. It is well built of stone, and has a neat bazaar, composed of large huts, and a Sikh temple, with its dependent edifices.-The valley, which is about 70 m . long, by 12 m . to 15 m . broad, exhibits great variety of surface and soil, is watered by numerous rivulets, swarming with fish resembling trout, and abounds in game of all kinds, from the tiger to the quail.

DEZA, a tn . Spain, Old Castile, prov. of, and 35 m . S.E. Soria, on a rugged hill. It contains a parish chureh, townhouse, primary school, and prison; and has manufactures of linen and hempen cloth, a dye-work, several flour-mills, and some trade in corn and cattle. Pop. 1424.

DEZPHOUL, a tn. Persia. See Desful.
DHALAC, an isl. Red Sea, off the coast of Abyssinia, N.W. extremity of Dankali, about 10 m . from the mainland; lat. $15^{\circ} 46^{\prime} \mathrm{N}$.; lon. $40^{\circ} 6^{\prime} \mathrm{E}$. (к.) It is 120 m . in circum ference, and of irregular form ; its S. side is 23 m . long, and its greatest breadth 18 m . It is principally composed of coral rock, interspersed with spots affording a supply of good grass in the rainy season. The only animals seen on the island are asses, goats, sheep, and antelopes; the latter are numer ous. There are several towns and villages on the island, of which Doobelloo, on the E. side, has the principal trade and best appearance; most of the houses are built of coral, others of loose stones; the outer walls are 10 ft . high, with sloping grass tops, the plastered houses having square tops. The trade of Doobelloo is principally with Loheia and Gheesan; whence millet and dates are imported in return for the produce of the pearl banks, such as fish, sharks' fins, the horny part of shell-fisl, turtle, and pearls. The supply of water obtained in the rainy season is preserved in tanks, but there are numerous wells besides in various parts of the island. The principal town and port was formerly Dhalac el Kebeer,
at the S. end of the island, but it has now scarcely water sufficient to admit small vessels, and is therefore going to decay. It has still, however, four mosques, two of which have domes, and two burial grounds, and many vestiges of its former importance. This island is surrounded by a great number of islets and small islands, distinguished by the general name Dahalac Islands.

DHAMONEE, a fortified tn. Ilindoostan, prov. Malwa; lat. $24^{\circ} 11^{\prime} \mathrm{N}$.; lon. $78^{\circ} 50^{\prime} \mathrm{E}$. The fort is of a triangular form, on a sinall eminence; the ramparts are in some places 50 ft . high, and in general 15 feet thick, with large towers. The town is encomposed by a loose wall mostly in ruins.

DHAR, or Dilaranuggar, an ane. eity, Hindoostan, prov. Malwa; lat. $22^{\circ} 31^{\prime} \mathrm{N} . ;$ lon. $75^{\circ} 20^{\prime}$ E., which at one time covered a much greater extent of ground than it does now. It is at present about three-quarters of a mile in length, by half a mile in breadth, and is surrounded by a mud wall. It contains some good buildings, and is watered by several large and two sinall tanks. The pettah or fort stands on a rising ground apart from the city, and is surrounded by walls 30 ft . high, fortified with towers at intervals. Opium is extensively cultivated in the surrounding territory. Inhabited houses between 5000 and 6000 . It is said to have contained formerly 20,000 .

DIIOFAR, Dhafar, or ZaFar.- 1 , a fertile and populous dist., S. coast, Arabia, eommencing at Ras-el-Ahmar, in lat. $16^{\circ} 55^{\prime} \mathrm{N}$. , and lon. $54^{\circ} 2^{\prime} \mathrm{E}$, and adjacent to, if not comprised within, the country named Mahrat. In this district there formerly stood a town of the same name, enjoying commercial importance and eelebrity, the total disappearance of which has been but recently ascertained. Dhofar has been always considered as the place referred to in the book of Genesis (x. 30), in the words, 'As thou goest unto Sephar, a monnt of the east.' It was in its immediate neighbourhood, also, that the Arabs placed the tomb of the prophet Híd, whose name is associated with the earliest traditions of their race. The only deseriptive account which we have of the town of Dhofar is that given by Iba Batutah, who visited it in the middle of the 14 th century. At that time it carried on a trade with India, exporting horses, and importing riee, the voyage, with a fair wind, being made in a month. Its ehief distinetion, aceording to tho intelligent Arab traveller, was its extreme filth, bad smell, and multitude of flies-all aseribable to the great quantities of dates and fish exposed for sale in the market. The inhabitants lived chiefly on fish, which they dried in the sun, and they not only ate it themselves, but also fed their horses and cattle with it. They manufaetured silk and cotton stuffs, and cultivated, among other things, the plantain and the eocoa-nut. Though gentle in manners, and courteous to strangers, they never yielded to oppression or political encroachment, and had successfully resisted every attack on their independence. Such was the state of Dhotar in the 14th century. But in the beginning of the 17 th century, when the Jesuit missionary, Pedro Paez, was brought a captive into that place, it was subject to the Sultan of Shehr, whose capital was in Hadramaut. With its independence it lost probably its vital principle, but its total disappearance was never suspected by European geographers; and even Lieut. Wellsted, an officer on board the vessel engaged in surveying that coast, ventured, in 1839 , to write these words, 'The next morning found us off Dafar, a small town and fort, which give their name to the contiguous district.' But the fact is, that thero is no town of that name on the coast. The ferite plain S.W. of Mirbat retains, indeed, the ancient appoliation of Dhofar; but instead of a single large town, it now exhibits a cluster of villages, formerly united under one ruler, but at present independent one of the other. These are Addaháriz, 'Tákah, Saláleh, El-Háfah, Aúkad, and Robaht. The largest of these villages is Addaháriz, between which and El-Hafah, lie the ruins of an ancient eity called El-Bélid, near a fresh-water lake, which is said to have formerly communicated with the sea, and to have formed the harbour of Dhofar. There are several fresh-water streams in this district, and it is not improbable that when their waters were all consumed in irrigation, the mouth of the inlet by which they had discharged theinselves into the sea became filled up. Fresh provisions are easily procured here; the district produces coarse frankincense and gum arabic, which, with ambergris and tortoise-shell, procured on the coast, are sent to India.

The port of Dhofar is Mirbat or Morbat, in $16^{\circ} 59^{\prime} 15^{\prime \prime} \mathrm{N}$. , and $54^{\circ} 47^{\prime} 40^{\prime \prime}$ E., a wretehed village, with a population of 500 , but having a secure and capacious harbour.-(Lieut. Cruttenden, I.N., Proceedings of the Geo. Soc. of Bombay; Capt. Haines in Jour. Roy. Geo. Soc., vol. xv.; F. Fresnel's Journal Asiatique, tom vi. (3d series); Wellsted's City of the Caliphs.) --2, Another celebrated city, named Dhofar, existed in Yemen, and is said, by Arab writers, to have been the residence of most of the kings of that country. Niebuhr, when at Yerim, learned that the ruins of Dhofar were but half a day's journey to the S.W. They were afterwards visited by Dr. Seetzen, who there first made the diseovery of Hamyaritic inscriptions. The ruins in question are probably about 80 m . N. W. by N. Aden. 'This Dhofar was apparently the Sapphara metropolis of Ptolemy, and Saphar Regia of Pliny.-(Niebuhr's Description de l'Arabie; V. Zach's Monatliche Correspondenz, vol. xxviii.)

DHOLPOOR, a tn. Hindoostan, prov. of, and 34 m . S.S.W. Agra; lat. $26^{\circ} 42^{\prime}$ N.; lon. $78^{\circ}$ E., situate within a mile of the Chumbal river, which is here about three-quarters of a mile aeross in the rainy season. The town is of considerable size, and the country in the vicinity productive.

DHURRUMPOOREE, a decayed tn. Hindoostan, prov. Malwa, r. bank, Nerbudda; lat. $22^{\circ} 10^{\prime} \mathrm{N}$. ; lon. $75^{\circ} 26^{\prime} \mathrm{E}$.

DIABLERETS (MONT), a remarkable meuntain, Switzerland, Bernese Alps, can. Valais, 11 m. N.W. Sion, and nearly the same distance N.E. St. Maurice, summit $10,620 \mathrm{ft}$. above sea level ; lat. $46^{\circ} 18^{\prime} \mathrm{N}$. ; lon. $7^{\circ} 11^{\prime} \mathrm{E}$. It originally terminated in five peaks, but three of these have fallen, and the two that remain threaten sooner or later to follow. The mountain is composed of limestone strata, much deranged and steeply inclined. The lower beds being soft and shaly, are disintegrated by the infiltration of water from the vast glaciers on the N.E., and after the supports and foundation are thus removed, large masses are detached from the mountain into the valley beneath, forming land-slips of the most tremendous kind. During the last century two catastrophes of this kind occurred-one in 1714, and another in 1749 . By the former, the surrounding district was shaken as with an earthquake, thick elouds of dust rose high into the air, masses of rock were hurled to a distance of several miles, and trees were thrown down by the current of air alone, produced by the fall of the avalanche. Many human beings and cattle perished at the same time. By the fall of the peak in 1749 , the eourse of the Liserne was arrcsted, and two small lakes formed, which still exist.

DIADIN, a tn. Turkish Armenia, 72 m. S.S.W. Erivan, r. bank, Euphrates. The houses are partly of wood and partly of stone, and have a mean appearance. It is defended by a fortress, having towers at intervals. Pop. about 3000 .

DIALA, or Diyalaf, a river, Asiatic Turkey, pash. Bagdad, an affluent of the Tigris, formed by the junction of the Shirwan, Holwan, and various other intermediate streams, all flowing from the mountain regions of Kirmanshah. It obtains the name of the Diala trom the junction of the Holwan, about lat. $34^{\circ} 15^{\prime} \mathrm{N}$. ; lon. $45^{\circ} 11^{\prime}$ E., from which, with some pretty wide deviations, it flows S.S.W., and falls into the Tigris about 10 m . below Bagdad. It is supposed to coincide with the ancient Gyudes.

DIALIGUELY, a vil., W. Africa, Bondou country, I. bank, Falemé; lat. $14^{\circ} 36^{\prime}$ N.; lon. $12^{\circ} 10^{\prime} \mathrm{W}$. It is a considerable place, and has many inhabitants (Foulahs), mostly employed in cultivation.

DIAMANT (Le), a tn., W. Indies, isl. Martinique, on a bay of its own name. The vicinity is roeky, but produces the manchineel tree abundantly.

DlAMANTE, a coast tn. Naples, prov. Calabria Citra, $30 \mathrm{~m} . \mathrm{N} . W$. Cosenza. In the vicinity, wines and excellent grapes are produced. Pop. 1700.

DIAMANTINA, two places, Brazil:-1, [formerly $T e$ juco], a city, prov. Minas-Geraes, in a valley surrounded by mountains, the capital of the Diamond district, about 30 m . N.N.W. Serro or Villa-do-Principe; lat. $18^{\circ} 28^{\prime} \mathrm{S}$. ; lon. $43^{\circ} 50^{\prime} \mathrm{W}$. It is built in the form of an irregular amphitheatre; the streets are irregular and wide, but badly paved. There are, however, many fine houses, of two and threo stories in height, both within the city and in the suburbs, all of wood. From its elevated position, and from the houses being whitewashed, and intermingled with several churehes,
rising above each other on the steep face of the acclivity, the city presents a very imposing appearance when viewed from a distance, an effect which is not lessened by the profusion of orange and banana trees that surround or are interspersed with the houses in the suburbs. The churches are handsome buildings, one called Nossa Senhora da Rosaria, belongs to the negroes from the coast of Africa. Over the high altar of this church is seen the figure of a black virgin. Most of the houses have small gardens attached to them, in which all the common Enropean vegetables and flowers are produced, also several kinds of European fruits, such as apples, pears, peaches, \&c. The city is abundantly supplied with excellent water, from springs that take their rise in the mountain on which it is situated; and has a primary school for boys and girls, and an hospital. Many of the shops present a very attractive appearance, being well stocked with European and other goods. The country around is so rocky and barren, that almost all articles of food are brought from a distance of from 30 to 60 m. , and exposed to sale in two large markct-places, called Intendencias. Owing to the elevated position of the city, the climate is, in general, mild and healthy, although sometimes so cold as to render a fire agreeable.

The inhabitants of the place are almost all employed directly or indirectly in the gold and diamond trade, the vicinity being rich in these precious minerals. The diamond washing, which was formerly a monopoly of the Government, is now open to any one who chooses to risk his time and capital in the pursuit. Those of the inhabitants who possess slaves employ them in the washings, in which, it has been computed, there are in all upwards of 10,000 persons employed within the district, a space comprising about $42 \mathrm{sq} . \mathrm{m}$. The women of Diamantina are remarkable for beauty, and the men are described as a fine race. Pop. of th., about 6000; of dist. 14,000.-(Gardner's Travels in Brazil.)-2, A tn., prov. MatoGrosso, at the confluence of the Ouro and Diamantino, about 150 m. N. N. W. Cuiaba. It stands on a height, and contains a parisll church, and a primary school. It owes its name to the dianonds found in its neighbourhood. The district is understood to be rich both in diamonds and gold. Pop. dist. 4500.

DIAMENTE, Neuque, or Neuguen, a large river, La Plata, an afflueut of the Rio Negro, having its sources on the E. slopes of the Chilian Andes, about lat. $36^{\circ} 16^{\prime}$ S.; lon. $70^{\circ}$ W., from which it flows S.S.E., and falls into the Rio Negro at lat. $38^{\circ} 20^{\prime} \mathrm{S}$. ; lon. $68^{\circ} 30^{\prime} \mathrm{W} . ;$ its whole course being about 170 m . The two rivers, though running in the same channel after they have joined, may be distinguished from each other by their different colours, the Negro being pure, whilst the Diamente is muddy and disagrecable to the taste. Villarino asserts that it is nearly as large as the Rio Negro, and nuch larger than the Colorado; it is much interrupted by small islands, overgrown with stunted willows. The lowlands along the shore have a most sterile aspect; and are again bounded by a steep range of red cliffs, which have in some places the appearance of ruined castles, and in others that of brick kilns.

DIAMOND CAPE, the extremity of a promontory, Lower Canada, at the conflnence of the St. Charles with the st. Lawrence, which rises abruptly 333 ft . above the St. Lawrence. On this promontory stands the citadel of Quebec. On the W., ard nearly on a level with the ramparts, are the plains of A braham, where, in 1759, General Wolfe fell.

DIAMOND HARBOUR, a harbour, Hindoostan, in the River Hoogly, 34 m. S.S.W. Calcutta; lat. (Semaphore) $22^{\circ} 11^{\prime} 12^{\prime \prime} \mathrm{N}$. ; lon. $88^{\circ} 10^{\prime}$ E. (R.) At this place the East India Company's ships usually discharge their outward, and take on board the greater part of their homeward cargoes, their loading being completed in Sagor roads. There are here Government warehouses for ships' stores, rigging, \&c. Provisions, of very indifferent quality, are obtained from the neighbouring villages, at high prices. A brick road, elevated to a considerable height above the adjacent rice fields, forms a communication with Calcutta. Diamond Harbour is singularly unhealthy, especially in the months of July, August, and September, during and after the periodical rains. The rice grounds in the neighbourhood are in a high state of cultivation, and yield abundant crops.

DIAMOND ISLAND, E. coast, Bay of Bengal, off the extreme S.W. point of Burmah; lat. $15^{\circ} 51^{\prime} 30^{\prime \prime}$ N.; lon. $94^{\circ} 17^{\prime}$ E. (n.), about 12 m . S. Cape Negrais. It is about
$1 \frac{1}{2} \mathrm{~m}$. in length, low, covered with trees, surrounded with dangerous reefs, and abounds with turtle of the largest size.

DIAMOR, par. Irel. Meath; 5468 ac. Pop. 794.
DIAMPER, a tn. Hindoostan, Travancore, prov. of, and 14 m . E. Cochin; lat. $9^{\circ} 56^{\prime} \mathrm{N}$.; lon. $76^{\circ} 29^{\prime}$ E. A celebrated synod was held here, without effect, by a Portuguese archbishop, for the conversion of the Nestorian Christians of this part of India to the R. Catholic faith.

DIANO, a tn. Naples, prov. Principato Citra, 45 m . S.E. Salerno, in the fertile valley of Diano, at the foot of Monte Mutalo, and ncar the Calore. It has a strong castle, five churches, rich in monuments ; three convents, and a theologi cal seminary. Pop. 6980.

DIANO d'Alba [anc. Dianium Albensium Pompejanorum]. a tn. Sardinian States, Piedmont, prov. of, and 3 m . S. Alba, on an elevated and agreeable site, surrounded by many highly cultivated hills. It has two churches, two squares, a cemetery, the remains of an ancient castle, and a beautiful esplanade planted with trees, and commanding a fine view of the country. An annual fair is held in November. Pop. 2000.

DIARBEKIR, a pash. Asiatic Turkey, Armenia, E. of the Euphrates, which forms its W. boundary, mostly between lat. $35^{\circ}$ and $39^{\circ} \mathrm{N}$.; and lon. $38^{\circ}$ and $42^{\circ} \mathrm{E}$. The country is of difficult access, exceedingly mountainous, interspersed with narrow and fertile valleys, replete with the most beautiful and romantic scenery. The inlabitants, mainly Kurds, live by agriculture and cattle rearing. Diarbekir is partly in ancient Mesopotamia.

DIARBEKIR, cap. of, and near the centre of the above pash.; lat. $37^{\circ} 55^{\prime} \mathrm{N}$. ; lon. $39^{\circ} 51^{\prime}$ E., on a high bank overlooking the Tigris, between which and the elevation on which the city stands there is a tract of meadow ground, forming one extensive garden, watered and tilled with the greatest care, and fertilized with the richest manure. Diarbekir is surrounded by a lofty thick wall, constructed of rectangular blocks of a black porous stone, regularly laid. The streets are paved, bnt narrow and dirty. The best houses are built of the same material as the walls, which is quarricd near the city, sometimes intermingled in building with a white limestone; most of them, however, are of rough stone, overlaid with a plaster of mud and straw. Some of the mosques are variegated in the manner above mentioned, the main body of the edifice being constructed of the black stone, and the minarets of the white. A part of the bazaars, and several handsome khans, are also built with the black stone. There are 20 mosques, five Christian churches, a synagogue, 20 baths, 15 caravanserais, and a number of bazaars. The principal mosque was formerly a Christian church. It is called the Great Mosque, and is the finest remnant of antiquity in the place. It has a large square tower, now used as a minaret. The Armenian cathedral and Chaldean church, lately erected, are also handsome structures; the latter is profusely ornamented with foreign paintings. The city is well supplied with the comforts of life, and with not a few of its luxuries. Ice obtained in the winter is preserved in the open air, by piling it in conical heaps and covering them with straw. In the summer it is sold so cheaply in the market, that the poorest man may cool his drink with it. The gardens in the vicinity furnish the city with a variety of excellent fruit, among which the melons are particularly celebrated. Water is abundant, a fine aqueduct on arches bringing an ample supply, which is afterwards distributed by numerous stone fountains in the streets. The bazaars, also, are well stocked with every description of goods. Extensive manufactures were formerly carried on here in iron, copper, silk, wool, cotton, and leather, but these, as well as the general trade of the city, have been latterly much deteriorated. It has still, however, some commerce with Syria and Aleppo, taking from the latter annually, goods to the amount of about $£ 8000$. Pop. about 13,000 or 14,000.-(Southgate, Hamilton's Asia Minor.)

DlBDEN, par. Eng. Hants; 2000 ac. Pop. 490.
DIBONG RIVER, a river, Tibet, one of the head streams of the Brahmapootra. It flows from the N.E., and enters Upper Assam, about lat. $28^{\circ}$ N. See Brahmartootra.

DICKELVENNE, a vil. and com. Belgium, prov. E. Flanders (Ghent), r. bank, Scheldt; with manufactures of linen cloth, distilleries, and flour wind-mills. Pop. 1632.

DICKLEBURGH, par. England, Norfolk; 2590 ac. Pop. 856.

## DIEPPE

DICOMANO [anc. Decumanum], a tn. Tuscany, prov. of, and 18 m . N.E. by E. Florence, at the confluenee of the Dicomano with the Sieve. It is well built, with wide and clean streets, and possesses two parish churches, and a considerable manufacture of silk and paper. Pop. 1480.

DIDAM, or Diem, a vil. Holland, prov. Gelderland, 6 m . S. Doesburg, with a rather large Reformed, and a highly decorated R. Catholic churel. Pop. 700.

DIDBROOK, par. Eng. Gloucester; 2330 ac. Pop. 353.
DIDDEH, a vil., W. Africa, Bondou country, situated about 7 m. W., l. bank, Falemé ; lat. $13^{\circ} 52^{\prime}$ N.; lon. $12^{\circ} 18^{\prime} \mathrm{W}$. It is a large and thriving 1 lace, built in a wide and fertile plain; adorned with many palm trees, but water scarce and bad. There is a tata or rude fort here; and a mosque of some beanty. The houses are clean and neatly kept; their inhabitants (Sarracolets) industrious and hospitable.

DIDDINGTON, par. Eng. Huntingdon; 1450ac. P.212.
DIDDLEBURY, par. Eng. Salop; 7400 ac . Pop. 896.
DIDGEL, or Little Tigris, a small branch of the Tigris, Asiatic Turkey, pash. Magdad, leaves the main stream at Samarra; lat. $34^{\circ} 20^{\prime}$ N., and flowing S. joins the Isa Canal, midway between the Tigris and Euphrates. Entire length, about 85 m .

DIDIER, several localities, France, the chief of whieh is St. Didier-la-Séauve, dep. Haute-Loire, 14 m . N.N.E. Yssingeaux. It was once of some note, contains an antique ehurch; and has manufactures of paper and ribbons, and some silk-mills. I'op. 1999.

DIDLING, par. Eng. Sussex; 1000 ac. Pop. 119.
DIDLINGTON, par. Eug. Norfolk; 1810ac. Pop. 77.
DIDMARTON, par. Eng. Gloucester; 170 ac . Pop. 95.
DIDSBURY, a vil. England, co. Lancaster, $5 \frac{1}{2}$ m. S. Manchester, r. bank, Mersey. The houses are well built of brick; water abundant. It has one clurch, two Wesleyan chapels, a national, day, and Sunday school, and a Wesleyan institution for the edueation of preachers. The people generally are employed in agriculture. Pop. 1248.-(Loeal Correspondent.)

DIE [anc. Dea Augusta], a tn. France, dep. Drôme, r. bank, Drôme, 26 m. S.E. Valence. This ancient town is finely situated in a valley, enclosed by hills, and is surrounded by walls, flanked with towers. The ehief edifices are-the eathedral, the Calvinistic church, the building once the bishop's palace; and the St. Marcel gate is a well-preserved Roman construction. IIere are some manufactures of woollens and silks, silk spinneries, tanneries, paper mills, \&c. Raw silk and good wine are produced in the environs, which are also rich in other produce. Die is the seat of a sub-prefecture, and court of first resort. Many Roman remains exist here. During the wars of religion in France, Die became a stronghold of the Protestants. While the Edict of Nantes was respected, it flourished; but after its revocation, it soon dwindled away. Pop. 3382.

DIE (St.) [anc. Fanum Deoduti], a tn. Frarice, dep. Vosges (Lorraine), on the Meurthe, 25 m . E.N.E. Epinal. It is agrecably situated at the foot of Mount Ornion, and is a handsome, well-built town, with clean regular streets. It gives its name to a bishopric, and is the seat of a court of first resort and a communal college; but none of its buildings are of any note. It however, possesses a public library of nearly 10,000 volumes, and was long famed for its abbey of Jointure, which counted among its abbots Pope Leo IX., nine princes of the house of Lorraine, and a great number of bishops. It has manufactures of various kinds of cotton goods; and a trade in corn, eattle, flax, hemp, cotton cloth, paper, ironmongery, fir planks, \&c. In the neighbourhood are iron and copper miles, ironworks, paper mills, and quarrics of variegated marble. Pop. 6433.

DIEBURG, a tn. Iesse-Darmstadt, prov. Starkenburg, r. bank. Gersprenz, 10 m . E.N.E. Darmstadt. It consists of the town proper, and three suburbs; contains a castle, parish ehurch, ehapel, house of correction, and old Capuchin monastery; and has manufactures of steel and tinware, red and white leather, a paper, oil, and several other mills; and five annual fairs. Dieburg is of Roman origin. Pop. 3100.

DIEDITZ, or Diedice, a tn. Moravia, circle of, and 16 m. E.N.E. Brumn, on the IIanna. It stands in a beautiful valley, contains a parish church and school, and has several mills. Pop. 13 6̈t.

DIEGO alvarez. See Gough's Island. diego garcia. See Chagos Islands.
DIEGO RAMIREZ ISLANDS, a group of rocky isls., S. Pacific Ocean, S.W. Cape Horn; lat. $56^{\circ} 25^{\prime}$ S.; lon. $68^{\circ} 44^{\prime} \mathrm{W}$. (r.) They resemble the top of a ridge of hills showing above water, and broken through by the sea. The two largest are about 200 ft . high, and are covered with tussac grass. On one, the second in size, there is a shingle beach, where a boat may be hauled up in safety, and a limited supply of good water may be obtained. The sea breaks furiously on the W. shore, covering the whole island with its spray, and no sheltered anchorage for a vessel can be had. The rocks appear to be composed of greenstone or very hard sandstone.

DIEGO (SAN), a tn. and harbour, Upper California; lat. $32^{\circ} 41^{\prime} \mathrm{N}$. ; lon. $117^{\circ} 11^{\prime} \mathrm{W}$. The harbour is commodious, and, beirg completely landlocked, affords secure anchorage in all weathers; but at the entrance is an extensive bank of kelp (Fucus giganteus), to avoid which, by ships of large burthen, a circuit of about 2 or 3 m . is necessary.-The town consists of a few houses of indifferent appearance, and the only trade carried on in it is in hides and tallow. The principal obstruction to the trade and prosperity of this place is the want of fresh water, which, even at the presidio, 3 m . from the port, is very indifferent. The mission formerly established here has fallen into decay.-(Belcher.)

DIEGO SUARIEZ BAY, or British Sound, Madagascar, near Cape Amber, N. extrenity of the island; lat. $12^{\circ} 13^{\prime} 48^{\prime \prime}$ S.; lon. $49^{\circ} 23^{\prime} 30^{\prime \prime} \mathrm{E}$. (r.) The entrance into the bay is narrow, being but about $\frac{1}{2} \mathrm{~m}$. wide, with 24 fathoms water; but the bay itself is spacious, and further in, branches off into four different harbours, each capable of containing the largest fleet. The land around rises into high ridges and lofty mountains of volcanic formation, with fertile slopes beneath, on which innumerable wild cattle may be at times pereeived grazing.

DIEKIRCH, a tn. Holland, duchy Luxemburg, in a beautiful valley, l. bank, Saner, 17 m . N. Luxemburg. It is an old and poorly-built place, is the seat of a court of law, and several public offices; contains a townhouse, parish church, R. Catholic seminary, three schools, a prison, and an old Franciscan monastery; carries on a trade in cloth, leather, and gypsum; and has several mills, and four annual fairs. P. 2400 .

DIELSDORF, a vil. and par. Switzerland, can. of, and 8 m . N.N.W. Zürich, at the W. Hoot of the Lagerberg. It contains a parish chureh, said to be nearly 1000 years old; and an orphan hospital; and has some good limestone quarries. In the neighbourhood is a workhouse for the whole bail. of Regensperg, to which Dielsdorf belengs. Pop. 642.

DIEMEL, a river, Germany, rising on the confines of the principality of Waldeek and the Prussian prov. of Westphalia. It flows N.E., then S.E. past Warburg ; and again N.E. to Karlshafen, where it joins the Weser on its l. bank. Total course, 46 m .

Diemen's Land (Van). See Van Diemen's Land.
DIEPENHEIN, or Diepen, a tn. IIolland, prov. Overijssel, 17 m . E. by S. Deventer, near r. bank, Schipbeek. It has a townhouse, church, and school; and manufactures some calicoes. Pop. 1389.

DIEPIIOLZ, a tn. Hanover, principality Hoya, chief place co. of same name, 60 m . W.N.W. Hanover, on the IIunte. It contains a castle, and has manufactures of woollen and linen cloth. Pop. of tn. 2523; of co. 21,438.

DIEPPE, a seaport tn. France, dep. Seine-Inférieure, on the English Channel, in a hollow between chalk hills, at the embouchure of the Arques, 33 m . N. Rouen, and 93 m . N.N.W. Paris ; lat. (W. jetty) $49^{\circ} 56^{\prime}$ N.; lon. $1^{\circ} 5^{\prime} 15^{\prime \prime}$ E. (r.) The houses, in general not lofty, are built of brick, many having balconies, and roofed with tiles; the strects are tolerably wide and regular. The Grande Rue, above 1 m . in length, runs parallel with the sea from the harbour to the castle, and has some tolerable shops. The part of it next the port has the best private buildings and hotels. The general appearanee of the whole place is respectable, even superior, when compared with most other French maritime towns; but almost the only public edifices worth special notice are the two Gothic churches, St. Jacques and St. Rémi. The former was begun in the 13th century, and though of unequal merit, is a fine building. St. Rémi's, founded in 1522 , is built in the mixed Gotho-Saracenic. The air of the place is pure, and
water abundant; the latter is brought to the town by an aqueduct 3 m . long, cut in the solid rock, which supplies 68 public, and numerous private, fountains. To the W. of Dieppe proper, is the suburb La Barre; and on the opposite side of the harbour La Pollet, which communicates with it by a stone bridge of seven arches, and is inhabited chiefly by sailors and fishermen. The port is spacious, and the depth of water in the basin sufficient for vessels of at least 500 tons; but the entry to it is difficult. It is formed by two jetties, with several quays, faced with masonry, and is defended by an old castle and a modern citadel. On the W. jetty is a lighthouse 39 ft . high. Dieppe is the chief watering-place of France, and is much frequented by visitors in summer, but still more towards autumn, during the recess of the Legislature, and vacation of the colleges and Government offices at Paris. The great baths, constructed on the shore in 1822, form a luxurious retreat for bathers and invalids, and include a theatre, \&c. Dieppe is the seat of a court of first resort, and a state chamber of commerce, and has an exchange and a customhouse, a communal college, a school of hydrography, a school for teaching lace-making, \&c., and a public library ( 5000 volumes). The manufactures include works in ivory, the most famed in Europe; works in horn and bones, lace-making, sugar-refining, shipbuilding, \&c. There is a busy fishery, especially for supplying Paris with mackerel, herring, \&c.; and the oyster beds in the locality are very extensive. The foreign trade of Dieppe bas been almost extinguished by the rise of Le Ilavre; but its port is much frequented by coasters. The yearly customs' receipts amount to $\mathcal{L} 36,000$. There is constant intercourse between this port and Brighton by steamers. Dieppe was the chief early port of France, and its inhabitants the most enterprising in trade colonizing. It was bombarded, and much damaged, by the English and Dutch sombined fleet, in 1694 . It was in a decayed state during the wars of the revolution and empire; and owes much to the Duchess de Berri, who first made it fashionable as a bathing place. Pop. 16,504.

DIERDORF, a tn. Prussia, gov. of, and 11 m . N.N.E. Coblenz, in a fertile district, on the Holzbach. It contains a Protestant and a R. Catholic parish church, a synagogue, and a castle with fine gardens; and has manufactures of ironware, a tile-work, several tanneries, and mills. In 1796, a battle was fought in the vicinity between the French and Austrians. Pop. 1300.

DIEREN, properly Diederen, a vil. Holland, prov. Gelderland, in the Veluwe, 9 m. N.E. Arnhem; with a school, a vinegar factory, and a liqueur distillery. The inhabitants are mostly engaged in agriculture. Pop. 1300.

DIERSBULG, a vil. Baden, circle Middle Rhine, on a mountain slope. It contains two churches, and a synagogue, and has several mills. Coal is worked in the neighbourhood. Pop. 1100.

DIESBACH.-1, (-Obcr), a vil. and par. Switzerland, can. of, and $11 \mathrm{~m} . \mathrm{S} . \mathrm{E}$. Bern, in a fertile valley. It contains a number of handsome buildings, the principal of which are the parish church, and chapel of ease, and the old castle of Diesbaeh, surrounded by fine gardens. Agriculture, and the raising of fruit, are the chief employments ; but there are also some woollen manufactures, and many of the poorer classes spin wool. Stapfer, a celcbrated writer on systematic theology, was minister here. Pop. 5915; Protestants.-2, (-U'nter), a vil. near the foregoing, bail. Biiren. Pop. 1380.

DIESSEN, a market tn., Upper Bavaria, on the S.W. shore of Lake Ammer, $26 \mathrm{~m} . \mathrm{S}$.W. Munich. It contains a handsome parish church, and has considerable manufactures of earthenware. Hops are grown in the vicinity. Pop. 1800.

DIESSEN, a scattered, but prettily situated, vil. Holland, prov. N. Brabant, 15 m. S.W. Hertogenbosch, on the Diesse. It has a large market-place, planted with trees, a church, and an annual fair. Pop. 540.

DIESSENHOFEN, a tn. Switzerland, can. Thurgau, cap. bail. of same name, 5 m . E. Schaffluausen, pleasantly situated on a lieight overhanging l. bank, Rhine, here crossed by a covered wooden bridge of five arches. It is surrounded by ancient walls, flanked with towers, and, except the lower part, is well built, with regular and spacious streets. It has a townhouse, of recent construction, and a church, used in common by Protestants and R. Catholics; but the building most deserving of notice is the Hof, with its old turrets of
unhewn stone, the residence of the Truchsesses of Diessenhofen. The inhabitants are chiefly employed in agriculture, including that of the vine, and cattle-dealing, particularly sheep, which they purchase in Würtemberg and Bavaria, and ultimately dispose of in France, often taking them as far as Paris. They have also tanneries, and engage in the transit trade between the Lake of Constance and Schaffhausen. Pop. 1517.

DIEST, a tn. Belgium, prov. S. Brabant, 32 m. E.N.E. Brussels, traversed by the Demer, which there forms several islands. The improvements which its fortifications have recently received, have made it a place of great strength. The church of St. Sulpitius is its only remarkable edifice. It has a college, several schools, and some benevolent institutions; several manufactures, that of hosiery of considerable extent; but the chief products of the place are beer and gin. The former, in particular, bears a high name, and is largely exported. Diest was once a feudal barony, of which the princes of Orange were lords. The town was taken, in 1705, by Marlborough; retaken the same year by the French, and dismantled. Pop. 7319.

DIETENHEIM, a vil. Würtemberg, circle Danube, 1. bank, Iller, 14 m. S.S.E. Ulm. It contains a handsome parish church, and a castle; but was almost entirely destroyed in the Thirty Years' war. Pop. 1251.

DIETFURT, a tn. Bavaria, circle Regen, on the Ludwig Canal, and at the junction of the Laber with the Altmühl, 21 m . W. Ratisbon. It contains four churches, a Franciscan monastery, and poorhouse; and has tile-works, and two mills. Pop. 957.

DIETIKON, a vil. and par. Switzerland, can. of, and 8 m . W.N.W. Zürich, at the confluence of the Reppisch or Repst with the Limmat. It contains a parish church, which is used in common by Protestants and R. Catholics, who are nearly equal in number; and lias some transit trade. The district is fertile, and produces a good deal of corn. Several contests took place here, in 1799, between the French and Russians, generally to the advantage of the former. P. 1025

DIETLINGEN, a vil. Baden, circle Middle Rhine, 12 m . S.E. Carlsruhe. It contains a parish church, and has quarries of limestone and marble. A good deal of excellent wine is produced in the vicinity. Pop. 1340.

DIETWEIL-Gross, a vil. and par. Switzerland, can. of, and 8 m. N.N.E. Luzern, near l. bank, Reuss. It stands in a beautiful and fertile valley; contains an old church, picturesquely situated on a height, and a handsome school-house; and has manufactures of linen, and some trade in cattle and swine. Pop. 2297.

DIETZ, a tn. Nassau, cap. bail of same name, picturesquely situated on both sides of the Aar, at its junction with the Lahn, which is here crossed by a bridge, 21 m . N. W. Wiesbaden. It consists of the old and new town, contains a R. Catholic, and two Protestant parish churches, a Latin school, and a workhouse. On a height above the town is the old castle of the Counts of Nassau, now converted into a prison; and at a short distance is the château of Oranienstein, belonging to the duke, but not inhabited, and no way remarkable. Pop. 3040; of bail. (area, 51 geo. sq. m.), 14,377.

DIETZENBACH, a vil. Hesse-Darmstadt, prov. Starkenburg, about 7 m . E. Frankfort-on-the-Main. It contains a R. Catholic parish church. Pop. 1239.

DIEU, or YeU [anc. Insula Dei], an isl., can. and com. France, dep. Vendée, about 18 m . from the coast, and 15 m . S.W. the Isle Noirmoutier; lat. $46^{\circ} 40^{\prime} \mathrm{N} . ;$ lon. $2^{\circ} 20^{\prime}$ W.; arca, about $14,500 \mathrm{ac}$. The soil is scanty, the whole island being a mere mass of granite, on its W. side, steep, and inaccessible; but on the E. so low as to afford a tolerable harbour. The inhabitants mostly subsist by fishing. There is a small town here called the Isle Dieu. This rocky island is defended by a fort and several batteries. It, was taken by the English in 1795. Pop. 2492.

DIEULEFIT, a tn. France, dep. Drôme, 18 m. E. Montelimart, at the confluence of the Faux and Abroa, in a valley shut in by two lofty hills. It is the greatest manufacturing locality in the department, but has no public or other buldings of any note, excepting a handsome Protestant temple, and its dependent model school. The chief articles made in Dieulefit are-pottery (to the value of $£ 36,000$ yearly), woollen cloth, serge, moleskins, leather, blankets, sheets, \&c. There are also several tanneries, glassworks, and dyeworks. Two

## DlJON

acidulated springs in the place are much resorted to by invalids. During the religious troubles in France, the town was a Protestant stronghold, and its possession was keenly contested by R. Catholics and Huguenots. In the commune is a natural grotto, known by the strange name of 'The Tom Jones.' Pop. 3041 .

DIEUZE, or Duze, a tn. France, dep. Meurthe, 26 m . E.N.E. Nancy, on the Seille and the Spin. It possesses a communal college, and has several tanneries, but the chief product of the locality is rock salt, the mines of which, long worked by the state, and yielding to the amount of 5000 tons yearly, were farmed to a company in 1842. The site of the town is said to be that of Decem Pagi, mentioncd in Cæsar's Commentaries. Pop. 3863.
D)IEZE, Diese, or Dies, a river, IIolland, prov. N. Brabant, formed by the junction of the Aa and the Dommel at Hertogenbosch, whence it flows N.N.W. past Crevecœur, and falls into the Maas.

DIFFNANE ISLAND, Red Sea, one of the Dahalac group, $8 \frac{1}{2} \mathrm{~m}$. from the nearest shore. It is a low coral island, intersected by small salt-water creeks, filled with mangrove trees, and surrounded by a reef.

DIGBY, par. Eng. Lincoln; 2800 ac. Pop. 364.

DIGBY, a small tn. Nova Scotia, pleasantly situated on the S.W. side of the basin of Annapolis, 110 m . W.S.W. Halifax. The

DIJON, as seen from Mont Musard.-From Maillard Vogage Pittoresque en Bourgokne. fishing is actively prosecuted here, and some trade is carried on. A steamboat plics regularly between this port and St. John's, New Brunswick.

D1GGES ISLANDS, a group of three small isls. Arctic Ocean, S.W. side of Hudson's Strait, W. of Cape Wolstenholme, and S.E. Mansfield Island ; lat. (W. extreme) $62^{\circ} 37^{\prime}$ N.; lon. $74^{\circ} 18^{\prime}$ W. (r.)

DIGHTON, a port of entry, U. States, Massachusetts, $41 \mathrm{~m} . \mathrm{S}$. Boston, on the Taunton, which is navigable to this place for small craft. Pop. 1378.

DIGNANO, a tn. Austria, lllyria, on a hill, 47 m . S.S.E. Trieste. It contains a collegiate church, with some good pictures, and an elementary school ; is the seat of district courts and offices, and has an important trade in wood, sent chiefly to Trieste and Venice. The buildings of the old Franciscan and Capuchin monastery are now used as barracks. The vine and olive are extensively cultivated in the district. Pop. 3600.

DIGNE [anc. Dinia], a tn. France, cap. dfp. Basses-Alpes, on the Bléone; lat. $44^{\circ} 5^{\prime} \mathrm{N} . ;$ lon. $6^{\circ} 19^{\prime} \mathrm{E} . ;$ picturesquely situated on a projecting mountain slope; but its houses are mean, and its streets crooked and ill kept. It is the seat of a suffragan bishop, a communal college, a theological seminary, \&e. Its chief manufactures are articles in leather; and its trade is in dried fruits, particularly prunes and pistachio nuts ; honcy, wax, woollen and linen cloth, hemp, hemp and clover seed, cutlery, and kid-skins. At a little more than 1 m . from the town are several hot saline springs (temperature $104^{\circ}$ Fah.), and four baths, used for affections of the skin, wounds, paralysis, \&c. The environs of Digne are very attractive, and the valley of the Bléone picturesque. Pop. 3730.

DIGOA, or Deegoa, a tn. central Africa, Bornou, between Affagay and Kouka, the capital, abont the 12 th parallel of lat. Pop. 30,000.

DlGOIN [anc. Denegontium], a tn. France, dep. Saône-et-Loire, 14 m . W. Charolles, advantagcously situated on the Loire, and at the head of the Canal du Centre, which connects that river with the Saône. It has manufactures of earthenware, cutlery, and canvas bagging; also large building-yards, lime-kilns, \&c. There is an active transit trade, much of the Mâconnais and Châlonnais wines being loaded here. Pop. 2503.

DIGSWELL, par. Eng. Hertford; 1270 ac. Pop. 187.
DIGUE (LA), an isl. Seychelles Archipelago, Indian Ocean ; lat. $4^{\circ} 21^{\prime} 12^{\prime \prime} \mathrm{S}$. ; lon. $55^{\circ} 55^{\prime} 15^{\prime \prime} \mathrm{E}$. (R.) It is surrounded by a reef, and the landing is diffienlt. It is inhabited.

YoL. I.

It is of an oval form, and is surrounded by a lofty wall, with five gates. The ramparts are finely planted, and, along with other plantations both within and without their enclosure, fnrnish a series of beautiful promenades. Dijon is, in general, well built. The most of the streets are regular and spacious, and lined by handsome houses and fine hotels of hewn freestone. Many of the buildings belong to the period when Dijon was capital of the dukedom of lurgundy, and are remarkable for the massiveness and solidity of their construction. The chief public edifices are the cathedral of St. Benigne, a building of vast extent, with little architectural beauty, and a lofty wooden spire above 300 ft . high; the church of Nôtre Dame, in the purest Gothic, and remarkable alike for the delicacy of its ornaments, the beauty of its portal, and the boldness of its construction; the church of St. Michael, with two richly decorated towers surmounted by octagonal cupolas, and with a portal on which Sambin has lavished all the ornaments which his luxuriant imagination could devise; the ancient palace of the dukes of Burgundy, at a later period the Palais des Etats, and now used partly as the Hotel de Ville, partly as a museum, which is rich in monuments of the middle ages, and a library, containing 40,000 printed volumes, and from 500 to 600 MSS ; and the theatre, adorned with a peristyle of Corinthian columns, and, after that of Bordcaux, the finest building of the kind in France, out of the capital. The Palais de Justice, containing the law courts, was formerly the parliament house of Burgundy. The botanical garden, founded, in 1722, by one of the magistrates, whose cenotaph forms one of its principal ornaments, and the neatly laid out cemetery on the Paris road, are objects of publie interest, and deserving of notice. Dijon is the seat of a bishop, of a court of appeal for departments Côte-d'Or, Haute-Marne, Saône-et-Loire; a court of first resort and commerce, and a chamber of commerce; and is well provided with establishments both benevolent and educational. Among the former are the general hospital, the hospital of St. Anne, the orphan asylum, \&c.; among the latter, the Academie Universitaire, with 16 professors; the college royal, the Faculté de Droit, attended by 300 law students; the Ecole des Beaux Arts, a diocesan seminary, a secondary school of medicine, and a primary normal school. The manufactures of the place chiefly consist of cloths, hosiery, blankets, wax-candles, mustard, vinegar, chemical products, paper hangings, \&c. There
are also numerons tanneries, several brass, iron, and type foundries, machine factories, distilleries, worsted, cotton, and oil mills. The local traffic is considerable, particularly in the wines of Burgundy, the trade in which is concentrated here. The other articles of trade are leather, grain, flour, wine, wood, hemp, and woel. The immediate environs are very attractive, including a public park and ornamental grounds; while, a few miles to the N.W., the Val de Suzon opens into several glens of romantic beauty. Many eminent men were natives of Dijon ; the celebrated Bossuet, Crébillon, Saumaise (Salmasius, the antagonist of Milton), Piron, Rameau, Guyton Morveau, \&c. St. Bernard, the famous founder of Citeaux, was born in a neighbouring village; and a bronze statue of him has lately been erected in a new quarter of Dijon, called the St. Bernard suburb. Dijon is a very ancient city, and is believed to be of Roman foundation. The annals of the middle ages give constant evidence of its importance, in early times, as the capital of a principality, the rival of ancient France in extent of territory, and occasionally its superior in power. After the death of its last independent duke (Charles the Bold, slain in 1477), his Burgundian possessions having merged into the French dominions, the comparative importance of Dijon immediately sank. Pop. (1846), 26,674.

DIJONNAIS, a small anc. dist. France, forming a dependency of the old prov. Bourgogne, and now included in dep. Côte-d'Or. Dijon was its capital.

DILHAM, par. Eng. Norfolk; 1390 ac. Pop. 488.
DILHORNE, par. Eng. Stafford; 3550 ac. Pop. 1579.
DILIGENT S'TRAIT, a channel or passage, Bay of Bengal, between the S.E. coast of the middle Andaman and some contiguous islands, and a group or chain of larger islands from 9 to 15 m . off, extending from lat. $11^{\circ} 48^{\prime}$ to $12^{\circ} 20^{\prime} \mathrm{N}$. It is from 6 to 9 m . wide, except towards the middle, where it is only 2 or 3 m . in width betwixt the nearest islands. The islands which form the $\mathbf{E}$. side of this strait are generally high, covered with wood, and connected together by reefs.

DILLENBURG, a tn . Nassau, cap. bail. of same name, r. bank, Dille, 41 m. N.N.W. Frankfort-on the-Main. It is the seat of a high court of appeal, and of a criminal court; contains a R. Catholic and two Protestant churches, a castle, school, and orphan bospital ; and has manufactures of tobacco, a copper furnace, a potash work, lime works, and an oil and saw mill. Pop. of tn .1851 ; of bail., area 53 geo. sq. m., 16,900.

DILLI, or Delly, a tn., Indian Archipelago, N.W. coast, isl. Timor, Portuguese possessions; lat. $8^{\circ} 33^{\prime} \mathrm{S} . ;$ lon. $125^{\circ} 34^{\prime}$ E. (r.) ; in a low situation, overlooked by high lands, which renders it difficult to be perceived until closely approached. Fine buffaloes, hogs, and vegetables, may be got here, also rice and poultry, but the latter are neither cheap nor abundant. The sea wind, setting in regularly during the day, renders this place easy of access during the S.E. monsoon. Dilli, whether justly or not, is considered more unhealthy than any spot in the E. seas. It is subject to fevers, both remittent and intermittent, at all times of the year, there being no peculiarly healthy or unhealthy season.

DILLINGEN, a tn. Bavaria, circle Swabia, cap. bail. of same name, l. bank, Danube, here crossed by a bridge, 24 m . N.W. Augsburg; pleasantly situated, surrounded by walls in a dilapidated state, and well built. It contains four churches and two chapels, a castle, once the ordinary residence of the bishop of Augsburg; a lyceum, formerly a Jesuits' college; a gymnasium, ecclesiastical seminary, normal and Latin schools, a townhouse, barracks, orphan, and two other hospitals; and has manufactures of woollen and linen cloth, a paper-mill, building docks, and some shipping trade. Fruit and hops are extensively grown in the vicinity. The university, founded in 1552 , and long under the management of the Jesuits, was abolished in 1802. Pop. of tn. 3453 ; of bail., area, 48 geo. sq. m., 15,511 .

DILLINGEN, a vil. Prussia, prov. Lower Rbine, gov. of, and 29 m. S. by E. Treves, at the confluence of the Prims with the Saar. It contains a R. Catholic parish church. There are iron-works in the vicinity. Pop. 981.

DILLY, or Delly Mount, a headland, S. Hindoostan, which may be considered as marking the limit between the coasts of Canara and Malabar ; lat. $12^{\circ} 2^{\prime}$ N.; lon. $75^{\circ} 16^{\prime}$ E. It is very couspicuous, and may be seen from sea, in clear
weather, from a distance of from 24 to 27 m . The contiguous coast, being low and woody, is not seen far, which gives the mount the appearance of a high island when viewed either from the N. or $S$. On the extremity of the headland there is an ancient black-looking fort.

DILMAN, a tn. Persia, prov. Azerbijan, 75 m . W. Tabreez, and 30 m . S.S.W. Khoi, in the large and fertile valley of Selmas. It is a new town, there being an old one of the same name, now almost in ruins, about 4 m . W. from it. It is of considerable extent, and is surrounded by gardens. The bazaars are poor and ill supplied, but the streets are clean. Pop. estimated at 15,000 .

DILN [Hungarian, Bela-Banya], a mining tn. Hungary, Hither Danube, co. Honth, 2 m . from Schemnitz. It is a place of some antiquity, and rose to considerable importance in the times of Bela III., but has since greatly decayed. It contains a handsome church, and has several stamping and gold-washing mills and smelting furnaces. Pop. 1680.

DILW YN, par. Eng. Hereford; 6080 ac. Pop. 1060.
DIMI'TROWSK, a tn . Russia, gov. of, and 47 m . S.W. Orel, r. bank, Oscheritza, at its confluence with the Narusa. It contains two churches, and has manufactures of various kinds, but the inhabitants live chiefly by agriculture. Pop. 3000.

DIMITKANA, a tn. Greece, Morea, on an affluent of the Carbanara, one of the principal branches of the Rouphia, $15 \mathrm{~m} . \mathrm{N}$.W. Tripolitza. Before the Russian invasion in 1770 , this town was one of the most important places in the country.

DINAGEPOOR [anc. Dinajpoor], an inland dist. Hindoostan, prov. Bengal, between lat. $24^{\circ} 48^{\prime}$ and $26^{\circ} 18^{\prime} \mathrm{N}$.; and lon. $88^{\circ}$ and $89^{\circ}$ E.; bounded, N. by Rungpoor and Purneah, S. by Rajeshahy and Mymunsingh, E. by Rıngpoor and Mymunsingh, and W. by Purneah and Boglipoor. Greatest length, S. to N., $105 \mathrm{~m} . ;$ greatest breadth, 82 m . Area, 5374 sq. m. The surface is undulating, but in no part attains a greater clevation than 100 ft . It is everywhere intersected by rivers, the principal of which are the Attri, Mahanada, Jamuna, Korotoya, and Teesta, all of which are navigable by large boats during the rainy season ; when, also, some of the small streams in the valleys form sheets of water of 50 and 60 m . long, and 2 or 3 broad. The soil is generally of a very light ash colour. Rice is the principal crop, and is abundant or otherwise, in proportion to the quantity of rain that falls. The average produce is between $36,000,000$ and $37,000,000$ maunds annually ( $25,714,285$ cwt. and $26,428,282$ ewt.) Indigo is next in importance. Hemp, sugar, and cotton are are also raised, but in small quantities: the first is cultivated for its leaves and buds, which have an intoxicating quality. The climate is extremely variable, and, at particular seasons, very unhealthy. The chief natural vegetable productions are the banyan tree, which here attains great size and beanty; the peepul tree (Ficus religiosa), the bread-fruit tree, the tamarind, and the jigal tree. Posts of the latter wood are often used in house-building, and, being thrust into the ground, take root, put forth branches, and produce a very pleasing effect. The breeds of oxen and horses are both miscrable, the latter being sold from 4 s .6 d . to $11 \mathrm{~s} .6 d$. each. Swine are more numerous than sheep. There are few beasts of prey in this territory. Tigers, leopards, wolves, and hyenas, are almost unknown; and elephants and rhinoceroses rarely seen. Wild buffaloes, otters, porcupines, and ichneumons are numerous; and bears are met with in some particular localities, but are of an inoffensive kind. Water-fowl abound, and fish are to be had in great plenty when the rivers are low, which they generally are for eight months of the year. The principal towns are Dinagepoor, the capital ; Malda, Gour, and Raygunge, besides a number of villages. The whole population has been reckoned at $3,000,000$, but there is reason to believe that it has increased since this estimate was made. Seven-tenths are Mahometans, and the remaining three-tenths Hindoos.

DINAGEPOOR [Dinajpoor, the abode of beggars], a tn. Hindoostan, prov. Bengal, cap. above district; lat. $25^{\circ} 35^{\prime}$ N.; lon. $88^{\circ} 45^{\prime}$ E.; r. bank of a branch of the Attri river, 205 m. N. Calcutta, and 100 m. N.N.E. Moorshedabad. The town consists of four portions, with a square in the centre surrounded with shops. The houses are mean, being mostly mere huts. The European residences and offices are among the exceptions; but even these are in exceedingly bad taste.
as regards their architecture, though large, and sufficiently eommodious. It is the seat of the British judicial and revenue courts, but is, on the whole, a very poor place. Pop. computed at 30,000 .

DINAN [anc. Dinnanum], a tn. France, dep. Côtes-du. Nord, on the Rance, 34 m . E. by S. St. Brieuc. It stands on a steep hill, nearly 200 ft . above the river, is surrounded by high old walls, piereed with four large gates, and outwardly has an imposing look, but the interior is by no means prepossessing. The older streets are narrow, erooked, and dirty, and many of the houses mean, several being erazy wooden constructions. There are, however, four open arcas in the place, one of a good size; and in the better quarters are several good houses, built of granite or with stone fronts. Dinan was formerly defended by a strong eastle, part of which now serves as a prison. The ancient boulevards, planted and partly laid out as gardens, afford agreeable walks. The chureh of St. Sauveur is a beautiful edifice, of ornate Gothic, with a fine spire. The church of St. Malo has a fine ehoir. The only other noteworthy edifice is the Tour de l'Horloge, which is of great height, and built of granite. Dinan has a court of first resort, a theological seminary, and a eommunal eollege. Its manufactures consist of fine linen and sailcloth, cotton and woollen goods, nails, slop shoes, and beet-root sugar. It has also some barge-building yards, tanneries salt refineries, limekilns, \&e. Being situated near the embonchure of the Rance, and at the head of the canal Hle-ct-Rance, it has a considerable coasting and inland trade. In 1841, the gross customs were about $£ 6410$. In the environs, which are very attractive, are chalybeate springs, mueh resorted to. During the middle ages, Dinan was often besieged; it was taken by Duguesclin in 1373, by De Clisson in 1379 . Duelos, Mahé de la Bourdonnaie, and Broussais were born here. Pop. 7705.

DINANT, a tn. Belgium, prov. of, and 14 m. S. Namur, on the Meuse, a little below the junction of the Lesse. It is hemmed in by limestone rocks, one of which, of a pyramidal form, is erowned by the eitadel. The public squares are three in number, and the principal street lies along the river, which has finely-wooded banks, and is traversed by a handsome stone bridge. The principal buildings are the ehurch of Nôtre Dame, a Gothic structure, and the townhouse, once the
ing to old ehronicles, its name is derived from the goddess Diana, who was worshipped and had a temple here. As early as the 12 th century it was strongly fortified, and deemed inpregnable. In 1466, Philip the Good, Duke of Burgundy, attaeked it with 50,000 men and a formidable artillery, took it by assault, gave it $u p$ to pillage for three days, then razed it to the ground, and, taking 800 of the inhabitants, tied them by twos, back to back, and threw them into the Meuse. It was rebuilt in 1493 , but has since been twice taken by the French, namely, in 1554 and 1675 . Pop. 5654.

DINAPOOR, a tn. Hindoostan, prov. Bahar, r. bank, Ganges, about 12 m. N.W. Patna, and 290 m . N.N.W. Cal cutta ; lat. $25^{\circ} 37^{\prime} \mathrm{N}$. ; lon. $85^{\circ} 5^{\prime} \mathrm{E}$. This is a great English military station. It contains three extensive squares of barracks, uniformly built, but of one story only. They are, however, handsome, being ornamented with arcaded windows, and pillars between them. The squares are erossed by walks of pounded brick, as a substitute for gravel, which is not to be had in this part of India. There are also extensive barracks for the native troops. The cantonments are capable of accommodating between 5000 and 6000 troops. Around the station are a great number of good bungalows, with small parks and gardens; and along the bank of the river extends the bazaar or town of Dinapoor, upwards of 1 m . in length, and, like many of the Indian bazaars, a confused assemblage of thatched buts and ruined brick buildings, seldom more than one story high.

DINARIC ALPS. See Alrs, p. 102.
DINAS, par. Wales, Pembroke. Pop. 819.
DINAS MOWDDWY, a market t . Wales, co. Merioneth, 8 m . E. by S. Dolgelley, on the Cerist, at its junction with the Dovey, consisting of one principal strect, the houses of which are rather of a mean appearance. Market on Saturday ; several fairs annually.

DINDER, par. Eng. Somerset; 1050 ac. Pop. 248.
DINDIGUL, a $t n$. of S. Hindoostan, cap. dist. of same name, 1 C 2 m . N.E. Cape Comorin; lat. $10^{\circ} 23^{\prime} \mathrm{N}$. ; lon. $78^{\circ} 2^{\prime}$ E. It is a elean and neatly-built little town, particularly the bazaar, which is lined on both sides with trees. A small population of native Christians, a branch of the Malabar R. Catholies, reside here, and inlabit a particular quarter of the town, where their houses are distinguished by a little cross at the top. There is a fortress here of considerable strength. Pop. 3200.

DINDING ISLANDS, a group of small isls., Malacea Strait, lying off the Perak river; lat. $4^{\circ} 20^{\prime}$ N.; lon. $100^{\circ} 32^{\prime}$ E. Pulo Dinding is a beautiful granitic island, 250 ft . high, and covered with thick woods from the margin of the sea to the summit.

DINEDOR, par. Eng. Hereford; $\mathbf{1 7 4 0}$ ac. 1'op. 289.

D1NGELSTAODT. - 1, A market tn. Prussia, gov. Erfurt, 11 m . W.N.W. Mühlhausen, r. bank, Unstrut. It is surrounded with walls, contains a parish ehureh, and has manufactures of woollen and eotton goods, and four annual fairs. Pop. 2489.-2, A vil. I'russia, prov. Saxony, gov. Magdeburg, circle of, and near Oschersleben, on the Hiy. It contains a parish ehureh, and has limekilns, and an oil and other mills. Pop. 1371.

DINGESTOW, par. Eng. Monmouth; 2120 ac. Pop. 201.
DINGLE, a market tn . and seaport, Ireland, eo. Kerry, on a hill-slope, N. side bay of same name, 188 m . S. W. Dublin; lat. $52^{\circ} 9^{\prime} \mathrm{N}$. ; lon. $10^{\circ} 16^{\prime} \mathrm{W}$. The streets are irregular, but contain many respectable-looking houses, with gardens attached, and, as a whole, the town presents rather a pleasing appearance; it is much frequented for sea-bathing. It has a parish ehureh and a handsome R. Catholic elapel, national and parochial sehools, a nunnery, and a dispensary. The harbour, only suited for small vessels, is both difficult and dangerous to make during strong W. winds. Corn and butter are sent to Liverpool ; and iron, eoal, salt, and eartlienware imported. A well-supplied market is held on Saturdays. Dingle is a constabulary police and coast-guard station. It was in former times much frequented by the Spaniards. who
came to fish in the bay, and to trade with the inhabitants. A number of persons of that nation also settled in the country, and many of the natives, and also of the old houses, display marked indications of Spanish origin. Pop. (1841), 3386._ The bay is spacious, extending $14 \frac{1}{2} \mathrm{~m}$. from Dunmore Head, on the N., to Brea Head, on the S.; while inland it extends 21 m ., with a gradually-diminishing breadth of from $14 \frac{1}{2}$ to 6 m .; beyond which it is prolonged for a considerable distance under the name of Castlemaine Harbour. At its entrance, on the N., are the Blasquet islands, and, as it has no other protection against the fury of the Atlantic, it has frequently been the scene of disastrous shipwrecks. Its principal places of safety in rough weather are Castlemaine Harbour, at its head, and the harbours of Dingle and Ventry, both on its N shore. The only rivers of any consequence that flow into it are the Lane and the Maine. The fisheries in the bay are valuable.

DINGLEY, par. Eng. Northampton; 1500 ac. Pop. 144.
DINGOLFINGEN, a tn. Lower Bavaria, on a steep height, above r. bank, Isar, here crossed by a bridge, 10 m . W.S.W. Landan. It is an old but well-built place, is the seat of a law court, and contains three churches. Pop. 1897.

DINGWALL, a royal burgh, seaport, market tn., and par. Scotland, co. Ross, at the head of Cromarty Firth, 11 m . N.N.W. Inverness, at the foot of Strathpeffer. The parish contains about 5600 ac. ; and the town, erceted into a royal burgh in 1227, consists of a main street, running E. and W., and a few smaller streets branching off from it; lighted with gas, and adorned with rows of poplar trees. It has a parish and a Free church, and an Episcopal chapel; a well-attended parochial school, a townhouse, an antique edifice with a spire; a commodious new prison, and handsome county buildings. A limited trade is carried on, chiefly in exporting corn, timber, bark, and other products of the country, and importing lime, coals, and general merchandise, for the supply of the surrounding districts. Close to the town is a small harbour, admitting vessels drawing 9 ft . water. Pop. of par. (1841), 2100 ; of burgh, 1739.

DINING'TON, two pars. England:-1, Northumberland; 1540 ac. P. 711.-2, York (W. Riding); $1540 \mathrm{ac} . ~ P .279$.

DINKELSBÜHL, a tn. Bavaria, Middle Franconia, cap. dist. of same name, on three hills, above r. bank, Wörnitz, 44 m. S.W. Nürnberg. It is surrounded with walls, is the seat of a law court, contains a handsome parish, and several other churches, a Latin school, orphan asylum, and two hospitals; and has important manufactures of woollen hosiery, coarse linen, straw hats, paper, and stone slabs for tables, a dyework, brewery, and several mills. It suffered much during the Thirty Years' War, and is in a declining state. It came into the possession of Bavaria in 1802. Pop. of tn., 5019 ; of dist., 10,473.

DINKLAGE, a vil. duchy Oldenburg, circle of, and 8 m . S.W. Vechta. It contains a parish church and a castle, and has a trade in cattle, and four annual fairs. Pop. 1384.

DINSDALE (Low), a vil. and par. England, co. of, and 22 m. S. by E. Durham; 1340 ac. It has a sulphurous spring, much resorted to during summer. Pop. 169.

DINSLAKEN, a tn. Rhenish Prussia, gov. of, and 25 m . N. Düsseldorf, on the Münne. It contains a Protestant and a R. Catholic church; and has manufactures of woollen and linen cloth, hosiery, bonnets, hats, and earthenware, a bellfoundry, tanneries, and two annual fairs. In the 16 th century, it was often the residence of the youngest son of the Duke of Cleves. Pop. 1701.

DINTELOORD (more commonly, Prinseland), a vil. Holland, prov. N. Brabant, 17 m . W. by N. Breda, on the Dintel. It consists of two rows of houses, separated by a roomy market-place, at whose S . end is built the elegant Reformed church, and beyond the church is the harbour. It has a cattle fair, and weekly corn markets. Pop. 1000.

DINTON, two pars. England :-1, Bucks; 4100 ac. Pop. 818.-2, Wilts; 2420 ac. Pop. 565.

DINXPERLO, a vil. Holland, prov. Gelderland, 26 m . S.E. Arnhem, on the Prussian frontier. It is an open, goodlooking village, with a charch in the centre of ir, and a school in which Dutch, French, and English are tanght. It has several fairs; at one of which, held in Scptember, large quantities of home-grown hemp are sold. Pop. 700.

DIOGOUNTROU, a vil., W. Africa, on the Senegal, facing Aroundou (which sec). It is large and populous; is
surrounded with fine trees, including the tamarind, palm, \&c., interspersed with patches of millet.

DIOIS (LE), a dist. France, belonging to the former prov. of Dauphiné, and now included in dep. Drôme. Die was its capital.

DIOMA, a river, Russia, which rises in the N. slope of a mountain range, called Obchtchei-Siert, gov. of, and about 80 m. N.N.W. Orenburg; flows circuitously through that government in a N.N.E. direction, and, at Oufa, joins, 1. bank, Biela, after a course of about 200 m .

DIOMEDE ISLANDS, a group, Arctic Ocean, Behring's Strait, consisting of three islands, as first advanced by Capt.Cook, and subsequently confirmed by Capt. Beechey, who gave the name of Fairway Rock to the E. one; lat. $65^{\circ} 38^{\prime}$ N.; lon. $168^{\circ} 43^{\prime} \mathrm{W}$.; that of Krusenstern, its original name, to the centre one; lat. $65^{\circ} 46^{\prime} \mathrm{N}$. ; lon. $168^{\circ} 43^{\prime} \mathrm{W}$. ; and that of Ratmanoff to the N.W.; lat. $65^{\circ} 51^{\prime} \mathrm{N}$. ; lon. 1696 $63^{\prime}$ W.-(Jour. Roy. Geo. Soc.)

DIONIS (St. Backchurch), par. Eng. Middlesex. P. 806.
DIOS-GYör, a market tn. Hungary, Hither Theiss, co. Borsod, in a valley on the Szinkva, 60 m . N.W. Debreczin. It contains a Protestant and a $R$. Catholic church, a synagogue, and ruinous castle; and has manufactures of various articles in wood, a mineral spring, and a trade in fruit and winc. The Szinkva is a fine trouting stream. There are gold and silver mines in the neighbourhood. Pop. 3790.

DIOS-Zegh, two market tns. Hungary :-1, Hither Danube, co. of, and 27 m . E. Pressburg, on the Dudvag. It is inhabited by a colony of Swabians, and contains a parish church. Pop. 1714.-2, Thither Theiss, co. Bihar, r. bank, Er, 23 m . S.E. Debreczin. It contains a Protestant, a Greek Catholic, and a Greek non-united church. Much wine and tobaceo are produced in the district. Pop. 3500.

DIPIGNANO, a vil. and com. Naples, prov. of, and 3 m . S. by W. Cosenza. It stands at the foot of the Apennines, and contains five churches and two convents. Pop. 3219.

DIPPOLDISWALDE, a tn. Saxony, circle of, and 12 m. S. by W. Dresden, cap. bail. of same name, r. bank, Weisseritz. It is well built, contains two churches-one of them an old gothic structure, with a fine altar-picce-a castle, and townhouse; and has a bleachfield, numerous mills, and a quarry, which furnishes good grinding stones. Pop. of tn., 2722 ; of bail., area, 54 geo. sq. m., 14,100 .

DIISO, a tn. Greece, isl. Negropont or Eubœa, on the channel of Talanda, $30 \mathrm{~m} . \mathrm{N} . \mathrm{W}$. the town of Negropont. It is supposed to replace the ancient Oedepsus, famed for its hot baths.

DIIPTFORD, par. England, Devon; 4150 ac. P. 755. DIRECTION.-1, A group of small isls. off N.E. coast, Australia, near Cape Flattery; lat. $14^{\circ} 25^{\prime}$ S.; lon. $145^{\circ} 30^{\prime}$ E. They are within the Great Barrier Reef, and about 30 m . from the mainland; high, of a conical form, and can be secn from a distance of 15 or $18 \mathrm{~m} .-2, \mathbf{A}$ group of islets, a few m . from the bar at the entrance of Corner Inlet, Gipp's Land, New S. Wales.-3, An isl. Indian Ocean, one of the Keeling group; lat. $12^{\circ} 5^{\prime} 24^{\prime \prime} \mathrm{S} . ;$ lon. $96^{\circ} 53^{\prime}$ E. (r.)-4, An isl. entrance of China Sea, off the S .W. coast of Borneo; lat. $0^{\circ} 15^{\prime} \mathrm{N}$.; lon. $108^{\circ} 2^{\prime} \mathrm{E}$. (r.) It is of a conical form in the centre, and may be seen from 30 to 35 m . off.-5, A cape, E. coast, N.E. Australia, Cape York Peninsula; lat. $12^{\circ} 51^{\prime}$ S. ; lon. $143^{\circ} 33^{\prime}$ E. (r.)-6, A cape, Van Diemen's Land, forming the E. entrance to the Derwent river; lat. $43^{\circ} 3^{\prime} \mathrm{S}$.; lon. $147^{\circ} 34^{\prime}$ E.

DIRILLO [anc. Achates], a river, Sicily, which rises in the mountains of Licodia, on the frontiers of prov. Catania, and, entering prov. Syracuse, flows W.S.W., past the town of Biscari, and, after a course of about 30 m ., falls into the Mediterranean, 24 m. W.N.W. Modica. Agates are found on its banks.

DIRK HARTOG ISLAND, Australia, N.W. coast, S. from Naturaliste Channel, one of the entrances to Shark Bay ; lat. $25^{\circ} 31^{\prime} \mathrm{S} . ;$ lon. $112^{\circ} 54^{\prime}$ E. (R.)

DIRKSLAND, a vil. Holland, prov. S. Holland, 20 m . S.W. Rotterdam. It has several spacious streets, a chureh, a weighhouse, a tradeshouse, corn mill, and a harbour, communicating S. with the Haringvliet. Pop. 2030.

DIRLE'ION, a vil. and par. Scotland, co. of, and $6 \frac{1}{2} \mathrm{~m}$. N. by E. Haddington. The former, situate on an eminence, about $1 \frac{1}{2} \mathrm{~m}$. from the sea, consists of neatly built cottages,
with garden3 attached to them, richly ornamented with flowers and shrubs. Area of par. 7500 ac. ; pop. 1497.

DIRMSTEIN, a tn. Bavaria, Palatinate, $6 \mathrm{~m} . \mathrm{S} \mathrm{S.W}$. Worms. It contains a castle, once the residence of the bishops of Worms; and has manufactures of earthenware, and a sulphur spring. Pop. 2049.

DIRNCHAU, a tn. Prussia, gov. of, and 20 m . S.S.E. Danzig, l. bank, Vistula, here crossed by a bridge, which is defended by a tower. It is surrounded with walls, is the seat of a district and town court, contains a Protestant and a R. Catholic chureh; and has considerable manufactures of leather, a trade in wood, and five annual fairs. Dirschau is on the railway from Berlin to Danzig. Pop. 3084.

DISAPPUIN'IJEN'T ISLANDS.-I, An isl. group, S. Pacific Occan, Low Archipelago; lat. N.W. island, $14^{\circ}$ $12^{\prime} \mathrm{S} . ;$ lon. $141^{\circ} 12^{\prime} \mathrm{W}$. (н.) ; discovered by Byron, 1765, who gave them the name they now bear, on account of the ungracious reception given him by the natives, which he probably contrasted with the attractive and promising appearance of the islands. The one which he visited is about 5 m . in circumference, and of most beautiful aspect, being surrounded by a beach of the finest white sand, within which rises a grove of tall trees that extend their shade to a great distance, the whole combined making the most pleasant island scenery that can well be imagined.- 2 , One of the Bonin islands, N. Pacific Ocean; lat. $27^{\circ} 16^{\prime} \mathrm{N}$.; lon. $140^{\circ} 51^{\prime} \mathrm{W}$. -3 , An isl., S. Pacific Ocean; lat. $50^{\circ} 36^{\prime} \mathrm{S} . ;$ lon. $166^{\circ} \mathrm{E}$. (r.)

DISCO, a large isl., belonging to Denmark, N. extremity of Davis's Straits, or S. part of Baffin's Bay, separated from the W. coast of Greenland by Weygat Strait; lat. (S. point), $69^{\circ} 11^{\prime} \mathrm{N}$.; lon. $53^{\circ} 20^{\prime} \mathrm{W}$. (R.) It contains stone quarries and coal mines; possesses valuable fisheries, and, with a number of small surrounding islands, forms a division of the inspectorate of N. Greenland. On its S.W. part lies the Danish colony of Godhavn.

DISCOVERY BAY, S. coast, Australia, between Capes Bridgewater and Northumberland. It is a long open indent ation, 50 m . wide, and affords no shelter to shipping beyond that of a mere roadstcad. Centre in lat. $38^{\circ} 5^{\prime} \mathrm{S} . ;$ lon. $141^{\circ} \mathrm{E}$.

DISCOVERY PORT, a harbour, Oregon, near the head of the straits of Juan de Fuca, stretching inland for 8 m ., to the parallel of $48^{\circ} \mathrm{N}$., and having an average width of 2 m . It is completely cover d by Protection Island, to the N., and could easily be rendered defensible against the most formidable attack. The principal objection to it as a larbour is the great depth of water, which, in the middle, is no where less than 40 or 50 fathoms, and is often as much as 16 fathoms close to the shore. Its shores are abundantly supplied with shell fish. There is no permanent settlement of Indians here, but a few miscrable lodges are occupied by individuals of the ('lalam tribe, who live chicfly on fish, shell fish, and potatocs.

DISEWORTH, par. Eng. Leicester; 1880 ac. P. 739.
DISMAL SWAMI, a large morass, U. States, commencing a little S. of Norfolk, Virginia, and extending into N. Carolina. Length, N. to S .30 m .; breadth, $10 \mathrm{~m} . ;$ area, $150,000 \mathrm{ac}$. It is mostly covered with trees of enormous size, with an undergrowth of brushwood, so dense as to be completely impenetrable. It contains Lake Irummond, 15 ${ }^{m}$. in circumference, and is intersected by Dismal Swamp Canal, 23 m . long, $6 \frac{1}{2} \mathrm{ft}$. dcep, and 46 ft . wide at the top, which conneets Chesapeake Bay with Albemarle Sound.

DISNA, a tn. Russia, gov. of, and 109 m . N.N.E. Minsk, cap. circle of same name, at the month of the Disna. It is a new town, which has advanced with great rapidity, and has some shipping, and a considerable trade. Pop. (1849), 5208. —The circies is well watered, produces excellent flax and hemp, which are largely exported to Riga, and is extensively covered with brushwood and small trees, but has not much good timber.- The myek rises in a lake of same name, in the N.E. of gov. Wilna, flows E. across the N. of Minsk, and joins l. bank, Dwina, at the town of Disna, on the W. frontiers of Vitepsk, after a conrse of about 90 m .

DISS, a market tn. and par. England, co. Norfolk, on the slope of a hill, at the foot of which is a small lake or mere, on the N. side of the vale of the Waveney, $18 \mathrm{~m} . \mathrm{S}$. by W. Norwich. It has 12 strects, wide, well paved, and lighted with gas. Many of the houses are exceedingly neat, and the shops well stocked. The church of St. Mary is a large and handsome gothic structure, with a square tower at the W.
end, containing a peal of eight bells. There are, besides, a handsome gothic chapel belonging to Independents, and places of worship for Wesleyans, Baptists, Presbyterians, Unitarians, Primitive Methodists, and the Society of Friends; also a grammar school, national, British, and foreign daily schools; a literary and scientific institution and public library, and several charitable and benevolent institutions. Diss was formerly noted for the manufacture of 'Suffolk hempen cloth,' worsted yarn, and knit hosiery; but these branches have of late much declined. There are two extensive brush manufactories, two large breweries, and extensive malting establishments. The mere, already mentioned, covers about 7 ac., and its banks are mostly laid out as ornamental gardens; it is from 17 to 19 ft . deep, and is well stocked with eels and other fish. Market-day, Friday ; and two fairs annually. Area of par. 3450 ac. ; pop. 3205.-(Local Correspondent.)

DISSEE, an isl. Red Sea, W. or Dankali coast, abou lat. $15^{\circ} 18^{\prime} \mathrm{N} . ;$ lon. $40^{\circ} 25^{\prime} \mathrm{E}$. ; one of the pleasantest spots in the Red Sea. It is about $2 \frac{1}{2} \mathrm{~m}$. long, and about $\frac{3}{4} \mathrm{~m}$ broad, high, and consisting of a number of similar hills, in perpendicular strata, with a few straggling trecs. The centra part is a plain covered with grass. There are some springs of good water on the island, about $\frac{1}{2} \mathrm{~m}$. from the beach; also a village, consisting of 10 or 12 houses, built of laminated stone. Bullocks, sheep, and goats are abundant, but the in habitants are not anxious to dispose of them.

DISSEN, a vil. IIanover, principality of, and 14 m S.S.E. Osnabrück, at the foot of the Pctersberg. It is an old place, which was once defended by a strong eastle. It contains a church and two schools. Pop. 1550.

DINSENTIS, Mustar, a tn. Switzerland, can. Grisons, 3800 ft . above sea level, on a gentle slope, near the conHuence of the Further and Middle Rhine, 34 m . W. S. W Chur (Coire). Above it rises Monnt Vakarara, the forests of which protect it from avalanches. Dissentis has a gymnas ium, and a cantonal school, with eight teachers; but its chief attraction is an ancient ecnvent of Benedictines, which is said to have been founded, in 600, by Sigisbert, a Scotsman, a pupil of St. Columba, and the superiors of which were once princes of the empire. It was almost destroyed by the French, in 1794, but has still some monks, who serve as priests in the neighbourhood. The environs of Dissentis exhibit some of the finest Alpine scenery. I'op. 1436.

DI'TCHLING, par. Eng. Sussex; 5270 ac. Pop. 1148.
DlTMARSH, or Ditmarsues [German, Ditmarschen], a dist. Denmark, Holstein, divided into the N. and S. Ditmarschen, and consisting of an extensive tract lying between the mouths of the Elbe and the Eider, and along the German Ocean; length, N. to $\mathrm{S} ., 35 \mathrm{~m}$. ; average breadth, 20 m ; area, 374 geo. sq. m. The whole surface is composed of a low, monotonous flat, so little raised above the sea, that it is only defended from its encroachments by a succession of lofty and strong embankments, similar to the well-known dikes of Holland. Where the ground is liable to be flooded, it is covered with extensive swamps, where the only improvement which can be introduced is to convert them, by means of drainage and embankment, into productive meadows; where the ground rises to a higher level its quality is seldom im proved, but becomes sandy, and forms extensive heaths. But notwithstanding of these large deductions, there still remain considerable tracts of rich alluvial soil, on which heavy crops particularly of wheat, beans, and hay, are regularly raised. The N. Ditmarsh is divided into 11 parishes or kirchspiel voigtein, and the S . Ditmarsh into 12 parishes; united pop. 61,388.

DI'TYEAH, a tn. and fortress, Hindoostan, presid. Bengal, prov. of, and 220 m . W.N.W. Allahabad; lat. $25^{\circ} 43^{\prime}$ N.; lon. $78^{\circ} 25^{\prime}$ E. The town is about $1 \frac{1}{2} \mathrm{~m}$. long, and nearly as much in breadth. It is surrounded by a stone wall, is well built, the houses chiefly constructed of stone, and covered with tiles.

DITTERIDGE, par. Eng. Wilts; 950 ac. Pop. 95.
Dl'TEERSBACH, or Starsow, a vil. Bohemia, circle, Chrudim, in a valley, abont 40 m . W. Olmütz. It contains a church and a school. Pop. 1105.

DITTFURT, a tn. Prussia, prov. Saxony, circle of, and 27 m. S.W. Magdeburg, r. bank, Bode. It has several brewcries, tanneries, and distilleries, and corn and flax are grown in the vicinity. Pop. 2200.

DITTISHAM, par. Eng. Devon; 3230 ac. Pop. 917.
DITTON, four pars. England:-1, Kent; 1040 ac. Pop. 244.-2, (Long), Surrey; 2010 ac. Pop. 827.-3, (Priors), Salop; 5520 ac. Pop. 660.-4, (Thames), Surrey; 2900 ac. Pop. 2196.

DITZINGEN, a vil. Würtemberg, circle Neckar, bail. Leonberg; with several mills. Pop. 1293.

DIU, or Dio Island and Head.-1, An isl. Hindoostan, belonging to the Portuguese, off the S . extreme of Goojerat, from which it is separated by a very narrow channel, about lat. $20^{\circ} 43^{\prime} \mathrm{N}$. ; lon. $71^{\circ} 6^{\prime} \mathrm{E}$. It is 7 m . in length, E. and W., stretching parallel to the coast, of which it seems a part. On a point on the E. end of the island stands the town of Diu, well fortified, and surrounded by a wall, with towers at regular distances. Provisions are plentiful; and, although the island appears unfit for cultivation, the market is well supplied with vegetables from the main. Water brackish, excepting that procured during the rainy season, which is kept in tanks or reservoirs for general use. Pop. 4000.-2, Diu Head is the southernmost point on the coast of Goojerat; lat. $20^{\circ} 42^{\prime} \mathrm{N}$.; lon. $70^{\circ} 56^{\prime}$ E.

DIVEN, a market tn. Hungary, co. Neograd, 14 m. S.E. Alt-Sohl. It contains a château, and the ruins of an old castle, picturesquely situated on a rocky eminence; and has extensive glass-works, a mill, and an annual fair. The dis trict is densely wooded. Pop. 1056.

DIVINA (Kis and Nagx), two adjacent vils. Hungary, Hither Danube, co. Trentschin, on the Waag, about 3 m . from Solna. They contain a parish churell; and have a united pop of 1525 .

DIVOSH, or Drwosch, a vil. Austria, Sclavonia, co. Syrmia, at the foot of the mountains of Syrmia, about 22 m . S.W. Peterwardein. It contains a Greek parish church; and has four annual fairs. Pop. 1462.

DIWISCHAU, or Dibischau, a th. Bohemia, circle, Kaurzim, 30 m . S.E. Prague. It contains a deanery church, school, and townhouse. Vegetables are extensively cultivated in the vicinity. Pop. 1600.

DIXAN, a tn. Abyssinia, kingdom Tigré, about 40 m . S. Arkeeko; lat. $15^{\circ} \mathrm{N}$.; lon. $39^{\circ} 32^{\prime}$ E.; on the declivity of a hill commanding an extensive view of the country around. The houses are flat-roofed, and without windows, and, instead of chimreys, have two pots of earthenware rising out of the roof, but so narrow as to give vent only to a small portion of the smoke. The only public building is the cbapel, a meanlooking edifice, with a conical thatched roof and mud walls. Some trade is carried on in tobacco, pepper, looking-glasses, snuff, spirits, and large beads. White cloths are preferred here to all other colours. The people are in general idle, ignorant, dirty, and of very dark complexion.

DIX COVE, a British African settlement, coast of Upper Guinea, Ashantee territory, about lat. $5^{\circ}$ N.; lon. $1^{\circ} 57^{\prime}$ W. The settlement consists of a town and fort. The cove is nearly 400 yards wide, and about the same length, but full of rocks; they leave, however, sufficient room in some places to moor boats or very small vessels. At low water, and with fresh S. breezes, the sea breaks entirely across the cove; but it seldom happens that the natives cannot get off to a vessel in their canoes. The town is on the N. side of the cove. and extends from the fort to a piece of water, which is stagnant, except during a portion of the rainy season, when it is always tenanted by alligators. The fort is of a square form, standing on ground about 30 ft . above the sea, and its battlements about 60 ft .

DIXMUDE [Flemish, Dixmuyden], a tn. Belgium, prov. W. Flanders, 20 m . S.W. Bruges, r. bank, Yser, which has been made navigable. It has a large and handsome gothic church, with a stone rood-screen of beautiful workmanship, and over the altar a picture of the Adoration of the Magi, a masterpiece of Jordaens. It has also a chapel, a communal or townhouse, hospital, two orphan asylums, a jail, and several primary schools. It has some breweries, tanneries, a salt-refincry, and a bleachfield; with works for making stareh, liqueurs, chocolate, hats, and coarse pottery; also snuff, bark, and oil mills. The trade consists in butter, of excellent qua-
lity; grain, horses, and cattle. The town was first walled in the 10th century, and was fortified in 1270 and 1411. In 1513, upwards of 300 houses were burned. It was often taken and retaken by the Germans and French. Pop. 3468.

DIXON'S ENTRANCE, a strait, W. coast, N. America, between Queen Charlotte's Island and the Prince of Wales's Archipelago; lat. $54^{\circ} 30^{\prime} \mathrm{N}$. ; lon. $132^{\circ} 10^{\prime} \mathrm{W}$. It is about 100 m. long, W. to E.

DIXTON (Newton), par. England, Monmouth 4280 ac. Pop. 751.

DIYALAH, a river, Asiatic Turkey. See Diala.
DIZFUL, a tn. Persia. See Desful.
DIZIER (St.), [anc. Desiderii Fanum], a tn. France, dep. Haute-Marne, arrond. Vassy, r. bank, Marne, where it becomes navigable, 35 m . S.E. Chalons. It is long and narrow, but not unhandsome, the streets being wide and clean, and many of the houses well built. The only edifices worth special mention are the church, which has curious gothic windows, and the townhouse, which is rather handsome, and of recent construction. St. Dizier has a court of commerce and a communal college. It has manufactures of cotton eloth and casks; also some iron-forges and foundries, and a little boatbuilding; and it carries on a busy trade in wood, iron, and grain. The town was once fortified, and remnants of a strong castle yet remain; but the ramparts have been laid out in public walks. In the environs, which are thickly wooded, are several blast-furnaces, and other iron-works. In 1564, it was besieged and taken by the Emperor Charles V. Napoleon beat the allies in two battles fought here, January 27, and March 27, 1814. Pop. 6450.

DJAGARAGA, a tn. Java, prov. Madioen, 48 m. S.E. Samarang. It is a considerable place, with good bamboo and wooden houses, and near it a large market-place and elegant mosque. The inhabitants cultivate rice and cotton extensively, and trade in them, and in thread and wood. P. 6000.

DJEMILAH, an anc. city, Algeria, prov. of, and 50 m . W. Constantine. It contains numerous interesting monuments of antiquity, including a Christian church; a quadrilateral temple, with six columns; a theatre; the market place, with a temple dedicated to Victory; and a triumphal arch, erected in honour of the Emperor Caracalla, which it is proposed to transport to Paris. Djemilah was first occupied by the French in December 1838, and again in May 1839.

DJIDDA, or Djedda. See Jidda.
DJIDGELI, a tn. Algeria. See Jijeli.
D.JIma.Ja, or Jamaja Island, China Sea, one of the Anambas ; lat. (S. point) $2^{\circ} 50^{\prime} \mathrm{N}$. ; lon. $105^{\circ} 52^{\prime}$ E. (r.) It is about 12 m . long, with several small islands, nearly joining each other, off its N.W. extremity. It has a peak on it, and a bay, on the N. side, with islets and reefs, about 1 m . distant, on the W. side, and soundings of from 24 to 35 fathoms near them.

DJOCJOKARTA, or OJoojoo-Karta, a prov., isl. Java, cap. same name, bounded, S. by the Indian Ocean, W. by Baglen, N. Kadoo and Soorakarta, and E. Soorakarta. Its only high mountain, the volcano Merapi, is 3150 ft . high. It has no large river. Its forests abound in djatti (teak) wood. Its natural fertility would render it more valuable, but for the impracticable country that bounds it on the land side, and the want of any gcod harbour on the coast; yet rice, coffee, and tobacco begin to be extensively cultivated on lands allocated to Europeans. This province, once a kingdom, was the focus of the rebellion, in 1825 . Pop. 326,000 .-The town, which is the seat of a native sultan and a Dutch resident, is large, and regular. The sultan's water-palace is a curious town of itself, with subterranean approaches, walls, and towers. The resident's abode is in a fort which commands both the palace and the town. There are here a church, school, and shot-foundry. Besides the European guards of honour, the sultan has a guard composed of young females, armed with lance, sword, and pistol, who perform service on horseback as well as on foot, and from amongst whom he frequently selects his wives. Pop. 90,000 .

DLE-POLE, a vil. Hungary, Hither Danube, co. Trent schin, about 10 m . from Sillin. It belongs to Prince Esterhazy, and has a R. Catholic parish church. Pop. 3114.
dLUHA, or Dlifa, a vil. Hungary, Hither Danube, co. Arad, on a river of the same name, here crossed by two bridges, 9 m . from Kubin. It contains a church. P. 1087.

DMITROV, a tn . Russia, gov. of, and 45 m . N. Moscow, eap. dist. of same name, r. bank, Jachroma, at the confluence of the Neteka. It covers a large space, much of which is oceupied by gardens, but is poorly built; contains seven churches, five of stone and two of wood; a convent, and district school; and has manufactures of woollen and silk goods, several tanneries and tallow-smelting establishments, a considerable trade, chiefly in linen, wax, tallow, and agricultural produce, and an annual fair. which lasts a week. Poreelain is manufactured in the vieinity. Pop. (1850), 5284.--The circie, area 707 geo. sq. m., has an undulating surface, is well watered and well wooded, has good arable land, and rears great numbers of eattle. Pop. 58,241 .

DMITROVSK, a tn . Russia, gov. of, and 45 m . S.W. Orel, 1. bank, Nerusa. Pop. (1851), 4014.

DNIEPER, or DNIEP! [anc. Borysthenes; also Danapros], a river, Russia, which rises among forest marshes, near Dnieprovsk, gov. of Smotensk; lat. $55^{\circ} 45^{\prime} \mathrm{N}$. ; lon. $33^{\circ} 40^{\prime}$ E.; and, after a course of more than 1000 m ., falls into the Black Sea, by several mouths, below Kherson. Its general direction is N. to S.; but its lower course deviates mueh to the E., retiring to the S.W. with a eurving sweep. It traverses the provinces of Mohilev, Minsk, Tschernigov, Kief, Ekaterinoslav, and Bereslav. Chief tributaries, r. side, the Beresina, Pripetz, and Ingoulitz; 1. side, the Soj and Desna. The Duieper, though a large stream, can scarcely be called navigable. About lat. $48^{\circ} 20^{\circ} \mathrm{N}$. it runs through a rugged bed of gramite for about 44 m ., in which space it descends several cataracts and rapids; here are 14 chief falls, besides many others. Llaving cleared the rocky obstructions, the elafed river spreads ont into a great number of water courses, forming an immense labyrinth of woody islands [Russ. Plavniks], below which the seattered streams re-unite, and, at Sehlokff, commences the navigation downwards, carried on by a few flat-bottomed vessels, laden with building timber and minerals, from the interior of the country. In 1833, some attempts were begun to overcome the natural obstacles of the river, but they proved abortive. Even the more easily improvable lower course, which might be of vast use in developing the resourees of the surrounding lands, has been left nearly in a state of nature. A magnificent wrought-iron bar-chain suspension bridge, the largest hitherto exceuted, is (1851) in proeess of erection over the Dnieper, at Kief, by the English engineer, Charles Vignolles, by command of the Emperor of Russia. The bridge will cost $£ 400,000$. It is $\frac{1}{2} \mathrm{~m}$. in length, and $52 \frac{1}{2} \mathrm{ft}$. broad, and the metal employed, all manufactured in Eugland, weighs 3500 tons. On the Kief side of the river a drawbridge, with an opening 50 ft . wide, allows vessels to pass up and down the stream. The river here is 35 ft . deep in summer, but spring floods raise it to 50 ft , and even 55 ft . The bridge will be completed in the autumn of 1852. The river abounds in fish of the same kind as those in the Volga, but the produee of the Government tisheries is much less. The mouth of the estuary is defended by the fortresses of Oczakow and Kinbourn. The Borysthenes was absurdly reckoned the greatest river of the ancient world, after the Nile. The Greeks had very exaggerated ideas of the fertility and beauty of the surrounding lands of its lower waters, but of its sources and early course they knew nothing. Near its embouchure was the Milesian colony of Olbia, founded for trading with the wandering races of the interior.-(Hommaire de Hell.)

DNIESTER, or Dxiestr [ane. T'yras and Danaster], a river, Europe, which rises on the N. side of the Carpathian
Mountains, near Turka, Austrian Galicia; lat. $49^{\circ} 12^{\prime} \mathrm{N}$. Mountains, near Turka, Austrian Galieia; lat. $49^{\circ} 12^{\prime} \mathrm{N}$. ; lon. $22^{\circ} 40^{\prime} \mathrm{E}$.; and, after a course of nearly 500 m ., N.W. to S.E., falls into the Black Sea at Ovidiopol, in gov. Kherson, and forming in its course the boundary between the Russian gov. of Bessarabia, on the W., and the govs. of Podolsk and Kherson, on the E. It passes by Sambov, Halicz, and Maryampol, in Galicia; Khotin, Mohilev, and Bender, in Russia. Principal tributaries, on the r. bank, the Stry, Reout, and Botua; 1., the Sered, Podhoree, Mourafa, and Iagorlik. There is no ascending navigation, and little of any kind. The mouth is mueh eneumbered with muddy flats and sandbanks.
do PORTO da Ponta do Sol, a port, Cape de Verde Isles, isl. St. Antonio. It is not, however, strictly speaking, a port, but merely a part of the coast where the bottom is
good. To this place all vessels to and from the island trade; and here, situated on a point of land, are the customhouse and warehouses. The landing-place is excellent, being a natural basin in the roek. Wood, water, and every refreshment, can be obtained here at reasonable rates.

DOAB [Sanscrit, Two Waters], a name in Hindoostan applied indiscriminately to any tract of country between two rivers. The tract between the Ganges and the Jumna is usually called the Doab; other similar tracts have their distinctive name, as the Jallunder or Jullander Doab, between the Beas and the Sutlej; the Bari Doab, between the Beas and Ghara and the Ravee; the Shimaulli Doab, between the lower courses of the Chenab and the Ghara; the Retehua or Rukna Doab, between the Lavee and the Chenab; the Jinhut or Jeteh Doab, between the Chenab and Jailum; the Sind or Sindi-Sagur Doab, the N. part of the tract between the Indus on the W., and the Jailum and Chenab on the E.; and the Janubbe Kuehi Doab, the S. part of the same traet.

DOADPOOTRA. See Bahawulpoor.
DOAGH GRANGE, a par. and vil. Ireland, co. Antrim ; 2304 ae. Pop. 1871.

DOANG, a prineipal tn. Mohilla (which sce).
DOB-TISZA, a market t . Hungary, Thither Theiss, co. Szabolez, on the Theiss, 12 m . S.S.W. Tokay. It contains a Protestant clurch. Pop. 2274.

DOBASNIZZA, or Dobaschiza, a vil. and seaport, Austria, Illyria, cap. dist. of same name, 21 m . S.S.E. Fiume. It stands on the N.W. side of the isle of Veglia, and contains a parish chureh and a Tertian monastery. The harbour admits only small vessels. Pop. 2160.

DÖBELN, a tn . Saxony, circle of, and 36 m . S.E. Leipzig, agreeably situate on an island formed by the Mulde and Miillgraben, a kind of natural canal. It consists of the town proper and several suburbs, and is, for the most part, well built; contains two churehes, and a well-endowed hospital; and has manufactures of woollen and linen cloth, brass-ware, hats, and shoes, several bleaclifields, several worsted and other mills, a considerable trade in butter, a large weekly corn market, and three annual fairs, partly for general goods, but chicfly for horses and eattle. Fruit, hops, and vegetables are extensively grown in the vieinity. Pop. (1849), 7153.

DOBERAN, or Dobberan, a tn. Meeklenburg-Sehwerin, cap. bail. of same name, agreeably situate in an undulating and well-wooded district, within sight of the Baltic, 9 m . W. N.W. Rostoek. It is irregularly built, contains a ducal palace, built in the Italian style, having a fine hall and theatre, and surrounded by a garden and park; a fine old gothic ehurch, with many monuments of the grand ducal family; and another palaee, built near a triangular space within the town, called the Kamp, and furnished with numerous decorations. Doberan is much frequented on account of its bathing establishment, which is situated about 3 m . from the town, where the greater part of the visitors prefer to reside, though lodging-honses have been built on the shore, at a place called Der Ileilige Dam, from a huge bank of shingle said to have been thrown up by the sea in a singlo night, and affording effectual proteetion against its inunda tions. The bathing establishment, which is very eomplete, is provided both with sea and sulphur baths; and furnishes more than the usual sourees of amusement. It annually attracts about 1600 visitors. Pop., tn., 3225 ; dist., 10,742.
DÖBLING (Ober), a vil. archduchy Austria, below the Ens, about 3 m . N. Vienna. It stands in a beautiful distriet, covered with fine villas and gardens, and is a great holiday resort and summer residence of the inhabitants of the capital. Pop. 1700.

DOBOKA, a co. Austria, Transylvania, bounded, N. by Bistritz and Szolnok, N.E. Galieia, Moldavia, and Csikerstuhi, S. Thorenburg and Klansenburg, and W. Hungary; area, 867 geo. sq. m. It is very irregular in shape, forming a belt of land, streteling E. to W. for 110 m ., with an average breadth which does not exceel 8 m .; near the centre it is little more than 1 m . aeross. The surface is mountainous, being covered, in the N., by lofty ridges of sandstone, apparently new red, from the mines of rock salt and the salt springs which abound in it. In the W. the mountains are calcareous. Between the mountain ridges are numerous valleys, some of them flat, extensive, and of considerable fertility. The prineipal streams are the Szamos and the Bistritz. The

## DODDLESTON

surface is not well adapted for the plough, but many of the lower slopes are covered with vineyards. The pastures also are good, and rear great numbers of cattle. For administrative purposes, the co. is divided into two circles, an upper and a lower, subdivided into eight districts. The capital is Szek. Pop. 66,900.

DOBOZ, a vil. Hungary, Thither Theiss, co. Bekes, on the Black Körös, about 4 m . from Gyula. It contains a Protestant parish church. Pop. 1714.

DOBRA, a tn. Russian Poland, 24 m . N.E. Kalisch, near the river Teleszyna. Here are made some linen, hosiery, \&c. Pop. 2193, a third of whom are Jews.

DOBRA [Latin, Bonopolis], a market tn. Austria, Transylvania, co. Hunyad, on a small stream of same name, near the Maros, 73 m . W. Hermannstadt. It stands on the frontiers, is defended by a fort, and contains a R. Catholic and a Greek non-united church.

DOBRAN, or Dobrany, a tn. Bohemia, circle of, and 10 m. S. S. W. Pilsen. It contains a parish church, chapel, school, hospital, townhouse, and barracks; and has several mills, and four annual fairs. Pop. 1835.

DOBRAUC, or Liebenthal, a vil. Bohemia, circle, Chrudim, about 40 m . S.E. Königrätz. It contains a parish church, parsonage, and mill. Pop. 2175.

DOBRAWITZ, or Roth-Dobrawitz, a tn. Bohemia, circle, Bunzlau, 30 m. N.E. Prague, chief place lordship of same name, at the foot of Mount Czischow. It contains a castle, with fine gardens; a church, townhouse, and hospital; and has manufactures of beet-root sugar, and four annual fairs. Pop., of tn., 1161; of lordship, 7115.

DOBRIGNO, a vil. Austria, Illyria, in the island of Veglia, 24 m . S.S.E. Fiume. It contains a parish church, and a chapel on the top of a lofty height ; and has extensive salt-works. Coal is worked in its vicinity. Pop. 1700.

DOBRILUGK, a tn. Prussia, prov. Brandenburg, gov. of, and 75 m . S.W. Frankfort on-the-Oder, at the confluence of the Dober with the Little Elster. It is well built, contains a castle, church, and town-school; and has manufactures of woollen and linen cloth, and a distillery. A good deal of tobacco is grown in the vicinity. Pop. 1145.

DOBRINCZE, or Dobrinzen, it vil. Austria, Sclavonia, co. Syrmia, in a plain, 22 m . S.S E Peterwardein. It contains a Greek parish church. Pop. 1505.

DOBROMIELITZ, a vil. Austria, Moravia, circle, Olmütz, in a mountainous district, about 7 m . from Prossnitz. It contains a castle, church, and school; and has a brewery and two mills. Pop. 864.

DOBROMIL, a tn. Austria, Galicia, circle, Sanok, about 14 m. S. Przemysl. It consists chiefly of a large, uneven, and unpaved square, lined by houses, most of which are occupied by Jews; and has two important annual cattle markets. There are salt mines in the vicinity. Pop. 1600.
DOBRONA, or Dobranyiva, a market tn. Hungary, Hither Danube, co. Sohl, on the small stream Nyeresznicza, about $69 \mathrm{~m} . \mathrm{N}$. by W. Pesth. It contains a Protestant and a R. Catholic church, and the ruins of an old castle. The inhabitants are Slowaks. Pop. 1152.

DÖBROKOZ, a market tn. Hungary, co. Tolna, 84 m . S.S.W. Pesth, r. bank, Kapos. It contains a R. Catholic church, and the ruins of an old castle. Much tobacco is grown in the vicinity. Pop. 2550.

DOBROSLAWITZ, a vil. Austrian Silesia, circle, Teschen, in a mountainous district on the Schwarzwald, about 41 m. N.E. Olmütz. The inhabitants are Bohemians. Pop. 1422.

DOBROTA, a vil. aud seaport, Austria, Dalmatia, picturesquely situated on a gulf of the same name, dist. of, and 2 m . N. Cattaro. It is a well built, cheerful-looking place, with houses of stone, roofed with tiles, and frequently surrounded with walls, as a protection against the Montegrin robbers; contains a parish church, seated on a projecting tongue of land, backed by neat houses and gardens; and has a harbour, which is one of the best frequented in Dalmatia. Pop. 1400.

DOBRUSCHKA, or Dobrusska, a tn. Bohemia, circle of, and 14 m . E.N.E. Königgrätz, on the Little Goldbach. It consists of the town proper and four suburbs, contains a church, chapel, synagogue, townhouse, and hospital; and has several mills, a trade in cattle, a weekly market, and an annual fair. Pop. 2442.

DOBRZYN, two places, Russian Poland:-1, A tn., woiwode of, and 20 m . W.N. W. Plock, on a height above r. bank, Vistula. It contains two cburches, a synagogue, and old monastery; and has a distillery, a brewery, some general trade, and an annual fair. Pop. 1459, of whom 603 are Jews. -2 , A tn., woiwode of, and 50 m . N.W. Plock, l. bank, Drewerz. It has a church and a synagogue ; and manufactures of woollen-cloth and leather. Pop. 2240.

DOBSCHAU, Topschat, or Dobsina, a market tn., Hungary, co. Gomor, in a narrow valley, hemmed in by lofty mountains, 14 m . N.N.W. Rosenau. It contains a Protestant and a R. Catholic chureh, and a gymnasium; and has a paper and other mills. Copper, silver, iron, and cobalt, are worked and smelted in the neighbourhood. Pop. 5410.

DOCE, a riv. Brazil, which rises in the mountains in the S. of prov. Minas-Geraes, about 40 m . E. the town of Barbacena, and proceeds N ., sometimes under the name of Chopoto, receiving several streams on both banks, but particularly the Pirangos, on the left. On reaching Santa-Anna do-Deserto it turns N.E., and is augmented by the Touro, on the r. bank, and the Guallacho, on the left. Still pursuing the same course, it receives the Paracicala, the Santo Antonio, and the Correntes, all on the l.bank. On the junction of the last, its course becomes almost E., towards prov. Espirito Santo, which it first separates from prov. MinasGeraes, and afterwards traverses, receiving, on its r. bank, the Cuiaté and the Mandu. It ultimately falls into the Atlantic, in lat. $19^{\circ} 36^{\prime} \mathrm{S}$. Its direct course N.E. is 330 m ., but its whole course, including windings, cannot be less than 500 m . Its navigation is very much interrupted by cataracts.

DOCHART, a loch and river, Scotland, co. Perth. The Lосн, 44 m . W. Perth, is about 3 m . long, las beautifully wooded banks, and contains a curious floating island, and an islet, with the remains of an old castle.-The river issucs from the E. end of the loch, and flows N.E. 8 m ., through Glen Dochart, into Loch Tay.

DOCKING, par. Eng. Norfolk; 4030 ac. Pop. 1537.
DOCKLOW, par. Eng. Hereford; 1420 ac. Pop. 215.
DOCKUM, a tn. Holland, prov. Friesland, 13 m . N.E. Leeuwarden, on the Ee, which divides it into two unequal parts. It is hexagonal in form, surrounded by a wall, with six bastions, one of which now serves as a place of sepulture ; and formerly had four gates. It has a handsome townhail, an clegant weigh-house, an exchange, a Reformed, a Baptist, and a R. Catholic church, an orphan hospital, a charity and a Latin school, and several common and boarding schools. By means of the Ee, Dockum communicates with Lecuwarden on the one side, and the sea on the other, vessels of considerable size coming up at high water. There is also canal communication with Groningen ; and in the centre of the town is a commodious harbour. Dockum has three fairs for cattle and horses; does a good trade in cattle, flax, chicory, and shrimps; and carries on boat-building, salt-boiling, the manufacture of beer, gin, and earthenware, and wool-combing, \&e. Pop. 3900.

DODA, a tn., N. Punjaub, r. bank, Chenab; lat. $33^{\circ} 2^{\prime}$ N.; lon. $75^{\circ} 18^{\prime}$ E.; neat and well built, with a good bazaar, and a square fort, having a tower at each angle. The Chenab is here 60 yards broad, and is crossed by a jhoola, or bridge, formed by a cable stretched from bank to bank, and traversed by a suspended seat, drawn backwards and forwards by means of a rope.

DODBROOKE, a vil. and par. England, co. Devon, 16 $\frac{1}{2}$ m . S.E. Plymouth. The village is indifferently built, but well supplied with water, and noted for its white ale. Markets for cattle are held monthly. Dr. Wolcot, the satirical poet, better known under the assumed name of 'Peter Pindar,' was a native of this place. Area of par. 420 ac. Pop. 1229.

DODDENHAM, par. Eng. Worcester; 830 ac. P. 260.
DODDERHILL, par. Eng. Worcester; 5150 ac . P. 2130.
DODDINGHURST, par. Eng. Essex; 3460 ac. P. 419.
DODDINGTON, several pars. Englaud:-1, Cambridge; 38,240 ac. Pop. 8648.-2, Kent; 2000 ac. Pop. 473.-3, Lincoln; 4330 ac. Pop. 220.-4, Northumberland; 9110 ac . Pop.941.-5, (-Dry), Lincoln; 2160 ac. Pop.215.-6,(-Great $)$, Northampton; 1310 ac. Pop. 474.

DODDISCOMBLEIGII, par. Eng. Devon; 2390 ac. Pop. 378.

DODDLESTON, par. Eng., partly in the county of Fhint, Walcs, but chiefly in that of Chester ; 2420 ac . P. 826.

DODFORD, par. Eng. Northampton; 1180 ac. P. 228.
DÖDIBERG, or Tödiberg, one of the loftiest summits of the Swiss Alps, on the confines of can. Grisons and Glarus, 17 m. S.S.W. Glarus. It has the Scherrhorn on the S.E., and the Kisteuberg on the N.W., and consists of two summits, of which that on the N. only takes the name of Tödi, the other being called Rusein. Its height is about $12,000 \mathrm{ft}$., and on its sides are numerous glaciers. The pass leading over its side, between the valleys of the Linth and the Vorder Rhein, is 9609 ft . Its highest peak has never been ascended.

DODING'TON, two pars. England:-1, Gloucester; 1670 ac. Pop. $143 .-2$, Somerset; 600 ac. Pop. 114.

DOEL, a vil. and com. Belgium, prov. E. Flanders, about 25 m. N.N.E. Termonde, on the Scheldt. It contains a tannery and two mills. The chief employment is agriculture. lop. 1923.

DOEsBURG, or Doesboroh [ane. Drusi Burgum], a tn. Holland, prov. Gelderland, 9 m. N.E. Arnhem, r. bank, ljssel, here crossed by a drawbridge. It is surrounded by walls, now planted with trees and uscd as promenades, and had four gates, of which three still exist. It has broad, fine streets, lined with comfortable-looking modern houses. The townhall is small, but the arsenal is large and spacious; of the two Reformed churches, that of St. Marten's is large, and has a lofty tower, and within it is buried the eclebrated geographer, Gerard Mercator; the R. Catholies likewise have a church, and the Jews a small synagogue. Doesburg possesses a poor's hospital, an orphan hospital, and a retreat for widows; a Latin sehool, and a branch of the general utility society. The inhabitants are chiefly engaged in agrieulture, cattlerearing, and the transit trade, but have no manufactures. The mustard raised here is largely exported. Six fairs are held annually, for cattle, horses, and pigs. Pop. 4000.

DOETINCHEM, or Deuticiem, a tn. Holland, prov. Gelderland, 17 m. E. Arnhem, r. bank, Old-ljssel, here crossed by a bridge. It is surrounded by a rampart, planted with trees; has four gates, and broad streets, lined with elegant houses; a townhall, in the market-place, a simple, solid structure ; a prison, a Reformed chureh, a small Lutheran chapel, and a Jewish synagogue; a Latin, and three other schools, and a branch of the general utility socicty. It was once a Hanse-town, and earried on a good trade, which has now greatly fallen of. Still, soap, gin, brandy, and vinegar are made to a limited extent; and, also, taming, ropemaking, dyeing, \&e., are carried on. Four well frequented markets are held. Pop. 1800.

DOFRINES Mountains, Norway. See Dovre-Fjeld.
DUG.-1, A small isl. Indian Archipelago, Banda Sea, off N.W. point of Wetter Island; lat. $7^{\circ} 40^{\prime}$ S.; Ion. $125^{\circ} 56^{\prime} \mathrm{E}$. -2, An isl. Gulf of Mexieo, off the mainland of Florida; lat. $29^{\circ} 46^{\prime} 18^{\prime \prime} \mathrm{N} . ;$ lon. $84^{\circ} 38^{\prime} 15^{\prime \prime} \mathrm{W} .-3$, One of the Virgin Islands; lat. $18^{\circ} 17^{\prime} \mathrm{N} . ;$ lon. $63^{\circ} 17^{\prime} \mathrm{W} .-4, \mathrm{~A}$ gulf, Strait of Florida; lat. $24^{\circ} 2^{\prime}$ N.; lon. $79^{\circ} 50^{\prime} \mathrm{W} .-5$, An isl., S. lacifie Ocean, one of the Low Islands, ahout 12 m . in eircumference, and caclosing a lagoon; lat. $15^{\circ} 15^{\prime} \mathrm{S}$. lon. $141^{\circ} 30^{\prime} \mathrm{W}$.

DOGAREE, a tn. IIindoostan, prov. Ajıneer, 23 m . N.E. Boondee. It stands on the margin of a beautiful lake, surrounded by low hills, covered with wood, and adorned with pagodas and other buildings.

DOGGERBANK, an extensive sandbank, and wellknown station for cod-fishing, between the E. coast of Eng land and the W. coast of Denmark. The W. part of the bank is about 36 m . E. Flamborough Head, whence it extends E.N.E. to within about 60 m . of Jutland. In some places it is 60 m . broad, but terminates entirely in a point. Having 9 fathoms water in its shallowest part, which is that nearest the English coast, it presents no obstruction to navigation. An obstinate naval combat took place on the Doggerbank, in 1781, between the British and Dutch fleets, in whieh neither side could claim a vietory.

DOGLIANI [anc. Moliana, Dolianum], a tn. Sardinian States, Piedmont, prov. of, and 11 m. N.E., Mondovi, l. bank, Rea. It has two churches, a cemetery, a communal college, a small hospital, the remains of an old castle, and several Government offices. Five annual fairs are held, at whieh much cattle, hemp, stuffs, and comestibles are sold. At the weekly markets the principal traffic is in wheat, and, aceording to the season, mulberry leaves, grapes, potatocs, \&c.

Yol. I.

The district is mountainous, and produces abundance of excellent wine, but very little wheat. The river Rea is crossed near the town by a wooden bridge. Pop. 5000.

DOGMELLS (St.), par. Wales, Pembroke. Pop. 2689.
DOGMERSFIELD, par. Eng. Hants; 1650 ac. P. 305.
DOGNACSKA, a vil. Iungary, Thither Theiss, co. Krassov, in a valley, $40 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Temesvar. It contains a parish chureh, and is the seat of a mining directory. Copper and zinc are worked and smelted here; some gold and silver also are found, and there is an excellent quarry of white marble. Pop. 2335.

DOGS (lsle of), or Poplar Marshes, a peninsula on the Thames, England, co. Middlesex, $3 \frac{1}{2}$ m. E.S.E. St. Paul's, London. The W. India Docks are situated on the N. part of it; and a little to the S . of these it is intersected by the City Canal. It derives its name from the cireumstance of the King's hounds having been formerly kept here.

DOGSTOWN, par. Irel., Tipperary; 406 ac. Pop. 69.
DOGWELLS (ST.), par. Wales, Pembroke. Pop. 819.
DOHARAB, an isl. Red Sea, E. side; lat. $16^{\circ} 18^{\prime} 30^{\prime \prime}$ N.; lon. $41^{\circ} 59^{\prime}$ E. It is low and sandy, about 2 m . in length, N. and S., and is surrounded by a reef, nearly 2 m . wide, with 6 to 14 fathoms close to it.

DOHNA, a tn. Saxony, cirele of, and 10 m . S.S.E. Dresden, in a beautiful and fertile district, r. bank, Muglitz, the valley of which, previously narrow, begins here to widen out. Having been mostly burnt down, in 1813, the far greater number of the houses are of recent construction, and well built. It contains a parish church, with a lofty tower, 400 ft . ligh, and a fine old altar-piece; and a well-endowed hospital; and has two annual fairs. Pop. 1294.

DOIIUD [Do-hud, two frontiers], a tn. Hindoostan, prov. Malwa; lat. $22^{\circ} 55^{\prime} \mathrm{N}$.; lon. $74^{\circ} 20^{\prime} \mathrm{E}$. It is of considerable extent, well built, and amply supplied with water. Being a thoroughfare for the inland traffic between the provinces of Upper Hindoostan and Malwa, it is also much frequented by the traders of the interior, It commands the principal pass into Goojerat, from the N.E. The present fort formerly a caravanserai, is said to have been built by Aurengzebe; it is 450 ft . sq., has two strong gates, and contains a mosque and two wells.

DOHUL, an isl. Red Sea, N.W. Dhalae; lat. $15^{\circ} 55^{\prime} \mathrm{N}$. ; lon. $39^{\circ} 40^{\prime}$ E. It is low, of a quadrilateral form, 9 m . in circumference, with some doum palms on it. On the N.W. side are a small village and mosque, with about 100 inhabitants; and on the E. are threc or four wells of fresh water, during the rains, but brackish in the dry season, barely affording sufficient for the natives, who subsist by fishing.

DOKO, a pigmy raee of negroes, inhabiting a region of tropical Afriea, S. of Abyssinia, the centre of which is nuarked by the intersection of the 3 d parallel of N . lat. with lon. $37^{\circ}$ L. They are four feet in height, of a dark olive complexion, and perfectly wild. They live in rude wigwams, constructed of bent canes and grass, far in the depths of the dense forests of bamboo with whieh the country is covered. They have no king, no laws, no arts, no arms; possess neither flocks nor herds; are not hunters, do not cultivate the soil, but subsist entirely on fruits, roots, mice, serpents, reptiles, ants, and honey. They beguile serpents by whistling, and, having torn them piecemeal with their long nails, devour them raw. They climb trees in search of fruit with all the agility of monkeys. Both sexes go perfectly naked, and have thiek, pouting lips, diminutive eyes, and flat noses. The hair is not woolly, and in the females reaches to the shoulders. The men have no beard. The nails, never pared, grow, both on the hands and feet, like eagles' talons, and are employed in digging for ants. They are ignorant of the use of fire. They have no religion, but possess a glimmering idea of a Supreme Being, to whom, when overtaken by any misfortune, they pray, standing on their licads. Being much esteemed for their docility and usefulness, they are carried off in great numbers annually by the slave-hunters, to whom, when taken, they tamely submit, and rarely attempt to cscape. The Dokos are supposed to be the pigmies of the ancients.-(The llighlands of Ethiopia, by Major Harris, vol. iii. chap. 8.)

DOL, an anc. tn. France, dep. Ille-et-Vilaine, 13 m. S.E. St. Malo, at the intersection of several great roads, and on a height overlooking marshy plains, which, where drained, are of great fertility. The site is unwholesome, and the town, 107

## DOLOL

built of dark-coloured granite, occasionally whitewashed, is old, inean, and dirty. The Grande Rue, however, is spacious and regularly built, and the church, of grey granite, and once a cathedral, is the finest gothic edifice in Brittany. Having once been a strong and important place, old walls and deep fosses are seen on every side of Dol; but the glacis of its former ramparts now form public walks. There are many singular houses in the town, with far-projecting fronts, in the narrow streets, and a cominunal college. Some salt is drawn from the surrounding marshes; and the district produces much cider, grain, flax, \&c. These find an outlet by the port of Vivier. Dol was taken and retaken many times during the Middle Ages, and the troubles of the League. In 1793, the Vendeans repulsed the republican forces in an assault upon it. Pop. 3387.

DOL-BEN-MAEN, par. Wales, Carnarvon. Pop. 401.
DOLCEACQUA [anc. Dulcisacqua], a tn. Sardinian States, Piedmont, gov. Nice, prov. of, and 7 m . W. by N. San Remo, in a mountainous district, on the Nervia, which divides it into two parts, one denominated La Terra, the other the Borgo, connected by a bridge of one arch. It has two churches, a local court, a customhouse, and other Government offices. In the vicinity are the ruins of an old castle. Pop. 2000.

DÓLE [anc. Dolum], a tn. France, dep. Jura, built on a vineyard slope rising from the Doubs, and on the canal between the Rhone and the Rhine, 26 m. S.E. Dijon, 967 ft . above sea level. It is well and rather regularly built, adorned with public fountains, and surrounded with fine promenades. The principal church, on the public square, is a lofty gothic edifice, consisting of three naves, supported by enormous pillars. The Tour-de-Vergy, an antique construction, now serves as a prison. The other chief buildings are the law courts, the new prison, the college, the two hospitals, and poorhouse, and the bridge over the Doubs. Among the antiquities are the ruins of a castle, built by Frederick Barbarossa, in the 12 th century; also of an amplitheatre, aqueducts, and other Roman constructions. Dôle is the seat of a sub-prefecture, a court of first resort and of commerce; and possesses an agricultural society, a commercial college, a public library, with 6,000 vols.; a museum, \&c., The manufactures compose Prussian blue, hosiery, iron warcs (str,ves, furnaces, \&c.), optical instruments, wax candles, vinegar, \&c.; and there are several tanneries, iron-forges, and tile works, with marble quarries in the vicinity. The trade, both by the canal and the river, is considerable, and consists of grain, flour, and wood; wine, brandy, vinegar, coal, iron, marble, mill-stones, \&c. The environs are very beautiful, and present numerous pretty villas, surrounded with gardens and vineyards. Dôle was founded by the Romans, and, in later times, was the capital of Franche-Comté, till its amexation to the kingdom of France. In 1442, it became the seat of a parlianent and a university, established by Philippe-le-Bon. Before the Jesuits were expelled from France they had a leading college here, the buildings of which still remain. The fortifications, once of great strength, were dismantled in 1674. Previously, it had been besieged, taken, and retaken, several times, alternately by Germans and French. Pop. 9322.

DOLE (LA), a mountain, Switzerland, can. Vaud, forming part of the princijal chain, and one of the loftiest summits of the Jura, about 7 m . W. of the lake, and 15 m . N.N.W. the town of Geneva. It is 5509 ft . high, and is easily ascended from the village of St. Cergucs. The magnificence of its view attracts the general tourist, whilst its richness in Alpine plants makes it particularly interesting to the botanist.

DÔLGELLEY, Dôlgellaf, or Dôlgelleu, a market tn. and par., N. Wales, co. Merioneth. The parish is about 16 m . long, and from 3 to 4 m . broad.-The rown, beautifully situated in a narrow vale, at the N. skirts of Cader Idris, on the river Gwynion or Whion, 46 m . W. Shrewsbury, has narrow and irregularly laid out streets, houses generally small and ill built, though some handsome dwellings have been erected of late years, to the improvement of the appearance of the town. There are here a parish church, and four dissenting chapels; and a national, a British, and a free grammar school. The principal public buildings are the countyhall, gaol, markethouse, and townhall. Dolgelley has extensive tanneries; and manufactures of Welsh flannels and
kerseymeres, and more especially of a kind of woollen cloth called 'webs,' exported chiefly to America, from London and Liverpool. These cloths are woven in the houses and cottages of the weavers. Market-day, Tuesday; and six fairs annually. Pop., par. 3695.-(Local Correspondent.)

DOLGOI, a name, in Russian, signifying long, and given to several small isls. Russia, particularly :-1, An isl., gov. Archangel, in the Arctic Ocean, $55 \mathrm{~m} . \mathrm{S}$. Waigatz Island.-2, An isl. in the mouth of the Neva, at the entrance of the Gulf of Finland.-3, An isl. in the Caspian Sea, S.E. the mouths of the Volga, belonging to gov. Astrakhan.

DOLHA, or DOHA, a market tn. Hungary, Thither Theiss, co. Marmaros, in a plain surrounded by wooded heights, on the Dolha or Borsavo, 30 m . from Szigeth. It contains a Protestant and a R. Catholic church; and has a potash work, and an annual fair The inhabitants are Rusniaks. Pop. 886.

DOLINA, a tn. Austria, Galicia, circle of, and 22 m . S.S.E. Stry. It contains a R. Catholic and a Protestant church; and has extensive salt-works. Pop. 3200.

DÖLITZ (Niederheim), a vil. Saxony, circle of, and S. Leipzig, r. bank, Pleisse; with a mill, an old castle, and numerous pretty country houses, ehiefly occupied by the Leipzigers. Pop. 930.

DOLLA, par. Irel. Tipperary ; 7354 ac. Pop. 1529.
DOLLAR, a vil. and par. Scotland, co. Clackmannan, the former 11 m . E. by N. Stirling, pleasantly situated on a rising ground, but deriving its chief interest from its celebrated academy, founded by a Mr. John Macnab, a native of the parish, who, from being a poor ship boy on board of a coasting trader, became a man of large fortune. He left a sum of $£ 90,000$, three per cents, for behoof of the Dollar academy. The building, erected in 1819, is a handsome structure, in the Grecian style, 186 ft . in length, and 63 ft . in breadth, with a portico in front, supported by six columns. The principal branches taught are English, writing and arithmetic, Latin, Greek, modern languages, geography, botany, drawing, and mathematics. There is also a female teacher of sewing and fancy work for the girls of the parish. The fees paid for education rise by a graduated scale, corresponding to the supposed ability of the parents to pay, so that the poorer classes obtain an excellent education for their families at $8 d$. per quarter for each class attended; but if more than one child be attending the school at a time, the second and others are admitted at half price. Within a short distance of Dollar are the ruins of an ancient residence of the noble family of Argyll, called Castle Campbell. Pop., vil. and par., 1562.

DOLLART (The), [Latin, Sinus Emdanus or Dollarius], a gulf, North Sea, at the mouth of the river Ems, which passes through it, between prov. Groningen in Holland and E. Fries land in Hanover. It was formed by the bursting in of the sea in 1277, and again in 1530. By these floods, 34 large villages and numerous hamlets were submerged, and thousands of human beings and cattle destroyed. Much land has, how ever, been gained back from this gulf, and now forms numerous fertile polders.

DOLLOVA, a vil. Hungary, Banat, dist. Temesvar, 21 m. E.N.E. Belgrade. It contains three Greek non-united churches, and has 10 flour mills. Pop. 2035.

DOLM, a snall isl. Norway, coast of Trondhjem, near the island of Hittern, and between it and Froyen; greatest length, 6 m .; breadth, about 1 m . Its surface is sterile and mountainous. Two summits, one on the W., and the other on the E.side, rise, bare and precipitous, to the height of nearly 3000 ft . The only inhabitants are a few fishermen.

DOLMATOV, a tn. Russia, gov. of, and 300 m . E.S.E. Perm, l. bank, Iset. It contains a fine monastery, and has an annual fair, which is numerously attended by dealers from Siberia. lop. 1600.

DOLO, a tn. Austrian Italy, gov. of, and 12 m . W. Venice, on the Brentano, here crossed by a handsome bridge near its junction with the Brenta. It is the seat of a court of law and several public offices. It is surrounded by many fine villas of the patricians and citizens of Venice; contains a parish church and two public oratories, and has an annual fair. Pop. 3600

DOLOL, a vil. Seneganıbia, near l. bank, lower Senegal. The inhabitants are industrions cultivators, and sell much of their produce to the French colonists of St. Louis.

DOLONNOOR,tn. Mongolia. See Chao-Naman-Soume.
DOLORES.-1, A tn. Spain, Valencia, prov. of, and 24 m. S.W. Alicante, in a fertile plain. It has three squares, a church, townhouse, two schools, a prison, public granary, and cemetery. The inhabitants are chiefly engaged in hushandry, rearing silkworms, and expressing oil and wine. Pop. 2433. -2, A vil. Mexican Confederation, state of, and 24 m . N.W. Guanaxnato. It is also, with various affixes, the name of several places in different parts of what once formed Spanish N. America.

DOLPHINTON, par. Scot. Lanark; 2926 ac. Pop. 305.
DOLTON, par. Eng. Devon; 2180 ac. Pop. 922.
DOLW YDDELAN, par. Wales, Carnarvon, 4 m. by 3 m . Pop. 754.

DOMANIS, or Domanisa, a market tn. Hungary, Hither Damube, eo. of, and 30 m . E.N.E. Trentschin. It contains a parish church and two castles, one of them a ruin. Pop. 1370.

DOMBEGYHAZA, a vil. Ifungary, co. Csanad, near Battonya. It contains a Protestant church, and stands in a fertile district, in which much tobaceo is grown, and great numbers of cattle are reared. Pop. 1191.

DOMBES, a dist. France, long forming a sovereign principality which belonged to the Dukes of Bourlon, with whom it remained till 1681, when it passed to the Duke of Maine, a natural son of Lonis XIV. Its sovereignty merged in that of the Crown in 1762. It furmed part of the diocese of Lyons, and is now included in dep. Ain. Trevoux was its capital.

DOMBO, Dubove, or Dimbon, a vil. Hungary, Thither Theiss, co. Marmaros, in a little plain. enclosed by hills about $16 \mathrm{~m} . N$. Szireth. It contains a Greek Catholic church, and has a saw mill. Pop. 1627.

DOMBOVAR, a market tn . Hungary, Thither Dannbe, en. Tolna, ncar l. hank, Kapos, 21 m . N.N.W. Fünfkirchen. It contains a parish church, and the ruins of an old castle, which made a considerable figure in the wars with the Turks, having oft en defied all their efforts to take it. Pop. 1330.

DOM BROW 1CE, a tn. Russian Poland, woiwode Masovia, ahout 84 m . W. Warsaw. It contains two churches, and has seven annual fairs. Pop. 1159.

DoMBURG, a vil. Holland, prov. Zeland, on isl. Waleheren, 9 m. N.W. Flushing. It has a townhall, Reformed church, school, and elegant baths, and is much frequented, as a place of recreation, by the inhalitants of the island, more especially those of Middleburg. Pop. 600.

DOMENIGA (SANTA), a tn. Naples, prov. Calabria ('itra, 3 m. E. Scalea. Pop. 3100 .

DOMEsNE, a cape, Russia, gov. Courland, in the Baltie, W. side of the Gulf of Livonia, or Rign, S. of the isle of Oesel; lat. $57^{\circ} 46^{\prime}$ N.; lon. $22^{\circ} 28^{\prime}$ E.

DOMFRONT [Latin, Domefrontium], at th. France, dep. Orne, picturesquely sifuated on a steep rock, almost perpendicular on its W. side; and bathed by the Varenne, 35 m . W.N.W. Alençon. The interior is very dull; honses illbuilt, strects narrow, steep, and crooked; water searce and lad; air pure, but too keen for delicate constitutions. The coly buildings worth noticing are the antique church of Nôtre Dame, and the ruins of a strong old castle. Domfront is the seat of a sub prefecture, a court of first resort, and a communal college. Its manufactures consist of linens, ticks, drugget, serges, \&c., and in the vieinity are forges, glass works. and paper mills. The articles of trade are linens, eattle, and leather. Domfront was founded carly in the 11 h eentury, and was formerly a coveted stronghold. It was le sieged and taken in 1203, by King Philip Augustus; in 1359 and 1418, by the English; in 1574, by the forecs of Catherine Ne Medicis, from the IInguenots; in 1589, from the Leaguers, by Henry IV. Pop. 2086.

DOMINGO (SAN), a fortified city, Hayti, and the metropolis of the E. division of that island, on the S.E. coast, at the mouth, and on r. bank, Ozama ; lat. $18^{\circ} 28^{\prime} \mathrm{N}$.; lon. $69^{\circ} 50^{\prime}$ W. (e.) It is surrounded by a thick wall; the honses are neatly built, the strects straight and spacious, with foot ways of brick. There are here a fine cathedral, some handsome churches and eonvents, an hospital, barrack, and arsenal. The fortifications by which the town is defended are judiciously construeted. The harhour is comfolious, and ships may lie close to the shore to take in their lading. San Domingo had formerly a consilerable trale in jerked beef, catte, and hides; but it is now rery limited. This is the oldest Euro-
pean city in the New World, having been founded in 1502 During the 16 th century, it was at the height of its pros perity; but since that time it has greatly fallen off in population and commerce. Pop. estimated at 10,000 to 15,000 .

DOMINICA, a British W. India isl., one of the Lesser Antilles, Leeward group, between the islands of Martinique and Guadeloupe, from both of which it is nearly equidistant, 25 to 30 m .; lat. (N. point), $15^{\circ} 38^{\prime} \mathrm{N}$. ; lon. $61^{\circ} 26^{\prime} \mathrm{W}$. (r.) It is about 29 m . in length N . to S., and 12 m . in breadth E. to W.; area, 186,436 ac. Its appearance, when viewed from the sea, is rugged and mountainons; but it contains many fertile valleys. Its loftiest summit has an elevation of 6000 ft ., being greater than that of any of the other W. India islands, with exception of Cuba, Irayti, and Jamaica. The slopes of the mountains, which occupy the whole interior of the island, from N. to S., are very steep, and terminate in bold and precipitous coasts. The island is of volcanic origin, and contains several solfataras; and has numerous sulphurous and thermal springs-the latter are said to be sufficiently hot to coagulate an egg, and are believed to possess great medicinal virtues. Dominica is one of the best watered of the Leeward Islands, having at least 30 streams, besides numerouts smaller rivulets. The soil, though somewhat stony, is fertile; but has been found better adapted for the production of coffec than sugar. The shores are but little indented, and are entirely without harbours; but on the W . side there are several grod anchorages and bays, the coast being all along bold and clear of danger. The principal bay is Prince Lupert's, at

the N.W. end of the island; mueh resorted to for its safety, convenience, magnitude, and dep th of water, besides afiording abundance of wood and fresh water. On the W. coast, calms frequently occur, which sometimes extend 6 m . to sea. The climate is extremely hot and is considered unhealthy. The woods afford large supplies of excellent timber, including resewood, gum-trees, \&e. The principal produce consists of run, coffee, sugar, molasses, cacao, arrow-root, and wool. Great quantities of honcy and wax are also obtained in the clefts of trees and other places, the produce of the European bee which was brought to the island, and which now swarm in the woods. The exports, in 1849, were $£ 48,523$, and the imports, $£ 50,534$. The revenue fir the same year amomed to $£ 8877$, and the expemditure to $£ 10,539$. The government of the island is under the governor-in-thief of the leeward Islands, administered ly a lieutenant-governor, a legislative council, an exceutive council, and a representative assemilly.

The laws in force are the common statute law of England. The principal towns are Roseau, or Charlotte Town, on the S.W. side ; and Portsmouth, or Prince Rupert's Town, considerably to the N. of Roseau. The latter consists of about 500 houses, and contains a Protestant church, some R. Catholic and Dissenting places of worship, four public or free schools, supported by the bishop of the diocese; and an infant school. Dominica was discovered by Columbus, in 1493, and was claimed alternately by England, France, and Spain; but was finally ceded to Great Britain in 1763. The population of the island is stated at 22,200 ; of whom 10,596 are males, and 11,604 females.

DOMINICA [native, Obevahoa], one of the Marquesas Islands, S. Pacific Ocean ; lat. (N. point) $9^{\circ} 34^{\prime}$ S.; lon. $139^{\circ} 4^{\prime} \mathrm{W}$. (r.) ; the largest of the group bcing about 18 m . long, and the same in breadth. It is crowded with rugged hills, rising in ridges directly from the sea, and separated by deep valleys, which, as well as the sides of the hills, are clothed with wood.

DOMINICK (St.), par. Eng. Cornwall; 2680 ac. P. 825.
DöMITZ, a tn. Mecklenburg-Schwerin, eap. bail. of same name, on the Elbe, at the confluence of the Elde, 34 m. S. by W. Schwerin. It is built in the shape of an irregular square, and is surrounded on the $\mathbf{S}$. and E. sides with an earthen rampart, flanked with bastions, and defended on the W. side by a citadel, situated on an island in the Elbe. It contains a church, townhouse and barracks, and has manufactures of linen, a small building yard, some shipping, a considerable trade, and four annual fairs. Dömitz suffers much from the inundations of the Elbe. Pop. of town, 2545, of bail. (area 48 geo. sq. m.), 5167.

DOMME, a tn. France, dep. Dordogne, 1. bank, Dordogne, 36 m . S.E. Perigueux. It is picturesquely situated on one of the highest and steepest hills of the department, and was once a place of great strength and much more importance than at present. Its ancient walls and fortifications, extending to a considerable distance around its present site, may still be traced. It has monthly fairs; one of them, for cattle, is of some consequence. Pop. 1144.

DOMMEL [anc. Dutlimala], a river, Holland. It rises in Belgian Limburg, flows N. into N. Brabant to Eindhoven, thence circuitously N.W. to Hertogenbosch, where it unites with the Aa , whose name it.takes, and falls into the Mas at Crevecoeur, after receiving several affluents; of which the most important are the Little Dommel and the Tongelreep, on the right, and the Eikenriet and Ley on the left. It is net navigable, but propels numerous mills. Course very crooked; direct distance from source to mouth about 40 m .

DOMMITZSCH, a tn. Prussia, prov. Saxony, gov. Merseburg, r. bank, Elbe, 7 m . N.N.W. Torgau. It consists of the town proper and a suburb, contains a church and an hospital and tile-works, extensive potteries, and has three annual fairs. Pop. 1979.

DOMNAU, a tn. Prussia, gov. of, and 24 m . S.S.E. Königsberg. It is the seat of a court of law, contains a church and an hospital, and has a trade in horses and cattle, and four annual fairs. Pop. 1281.

DOMO, or Dono d'Ossola [Latin, Oscela, Ocelum], a tn. Sardinian States, div. Novara, formerly cap. of ane. prov. Ossola, but now in prov. Pullanza, r. bank, Toce, $78 \mathrm{~m} . \mathrm{N}$. by E. Turin. It stands on the great Simplon road, in the centre of a plain, 1000 ft . above the sea, and surrounded by lofty mountains; is the seat of a superior court of law, and several public offices; consists of the town proper and a suburb, and is on the whole well built, having several good streets, and one large, and six minor squares. It contains a landsome parish clurch, consisting of three naves, separated by rows of pillars, and adorned with numerous fine frescoes; a Franciscan church and convent, several elegant palaces, of which that of the Della Silva family is most deserving of notice; a courthouse, a large and well-constructed prison, an hospital, a superior school or college, kept in the old palace Mellerio ; and an old castle, now occupied as private buildings; and has manufactures of cotton, ironware, and articles in wood; a weekly market, and two annual fairs, each of which lasts eight days. Pop. 2200.-(Casalis.)

DÖMÖS, a vil. Hungary, co. Gran, on the Danube, about 19 m . N.N.W. Pesth. It contains a handsome church, built on the ruins of a celebrated old monastery; and in the
ncighbourhood, on Mount Arpas, is an old feudal castle. Póp. 1067.

DOMREMY-la-pucelle, a vil. France, dep. Vosges, 7 m . N. Neufchateau, near Vaucouleurs. It is built half way up a hilly mountain slope, in a beautiful valley, watered by the Meuse. The small houses which form the central street are neat, and their outer walls generally covered with espaliers, which gives the place a pleasing aspect. The celebrated Joan of Arc was born here, in 1412, in a cottage which is still standing. It had latterly become a stable; but now serves as a gratis school for young girls. In 1810, a fine public fountain, with a marble bust of the heroinc, was raised in front of it. Pop. 319.

DOMRIANSK, a market tn. Russia, gov. of, and 40 m . N.N.E. Perm. In its vicinity are extensive iron-works. Pop. 1600.

DON [anc. Tanaïs], a river, Russia, which issues from Lake Ivan-Ozera, in the gov. of Tula; lat. $53^{\circ} 47^{\prime} \mathrm{N}$. ; lon. $38^{\circ} 15^{\prime}$ E., and flows S.E. through govs. Riazan, Tambov, Voronej, and Don Cossacks, to within 37 m . of the Volga, where it turns abruptly S.W. for 236 m ., and falls into the Sea of Azof, near the town of Azof, by three months, only one of which is navigable; whole course nearly 900 m . The chief tributaries are, r. bank, the Donetz and Voroneje; 1., the Khoper and Manitscl. The delta of the Don is an expanse of sandy flats, occasionally quite submerged round with reeds, running 28 m up, and 22 m . wide at the coast line. Notwithstanding the shallowness of the channel, no vessels drawing 6 ft . water being able to get up to more than about 30 m ., namely, to Rostoff or Axaï, it has by far the most busy trade of all the rivers of S. Russia. The navigation is nearly all downward, indeed; and can only take place during spring floods; nevertheless, by means of its lower course, in connection with the Volga, the S. provinces of Russia receive most of the Siberian produce they need, and also the manufactures they require from the interior of the empire. The extensive and productive fisheries of the Don likewise add much to the traffic seen upon its lower waters.

DON.-1, A river, England, co. York, which rises near the borders of Cheshire, flows E. to Peniston, thence S.E. to Sheffield, and thence N.E. to Goole, where it joins the Ouse, after a course of about 55 m . Its principal tributaries are the Rother, the Dearne, and the Went; and the chief towns on its banks are Peniston, Sheffieh, Rotherham, and Doncaster. By means of artificial cuttings and canals, it has been rendered navigable to Sheffield, a distance of nearly 40 m .
2, A river, Scotland, co. Aberdeen, rising in several small streams flowing from the hills between cos. Aberdeen and Banff. It flows tortuously E. through the whole breadth of Aberdeenshire, past Towie, Alford, Monymusk, Inverury, and Kintore, and falls into the N. Sea, 2 m . N. Aberdeen, after a total course of 62 m . Its principal tributary is the Urie, which joins it at Inverury. Its salmon fisheries are of considerable value.

DON (Le), a river, France, which rises at Verita, on the E. frontiers of dep. Loire-Inferieure, flows almost due $\mathbf{E}$. across that department, and joins l. bank, Vilaine, about 8 m . N.E. Redon, after a course of 50 m. , of which about 10 m ., beginning near Guemené, are navigable.

DON BENITO, an increasing tn. Spain, Estremadura, prov. of, and 49 m . E. Badajos. 35 m . S. Trujillo, near 1 . bank, Guadiana. Most of the houses are substantially built, and form wide, clean, and tolerably well paved streets. The town contains three squares, the principal one of which is large, has a public promenade in the centre, and is lined with handsome buildings, among others the townhall, prison, and a convent. Its other public edifices comprise two chapcis, two hospitals, 11 schools, a barrack, storehouse, and extensive cemetery. The supply of water is copious, but its quality indifferent. Mannfactures :-cloth, baize, wine, and oil. The weaving is principally performed by females. Trade :-in cattle, grain, wool, fruits, \&c. Annual fair in September. The Guadiana affords great facilities for the transmission of its agricultural and industrial produce to Merida, Badajos, and other points. Pop. 14,610.

DON COSSACKS. See Cossacks.
DONA (SANTA), or Fosso, a vil. and par. Austrian Italy, gov. of, and 20 m . N.E. Venice, on a creek of the Brenta. It contains a parish church and two oratories. Pop. 3830.

DOÑa MENCLA, a tn. Spain, Andalusia, prov. of, and 24 m. S.E. Cordova, on a hill-slope. Its heuses are well built; and it has a townhall, a normal and a female sehool, a parish church, and two hermitages ; and a public walk, adorned with two stone fountains. The inhabitants, though chiefly engaged in agriculture, have seven oil and eight flour mills. They also make mild soap, and have 20 establishments for distilling brandy, which is exported to a considerable extent. Pop. 4280.

DONABATE, par. Irel. Dnblin; 2715 ac. Pop. 479.
DONACAVEY, par. Irel. Tyrone; 23,052 ae. P. 11,229.
DONADEA, par. Irel. Kildare; 2110 ac . Pop. 376.
DONAGH, two pars. Irel.:-1, Donegal; 25,259 ac. Pop. 5447.-2, Monaghan; 16,202 ac. Pop. 10,244 .

DONAGHADEE, a seaport, market tn., and par. Ireland, eo. Down. The town lies on the Irish channel, 16 m . E. by N. Belfast : lat. $54^{\circ} 38^{\prime} 36^{\prime \prime} \mathrm{N}$. ; lon. $5^{\circ} 31^{\prime} 42^{\prime \prime}$ W. (r.) Its streets are wide and well kept; and the portion of the town next the shore, built in the form of a crescent, with the honses whitewashed, presents a cheerful and pleasing appearance. The parish chureh is a large ancient cruciform structure, with a lotty tower. There are, besides, a Methodist and two Presbyterian meeting-houses, several schools, a dispensary, and an infirmary. There are here a spacions harbour, pier, and light-house, with a stationary red light. The harbour is a large artificial basin of 7 ac ., and is capable of admitting, at low water, vessels drawing 16 ft ; but is little used, Belfast monopolizing the greater portion of the trade; even the post-office steam packets no longer ply between this port and Portpatrick, in Scotland. Its principal exports are live cattle and pigs; its chief imports, coal and timber. Many of the females are employed in embroidering muslin for Glasgow houses. Donagliadee is a constabulary station, and the head of a coast guard district. Market day, Wednesday; several fairs annually. Area of par., 9539 ac. Pop. 7557 ; of th., 3151.

DONAGHCLONEY, par. Irel. Down; 6698 ac. P. 6373.
DONAGHCUMPER, par. Ircl. Kıldare; 2252 ae. Pop. 1206.

DONAGHEDY, par. Irel. Tyrone; 39,398 ac. P. 10,608. DONAGIIENRY, par. Irel. Tyrone; 7155 ac. P. 5673
DONAGHMORE, a vil. and par. Ireland, co. Tyrone, 5 m . W. by N. Dungannon. The village, which was an important military station in the wars of Ireland, contains a chapel of ease, a R. Catholic and an Independent chapel, and an extensive brewery; area, $18,410 \mathrm{ac}$. Pop. 1233.

DONAGHMORE, several pars. Irel.:-1, Kildare : 301 ac. Pop. 29.-2, Kilkenny; 5270 ac. Pop. 2694 -3 , Meath; 3955 ac. Pop. 1524.-4, Mcath; 3413 ac. Pop. 391.-5, par. and tn. Queen's co.; 3529 ac. Pop. 1620. -6, par. Wexford; 7478 ae. Pop. 2497.-7, Wicklow; 23,428 ac. Pop. $3910 .-8$, Cork; 22,308 ac. Pop. 7491 . -9 , Cork; 312 ac. Pop. 458.-10, Limerick; 943 ac . Pop. 727.-11, Tipperary; 1797 ac. Pop. 459.-12, Donegal; 46,378 ac. Pop. 12,955.-13, Down ; 8396 ac. Pop. 4436.

DONAGHMOYNE, par. Irel. Monaghan; 25,604 ac. Pop. 15,110.

DONAGHPATRICK, two pars. Irel. :-1, Meath; 4028 ac. Pop. 786.-2, Galway; 10,342 ac. Pop. 3770.

DONALDSONVILLE, a t ., U. States, once cap. of Louisiana, situated on the Mississippi, below the outlet of La Fourche, 73 m. W. by N. New Orleans. It has a jail, arsenal, markct house, R. Catholic church, and a college. Pop. about 1000 .

DONANAGHTA, par. Irel. Galway; 2634 ac. P. 1870.
DONARD, a par. and vil. Ireland, co. Wicklow. The village, $24 \mathrm{~m} . \mathrm{W}$. by N. Wicklow, contains a church, R. Catholic chapel, and the ruins of a church, which was burned in 1798. Pop. of vil., 513 ; of par. (area, 4809 ac .), 1334.

DONATO (SAs)-1, A tn. Naples, prov. Calabria Citra, near Castrovillari, and about 30 m . N. Cosenza. Pop. 3146.2, A tn. duchy of, and 3 m . E.S.E. Parma, near l. bank, Enza. Pop. 2800.

DONATS (St.), two pars. Wales:-1, Glamorgan. Pop. 151.-2, (Welsh), Glamorgan. Pop. 275.

## DONAU. See Danure.

DONAUESCIIINGEN, a tı. Baden, Lake circle, eap. bail. of same name, at the confluence of the Brigaeh and

Brege, 29 m . E. by S. Freiburg. It contains a palace, the residenee of the Prinee of Fürstenberg, a plain modern edifice, with a library and picture gallery; a handsome parish church, gymnasium and theatre, and has manufaetures of linen and some general trade. In the corner of the palace garden is a basin filled with clear sparkling water, which is conducted for about 50 yards by a subterranean channel into the Brigach, and claims to be the source of the Danube, because there the stream first begins to bear that name. Pop. of tn ., 3050 ; of bail., 8978.

DONAUSTAUF, a market tn. Bavaria, ercle Regen, 1. bank, Danube, here crossed by a bridge 6 m. E.N.E. Ratizbon. It contains two castles, one of them a well-preserved ruin, picturesquely situated on a height which overhangs the town, and commands a fine view; two ehurches and a poorhouse. On a neighbouring height stands the Valhalla or Wallalla, a large, imposing Grecian temple, of the Dorie order, intended as a national monument and temple of fame for Germany. Pop. 1164.

DONAUWÖRTH, a tn. Bavaria, circle Swabia, cap. dist. of same name, at the confluence of the Wörnitz and Danube, both of which are here crossed by bridges, 25 m . N . by W. Augsburg. It rises on the side of a hill, in the form of an amphitheatre, is surrounded by a wall, and well built. It is the seat of a court of law, and several public offices, contains four churclies, two chapels, a townhouse, a Latin sehool, hospital, Dominican numery, and the buildings of a fine old Benedictine abbey; and has manufactures of linen and leather, some shipping, a considerable trade in corn, flax, linen, wool, and cattle, and several annual fairs. The heights of Schellenberg, in the neighbourhood, are memorable for the entrenched camp which the Bavarians had formed upon them, and the forcing of it by Marlborongh a few weeks before the victory of Blenlieim. Donauwörth is very ancient, and rose to be a free imperial eity. Its inhabitants early embraced the Reformation; but, in consequence of some violent proceedings, in 1607, subjected their town to the ban of the empire. The severity of the punishment led to the formation of the Protestant League, and, in opposition to it, of the Catholic Union, and thus indirectly was one main cause of the Thirty Years' War. Pop. of tn., 2700 ; of dist. (area, 72 geo. sq. m.), $13,455$.

DONCASTER, a market tn. and par. England, co. York, W. Riding. The Town, 142 m . N.W. London, and 25 in . S.E. Leeds, is pleasantly situate r. bank, Don, here crossed by two handsome stone bridges. Doncaster may be described generally as well built and handsome. The streets are for the most part straight, broad, and well paved, and the principal supplied with efficient sewerage ; they are also well lighted with gas. The parish church is a large and magnificent ancient cruciform structure, having a richly ornamented tower 151 ft . high, and containing many interesting monuments, aud relies of antiquity; Christ Church is a handsome modern fabric, built at a cost of $£ 13,000$. Besides these two churches there aro a large Wesleyan chapel, a commodious Independent chapel, and several smaller ones belonging to the Primitive Methodists, Baptists, and Unitarians respectively, also a R. Catholic chapel. The other publie buildings are the mansion-house, an elegant edifice of the composite order; the townhall, a new and baudsome building; the theatre, jail, public library, news room, corn exchange, covered market, lyceum, and the betting room, situated near the mansion-house, a small but handsome edifice, with Ionic columns. The cross, a facsimile of an ancient one, taken down in 1793, is a very elegant structure. The principal educational institutions are a grammar school, a national school, a British school, and scveral daily schools. There are numerous charitable institutions, a dispensary, and the 'Yorkshire institution' for the instruction of deaf and dumb children, liberally supported, and occupying a large and commodious building called Eastfield House, in an airy sitnation near the race course. The mannfactures of Doncaster are incousiderable, consisting merely of a little cotton and wool spinning, and glove and stocking knitting by the labouring population. There are, however, some small foundries, roperies, machine works, and a flax and flour mill. It has also a considerable trade in corn by the Don, which is navigable for vessels of 50 tons as far up as Sheffield, or about 20 m . beyond Doncaster. The celebrated races of Doncaster, with which that name is now inscparably
associated, commence on the Monday of the third week of September, and continue for five days. The race course, nearly 2 m . in length, is about 1 m . from the town, on the road to London, and is one of the finest in the kingdom. The frand-stand is an elegant and commodious structure, crected by the corporation, which subscribes, besides, $£ 380$ per annum, over and above incidental expenses, amounting to upwards of $£ 200$. The whole cost of forming, and subsequently improving the race course, since 1777 , when the grand stand was erected, is said to amount to about $£ 20,000$, all defrayed by the corporation. The celebrated St. Leger stakes were established in 1776, and received their name from their principal founder, Colonel St. Leger, who resided in the neighbourlıood of the town. For this race, 15 to 20 horses are generally entered, although there have been frequently three to four times that number. In 1803 , the King's plate of 100 guineas, was removed from Burford to Doncaster. The races attract visitors from all parts of the kingdom, from Ireland, and even from foreign countries.

Under the Municipal Reform Act the borough is divided into three wards, with six aldermen, and 18 councillors; it has also a commission of the peace. The income of the borough is between $£ 10,000$ and $£ 11,000$. Doncaster was originally a Roman station, being at a point where one of the great Roman roads crossed the river Don, and is called Danum in the Itinerary of Antoninus. From the Saxons it obtained the name of Dona Ceastre, whence its present appellation. Previous to the Reformation, it was the seat of several monastic establishments, amongst which were the White Friary, founded in 1350 ; the Grey Friary, founded in 1310; and the Black Friary, of uncertain date, with several chapels and hospitals. The cleanness and elegance of the town, the beauty of its situation, salubrity of its air, and the abundance and cheapness of provisions, render Doncaster one of the most desirable places of residence in the kingdom. There is a station of the Great Northern Railway in the town. Pop. ( 1841 ), 11,245; area of par. 5840 ac .

DONCHERY, a th. and com. France, dep. Ardennes, 3 m . W. Sedan, r. bank, Meuse. It is surrounded with walls, and generally well huilt, and has manufactures of anvils, ironwares, and sheet iron; also a brewery, and dyework. It was once a stronghold, and resisted an attempt of the Emperor Charles V. to take it. Pop. 2032.

DONDA CAPE, Indian Archipelago, isl. Celebes, N.W. coast, S.W. Cape Rivers, and about 57 m . N.E. Cape Temoel; lat. $0^{\circ} 48^{\prime} \mathrm{N}$.; lon. $119^{\circ} 57^{\prime} \mathrm{E}$.

DONDRAH, or Dondera Head [anc. Dewandre-the island's end], the S. extremity of isl. Ceylon; lat. $5^{\circ} 55^{\prime} \mathrm{N}$. ; lon. $80^{\circ} 37^{\prime}$ E. ; a steep, narrow, and rugged promontory overlooking, and about 1 m. E. of a low tongue of land covered with cocoa-nut trees. It was the site of the Singhalese capital during a part of the seventh century, numerous remains of which still exist, iucluding several hundred upright stone pillars, interspersed among native huts, gardens, and cocoanut plantations; they are cut into various shapes, and exhibit different senlptures. Near the sea shore is a group of plain stone pillars, and on a low rocky point a single pillar, over which the sea breaks amidst hewn stones, the remains of some ancient building. This solitary pillar, the form of which is alternately octagonal and square, is supposed to mark the utmost limits which remain of Vishnu's conquest and religion. Dondera is still held particularly sacred by the votaries of Vishnu, and still has a temple, with its priests and attendants. Near the ruins is a neat village of same name, containing a Wesleyan school, and 900 inhabitants.-(Pridham's Ceylon; Ceylon Gazetteer, \&c.)

DONEGAL, a maritime co. Ireland, N.E. coast, prov. Ulster, cap. Lifford, having Lough Foyle, and the cos. of Londonderry and Tyrone, on the E.; Donegal Bay and the co. of Fermanagh on the S.; and the Atlantic Ocean on the N. and W. Greatest length, 85 m. ; greatest breadth, 41 m . Area, 1,193,443 ac., of which 393,191 are arable; the greater part of the remainder being composed of heathy mountain and bog. The coast is indented with numerous bays and arms of the sea; the most remarkable of which, Lough Swilly, penctrates 25 m . into the land. It is the most mountainous cominty in Ireland, and, in many parts, especially towards the S.W., the most desolate and dreary. There are, however, many fine fertile valleys, and the scenery, in the rougher dis-
tricts, is often magnificent. Some of the higher mountains attain an elevation of from about 2000 to nearly 2500 ft . The loftiest are Erigal, in the N.W., and Bluestack, in the S.E. The wildest and most romantic scenery is to be met with in the barony of Banagh, which comprehends the S.W. peninsula, in which the county terminates, a space of about 15 m . in length from Rossan Point inwards, by 10 in breadth. The coast here is lined, for several miles, with stupendous cliffs and precipices, rising, in some places, to the height of nearly 2000 ft . Several small islands are scattered along the N.W. coast, of which the N. Arran Islands are the most considerable. The streams and lakes are numerous, but small; of the latter, Lough Derg (which see) is the most noted. The climate is moist, the sub-soil chiefly granite, mica-slate, and limestone, and the principal crops oats, potatoes, and flax, though wheat and barley are also successfully cultivated in some of the more favoured districts, particularly in the baronies of Raphoe and Tyrhugh. The whole extent of land under crop, in 1347 , was $202,888 \mathrm{ac}$., or about onefifth of the entire surface. Spade husbandry is much employed, and agriculture gencrally is in a very backward state, though improvement is going on in some quarters, of which may specially be instanced the district of Gweedore (which see). The cattle are small and stunted, though improved of late years by the introduction of Scotch and English breeds; but the pasturage, in general, is unfitted for fattening, and is used only for grazing sheep, young cattle, and milch cows. The manufactures are limited; that of linen cloth is decreasing, while that of woollen stockings, which affords employment to a great many females, is increasing. Cotton cords, velveteens, fustians, and checks, are woven for exportation, and friezes for home consumption. There are several bleachfields in the county, and numerous flour-mills. The herring fisheries are extensive and valuable ; employing, in 1849,2810 registered fishing vessels, and 12,188 men and boys. Cod, ling, haddock, turbot, and other flat fish, abound on the coast, but little is taken beyond supplies for the neighbourhood. A considerable trade is done through the seaports of the county, Ballyshannon, Letterkenny, Rathmelton, Donegal, and Killybegs. Whisky is made in large quantities, both licensed and unlicensed; in particular, the barony of Imishowen has long been celebrated for the superior quality of the spirit produced there, and for the prevalence of smuggling amongst its inhabitants. The minerals of the county include marble of various and valuable kinds, lead and copper ores, iren pyrites, manganese, pipe-clay, \&c., but none of these have yet been wrought to any advantage. Pearl mussels abound in the rivers, in which large and fine pearls are often found. The number of children attending public schools, in 1841, was 14,083 ; but, in 1848 , the number had increased to 21,673 . Donegal contains six baronies, Bameagh, Boylagh, Innishowen, Kilmacrenan, Raphoe, and Tyrhugh; and 51 parishes, and returns two members to Parliament, both for the county. Registered electors (1850), 701. Pop. (1841), 296,448; (1851), 255,160.

DONEGAL, a market tn. and seaport, Ircland, co. Donegal, pleasantly situated at the head of bay of same name, at the mouth of the Esk, 29 m . N.E. Sligo ; lat. $54^{\circ} 39^{\prime} \mathrm{N}$.; lon. $8^{\circ} 7^{\prime} \mathrm{W}$. (r.) It consists principally of thrce strects, radiating from a large triangular market-place; is well built, chiefly of stone; amply supplied with water, and has altogether a clean, orderly, and thriving appearance. It contains a handsome church, a R. Catholic chapel, and Independent, Wesleyan, and Presbyterian meeting-houses; a national, and other schools, a workhouse, fever hospital, and dispensary. The trade of the place is rapidly increasing, and considcrable improvements have been made both in the town and harbour. There are two extensive establishments for making sparles, shovels, \&c.; two tanneries, a rope walk, and steam and water power mills for grain. The female population are chicfly employed in sewed muslin-work. Market on Saturday, and fairs the second Friday of every month. In the vicinity are the remains of a fine old castle belonging to the O'Donnels, Earls of Tyrconnel; the ruins of a monastery, founded by the same chieftains in the 15 th century; and a well frequented sulphurous spring. Donegal gives the title of Marquis, in the peerage of Ireland, to the noble family of Chichester. Mop. (1841), 1366 ; present pop., about 2000.-(Local Correspondent.)

DONEGAL BAY, an extensive indentation formed by the Atlantic on the W. coast of Ireland, cos. Donegal, Leitrim, and Sligo. It is 20 m . wide at its entrance between Tillen or Teelen Heal on the N., and Gesigo Point on the S. ; while inland, it extends about 26 m . It receives several rivers, and contains numerons inlets, cretks, and harbours.

DONEGORE, parl. Irel. Antrim ; 6b̄̄0 ac. Pop. 2280.
DONERAILE, a market tn. and par. Ircland, co. Cork. The rown, $23 \mathrm{~m} . \mathrm{N}$. by W. Cork, lies on the Aubey, here crossed by a handsome stone bridge of three arches. It has a neat and commodious parish chureh, with a tower; a handsome R. Catholic chapel, a numery, two public schools, and a disperisary; but no manufactures, and very little trade. In the neighbourhood are several corn-mills. Market on Saturday; annual fair, August 12. In the vieinity are several interesting monuments of antiquity, including Kilcoleman castle, for a considerable period the residence of Edmund Spenser the poet. Area of par. 20,442 ac. Pop. 8350 ; of tn. 2722. -(Local Corrcspondent.)

DONE'TZ, or Severnoi-Donetz, a river, Russia, which rises in gov. Koursk, about 15 m. N.N.W. Karotcha; flows first almost due S., passing the towns of Belgorod and Tmiev, at the latter of which it becomes navigable; then E.S.E., separating gov. Kharkov from Ekaterinoslav, and Ekaterinoslav from Woronetz and Don Cossacks; traverses latter gov., and finally, about 40 m . N.E. Novo-Tcherkask, after a course of nearly 400 m. , joins r. bank, Don, whose volume it doubles. Its prineipal affluent is the Oskol, on the left. It flows generally through a fertile country, in a deep and majestie stream, and is of great navigable importance.

DONG-Nai.-1, A prov. Anam, cap. Saigon; bounded, N. by Camboja, E. by Champa, S. by China Sca, and W. by the Gulf of Siam ; length, N. to S., about 300 m. ; greatest breadth, N.W. to S.E., 180 m . It is watered by the Mekon and its numerous branches, by the Dong-Nai, and by other streams of less importance. It is generally mountainous and wooded, and abounds in game. The inhabitants, mong whom it is reckoned that there are $16,000 \mathrm{R}$. Catholies, are cliiefly ocenpied in hunting. $-2, \Lambda \mathrm{tn}$. above prov., 18 m . N.E. Saigon.

DONGEN, a vil. IIolland, prov. N. Brabant, 8 m . N.E. Breda, r. bank, stream of same name. It consists chicfly of one long street, and has a Reformed and a R. Catholic church, and a school. Pop. 560.-The mver rises near the frontiers of the Belgian prov. of Antwerp, flows N., in a crooked course, is navigable for sinall vessels, and falls into Hollands Diep at Geertruidenberg.

DONGES, a tı, and com. France, dep. Loire-Inférieure, 8 m . S.W. Savenay, at the elge of some extensive marshes which bear its name, r. bank, and near the mouth of the Loire. It has some trade in corn, wine, and eattle, and particularly in leeches, which, to the value of about $£ 4000$, are said to be sent every year to England. Pop. 2700.

DONGO [anc. Aduncumi], a vil. and com. Austrian Italy, gov. Milan, prov. of, and 20 m . N.N.E. Como, at the foot of a mountain which rises above the H . shore of lake Como. It contains a parish church, situated almost close upon the lake; and has manufactures of ealico, and of mathematical instruments; and extensive iron and copper foundries, which derive their supplies of materials from copper and iron mines worked in the vicinity. Pop. 1299.

DONGOLA, a prov. Upper Nubia, cap. New Dongola. ill-defined, but generally represented as lying between lat. $17^{\circ} 50^{\prime}$ and $19^{\circ} 30^{\prime} \mathrm{N}$. It eonsists of an extensive plain, of about 180 m . long, but of quite a limited breadth, embracing both banks of the Nile, by which it is traversed throushout its entire length, encircling in its course the island of Argo (which sce). Nearly all the fertility of the province, however, is to be found on the 1 . bank. the $r$. being alnost entirely eovered with drifted sands. Irrigated and enriched by the inmmations of the Nile, which covers the whole plain, presenting a watery surface of from 12 to 15 m . in breadth, the W. side of the river is extremely productive, yiehling two erops in the year-the one in Jamuary, the other in May. The priucipal products are corn and dates, but cotton, saffron, opium, and indigo, are also grown; and attempts have been made to cultivate the sugar-eane. The climate is agreeable, and, on the whole, healthy. excepting during the rains, which fall in September and November, when fevers are prevalent, though not of a dangerons character. On the rising of the

Nile, a refreshing coolness is diffused through the atmosphere, and the general salubrity of the climate restored. The greatest heat is from March to July, both inelusive. The chief domestic animals are horscs and sheep. The former, an Arab breed, highly esteemed all over the E., were nearly all destroyed in the recent wars. In the uncultivated portions there are hyenas, lions, and gazelles; and in the river, sturgeon, crocodiles, and hippopotami. The Dongolahs are a purely Ethiopic race, and distinguished from other Nubian tribes by their lighter colour and hair; they are represented as going nearly naked, and as being indolent, immoral, frivolous, greedy, and selfish; they are Mahometans, speak a language of their own, mixed with a considerable number of Arabic words, and employ themselves in agriculture, and cattle-rearing, and in trading, especially in Egyptian and European goods, and in slaves. Notwithstanding the fertility of the soil, they live in the most abject poverty, being ground down and enslaved both by the Egyptian Government and by their native Meliks. Pop. about 60,000.-(Jour. Roy. Geo. Soc.; Russeger's Reisen; Conversations Lexikon.)

D()NGOLA (New), or Marakail [Native, El Urdy-the barracks], a tıl., cap. above prov., about 600 ft . from 1. bank, Nile, and sufficiently elevated to clear the inundation of the river ; lat. $18^{\circ} 52^{\prime} 12^{\prime \prime} \mathrm{N}$. ; lon. $30^{\circ} 47^{\prime} 23^{\prime \prime} \mathrm{E}$. (I.) It owes its orngin to barracks built after plans by the naturalist Ehrenberg, in lieu of those destroyed at Old Dongola by the Mamelukes. It is the seat of a pasha, has Govermment offices, a well-supplied lazaar, a coffee-house, indigo factory, and baths. It is the resting-place for the caravans from Kordofan and Senaar. Pop. 5000 or 6000 .

DUNGOLA (OLD), a th., formerly cap. above prov., r. bank, Nile, 75 m. S.S.E. New Dungola. It was formerly an important commercial town, but is now a miserable village. The ruins of the old town lie on a rock about 500 ft . high, surrounded by fortifications built with a strength rarely met with in such countries. The palace of the ruler of Nubia may still be distinguished by its size and form. Pop. 300 .

DONHEAD, two pars. Eng. Wilts:-1, (St. Andrew); 5600 ac. Pop. $900 .-2$, (St. Nary) ; 2680 ac. Pop. 1596.

DONINGTON, two pars. Eng.:-1, Salop; 2000 ac . Pop. (1851), 382.-2, (-upon-Bain), Lineoln; 1890 ac. P. 344.

DONINGTON, a tn. and par. England, co. Lincoln; the former, on a plain, $9 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Buston, has tolerably well kept streets; houses, prineipally of brick, well built; supply of water abundant. It has a chureh, an ancient strueture, with a spire and fine bells; and three chapels, belonging to Particular Baptists, Wesleyans, and Primitive Methodists; three free schools, an almshonse, and other charities, founded by bequest of Thomas Cowley, the early part of last century. The people are chiefly employed in agriculture, and in the trades common to a country town. Area of jar., 6180 ac. Pop. 1864.-(Local Correspondent.)

DONINGTON CAS'TLE, a vil. and par. England, co. and $17 \frac{1}{2} \mathrm{~m}$. N.N.W. Leicester. There are some remains of an aneient castle on an eminence near the village; three amnual fairs are held. Area of par., 4250 ac. Pop. 3508.

DONKERBROEK, a vil. llolland, prov. Fricsland, 22 m. S.E. Lecuwarden, with a Reformed church and school, and 700 inhabitants, engaged in agriculture and cattlerearing.

DONKOW, a tn. Russia, gov. of, and 87 m . S. by W. Riazan, cap. circle of same name, r. bank, Don, at the confluence of the Vesovaïa. It contains six churches and a monastery; and has some general trade, and an annual fair. Pop. 2500 - The circles, which is watered by the Don, consists generally of a rich soil, which yields heavy crops and rears many cattle, but is poorly wooded. Pop. $75,000$.

DONNA, an isl. Norway, coast of Nordland; lat. $66^{\circ} 15^{\prime}$ N. ; lon. $12^{\circ} 40^{\prime}$ E.; greatest length, N.N.E. to S.S.W., 18 m . average breadth, about 6 m . It is only inhabited by fishermen.

DONNAI, Dong-nai, or Saung, a large river, Anam, which flows past Saigon, to which place it is navigable, and falls into the China Sea at Cape St. James; lat. $10^{\circ} 16^{\prime} \mathrm{N}$. ; lon. $107^{\circ} 7^{\prime} \mathrm{E}$.

DONNAÖE, an isl. Norway, coast of Nordland, at the mouth of the Ranen Fjord; lat. (centre) $66^{\circ} 7^{\prime} \mathrm{N}$. ; lon. $12^{\circ} 45^{\prime} \mathrm{E}$. ; about 18 m . long by 6 broad. There is a village of same name on its E. coast, and one named Domnacs near its N.E. point. Inhabitants fishermen.

DONNAS, or Donas, a vil. Sardinian States, Piedmont, on the Dora-baltea, here crossed by a wooden bridge. The inhabitants are chiefly engaged in agriculture. Pop. 1530.

DONNINGTON, two pars. Eng.:-1, Hereford; 740 ac. Pop. 100.-2, Sussex; 1090 ac. Pop. 206.

DONNYBROOK, a par. and vil. Ireland, co. Dublin. The parish contains a number of small towns or villages, including Irishtown, Merrion, Ringsend, and Sandymount; area, 1689 ac. Pop. 9825 . -The village, 2 m. S. by E. Dublin, on the Dodder, here crossed by a handsome bridge, contains an elegaut parish church, a spacious R. Catholic chapel, a classical and other schools, a hat manufactory, and several mills; but is chiefly remarkable for the famous fair held annually during the week commencing August 26, and which was formerly the scene of riotous frolic, and frequently of bluodshed. Pop. 1610.

DONOHILL, par. Irel. Tipperary; 13,914 ac. P. 3834.
DONORE, par. Irel. Meath; 3662 ac. Pop. 1489.
DONOBEW, a tn. Burmah, prov. Pegu, 60 m . N.W. Rangoon; lat. $17^{\circ} 8^{\prime} \mathrm{N}$. ; lon. $95^{\circ} 55^{\prime} \mathrm{E}$. Its formidable defences in 1825, when it was attacked by the British, presented a remarkable specimen of the skill of the Burmese in crecting temporary defensive fortifications.

DONYATT, par. Eng. Somerset; 1220 ac. Pop. 525.
DONYLAND (EAst), par. Eng. Essex; 1430 ac. P. 793.
DONZDORF, a vil. W ürtemberg, circle Danube, bail. Geisslingen, on the Lauter, 30 m . E.S.E. Stuttgart. It contains a handsome parish church, and a castle belonging to the Counts of Rechberg, with fine gardens and waterworks. Pop. 1659.

DONZENAC, a tn. France, dep. Corrèze, 13 m . W.S.W. Tulle. It occupies a fine site, on a slope partly laid out in vineyards, and partly planted with poplars, waluuts, and chestnuts; but its interior is by no means prepossessing, the streets being steep, narrow, crooked, ill paved, and dirty. It has some trade in wine, and fine slates are quarried in the vicinity. Pop. 1800.

DONZY, a tn. France, dep. Nièvre, on the Nonain, 26 m . $N$. Nevers. It has a remarkable church, some blast-furnaces, and other ironworks; and a trade in wood, iron, cider, and honey. Donzy was formerly the capital of an independent barony, and made some figure in the Middle Ages. Pop. 2196.

DOOBAH, a small river, Scinde. It rises in the S. part of the Keertar Mountains, about lat. $25^{\circ} 54^{\prime} \mathrm{N}$. ; lon. $67^{\circ} 45^{\prime}$ E. After a course of about 45 m ., generally S.E., it forms a junction with the Damajee.

DOOBELLOO. See Dhalac Island.
DOOLEA, a to. Hindoostan, prov. Candeish; lat. $21^{\circ} 1^{\prime}$ N. ; lon. $74^{\circ} 47^{\prime}$ E.; 35 m . W. Arundool.

DOOMAIRAH, an isl. Red Sea, Abyssinian coast ; lat. $14^{\circ} \mathrm{N}$. ; lon. $43^{\circ} 30^{\prime}$ E.; separated from the mainland by a narrow channel, with 5 fathoms water. It is about half a mile square, and of great height, ruming up to a remarkable sharp peak in the centre.

DOON, a lake and river, Scotland, co. Ayr. The lake, situated on the borders of Kirkcudbrightshire, a little S.E. Dalmellington, is about 6 m . long and 1 m . broad; and is surrounded by mountains, contains an islet, on which are the ruins of an old castle, and is famous for its trout.-The MIVER, whose 'bonny banks and braes' have been cclebrated by Burns, issues from the former, and, after a N.W. course of about 16 m ., falls into the Firth of Clyde, 2 m . S. Ayr. The scenery, on the lower part of the stream, is rich and sylvan; on the upper part, rugged and wild.

DOON, par. and tn., Irel. Limerick and Tipperary; 27,630 9. Pop. 7895.

DOONDONNELL, par. Irel. Limerick; 1394 ac. P. 452.
DOONFEENY, par. Irel. Mayo; 31,251 ac. Pop. 4819.
DOONGURPOOR, a tn. Hindoostan, cap. of a small principality, prov. Goojerat, 95 m . N.E. Ahmedabad; lat. $23^{\circ} 47^{\prime} \mathrm{N} . ;$ lon. $73^{\circ} 52^{\prime} \mathrm{E}$. The princes of this territory claim the highest consideration on the ground of rank, and are exceedingly punctilious in exacting the deference due to their high birth. The country was at one time overrun and impoverished, by bands of Arabs and Scindies in the pay of the Doongurpoor chief, but was rescued from this oppression by the British Government.

DOONOONEY, par. Irel. Wexford; 1081 ac. Pop. 236.
DOORA, par. Irel. Clare; 5928 ac. Pop. 2365.

DOORN, three rivers, Cape Colony, S. Africa:-1, (Areat), Clanwilliam and Worcester districts, having its source in the latter; lat. $33^{\circ} 15^{\prime} \mathrm{S}$. ; lon. $20^{\circ} 30^{\circ} \mathrm{E}$. ; whence it flows N.W. to lat. $31^{\circ} 35^{\prime}$ S., when it bends suddenly round to the S.W., and, after a course of about 12 to 15 m . in this direction, falls into the Elephant or Olifant river at Melkboom; lat. $31^{\circ} 37^{\prime}$ S.; lon. $18^{\circ} 35^{\prime}$ E.; its entire course to this point being about 170 m . In its progress it is joined by several large tributaries, the principal of which are the Yuk or Ongeluks, Tanqua, Zwartklip or Oorlogs Kloof river, and the Kloof Doorn river.- 2 , (Karroo), a river formed by the junction of two principal head streams; one of which has its rise in the Karroo or desert plains N. from Clanwilliam district, the other in the latter territory. The junction occurs at lat. $30^{\circ} 54^{\prime}$ S.; lon. $18^{\circ} 45^{\prime}$ E.; from which point the stream flows S.S.W., and falls into the Eleplant river at lat. $31^{\circ} 27^{\prime}$ S. Its entire length from the point of union is about $45 \mathrm{~m} .-3$, (Kloof), a river, has its sources in nearly the same latitude with those of the Great Doorn, and about 20 m . apart. They also run nearly parallel courses till they unite at lat. $31^{\circ} 50^{\prime}$ S. ; lon. $19^{\circ} 5^{\prime} \mathrm{E}$. Length of course about 120 m .

DOORN, a vil. Holland, prov. of, and 11 m . E.S E. Utrecht, with a Reformed chureh, a school, and an annual fair; inhabitants agricultural. Pop. 1002.
doornebu irg, or Doornenburg, a vil. Holland, prof. Gelderland, 8 m. E.N.E. Nijmegen, near r. bank, Rhine, with a R. Catholic church and a fine castle. Pop. 600.

DOORNIK, atn. Belgium. See Tournal.
DOORNSPIJK, a vil. Holland, prov. Gelderland, 26 m . N.W. Zutphen, on the shore of the Zuider Zee, from the irruptions of which it is defended by a dike; which, however, in 1825 , was partially destroyed in a storm, and much damage done to the village aud surrounding country. There are here a Reformed church and school; and, with the attached hamlets, 1700 inhabitants.

DOOSHAUK, or Jullalabad, a tn., W. Afghanistan, 4 or 5 m . E. the Helmund river, 260 m . W. Kandahar; lat. $31^{\circ} 58^{\prime} \mathrm{N}$. ; lon. $61^{\circ} 45^{\prime} \mathrm{E}$.; situated at the base of some hills, over which the road from Herat to Beloochistan passes, at the height of about 900 ft . It is surrounded by a mud wall, surmounted by towers. Like many other Eastern cities, it was of much greater extent formerly than now, as appears from its extensive ruins. It contains 2000 inhabited houses.

DORA, or Doire, two rivers, Sardinian States:-1, (-Baltea), [anc. Duria Major], rises at the foot of little St. Bernard, on the E. slope of the Grecian Alps, flows E., past the town and through the Val d'Aosta, till about 2 m . S.E. Chatillon, when it changes its course to S.S.E., and continuing it through Piedmont, past Fort Bard and Ivrea, joins l. bank, I'o, about $4 \mathrm{~m} . \mathrm{W}$. Crescentino, after a course of $100 \mathrm{~m} .-2$, (-Ripaira), [anc. Duria Minor], rises in the E. slope of the Cottian Alps, near the French frontier, on the W. of prov. Susa, flows first E.N.E. till it reaches the town of Susa, and then almost due E., across Piedmont, to its junction with 1. bank, Po, 2 m . E. Turin, after a course of about 70 m .

DOKAK, a tn. Persia, prov. Khuzistan, at the junction of a small river of the same name with the Jerahi, 300 m . S.E. Bagdad ; lat. $30^{\circ} 45^{\prime}$ N.; lon. $49^{\circ} \mathrm{E}$. It stands upon a marshy plain, is composed of houses built with sun-dried bricks, and having sloping roofs; is defended by a fort and mud wall, and is surrounded by date plantations; and has a considerable commerce by a canal which connects the Dorak with the Karun. Pop. 6000.

DORAMA, a tn. Arabia, prov. Nejd, 32 m. W. Derreyeh. The inhabitants live by agriculture and raising fruit, and by supplying the caravans which halt here on the way from Mecca to Persia. In 1818 it was taken and sacked by Ibrahim Pacha, when nearly every individual was slaughtered, excepting about 200 females, reserved for the lusts of a brutal soldiery. Pop. 7700.

DORAT [anc. Oratorium], a tn. France, dep. HauteVienne, on the Sevre, 29 m . N.N.W. Limoges. The site is fine, and the environs agreeable, but there is nothing remarkable in the place, except a large gloomy church of the 10th century, with turreted walls, in the form of a fortress. Its chief manufactures are weights and measures, barometers, \&c. Pop. 1852.

DORCHESTER, a parl. bor. and tn. England, cap. co. Dorset, and a station on the Dorchester branch of the London
and South-western Railway, 118 m. S.W. London, abont 6 m . from the coast of the English Channel. It is agreeably situate on a gentle acclivity, r. bank, Frome, with open downs, generally covered with sheep, on the $S$. and $W$. diversified by corn fields. The town, which is of an irregular quadrangular form, occupies the site of a Roman station, and consists of three principal spacious streets, crossing at right angles, and several smaller ones parallel to them; all clean, well paved, and well lighted with gas. The houses are in general handsome, tbere being a much smaller proportion of the humbler class of dwellings here than in most other places. A beautiful avenue or promenade, shaded by rows of lime and sycamore trees, nearly encircles the town. There are three churches, All Saints, Holy Trinity, and St. Peter's; the first an ancient, and the latter two handsome modern structures. There are also several dissenting chapels. The other public buildings are the townhall, a handsome edifice; the shire-hall, a neat plain structure, with a Portland stone front, surmounted by a pediment; a county jail and house of correction, built on Howard's plan; a small theatre, and a cavalry barrack. Amongst the educational institutions of Dorchester are a free grammar-school, founded in 1579, having two exhibitions to St. John's College, Cambridge ; a corporation school, and national, British, and private schools. The charitable institu tions comprise several almshouses, the Dorchester workhouse or hospital, erected in 1618, one of the first established in the kingdom; the workhouse for the union, and several minor charities. Dorchester has no manufactures of importance, except ale, which has long been famous, and still maintains its character. The municipal government of the town is vested in a mayor, four aldermen, and 12 councillors. The assizes and quarter sessions for the county are held here, and quarter sessions for the borough. The town has returned two members to the House of Commons since the time of Edward I. Registered electors (1850), 427.

Dorchester was an important Roman station, and was then strongly fortified, and entirely surrounded by a wall and fosse. Many interesting Roman remains still exist in the vicinity; the most remarkable of which is an amphitheatre about $\frac{1}{2} \mathrm{~m}$. S.W. from the town, the most entire structure of the kind in the kingdom. Poundbury and Maiden Castles, both within short distances of the town, are also interesting remains. Tesselated pavements, urns, and coins have been dug up in the vicinity. On the occasion of the Duke of Monmouth's rebellion, in 1685, the assizes were held here by the infamous Judge Jefferies, who sentenced 80 of the insurgents to death, 13 of whom were executed. Markets, Saturday and Wednesday; four fairs in the year, chiefly for sheep and lambs, of which immense numbers are sold. Pop. (1841), 5402.(Local Correspondent.)

DORCHESTER, a par. and vil. England, co. Oxford; area, 2450 ac . The village, the Dorcina of the Romans, and a place of great antiquity, is situated on the Thames, here crossed by a stone bridge. It contains an ancient cruciform church, a grammar-school, and the remains of several ecclesiastical buildings. A fair is held on Easter Tuesday. The vicinity abounds in interesting Roman remains. Pop. 1078.

DORCHESTER, a seaport tn ., U. States, Massachusetts, 4 m . S. Boston. It is a busy seat of manufacture and trade, on a small scale. Founded in 1630. Pop. about 5000 .

DORDOGNE (LA), [anc. Dordonia], a river, France, which is formed at the foot of Mount Dor, dep. Puy-de-Dôme, by the union of the Dor and the Dogne, flows W., though a small portion of that department, then circuitously S ., forming part of the boundary between dcp. Corrèze and dep. Puy-deDôme and Cantal. On reaching the N. fronticrs of dep. Lot, its course, though still very circuitous, becomes almost directly due W. till it reaches dep. Gironde, after having traversed dep. Lot and dep. Dordogne, to which it gives its name. It now proceeds N.W. to Bourg, a little below which it unites with the Garonne, forming the Gironde. Its whole course is about 290 m .; of which 170 m ., beginning at Mayronnes, are navigable. Its principal affluents, on the 1 . bank, are the Rue and Cere; and, on the r. bank, the Diege, Luzege, Donstre, Vezere, and L'Isle. The navigation of this river has been improved, in recent years, by the removal of rocks which obstructed its channcl.

DORDOGNE, a dep. France, formed of the ancient prov. Perigord, with small portions of Limousin, Angoumois, and Périgord,
Vol.
.

Saintonge; bounded, N. by Hante Vienne, E. Corrèze and Lot, S. Lot-et-Garonne, W. Gironde and Charente; greatest length and breadth, abont 70 m ; ; between lat. $44^{\circ} 35^{\prime}$ and $45^{\circ} 42^{\prime}$ N., and lon. $0^{\circ}$ and $1^{\circ} 25^{\prime}$ E.; area, 3492 sq. m., or $2,234,880$ ac. The surface is generally rugged and hilly, being much broken by low ridges and steep precipices, none of which exceed 800 ft . A few of the heights are covered with vines, but the greater part of them are bare and arid, and not unfrequently form the abutments of plateaux, covered only with timber of stunted growth, or barren heath. The best land is along the banks of the Dordogne, to which the department owes its name, and to the basin of which, with two very limited exceptions, it wholly belongs. That river traverses the S. part of the department from E. to W., and receives the rest of its drainage by the L'Isle and its affuents, especially the Dronne. The exceptions refcrred to are two very small portions of the department in the N. and S. extremitics, which belong respectively to the basins of the Charente and Gironde. The climate, considerably varied by the nature of the surface, is on the whole mild and agreeable. One remarkable fact connected with it is, that during the last 30 years a considerable change has taken place; the maximum heat, which previously seldom exceeded $79^{\circ}$, now varying from $81^{\circ}$ to $90^{\circ}$; and the maximum cold, which used never to descend below $24^{\circ}$, now frequently descending to $14^{\circ}$, and occasionally even as low as $6^{\circ}$. Snow seldom falls, but both winter and spring are rainy; summer is very dry ; autumn is generally beantiful. Little more than one-third of the whole surface is fit for the plough, and the corn raised barely suffices for the home consumption. The principal crops are rye, buckwheat, and maize. Nearly one-tenth of the surface is occupied by vineyards. Several of the red wines produced on the right, and white wines produced on the left of the Dordogne, bear a high name, but nearly one-half of the whole produce is consumed on the spot, and a proportion of the remainder is converted into brandy. More than one-sixth of the surface is covered with wood, of which there are several extensive forests. Among the trees, an important place is occapied by the chestnut and the walnut, the produce of the former furnishing an important article of food to the lower classes, and that of the latter being extensively pressed for oil. The domestic animals, especially horses, cattle, and shcep, are usually of inferior breeds; but considerable attention is paid to the rearing of asses and mules, which form the principal beasts both of burden and draught. Goats and swine are numerous; and the rivers and lakes abound with fish. The principal mineral is iron, which is worked to a large extent, and, besides maintaining several blast furnaces on the spot, is exported to the departments. Some coal and lignite also are worked, and there are good quarries of marble, alabaster, lithographic stone, and millstones. The manofactures, not of very much consequence, include coarse woollens, serge, bombazine, hosiery, leather, paper, cutlery, and iron; the trade is chiefly in these articles, and in winc, brandy, nut oil, hams, truffled patés, and poultry. For administrative purposes, Dordogne is divided into five arrondissements-Perigueux (the capital), Bergerac, Nontron, Riberac, Sarlat-subdivided into 47 cantons, and 584 communes. Pop. 503,557.

DORDRECHT [by contraction, Dort], a tn. Holland, prov. S. Holland, 14 m. S.W. Rotterdam; bounded, N.W., N., N.E., and E. by the Merwede, and partly fortified on the S. or land side. It has 12 gates, and five havens. The townhouse is an old, but carefully preserved building; besides which, it has a corn exchange, placed conveniently near the wharfs; a weighhouse, a bank, and a national artillery arsenal. It had once three doelens, or houses of rendezvous for armed burghers. In front of one, beneath a large linden tree, the Reformed ministers first preached and baptized in 1572; and in its large hall the famous Synod of Dort met in 1618-19, to oppose the doctrines of Arminius. There, too, the provincial Synods of S. Holland met regularly, until its meetings were transferred, in 1731, to the choir of the great church. The place is now desecrated as a playhouse, for entertainments given during the fairs. Another of the doelens has been made the arrondissement courthouse, and the third has its lower apartments occupied as a public school, and its upper by the working members of the pictura society. The Reformed have three churches, among which the Great or St. Mary's, is a fabric of large size, and great antiquity. Its vaulted
stone roof covered, in Papal times, 20 chapels and 40 altars. Its baptismal and communion vessels are of solid gold, and its pulpit is of white marble, and adorned with beautiful sculpture. There are also a Belgian Reformed, a Lutheran, and an elegant new R. Catholic church. The Jansenists, though reduced to 100 in number, have still a church and pastor, and the Jews have a synagogue.
The institutions of science and art in Dort are the literary society, diversa sed una; the art association, pictura, which has a yearly exhibition; a branch of the public utility society, a seaman's college for the promotion of trade and navigation, a branch of the music society, and of the Netherlands economical society. It has a classical, an architectural, and six other schools. Among its charities are an orphan-house, an infirmary, a lunatic asylum, and a sewing and knitting school; several small almshouses, supported by private endowments, and branch associations of almost all the religious and benevolent societies in Holland. Dort is admirably situate for trade, being not only near the sea, but by the Rhine, the Maas, the Dort-sche-kil, and other water communications, connected with an immense extent of inland territory. The number of vessels that arrived in its harbonr, in 1848, was 237; and
here. Pop. 680.-2, A vil. circle Dresden, dist. of, and about $9 \mathrm{~m} . \mathrm{S}$. Freiberg, in the beantiful valley of the Chemnitz. It contains a handsome church, and has some manufactures of linen, a considerable trade in butter and iron, two saw, two oil, and two flour mills. Interesting fossils are found in the neighbourhond. Pop. 1280.

DORGALI, a vil., isl. Sardinia, prov. of, and 14 m . E.S.E. Nuoro. It stands on an elevated plain, in a rugged and mountainous district, consists of houses built partly of stone and partly of mud, and whitewashed, so as to present at a distance a very cheerful appearance ; contains a parish, and several other churches, has some manufactures of woollen cloth, silk, and ironware; and a trade in cheese, cattle, goats, and swine. Pop. 3612.

DÖRHEIM, a tn. Hesse-Cassel, prov. IIanau, cap. bail. of same name, on the Use, 16 m. N.N.E. Frankfort-on-theMain. It contains a small castle and two churches, and has numerous distilleries. Coal is worked in the neighbourhood. Pop. 688.

DORJELLA, a vil. Indian Archipelago, cap. Wammer, one of the Arru Islands. It is well built, in a square form, has a battery, and a small, but neat Christian church, in which worship is conducted on Sunday by a schoolmaster from Amboina. The most of the inhabitants are Christians.

DORKING, a market tn. and par. England, co. Surrey. The town, 22 m . S.W. London, pleasantly situated in a valley, l. bank, Mole, consists of three principal streets, clean, spacious, well paved, and well lighted with gas. The houses are neat and well built, and the whole appearance of the town is extremely pleasing. The church, which stands in the centre, is a commodious, cruciform structure, and contains some handsome mouuments. There are, also, several Dissenting places of worship. The charities comprise two national schools, infant schools, some alms-houses, and funds for apprenticeship fees and marriage portions. In the High Street is the townhall, a good substantial building. The chicf trade of the town is in flour, lime, and poultry; the latter of a peculiar breed, having five claws. The Dorking fowls are celebrated for their excellence, and
in 1849,253 . It receives many of those floating islands of timber which descend the Rhine from Switzerland and Upper Germany. Hence an extensive trade in wood, employment given to 23 saw-mills, and a large amount of shipbuilding. By the Rhine it receives large supplies, also, of Rhenish and Moselle wine. By the Maas, Licge and its neighbourhood transports to its wharfs coal, lime, and millstones. Dort has large dealings also in seeds, grain, oils, stock fish, and flax. It has 21 oil-mills, and among many manufactures common to it with other Dutch towns, it alone has a stecl-pen and a window-glass manufactory. Its markets are well supplied with provisions. The neighbouring decoys furnish plenty of wild-fowl; salmon, sturgeon, and other river fish, as well as a variety of sea-fish, are generally abundant.

The Reformation at first encountered great opposition in Dort. In 1566, when Reformed preachers generally commanded large audiences outside the gates of Dutch towns, they met here with no success. This tardy reception of evangelical doctrines was redeemed by subsequent zeal. During the disputes about the stadtholdership, in 1672, the common people of Dort were violently attached to the house of Orange; but when those disputes revived, in 1786, and the court of Prussia intervened, Dort assumed an attitude of defence, and obtained advantageous terms from the advancing Prussians. On the flight of the French public functionaries in 1813, its burghers showed great zeal in raising anew the national flag of Holland; and during a protracted interval, in which the French and Dutch asceudency alternated, courageously supported the cause of national independence. $P .(1850), 20,878$.

DORE ABBEY, par. Eng. Hereford; 5790 ac. P. 542.
DORES, par. Scot. Inverness, 20 m . by 4 m . Pop. 174 J. .
DORFCHEMNITZ, two places, Saxony:-1, A vil. circle Zwickau, pleasantly situated in the deep valley of the Zwönitz, 4 m . S.S.E. Stolberg. It has a saw and four other mills. The celebrated jurist, Samuel Puffendorf, was born
are in great demand for the London market. They are generally white, or of a partridge colour, and are supposed to have been brought over by the Romans. It is a favourite resort of invalids from the metropolis, during the summer months. The custom of Borough English, by which the youngest son is heir to the copyhold estate, prevails in this manor. Pop. of tn., 3000 ; of par. (area, 10,150 ac.), 5638 .

DORMAGEN [anc. Durnomagus], a tn. Prussia, gov. of, and 10 m. S.S.E. Düsseldorf, near 1. bank, Rhine. It contains a R. Catholic parish church, and has manufactures of linen, and several breweries and distilleries. Pop. 1233.

DORMANS, a tn. France, dep. Marne, 34 m. W. by N. Chalons, l. bank, Marne. It is a seat of active industry; has potteries, brick, and tile fields, iron-tool factories, linen weaving, tanneries, and skinneries, lime and plaster kilns, \&c. There is an inland trade, on the river, in grain, wine, wood, and charcoal. Pop. 1529.

DORMINGTON, par. Eng. Hereford; 1150 ac. P. 164.
DORMSTON, par. Eng. Worcester; 830 ac. Pop. 115.
DORNACH, or Dorneck, a vil. and par. Switzerland, can. Soleure, at the W. foot of the Schartenfluh, in a beautiful district, near r. bank, Birs, here crossed by a handsome stone bridge, 5 m . S.S.E. Basel. It is well built, and contains an elegant church, in the cemetery of which a monument has been erected to the celebrated mathematician, Maupertuis, who was buried in it. In the neighbourhood are an old Capuchin monastery, and the ruins of a strong castle, which, after a valiant defence, was taken by the French, in 1798, and demolished. Dornach is celebrated as the scene of a victory gained by the Swiss over the Austrians in 1499. Pop. 703.

D()RNACH, or Dorny, a vil. France, dep. Haut-Rhin, 9 m. N. Altkirch, on an affluent of the Ill. Pop. 3055.

DORNBIRN, Dornbürn, or Dombirn, a market tn. Austria, Tyrol, Vorarlberg, cap. dist. of same name. on the

Losen, at the foot of a mountain range, 6 m . S. Bregenz. It is the seat of a law court and several public offices, contains a parish chureh, and has manufaetures of muslin and ealico, a considerable general trade, and the most inportant cattle market of the country. Pop. of tn., 6000; of dist. (area, 44 geo. sq. m.), 11,000.

DORNBURG, a tn. Saxe-Weimar, on a steep hill, above 1. bank, Saale, here crossed by a bridge, 15 m . E.N.E. Weimar. It is the seat of a court of law and several public offies, contains three castles, one of which was often the residence of Goethe; and has manufactures of linen and hosiery, two tile-works, and two annual eattle fairs. Pop. 600.

DORNDORF, a tn . Prussia, prov. Westphalia, gov. of, and about 20 m . S.W. Münster, on the Lippe. It is the seat of a law court, contains two R. Catholic churches, a synagogue, progymnasium, Franciscan monastery and hospital, and has manufactures of woollen and linen cloth, a building dock, several dye-works and mills, a trade in linen and cattle, and seven annual fairs. Pop. 2824.

DORNEY, par. Eng. Bucks; 1190 ac. Pop. 324.
DORNHAN, a tn. Würtemberg, eircle Schwarzwald, 6 m . W. Sulz. It is situated in the Black Forest, and has manufactures of hydraulic machinery. It was almost burned down by lightning in 1718. Pop. 1550.

DORNO [Latin, Durnus], a vil. and com. Sardinian States, Piedmont, div. of, and 27 m . S.S.E. Novara, on the Terdoppio. It contains a Gothie parish church, and three other churches, and has a trade in wine, butter, cheese, corn, and cattle, and a much-frequented annual fair. Pop. 3450.

DORNOCH, a small market tn. and royal burgh, Scotland, co. Sutherland, N.W. coast of the Dornoeh Firth, 29 m. N.E. Inverness, on a low sandy beach, or downs, within 200 yards of the sea. Many of its houses are mean looking; but some are well built, and the town is improving, and is supplied both with water and gas. It has a jail, the only one in the county; a parish chureh, in a restored portion of the old cathedral; a handsome gothie Free ehurch, and two schools. In the cathedral is the burying place of the Sutherland family, containing a beautiful marble statue of the late Duke. Dornoch was the seat of the extinct bishopric of Caithness; and Gilbert Murray, who was consecrated bishop in 1222, and is supposed to have built the cathedral, was canonized under the name of St. Gilbert. It was constituted a royal burgh by Charles I., in 1628, and is governed by a provost, magistrates, and eouncil. Dornoch unites with Wick, Cromarty, Dingwall, Kirkwall, and Tain, in returning a member to the Ifouse of Commons; constituency, 38. Pop. 451.-(Local Correspondent.)

DORNOCII, par. Scot. Sutherland, 15 m. by 9 m . P. 2714.
DORNOCII FIRTH, an inlet of the N. Sea, N.E. coast of Scotland, between the counties of Sutherland and Ross. At its entrance it is about 10 m . wide, and it stretches inland also 10 m . The navigation is much obstrueted by sandbanks; but at high water, in spring tides, vessels of 500 tons can cross the bar. The towns Dornoch and Tain are on its shores.

DORNOCK, par. Scot. Dumfries, $2 \frac{1}{2}$ m. by 5 m. P. 847.
DORNSTETTEN, a tn. Würtemberg, circle Schwarzwald, bail. of, and 6 m . E.N.E. Freudenstadt. It stands at the foot of a lofty hill, and has manufactures of articles in straw, and a trade in wood. Pop. 1200.

DORNUM, a vil. Hanover, gov. Aurich, 22 m. N.N.E. Enden. It contains a parish church, and a castle of ancient date, which has been reeently rebuilt, and has extensive gardens. Much fruit is grown in the neighbourhood. Pop. 1580.

DOROGH, a tn. Hungary, Thither Theiss, co. Szabolez, in a marshy district, about 20 m . N.N.W. Debreczin. It contains a Greek non-united, and a R. Catholic parish church, and stands in a district of great fertility, with rieh meadows, but a deficiency of wood. Pop. 6640.

DOROGH (Kis and Nagy), two vils. adjacent to each other, Hungary, Thither Danube, co. Tolna, on the Sarviz, which is here navigable about 62 m. S.S.W. Pesth. The former contains a R. Catholic, and the latter a Protestant church. Pop. of Kis-Dorogh, 1055 ; of Nagy-Dorogh, 2666.

DOROGOBOUJ, a tn. Russia, cap. dist. same name, gov. of, and 55 m . E.N.E. Smolensk, on the Dnieper. It was partly burned by the French, in their retreat from Moseow. 1'op. (1850), 56\%

DORON, a small river, Sardinian Statcs, Savoy, which rises in the Grecian Alps, in the S. of prov. Tarentaise, flows circuitously W.N.W., and, after a course of about 45 m ., joins 1. bank, Isére, at Moutiers.

DOROSMA, a vil. Hungary, Little Kumania, enclosed within co. Pesth, 6 m . W.N.W. Szeged. It contains a R. Catholic high school. Pop. 8030.

DOKOSZLO, a vil. Hungary, Hither Danube, eo. Bacs, on the Mostango, about 8 m . from Zombor. It contains a I. Catholic parish church, and has a mill. Pop. 2235.

DORPAT, Dorpet, Doerpt, Dorp, or Derpt [Latin, Derbatum; Lithuanian, Tehrpata], a tn. Russia, gov. Livonia, cap. circle of same name, at the foot of an eminence, on both sides of the greater Embach, here crossed by a stone bridge, 150 m . N.E. Riga ; lat. $58^{\circ} 22^{\prime}$ N.; lon. $26^{\circ} 42^{\prime}$ E. The town is ranged in a semicircle, with straight and well kept streets; the houses are generally of one story, built of brick or wood, but have neat fronts, many being gaily painted. The public edifices, including the university buildings, are of hewn stone, and built in a grand and pure style. Dorpat is chiefly remarkable for its university, which was founded, in 1632, by Gustavus Adolphus, when the Swedes were masters; it was suppressed, in 1656, by the Muscovites; and re established by the late Emperor Alexander, in 1802-3. To this institution is attaehed an observatory, which the labours of Dr. Struve have made famous. Connected also with the university is the Professoren Institut, a kind of normal academy, founded in 1828, for training superior students aspiring to professorships. The whole courses are open to pupils of all religious creeds; about 30 professors or teachers or lecturers give instructions in cthics, law, medicine, natural philosophy, and various brancles of natural history, to which great attention is here devoted. The number of students, in 1843, was about 500 ; who have aecess to a library of more than 60,000 volumes; a museum, botanieal garden, \&e. In the town are a gymnasium, or head school, with several academies for special branches of science and morals. There are here halls for district law conrts; the apartments of which are well lighted, kept remarkably clean, and, to some extent, are handsomely decorated. Dorpat is an ancient town; and, in the 13th century, was a place of so mueh trading importance as to be admitted among the Hanse towns. In 1223 it waz taken by the Germans from the Russians; the latter re-possessed themselves of it in 1558. The Poles took it from the Russians in 1582; from whom again the Swedes took it in 1625. Peter the Great ultimately took it, and it has since remained in the possession of Russia. The vernacular language is Esthonian; but that of the learned is German. Pop. (1851), 12.683.

DORRE, an isl., Australia, W. coast, forming part of the W. side of Shark's Bay; lat. (S. point), $25^{\circ} 18^{\prime} \mathrm{S}$. ; lon. $113^{\circ} 1^{\prime}$ E. (r.), about 25 m . long, and 5 m . broad.

DORRHA, a par. Ireland, co. Tipperary; 15,798 ac. Pop. 4267.

DORRINGTON, par. Eng. Lincoln; 680 ac. Pop. 379
DORSET, a maritime co. England, laving the British Channel S., Wiltshire and Somersetshire N., IIampshire E., and Devonshire W., about 48 m . long, and 30 m . broad; area, $643,840 \mathrm{ac}$., of which about 600,000 are arable, meadow, and pasture. The general surface of the county is undulating; its principal elevations being chalk downs, in some plaees wooded, chiefly with hazel, of which the farmer makes hurdles, and the cottar fire-wood. A range of chaik downs enters the county from Wiltshire, near Shaftesbury, proceeds S.W. to the valley of the Stour, from which again it extends S.W. and W. to the borders of Somersetshire, beyond CerneAbbas, forming the North Downs. From the borders of Somersetshire, near Beaminster, another range of chalk downs, departing from the range in which the former terminates, extends S. and S.E. for a considerable distance parallel with the coast, terminating near Corfe Castle, at the entrance to Poole harbour, and forms the celebrated shcep pastures, the South Downs. The highest point in the county is Pillerden Pen, 934 ft ., W. from Beaminster, and belonging to the green sand formation. The coast line is irregular, forming Poole harbour, and Weymouth, or Melcombe Regis Bay, with the two promontories, Alban's IIead, and Portland Bill, the latter on the island of same name. On the S ., on the borders of Hampshire, and along part of the sea coast, is ?
lieathy common, about 20 m . in length, and 4 or 5 m . in breadth. The greater part of the county, however, is in grass, and is devoted either to the rearing of sheep or to the dairy system. The stock of the former has been estimated at 632,000 , and the total produce of wool at about 10,000 packs. The dairies are generally large, and the butter produced of good quality; but the cheese is indifferent, being made wholly from skimmed milk. Some excellent cider is made from the produce of the orchards in the vale of Blackmoor. Wheat, barley, and potatoes are raised to a considerable extent in various parts of the county. Some flax and hemp are also cultivated on suitable soils. Agricultnre has made no great progress here, the farmers in general displaying a reluctance to abandon old practices, and adopt new. The climate is mild, dry, and salubrious, but the harvests not remarkably early, though in the more sheltered parts vegetation is sufficiently forward. The principal rivers are the Stour, the Frome, and the Piddle, which have all a course N.W. to S.E., and the latter two falling into Poole harbour. Neither coals nor ores of any kind are found in this county ; but its quarries have been long celebrated, yielding the well-known Portland stone, so named from the island where it is chiefly developed, and large quantities of which are sent to various towns in the S. of England, and to France, Ireland, \&c. Pipe clay, plastic clay, and potter's clay, also abound; of the last, a considerable quantity is annually sent to Staffordshire, for use in the finer sorts of earthenware. The principal manufactures are those of flax, canvas, ducks, \&c., carried on chiefly at Beaminster, Burton, Bradstock, Netherbury, Bridport, \&c. There are also silk manufactories at Sherborn and Gillingham, woollen mills at Fordington and Lyme Regis, and livery woollen broad cloths are made at several places by hand-looms. Shirt buttons are manufactured to a great extent at Shaftesbury and Blandford; flannel, called swanskin, at Sturminster. Gloves, parchment, cottons, and blankets, are also manufactured in the county. Both the strong beer and ale of Dorchester are celebrated. The fish frequenting the coast are of various kinds, but mackerel is the most abundant. Large quantities of these are taken near Abbotsbury, and along the shore from Portland to Bridport. Herrings and salmon are also caught. Near the mouth of Poole harbour is a prolific oyster bank, from which vast quantities are taken, and sent to various places. Dorset is divided into nine divisions-Blandford N. and S., Bridport, Cerne, Dorchester, Shaftesbury, E. and W. Sherborn, and Sturminster; and it contains 275 parishes. It returns 13 members to Parliament-three for the county, two for each of the boroughs of Bridport, Dorchester, Poole, and Weymouth, and one each for Shaftesbury and Wareham. Pop. (1841), 175,043 ; (1851), 184,207.

DORSINGTON, par. Eng. Gloucester; 910 ac. Pop. 141.
DORSTEN, a tn. Prussia, prov. Westphalia, gov. of, and $35 \mathrm{~m} . \mathrm{S}$. W. Münster, l. bank, Lippe. It is the seat of a court of justice, contains two R. Catholic churches, a synagogue, progymnasium, Franciscan monastery, and hospital; and has manufactures of woollen and linen cloth, a building-yard, several mills and dyeworks, a trade in linen and cattle, and seven annual fairs. Pop. 2824.

DORSTONE, par. Eng. Hereford; 4700 ac. Pop. 538.
DORT, a tn. Holland. See Dordrecht.
DORTMUND, a tn. Prussia, prov. Westphalia, gov. Arnsberg, cap. circle of same name, in a fertile district on the Cologne and Minden Railway, 47 m. N.N.E. Cologne. It is surrounded with walls with five gates, but is poorly built. It contains a R. Catholic, and four Protestant churches, of which the Reinoldikirche, a large edifice, and the Marienkirche, a beautiful Gothic structure of the 13 th century, are deserving of notice; a gymnasium, poorhouse, private lunatic asylum, and two hospitals ; and has manufactures of woollen, linen, and cotton cloth, nails, and tobacco; extensive breweries and vinegar works, a trade in corn and colonial produce, and four annual fairs. Dortmund is the seat of several courts and public offices. It early became a place of some importance, rose to be a free imperial town, and joined the Hanseatic League. With the dissolution of this league, its prosperity began to decline, and, during the Thirty Years' War, its trade was almost ruined. In 1802, it came into the family of Nassau Diez, and was given to Prussia in 1815, at the Congress of Vienna. Pop. 7155. - The circle, area, 139
geo. sq. m., is, for the most part, flat, though the surface is occasionally broken by low hills; is watered by the Lippe, Ruhr, Emscher, and Krene; produces all kinds of grain, rears many cattle, and has not only much wood, but several coal mines. Pop. 44,398.

DORTON, par. Eng. Bucks; 890 ac. Pop. 151.
DÖRZBACH, a vil. W ürtemberg, circle, Jaxt, dist. of, and 9 m. N. Kunzelsau. It contains a castle, parish church, and synagogue. Pop. 1480.

DOS-Barrios, a tn. Spain, New Castile, prov. Toledo, 5 m . S. Ocana, on the high road from Madrid to Granada. It is tolerably constructed, and contains a parish church, a chapel, townhouse, two schools, prison, and cemetery. The inhabitants are almost exclusively employed in husbandry. Pop. 2427.

DOS-Hermanas, a tn. Spain, Andalusia, prov. of, and 7 m. S.E. Seville, 4 m . from the Guadalquiver. It has a square, a parish church, townhouse, prison, two schools, and a cemetery, contiguous to the church. The inhabitants are occupied in tillage, cattle-rearing, and expressing wine and oil. Pop. 3498.

DOSA-JASz, a vil. Hungary, co. of, and about 36 m. E. Pesth, dist. Jazig, on the Tarna. It contains a parish church. Pop. 2504.

DOSSENHEIM, a vil Baden, circle, Lower Rhine, bail. of, and $4 \mathrm{~m} . N$. Heidelberg. It is situated between two hills, and contains a parish church. Chestnuts are very abundant in the neighbourhood. Pop. 1425.

DOSSOLO, a vil. and com. Austrian Italy, gov. Milar, prov. Mantua, dist. of, and 7 m . E. by N. Viadana, l. bank, Po, not far from the junction of the Oglio. It stands in a district which is fruitful in corn and wine, but is often inundated by the Po, and contains two parish churches. Pop. 3846.

DOTIS, a market tn . Hungary, co. Comorn, eap. dist. of same name, 37 m. W.N.W. Pestll. It consists of two parts, the one situated on a hill, and the other on a lake, and separated by the remains of a famous castle, once the residence of King Mathias Corvinus. It contains a castle, with a fire English garden ; a Piarist college, with a gymnasium; a high school, and military hospital ; and has warm baths, manufactures of woollens and stoneware, numerous mills, and an important fair. The chief curiosity of the place is its extensive cellarage, and the vast dimensions of some of the casks. There are some Roman antiquities in the neighbourhood. Pop. 4870.

DOUAI [Latin, Duagium], a tn. France, dep. du Nord, on the Scarpe, which communicates by canal with the Scheldt, 18 m . S. Lille, on the Great N. of France Railway. It is irregularly fortified, being surrounded by old walls flanked with round towers, and defended by a detached fort, and is generally well built, having well formed streets, and a large and handsome public square. The ramparts furnish a beautiful promenade. It contains a handsome parish church, a fine old Gothic townhouse, with a picturesque looking belfry; a college or seminary, at which a great number of English and Irish R. Catholics have been educated; a library of 20,000 volumes, and a number of valuable MSS. ; a museum, chiefly of objects of natural history; a picture gallery, theatre, arsenal, and Government foundry; and has manufactures of tapestry, lace, embroidery, lace and sewing thread, leather, ordinary and morocco; delft and earthenware, glass, paper, starch, refined sugar, and salt. There are also numerous cotton and other mills, linen bleachfields, breweries, distilleries, and oilworks. The trade is very extensive, and includes, in addition to the above articles, corn, oleaginous seeds, bops, wine, and particularly linen, which is sent lither from all the surrounding districts. In addition to the fairs, which are held every month, there are two, one of which lasts five, and tho other 14 days. Douai is the seat of a superior court for departments du Nord and Pas de Calais, and of a court of first resort ; and possesses an exchange, a society of agriculture, science, and art; a medical society, college, university, academy, and school of artillery. It is one of the most ancient towns in France, and existed in the time of Julius Cesar, who mentions it as a place occupied by Caluaci. It had acquired considerable importance, and was strongly fortified in the ninth century. Its possession was afterwards strongly contested by the Flemish and French, by whom it was repeatedly taken and retaken. It was finally secured to the latter by
the peace of Utrecht. At present it is not in a thriving state, and covers a much larger space than its population requires. Pop. (1846), 16,935.

DOUARNENEZ [Latin, Dorvanena], a small seaport, France, dep. Finisterre, on the S.E. shore of a bay of same name, 13 m . N.E. Quimper. It is a poor place, ill built, and ill eleaned; but has a small harbour, at which about 500 small vessels are annually fitted out for the sardine fishery. The church of Plouaré, in the vicinity, is one of the finest specimens of ogival architecture in Brittany. Pop. 3952.-The bay of Douarnencz, one of the largest and most beautiful on the W. coast of France, is about 15 m . long, and has an average breadth of about 6 m . The greatest depth is from 27 to 30 fathoms. The shores are generally steep and arid. The roadstead near the town admits of vessels of all sizes, but the shelter is imperfect, and egress is scarcely practicable except during the E. or N.E. winds.

DOUBOVKA, a tn. European Russia, gov. of, and 180 m . S.S.W. Saratov, r. bank, Volga. It is an entrepôt for all the produce of the N. of Russia, sent by land to Kalschalinsk, on the Don, for the use of the S. provinces. Here is a trade in wood, grain, oil, iron, and manufactured articles. Pop. 1300.

DOUBS [ane. Dubis], a river, France, which rises in the dep. to which it gives its name, near La Mouthe, at the foot of Mount Rixon, belonging to the chain of the Jura. It flows first N.N.E., along the E. frontiers of the department, which it separates from Switzerland, enters that country, and making a sudden turn, by which it seeme almost to retrace its steps, re-enters the department, flows circuitously N., then W.S.W., passing Baume, Besançon, and Dole, and joins 1. bank, Saône, about 14 m . N.N.E. Chalone. Its whole course is about 200 m . It is extensively used for floatage, but is not properly navigable except at those points where it communicates with the Rhone and Rhine canal. Its principal affluents are the Dessoubre, Halle, Savourense, and Lone.

DOUBS, a dep. France, bounded, N. by Haute-Saône and Haute-Rhin, E. and S.E. Switzerland, S.W. and W. Jura, N. W. Haute-Saône; between lat. $46^{\circ} 35^{\prime}$ and $47^{\circ} 35^{\prime}$ N., and lon. $5^{\circ} 50^{\prime}$ and $7^{\circ} 5^{\prime}$ E.; length, N.E. to S.W., 63 m .; average breadth, about 35 m .; area, 2028 sq . m . Its surface is gencrally mountainons, being traversed by four chains of the Jura in directions parallel to each other, and to the main chain of the Alps. The principal summits are the Mont d'Or, 4920 ft : ; and Suchet, on the Swiss frontier, 5248 ft . The general inclination of the department is from E. to W. It is drained chiefly by the river to which it owes its name, and which traverses it in a very remarkable manncr; first from its source, in a N.E., and afterwards, as if retracing its steps, in a S.W. direction. The only other river of any consequence is the Oignon, like the Doubs itself, a tributary of the Saônc; but the small streams which fall down from the momitain ridges, and pursue their course through the valleys formed by them, are very numerous, amounting, it is said, to more than 150 . Of perhaps still more importance than the river, is the canal which connects the Rhone with the Rhine. The temperature is very variable, and the climate, determined in a great measure by the elevation of the surface, more rigorous than the latitude might seem to indicate. In the E. of the department, where the loftiest summits are, the snow lies till April or May. There the air, though keen, is pure and healthy. In the lower ground much rain falls. Only about one-third of the whole surface is arable, and nearly one-fifth is absolutely waste. The far greater part of the remaiuder is covered with forests, chiefly of hardwood; but several of the highest slopes are covered with pines, many of which attain a height of 130 ft . On the lower slopes, the walnut attains a gigantic size, the ordinary orchard fruits thrive well, and the vine is cultivated to some extent. The cereala produced fall considerably short of the home consumptiou. In addition to these, the principal crops are maize, potatocs, hemp, flax, and medicinal plants. Considerable attention is paid to the rearing of stock. Both horses and horned cattle of good breeds are exported, and much dairy produce is employed in making Gruyère cheese. Rivers and lakes are well supplied with fish. The minerals include numerous rich mines of iron, which ia worked and smelted to some extent in the department. Traces of argentiferous lead have been discovered, but the only mine which had been opened has been abandoned. There is some coal, and a good
deal of lignite. Gypsum and marble are abundant everywhere. The manufactures consist chiefly of woollen and cotton cloth, hosiery, iron and steel ware, leather, clocks, turnery, glue, nut-oil, liqueurs, and vinegar; and the trade is chiefly in iron, cast and malleable ; the above articles of marufacture, cattle, horses, and chcese. For administrative purposes, Doubs is divided into four arrondissements-Besançon, the capital ; Baume-les-Dames, Montbelliard, and Pontarlier; subdivided into 27 cantona and 640 communes. Pop. 292,347.

DOUBTFUL ISLANDS.-1, An isl. S. Pacific Ocean; lat. (E. point) $17^{\circ} 20^{\prime}$ S.; lon. $142^{\circ} 23^{\prime}$ W. (r.) So called by Capt. Cook.-2, A small isl., S. Pacific Ocean, near S. coast, Australia; lat. $34^{\circ} 24^{\prime} \mathrm{S}$. ; lon. $119^{\circ} 34^{\prime} \mathrm{E}$ (r.) So named by Vancouver, from his uncertainty whether or not it was connected with the continent.

DOUDEVILLE, a th. France, dep. Seine-Inférieure, 24 m. N.W. Rouen, with manufactures of coarse cottons, brickfields, limekilns. \&c. Pop. 1785.
doue, a tn. France, dep. Maine-et-Loire, 23 m. s.E. Angers. It is the seat of a communal college, and has several tanneries, coal mines, and limestone quarries, with some trade in grain, linen, iron, and cattle. The town is very ancient, and contains a fine fountain and some remarkable ruins, including an amphitheatre (some say Roman, others early French), and a few remnants of a palace inlabited by Dagoberts. In the environs are curious natural grottoea. Pop. 3053.

DOUGLAS, a tn. and par. Scotland, co. Lanark. The tows, 38 m. S.W. Edinburgh, has narrow streets, and many of the houses have an antique appearance. It has an Established and a Free church, and several friendly societies. St. Bride, the former church of Douglas, was of great antiquity; a small spire and aisle still remain. The latter was the bury-ing-place of the once great and powerful family of Donglas, and contains a number of interesting and beautifully-sculptured monuments, amongst which is that of Sir James Douglas, the 'Good Sir James' of Scottish history, the friend and companion in arms of Robert Bruce. In the vicinity of the town stands Douglas Castle, the Castle Dangerous of Sir Walter Scott's novel of that name, near the site of the ancient edifice, which was accidentally destroyed by fire in 1760. Douglas has no trade, being inhabited almost wholly by mechanics, labourers, and handloom weavers.-The PARISH occupies the S.W. extremity of the county; area, $35,318 \mathrm{ac}$. Pop. (1851), 2610.

DOUGLAS, the principal town of the Isle of Man, finely situated, S. side of a semicircular bay, S.E. coast of the island; lat. $54^{\circ} 10^{\prime} \mathrm{N} . ;$ lon. $4^{\circ} 26^{\prime} \mathrm{W}$. The older streets of the town are narrow, dirty, and irregular; but some of the more modern are handsome and spacious. There are three Episcopalian chapels in the town, and a floating chapel, four Dissenting places of worship, and a R. Catholic church; a Lancasterian and a daily national school, various charities, and several libraries and news-roums. The custom-house and markethouse are both very handsome buildings; the former was once the residence of the Duke of Athol. The harbour is dry at low water, and the entrance rather difficult in storny weather. The pier, erected by Government, is 520 ft . in length and 40 ft . in breadth, and has a lighthouse at its outer extremity. Vessels drawing 10 ft . water may enter during neap tides, and those drawing 14 ft . during spring tides. It is the only port in the island at which goods imported by licence are allowed to be landed, and is on this account the chief establislment of the customs department. There are here a linen, and a paper and woollen manufactory. From the beauty of the surrounding scenery, the salubrity of the air, and the cheapness of all the necessaries of life, Douglas has become a favourite resort for sea-bathing; for which class of visitors it is amply provided with every sort of accommodation. Pop. 8647.

DOULLENS, an anc. tn. France, dep. Somme, l. bank, Authie, 18 m . N. by E. Auiens. It is a military post, and defended by a citadel, esteemed one of the finest in France. The boulevards which surround it form agreeable promenades. It has manufactures of canvas and beet-root sugar, tauneries. a cotton spinnery, \&c.; with trade in canvas bagging, oilseeds, hemp, flax, and cattle. Pop. 2419.

DOULTING, par. Eng. Somerset; 4530 ac. Pop. 666.
DOUNE, a small market tn . Scotland, co. Perth. 7 m . N.W. Stirling. near l. bank, Teith. It consists chiefly of one

## DOVER

nain street, with some minor ones diverging from it; and the houses mostly of one story, are of stone, and in general have a respectable appearance. It has a handsome Established church, and a Free church. Doune is famous for its fairs, of which there are six annually; the principal, called Latter Fair, for sheep and black cattle, is held in November. Close lyy the village, and picturesquely situated on a steep, green l ank, overlooking the well-wooded Teith, is the ancient castle of Doune, a large and imposing ruin, with a spacious square tower, 80 ft . in height, and another of 40 ft . It was frequently occupied in the 16 th century by Margaret, daughter of Henry VII., and widow of James IV. It was also the residence, occasionally, of Mary, Queen of Scots; and was in possession of the rebels in 1745, under the command of Macgregor of (ilengyle. It has long been the property of the Earl of Moray, to whom it gives his second title, Baron Doune. Many of the inhabitants of Doune are employed in the neighbouring cotton-factory at Deanston. Pop. 1559.

DOUR, a tn . and com. Belgium, prov. Hainaut, 8 m E.S.E. Mons. It is small, but well-built and flourishing; and contains a R. Catholic church and Protestant temple, several schools, and a literary society. In the environs are several mines of good coal, profitably worked, also ironstone mines, with many stone quarries; weaving, bleacling, tanning, leather-dressing, \&c., are carried on. Pop. 6250.

DOURAK, or Dorak, a tn. Persia, prov. Khuzistan, 200 m. S.W. Ispahan, at the confluence of the Jerahi and Dorak rivers. It has manufactures of silk handkerchiefs and Arabian cloaks. Pop. 8000.

DOURDAN [Latin, Dordingım], a tn. France, dep. Seine et Oise, in a wide and beautiful valley, on the Orge, 25 m . S.S.W. Paris. It was once a place of considerable importance, and was defended by a strong castle, of which some remains still exist. It contains an ancient and well-preserved Gothic church; and has manufactures of silk and woollen hosiery, a trade in wool and corn, and three annual fairs. La Bruyére, author of the celebrated work, Les Caractéres, was born here. Pop. 2323.

DOURGA STRAAIT, isl. Papua, S. side, near Torres Strait. The N.W. entrance is about 12 m . wide, the W. point being in lat. $7^{\circ} 27^{\prime} \mathrm{S}$. ; lon. $138^{\circ} 46^{\prime}$ E.; and the E. point in lat. $7^{\circ} 22^{\prime} \mathrm{S}$.; lon. $138^{\circ} 55^{\prime} \mathrm{E}$. This channel was long supposed to be a large river, and was not determined to le a strait till 1835 . The position of the $S$. entrance has not yet been ascertained. The shores are peopled by the aborigines of the coasts of Papua, who possess small canoes, and are armed with bows, arrows, and spears.

DOURGNE, a tn. France, dep. Tarn, 8 m . S.S.W. Castres, at the foot of the Montagne Noire. It has manufactures of coarse woollen cloth, and in the vicinity are quarries of fine marble. Pop. 1009.

DOURO [Portuguesc, Douro; Spanish, Duero; anc. Durius], one of the largest rivers of the Spanish peninsula, traversing, E. to W., one half of Spain, and the whole of Portugal. It rises in the sierra de Urbion, Old Castile, on the frontiers of provs. Soria and Burgos, flows S.E. and S.S.E., past the town of Soria, and at Almaril, lat. $41^{\circ} 30^{\circ} \mathrm{N}$. ; lon. $2^{\circ} 24^{\prime}$ W., turns W., flows in a winding course throngh prov. Soria, the S. part of Burgos, the centre of Valladolid and Zamora, in which last, lat. $41^{\circ} 45^{\prime}$ N.; lon. $6^{\circ} 10^{\prime}$ W., it turns S.W., forms the boundary between Spain and Portugal for about 50 m . direct distance, when it turns due $W$., crosses the whole of Portugal, and falls into the Atlantic 3 m . below Oporto, after a total course, direct distance, of about 300 m ., or, including windings, of about 500 m . The only large towns close upon its banks are Zamora in Spain, and Oporto in Portugal. As affluents, it receives in Spain the Pisuerga, Seco, and Elsa on the right, and the Eresma and Tormes on the left bank, besides numerous smaller streams. Its principal affluents in Portugal are the Sabor, Tua, and Tamega on the right, and the Turon, Coa, and Tavora on the left. T'he Douro passes gencrally through deep valleys, in a confined channel, with great rapidity. It is navigable upwards, for small vessels, about 70 m ., and boats of light draught may even proceed 30 m . higher; though it might be rendered navigable, according to Forrester, as far as Vilvestre, on the Spanish frontier. The Spaniards make considerable use of its waters for floating down, on flats, grain and other produce, in a clandestine manner, into Portugal. But the little navi-
gation carried on is subject to frequent interruptions, from the swelling of the river by rains and melted snow. The Douro passes through some of the most fertile and picturesque parts of Spain and Portugal; and on its banks, in the latter country, are produced the famous wines of Oporto.-(Madoz; Forres ter's Map of the Douro, \&c.)

DOURO, a recently formed prov. Portugal, composed of three districts :-Oporto, which previously belonged to the old prov. Entre-Douro-e-Minho, and Aveiro and Coimbra, formerly the sea-board districts of prov. Beira; bounded, N. by prov. Minho, N.E. Tras-os-Montes, E. Beira, S. Estremadura, and W. the Atlantic; area, 2916 geo. sq. m. The interior is partly mountainous, being traversed in the N . by the serra Catherina, and in the S . by the serra Alcoba, but the surface has a general slope towards the sea, as indicated by the $\mathbf{E}$. direction of the rivers. Of these the principal are the Douro, to which the prov. owes its name; the Vouga, and the Mondego. Pop. 207,885.

DOUVAINE, or Dovaine [Latin, Durania], a vil. and com. Sardinian States, Savoy, prov. Chablais, 10 m . N.E. town, and 3 m. E. lake of Geneva. It contains a parish church, with a very ancient choir and a modern nave, an elementary school, and the remains of an old turreted castle; and has two annual fairs. Most of the inhabitants are employed in cultivating the vine. Pop. 1150.

DOUVE ( $\mathrm{I}_{\mathrm{A}}$ ), a river, France, which rises at a place called Fontaine-Louve, near the village of Tollevast, arrond., Cherbourg, dep. Manche, flows S.S.E. through that department, and falls into a bay in the English Channel, a little below Carentan, after a course of 25 m . In spring tides it is navigable as far as St. Sauveur-le-Vicomte, about 19 m .

DOUVRES, or Douvres-la-Delivrande [anc. Dubris Viducassium], a vil. France, dep. Calvados, 7 m. N. Caen. It contains an ancient parish church, partly in the Romanesque style; and has manufactures of tulle, lace, and blonde; and three annual fairs. Pop. 1311.

DOUW (Pulo), Daw, Daauw, or Dao, an isl. Indian Archipelago, $35 \mathrm{~m} . \mathrm{S} . \mathrm{W}$. Timor ; lat. $10^{\circ} 48^{\prime}$ S.; lon. $122^{\circ} 41^{\prime}$ E. (R.) Properly speaking, it is no more than a barren rock, yielding only spelt and native beans; still so attached are its inliabitants to it, that they refused the offer of transference to Timor. The natives are spirited, and well made; and also courageous seamen, making extensive voyages in their canoes, and purchasing, in return for articles in gold and gold thread, in the making of which they are especially skilled, linen, iron, utensils, and other necessaries. From the neighbouring island of Rotti they obtain cotton, which they manufacture into a good cloth. They are governed by a rajah. Pop. 5000.

DUVADOLA, a tn. Tuscany, prov. of, and 40 m . N.E. Florence, r. bank, Montone, on a declivity, surmounted by an ancient castle. It is well built, partly surrounded by a wall; and contains two churches, a public granary, and some oil-mills. Pop. 1197.

DOVE, a river, England, rising in the hills of the Peak of Derbyshire, forming part of the boundary between the counties of Derby and Stafford, and, after a S. course of 39 m ., through highly picturesque scenery, including the beautiful and romantic valley of Dovedale, falling into the Trent below Burton.

DOVER [Latin, Dubris; French, Douvres; Spanish, Duvre], a tn. England, co. Kent, one of the Cinque ports, 67 m . S.E. London, or 88 m . by the Sonth-eastern railway, which here terminates. It lies on the coast of the strait of Dover ; lat. (castle), $51^{\circ} 7^{\prime} 48^{\prime \prime}$ N. ; lon. $1^{\circ} 19^{\prime} 30^{\prime \prime}$ E. (r.), opposite Calais in France, from the coast of which it is only 21 m . distant, and at the mouth of a deep valley, formed by a depression in the chalk cliffs which abut on the sea on cither side of the town. It is irregularly built, and none of its public buildings are remarkable. The principal street is about a mile long, and from it diverge other smaller streets, all paved and lighted; but the best part, called the new tows, faces the sea, along the shore, and includes the marine parade, \&c., where elegant modern houses have been built for the accommodation of sea-bathing visitors, considerable numbers of whom resort hither during the season. It has three Episcopalian churches, and places of worship for Baptists, Independents, Friends, Unitarians, Methodists, and R. Catholics; a charity and several other schools, several alms-houses and minor charities; likewise an ancient townhall, custom-house,
museum, theatre, assembly rooms, reading-rooms, baths, and an elegant station at the terminus of the South-eastern railivay. Ship-building, and sail and rope-making are carricd on; but the chief dependence of the town is on summer visitors, and on the passenger traffic to and from Calais and Ostend, with which there is regular communication by steamer. In 1849 , the total number of steamers arriving and departing was, British, outwards, 781 ; tonn. 87,381 ; inwards, 784 ; tonn. 87,639 ; Foreign, outwards, 566 ; tom. 74,557 ; inwards, 565 ; tonn. 74,555 . Of other vessels, the total number was, outwards, 265 ; tonn. 11,578 ; inwards, 580 ; tonn. 54,545 ; in both cases the larger portion being coasters, averaging under 80 tons cach. The harbour is small, and the entrance difficult ; and though much money has been expended on it, the improvement has been only partial, and the mouth is continually liable, during S.W. winds, to be choked up by the moveable bar of slingle at its mouth. Operations are in progress to form here a harbour of refuge, for which Government have authorized the construction of works that will cost $£ 2,500,000$. In October, 1851, continuous communication was estallished between England and the Continent, by electric telegraph, by means of a sub-marine wire laid across the chamel from Dover to Calais.

The celebrated castle of Dover stands on a elalk cliff about 350 ft . in height, about $1 \frac{1}{2} \mathrm{~m}$. N.E. the town ; the old and new buildings together occupy nearly 30 ac ., and consist of

THE TOWN AND CASTLE OF DOVER.

a heterogeneous assemblage of fortifications of all styles and wes-Roman, Saxon, Norman, and modern; presenting, it is said, some of the earliest specimens of regular masonry in this country, and the entire appearance being striking and picturesque. The lord warden of the Cinque Ports is constable. Shakespeare's Cliff is sitnated at a little distance from the town, and is perforated by a tunnel on the South-eastern railway. In May, 1847, a huge mass of this elalk cliff scaled off, and fell to the base; the mass was 254 ft . in height, 15 ft . thick, and was calculated to contain 48,000 tons of chalk. Shortly after, another fall of 10,000 cubic yards took place. The cliff is 350 ft . high, and though sufficiently remarkable in form. does not bear out the magnificent description of the poet.

Dover is the principal station and seat of government of the Cinque Ports, and has returned two members of Parliament sinee the time of Edward I. Registered electors (1850), 2203. Pop., tn. and port (1841), 13,872.

DOVER, numerous places, U. States of America, particu-larly:-1, A vil. and township, Maine, the former 83 m. N.N.E. Augusta. It contains two printing-offiees, each with a weekly newspaper, and has several mills. Pop. 1597.-2, A vil. and township, New Hampshire. The village, 35 m . E. Concord, r. bank, Piscataqua, at the lower falls of Cocheco, is one of the most beantiful and flourishing towns in the state. It has a conrt-house, a jail, a bank, several churehes, and extensive manufactures, comprising two tannerics, a distillery, dyeing and printing establishments, grist and saw mills, cotton and woollen factories, and three printing offices. A considerable
amount of shipping is owned here. Pop. (1840), 6458.3, A vil. and townslip, New York. The village, beautifully situated 74 m. S. by E. Albany, contains two churehes, an academy, and several manufacturing establishments. Pop. of township, $2000 .-4$, A township, New Jersey, 35 m. S.E. Frenton. Pop. 2752.-5, A tn. Delaware, cap. of the state, on elevated ground, 57 m . E.S.E. Baltimore. The streets are wide, and cross each other at right angles; houses neatly built, chiefly of brick. The state-house is a handsome structure, on the E. side of a large public square; and there are, besides, three churehes, an academy, and a splendid monument to the memory of Col. John Haslett, who fell in tho battle of Princeton. The chief trade is in flour, with Philidelphia. Pop. 3790.

DOVER (Strait of), [French, Pas-de-Calais; anc. Fretum Gallicum], the strait which separates England from France, and connects the English Cbannel with the N. Sea. It extends on the English side from Dengeness, N.E. to the N. Foreland, both in eo. Kent ; and from Cape Gris Nez (dep. Pas-de-Calais), to Calais, on the French side. It is 22 nl . long, and at the narrowest part 21 m . broad.

DOVERA; a vil. and com. Austrian Italy, gov. Milan, prov. of, and 4 m . N.N.E. Lodi. It contains two parish churches, and is famous for its cheese, known by the nams of stracchino. The district produces much corn and flax, and has rich pastures. Pop. 1683.

DOVERCOURT, par. Eng. Essex; 1970 ac. Pop. 813.

DOVERDALE, par. Eng. Worcestcr 980 ac. Pop. 54.

DOVERIDGE, par. Eng. Derby 4000 ac. Pop. 816.

DOVEY, or Drfi, a river, N. Wales, cos. Montgomery and Merioneth, rising near Bala, and after a S.W. course of about 30 m .. falling into Cardigan Bay, 7 m. N. Aberystwith. It receives the Afon, Dulas, and other tributaries, and is navigable for about 12 m . from its embouchure.

DOVRE FJELD, Dovre Field, or Dofrines, a mountain range, Norway, forming the central part of the Scandinavian system, and extending in an E.N.E. direction, from the valley of Lessöe, near lat. $62^{\circ}$ N., where the Langfield rance terminates, to the Syltfjallet, lat. $63^{\circ} \mathrm{N}$., where the clain of Koelen or Kiöel bogins. It is generally composed of gneiss and micaccous schist, and possesses, in Moun: Sncebacttan, which has an altitude of 8120 ft ., the highest summit in the Scandinavian peninsula. This mountain raises its gigantic mass above the lofty plateau on whieh the chain rests, till its snowy heights are lost among the clouds. Four passes lead aeross the Dovre Fjeld range. The most frequented of these is in the line of road which lead.s from Christiania to Trondhjem, by the E. side of Sncehicttan. Its greatest height is 4200 ft .

DOWLETABAD, or Deoghir [the Fortunate City], an inland tn . and fortress, Hindoostan, prov. of, and 10 m . N.W. Aurungabad; lat. $19^{\circ} 57^{\prime} \mathrm{N}$. ; lon. $75^{\circ} 16^{\prime} \mathrm{E}$. It is one of the most remarkable fortresses in India, and stands upon an isolated rock, 300 ft ., some accounts say 500 ft . high, and, for about one-third of its height, as perpendicular as a wall, and presenting no visible means of reaching the summit, which is only to be attained through an excavation in the heart of the rock, the entrance to which is at first so low, that a person is obliged to stoop nearly double, but it afterwards expands into a passage about 12 ft . high, and the same in breadtl, but so dark as to require the aid of lighted torches. About 100 yards from the summit is a large tank, cut out of the living rock. There are only two or threc pieces of cannon in the
fortress. The view from the summit is extensive and beautiful. In 1306, this fortress was taken from a powerful Hindoo chief by the Emperor of Delhi's troops; and soon thereafter

carried on in the houses of the small farmers, the two pursuits being generally combined. The fisheries on the coast are considerable. Cod, haddock, and all sorts of both round and flat fish, abound. Herrings are also taken in large quantities, especially in Lough Strangford. Oysters are obtained in several places. The fishery districts are Donaghadee and Newcastle. The number of registered fishing vessels, in 1845, was 1442, einploying 5530 men and boys. The number of children attending school, in 1841, was 26,863: and, in 1848, the number attending 207 national schools was 25,388 . The county is divided into 10 baronies-Ards, Castlereagh (Lower and Upper), Dufferin, Iveagh (Lower and Upper), Kinelearty, Lecale, Mourne, and Newry Lordship-and 70 parishes. It returns 4 members to the House of Com-mons- 2 for the county, 1 for Downpatrick, the capital, and 1 for Newry. Pop. (1841), 361,446; (1851), 328,754.

DOWN, four pars. England:-1, Kent; 1380 ac. Pop. 444. - Three in Devon:1 , (-East), 3390 ac. P. 473.-2, (St. Mary), 1890 ac. Pop. 407.-3, (-West), 5000 ac Pop. 637.
DOWNHAM, three pars. England:-1, Cambridge;
the Emperor made a fruitlcss attempt, in which he almost ruined Delhi, to make Dowletabad the seat of government. About 1555 , it fell into the hands of Ahmed Nizam Shah of Ahmednuggur, and in 1634 it passed into the hands of the Moguls, from whom it was taken by Nizam ul Mulh, and has since continued in the possession of the Nizam of Hyderabad.

DOWLISH, two pars. England, Somerset:-1, (-Wake), 680 ac. Pop. 374.-2, (-West), 450 ac. Pop. 31 .

DOWN, par. Ircl. Down; 11,485 ac. Pop. 8812.
DOWN, a maritime co. Ireland, prov. Ulster, having, N. Antrim and Belfast Lough, W. Armagl, and S. and E. the Irish Sea. Greatest length, N.E. and S.W., about $50 \mathrm{~m} . ;$ greatest breadth, about 38 m ; area, 612,495 ac., of which 514,180 are arable. The S. part of the county is occupied by a group of mountains, called the Mourne Mountains, amongst which are some of the highest summits in Ireland; the principal of these, Slieve Donard, is 2809 ft . high. There is another smaller group of hills towards the centre of the county. With exception of these, and a few other detached hills, the surface is, on the whole, level, and the soil various, but in general tolerably fertile, especially on the banks of the larger streams, all of which, however, as well as the lakes, are small; but most of them abound with fish-pike, trout, eels, perch, and roach. The Iurgan skirts the county on the N., and the Bann on the S. The minerals include limestone, copper and lead ores, coal, chalk, freestone, and slate; of these two last, and limestone, there are several extensive quarries in various parts of the county. The climate is, on the whole, remarkably healthy, though somewhat cold, especially in spring. Agriculture is in a comparatively advanced state, and is improving. Draining and irrigation are both practised extensively and judiciously. Oats, wheat, and barley are the favourite grain crops; potatoes and turnips are cultivated largely, mangold-wurzel and flax are grown-the latter to a considerable extent. Dairy husbandry is also much attended to, and great quantities of butter produced, a part of which is sold fresh in the towns, but the greater portion is salted and sent to Belfast and Newry, for exportation. The breed of cattle has not been much improved, but those of sheep and pigs have been considerably, especially the latter. The breed of horses is, in general, good. The houses of the farmers have, many of them, a neat, clean appearance, being nicely whitewashed; but the habitations of the poorer classes are here, as in other parts of Ireland, sufficiently wretched, although the population may, on the whole, be considered as in rather a better condition than in most other Irish counties.

The staple manufacture is that of linens, including cambrics, sheetings, drills, damasks, and every description of household linen. The manufacture of cotton has also made some progress here. A coarse woollen cloth and blanketing are manufactured to a considerable extent, and the weaving of stockings is very general. The weaving trade is mostly

10,550 ac. Pop. 2140.-2, Essex; 790 ac. Pop. 254.-3, (-Santon), Suffolk; 3860 ac. Pop. 68.

DOWNHAM (Market), a tn. and par. England, co. Norfolk, 38 m. W. Norwich, a station on the E. Anglian Railway, on the face of a hill E. of the River Ouse. It consists of three streets, well paved, houses well built, and is abundantly supplied with water. The church, dedicated to St. Edmund, is an ancient Gothic structure, with a low embattled tower, surmounted by a spire. There are, besides, places of worship for varions Dissenting bodies. It has several schools and minor charities, a union workhouse, an extensive mustard manufactory, and a large bell-foundry; and in the neighbourhood corn-mills, maltings, and a brewery. The parish was long celebrated for its butter, large quantities of which, amounting to about 90,000 firkins annually, were sold as Cambridge butter. The market for this commodity, however, is now removed to Swaffham. Market day, Saturday; with three fairs annually-March 3, May 8, and Nov. 13. The first is a horse fair, and one of the largest in the kingdom. Area of par., 2880 ac. Pop. (1841), 2953.

DOWNHEAD, par. Eng. Somerset; 1310 ac. Pop. 207.
DOWNHOLME, or Downham, par. England, York (N. Riding); 5800 ac. Pop. 248.

DOW NINGS, par. Irel. Kildare ; 4729 ac. Pop. 1293.
DOW NPATRICK, a maritime tn. and parl. bor., Ireland, cap. co. Down, 21 m. S. by E. Belfast, in a steep valley, near the embouchure of the Quoile river, at the head of a W. branch of Lough Strangford. It is divided into the English, Irish, and Scotch quarters, and consists of four principal streets, meeting in the centre, and intersected by several smaller. In the centre is the market-place, and frim this point the town rises on the steep acclivities with which it is surrounded. The houses are, in general, substantial and well built, and the streets well paved, with an ample supply of water. The most remarkable edifices are the cathedral, a restoration of a more ancient structure; the county courthouse, the jail, barracks, infirmary, and fever hospital. The latter two are large handsome buildings, and were both erected in 1832. The infirmary stands on a gentle eminence a little S. of the town. There are here also a parish church, a R. Catholic chapel, two Presbyterian, and three Methodist meeting-houses, a diocesan, and several other schools, a public library, and news-room, almshouses, widows'-houses, \&c. The linen manufacture is carried on to a considerable extent; and there are two breweries, some tanning, and soap making; and an active retail trade with the surrounding country, and a weekly market, well supplied with all kinds of provisions. About 1 m . from the town are commodious quays, at which vessels of 100 tons burthen may load or discharge. The principal imports are iron, coal, salt, timber, and bark. The exports are wheat, barley, oats, cattle, pigs, potatoes, and kelp. There are six fairs annually.

Downpatrick claims to be one of the oldest towns in Ireland, having been the place of residence of the ancient native kings of Ulster; and the chosen residence of St. Patrick, who founded two religious establishments here, and presided over them till his death, in 493, when his remains were deposited in the abbey of Down, as were, subsequently, those of St. Bridget and St. Columbkill. About 2 m . to the E. is Strual Hill, much resorted to by the lower orders of R. Catholics during midsummer, for the performance of penance. Down patrick returns one member to the House of Commons. Registered electors (1850), 197. Pop. (1841), 4651.

DOW NS ('The), a well known roadstead, off the E. coast of England, between the N. and S. Foreland, co. Kent, and opposite Ramsgate, Sandwich, and Deal. It affords a safe shelter for shipping, the Goodwin Sands forming a breakwater. Several hundred sail of vessels may be often seen here at one time, waiting for a favourable wind.

DOWNTON, a bor., tn., and par. England, co. Wilts. The town, in a pleasant vale, l. bank, Avon, 6 m . S.S.E. Salisbury, consists principally of one long straggling street, stretching E. to W.; houses in the cottage style, of brick, and generally with thatched roofs; supply of water abundant. It has a large cruciform chureh, with a central tower; a chapel of ease, and places of worship for Baptists and Wesleyan Methodists; two free, and several other schools, and two lending libraries. Straw plait and lace are manufactured to some extent. Downton sent two members to the House of Commons from the time of Elward I. till its disfranchisement by the Reform Act. Two fairs annually. Area of par. 11,420 ac. Pop. (1841), 3648.-(Local Correspondent.)

DOWNTON, par. Eng. Hereford; 1170 ac. Pop. 104.
DOWSBY, par. Eng. Lincoln; 1900 ac. Pop. 232.
DOWTH, par. Irel. Meath; 1464 ac. Pop. 382.
DOXA, Doxan, or Hirschberg, a tn. Bohemia, circle Bunzlau, on a lake of same name, 38 m . N.N.E. Prague. It contains a parish chnrch, townhouse, school, and hospital; and has manufactures of cotton cloth. A good many of the inhabitants are employed in knitting stockings. On a tongue of land projecting into the lake are the ruins of the old castle of Klutschka; and on an island in it are the ruins of a large old building, which gets the name of Mause schloss, because, having been used as a granary, the whole of the corn was eaten up by mice. Pop. 1946.

DOYLESTOWN, a tn., U. States, Pennsylvania, on a commanding eminence, 100 m . E. Harrisburg. It has a jail, courthouse, three churches, and an academy. Pop. 2127.

DOYNTON, par. and vil. Eng. Gloucester; 1720 ac . Pop. 529.

DRAA, or Dera [anc. Elrci], a tn. Palestine, a few miles S.E. Mezarib, in a deep valley. The ruins of the ancient city cover an extent of about 2 m . in circumference, the principal being an immense rectangular building, with a double covered colonnade all around, and a cistern in the middle. This seems to have been originally a Christian chnrch, and afterwards a mosque. Near the town, in the hollow of the mountains, is a large reservoir cased with stone, close by which are the ruins of a large building, with a cupola of light materials.

DRABUND, a tn. Afghanistan. See Verabund.
DRAC, a river, France, which rises in the dep. HanteAlpes, flows with an impetuous course W. and N.W., enters dep. Isère, and falls into the river Isère, near Grenoble, after a course of about 87 m . It furnishes fine pebbles; and in its basin are numerous mines of anthracite coal.

DRACHENFELS [Dragon's rock], one of a group of mountains, Prussia, gov. Cologne, called, from their number, the Siebengebirge or Seven Monntains, and forming the grand commencement of the fained scenery of the Rhine, about 8 m . S.E. Bonn. The Drachenfels, standing on the right of the river, above which it rises abont 900 ft ., is the most conspicuons, both from its shape, and the old ruined castle of Drachenfels, which crowns its summit, and commands a magnificent view, extending as far as Cologne, 20 m . off. Like the rest of the group, it is evidently of volcanic formation, consisting of lava, trachyte, and basalt, ejected through the overlying rocks. On its side is the quarry out of which the cathedral of Cologne was built. The mountain takes its name from the fabulous legend of a dragon, which occupied a cavern within it, and was at last killed ly the horned Siegfried, the hero of

Vol. I.
the Niebelungen lay. The wine which grows upon it gets the name of Dragon's Blood and Drachenfelser.

DRAGE, a river, Prussia, which rises in the forest of Draheim, gov. of, and about $40 \mathrm{~m} . \mathrm{S}$. Köslin ; flows circuitously S.S.W., expanding into, or communicating with several small lakes, and passing the towns of Falkenburg, Dramburg, and Neuwedel, and, after a course of about 90 m ., joins r. bank, Netze.

DRAGOMESTRE [anc. Astacus], a tn. Greece, prov. Acarnania and Etolia, on a bay of same name, an inlet of the Ionian Sea, 23 m . N. W. Missolonghi, with important fisheries. The bay stretches 4 m . inland, and has a breadth of about 2 m .

DRAGONERA, an isl. Mediterrancan, belonging to the Balearic group, about 2 m . W. Majorca. It is about 3 m . long, by 2 broad, and is of considerable height towards the N., where the coast is precipitous. On the S., it slopes gently to the shore. There are two towers upon it, one of them on its very suminit.

DRAGONI [anc. Combultiera], a tn. Naples, prov. Terra di Lavoro, at the foot of Mount Trebulano, 12 m . N. N.E. Capna. It contains four churches. In the vicinity are marble quarrics. Pop. 1862.

DRAGON'S MOUTH [Spanish, Boca del Dragon], a strait, between the island of Trinidad, W. Indies, and Punta de Paria or Pena, on the coast of Venezuela, connecting the Gulf of Paria with the Caribbean Sea. It is about 12 or 15 m. across at its narrowest part, and is, by islets, divided into four channels, named, respectively, Boca Grande (great channel), nearest the S. American coast, and the widest of the four; Boca de Navios (ship's channel), Boca de IIuevos (egg channcl), and Boca de Monos (ape's ehannel). There is a strong set of the tide through all these channels, causing a cor siderable commotion in the waters, and rendering the navigation more or less difficult. The depth of water is great, being often 100 fathoms in mid channel. Two hours after flood-tide commences, or one hour after ebb commences, would appear to be the best times for navigating these channcls. Boca del Dragon was discovered and passed through by Columbus, on his third voyage, A.D. 1498, and so named by him from the formidable nature of their navigation.- (Sailing Directions, (.c.)

DRAG $\ddot{O}$, a scaport, Denmark, S.E. point of isl. Amager, with a roomy harbour of refuge, very important for small craft. The inhabitants are chiefly seamen and pilots, but also carry on weaving and bleaching, and possess 60 small vessels. Pop. 1800.

DRAG'TEN, a market tn. Holland, prov. Friesland, 15 m . S.F. Leeuwarden. It is a large flourishing place, and has a lieformed, and a handsome Baptist chureh, four schools, a handsome district courthouse, and a branch of the General Utility Society. Boat-building, tanning, rope-making, weaving, watch-making, lime-burning, and a good deal of trade, are carried on. Three cattle and horse markets annually. Pop. 4500.

DRAGUlGNAN [anc. Dracenum], a tn. France, cap. dep. Var, on the Pis, a branch of the Artuby, 41 m. N.E. Toulon. It is seated, in a bcautiful vine-clad valley, at the foot of the Malmont ; the environs being, according to Connt Chaptal, 'one continued English landscape garden.' The town is not handsome or regularly built, but has some interesting edifices and objects; as the parish church, law conrts, a model prison, the majestic clock tower, an hospital, a eapacions public wash-house, and a number of public fountains. The public library contains 8000 volumes; and annexed to it are a museum of antiquities, with a cabinet of medals and some good pictures ; a cabinet of natural history, a botanic garden, \&c. In the Foux quarter is a salino-sulphurous spring, originating a stream abundant enough for several mills, \&c. Draguignan is the seat of a prefecture, a tribunal of commerce, a consultative board of manufactures, a communal college, \&c.; and has soapworks, silk-mills, tanneries, distillerics, and oil-mills, with a considerable traffic in wine and olive oil. The town is said to have been founded in the fifth century, and was early one of the chief towns of Provence. It was last fortified in 1615, and its possession was much coveted during the political and religious contests of France. Pop. 7530.

DRAHOTUSCH, a market tn. Austria, Moravia, eircle, Preran, l. bank, Boschkan, 22 m. E.N.E. Olmiitz. It con| Preranl, l. bank, Boschkan, 22 m. E.N.E. Olmiitz.
tains a parish church, chapel, and the ruins of an old castle, and has four annual fairs. Pop. 1143.

DRAINIE. par. Scot. Elgin, 4 m. by 2 m. P. (1851), 1839.
DRAKENBERG, mountains, S.E. Africa. See Quathlamba Mountains.

DRAKESTOWN, par. Irel. Meath; 2693 ac. Pop. 889.
DRAMA, a tn. European Turkey, Macedonia; lat. $41^{\circ} 9^{\prime} \mathrm{N} .$, lon. $24^{\circ} 10^{\prime} \mathrm{E}$. It has manufactures of cotton cloth and tobacco, with the ruins of an ancient town in the vicinity.

DRAMANET, a tn. Senegambia, r. bank, Senegal, kingdom of, and 5 m . S.E. Galam. It has some trade with Timbuctoo. Pop. 4000.

DRAMBURG, a tn. Prussia, gov. of, and 51 m . S.S.W. Köslin, cap. circle of same name, on the Drage. It is surrounded by walls with three gates, and is defended by a fort. It consists of the old and new towns, separated from each other by the river, and communicating by a bridge, contains a church and an hospital, is the seat of courts and offices for the circle, and has manfactures of woollen goods, ordinary and white leather, gloves, hats, and fire-arms. Pop. 2800. -The circle, area, 344 geo. sq. m., is flat and fertile, is watered both by numerous streams and lakes, and rears great numbers of cattle and sheep. Pop. 27,020.

DRAMMEN, or Dram, a seaport, Norway, bail. Buskerud, in a valley on both sides of the Drammen, where it enters the the Drammeufiord, one of the arms of the Gulf or Fiord of Christiania; lat. $59^{\circ} 39^{\prime} \mathrm{N}$. ; lon. $10^{\circ} 28^{\prime}$ E., 25 m . S.S.W. Christiania. It consists of three villages or sections -Bragnaes on the N. bank, and Stromsöe and Tangen on the S. bank of the river, which is here crossed by a handsome bridge. Drammen possesses a gymnasium [Laerde-skole], two public, and three free schools, and several charitable institutions. Its manufactures consist of leather, ropes, saileloth, tobacco, \&e., in which there is an active trade; and it has distilleries and potteries. Shipbuilding is also carried on, but the principal trade of the town consists in the exports of timber, much of it in the form of battens, staves, and hoops; iron in bars, pigs, and nails; smalts and cobalt. The number of vessels that arrived, in 1842, was 548 , tonn. 92,671 ; departed, 654, tonn. 108,961. This port is the second in Norway for the export of timber. Vessels can load alongside the quays. Pop. (1845), 8095.--The river is formed by the junction of the Sigdals with the Snarum River, about 15 m . N.W. the town. These streams, with their affluents, including numerous lakes, drain a district of country fully 80 m . sq.
-The FJord, or Fiond, is a narrow estnary, about 20 m . long, joining the Gulf of Christiania, to the N. of Holmestrand.

DRANGAN, par. and tn. Irel. Tipperary; 5427 ac. Pop. 2021.

DRANSFELI, a tn. Hanover, gov. Hildeshcim, in a plain 7 m . W.S.W. Göttingen. It is a very old place, has well paved streets, and contains a church, townhouse, and four mills. Pop. 1342.

DRANSE.- 1 , (-Valaisane), a river, Switzerland, can. Valais. It is formed by two torrents, the one of which descends from the N. slope of the Great St. Bernard, and waters the valley of Entremont, while the other, issuing from the glaciers of Chermotane, traverses the Val de Bagnes. After their junction, the united stream proceeds first W., then almost due N. past Martigny, and about 2 m . below that town joins l. bank, Rhone. The damming up of this river by glaciers has repeatedly formed a collection of waters, which, ultimately bursting their bounds, have caused fearful devastation. See Bagnes (Val de)--2, (-Savoyarde), a river, Savoy, which rises in Monnt Morgene, prov. Chablais, and flowing circuitously W.N.W. through that province, falls into the Lake of Geneva on its S. shore, 3 m . N.N.F. Thonon, after a course of about 27 m . Its current is very rapid, and is often interrupted by enormous masses of rock.

DRAPERSTOWN, a market tn . Ireland, co of, and 27 m. S.E. by S. Londonderry, with a parish church, school, and market-house. Weekly market on Wednesday, and fairs monthly. Pop. 373.

DRASENHOFEN, or Trasenhofen, a vil. Archduchy of Austria, below the Ens, dist. Poisbrunn, on a sinall stream of same name, 49 m . N.N.E. Vienna. It contains a parish church. Pop. 1232.

DRAUGHTON, par. Eng. Northampton; 1360ac. P.208.

DRAVE [anc. Dravus; German Drau], a river, Austria, which rises at the E. extremity of the Tyrol, at the foot of the Rohrwaldberg in the Pusterthal, and flows E.S.E. across the N. of Illyria and the S. of Styria, forms the boundary between Hungary on the left, and Croatia and Sclavonia on the right, and after a course of about 300 m ., joins r. bank, Danube, 14 m . below Eszek, near the castle of Erdody. It receives numerous streams, among others, on the right, the Gail, Dran, Plitvicza, Bednya, Bisztra, and Karaschicza; and on the left, the Mohl, Gurk, Lavant, and Mur, the last being by far the most important of its affluents. The chief towns which it passes in succession are Lienz, Villach, when it becomes navigable, Marburg, Warasdin, and Eszek. Its basin is generally narrow, being hemmed in by mountain ridges, by branches of the Noric and Styrian Alps on the N., and of the Carnic Alps on the $S$. It is very rapid in the upper part of its course, and subject to sudden floods, which bringing down masses of debris and trees, greatly impede its navigation. On reaching Sclavonia, it begins to run between flat banks, which, notwithstanding the lofty dykes which line them, it often overflows, and not unfrequently causes great devastation. It abounds in fish, and some gold is washed from its sands.

DRAX, par. Eng., York (W. Riding); 7490 ac. P. 1161.
DRAYCOTT, a vil. England, co. of, and 6 m. E.S.E. Derby, with places of worship for Primitive Methodists and Wesleyans, and a school. Pop., including liberty, 895.

DRAYCOTT, three pars. Eng. :- $1,(-$ Foliatt $)$, Wilts ; 740 ac. Pop. 26.-2, (-Cerne), Wilts ; 1090 ac. Pop. 181. -3, (in the MIoors), Stafford ; 3690 ac. Pop. 518.

DRAYTON (Market), or Drayton-in-Hales, a market tn. and par. England, co. Salop. The town, pleasantly sitnated, r. bank, Terne, and 18 m. N.E. Shrewsbury; has a church, supposed to have been erected, with exception of the steeple, in the reign of Stephen; places of worship for Baptists, Independents, and Wesleyan Methodists; a free grammar school, founded in the reign of Philip and Mary, and scveral other small charities, and a national school. There are some paper and hair-cloth manufactories, tanneries, and some malting. Market-day, Wednesday. Four fairs annually. Drayton is supposed to have been the Caer Draithon of the ancient Britons, and one of their principal towns. On Bloreheath, about 2 m . from the town, a sanguinary battle was fought between the houses of York and Lancaster, in which the latter were defeated. Area of par. 13,080 ac., partly in Staffordshire. Pop. 4680.

DREBACH, Drehbach, or Dräwig (Ober and Nieder), a vil. Saxony, circle Zwickau, bail. Annaberg. It contains a church, which has been recently renewed; and has manufactures of lace, limekilns, tileworks, bleachfields, a spinning, and some saw and other mills. Pop. 2237.

DREBKAU, a tn . Prussia, gov. of, and 50 m . S.S.W. Frankfort-on-the-Oder. It contains a castle, church, burgher scheol, and hospital; and has manufactures of linen; trade in cattle, and four annual fairs. Pop. 902.

DREGHORN, par. Scot. Ayr; 4477 ac. P. (1851), 1828.
DREHIDTARSNA, a par. Ireland, Limerick; 996 ac. Pop. 320.

DREM, a small vil. Scotland, co. of, and 4 m . N. Haddington; a station on the North British Railway.

DREMPT, a vil. Holland, prov. Gelderland, 8 m . S. Zutphen, on the Old Ijssel, with a Reformed and a R. Catholic church, and a school, and inhabitants occupied in agriculture. Pop. 1100.

DRENGFURT, a tn. Prussia, gov. Königsberg, circle of, and 11 m . N.N.E. Rustenburg, on the Omet. It is the seat of a court of justice; and has manufactures of linen and leather, a trade in cattle, several mills, and three annual fairs. Pop. 1749.

## DRENSTEINFURT

867
DRESDEN

DRENSTEINFURT, a tn. Prussia, prov. Westphalia, gov. of, and 12 m . S.S.E. Münster, l. bank, Werse. It contains a castle, church, and chapel; and has manufactures of linen and wooden clogs, a trade in cattle, and two aunual fairs. Pop. 1150.

DREN'THE, a prov. Holland, bounded, E. by the kingdom of Hanover, S. and W. by prov. Overijssel, W. by Friesland, and N. and E. by Groningen; between lat. $52^{\circ} 35^{\prime}$ and $53^{\circ} 12^{\prime} \mathrm{N}$. ; and lon. $6^{\circ} 8^{\prime}$ and $7^{\circ} 4^{\prime} \mathrm{E}$. ; greatest length, N. to S., 43 m. ; breadth, 38 m . ; area, $948 \mathrm{sq} . \mathrm{m}$. It is in general more elevated than the surrounding provinces, especially in the centre, from which the ground falls away on all sides; so that no streams flow into the province, but numerous small ones flow out of it on all sides. There are also several small lakes. The soil is in general sandy, and large portions of the province are covered with heath and morass; those parts which are elevated forming good land when cleared of turf, which is extensively wrought. In the heaths, also, large boulder stones are found, much prized for building sea-dikes. The principal grain crops are rye and buekwheat, though barley and oats are also partially cultivated. Chicory, cole, and clover seed are also raised, and excellent flax and hops are grown. Oak, ash, linden, birch also, and other timbers cover a considerable area. The principal wealth of Drenthe, however, consists in brceding horses, sent as foals, to be reared in Friesland; rearing superior cattle and sheep, the latter yielding fine wool, and excellent mutton; multitudes of swine, and poultry of all kinds, and bees. Manufacturing industry exists only to a limited extent, though some cotton and woollen weaving, boat-building, brewing, distilling, candle-making, tarining, and oil-expressing are carried on. The climate is dry and healthy, though somewhat sliarp, and the people are in very comfortable circumstances. Its capital is Assen ; and it is divided into three cantons, and subdivided into 30 cominunes; and has 121 common schools, attended by 10,000 children. Pop. (1841), 72,484; of whom 67,698 are Protestants, 3264 R. Catholics, and 1401 Jews. Pop. (1850), 83,269.

DRESDEN, one of the four great circles (Kreis-directionsbezirk) into which the kingdom of Saxony is divided, bounded, N. by Prussia, E. circle Bautzen, S.E. and S. Bohemia, and W. circles Zwickau and Leipzig; area, 1279 geo. sq. m. It wholly belongs to the basin of the Elbe, which traverses it from S.E. to N.W., and towards both banks of which the surface slopes down into tolerably level tracts of great fertility. In other parts it is very mountainous, particularly in the S.W., where it is covered by lofty ridges of the Erzgebirge, which here attain a height of 2800 ft . It is much more pastoral than agricultural, and great numbers of sheep, horned cattle, goats, and swine are reared. In some parts wood is abundant, but in others is so scarce that several districts depend much on Bohemia for supplies both of wood and coal. The chief wealth of the circle is derived from its mines, which include silver, copper, lead, antimony, cobalt, iron, copperas, coal, lignite, and marble; and though not so productive as in earlier times, are still worked to a great extent, and produce a large revenue. Besides the manufactures in metal, those of glass and porcelain are very important, but, in other industrial branches, this circle scarcely equals any of the other three. For administrative purposes, it is divided into 11 bailiwicks (Amtsbezirk). Pop. (1849), 481,042; of whom 472,536 are Lutherans, and 6757 R . Catholics.

DRESDEN [Latin, Dresda or Dresena; French, Dresde], a city of central Europe, cap. kingdom of Saxony, on both banks of the Elbe, here crossed by a fine stone bridge; lat. (Frauenkirche) $51^{\circ} 3^{\prime} 18^{\prime \prime}$ N.; lon. $13^{\circ} 44^{\prime} 47^{\prime \prime}$ E. (L.) ; 103 m . S. by E. Berlin, and 230 m . E.N.E. Frankfort-on-the-Main. It lies in a picturesque and fertile valley in the Saxon wine district, and consists of the Altstadt [old town], with its suburbs Pirna, See, and Wilsdruf, and the adjoining new quarter of Friedrichstadt on the W., all on the l. bank of the river; and the Neustadt [new town], on the r. bank. The Altstadt is composed of lofty houses, lining regular, but
narrow, and dingy, though tolerably clean streets, presenting as in the market-places, more especially the new market, sur rounded by the principal hotels, and the old picture gallery, some rather picturesque features. The suburbs and new

> 16. Townhall (Kathhaus) a. Alt Markt (Old Market) b. Neu Markt (New Market) c. Market-place and Statue d. Bautzuer Platz. parts of the town, inclnding the Neustadt, are more openly built; houses not so lofty, generally of a pleasing exterior, and frequently having gardens attached.

Though few of the buildings of Dresden present remarkable architectural features, there are few cities possessing so many attractive collections of art and antiquity. The principal edifices are the royal palace [Georgenburg], a large unsightly building; the new theatre, one of the handsomest in Germany; the old picture gallery in the new market, the townhall in the old market, the house of assembly, arsenal, mint, Marcolinian palace, the new post-office, on the W. side of the city; the Zwinger, built in 1711, by Augustus II., and intended for the entrance yard to a magnificent palace, which was never erected, and consisting of six pavilions, united by a gallery of one story; the Brühl palace, and the Augusteum or Japaneso palace, in the Neustadt. The handsome bridge which unites the two sections of the city is 1420 ft . long, and has 16 arches. It was originally built in the 13th century, and was brought to its present form by Püppelmann, in 1727-31. Davoust blew up two of the arches in 1813 to cover his retreat; and one of the same arches was carried away by a great flood in the Elbe, March 31, 1846, on which occasion much damage was done to the city and the country around. Dresden has 19 churches and chapels, of which the most important are the Frauenkirche [our Lady's Church], on the left hand side of the accompanying illustration, founded in the 11th century, and whose large dome withstood the cannon balls of Frederick the Great; the R. Catholic church, opposite the end of the bridge, adjoining the royal palace, with which it communicates by a private covered way, a pretentious decorated, but tasteless building, in the Italian style; the Kreuzkirche [Church of the Holy Cross], and the churches of St. Jolnn and St. Sophia, the last seen in the view over the R. Catholic church.

The numerous rich collections in the city include the following:-the picture gallery in the new market, and for the better reception of which a magnificent new building is in process of erection, on the N.E. side of the Zwinger; this collection, the finest out of Italy, includes works by all the first Italian masters, and a very numerous collection of the Dutch masters; attached to this gallery is a collection of casts from the antique. The Zwinger contains the historical muscum or Rustkammer, including a fine collection of warlike weapons, offensive and defensive; a very complete collection of en-

## DRIBURG

gravings [Kupferstichsammlung], exhibiting a complete history of the art of engraving; and a collection of casts in plaster from the Elgin marbles. It formerly contained a small natural history collection, which, along with the wing of the

The city is well supplied with beautiful and elegantly laid out walks. After the continental war, the whole of the fortifications were thrown down, and their site converted into gardens and promenades; besides which, the Brïhl terrace, in front of the Brühl palace, overlooking the Elbe; the great garden [Grosse Garten], in Pirna suburb, 5 m . in circumference, and adjoining it the nursery of fruit trees, the gardens of the Japanese palace, the gardens of the Marcolinian palace, the botanic gardens, Anton's garden, Prince Maximilian's garden, Struve's chemical mineral water establishment, \&c., are all pleasant and favourite places of public resort.

Dresden appears originally to have been a village of Wendislı fishermen, on the r. bank of the Elbe, where the present Neustadt is situated. In the 11 th century, the village came to be on the l. bank, where the Altstadt now stands. In 1510 it was fortified, and in the beginning of the 18 th century, under Augustus I. and 11., it attained its greatest point of splendour. Since that time it has been the theatre of many and important historical

Zwinger containing it, and the opera house adjoining, was destroyed by fire during the insurrection of May 1849. In the lower floors of the royal palace are the celebrated Grune Gewölbe [green vaults], containing the Saxon regalia, and a dazzling collection of jewelry and articles in vertù, in silver, stone, ivory, pearl, \&c., gathered together by various Saxon monarchs. Among them are works by Michael Angelo, Peter Vischer, Dunglinger, \&c. In the Augusteum, in the Neustadt, named the Japancse palace, from some grotesque figures outside, and built for a summer residence by Augustus II., are an interesting collection of antiquities, a library of 300,000 volumes, and 2800 MSS. ; and the famed collection of porcelain and terra cottas, including specimens from all countries, and of all ages, and presenting to the eye a complete history of the ceramic arts.

Dresden possesses an academy of art, and school for architecture. It had an academy of medicine and surgery prior to 1846 , in which year it was discontinued by vote of the assembly, leaving only in existence the veterinary school, and botanic garden, which were connected with it. It has likewise an institution for the blind, and one for the dumb, several hospitals for diseased persons, for the poor, for foundlings, and for orphans; and public baths for the poorer classes. Among its learned and other societies are one of economy, one of mineralogy, founded in 1816 by Werner, and now united to the natural history and medical society; and societies for horticulture and botany, Saxon antiquities, statistics, \&c. It is well supplied with educational institutions, among the principal of which may be named the military school, the gymnasium, the Kreuzschule, two normal seminaries for teachers, numerous public and private schools, free, and others for poor children.

The manufactures of Dresden are not important; the china, for which the city is famed, being made chiefly at Mcissen, 14 m . distant. To some extent, however, there are made articles in gold and silver, mathematical and surgical instruments, which bear a good repute, straw hats and plait, artificial flowers, painter's canvas and colours, white lead, maccaroni, musical instruments, \&c. Dresden has also a foundry for casting bombs and cannon, and in the neighbourhood there are coal mines, iron and glass works, and manufactories of chemical stuffs. Its commerce is not great, any more than its manufactures, though of late years, and since the development of the railway system, the trade with foreign parts has considerably increased. A good deal of business is done with the upper parts of the Elbe, by means of the steamers, which ply as far up as Testchen, passing on their way through the Saxon Switzerland. Three lines of railway meet at Dresden, and have their termini near each other in the Neustadt-the railway to Leipzig, that to Görlitz and Prussian Silesia, and that to Prague.
events. It suffered severely during the Seven Years' war; and during the French war it was alternately the headquarters of Napoleon and of the Russian and Prussian army. September 9, 1830, a popular revolution took place, in consequence of which King Anton resigned in favour of his nephew, and Saxony obtained a constitutional form of government. Another insurrection broke out in May 1849, when many lives were lost; the opera house and part of the Zwinger were burnt, and much damage done in various parts of the city. Pop. (1834), 66,133; (1846), 89,327; (1849), 94,092 ; of whom 88,181 Lutherans, 553 Calvinists, 4411 R. Catholics, with a few German and Greek Catholics and Jews.-(Wigand's Conversations Lexicon; Förster's Deutschland; Private Information; Statistische Mittheilungen aus dem Königreich Sachsen, 1851.)

DREUMEL, a vil. Holland, prov. Gelderland, 17 m . W. Nijmegen, with a R. Catholic church, the ruins of an old parish church, and a school. Inhabitants engaged in agriculture and cattle-rearing. Pop. 1465.

DREUX [anc. Duroscassax], one of the oldest tns. France, dep. Eure-et-Loire, on the Blaise, near to where it joins the Eure, 20 m. N.N.W. Chartres. It is built at the foot of a hill, crowned by a dilapidated castle; has many old buildings, among which are the parish church, an interesting Gothic edifice of the 13 th century, with a tower of the 16 th; and the Hotel de ville, of the 16 th century ; containing a museum of antiquity, \&c. The castle, above-mentioned, contains a chapel, founded in 1142 ; to which has been added the costly mausoleum of the Orleans family, finished by Louis Philippe not long before his expulsion. Dreux has a chamber of commerce, several tanneries, and some trade in grain and other provisions. When it was founded is uncertain ; but it had its own counts, and a mint, A.d. 1031. It was long the capital of the county of Drouais, now merged in dep. Eure-et-Loire. It was taken and ravaged by the Anglo-Normans in 1188; in 1593, Henry IV. took it by assault, after an obstinate siege of 18 days, in which its defences were much damaged; they were never repaired, and the town soon thereafter decayed. Pop. 5547.

DREWENZ, a river, E. Prussia, which rises in the S.E. of gov. Königsberg, a little W. of Hohenstein, flows N.W. to Osterode, where it expands into a lake of same name, stretching irregularly E. to W. On issuing from the S.W. extremity of the lake, it flows first S.S.W. past the town of Neumark, then turns W.S.W., passes the town of Strasburg, forms the boundary between Prussia and Poland, again enters Irussia, and joins r. bank, Vistula, 4 m . E. Thorn, after a course of about 100 m .

DREWSTEIGN'TON, par.Eng.Devon; 7200ac. P. 1315.
DRIBURG, a tn. Prussia, prov. Westphalia, gov. of, and 39 m. S. Minden, on the Aa, at the foot of the Stellberg.

It was once fortified, but is now open ; contains a R. Catholic parish church, and has manufactures of fire-arms, a trade in cattle, and two annual fairs. Its baths, situated a little E. of the town, beneath the old castle of Yburg, are much frequented. The water which supplies them is a chalybeate, said to be one of the strongest known. Pop. 2200.

DR1BY, par. Eng. Lincoln; 1410 ac. Pop. 97.
DRIE1)ORF, a tn., duchy of, and 25 m . N.E. Nassau. It is walled; contains two castles, both ruinous, and a Protestant church; and having been almost burnt down in 1819, has been rebuilt in a much improved form. Pop. 646.

DRIEL, two vils. Holland, prov. Gelderland:-1, 28 m . S. W. Arnhem, r. bank, Maas, with a Reformed and a R. Catholic church. Pop., agricultural, 2815.-2, 8 m . N. Nijmegen, with a Reformed and a R. Catholic church, and a school. Pop., agricultural, 900.

DRIESEN, a tn. Prussia, gov. of, and 64 m . N.E. Frank-fort-on-the-Oder, on an island formed by the Netze. Its fortifications have been demolished; but it is still entered by six gates, is the seat of a court of law, contains two market places, a church, and burgher sehool, and has manufactures of woollen and linen cloth, a tannery, brewery, distillery, and some shipping and general trade. Pop. 3653.

DRIETOMA, a vil. Hungary, Hither Danube, co. of, and 6 m . from Trentschin. It contains a parish church, and has several mills. Pop. 1719.

DRIFFIELD (Great), a market tn and townslip England. co. York (E. Riding), the former pleasantly situated at the foot of the wolds, 27 m . E. by N. York, at the head of a navigable canal, communicating with the IIumber at Hull. It consists chiefly of one large and broad street, stretching N. to S.; houses of brick, well-kept, plentifully supplied with excellent water, and lighted with gas. It has an ancient parish church, of Gothic and Saxon architecture, four Dissenting places of worship, a national school, at which upwards of 100 children receive instruction; and three daily schools, a mechanics' institution, reading-room, and dispensary. The principal manufactures are carpets, woollens, and cotton goods, to a very small extent. Market-day, Thursday. The Hull and Bridlington railway has a station here. Area of township, including chapelry of Little Driffield, 4910 ac. Pop. (1841), 3377.-(Local Correspondent.)

DRIFFIELD, two pars. Eng.:-1, Gloucester; 1310 ac. Pop. 148.-2, York (E. Riding); 7520 ac. Pop. 3477.

DRIGG, par. Eng. Cumberland; 3610 ac. Pop. 429.
DRIMNAGH, par. Irel. Dublin; 732 ac. Pop. 345.
DRIN, or Drina.-1, [anc. Drinus], A river, Turkey in Europe. It rises on the $N$. frontier of Montenegro and Albania, flows N.E., receives from the right numerous tributaries, considerably augmenting its volume, forms, for about 70 m ., the boundary between Bosnia on the W. and Servia on the E., and falls into the Save; lat. $44^{\circ} 52^{\prime} \mathrm{N}$. ; lon. $19^{\circ} 30^{\prime}$ E.; 57 m . W. by N. Belgrade; total course, 180 in.-2, Drin, or Drino [anc. Drilo], A river, Turkey. See Albania, p. 63.

DRINA, a river, Turkey. See Drin.
DRINAGH, two pars. Irel.:-1, Wexford; 1171 ac . Pop. 436.-2, Cork; 12,869 ac. Pop. 4589.

DRINKSTONE, par. Eng. Suffolk; 1750 ac. Pop. 505.
DRINO, a river, Turkey. See Drin.
DRIOS, a dist. or settlement, British Guiana, on the banks of the Upper Corentyn, about lat. $2^{\circ} 1^{\prime}$ N.; lon. $56^{\circ} 28^{\prime} \mathrm{W}$. The men are tall and well-made, from 5 ft .5 in ., to 5 ft .7 in . in lieight, and ornament their bodies by incision, like the S. Sea Islanders. They also paint the whole body red, but generally allow the face to remain of its natural colour, sometimes, however, painting the half of that also red.

DRISHANE, par. Irel. Cork; 33,085 ac. Pop. 8868.
DRÖBAK, a small tn. and seaport, Norway, prov. Aggershuus, $18 \mathrm{~m} . \mathrm{S}$. by W. Christiania. It contains a church, and carries on a considerable trade. Pop. 1500.

DROGHEDA, an anc. tn., parl. bor. and seaport, Ireland, cos. Meath and Louth, on both sides of the Boyne, about 4 m . from its embouchure in the Irish Sca, 26 m . N. Dublin, with which it is connected by railway; lat. $53^{\circ} 42^{\prime} 48^{\prime \prime} \mathrm{N}$.; lon. $6^{\circ} 21^{\prime}$ W. (R.) Both portions of the town lie partly in hollows, and partly on rather steep acclivities. It consists of four prineipal streets, which interscet each other at right
alleys. The streets are all tolerably straight and regular, but are very ill kept. The greater number of the houses are built of brick, and are in general substantial and well constructed. There are also a number of fine old family mansions in the town, but which are now inhabited by a somewhat different class from those by whom they were first occupied. The supply of water is very deficient, the greater portion being brought to the town daily on donkey carts, some being obtained also from a few public pumps. The strcets are lighted with gas, but very scantily. As is the case in most Irish towns, Drogheda has extensive suburbs, composed of miserable cabins, which greatly disfigure the approaches.
